ROQUE (Ray) a city Spain Andalusia prov and
 30 m S E Cadiz and 7 in N W Gibraltar Most of the
 houses are low but some of them are two and even three

et ries. The principal streets are paved and all are provided with lamps. Inside the townhouse which stands in the Great square the noble buildings and institutions consist of a

granary a foundling hospital and asylum for the poor, in
medieval various schools, and a parish church a monastic
institution with a church which has served as a chapel of
ease and in which the poet and soldier Cadogan who was

Killed at the siege of Gibraltar lies buried a Franciscan monastery now converted into a prison and an oratory. Outside the town are a pretty alameda, a hermitage and the

cemetery. The manufactures consist of acute cordage, liqueurs vermouth, leather soap, earthenware, several flour-mills and the trade is confined to the importation of grain,

and other articles of primary necessity. San Roque was built in 1704 by the Spaniards, after the loss of Gibraltar they used the remains of Cartis as a quarry. It is very

healthy on which account, and the cheapness of living it is much resorted to by patients from Gibraltar Pop 7612

BOUL FMAU/R [anc. *Itapes Houve*] a tn France, dep Gard in a fertile wine district r bank Rhone, here crossed by a suspension-bridge, 25 m N F Nîmes It has a re-

stone-quarries, and is believed to be the spot where Hannibal crossed the Rhone with his army and elephants, preparatory to his passage of the Alps. It has considerable manufactures of canvas and silk, also saw mills, oil-works and distilleries, and a trade in wine, brandy, horses, and cattle. P. 2860.

ROQUES (Loe), a group of hills, Carlsrun Sea, near the N coast of Venezuela, lat. 11° 57' N, lon. 66° 58' W, in the **ROQUELAS**, a vil. Spain, Andalusian prov. and 11 m S W Almorá, W side, Gulf of Almería. It is regularly built, has a church, courdhouse, prison, primary school and the remains of two old castles, a productive fishery and a trade in cattle, assa, and mules. Pop. 2200.

ROQUEVAIR, a tr. France, dep. Doubs, in the Mûlons, on the Illevalle 11 m N P. Marolles. It consists principally of a long irregular street, lined by houses, which are lofty and have a respectable appearance, but on the other side of the river there is a suburb with a large square planted with several rows of trees. The manufactures are soap, olive-oil and paper, and there is some trade in dried fruits, olives, silk oil and wax. The best red and sweet wines of the department are grown in the neighbourhood. Pop. 1034.

ROKAA, a tr. Norway, prov. and 67 m S L. Trondhjem on a small affluent, and near the source of the L. on the N side about 7000 ft above sea-level in one of the coldest Norwegian districts, but is a tolerably thriving place, indebted for its prosperity to the copper-mines which have long been worked in the vicinity, and which yield an average of about 250 tons annually. Pop. about 500.

ROKANA, a remarkable mountain, British Guiana about 300 m S W Georgetown Demerara lat. 5° 40' N, lon. 60° 36' W. It belongs to the older schistose formation and is 2400 ft high, the highest of a group of the same formation including Mucunuma, Ayagat, and the C. (C. 1000 ft. Maruma, forming a quadrilateral figure 2, 5, 6, 6 m long by 1000 m broad, some of them have remarkably crumpled, and others a remarkable type, about 1000 ft high, the highest of numerous highly waterfalls and cascades some of them 1000 ft and 1200 ft high. The waters from the Maruma and the group generally flow in different directions to those of the most important rivers of S. America, the Amazon, the Orinoco and the L. Essequibo.

ROREFF or **RORENGA**, a tr. Sende on a rocky eminence, L. bank Indus immediately opposite the decayed town of Sukkur 16 m S E Sukkur lat. 2° 44' N, lon. 69° 58' E. It has externally a very striking appearance, its buildings clustering up the rock as if piled on each other. Of three lakes in the Indus here one is occupied by the waters of Sukkur, and is covered with palm trees, and the other with numerous tombs surmounted with urns of glazed porcelain. The bold and lofty banks covered with groves and rich vegetation, the picture which is the great fort of Sukkur, the antique towns of Roreff and Sukkur and the vast river, form a scene scarcely anywhere surpassed in grandeur and beauty. (Thurston). But internally Roreff is its agreeable and lively, the streets are mostly so narrow that a camel in passing occupies their entire breadth, the dwellings, owing to the absence of chimneys are also and begrimed with smoke, the heat is great, and the place unwholesome from the want of free currents of air and the accumulation of refuse in the open spots, and the town is haunted by crowds of miserable dogs which act as the only scavengers. The houses though lofty, in many instances consist merely of a timber frame, filled up with wicker-work and untempered mud they are flat-roofed and many are furnished with wooden balconies, in which the inhabitants pass much of their time. One of the streets is roofed in with palm leaves. Of 40 mosques the chief on an elevated site was built by a lieutenant of the Emperor Akbar and is a massive brick edifice with three domes and covered with glazed porcelain. The masonry is tolerably good and well supplied. A few manufactures of paper, leather, silk and cotton fabrics are carried on by the Mahomedans and of jewellery and metal goods by other classes of the population, which includes Hindians, Hindus, Helioches, Afghans and Moghuls, the whole estimated to amount to 8000. — *Bombay Geog. Journal*.

ROISCHACHEN, a tr. and par. Switzerland, cant. and 7 m. E N. E. St. Gall S. where Lake of Constance. It contains a church and several chapels, a music-school, and hospital

possesses a tolerable collection of pictures and has manufactures of linen, blankets and flax and worsted mills. Its harbour is good, and enables it to carry on an extensive trade particularly in corn for which its market is the most important in Switzerland. Pop. 1037.

ROIS, or **ROSA**, a river, Russia, flows in W of gov. Kiev, between Lipovets and Makynovka, rises E S E, past Purovitch, Lipovets, then N E, and a little above Tcherkass, joins the Dnieper, total course about 100 m.

ROSA (Monte), a mountain of the Pennine Alps, on the frontiers of the Swiss can. Valais, and Piedmont and above Mont Blanc, the loftiest mountain in Europe its summit being 15122 ft. above sea-level, lat. 45° 50' N, lon. 7° 52' E. It is formed by the union of several mountain chains two of which a retching E and W from the central nucleus present a vast inaccessible ridge, commencing at the Col du Mont Cervin on the W and terminating in the Cima de la Tice on the E, while another vast ridge, though of shorter length meeting the former at right angles stretches N to the Cima di Jaz, and S to the Col d'Ollas, both on the Val de Lys and Val Sesia. The mountain thus has the shape of a four-rayed star or cross, all the loftiest summits of which are ranged along the N and S. rays more especially the former. Where the rays meet four angles are formed, the one on the N E which is the most prominent, including the glacier of Margagnan, another on the N W, comprising the great glacier of Gorner or Zermatt, a third on the S W containing the glacier of Lys, and the fourth on the S E, composed of several large but less prominent glaciers. The nucleus where the rays meet, though in some respects the most commanding, is not the loftiest summit, being exceeded in height by other three lying immediately N of it, and differing not more than 100 ft. in elevation. The Zermattsummit, the lowest of the three, though supposed by measure to be the highest, is the only one which has yet been ascended. All these summits are composed of a fine-grained granite and a beautiful crystalline mica. Monte Rosa forms part of the water shed between the basins of the L. on the N and S. The rays of the star from the N to the former, and from the S and S E to the latter.

ROSA SAKRA, several tws. S. America, including — 1. A tr. New Granada, dep. Cundinamarca, prov. and 22 m P. Antioquia with rich gold mines. P. 2610. — 2. A tr. Mexico, prov. and 82 m N. Coahuila with rich silver mines. Pop. 4000.

ROSARIO (three places Brazil) — 1. A tr., prov. Sergipe on the Corri 8 m N Santa Amaro with a parish church. The chief centre in the district is cotton. Pop. 4000. — 2. A vil. and par. Brazil, prov. Santa Catarina on the Bay of Berto, from which it is sometimes called *Encosta de Berto* 10 m S W. Dos Reis. It has a church and a primary school, mineral springs and a considerable number of distilleries. The cultivation is mainly rice, and sugar-cane, many of the inhabitants are soldiers. P. 2000. — 3. *Raposa*, Grande A tr. prov. and 50 m N. Maranhão L. bank Tocantins about 60 m above its mouth. It contains a parish church and a townhouse, and is a considerable trade in cattle, cotton and rice. The rice is the produce of the district, but much of the cotton is brought down from the interior and shipped at the harbour of the town, which is access from the sea by small vessels. Pop. (dist.) 3000.

ROSARIO or **SAN AMARO**, a vil. and com. on a beautiful plant, in the Tropic, not far from Laguna. It consists chiefly of about 200 houses grouped round a church and has some manufactures of linen and a trade in corn, maize, fruits and vegetables. Pop. 1600.

ROSARIO-DE-OCUVA, a tr. New Granada, prov. and 30 m N E Pamplona, beautifully situated in a valley of same name, near the source of the Tula. It consists of several clean paved and well built streets, has a parish church and a considerable trade in oxen, mules and cattle. The first Co. Cuban congress was held here in 1821.

ROSAVERO, a tr. Naples, prov. Calabria-Ultra I. 83 m N E. Reggio on a height, surrounded by marshes, near L. bank Messina. Pop. 1760.

ROSA, a seaport, Spain, Catalonia, prov. and 37 m N E Girona, on gulf of its name, lat. 42° 17' N, lon. 8° 7' E. It consists of one large street along the shore and seven others which cross it and a torrent divides the town into two parts.

At the E. stands the fortress in a ruinous state, in which it has remained ever since it was besieged by the French in 1808. It has an elementary school for both sexes, a parish church, another castle for the defence of the bay on a peak S.E. of the town, and a battery with five guns at its foot but there is no pier. It has some flour-mills and fishing, and a trade in wine oil, brandy, cork, and sugar almonds, steel, hemp, raw hides, staves, iron, timber, machinery, &c. Ross is placed near the site of the ancient Rhoda, which is supposed to have been near the headland at San Pedro de Roda. Pop. 1948.

ROBASCO a vil and com Italy Piedmont, div Novara, prov. Lomellina, in a plain with a church. Pop. 1605.

ROBATE, a vil. AUSTRIA Italy prov. and 15 m. N.W. Pavia. It has a court of justice, three churches, and a trade in corn. Pop. 1976.

ROBBERCON a vil and par Ireland co. Kilkenny. Area of par 367½ sq. Pop. 1776.—The village, on the Harrow opposite New Ross, of which it is a suburb, is an ancient place containing the picturesque remains of an abbey founded in 1267, a church, school, and school, a police barrack, a distillery and a tannery. Pop. 378.

ROBMITZ, or ROSSVITZ, a market in Lower Austria on the Schmelz at the E. base of the Manhartsberg 20 m. N.W. Kornsburg with a church a townhouse, several tile-works, and a trade in corn and wine. Pop. 1967.

ROBETTA a vil Moravia, circle Hradec lordship and near Strlick with a church a chapel, and a mill. Pop. 128.

ROBICIANO a vil Naples, prov. Abruzzo Ultra I. B.E. Civita di Ferma, on a hill 1 bank Pescara. Pop. 1169.

ROBICIANO a vil Naples, prov. Campania, on a hill with a handsome church. Pop. 1025.

ROBICOFF a tn. and seaport France, dep. Finistère in a bay which forms a fine natural harbour opposite the Isle of Batz, 23 m. N.W. It has a handsome church, partly in the Gothic and partly in the Italian style. The harbour is well sheltered by a jetty and the whole place is filled with sailors and smugglers. In the garden of the old Capuchin convent there is a prodigious fig-tree under whose branches, supported by scaffolding 200 persons could find shelter. The defender on his tower 6 ft. Scotland, after the battle of Culloden, landed here. Pop. 1302.

may often be seen in the market-places, loaded with corn, fruit, and other provisions. Roesman suffered dreadfully from the Turks in 1668. Pop. 6908.

ROSENAN ROSEN or ROSENOW, a market tn. Austria, Transylvania, 16 m. S. W. Krassitz. It was once fortified, but only some vestiges of the walls now remain. It contains a Protestant and a Walachian church, and a ruined castle of great antiquity, situated on a height immediately above the market-place. On the barren in the neighbourhood, are the ruins of the old fortress of Eilenburg. Pop. 3211.

ROSENBERG, or **OLANNO**, a tn. Prussia, Silesia, gov. and 24 m. N. E. Oppeln, in a well-wooded but marshy district with three R. Catholic churches several schools and an hospital; manufactures of linen and hair, a nail-foundry, and tile-works. Pop. 2660.

ROSENBERG a tn. Prussia, gov. and 17 m. E. S. E. Marienwerder and on a lake of same name with several law-courts and offices a Protestant church, and has four annual fairs. Pop. 2369.

ROSENBERG or **ROSENBERG**, a market tn. Hungary, Hither Danube, on the Ipan, 1 bank Wieg. 24 m. N. E. Neusohl. It contains a Protestant church, and a high school and has manufactures of earthenware and paper. There is an excellent spring in the neighbourhood. Pop. 2632.

ROSENBERG or **ROSENBERG**, a tn. Bohemia, circle and 23 m. S. Budweis, 1 bank Mohel, with a church and school townhouse, hospital and castle. The last is surrounded on three sides by the Moldau, and has a remarkable tower about 80 ft. high, and nearly as much below ground, and walls 12 ft. thick. The inhabitants live chiefly by agriculture and weaving. Pop. 1228.

ROSENBERG (ROSEN and KLEIN) two nearly contiguous vils Prussia, prov. Saxony gov. and 16 m. S. E. Magdeburg, on the Saale, with a church tile-works and several mills. Pop. 1866.

ROSENBERG, a vil. Bohemia, circle Leitmeritz about 90 m. from Agram at the foot of the Rosenberg, above the Libe. It contains a church and a school and has some manufactures of linen and hosiery and two tile-works. Pop. 1368.

ROSENEATH par. Scot. Dumfriesshire, 8 m. by 2 m. Pop. 1044. The village of Roseneath lies near the mouth of Loch Gart, 22 m. W. N. W. Glasgow, and is much frequented for summer-quarters.

ROSENFELD, a tn. Württemberg, circle Schwarzwald, hall, and 6 m. S. E. Sigmaringen. It was once surrounded by walls, contains a Latin school and has several mills. Pop. 1307.

ROSENFELD, a tn. Upper Bavaria, near the confluence of the Giessen with the Inn each of which rivers is crossed by a bridge 31 m. S. E. Munich. It has several public offices, four churches, a townhouse, and hospital; manufactures of articles in brass, marble-works, and a trade in corn, wine, wood, and malt particularly the last, of which nearly 10,000 tons are annually produced from the salt springs in the neighbourhood. Pop. 2740.

ROSENTHAL, a tn. Hesse-Cassel, on the Bünkrift, 11 m. N. E. Marburg. It has manufactures of ribbons, an iron and numerous running mills, a distillery and a trade in cattle. Pop. 1597.

ROSTO a tn. Naples prov. Capitanata, dist. and 16 m. S. W. Lucera, on a hill with an hospital. Pop. 3820.

ROSETTA, a marit. tn. Lower Egypt, on W. arm, Nile, 26½ m. N. E. Alexandria. It is finely situated, well built and has a European appearance. Salted fish, leather, and iron goods are manufactured to some extent and the trade is still considerable, although it has fallen off greatly since the opening of the Mahmudiya canal. Here, in 1799 was discovered the famous Rosetta stone, which formed the key to the deciphering of the Egyptian hieroglyphics. It is now in the British Museum. Pop. about 16,000.

ROGIATTO, or **ROGIAT**, a vil. Austria, Dalmatia, circle and little more than 1 m. from Ragusa on Mount Bardo, above the Ombla; with a parish church. Pop. 1106.

ROHEIM, a tn. France, dep. Bas-Rhin, at the foot of the Vosges, in a beautiful valley, on the Moselle, 18 m. S. W. Strasbourg. It is surrounded by a wall flanked with towers, and entered by three gates. It is divided into three quarters—the high, middle, and low town; contains two churches, both of them remarkably handsome, a townhouse and hos-

pital; and has manufactures of linen, and glassfields. There are mineral springs in the neighbourhood. Pop. 2666.

ROBIENNA, a tn. Russia, gov. and 100 m. W. N. W. Wlad, near r. bank Dnieper. It was once a place of considerable importance, though now in a very dilapidated state, and contains several R. Catholic churches, and a Russian college. Under the Polish government, it was the capital of Samogitia. In the struggle for independence in 1831 the Lithuanian insurgents took possession of this town, after defeating the Russian troops. Pop. about 1600.

ROBIER, two places, France.—1. a tn., dep. Basogne, 30 m. S. E. Amiens with manufactures of hosiery P. 2496.—2. (anc. Schme) [anc. *Robierum* *Lezouren*] a tn., dep. Marne, at the foot of a vine slope on the Marne, 10 m. S. E. Nancy. It was formerly a place of strength, surrounded by walls, flanked with towers, of which part still remains. It has a cotton-mill and a fine breeding-stud. The salt springs, to which it owes its name have long ceased to be worked. Pop. 2061.

ROBIERS (Luz) a tn. France, dep. Maine-et-Loire, 16 m. S. E. Angers agreeably situated r. bank Loire. Pop. 1080.

ROBIGNANO a tn. Italy Piedmont, dist. Alessandria, prov. and 4 m. S. W. Casale. It is the seat of a court of justice and has three churches, one of them a large and handsome structure, a superior school two confraternities, and two valuable endowments. Pop. 2319.

ROBIGNANO, a vil. and com. Tuscany, on the top of a hill of same name, within view of the sea, about 17 m. from Leghorn. It is the seat of a court of justice, and has a parish church and a school. Pop. 4401.

ROBINAR, a vil. Transylvania. See *ROBINAR*.

ROBINGY, an isl. Indian Archipelago. See *ROBIN*.

ROBKEEN par. Ire. Cork 1875 ac. Pop. 870.

ROBLAW a tn. Russia, gov. and 98 m. S. E. Smolensk on the Ozer at the confluence of the Stamborka and Glazovka. It has a considerable trade in agricultural produce. Pop. 5996.

ROSLIN, a well known vil. Scotland, co. and 7 m. S. Edinburgh, on a plain, 1 bank N. E. It consists, for the most part, of one principal street, crossed at right angles by a smaller. The houses in the former are pretty well built of stone, and tiled. There are a chapel belonging to the Establishment a Free church and two juvenile schools; an extensive gunpowder manufactory, and a glassfield. Close by the village are the celebrated ruins of Roslin Castle, and adjoining it the still more celebrated chapel. The former stands on a rocky eminence, nearly surrounded by the lake but little more than fragments of its walls now remain. It was long the seat of the St. Clare earls of Caithness and Orkney but the date of its erection is uncertain. The chapel stands on rising ground on 1 bank of the Esk, amidst the most beautiful scenery. It was founded in 1446, and is one of the most entire and exquisite specimens of ecclesiastical architecture in Scotland.

ROBLITON, par. Eng. Derby 1191 ac. Pop. 879.

ROBLON, a tn. and com. Portugal, prov. Beira, com. and 96 m. S. E. Castello Branco. The metal molybdenum is found in the neighbourhood. Pop. 1160.

ROSE, a market tn. and par. England, co. Hereford. The town, 11 m. S. E. Hereford, on an eminence, at the foot of which flows the Wye, is divided into two parts, called the Borough and the Foregate. It is well paved, lighted with gas, and has many handsome shops and comfortable dwellings. The principal public buildings and institutions are a handsome parish church, in which the pillars support John Kyrle, Father of Rose, is interred; places of worship for Independents, Baptists, Wesleyans, and Friends a blue-coat school, and numerous other charities. The iron trade, which formerly flourished here, has long since declined and under malt and wool are now the principal articles of trade. Pop. 2674. Area of par., 3118 ac. Pop. 4617.

ROSS, numerous places, Ireland, including—1. an isl. in the lower Lake of Killarney, containing the remains of an ancient castle.—2. A par., co. Galway, comprising parts of Lough Corrib and Mask, and the Devil's Mountain, which rises 1111 ft. high. Area, 53,508 ac. Pop. 2698.

ROSS, or **ROSCAMON**, a small market tn. and par. Ireland, co. Cork. The town, 33 m. S. W. Cork, at the head of a narrow creek called Ross Harbour, consists of four small

streets and a square, and contains a small Gothic cathedral used as the parish church, a St. Catharine chapel, a national school and a dispensary. Ross was formerly the see of a bishop, which was united to that of Cork in 1566. P 1041 Area of par 13,350 ac. Pop. 499

ROSS AND CROMARTY two N counties of Scotland, but generally treated of as one, the latter considering merely detached portions of the former. See **CROMARTY**. They form an extensive maritime district, extending from the N Sea to the Atlantic, bounded E. by Inverness and the Beaulieu, and Moray Firth E. by the N Sea, N by the Firth of Dornoch and Sutherlandshire and W by the Atlantic Ocean. The county of Ross comprises also the large island of Lewis (which see). Area of the whole, including the islands, 1,904,000 ac. The W coast, which terminates N with Loch Breacan, and S. with Loch Ailsh is bold and rugged and deeply indented with bays and inlets. The principal bays those just named are Loch Carron Torran, Fionn, Cromarty, Little Loch Breacan and Gairloch. The principal inlets on the E. coast, are Beaulieu Loch and Firth and Cromarty Firth and Dornoch Firth. The peninsula lying between it formed by the first two, is called the Black Isle. A great portion of Ross and Cromarty consists of lofty rugged mountains irregularly grouped, with deep intervening glens and ravines. Some of the former reach an elevation of from 3500 ft. to 4000 ft. In the W part of the county pasture of excellent quality abounds, but the agricultural portions are those which extend along the Firth of Moray Cromarty and Dornoch where the advantages of a fine soil and climate. As in most of the other counties in Scotland, agriculture has been much improved here of late years, the crops of wheat and turnips being at present equal to those in the more S counties. Potatoes, oats, and barley are raised by the smaller tenantry. A marked improvement has taken place also in the breeds of cattle and sheep, both of which are extensively reared. There are no rivers of any considerable size in either of the counties, but there are several fine lakes the principal of which is Loch Maree, about 12 m long by 2 m broad. The united counties return a member to the House of Commons. Principal towns, Tain, Portree, and Dingwall. Pop. 62,707

ROSS (New) a port for market on river-port Ireland co. Wexford, advantageous situated on the Barrow about 2 m. below the confluence of the Bore 21 m W by N Wexford. It is united by a bridge over the river with the suburb of Rushmore (which see) is lighted with gas and contains two Established churches two R. Catholic chapels, places of worship for Presbyterians, Independents, Methodists, and the Society of Friends a friary nursery market-house, cow market fish market, fever hospital dispensary, brewer's and barwick on endow grammar-school, a news-room and circulating library. Tanning and brewing are carried on to some extent, and the trade of the port is considerable, vessels of 200 tons being able to discharge at the quay at low water and of 800 tons at spring-tides. The bay returns a member to the House of Commons. Pop. but including Rushmore 9999.

ROSS (New) a vil and com Italy Piedmont, div. Coni, prov and 7 m 48 W Saluzzo by bank rails. It has several handsome mansions a small square, in which the ancient parish church stands, and the remains of an old castle. P 2079 **ROSSANO** a vil in Naples, prov Calabria-Ultra, on a rocky height, 8 m S. Gulf of Taranto and 29 m N of Cassano. It is an agreeable town, well built place, surrounded by walls, and defended by a castle and contains a cathedral faced with marble 14 other churches seven monasteries, two pantries, a diocesan seminary and an hospital. It is a very ancient place, and is said to have been founded by the Centuri, and after it had fallen into decay to have been restored and colonized by the Romans. It was taken by assault, and pillaged by Totin, King of the Romans. Pop. 1560

ROSTOCK, a vil Mecklenburg-Schwerin, in a flat district, 1 bank Warnow, which is here navigable, and forms an inland lake communicating with the Baltic, 56 m E N E Lübeck. It is surrounded by walls and ramparts, and consists of the Old, the Middle, and the New town. Of these, the Old town is the most irregular and the Middle town the most handsome. The New town also is regularly built, and

contains a considerable number of good streets and houses. The only square deserving of notice are the market-place in the form of a regular quadrangle, and the Bittcher Platz, so called in honour of Bittcher, whose statue, executed by Schadow adorns its centre. The edifices most deserving of notice are the palace of the grand duke, the warehouse, a building of singular appearance with seven towers, the church of St. Mary, a light and lofty structure of the 14th century with a curious burnt front, the churches of St. James, St. Nicholas and St. Peter, the head guard-house the convent of the cross, the university with a library of 85 000 vols the public school, the theatre, the house in which Bittcher was born, and the house in which Grotius died. The manufacture consists chiefly of tobacco, starch soap glue, leather candles, woolen and cotton goods, sailcloth mats, glass, ironmongery, playing cards, and chemical products. There are also iron works, gunworks, iron-forges, oil, gypsum and other mills. The towns belonging to the port of Rostock, which admits vessels drawing 8 ft. is considerable, and its trade is of great extent. The principal exports are corn, wool, flax, butter and salt provisions. The fisheries are also important. The following table gives the number of vessels entered and cleared at the port of Rostock in 1843-50 and 1864-5 —

| Years. | Entered. | Cleared. | Years. | Entered. | Cleared. |
|--------|----------|----------|--------|----------|----------|
| 1843 | 614 | 6-4 | 1848 | 507 | 437 |
| 1844 | 653 | 506 | 1849 | 880 | 656 |
| 1845 | 71 | 148 | 1850 | 880 | 603 |
| 1846 | 79 | 702 | 1851 | 520 | 592 |
| 1847 | 747 | 103 | 1852 | 614 | 506 |

Rostock is the seat of a high appeal court, and several other courts and offices and possesses a university which though at one time distinguished having had Kepler for one of its professors, has now only from 80 to 100 students a house of commerce and several societies, literary and benevolent. It is an ancient town and once formed an important member of the Hanseatic league, which it, however, abandoned in 1439. From that period its trade began to decline. Pop. 20 868.

ROSTOK, several places, Bohemia, particularly 1—1 A vil. circle Bidehow on a small stream in a mountainous district 4 m from Starbenbach with a church Pop. 1017 —2 A vil. circle Rakonitz, 1 bank Moldau, 8 m from Prague with a church a school, a castle, and several mills. Pop. 642.

ROSTOW or ROSTOV two places, Russia.—1 A tn., gov. and 40 m S.E. W. Jaroslavl on the Lake of Yero. It is one of the oldest towns in Russia, and occupies a large space, surrounded by a wall and fosse, and defended by an old citadel. It is the see of a bishop, contains numerous churches, one of them a cathedral an episcopal palace, diocesan seminary a superior and other schools, and five monasteries and has manufactures of linen, vinegar white lead vermilion soap, candles, and leather, an important trade in the above articles of manufacture, and in corn, hemp, honey and wax and one of the most important annual fairs in Russia, which attracts Russians, Germans, Transcaspian and Tartars to the number 15 000. Pop. (1847) 78-9—2 (or St. Demetrius), A tn., gov. and 228 m E.S. P. Ekaterinodar on the Don at the junction of the Tameruk, about 20 m. from the Sea of Azof. It was once a place of considerable strength, and is still surrounded by a earthen rampart and a ditch, and defended by some outworks, though in a very dilapidated state. It contains three churches, and a military school, and has building-yards extensive government depots, some shipping an important trade and fishery and much-frequented annual fairs. Pop. (1851) 10,889.

ROTA, a seaport, Spain, Andalusia, prov. and 8 m. N. W. Cadix, at a point of land almost surrounded by the sea, at the N. W. extremity of the Bay of Cadix; lat. 36° 30' 26" N. lon. 6° 16' 15" W. (n.) It has a good pier 146 yards long and there is good and safe anchoring ground for small craft. There are a townhouse, several schools, public and private, a promenade, a church with a magnificent Gothic nave, four hermitages, and a cemetery. Agriculture forms the chief occupation the commerce consisting mainly of the exportation of a few vines of wine, and some other produce of the district, and in the importation of oil, coal, &c. Rota was sacked by the English in 1702. Pop. 7997.

ROTA an isl. Pacific Ocean lat 14° 9' N. lon. 148° 18' E. (n.), 12 m. long and 5½ m. broad. It is billy in its E. and N. portions, particularly so in the centre, but becomes lower to the S.W. In the S. E. it is tolerably high and perpendicular on the sea-shore, presenting thus a straight wall and at its angles vertical fissures like the embrasures of a fort. In other parts the land descends gradually to the sea, surrounding in long and low points. A few coco-nut trees are met with on the N. side the unsuitable portion is so encumbered with bushes that it is difficult to penetrate water is to be had, but it is extremely bad, some cattle and particularly pigs coco-nuts bread fruit, bananas and a few other vegetables, constitute the entire wealth of the island.

ROLIAS, an extensive fort, Punjab about 6 m W. of r bank Jallum, and 100 m N. N. W. Lahore. It occupies a narrow oblong ridge about ½ m long and isolated on three sides by precipitous ravines, and has works of immense strength, consisting of massive stone walls, 20 ft. thick strengthened with bastions, and provided with a double row of loopholes. An immense well, lined with masonry furnishes an ample supply of water.

ROTELLO a tn Naples prov. Salerno, dist. and 7 m S. E. Larnio, on a height. Pop. 1800.

ROTEMBURG a tn. in Hesse-Cassel Niederhessen, on the Fulda, 30 m S. E. E. Cassel. It is walled, has three gates, and is divided by the river into the old and new town, which communicate by a bridge. It is the seat of several courts and public offices, contains a castle, and two churches, and has a beetroot sugar-factory and several tanneries, and mills. Rothenburg was in early times the residence of a collateral branch of the ruling family. Pop. 3647.

ROTENBURG a tn. in Hanover gov. Stade 6 m N. W. Hanover, at the confluence of the Wümme Boden and Wi. dau. It has several public offices and a church. Pop. 1656.

ROUGEN a vil. Prussia gov. and 7 m S. E. Eylau. Chapelle, on the Voudre with a R. Catholic church and manufactures of woollens and casement and dye-works. Pop. 1587.

ROTH a tn. Bavaria, circle Middle Franconia, near the confluence of a small river of same name with the Rednitz here crossed by a bridge, 14 m S. N. Nürnberg. It is walled has a Protestant and a R. Catholic church a castle, and a Latin school; manufactures of valvet and woollen cloth, chaises and waggons, tobacco and various articles in steel wire, glass-mirrors and needles and a trade in cattle and hops. Gessner the physiologist was born here. Pop. 3428.

ROTH a river Würtemberg rises near Wirmach flows N. N. W. past Bohl, and joins r bank Danube, 7 m S. W. Linz; total course about 83 m.

ROTH DONNAWITZ a tn. Bohemia. See DONNAWITZ.

ROTH MACHNITZ or RECKNITZ a tn. Bohemia, circle and 19 m N. N. E. Tabor in a level valley watered by the Trava. It contains a deanery church castle, school and town-house and has a tile-work and several mills. Pop. 1860.

ROTHA, a tn. Saxony circle and 10 m S. E. Leipzig, on the Pleisse with a church a castle manufactures of woollen cloth a distillery a weaving, a paper and two flour mills. Pop. 1119.

ROTHAU (ONCK and UFFEN) a vil. Bohemia, circle and 10 m N. W. Bilggen a tn. valley on the Kolmbach. It has two schools some manufactures of lace, two limestone quarries and several iron and rolling mills. Pop. 1788.

ROTHBLERY a tn. and par. England co. Northumberland 18 m N. W. Morpeth, in the beautiful valley watered by the Coquet. It has an ancient church and a free school. Area of par. 84798 a. Pop. 2546.

ROTHENBURG a vil. Bavaria, Lower Franconia, in the centre of the Hochland, at the source of the Mainfeld 27 m. W. N. W. Würzburg. It contains a castle, and an old hunting-lodge of the Elector of Mainz, and has a saw and two iron mills. Pop. 1068.

ROTHENBURG a vil. and par. Switzerland, cant. and 4 m N. W. Luzern. It is an ancient place was once walled and had a castle, of which some ruins still remain. It has bridges both over the Gerbaba, and the Rothbach. That over the latter is 750 ft. long and 26 ft. broad, it is considered a master-piece in its kind. Pop. 1524.

ROTHERAY, a royal bur. near St. Neots, cam. co. Brit., beautifully situated at the head of a fine bay of same name, N.E. side, island of Brit. lat. 55° 50' N.; lon. 5° 1' W.

The town occupies the centre of the height of the bay, from which it stretches along its E. and W. shores for about a mile on either side, in the form of a series of tasteful villas, ascending in some parts so closely together as to present the appearance of an elegant one-sided street. In the central part the houses are dispersed over a wider area. Here occur several transverse streets of various dimensions, and several rather narrow lanes all, however, tolerably straight, though wanting in uniformity of direction. The streets, of which there are about 16 in all, are kept clean, and are well lighted with gas. The houses are nearly all of green-stone, which abounds in the island and are generally substantially built. The only modern edifice, exclusive of the churches, calling for particular notice, is the townhall and county buildings. This handsome structure is surrounded by a massive tower, and comprises a spacious court-room and other apartments. The place of worship are an Established church, and a chapel of ease in connection with it three Free churches a United Presbyterian a Reformed Presbyterian a Baptist, and an Episcopalian. Two of the Free churches have handsome spires, forming the principal architectural ornaments of the town. There are a number of schools and seminaries of a superior description, a school of industry several libraries, and a subscription news-room. It has several extensive cotton-spinning and weaving factories, a patent ship, three building-ships a considerable coasting trade, and it is the head quarters of a fishing district, employing 243 boats, and 832 men and boys. The main pier of the harbour is a substantial erection of whinstone.

Rotheray is much resorted to in the summer season as sea-bathing quarters. It is also a select place of residence for invalids, on account of the singular mildness and salubrity of its climate. One of the principal attractions for strangers here is the ancient royal castle, a fine ruin standing nearly in the centre of the town. It is of great antiquity but of various dates, the original being unknown and was at one time a favourite residence of the kings of Scotland. Rotheray gives the title of duke to the Prince of Wales. Pop. 7354.

ROTHAAL-GUNSON, a mountain range in the E. of the Prussian Rhine province, forming a continuation of the Westerwald. It stretches nearly 45 m. between S.W. and N.E., and gives rise on its N.W. slope to the Lams and Ruhr and on its N.E. to the Lahn and Elber.

ROTHEMAY par Scot. Berff. 8 m. by 6 m. P. 1413.

ROTHLEY a vil and par England, co. Leicester above 1 m. S.E. Mount Sorrel. It has an ancient and spacious church, Wesleyan and Baptist chapels, and is the main of a parsonage of the Templars, on the site of which a modern mansion has been erected. Area of par., 5480 ac. Pop. 2047.

—2, a vil Bohemia, circle and 85 m. E. Chrudim with a Protestant and a R. Catholic church, and two schools; and several mills. Pop. 4264.

ROTHWELL, two places, England:—1. A vil and par co. York (W. Riding), pleasantly situated in a fertile vale, 4 m. S.E. Leeds. It is an ancient and irregularly-built place;

with a neat parish church, surmounted by a square embattled tower. Wesleyan and Primitive Methodist chapels, a large tobacco press, manufactures of rope and twine, a woollen-mill and several quarries of building-stones. Area of par. 8715 ac. Pop. 7641—2. A vil. and par. on Northampton, S side of a rocky hill, 4 m. W N W Kettering. It was successively a place of much more importance than at present, surrounded by strong walls, and a favourite residence of William the Conqueror. It has an old parish church, with a fine porch and an embattled tower. Independent and Wesleyan chapels. An hospital, manufactures of shoes, silk velvet and plush goods, and a large cattle-fair which lasts several days. Area of par. 4489 ac. Pop. 2321.

ROTHWELL, par. Eng. Lincoln; 2890 ac. Pop. 385.

ROTHAD, a tn. Naples, prov. Basilicata, S.E. Lago-negro, at the foot of a mountain with an hospital and an annual fair of three days. Pop. 3800.

ROTONDELLA, a tn. Naples, prov. Basilicata, 18 m. E. Lago-negro on a lofty height above L. bank Rosaro. It contains a monastery. Pop. 2340.

ROTHENSALM, a fort, Russia, N. side, Gulf of Finland, 12 m. S.S.W. Fredericksburgh. It is erected on one of the small islands which stud the mouth of the Kyma, and forms a strong defence of the harbour which is spacious and deep, and an important station of the Russian navy. Within the works on the island are extensive barracks and an arsenal, and in the town are a church, school, hospital, and building-docks. Pop. 600.

ROTHSALAER, a vil. and com. Belgium, prov. Brabant, on the Dyle, 17 m. N.E. Brussels. It has a brewery two flour-mills and a trade in agricultural produce. Pop. 1916.

ROTT, a river, Bavaria, which rises near the village of Hainsberg dist. Mühldorf flows E.N.E. past Neumarkt, and after a course of about 50 m. joins L. bank Inn, nearly opposite to Schuchting.

ROTTA, a vil. and par. Tuscany com. Pisa, on the Leghorn road, between Castel del Bosco and Pontedra, in the lower Val di Arno. It contains a parish church, and has a trade in wood and charcoal. Pop. 1551.

ROTTALOWITZ, a vil. Austria, Moravia circlePrerau 18 m. from Witschau, with a Protestant and a R. Catholic church. Pop. 1060.

ROTT, ROTT, or ROTTO an Isl. Indian Archipelago, off the S.W. end, Timor from which it is separated by Rotte or Semoa Strait, about 5 m. wide lat. (Buka Bay S.E. side) 10° 55' S. lon. 123° 5' E. (W.) between 86 m. and 40 m. long, W.E. and S.W. It has a bold, rocky coast, and is of moderate height, with undulating hills, on the S.E. side of the island there is a good and safe harbour called Buka Bay, where buffaloes, pigs, goats, deer, poultry, bees wax, and honey may be obtained. This island is under the jurisdiction of Coepang, is well cultivated, and fertile. It produces millet, maize, cotton, sweet potatoes, fruits, and excellent timber of various sorts, buffaloes, large horses, goats, sheep, and pigs are plentiful; much wild honey is collected; and on the coasts crocodiles are numerous. Hurricanes and earthquakes are not uncommon.

ROTTENBURG, a tn. Württemberg, circle Schwarzwald on the Neckar, 7 m. S.W. Tübingen. It consists of the town proper, on the L. bank, surrounded by a wall with eight gates, and of the suburb of Balingen, on the R. bank, communicating with the town by a bridge. It has well-built houses, spacious streets, and a market-place adorned with a fine fountain, contains two churches and several chapels, a townhouse, university hospital, old castle and old monastery, and has manufactures

of wind instruments, glass, leather, and paper, an iron and numerous other mills. Rottenburg occupies the site of a Roman station. Pop. 6265.

ROTTENMANN, a tn. Styria. See ROTHELMANN.

ROTTENNEST, a tn. W. coast, Australia, lat. 33° 2' S., lon. 115° 25' E., moderately elevated nearly 9 m. long, E. and W., 4 m. broad N. to S., and about 12 m. W.N.W. from the entrance of Swan River.

ROTTERDAM, one of the Friendly Islands. See AN KAMOOKA.

ROTTERDAM [Latin, Rotterodamus] the second city in Holland, both in point of commerce and population. It has in prov. S. Holland, 36 m. S.W. Amsterdam, with which it is connected by railway and R. bank Merwede or Nieuw Maas, 24 m. from the sea. lat. 51° 55' 15" N. lon. 4° 24' 30" E. (W.) It is built in the form of an isosceles triangle, the base and longest side of which is next the river, the land sides being surrounded by the old fortifications, beyond which lie the populous suburbs. The city has as many canals as streets, communication across them being maintained by innumerable drawbridges and it is traversed by the Rotte, a small stream, at the junction of which with the Maas there is a large dyke or dam, whence the name Rotterdam. Many of the canals are planted with trees, imparting to them a pleasing aspect and several of them are so deep as to form excellent harbours and admit the largest ships to lie alongside the warehouses in the middle of the town. The water in them is kept fresh and clean by the flow and ebb of the tide, which rises 10 ft. to 12 ft. Along the river, which opposite the town is 80 ft. to 40 ft. deep, is a fine quay 1½ m. long called the Boompjes [little trees] from a hue of elms, planted in 1615, now grown to a large size. Many of the houses are quaint-looking gabled edifices, overhanging their foundations a considerable way, and the principal buildings being along the chief canals or havens the other streets, though all are well lighted with gas, have a less seemly appearance.

There are several market-places, but none of them is very large, among them are the Groote-markt [Great market], in the centre of which is a metal statue in honour of Erasmus, who was a native of the city, the fish, the sea-fish and the river-fish, the pig, poultry, vegetable, butter, cheese, &c., markets. Rotterdam possesses a number of important buildings including the townhall, courthouses, house of correction, the ex change, the old E. India house, the government dockyards

CHURCH OF ST. LAWRENCE, ROTTERDAM—after Mr. A. W. Collins, R.A.

arsenal rope-walks a mast-dock, &c. There are four Calvinistic churches—the Grootekerk, or church of St. Lawrence, founded in 1414, and finished in 1472, so that, with interruptions, 24 years were occupied in erecting it. It contains some-

wants to De Witt, Kerkens, and De Bruijs, and has shown it was improved in 1844) one of the finest organs in the country having 80 stops and 4500 pipes, and estimated by some superior even to that of Harlem. The other Calvinistic churches are Prinsenhof (Prince's church), Zandkerk (South church) and Ooster or Nieuwkerk (East or New church). Besides these, there are French, English Presbyterian, Scotch Reformed, English Episcopalian, Christian Dissenter, Remonstrant, Baptist and several R. Catholic churches. The benevolent literary and scientific institutions include an hospital for old women and another for old men, two orphan hospitals, a general hospital, a poorhouse, and many friendly and benevolent societies. A Latin school called the Erasmus gymnasium schools of agriculture and navigation five towns and numerous other schools, societies of the fine arts, and of sciences, of literature, and of music.

The inhabitants of Rotterdam are chiefly engaged in commerce which may be divided into three sections, the foreign trade the Rhine trade, and the inland trade. The foreign trade which for many years was very extensive, was totally destroyed by the war with Britain, which broke out in 1803; the vessels that had accepted the British blockade or cruises lay rotting in the harbor, and in ten years the population of the city decreased nearly as many thousands. The defeat of Napoleon at Leipzig, and the consequent change in the condition of Holland acted like a charm upon Rotterdam. The river was once more covered with vessels, and the greatest activity prevailed in every department of commerce. But this pleasant state of matters received a check by the subsequent union of Holland and Belgium, which diverted a great proportion of the foreign trade to Antwerp. Since the revolution of 1830 however, and the separation of the two countries the trade of Rotterdam has resumed its former importance and extent. It sends to the Dutch Eastern possessions, and to the West Indies provisions of all kinds, spices, wines, mineral waters, and manufactured goods. In return for coffee, sugar, spices, cotton, dye woods &c. To England and Scotland, with which it carries on an extensive and lucrative trade, it sends cheese, butter, wax, luscious madder garden-seeds, gilt clover-seed fruits of various kinds ducks, and large numbers of sheep and cattle. With America and with France, Spain, Portugal and some of the States of Europe, a good trade in liquors carried on. The following table shows the number of vessels and the total commerce engaged in the foreign trade in the years 1847-1851, and 1853-

| Year. | Entered | | L. L. | | Yards. |
|-------|---------|---------|---------|--------|--------|
| | Vessels | Tons | Vessels | Tons | |
| 1847 | 1894 | 364,557 | 1874 | 47,322 | |
| 1848 | 1710 | 327,322 | 185 | 36,367 | |
| 1849 | 1763 | 344,885 | 210 | 41,208 | |
| 1850 | 1840 | 358,343 | 204 | 40,624 | |
| 1851 | 1821 | 348,164 | 205 | 40,852 | |
| 1853 | 2262 | 428,227 | 260 | 60,538 | |

Along the Rhine it sends to Germany and Switzerland sugar, coffee, cotton dye-woods, indigo, spices, Dutch tobacco, rapeseed, madder, butter, cheese, fish &c., in return for wheat, rye, Maastricht and Rhine wine, pipe-clay pottery ware Berlin blue, chemical salts, &c.

Besides its extensive commerce Rotterdam has 42 distilleries several breweries, and vinegar-works, five tan-works, ten candle-works, seven dye-works, five sugar refineries, numerous bleachfields and corn, oil, brass, and saw mills, a shoe-factory and eight ship building yards. It has likewise steam communication with London, Leith, Hull, Yarmouth, Dunkirk, Havre, Antwerp, &c., and eleven steam-towing companies.

Rotterdam is the birth place of Desiderius Erasmus, of the naval heroes Egbert Kotman, Jan van Brakel and Cornelius Tromp, and of Jan Hendrik van der Palm, learned in Eastern languages, an eminent orator and one of the best prose writers Holland has produced. Pop. (1850) 88,812.

Van der Aa, *Handboek van Rotterdam* (Handbook of Rotterdam) Rotterdam *Handboek van Rotterdam* (Handbook of Rotterdam).

ROTTERDAM A. A. and port England, on the coast, pleasantly situated near the coast, 4 m. E. Brighton. The village is celebrated for its walls, which not only possess an

important quality, but have the peculiar property of emptying as the tide flows and rising as it ebbs, and is much frequented for bathing, being both provided with machines and good baths. Area of port, 8583 ac. Pop. 1084.

ROTTOPRENO A. vil. and com. Parma, Italy, 6 m. W. Piacenza, R. bank Loggia. It has a primary school, a charitable endowment; and a trade in corn, wine, silk, and cattle. The united French and Spaniards were here defeated by the Austrians in 1746. Pop. 2163.

ROTTUM A. vil. Holland, prov. Friesland, near Heerlen. Pop. 209-3. A vil. Holland, prov. Groningen, 14 m. N.W. Appingedam. Pop. 250-3 (or 25000000). A vil. Holland, prov. Groningen 6 m. off N coast; it is about 5 m. in circumference, and is protected by dunes. In the beginning of the 17th century it was well inhabited, but now its population is reduced to 12 who are occupied in rearing swine, fishing and gathering eggs, of which in June 8000 to 10 000 are collected. A river, W. of the town, rises to the S.E. of the kingdom, a little E. of Wurrah flows first N. N. E., then N. N. W. past Aalsmeer, and after a course of 53 m. joins the bank Denauke, about 7 m. above the R. ROTTERDAM, a m. W. of the town, about 4 m. S. of the R. on a height, above 1 bank Nacker 49 m. S. W. of Rotterdam. It consists of the town proper surrounded with walls with five gates, and of a suburb contains a Protestant and two R. Catholic churches, three chapels, a townhouse, merchants hall and gymnasium, and has manufactures of silk and of mixed silk and cotton goods, calico, quills, and gun powder several tile-works, numerous mills, and a trade in corn. Rotterdam appears to have been at first a Roman colony. At a very early period it rose to the rank of an imperial free town. It has repeatedly been almost destroyed by fire. Pop. 3740.

ROTUMAH, ROTUM or GENTILE ISLAND in the S. Pacific Ocean lat. 12° 32' S. lon. 177° 13' E. It is about 4 m. to 5 m. long from N. to S. and consists of two distinct portions, connected by a low, narrow isthmus apparently of recent formation. It has two roadsides, with very imperfect shelter and is covered with villages along the shore. The inhabitants, who are numerous, are under a king and have been converted to Christianity by missionaries who have two establishments here.

ROTT, or Rott, two places Germany. 1. A in Lower Austria, at the foot of the Mauthenberg, in the frontiers of Moravia, 4 m. N. W. Vienna; with a church, a castle, a Dominican convent and a trade in wine. Pop. 2400-3. 2. A in Bavaria, Upper Palatinate, R. bank Schwarzen 30 m. N. E. Ratisbon with two churches, a castle, an hospital, manufactures of saltpetre and tobacco tile-works, tanneries, and several mills. Pop. 1253.

ROTTBACH or URTENROT, a vil. Lower Austria on the Mauthenberg near the frontiers of Moravia, near Rott. It has a parish church. Pop. 1353.

ROUBAIX A. v. France, dep. Nord 6 m. N. E. Lille, on the railway to the Courty and the canal of La Marq. It is a clean, regular well built town, but has no public edifice deserving of particular notice. It has recently come to considerable importance by its manufactures of table-linen, cotton, and other tissues. Its worsted and cotton mills, dye-works, tanneries, &c. As a central manufacturing locality it attracts purchasers from all parts of France, and has, moreover, a considerable trade in corn wine, and colonial produce. It possesses a chamber of manufactures, and a *conseil de prud'hommes*. Pop. 22 161.

ROUBION, a river France, which rises near Bonville around Die, dep. Drôme flows W. & W. past Montélimar, and after a very winding course of about 40 m., joins 1. bank Rhone opposite to Toul.

ROUCOURT A. vil. and com. Belgium, prov. Hainaut on the Vesre, and the canal of Amiens, 18 m. W. Mons. It has a brewery, a brick-works, three flour-mills, and a trade in corn and cattle. Pop. 1890.

ROUDHAM, par. Eng. Norfolk, 2085 ac. Pop. 140.

ROUPPE (anc. *Roupe*) a m. France, dep. dep. Seine-Inférieure, apparently situated on the Seine, 70 m. N. N. W. Paris, with which and with Le Havre and Dieppe it is connected by railway. It stands in a valley on a gentle declivity facing the S. and is in the shape of an irregular oval, the center of which is marked out by the site of the old ramparts, which

have been levelled down and converted into finely planted boulevards. In addition to the town proper which stands on the right bank of the river there are several suburbs. Of these that of St. Sever on the left bank, is the most extensive. When viewed from the adjoining heights, particularly from

is due to the cathedral, a vast and imposing structure, gradually completed during a succession of centuries, and hence varying much both in the style and merits of its architecture, but still one of the most splendid buildings of which France can boast. Its W front, forming one side of the fair and

the hill of St. Catherine on the N.E. whence it is seen to the greatest advantage, no provincial town in France presents a more magnificent and venerable aspect. A closer inspection does not tend to heighten the impression which a distant view

of St. Ouen with a church regarded as one of the most perfect Gothic edifices in the world with a tower 240 ft. in height, wholly composed of open arches and tracery and terminating in an octagonal crown of fleurons—the church

of St. Maclou a fine specimen of florid Gothic the Tour de la Gruerie-Horloge, a square Gothic tower with arched windows containing the principal clock of the town the hotel de ville, originally part of the abbey of St. Ouen, with a modern front and Christian colonnade, containing in addition to the municipal buildings, a public library of 83 000 vols and a picture-gallery, the palais-de-justice, a Gothic edifice, remarkable alike for the elegance and boldness of its construction, the museum, particularly rich in works of art and other antiquaries of the middle ages, and the Halles, a vast edifice forming three sides of a parallel square and containing a series of halls, in which the principal manufactures of the town are weekly exposed for sale. In the Place de la Halle is a monument erected to the Maid of Orleans, on the spot where the heroines was so infamously committed to the flames.

The staple manufactures are cottons, in a great variety of forms, produced to such an extent as make Rouen the Manchester of France. The other principal articles are broad-cloth flannel bone and ivory combs, confectionary, fine liqueurs, glass, soap, chemical products, earthenware, stained paper, &c. There are also numerous cotton and worsted mills moved by water or steam famous dye-works bleachfields, tanneries, sugar-refineries copper and iron foundries. The situation of the town on the railway from Paris to Havre and on an important navigable river accessible by large vessels, is very favourable for trade. The principal articles are corn, flour, wine, brandy, salt provisions, wax-oil, colonial produce, and the various articles of its manufacture, particularly a species of striped and checked cotton goods called *rouenneries*.

PLACE DE LA PUCELLE, ROUEN.—From France, Monuments of France.

produces. The streets, though long and tolerably straight, are narrow, dark, and dirty, and the houses, for the most part of wood and often faced with slate, are poorly built, and so dirty and crowded as to exclude a free circulation of air. Many of these houses, however, are interesting from their antiquity; and to the W. side of the town, which is of more modern construction, there are several handsome streets, with elegant mansions of stone. To these must be added the rows of houses along the magnificent quays by which the banks of the river are lined. Among the public edifices the first place

Rosen is the son of an archbishop, the best of courts of primary jurisdiction and commerce, and of a court of appeal for dogs. Rosen infirmities and Rosen, and possesses a chamber of commerce and archbishop, owned de *pro* Rosen, which, agricultural society, college, university academy, diamond, summary third class school of hydrography academy of science and art, and school of painting, sculpture, and architecture. It is a place of great antiquity and existed before the conquest of Gaul by the Romans, under whom it took, and for several centuries retained, the name of *Rosengau*. In the 9th century it was taken and pillaged by the Normans, who made it their capital. After the Norman conquest it long continued in the possession of the English, who finally lost it in 1449. 18 years after they had disgraced themselves by the judicial murder of Joan of Arc. Many eminent men have been born here, among others, Corneille, the father of French tragedy, and Fontenelle. Pop. (1862) 91,512.

ROUEGUE, an ancient dist. France, in E. of prov Guyenne. It was divided into Haute-Marque in the S.E., Haute-Marque in the N.W., and Comté in the centre. Rhodan was its capital. It is now included in dep. Aveyron.

ROUFFACH [anc. *Regium Emmentum*] a tn. France, dep. Haut-Rhin, on the Latch 7 m. E. Colmar. It contains a Gothic church, with a chapel, to which numerous pilgrimages are made, and an ancient castle, on a height in the centre of the town, in which several kings of the *Worms* race occasionally resided. The manufacture consists of cotton tissues, and shag or felt for hats. Pop. 8782.

RN GEMONT or E. *Worms*, a vil. and par. Switzerland, can. Vand. 28 m. E. Lucerne. It contains a castle, formerly a Cistercian monastery founded in 1080, and had a printing-press in 1481 the second earliest established in Switzerland. Pop. 1096.

ROUGHAM two par. England.—1. Norfolk 8227 ac. Pop. 374. 2. Suffolk 3840 ac. Pop. 1078.

ROUGHTON two par. England.—1. Lincoln 1020 ac. Pop. 106. 2. Norfolk 1740 ac. Pop. 412.

ROULES [Flemish *Rosendale*] a tn. Belgium, prov Flanders, on both sides the Maas or Mandel, 17 m. S. Bruges. The houses are well built and the streets are wide and regular, the public square occupies a large space, and the townhouse is handsome. The parish church, surmounted by an 14 tower is not otherwise remarkable, but the college is a fine edifice. Besides it, Roules possesses several primary schools, a court, municipal society, and some benevolent institutions. It has numerous extensive breweries, distilleries, tanneries, soap oil and salt works also manufactures of linen, cotton hats, blue, chieft and tobacco. The trade in linen, corn and butter is important, and there are two well frequented weekly markets. Roules was known under the name of *Rodler* in the 9th century. In 1438 it suffered dreadfully from the plague, which almost decimated the inhabitants. Pop. 10,270.

ROULSTON or Rovers, par. Eng. Lincoln; 1630 ac. Pop. 228.

ROI M. a peak. Asiatic Turkey. See RIVAS.

ROUMELIA European Turkey. See RUMELIA.

ROUMYAH or ROUMAYEH a tn. Asiatic Turkey. pop. and about 120 in S. Bagdad, on an affluent of the Euphrates. It consists of about 400 houses inclosed by lofty and dilapidated walls, and has a mosque, bath, and a rich district for devotee of corn and especially of dates.

ROUNTON [Warr. par. Eng. York (N. Riding), 1500 ac. Pop. 216.

ROUPHA, or ALRUPHA, a river Greece, Morea, formed by the junction of the Cephissos and Ladon. It flows W. and falls into the N. part of the Gulf of Argolis, after a course, exclusive of the above streams which form it, of about 35 m. It flows through a very picturesque country and abounds with fish. The Olympic games were celebrated on its banks.

ROIRP a vil. and com. Italy Piedmont, div Turin prov and 18 m. N.W. Pinerolo, near I. bank Cismona. It consists of several distinct villages, and has a parish church. Pop. 2942.

ROUBOUTOU, st. S. Pacific. See OREGON.

ROUBAYX one of the Orkney Islands, off N. coast, Scotland. It is about 24 m. long, N. to S. and about 4 m. broad. The centre consists of high hills, covered with heath, having but a narrow margin round the shore for cultivation. It

abounds with game, and contains many springs of excellent water. The soil is good.

ROUBAYX and Roubaix par. Sect. Orkney. Pop. 1316.

ROUBAYX-Lancaster par. Eng. Worcester 1850 ac. P. 777.

ROUBAYX POINT a vil. U. States, New York, 164 m. N. by E. Albany, W. shore, Lake Champlain, and on the Champlain and St. Lawrence railway close to the frontier of Canada. It has increased rapidly and acquired importance since the construction of the railway which here crosses the lake by a permanent bridge 5000 ft. long, and a swing-bridge 800 ft. by 20 ft. A strong fort to guard the entrance of the lake was commenced here, soon after the war of 1812 by the U. States, and abandoned after an expenditure of about \$200,000, because found to be within the Canadian line. The site has since been ceded to the U. States.

ROUBHAM par. Eng. Oxford 830 ac. Pop. 184.

ROUSSES (Lac), a tn. France, dep. Jura, in an elevated, bleak, and arid district near the confines of Switzerland, 80 m. S.E. Lons le Saunier. It is a poor miserable-looking place, but has a church, remarkable both as being the highest in the Jura, and for standing so exactly on the watershed between the basins of the North Sea and the Mediterranean, that it sends the rain which falls on one side of its roof to the former and that which falls on the other side to the latter. It has some manufactures of cloths, and two annual fairs. P. 1454.

ROUSILLON (Lac) an anc. prov France now forming nearly the whole of dep. Pyrénées-Orientales. It was originally inhabited by the Celts, was subdued by the Romans about a century before the Christian era, passed from them to the Visigoths and then to the Saracens, under Charlemagne was governed by its own counts, was long possessed by the kings of Aragon and was finally united to the crown of France by Louis XIII., in 1643. Perpignan was its capital.

ROUTH par. Eng. York (E. Riding) 3382 ac. 1. 172.

ROUX a vil. and com. Belgium, prov Hainaut 2 m. N.W. Charleroi with a church, primary school, four distilleries, three breweries, a mill manufactory and three flour-mills. Cattle is worked in the environs. Pop. 2810.

ROYATO [anc. *Tellus*] a town and com. Italy Lombardy gov. Milan prov and 12 m. W.W. Brescia at the E. base of Mount Orsino. It has a handsome parish and several auxiliary churches a foundling and an ordinary hospital, an educational institute under the superintendence of the *Studen* of Charity, an old castle, an important weekly market chiefly for cattle, numerous silk-mills, several linen bleachfields and a considerable trade in cheese, corn, wine, and silk. Pop. 6800.

ROVERGO a tn. Italy Lombardy div Genoa, prov and 15 m. S.W. Bobbio, on the Trebbia, in a mountainous district. It has two parishes and two auxiliary churches and an annual fair. Pop. 2336.

ROVELLASCIA a vil. and com. Italy Lombardy prov and about 9 m. S. Como, in a plain near the Lura, with a church and 8 trade in corn, wine, and silk. Pop. 1600.

ROVERELLA a tn. and com. Italy Venetia, prov and 6 m. N. Mantua, with five churches, and a weekly market. It is repeatedly mentioned in the military transactions of Italy during the end of the last and the commencement of the present century. In particular it was here that an armistice was signed in 1796, between Bonaparte and the Prince of Belmonte as viceroy of the king of Naples. Pop. 3386.

ROVEREDO a vil. Switzerland, in the S. of m. Gr. area, 47 m. S.W. Coire, on both sides of the Rhodan, which has been repeatedly caused great devastation by its landslides. Here the prior of Roveredo, and 11 old women, were burnt for witchcraft, by Carlo Borromeo, in 1583. About 30 years before, persecution drove away a number of Protestant families, who were mainly instrumental in establishing the silk manufactory at Zürih. Pop. 729.

ROVEREDO or ROVERAS (Latin *Roboretus*), a tn. Austria, Tyrol, 24 m. N. Verona, beautifully situated in the Lamerthal, on both sides of the Leno, and 1 bank Ezech or Adige, here crossed by a handsome stone bridge. It consists of the town proper and two suburbs, and is well built, many of the houses being constructed of marble, and otherwise handsome. It contains a remarkable old castle called *Junk* situated on a height, in the public square, surrounded with walls, and originally the residence of the Venetian governor; seven churches, a parish-house, academy, gymnasium English

female institute, Capuchin monastery, theatre, hospital in Sicily, and poorhouse. It is one of the principal seats for the manufacture of silk, of which about 900,000 lbs. raw or spun, are annually exported. The number of silk-mills in the town

ROVERENDO.—From Harding's Sketches of Rome and Abruzzi.

and neighbourhood exceeds 50. In the largest one, 500 hands are employed. The other manufactures are leather and earthenware, and there are seven dyerworks. Rovereto is also famous for its fruits, apples, citrons, pomegranates &c. Pop. 8040.

ROVESCALA a vil and com Italy Piedmont div Alessandria, prov Voghera. It consists of two streets and two squares, and has a parish church, an oratory, and a large palace with gardens. Pop. 1868.

ROVIGLIANO [Latin, *Rovigianus*] a town Tuscany comp and about 8 m. E. Florence, in a plain between the last slopes of Mount Fattigiano and a bank Arno. It consists chiefly of two nearly-contiguous villages of same name and contains two handsome parish churches, one of them with frescoes by Michael Angelo. Pop. 4596.

ROVIGNO or **TRIVIGNO** [Latin *Rovignus*] a town and sea port, Austria, Dalmia, gov and 40 m. S. Trieste, on a rocky eminence, on a tongue of land which projects into the Adriatic, and by its sides forms two excellent harbours. It is the seat of a superior civil, mercantile, and criminal court, a sanitary board and maritime consulate, contains 10 churches, including the cathedral, which is built on the model of St. Mark's at Venice, a normal high school and two hospitals, and has manufactures of sailcloth, and commodious docks and yards, in which numerous vessels of considerable burden are built. The port possesses about 188 trading vessels, besides a great number of smaller craft, chiefly employed in the sardine and tunny fishing in which a large proportion of the inhabitants find lucrative employment. Of the two harbours, the larger is chiefly used as a roadstead, in which the largest vessels find good and tolerably secure anchorage the lesser harbour is properly the harbour and is much frequented. The trade is principally in wood, olive-oil and wine. Pop. (1848) 10,688.

ROVIGO [Latin *Rovigium*] a town kingd. of Italy gov and 84 m. S. W. Venice, cap. prov. of its name, on both sides of the Adige into an arm of the Adige. It consists of an upper town San Giustino and a lower, San Stefano which are separated by the river, and communicate by four bridges; and is both surrounded by walls flanked with towers, and defended on its W side by a castle. The fortifications however, are very much dilapidated, and the prospect of the place is much impeded by the unsuitableness of its site. It is tolerably well built, is the seat of several district courts and offices, and though not properly a sea, is the usual residence of the bishop of Adria. The public edifices include no fewer than 27 churches, none of them deserving notice, except the cathedral, three monasteries, two nunneries, a governor's palace, seminary, academy of arts and sciences, and three hospitals. The principal manufactures are leather and saltpetre. The trade is unimportant; but there is a famous annual fair, which lasts eight days. The wine of Rovigo, celebrated in ancient

Vol. II

times is now of moderate quality. Pop. 9800.—The **RUOVRU**, river, 232 yds. in m. bounded W by Mantua N Verona and Padua, E Veneto, and S the river Po, in its general fertile, raising good crops of wheat and maize, producing much wine, excellent fruit, and vast quantities of walnuts, and rearing great numbers of cattle. Pop. 158,788.

ROVNE Rumania, a vil. Hungary, Nether Danube, so Trzebiech about 9 m. from Billein. It contains a parish church and has numerous watermills. Pop. 3079.

ROW par Scotland, Dumfriesshire, 16 m. by 6 m. Pop. 4372. Consists of the handsome parish church, near the entrance to Loch Gair 11 m. N W Dumfries, are numerous elegant villas, chiefly the summer-residences of Glasgow merchants.

ROWANDIZ, or **RAVANDIZ**, a town, Asiatic Turkey, peak, and 230 m. N Bagdad, 1 bank of the Great Zab, lat 36 47 N lon 44 30 E. It occupies a narrow valley, and is protected by a very strong fort, which is built on a little bay, on the saddle of the mountain, it is estimated to contain 2000 houses. The Zab is here very narrow, but rapid and impetuous, and hemmed in between high rocky banks.

ROWHERROW a par England co. of Somerset area 384 ac. Pop. 318.

ROWHID, par Eng Wilt 2665 ac. Pop. 1188. **ROWIN** a (Dane and Lave), a vil Bohemia, circle Chutim, 4 m from Wroctawitz with a parish church parsonage and school. Pop. 1507.

ROWENKO a town Bohemia, circle Ruzman, and 47 m. N E Prague, on the Westelitzsch, here crossed by a covered bridge. It contains a church, townhouse, and school, and has a saw and two other mills. 1 pop 1364.

ROWLER, or **THE BOWEN**, par Ireld. Kilkenny, 10,758 ac. Pop. 2907.

ROWINGTON, par Eng Warwick 8424 ac. P 834.

ROWLEY, par Eng York E. Riding, 6440 ac. Pop. 498.

ROWLEY a vil and township, U States, Massachusetts, 80 m. N by E Boston. The village contains two churches and in the township are several ironworks and other manufacturing establishments. Pop. 1203.

ROWLEY River a par England co. Stafford, on the Birmingham and Dudley canals 7 m. W Birmingham. It consists of several hamlets and clusters of houses, occupied chiefly by persons employed in the numerous collieries and public works in the vicinity and is one of the great central localities of the iron trade. It has a modern church, with a very ancient tower, two distinct churches numerous dissenting chapels, an endowed and several other schools extensive manufactures of nails in which the greater part of the women and girls of the parish are employed blast-furnaces, steel and iron works, &c. Area of par, 8870 ac. Pop. 14,242.

ROWLETON, par Eng Hereford 1878 ac. P 125.

ROWNER, par Eng Hants 1191 ac. Pop. 183.

ROWNO a town Russ gov Volhynia, on an affluent of the Dniester, 116 m. W N W Jassy. It contains several churches and has important animal fairs. Pop. 8270.

ROXBURGH, an island co. New S. Wales, 80 m. N W Sydney; 50 m. long, N to S and 30 m. to 40 m. broad. It abounds with hills and broken islands, but many fertile spots are to be found where the pasturage is very rich. It is watered by the Luron, Mullamara, and Wimbardale, all affluents of the Macquarie, and on all of which good deposits have been found. Area, 672 100 ac.

ROXBURGH, par Scot Roxburgh, 8 m by 6 m. P 1141.

ROXBURGH, **ROXBURGH**, or **TRIVIGNO**, an island co. Scotland bounded, S W by co. Dumfries, S.E. and E Cumberland and Northumberland W Berwick W Middletham and Belkirk. Area, 467,990 ac., of which about two-thirds are occasionally under the plough. There is great variety of surface, but its general character is undulating. A range of lofty hills, called the Cheviot Hills, extends from the E. extremity of the county, 8 W along the border of Northumberland. The highest land occurs on the summit of Catterhill,

90

and other points in the ridge of the Cheviots, on the E.; and the Maiden Paps, Wimbush Hill, &c., between the crests of the Tiviot and the Liddle, on the S. The hills are mostly smooth, dry and green, affording excellent pasture. The E. side of the country is chiefly occupied by the formations of the red sand or new red sandstone group. The W side by the greywacke rocks; the Cheviot or border-hills, are chiefly of N. E. formation, and are covered by the coal measures, where also, as in some other parts of the county limestone is abundant. A considerable portion of the soil is fertile, and where it is so suitable, husbandry is well understood and practised. Large quantities of wheat are grown, but by far the greater part of the country is occupied as sheep-walks. Farms are generally large, and some farmers hold three or more at once. Various branches of woollen manufacture are prosecuted with great vigour and success in some of the principal towns in the county particularly Hawick. The parish of Kirk Yetholm, in Roxburghshire, is celebrated as being the residence of the largest colony of gipsies in Scotland. Principal rivers—Tweed, Tiviot, Gala, Leader, &c. The county contains 31 parishes, and returns one member to Parliament. Jedburgh one of the principal towns, joins with other burghs in choosing a representative. The other principal towns are Hawick and Kelso. Pop 51,642

ROXBURY a tn. U. States, Massachusetts, picturesquely situated about 3 m. S. Boston, with which it is connected across Boston Neck by three broad and beautiful avenues. Its prosperity intimately connected with that of Boston, has advanced rapidly within a few years, and much ground recently under culture is now covered with spacious streets and handsome dwellings. Among the public edifices are five churches, some of them distinguished by their architecture or the beauty of their sites but perhaps the most striking feature within the precincts of the township is the beautiful cemetery of Forest Hills, embracing an area of about 70 acres, entered by an Egyptian gateway and admirably laid out and adorned with trees, shrubs and plants of almost every variety indigenous to New England. Most of the inhabitants are connected more or less intimately with the business and trade of Boston, but among its own manufactures are carpets, worsted and silk girds, and tanneries. Leather cuttings, shoes and fire engines, carriages, paints, white-lead and chemical products shoes, hats, cabinet-work &c. John Elliot, whose missionary labours have justly entitled him to the name of apostle of the Indians, was pastor of the first church of Roxbury for nearly 60 years. Pop. (1850) 18,371

ROY a small isl. Ireland, co. Donegal in Malinbeg Lough, about 73 m. N.W. Londonderry ½ in length and containing about 86 acres of pasture-land

ROYALTON, a vil and township, U. States, Vermont, pleasantly situated on the White River and the Vermont Central railway 31 m. S. Montpelier with a handsome church, an academy and a considerable trade in agricultural produce. Pop. 1650

ROYAN [anc. *Novempages Rogonum*] a seaport in France, par. Bayonne, on a steep cliff & bank and at the mouth of the Gironde, 27 m. S. La Rochelle. It is an ancient place, and has a small harbour, defended by a fort. It has building-docks, at which vessels from 300 tons to 400 tons are built, and is much resorted to for sea-bathing, particularly by the inhabitants of Bordeaux. On an isolated rock, beyond the mouth of the river, which is small encumbered with sandbanks, is a lighthouse called La Tour de Cordouan, lat. 45° 55' 12" N. lon. 1° 10' 15" W (N.), a circular structure, 207 ft high, domed like a church, and surmounted by a tower, and said to have been designed by Louis de Foix one of the architects of the Bastille. Pop. 1961

ROYLTON two parcs. Eng. Norfolk:—1 1324 ac. Pop. 569.—2 1551 ac. Pop. 195.

ROYDON a vil and par. England, co. Essex, on the Eastern Counties railway 5 m. E.S.E. Wern. It has a handsome church, with a square embellished tower; an endowed school, and an ancient manor-house, which has been converted into three buildings, but still retains much of its original grandeur. Area of par., 2295 ac. Pop. 302

ROYE [anc. *Rehaim*] a tn. France, dep. Somme, 30 m. S.E.E. Amiens. It was once a place of strength, and stood 15 sieges, by the loss of which, in 1632, it was almost destroyed. It contains a parish church, with beautifully painted glass and has a considerable trade in corn. Pop. 3764.

ROYSTON, a market tn and par. England, co. Cambridgeshire and Hereford. The town, in a high country, 17 m. N. by E. Hereford, at the intersection of the Herefordshire and the Evesham Street is irregularly built, lighted with gas, and has a venerable church, and places of worship for Independents and the Society of Friends. Malt is extensively carried on, and there is a considerable trade in corn. Area of par., 320 ac. Pop. 3001

ROYSTONE, par Eng. York (W. Riding) 12 708 ac. Pop. 4045

ROYTON a vil. and chapelry, England, co. Lancaster. The village, about 3 m. N. Oldham, in a deep valley, has of late years assumed the appearance of a town. It has regular streets, lighted with gas, and contains a handsome chapel place of worship for Independents Wesleyans, and the Society of Friends, and a national school cotton, fustian, and flannel manufactures are extensively carried on, and many of the inhabitants are employed in the neighbouring collieries and stone-quarries. Pop. 6974

ROZA or *Rowan* (a tomb) a in Hiedoonan, Niam's dominions prov. Aurland, and on the road from that city to the caves of Elbow, 6½ m. W N.W. Dromed, with which town it is connected by a good road, line with Maho stone tombs. Rows stands on the narrow summit of a hill peak, and is encircled by a good stone wall, flanked with towers. It is, in the words of Jaquesmont, 'a cemetery of saints, being full of mosques and Muslim sepulchres, and tenanted chiefly by fakirs or mendicant priests, who are severally attached to the various shrines, and live on the charity of pilgrims, and the revenues of a jaghira or district containing 10 or 12 villages, granted to them by the Hyderabad government. Amongst the tombs at Aurland, but, agreeably to his desire, it is a very plain structure, and attracts much less homage than that of Booshaund-dum, a saint the heroism of whose shrine resembles Holakoty. Many members of the Rozas family are interested at Row, the reputed sanctity of which causes it to be chosen by numerous wealthy Mahomedans as a last resting-place. The mosque here are said to possess the remarkable peculiarity of a cross surmounting the cupola—an emblem unknown in India further northward.—[Jaquesmont, *Voyage dans l'Inde*, &c.]

ROZAVLIA, or *ROZAVLIA*, a vil Hungary, co. Maros, on the Is. 10 m. from Seghed. It has a Greek church, a synagogue, and a fertile soil. Pop. 1285.

ROZDALOWITZ, a tn. Bohemia, circle Brunau, and 26 m. E.N.E. Prague with a castle, church, denary and school a brandy-distillery a tile-work, and a saw mill Pop. 1177

ROZENBURG an isl. Holland, prov. S. Holland, in the estuary of the Maas, 6 m. W.S.W. Rotterdam. It is 6 m. long, S.E. to N.W. by about 2 m. broad. Pop. (agricultural) 996

ROZMITAL, or *ROZMITAL*, a tn. Bohemia, circle Prachin, on the Lomitz, 43 m. S.W. Prague, with a castle, townhouse, chapel and school a smelting furnace, and a rolling-mill Pop. 1706.

ROZBAU a market in Austria, Moravia, circle Posen near 1 bank Betschowa. 19 m. S.E.E. Waidschin, with a church, and a castle, a paper and a walk-mill near it is an old silver-mine. Pop. 2944

ROZBA PALLAS or *PALLAS* a vil. Hungary Thidier Thidier, co. Szathmar 12 m. from Aranyos-Magyar. It has a handsome Greek styled church. Pop. 1024

ROZZO, a vil. Austria, Istria, about 24 m. from Plaine, with a parish church. Pop. 1100

RYNA, a vil. Bohemia. See *HEITEN*
RYA (anc. *Rehaim* or *La*) a vil and par. Spain, Galicia, prov. and 86 m. from Orense, with a church, a townhouse, two primary schools, a trade in wine, and monthly cattle-fair. Pop. 1900

RUABON, a vil. and par. Wales, co. Denbigh, pleasantly situated on the Alyn 5 m. S.E.W. Wrexham. It has a very pleasing and cheerful appearance, an ancient and venerable parish church, with some fine monuments &c.

diarist church, Independent, Baptist, Primitive and Wesleyan Methodist temples, and several coal and iron mines. Near it is Wynnstay, the beautiful seat of Sir Watkin Williams Wynne. Area of par. 14,894 ac. Pop. 11,507.

RUAD, an isl. Mediterranean, about 2 m. off coast of Syria. lat. 34° 46' N., lon. 35° 58' E.; about 4 m. long, and rather more than 2 m. broad. It is little more than a barren rock, but its situation renders it of importance, there being good anchorage between it and the mainland, besides its suitability as a depot for coals. It is the ancient Arsinoë, or Arad of Scripture, whence Tyre is said to have drawn her masts. It was also an important station of the Crusaders. The inhabitants are all Moslems, pilots, ship-builders, and sailors; a great number of the native counting vessels are built here. It is surrounded by the remains of ancient walls, and contains some fine ruins of a Christian church, built by the Crusaders. It also contains a castle or citadel, still nearly perfect, without guns. Pop. (exclusive of women and children) 980.

RUAN, par. 1st Class, 10,744 ac. Pop. 1897.

RUATAN, an isl. Bay of Honduras. See ROATAN.

RUDELAND, a vil. Brunswick, circle and 7 m. S. W. Blankenburg on the Bode. In its vicinity are blast-furnaces and other important iron-works, marble-quarries and marble saw mills, and two remarkable caverns, one called the Bielehölle, with beautiful white stalactites, and another called the Heumanshölle, in which the bones of the extinct great cave bear have been found. Pop. 578.

RUBENACH a vil. Rhénish Prussia gov. and W. N. W. Cochen. with a R. Catholic church, two mills, and a trade in cattle. Pop. 1088.

RUBI a vil. Spain, Cataluña, prov. and about 10 m. from Barcelona, partly on a hill and partly on a plain on an affluent of the Llobregat with a church, and two primary schools, a distillery, and silk, wool and cotton mills. 1. 1816.

RUBIA VA a vil. and com. Italy Piedmont, div. Turin prov. and 18 m. E. Susa. It is a straggling place, and has two parish churches. Pop. 3179.

RUBICON, a river, Italy of some celebrity in Roman history, Caesar having by crossing it finally committed himself to the civil war. It is very doubtful under what modern name it now exists, the honour being claimed by no fewer than three streams—the Piadello, Flumemmo and Luso, all in the Papal States.

RUBIELÓS, several places, Spain particularly — 1, (de Moya), A. ta. Aragón, prov. and 80 m. S. E. Teruel, r. bank Negrovaca, in a plain at the foot of a hill. It is surrounded by an earthen wall, and is regularly built on a tall, a collegiate church, a nursery and a primary school and has manufactures of woollens, earthenware, and carding-washers. Pop. 2285 — 2, (de Hoyos), A. ta. New Castile, prov. and 83 m. from Cuenca, on a height above l. bank Júcar with a church, courthouses, prison, primary school, and oil and flour mills. Pop. 1867.

RUBIEŻÓW, a tn. Russian Poland See RUBIEŻÓW.

RUBIO DEL, or RUBIO, a tn. Spain, Andalucía, prov. and about 55 m. from Sevilla. It is poorly built; contains a church, and an undowed school and has manufactures of pyrexia and an oil, and a flourmill. Pop. 1500.

RUBITE, a vil. Spain, Andalucía, prov. and about 25 m. from Granada, on a height within view of the Mediterranean. It is composed of steep and irregular streets, contains a parish church, courthouses, and primary school and has a distillery, and a trade in wine and brandy. Pop. 983.

RUCKELSDORF, a vil. Bohemia, circle Benátska, on the Ruckelsbach, in the Soudewald. It has a saw and three other mills. Pop. 1008.

RUCKELSDORF a vil. Prussia, Silesia, gov. and 48 m. N. W. Liegnitz, on a small affluent of r. bank Rober. It contains a Protestant and a R. Catholic church, and a castle, and has several mills. Pop. 1053.

RUCKINGE, par. Eng. Kent 8445 ac. Pop. 246.

RUCKLAND, par. Eng. Lincoln 713 ac. Pop. 30.

RUD-BAR, or RUD-BAR, a small tn. Persia, prov. Ghilan, on the l. bank Behud-Rood, or White River; 32 m. S. S. W.

Rosheid. It contains about 500 houses, and though there is little cultivation except in their gardens, it carries on a considerable trade in oil, olives and soap, all of which are exported to Russia.

RUDEBAXTON, par. Wales, Pembrokeshire; 4143 ac. Pop. 689.

RUDBY-IN-CLEVELAND, or MUTTON RUDBY a vil. and par. England, co. York, on the Leven, 4 m. W. & W. Stokesley. It has a parish church, with some ancient monuments. Primitive and Wesleyan Methodist chapels, and a large spinning-mill, which employs above 500 persons. Area of par., 7286 ac. Pop. 1119.

RUDEB&VOORDE, a vil. and com. Belgium, prov. W. Flanders, 7 m. S. Bruges, with some trade in wood, bark, and cattle. Pop. 4230.

RUDDINGTON par. Fife Notts 2180 ac. Pop. 2181.

RUDDRY, par. Wales, Glamorgan, 2639 ac. Pop. 842.

RUDE, a vil. and par. Amuria, Croatia, co. Agria 8 m. from Rakovotek with a parish church. Pop. 1544.

RUDELSDORF a vil. Bohemia, circle Chrást, about 12 m. from Leitomischl, with a parish church, parsonage, and school, and has two mills. Pop. 1450.

RUDELSTADT, a market vil. Prussia, Silesia, gov. and 24 m. S. Liegnitz on a height above r. bank Rober. It contains a castle, a Protestant and a R. Catholic church and has a saw and several other mills. Copper is mined and smelted in the neighbourhood. Pop. 1067.

RUDELZAU or RUDELZAU a vil. Austria, Moravia, circle Pless, on the Oder, which is here crossed by a bridge, 12 m. from Wonskirchitz. It has a church and two mills. Pop. 964.

RUDLN, a small, nl. Prussia, in the Baltic, gov. and 56 m. E. S. Stettin. It was at one time separated from Rügen by a small stream, but, in 1509, a violent storm broke through and formed a channel of considerable width between them. It is about 2 m. long, N. to S., and much less in breadth. It is almost entirely surrounded by rocks and sandbanks. Its only inhabitants are a few fishermen and pilots.

RUDENHAUSEN a market in Bavaria, Lower Franconia, 17 m. S. Würzburg. It is the seat of a court of justice, and has a Protestant and a R. Catholic parish church, a castle, two breweries, tile-works, lime-kilns, a powder and several other mills, a trade in corn, hops, wine, and fruit, and five annual fairs. 1. op. 954.

RUDERSBERG, a vil. W. Hirsberg circle Jaxt, bei Wehlheim, on a hill above r. bank Walsau with a parish church and important six markets. Pop. 1268.

RUDERSWILL, a vil. and par. Switzerland, cant. and 18 m. E. N. E. Bern, l. bank Emme. The church and parsonage are beautifully situated on a height. In 1484 the plague carried off the whole of the inhabitants except two. Pop. 2566.

RUDLSHEIM a tn. Nassau r. bank Rhine, opposite to Bingen, 13 m. W. & W. Mainz. It contains an old castle, and a R. Catholic church, and has a considerable trade in the excellent wine grown in the district, chiefly on the terraces which overhang the Rhine. At the upper extremity of the town is a picturesque round tower at its lower extremity stands the old massive quadrangular castle of Bingerburg and at some distance higher up the castle of Bingerbrunn. P. 3509.

RUDWORTH par. Eng. Gloucester 1204 ac. Pop. 322.

RUDGWICK, par. Eng. Sussex 5380 ac. Pop. 1091.

RUDHAM two par. Eng. Norfolk — 1, (East), 4881 ac. Pop. 999 — 2, (West) 2835 ac. Pop. 487.

RUDIANI, a vil. and com. Italy Lombardy gov. Milan prov. Brescia, dist. and 5 m. S. W. Chiari. It is a clean and stirring place, with a parish and three auxiliary churches, manufactures of linen, and several oil mills. Pop. 1470.

RUDIG or W. Prussia a tn. Bohemia, circle and 4.8 W. S. on a small affluent of the Goldbach. It has a church, a school, a townhouse and several mills. Pop. 1090.

RUDKJÖBING once LARVINGSBORG a tn. Denmark, W. coast, isle Langeland. It is an old place, and in early times was fortified. It has only a winter-haven, admitting vessels which draw about 8 ft. water, but its quay is commodious. The inhabitants are chiefly seafaring, or agricultural. Pop. 2290.

RUDNA, a vil. Hungary, Thibet Thais, co. Torontol, 10 m. from Tuzsavar. It contains a Greek non-cathedral church.

The inhabitants are Walschians, and raise much wheat and maize. Pop. 1815.

EUENOK, or RUENOA, a vil. Hungary, Thither Thois, co. Abauvar in a mountainous district, 7 m. from Jassai. It has a half-brother springs, with a bathing establishment. Pop. 1152.

RUDOLPHSTADT, a vil. Bohemia, circle and 4 m. from Budweis in a mountainous district. It has a parish church, a school an old castle, now used as an arsenal manufactures of lace and silver-ware. Pop. 870.

RUDOLPHSTADT a tn. Germany, prov. principally Schwarzwald-Rodolstadt, pleasantly situated between hills 1 bank Saale, here crossed by a bridge, 16 m. S. Weimar. It is surrounded with walls, with four gates, and is well built; contains a palace, in which the prince resides, three churches, a townhouse arsenal, gymnasium, normal school, hospital and library of 40,000 vols., is the seat of several courts and public offices, and has manufactures of woollen cloth; a bell foundry a spinning-mill, tile-works, and a trade in wool, fruit, and garden produce. Pop. 5743.

RUJUNO, par Eng York (E. Riding), 5080 ac. P. 591.

RUL [anc. *Durcorran*] a tn. France, dep. Bouen, 13 m. N.W. Abbeville, with a remarkable ancient chapel now closed among the historic monuments of France. Pop. 1174.

RULAS, a river, Spain, formed by it the junction of several torrents from Mount Villacorta to Sierra de Guadalupe, on the frontiers of New Castle. Flows S.W. and joins 1 bank Guadiana, after a winding course of about 45 m. It becomes dry in summer and is generally fordable even in winter.

RULDA a tn. Spain Leon prov. and 20 m. from Villa delid, on the Zapardiel. It contains a parish church a suppressed monastery a court-house, and primary school and has a trade in good wine grown in the district and in iron and colonial produce. Pop. 2470.

RULFILL (O) a vil and com. Italy Piedmont, co. Turin prov. and 7 m. W. Turin 15 m. S. of Mont-Rossella, near 1 bank Lancia. It has a parish church. 1 op. 1904.

RULIL or **RULIL** [anc. *Rodulium*] a tn. France dep. Seine-et-Marne 4 m. N.E. Versailles. It contains a handsome parish church of three naves, with a fine portico and bellry. Near it is the chateau of Malmaison the favourite residence of the Empress Josephine whose remains lie in the church besides those of her daughter Hortense, ex-queen of Holland. Pop. 3337.

RULNGAU a vil and par Switzerland, can. and l. Bern, in a narrow valley 1 bank Emme. It contains a parish church and a pebbly shore and once a fine old castle, embosomed in a beech forest. In the revolution of 1798 this castle was so completely demolished, that not a vestige of it remains. The inhabitants live by weaving linen, and rearing cattle. Pop. 2028.

RULPANO a tn. Naples, prov. Otranto, 16 m. S.E. L. Gallipoli, on a hill; with a Capuchin convent and a school for *belles-lettres*. Pop. 1860.

RULFEL [anc. *Rufano*] a tn. France, dep. Charente, on the Lize, a little above its confluence with the Charente. 7 m. N. Angoulême. It is a cheerful-looking place, and both well and regularly built. It has a court of first resort, and a communal college; a considerable trade in corn, olives, cheese, which bears its name, cattle, and game-pieces, and near it is the fine old chateau of Breuille. Pop. 2784.

RULFELSHEIM a market tn. Hesse Darmstadt, Starkenburg, circle Odenburger with a church. Pop. 1422.

RULFINO-DE-LEVI (Raf) a vil and com. Italy Piedmont, dir. Genoa, prov. and on the heights above the town of Calvario, near 1 bank Exella. It has a parish church, and a massive tower, the only remains of its ancient castle. 1 op. 1828.

RULFORD, par Eng. Lancaster; 3102 ac. Pop. 861.

RULFORTH, par Eng. city of York; 2430 ac. P. 399.

RUPINQUE, a maritime tn., W. Africa, a little E. Cape Verd. It carries on a considerable trade. Pop. about 1500.

RURIO, a tn. Naples, prov. Principato Citra, W. N. La Hala, on a lofty hill. It contains a richly-decorated chapel. Pop. 2220.

RURIO a market tn. and par England, co. and 15 m. S. W. Warwick pleasantly situated on rising ground, 1 bank Aven and at the junction of the London and N.-Western

the N. Midland, the Leamington and Warwick, the Trent Valley, and the Rugby and Stamford railways. It consists of some ancient and irregular, and of several modern and well-formed streets, generally paved and lighted with gas, and lined with houses for the most part substantially built of brick, but occasionally interspersed with others of wood, covered with thatch. The only objects of interest are an ancient parish church, with a massive square embattled tower; a handsome modern district church, Wesleyan, Baptist, and K. Catholic chapels; a grammar-school occupying a splendid range of buildings in the Elizabethan style, possessed of an endowment estimated at 25000 per annum, and new ranking, mainly through the exertions of the late Mr. Arnold, as one of the most celebrated schools of England; a national and a charity school and several almshouses. The railway stations, particularly that of the N. W. system, are extensive and handsome structures. Rugby derives all its importance from its school which has induced many opulent families to settle in it, and from the number of railways which centre in it, and necessarily create a very extensive transit trade. It has no manufacturing establishment of any consequence, except an iron foundry but it has two weekly markets, one of them for corn, and 18 annual fairs, chiefly for cattle. One of these lasts eight days. Area of par, 2180 ac. Pop. in, 6317 par, 6806.

RUGLIFY a market tn. and par England, co. Stafford. The town 7 m. N. W. Lichfield and a station on Trent Valley railway is pleasantly situated on the Trent, has several good streets, lighted with gas, and kept remarkably clean a handsome Gothic church and chapels for Independents, Wesleyans, and K. Catholics; several endowed schools, and other charities. Iron founding is carried on here, and there are also mills for rolling sheet iron. Pop. 3054. Area of par, 3411 ac. Pop. 4188.

RUGOV, an isl. Prussia, in the Baltic, off N. W. coast, prov. Pomerania, from which it is separated by a channel, varying in width from 1 m. to 2 m. lat. (6 point) 54° 31' N. lon. 13° 48' E. Area 254 sq. m. It is very irregular in shape, and indented by a series of bays and creeks, but the water shallows so rapidly and the coast is so much menaced with sandbanks, that it possesses no good harbour. The surface, unlike that of the mainland of Pomerania, which is flat and uninteresting in the extreme, exhibits a beautiful variety of hill and dale, and has many well-wooded slopes and wild romantic ravines. The loftiest height, called the Stubbenitz is situated at the E. extremity of the island and has a height of about 550 ft., forming a bold and conspicuous chalky cliff from the top of which a flight of steps, hewn in the rock, leads down to the sea-shore. Like this cliff all the rocks of the island belong to the cretaceous system, and have contributed, by their decomposition and intermixture with vegetable and alluvial humus to form a soil of remarkable fertility equally adapted to agriculture and to grass-husbandry and enabling the inhabitants to export both grain and cattle to a considerable amount. The fisheries, also, are very valuable and give employment to a large number of the island's taxes. In early times Rugen was held sacred to the goddess Herta and a small lake surrounded by trees, is still pointed out as having been her principal abode. During the Thirty Years war, the Swedes gained possession of the island, and retained it till 1815, when it was ceded to Prussia. Administratively it is attached to gov. Stettin, and forms, with several small adjacent islands the circle of Rugen, which has a capital of same name. Pop. 37,000.

RUGENWALDE, a tn. Prussia, gov. and 20 m. N. N. E. Kalin 1 bank Wipper near its mouth in the Baltic. It is walled, tolerably well built; contains a castle, and four churches has several courts and public offices, manufactures of ordinary and black linen, woollen and cotton goods, sillicots, building-wards, and some shipyard; a fishery and a trade in fish, chiefly eels and dried salmon. Pop. 4695.

RUGENBERG, a vil and par Switzerland, can. and 9 m. S. Bern. Here are a number of remarkable caverns, and an old Benedictine monastery, now converted into a workshop, in which Gregory VII. is said to have lived some time before he was raised to the papacy. Pop. 3278.

RUGI [anc. *Rugi*] a tn. France, dep. Eure, 25 m. S.E. W. Evreux. It apparently occupies the site of a Roman station, and was long possessed of a strong castle, which

makes a considerable figure in history, but has almost disappeared. The parish church has a handsome tower and portal of the 15th century but both unfinished. Rügen is the centre of important manufactures of pine and sails the former employing, in the town and neighbourhood, 2600, and the latter 8000 hands. Pop. 1601

RUELLA, a tn. partly in Saase-Wannau, and partly in Saase-Coburg, circle and 6 m. S.S.E. Eisenach, on both sides of the Ruhl. It has two churches, and a hunting-lodge, manufactures of meerschaum-pipes, iron and steel ware, and numerous mills. Pop. 8500.

RUEHLAND, a tn. Prussia, prov. Silesia, gov. and 104 m. W. Liegnitz, on the Black Elster. It has several public offices, a Protestant church and a chapel and a paper and other mills. Pop. 1810.

RUEHME a river, Germany rises in the Harz Mountains, about 15 m. W. N. Nordhausen, in Prussia, Saxony flows N. W. and joins a bank Leine, a little N. W. of Nordheim, total course, about 30 m.

RUEHR—1, The German name for the river Rour—(noted see).—2 A river Prussia, an affluent of the Rhine, which it joins on r. bank 16 m. N. Düsseldorf. It rises in Westphalia, goes Arnberg in the Rothbar-Gebirge, flows W. is joined r. bank by the Mohne, by the Leine, total course, which is very tortuous, about 110 m.

RUEHRT, a tn. Rhineland Prussia, gov. and 19 m. N. Düsseldorf, at the confluence of the Ruhr with r. bank Rhine. It contains a castle, and has manufactures of cotton goods, and extensive building-works, in which a great number of the sailing vessels and steamers used in Germany are built a trade in corn, wood, wool and coal, particularly the last obtained from a valuable coal-field in the neighbourhood. Pop. 8225

RUIFN or **RUISEN** a vil. Holland prov. Drenthe, 17 m. S. S. W. Assen with a church and school and a well frequented cattle and fax market. Pop. 1079

RUIKINGWOLD vil. Holland, prov. Drenthe, 21 m. S. S. W. Assen, on the Wild Aa, with a church and school 10 p. (agricultural) 1245

RUISTON par Eng. Somerset 1003 ac. Pop. 411

RUISTON par Eng. Middlesex 620 ac. Pop. 1392

RUIVAES a vil. and par Portugal, prov. Tras-os-Montes 24 m. from Chaves. Pop. 1280

RULLES, a vil. and com. Belgium prov. Luxembourg on a stream of same name, 12 m. W. Arlon. It has a trade in corn and in wood. Pop. 1304.

RULSK, a tn. Prussia. See RYKSK

RUM an ad. Scotland so. Inverness, one of the Inner Hebrides, lat. (W. point) 57° N. lon. 6° 30' W. (n.) It is of somewhat irregular form, and about 18 m. or 20 m. in circumference. It consists of an irregular group of high hills rising out of the sea, without plains, and scarcely diversified by an intervening valley. Although a few of the hills are green yet most of them exhibit a rough and craggy appearance. About the middle of the island are several fresh-water lakes of considerable dimensions, some of them abounding with small trout. The coast around the island is bold and rocky, particularly the S. and W. sides, where it is fringed with an continued margin of rock. Pop. 162

RUMA, a market tn. Austria, Bohemia, 85 m. N. W. Belgrade. It contains a Greek and a R. Catholic church and is inhabited by Hungarians, Germans, and Hungarians. P. 6370

RUMBEKE, a vil. and com. Belgium, prov. W. Flandres, 164 m. S. Bruges, l. bank Mandel Beck with manufactures of linen fabrics, candles, chicory, tobacco, ropes, and oil, fire-works, several distilleries, and a trade in grain, flax, and wool. Pop. 6724

RUMBOLD, a small native state, peninsula of Malacca, its frontier, about 25 m. N. W. the town of Malacca. It is intersected by the river Ling, and has some trade in timber, damper, and wax, exchanged for opium, iron utensils, cloth, and tobacco. Pop. 9000

RUMBURG, or **RUMBURG**, a tn. Bohemia, circle and 60 m. N. Prague with a castle, extensive manufactures of plain and damask linen cotton goods, silks, hosiery, various articles in paper, metals, potash, &c., and a considerable trade in all these articles. Pop. 4990

RUMBURGH par Eng. Suffolk, 1468 ac. Pop. 483
RUMES, a vil. and com. Belgium, prov. Hainaut, 3 m. S. W. Tournay with a church, school, and a four-mill Pop. (agricultural) 3475

RUMIANCA, a vil. and com. Italy, Piedmont, dir. Novaro, prov. Palliana, near Ornavasso, r. bank Tona in a very mountainous district. It has a church and two oratories. Pop. 1877

RUMILI **RUMELLA**, or **ROMMELLA** a political division of Turkey in Europe, the precise limits of which do not appear to be well known but which, according to Diesterl. (*Abtheilung des Statistischen Bureau's in Berlin*), forms an islet, including 15 sandjaks is nearly identical with the former divisions of Macedonia Albania, and Thessaly and has an area of 48 119 sq. m. The term Rommella appears to have been originally employed by the Turks to designate all those portions of Turkey in Europe conquered from the Greek emperors, whom they considered the successors of the Romans. It is also often used in a much more restricted sense, and confined to ancient Thracia

RUMILLY, a tn. France dep. Haute Savoie, dir. Geneva, not far from the Firr near the confluence of the Clusone, here crossed by a handsome stone bridge of a single arch. It is a very ancient place of Roman origin, has suffered much from fire, war and pestilence, is the seat of a court of justice and has tanneries, and an active trade in grain. Pop. 4418

RUMMELSDURG, a tn. Prussia, gov. and 95 m. S. E. Köln, cap. circle, on the Rhine, in a valley surrounded by hills. It has a court of justice, a church manufactures of coarse woollens, hats, frices, and home-cloths a silk-works, and several mills. Pop. 6203 — The census, area, 332 geo. sq. m. is flat abounds in lakes contains much waste land, and is thinly peopled. Pop. 23 230

RUMNEY, par Eng. Monmouth 870 ac. Pop. 312

RUMPSI, a vil. and com. Belgium, prov. and 12 m. S. Antwerp at the confluence of the Dyle with the Rupa, chiefly inhabited by Flemings and Walloons. It has a church chapel primary school mutual society several flour and malt mills and a wax-candle factory P. p. 2233

RUNCORN, a market tn. port and par England co. Cheshire The town 64 m. W. S. W. Warrington, 12 m. E. S. E. Liverpool, l. bank Mersey, and a station on the St. Helens railway is lighted with gas, and has a new town hall and bridge, two churches places of worship for Independents, Baptists, R. Catholics and different sections of Methodists and national British and other schools, manufactures of soap, and sails iron ship building yards, rope-walks, and an extensive and daily increasing trade. It has been declared a free port, and has a custom-house, bonded warehouses and yards, and ample accommodation for all sorts of merchandise. Excellent frontage, found in the neighbourhood, and salt, are largely exported. Runcorn is also much resorted to for sea-bathing, and has superior accommodation for visitors. Pop. 8049 Area of par 18,906 ac. Pop. 15 047

RUNTON two pars. Eng. Norfolk—1 (North) 2395 ac. Pop. 228—2 (South), 521 ac. 1 up 163

RUNGPOOR, a dist. and two tns Hindustan presid. and in the N. part of Bengal — The district lies between lat. 24° and 27° N. lon. 88° 30' and 90° E, bounded, E. by the river Brahmapootra and Indian N. Bhotan and the secondary of Cooch Behar, W. the districts Purneah and Dinagepore, and S. Rajshahy and Wyminging. Length, N to S, 120 m. greatest breadth, 60 m. Area, 4190 sq. m. In its N. part are elevated, sandy plains where healthy locations for Europeans might be formed, the low lands in other parts are well adapted for rice, wheat, grain and wheat, indigo, tobacco, mustard, sugar, and sugar-cane are plentifully raised. The centre of the district is traversed by the river Teesta, which since 1784 has changed its course and now joins the Brahmapootra instead of the Ganges. There are about 400 indigo-factories; the annual value of the indigo made is estimated at 250,000, of the silk produced, 250,000 Carpets and woollen cloths are manufactured cotton and cotton fabrics figure amongst the chief imports. Some of the fairs are resorted to by merchants from Bhojan and Tibet. Although this part of India is far distant from the former seat of Mahomedan power three-fourths of the inhabitants are Mussulmans, Hindoes of low caste are rarely met with in

Rungepoor *Chief town*—**Rungepoor Mangalham**, Chittaur, and Goolpura. Pop. 1,214,200.—(*Triguna. Survey of India*).

Rurick, the cap., in lat. 50° 45' N. lon. 60° 25' E., is a collection of four villages only one of which, around the palace, has the semblance of a town. Several temples and mosques, with two Mohammedan monuments, are (or were) its only public edifices. Pop. conjectured to be from 15,000 to 20,000.—(*J.R. Rep. of Dr F. Hamilton*).—2, A to Upper Amur, on the Dakhn, a E. affluent of the Irkutsk, lat. 56° 55' N.; lon. 94° 30' E.; and surrounded by a deep ditch, swamps, and jungles.

RUNHALL, par Eng Norfolk, 854 ac. Pop. 329.

RUNHAM, par Eng Norfolk 1716 ac. Pop. 329.

RUNKLA, a tn. Newaan, l. bank Lahn, here crossed by a bridge, 21 m. N Wiesbaden. It contains a castle and two churches. Near it are iron-mines. Pop. 1052.

RUNN *See* **CORVU**.

RUNNINGTON, par Eng. Somerset, 323 ac. P. 93.

RUNNYMEDE, a beautiful plain England, co. Surrey par Egham, r. bank Thames, 20 m. W R.W. London and memorable as the place where the barons in 1215, compelled King John, after a few days' debate to grant the privileges contained in Magna Charta.

RURKOVICH [see. Imoth], a vil. Austria, Dalmatia, circle Spalato, about 80 m. from Metkovic. 1 op. 1292.

RURWING BAY, an inlet of the N. coast, E. coast, England, 5 m. N W by N. Whitley, capable of containing about 16 sail of shipping in five and six fathoms water.

RURTON, par Eng Norfolk 1449 ac. Pop. 485.

RURWELL, par Eng Dorset 2059 ac. 1 op. 334.

RUOTI a tn. Naples, prov. Basilicata 10 m. N W Potenza, on a barren height. Pop. 2760.

RUPEL MONDE, a tn. and port, Belgium, prov. E. Flandres, 25 m. E. by h. Ghent, l. bank Scheldt, near the confluence of the Rupel, a navigable stream only 8 m. long. It has manufactures of linens, leather, tobacco, and bricks, dyes, works, blacksmiths, and fishermen. The port is small but commodious. The ancient castle of Rupelmonde, erected by the counts of Flanders, and principally used as a state prison was rebuilt and modernized by Baron Feitz, in 1617. Gerard Mercator the well known navigator was born here in 1512. Pop. 2754.

RUIERI RIVER, British N. America, issues from the W. extremity of Lake Mistassine lat. 56° 45' N. lon. 72° 30' W., and after a W. course of about 800 m. falls into James Bay at the S.E. extremity of Hudson's Sea.

RUPUNYAN or **RUPUNYAN** a river British Guiana, the principal affluent of the Essequibo which it joins, 200 m. from the coast, in lat. 5° 57' 35" N. after a tortuous N. course of 253 m. It forms several falls, has very turbid waters, and the vegetation on its banks is less vigorous than that on the Essequibo.—(*Jour. Roy. Soc.*)

RUPERSBORF or **RUPERSBURGER** two places, Bohemia.—1 A vil. circle Königgrätz, l. bank Sava, 6 m. from Brunn. It has a church, limestone-quarries, lime-kilns, and several mills. Pop. 1089.—2 A vil. circle Budweis 24 m. from Blatná with a church, a school and two mills. Pop. 1708.

RUPERSDORF (HOFER) a market in Lower Austria, near Gamsdorf with a church and a school. Pop. 1489.

RUPPIN, two places, Prussia.—1 (Alt.) A tn., gov. and 36 m. N Potsdam at the N. extremity of the lake of same name, where the Rhine falls into it. It contains a parish church and has a distillery and a fishery. Pop. 1753.—2 (New.) A tn., about 5 m. S W Alt-Ruppin, cap. circle, and W shore lake of same name. It is walled, well and regularly built and has four public squares, several courts and public edifices; a church, gymnasium, Institute agraria, two hospitals, manufactures of woollen and linen cloth, stained cloths, cabinet work and tobacco, several breweries and distilleries, and a fishery. The architect, Schinkel, was born here. Pop. 9676.—The circle, area, 514 sq. m., is fat, well watered, and fertile. Pop. 68,826.

RUPPKE, a vil. Baden, circle Middle Rhine, near Carlsruhe; with a church. Pop. 1250.

RUREK, a tn. Belise 75 m. S. Hyderabad and on the edge of the desert lat. 24° 52' N. lon. 68° 30' E. It has a magnificent mosque, and was formerly a place of greater importance than at present. Pop. about 1000.

RURICK, an isl., S. Pacific Ocean, Low Archipelago; lat. 10° 10' S.; lon. 148° 47' W. It extends about 20 m. N N E. to S.S.W., and contains a lagoon, into which, however, no entrance could be found. It is inhabited.

RUSA, a tn. Spain, Andalusia, prov. and 24 m. N E. Jaen; with a church, courthouses, primary school, and very ancient seminary, manufactures of white soap, and linen and hempen cloth, a distillery, a gypsum-works, and a trade in corn, wine, oil, and charcoal. Pop. 1917.

RUSA, a tn. Russia, gov. and 55 m. W Moscow and on a river, at the foot of a lofty hill, crowned by a castle. It consists of four quarters; contains a stone and four wooden churches, and a public school, and has several tanneries, and a trade in corn, flax, and hides. Pop. (1850) 2589.

RUSCOMBE, par Eng. Berks 1949 ac. Pop. 399.

RUSH a small seaport and market in Ireland, co. and 14 m. N E. Dublin, on a headland projecting into the Irish Sea, and principally inhabited by labourers and fishermen. It has a small pier and some little trade in the export of potatoes in a coast-guard station and a station on the Dublin and Drogheda railway. Pop. 1603.

RUSHALL, two pars. Eng. —1 Norfolk, 267 ac.

Pop. 1176.—2. Wilts 2164 ac. Pop. 263.

RUSHALL, a vil. and par. England, co. Bedford on the Wyrlay and Hemington canal 1 m. N N E. Walsell. It has a parish church, with some old monuments, a national school, the ruins of an old castle, and limestone-quarries and lime-kilns. Area of par. 1934 ac. Pop. 1946.

RUSHBROUKE par Eng. Suffolk 1080 ac. P. 188.

RUSHBURY par Eng. Salop 4132 ac. 1 op. 495.

RUSHDEN par Eng. Herts 1486 ac. Pop. 531.

RUSHDEN, a vil. and par. England co. Northampton, on the Nene, near Houghton-Ferrers. It has a large and handsome parish church, Wesleyan, and General and Particular Baptist chapels, manufactures of shoes, and a considerable trade in coal, timber and corn. Wm. W., the celebrated Arminian divine and commentator was born here. Area of par. 2770 ac. Pop. 1480.

RUSHEN par Isle of Man 571 ac. Pop. 3256.

RUSHFORD par Eng. Norfolk and Suffolk 4360 ac.

P. 187.

RUSHMERE, two pars. Eng. Suffolk —1 759 ac.

Pop. 116.—2. 2143 ac. Pop. 678.

RUSHOK K par Eng. Worcester 1218 ac. Pop. 214.

RUSHOLME, a township, England co. Lancashire par and m. S.E. Manchester with three handsome churches. The Manchester Victoria Park is partly in this township. Pop. 2679.

RUSHTON par Eng. Northampton 5900 ac. P. 429.

RUSHVILLE —1 A vil. U. States, Indiana, 33 m. E. by S. Indianapolis, with a courthouse, jail three churches, and several mills. Pop. 2108.—2 A vil. Illinois, 53 m. W N W Springfield, with a courthouse, jail, and four churches. Pop. 1000.

RUSHINGTON par Eng. Lincoln, 4760 ac. P. 1027.

RUSKOL a tn. European Turkey. See **KASSAN**.

RUSPER, par Eng. Sussex, 5128 ac. Pop. 683.

RUSSE, a tn. Prussia, gov. Gumbinnen, on a small river of the same name, near its confluence with the Niemen and not far from the mouth of the latter in the Curische-Haff, 25 m. N W Tilsit. It has a considerable trade in wood, and an important salmon-fishery. Pop. 2150.

RUSSEBACH par Swit. Westmuth 2569 ac. Pop. 428.

RUSSEBACH, a vil. Saxo-Altenburg near Altenburg, with a church and a mill. Pop. 1981.

RUSSEIGVIERE, a vil. and com. Belgium, prov. E. Flandres, on the Esque, near the frontiers of Habsat, 21 m. S.S.W. Ghent. It has manufactures of linen a bleachfield, a brewery, a flour-mill, and a trade in corn. Pop. 1034.

RUSSELSHEIM a market tn. Hesse-Darmstadt, prov. Starkenburg, l. bank Main, 15 m. W N W Darmstadt, with a church. Pop. 1452.

RUSSELL [French, Russian, German, Swedish], the most extensive empire in the world, extending from lat. 56° to 78° 20' N.; and from lon. 10° E. eastward to 135° W. It is bounded, N. by the Arctic Ocean; W. Sweden, the Baltic Sea, Prussia, Austria, and Moldavia; S. Turkey in Europe, the Black Sea, Turkey in Asia, Persia, Independent Tartary, the Chinese Empire, and the Pacific; and E. British America. It has an

stances not far from the W. shores of Europe, and stretches continuously first across the whole of that continent, next over the whole continent of Asia, and lastly crossing Behring's Strait, finds no limit till it comes to contact with British America, after having passed over 50° more than half the circuit of the globe, or about 210° in all. Owing, however, to the high latitudes on which this course must be traced, the whole length E. to W. is less than the number of degrees might lead us to suppose, and is estimated at not more than 7000 m. The average breadth, N. to S. falls far short of this, and probably does not exceed 1500 m. So immense, however, is the whole area, that it at least doubles the area of Europe, and is fixed by the nearest approximations which can be made at about 6,006,010 sq. m. Of these the proportions belonging to Europe, Asia, and America, and their respective population are exhibited in the following table—

AREA AND POPULATION OF THE RUSSIAN EMPIRE

| | Area in sq. m. sq. m. | Pop. (1881) |
|-------------------------------------|--------------------------|-------------|
| European Russia, Asiatic Russia— | 1,808,271 | 62,038,000 |
| Siberia, | 3,678,238 | 2,997,000 |
| Khan's steppe, | 280,000 | |
| Transcaucasian provinces, | 90,934 | 5,648,000 |
| Russian America | 433,770 | 61,000 |
| Total, | 6,006,010 | 67,734,000 |

The continuity of this empire, at least of the Asiatic and European portions of it, might seem to suggest the propriety of viewing it as one great whole, and of proceeding accordingly to give a detailed description of it in a single article but on the other hand its immense magnitude, and the distinct names commonly used to designate these portions make it more convenient to consider them separately under the four heads of European Russia, Siberia, Transcaucasian Russia, and American Russia.

EUROPEAN RUSSIA has the same boundaries on the N and W

as those given above for the empire. Its S. boundaries also are the same as far E. as the E. shores of the Black Sea, and beyond this the mountains of the Caucasus. The S. boundary is not so well defined. In its upper part the Ural Mountains form such a conspicuous natural barrier, that their title to fix the frontiers of Europe and Asia, so far at least as the govt. of Archaeng and Volgaia extend, has been almost universally recognised. To the S. of this the boundary may be said to be almost arbitrary. Some continue to follow the Ural chain southwards till it reaches the sources of the river Ural, and then follow the course of this river to its mouth in the Caspian, this boundary has the advantage of being at once simple and definite. Others in forming the boundary quit the Ural chain much earlier and commencing at the sources of the Volga, follow it downwards to its junction with the Kama, then follow the Kama to its junction with the Volga, and finally follow the Volga to its mouth. This boundary though less simple than the former has like it the merit of being well defined, and perhaps surpasses it by the prominence which it gives to the Volga, whose mighty flood would seem almost to entitle it to be the boundary of a continent. But the misfortune is that the Russian government has entirely discarded both of these boundaries, and produced confusion by forming two of its largest governments, Perm, and Orenburg out of territories which do not belong exclusively to either Europe or Asia, but partly to both. In these circumstances, though it seems impossible to disregard a boundary which the Russians themselves have made, the least inconvenient course perhaps will be to modify it so far as to consider the whole of govt. Perm and Orenburg as belonging only to one continent. The only question is To which of the two are they to be assigned? It does not matter much, but we incline to decide in favour of Europe, within whose limits the capitals of these governments are certainly situated. European Russia, as thus defined, is bounded N.E. by the Ural Mountains, E. govt. Tobolsk and Omsk, and S.E. Independent Tartary, the Caspian Sea, the Caucasus Mountains, and Turkey in Asia. The names, areas, and population of the principal administrative divisions are exhibited in the following table—

GOVERNMENTS OF EUROPEAN RUSSIA—Their AREA AND POPULATION in 1880

| Governments | Area in sq. m. | Pop. (1881) | Governments | Area in sq. m. | Pop. (1881) | Governments | Area in sq. m. | Pop. (1881) |
|---------------------|-------------------|-------------|----------------------------|-------------------|-------------|---|-------------------|------------------------|
| GRAND RUSSIA | | | S. Russia, extended | | | Grand Duchy of Finland, continued. | | |

The surface, in the most general view that can be taken of it, is two immense plains, the boundary between which is marked though not very definitely by a broad central ridge which stretches across it in an irregular waving line, mainly in a N. E. direction, commencing on the frontiers of Poland, and terminating on the W. side of the Ural Mountains, near lat. 68° N. This ridge forms the E. continuation of the great water-shed which divides the whole continent of Europe into a N. and a S. basin, but unlike the W. part which is composed of lofty mountain chains, or elevated plateaux, is only of very moderate height, never exceeding 1000 ft. above sea level. Even this height is attained only in the Valdai Mountains, which have very high title to the name. The far greater part of them, and of the remainder of the ridge, has an average height of not more than 500 ft. The only regions where the surface assumes a decidedly mountainous appearance, are in the E., where the Ural chain, though nowhere exceeding 7000 ft., looks much more elevated at least in its upper part, from its high latitude and consequent covering of perpetual snow, and in the S. where the mountains of Taur rids, lying the S. shores of the Crimea have a height of about 4000 ft. With these exceptions, the only other parts of European Russia, which according to the limits above assigned to it, do not belong to the two immense plains, are those districts of Perm and Orenburg which are situated on the E. side of the Urals, and slope towards the almost boundless steppes of Asia.

Rivers and Lakes.—The broad central ridge above referred to forming the great water-shed of the country, sends the waters on the N. side of it either to the Arctic Ocean or to the Baltic, and those on the S. side of it to the Black Sea or to the Caspian. These, therefore form the four great basins to which all the rivers of European Russia belong. These rivers are remarkable both for their number and their magnitude, and in order to avoid confusion in describing them, it will be necessary to examine each basin separately. Beginning with that of the Arctic Ocean and proceeding E. to W., we find first the Petchora, which after receiving its waters chiefly from the W. slopes of the Ural Mountains by a number of important affluents accumulates them into one great flood which then flows almost due N. and empties itself into a wide estuary remarkable for the number of islands which the alluvial deposits of the river have formed within it. The Petchora is the only large river of Europe whose waters which thus send its waters directly to the Arctic Ocean, all the others are received by it indirectly through the medium of the White Sea. Their names are the Mezen, N. Dvina and Onega. By far the most important of the three is the Dvina, which receiving its supplies in nearly equal quantities from the E. by the Vitebsk, and from the W. by the Szechona, proceeds S. W. in a very circuitous course, continually augmented by large affluents, and falls into the Gulf of Archangel a little below the well-known port of that name. The surface drained by the rivers of this basin is almost entirely confined to the two extensive govts. of Archangel and Vologda. The basin next in order is that of the Baltic. Its principal rivers are the Kama, and Torna, the latter common to both Russia and Sweden, which fall into the Gulf of Bothnia, the Kymene, Neva, and Narva or Narova, which fall into the Gulf of Finland, the Ana and S. Dvina, which fall into the Gulf of Riga, the Niemen or Memel, which enters Prussia before terminating its course, and the W. Bug, an affluent of the Vistula. To the basin of the Black Sea belong the Dniester, S. Bug and Dnieper, which have all their mouths at a short distance from each other in the neighbourhood of the rising support of Crimea, the Don, which falls into the N.E. extremity of the Sea of Azov, and the Kuban, which, deriving its chief supplies from Circassia, and forming great part of its boundary, must continue to be a Russian river more in name than reality so long as the Circassians are able to maintain their noble struggle for independence. The last basin, that of the Caspian, is in some respects the most remarkable of all, since though Europe sends it at most only two large rivers, the Ural and the Volga, both supplied in part from Asiatic sources, the latter not only surpasses all other Russian rivers, but is one of the greatest of which Europe can boast. The lakes of Russia are on a scale of magnificence fully commensurate with those of the rivers. To say nothing of the Caspian itself—which, being wholly surrounded by land, and even un-

capable, from the lowness of its level, of discharging itself into any other sea, is truly a lake—Russia produces others of vast extent, which, from lying wholly within its limits, are peculiarly its own. It is somewhat curious that all the lesser lakes belong to the northern basin, and with scarcely a single exception to the basin of the Baltic. To it at least belong Ladoga, the largest lake in Europe, Onega, Peipus, and Ilmen, Finland, too, which toward its S. extremity is a mere net-work of lakes, sends all its waters to the Baltic. Almost all the other lakes of any consequence belong to the basin of the Volga. Their dimensions are much inferior to those already mentioned, but in any other country less amply provided, such lakes as the Bielo-Ozero in gov. Noygorod, and the Koubankits, in gov. Vologda would not pass unnoted. In the S. are several large salt-lakes, among which may be mentioned the Elton in gov. Saratov and the Balkutshak in gov. Astrakhan. In concluding this part of the subject, it is necessary to mention that the S. parts of gov. Perm and Orenburg which we have included in European Russia, belong to the basin of the Obi which receives several large affluents from their slopes on the E. side of the Ural chain.

Climate.—A country extending over at least 35° of lat., from the summer regions of the temperate far into the regions of the frozen north, must exhibit several very marked variations of climate. It is usual accordingly to consider it in four distinct divisions—a polar region, including all the country N. of lat. 67° a cold region, extending from lat. 67° to 57° N., a temperate region, from lat. 57° to 50° N. and a warm region, from lat. 50° to 37° N. Another division, founded on the vegetation of the different regions, has been proposed—1, the region of ice, where vegetation is all but extinct, 2, the region of tundra, or moorland steppes, 3, the region of forests and pastures 4, the region of continuing agriculture, where barley ripens 5, the region of rye and flax, 6, the region of wheat and orchards, 7, the region of vines and vicia, and 8, the region of the olive and the sugar-cane. In regard to the climate in general it may be observed that its characteristic features are a greater coldness and variability than is common under the same latitudes in the more westerly parts of Europe. The mean annual temperature of the upper part of the Norwegian coast to its extremity at the N. Cape, is above the freezing point, whereas a considerable portion of Russia within the same, and even in a lower latitude, is below it. This is true of the whole of Russia. London is far S. as 66°, and to the T° of the White Sea the thermal line indicating a mean annual temperature of freezing descends so rapidly that on reaching the Ural Mountains it is found to be as low as 60°. The region to which this name of cold has been given has a mean annual temperature varying between 32° and 40°, but very unequally divided throughout the year the cold in winter often sinking the thermometer to 50° below zero, or 62° below freezing, while the summer heat often raises it above 80°. At St. Petersburg, considerably below the centre of this region, the mean annual temperature is rather above 40° to the other hand, that of Kazan, situated at the very S. extremity of the region, but much farther inland, is rather below 38°. The temperate region, situated between lat. 57° and 50° N., has a mean annual temperature varying from 40° to 50°, and melior within it the far finest part of the Russian territory, though even there the thermometer has a very wide range, the summer-heat which suffices to grow melons and similar fruits in the open field being often succeeded by very rigorous winters. The warm region extending from 50° southwards, well merits the name from its extreme summer-heat, the thermometer in June and July standing commonly about 100° and often considerably higher. It is not, however, free from the considerable contrasts which a Russian summer and a Russian winter can exhibit for the Sea of Azov, situated almost in the heart of this region usually freezes about the beginning of November and is seldom open again before the beginning of April. In all the countries bordering on the shores of the Baltic Sea and the Arctic Ocean, and bounded on the W. and N. by the basin of the Volga, the air is charged with a superabundance of moisture, which descends in mists, and frequent falls of rain or snow. Towards the centre, and still farther E., the superabundance of moisture decreases, though much still remains to keep vegetation in full vigour even at the hottest season. Still farther E. the want of rain is often felt, and

long-continued droughts do frequent mischief. In general however, the climates of all the regions are not unfavourable to health, and except in particular districts, where the insularity can easily be traced to local causes disease is by no means prevalent, and human life often attains its longest allotted term.

Geology.—Till recently the geological formations of Russia had been very imperfectly explored, and the most erroneous ideas were entertained in regard to them. The more accurate information now possessed is mainly due to Sir Roden Roden, Murellian and his coadjutors. Their united work on Russia, and the map and illustrative sections which accompany it, furnish all the geological information that can be required, at least for general purposes. Taking the map chiefly for our guide, we find in the N.W. a vast tract of gneiss and other crystalline schists, penetrated by granite extending W. from the Gulf of Bothnia, and N. from the Gulf of Finland over the whole principality of the latter name, the W. part of gov. Olonets and the extensive part of gov. Archangel which is isolated from its main body by the White Sea. The only other region where a similar development occurs is in the S. where a large granite steppe stretches in a N.E. direction. It commences near Ovrutsk, in the N.E. of gov. Volhynia, covers the far greater part of gov. Kiev, as much of gov. Podolsk as lies N. of the Dnieper, the N. half of gov. Kherson, W. and S. of Ekaterinoslav, and a part of Taurida, and terminates just before reaching the shores of the Sea of Azov from which it is excluded by a narrow belt of tertiary marls and limestones. In the E. however and along the whole coast of the Ural Mountains, from their commencement on the shores of the Arctic Ocean, and almost continuously southward to their last ramifications, granite of more recent origin than that already mentioned occurs, in connection with other eruptive rocks of gneiss, porphyry, scudite, serpentine &c. These rocks are overlain on both sides of the chain by metamorphic schists, forming long and narrow belts nearly parallel with its principal axis. Immediately to the W. appears a similar belt of Silurian strata, which where lowest in the series, are in the state of chlorite and talcose schists. The only other locality where the Silurian system receives a marked development is on the S. shores of the Gulf of Finland where it stretches from its W. extremity, E. along gavs. Esthonia and St. Petersburg, and is then continued across the isthmus between the E. extremity of the gulf and Lake Ladoga, and along the S. and S.E. shores of that lake. Its immediate contact with the Silurian formation on the S. but on a much more magnificent scale of development, appears the Devonian system or old red sandstone, as it is sometimes called. The main body of this formation commences near the S.E. shore of the Baltic, and gradually widens out with its N.W. and S.E. sides so as to assume the shape of a wedge. It then forms a wide fork, sending one of its legs N.E. across Lake Onega, and along Archangel Bay to the N.W. extremity of Mezen Bay and the other leg S.E. to the N.W. frontier of Voronezh. It thus covers continuously the whole of gavs. Courland, Livonia, Vitebsk, and Pskov, and parts of Walsia, Minsk, Mohilev and Smolensk on the one side, and of Petersburg and Novgorod on the other while its N.E. branch traverses Olonets, and penetrates into Archangel and its S.E. branch stretches over considerable parts of Kaluga Orel and Tula. The only other localities in which the same formation occurs is in a belt stretching S.E. from the E. shore of the Gulf of Cheskaus in the Arctic Ocean and in a longer but narrower belt on the W. side of the Ural chain, where it immediately overlies the Silurian formation already mentioned. The formation next in order is the carboniferous. The main body of it has within the above tract of the old red sandstone and in immediate contact with it, and then keeping parallel with the N.E. branch of the fork, is continued in the same direction to its termination in Mezen Bay. It occupies the whole of gov. Tver, the cap of which is situated near its centre and large parts of Smolensk, Kaluga, Tula, and Kiasan on the one side, and of Novgorod and Olonets on the other. The gov. of Moscow is situated in the very heart of it, and that of Vladimir on its E. side. It is evidently continued beneath these governments, and covers part of their surface the other and the greater part being covered by pebbles or Jura limestones. The carboniferous system occurs in other two distant and

isolated localities the one in the S. a little N. of the Sea of Azov where it occupies the E. part of gov. Ekaterinoslav and the W. extremity of that of Don Cosmacha and where, too the coal forming the characteristic mineral of the system is partially worked by pits the other locality is on the W. side of the Ural chain, where in the ascending series it succeeds the Silurian and Devonian systems, and has a larger development than either of them. This development of the carboniferous system on the side of the Ural chain, and the still larger development above described as existing in gavs. Smolensk, Kaluga, &c., form the opposite boundaries of a system which in European Russia is magnificently developed, and to which, from the large space which it covers in Perm and the contiguous gavs. Sir R. Murchison has proposed to give the name of the Permian system. Its rocks belong to the upper part of the coal measures and consist chiefly of magnesian limestone, and new red sandstone. The latter name is still often applied to the whole system. In Russia the main body of it though somewhat irregular in shape may be considered as an immense triangle, the three angles of which have their respective vertices at Ustjuha, gov. Novgorod, Mezen near the bay of same name, gov. Archangel and Orel, on the Ural in gov. Orenburg. Vast as this space appears it must still be increased by supposing that the line which joins Mezen and Orel, and forms the longest side of the triangle, is not made perfectly straight, but curves eastward so as to include the districts around the towns of Tcher. Sm. Holkanak Perm and Ufa. A glance at the map will show that the Permian system as traced by these limits, must extend over the whole of gavs. Kostroma, Viatka, and Kiasan and large parts of Archangel, Volodga, Jaroslavl, Nijnei Novgorod, Simbirsk, Orenburg, and Perm. Its continuity over the whole of this space is undoubted, but in the N. of gavs. Kostroma and Viatka, and more especially in the part of Volodga between the towns of Ustjuha and Ustjuha it disappears for a time beneath strata belonging to the Jurassic or oolitic system. This system is developed partially in several other localities, and very largely in the N.E. of gov. Archangel immediately above it in the geological series is the cretaceous system, of which the principal localities are Osmorgov Orel, Koursk, Kharkov, and Voronezh near the centre Volhynia and a small part of Poland in the W. and a long tract along the E. base of the Caucasus. The rocks next in succession belong to the tertiary formation, which in both the recent and miocene periods is very largely developed. Strata of the same period, commencing in the E. in gov. Simbirsk stretch W. over the greater part of gavs. Perm and Tambor then after a considerable interruption reappear on the frontiers of Koursk and Kharkov, cover the far greater part of gavs. Osmorgov and Poltava, and are thence continued with an interruption into gavs. Mohilev, Minsk, Grodno, and finally into Poland. The miocene period has its chief developments in Volhynia, Podolsk, and Bessarabia. Strata of still more recent formation may be traced in the limestones, marls and clays on the N.W. shores of the Black Sea, on the far greater part of the peninsula of the Crimea, on the E. and N. shores of the Sea of Azov on the low flats along the W. and N. shores of the Caspian and the low sandy steppes of Astrakhan. More alluvial deposits, of comparatively recent date are to be found in a greater or less degree at the mouths of all the rivers and are particularly remarkable in the great estuary of the Petchora. As a curious and interesting fact connected with geology may be mentioned the vast numbers of erratic blocks and similar drift spread over the greater part of N. Russia, and evidently transported into it from Finland, Lapland and Sweden.

Vegetation Agriculture, &c.—Russia possesses a vast number of phanerogamous plants, but as the examination which botanists have made is acknowledged to be very imperfect, it is probable that many yet remain to be discovered. A considerable proportion of the surface still continues almost in a state of nature, and, where it is well wooded there is room to question whether any other mode of occupation could be made to prove equally productive. Forests, however are found chiefly in the more northern governments, particularly Archangel, Volodga, and Perm. In many of the central and southern governments a deficiency of timber is seriously felt, and many extraordinary expedients are resorted to in order to obtain adequate supplies of fuel. The governments most imperfectly

provided with wood are Pechora, Bessarabia, Kherson, Ekaterinoslav, and Astrakhan. The prevailing trees of the northern forests are fir, larch, alder and birch. The oak is seldom found beyond lat. 61°, few fruit-trees are found beyond lat. 56° and their regular culture cannot be profitably carried on beyond lat. 53° N. Thereapples, pears and plums become tolerably abundant and still further south, peaches, apricots, quinces, almonds, and pomegranates become common fruits. The vine and mulberry also, are extensively cultivated, and considerable quantities both of wine and silk are obtained. In the Crimea, extensive vineyards have been formed with plants selected with the utmost care, and several of the wines have already acquired a high name. Other governments have imitated the example, and the export of wine promises to become an object of great national importance. Among the principal districts in which the culture of the vine is regarded as an object of primary importance, may be mentioned Bessarabia, Kherson, Kiev, Astrakhan, and the Don Cossacks. The last makes large quantities of a wine resembling champagne, which finds a ready sale in St. Petersburg, Moscow and many of the larger towns. But it is to agriculture properly so called, that Russia must long continue to look for the richest source of national prosperity. After deducting all the regions where the rigours of the climate, without making the growth and ripening of grain absolutely impossible are incompatible with its culture as a regular branch of industry vast tracts of land remain, where the soil is almost inexhaustible fertility and all the cereals are produced in such abundance as not only to meet the human consumption, but leave a large surplus for export. The most important crops raised for food are rye, wheat, barley, oats, buck-wheat, maize, and potatoes and for other purposes hemp, flax, hops, tobacco, and beet-root for sugar. The principal wheat districts are parts of Poland, particularly parts Warsaw, Radom and Lublin the fertile alluvial tracts along the banks of northern rivers and parts Volhynia, Podolia, Kiev and Lithuania. Rye, from its natural adaptability to the soil, and its almost universal use as an article of food is cultivated in every quarter up to lat. 65° barley rye up to lat. 67° but is in far less general respect than rye. Oats are extensively grown in several parts, and more especially in the rich alluvial tracts of Archangel, where the peasants, after satisfying their own wants, grind the surplus into meal and export it in considerable quantities to the coast of Norway. Maize forms one of the most important crops of Bessarabia, where a return of sixty fold is said not to be uncommon. Potatoes are largely grown in Russia in Poland and in the districts which border the Baltic. In the last partly for food, but much more for the supply of numerous distilleries, which are employed in converting them into brandy. Both hemp and flax are staple products. The former is grown to an immense extent in all the parts which border on the Ural chain and on both sides of the upper course of the Volga, particularly in parts of Tver, Jaroslavl and Kostroma. Flax is also cultivated to a great extent in the same districts, but more especially in parts of Olonetz, Vologda, Livonia, and the S. parts of Poland. Both their fibre and their seed form most important articles of export from the ports of Riga, St. Petersburg, and Archangel. Kitchen gardens, in many parts, attract considerable attention, and cabbage, turnips, carrots, and onions are occasionally cultivated on an extensive scale in some of the districts bordering on the southern steppes, the water-melon, summer squashes, and other vegetables are raised with little culture, and, while in season, forms a principal food of the lower classes. In Astrakhan, on the banks of the Volga, liquorice grows with a luxuriance unknown elsewhere, and furnishes juice sufficient to form an important article of export. Before leaving this part of the subject, it is proper to observe, that, though Russia is decidedly an agricultural country, its progress in the science of agriculture has hitherto been slow and the amount of produce obtained is much more owing to the natural fertility of the soil than to any ability displayed in cultivating it. There is perhaps no country in Europe in which so much corn is obtained at so small an expense of skill and labour. In Livonia, however and the Baltic provinces generally, and in some of the more celebrated wheat-districts of the Ukraine, an improved husbandry has been introduced, and governments, by the appointment of agricultural chairs in the universities,

and the formation of model farms, is laudably endeavouring to extend it to other quarters.

Ecology.—Animals, both domestic and wild, are extremely numerous in Russia. Among the former are horses of various breeds, of which those in the N are generally small but hardy; those of the central and S. provinces large and well adapted for draught; and those of the Cossacks remarkable for their spirit and endurance of fatigue, and their admirable adaptation for light cavalry. In several of the steppe towns still run wild. Cattle are much used particularly in the S. for agricultural operations, and exist in such numbers that tallow and hides form very important articles of export. The best breeds are those of the Ukraine, Archangel, Bessarabia, and Grodno. In Livonia a great number of excellent cows are kept for the dairy and much good cheese is made. The sheep are chiefly of three breeds—the original Russian, which is found in vast numbers in every part of the country and though generally inferior and producing a very indifferent wool has been of late greatly improved by crossing with the merino and Saxen the Karagay breed, remarkable for large size, a dark-red colour, long but coarse wool, and more especially for their ponderous bulk, from which from 80 lbs. to 40 lbs of tallow are obtained, and existing in vast numbers on the steppes of the Volga and the Crimean breed not confined to the Crimean provinces, but widely diffused in the Crimea, and among the Cossacks of the Black Sea and of the Don. The improved breeds of sheep are found especially in the Baltic govts of Livonia, Esthonia, and Courland but are rapidly spreading into other quarters. Goats are numerous in the S. where they are valued chiefly for their skins which are used in making morocco leather. In Podolia and Ekaterinoslav some Angora goats are kept for their fleeces, which are remarkably fine, and manufactured into shawls. In the N regions, bordering on the Arctic Ocean, large herds of reindeer are kept and in the S, at the opposite extremity, among the Tartars of the Crimea and the inhabitants of the Caucasus, the camel is often seen. Among wild animals may be mentioned the bear, the wolf, wild dog and various animals which are hunted for their furs. Wild fowl abound, particularly near the mouths of rivers. Among other may be mentioned the pelican, which frequents the shores of the Black Sea. Both on the coasts and in the rivers a great number of productive fisheries are carried on. In the Arctic Ocean whales are occasionally seen, and vast numbers of seals are taken. The rivers of the Caspian, particularly the Ural and Volga, and the Sea of Azov are celebrated for their sturgeon. In the same quarters are also important salmon fisheries.

Minerals.—These are both numerous and very valuable. Gold is obtained in large quantities, both by mining and washing, on the slopes of the Ural Mountains, and the streams which descend from them. All of these, however with a very few exceptions, are found on the E. side of the chain; and therefore, belong more properly to Asia than to European Russia. Copper is found both in the Ural and the Ural Mountains. To the W of the latter in all the low country of Livonia, are vast quantities deposited from which large quantities of metal are annually obtained, under the most favourable circumstances, the workings themselves being not only comparatively easy but all the materials necessary for smelting, and more especially unlimited supplies of fuel existing in their immediate vicinity. Parts of Olonetz, Vologda, Kama, Vologda and Orenburg have also their copper-mines. Iron, the most widely diffused of all the Russian metals, and the most extensively and profitably worked, is found not only among the mountains, but in the lowest marshy grounds, where extensive beds of bog iron ore have been formed. The principal seat of the iron manufactures is in gov. Perm, but important workings are carried on, and great numbers of blast-furnaces have been erected, in many other quarters. Lead is more sparingly diffused, and is worked chiefly in the Ural chain and some parts of Poland, particularly the vicinity of Cherepovets and Nizhny Novgorod. It sometimes contains such a percentage of silver as to make it worth extracting. Flashes has long been worked in the Ural chain, in the most productive mines of that metal which are known to exist in the world. It is found in such abundance, both in branches and mines, that it may be considered altogether inexhaustible. In almost every part of the vast extent of surface already described as belonging geologically to the Permian system, it may easily

be found, and in numerous localities is extensively and profitably worked. Selapite is found chiefly in gov. Astrakhan. From the vast extent of country which has been shown to be occupied by the carboniferous system it may be reasonably concluded that many extensive coal-fields must exist. It would seem, however, that Russia, in this respect, bears a considerable resemblance to Ireland, where the large developments of the carboniferous system are chiefly confined to its lower strata, and is much more remarkable for its immense masses of mountain-limestone than its productive seams of coal. The upper portion of the system which alone contains the coal-measures for which W. Europe and more especially Great Britain is distinguished, has no decided representative in Russia. The chief fields of coal yet ascertained to exist are among the Ural Mountains where the coal is generally so thin and poor as hardly to merit the name. In gov. Moscow where seams from 8 ft. to 6 ft. thick are seen cropping out in many ravines, and might, it is supposed, be profitably extracted though the quality of the coal is acknowledged to be very inferior, and in an extensive tract between the Dniester and the Dnieper, and chiefly in that part of it watered by the Dniester. This last coal-district is said by Narkishev to be by far the richest in the Russian empire and extends over an area of not less than 11,000 sq. m. It has been very imperfectly explored, but does not seem entitled to raise very high expectations. It is worked in several localities, and more especially at Alex. androvsk in a seam about 7 ft. thick, composed of a soft bituminous coal containing a great deal of sulphur, both in lumps of pyrites and in the much more injurious form of frequent thin filaments wrought, as it were, into its very texture. In some other localities, the quality of the coal seemed to improve, but except in these gobs, where wood is scarce, and a very inferior fuel might create an extensive demand, it is evident that the known coal fields of Russia cannot be turned to much account. It is probable, however, that besides the known coal fields, others of greater value though from their greater depth requiring more expensive fittings, exist in other quarters, and more especially in those gobs, where the Permian system is most largely developed. The magnesian limestone, which contains the chief component of the system, is sunk through to reach some of the most valuable seams in England and analogy strongly favours the conclusion that an exception to the rule may be found in Russia. In fact, the coal itself where this coal is, is likely to be found in greatest abundance, it is at present little wanted. For the smelting of metals the boundless forests furnish a more valuable material and ages must elapse before these can be so much thinned as to make either the search for coal or the working of it objects of much importance. The only other mineral products deserving of notice are quarries of granite and marble, both of which, of excellent quality are found near the shores and to the N. E. of Lake Ladoga.

Manufactures and Trade.—In a country where so much land remains to be taken into cultivation and population is very much scattered manufactures cannot be expected to be carried on upon an extensive scale, except in a few leading towns. Considering the unfavourable circumstances, the progress of Russia in manufactures is much greater than could have been anticipated, and certainly much greater than it could have been, had not a succession of monarchs commencing with Peter the Great, done the utmost to promote it, both by the establishment of large model manufactures and various other modes of encouragement. The branches in which most progress has been made are leather both ordinary and morocco, the latter particularly at Astrakhan, Tver, in gov. Tver, Kazan, and Tver, in all of which the article produced is unsurpassed in any other country in Europe. cotton twist and cotton goods at St. Petersburg, Moscow, and in gov. Vladimir, Kostroma, and Astrakhan. woollen and linen goods in many parts of Poland, gov. Kiev, Ekaterinoslav, Moscow, Kaluga, and most of the provincial towns. silks, particularly at St. Petersburg and Moscow, sericulture, at these two capitals, and also in gov. Archangel, Krasnodar, and Novgorod. fine Cashmere shawls, in gov. Pensa and Ekaterinoslav. fine serge, at Krasnodar, Smolensk, and Konrsk. cordage at Archangel, and in gov. Orel. metals, more especially iron and copper, in gov. Perm, and many other localities. furs, and wool and other entery in gov. Tula, plate-glass and crystal, at St. Petersburg, Tula, and Tver, tapestry at

Izma and St. Petersburg. paper at Moscow, St. Petersburg, Jaroslavl, Kaluga, and in Lwonia. carriages, jewellery, and porcelain, also at St. Petersburg and Moscow, hosiery, at Serapite, and various other places, and oil, wax, candles, soap, glue, tobacco window-glass, glass bottles, &c. in almost every important town. The rapid increase of the cotton manufactures is shown by the quantity of raw cotton consumed, which, in 1881 amounted to 9,281,804 lbs. in 1842 to 18,477,144 lbs. and in 1848, had risen to 44,551,660 lbs. In 1849, Russia imported 21,760,380 lbs. cotton twist from Britain, but, in 1850 the quantity had fallen off to 4,370,878 lbs. Trade also is very extensive. It is true, that considering the vast extent of country, the seaports are very few, being almost confined to Archangel, in the Arctic Ocean. St. Petersburg and Riga, in the Baltic, Odessa, and a few others of less importance, in the Black Sea. Taganrog in the Sea of Azov and Astrakhan, Baku and Kiallar, in the Caspian. The great distances at which the seas containing these ports are situated from each other and from the interior of the country must have confined the foreign trade within very narrow limits, had not a remarkable number of internal seaports been provided partly by nature and partly by art—by nature, in the magnificent streams which wind across the country in all directions and owing to the general flatness of the surface, are eminently adapted for navigation—and by art, in the great system of canals by which the different basins to which these rivers belong have been made to communicate with each other so as to give a continuous navigation from the Arctic Ocean to the Black Sea, and from the Baltic to the Caspian together with a net-work of branch canals by which all the great towns of the interior have ready access to their seaports and to each other. The valuable communications thus provided are about to receive a vast accession from the railway system for which the configuration of the country affords unobstructed facilities. One important trunk line, connecting St. Petersburg with Moscow has already been completed and the German lines connect eastward with Warsaw. Here it may suffice to mention, respecting the trade of Russia, that the principal exports are tallow, corn and flour, flax, hemp, linseed, hemp seed, timber, potash, bristles, hogs lard, pitch-tar, indigo, fur, leather, saltpetre, cortage, iron, copper, &c. the principal imports, colonial produce, cotton, cotton twist, and cotton and woollen goods raw and spun silk, dyestuffs, lead, tin and quicksilver, oil, wines &c. that the other foreign trade is carried on chiefly with Great Britain and partially but to a far less extent, with Sweden, Holland, Italy, Austria, Turkey, Greece, Denmark and Prussia. that the inland foreign trade is carried on chiefly with Persia and China from the latter of which she imports, through the frontier mart of Kischta, 4,700,000 lbs. tea annually also silks, manikens, porcelain, &c. and exports in return furs, leather, woolen and linen fabrics, cattle and iron. Jock-horns to the value of 2700,000 and that an inland trade strictly so called and carried on to a much greater extent than any other has its most important entrepôt at St. Petersburg. Moscow, Moshansk, Kaluga, Tula, Konrsk, Nijni Novgorod, Kamen, Perm, Orenburg and Astrakhan.

The following tables furnish a means of estimating the extent of the foreign trade of Russia, and of the movement of shipping in her commercial ports. The great excess both in exports and shipping in 1947 is accounted for by the quantity of grain supplied to W. Europe in consequence of the potato-rot.

TOTAL VALUE OF THE IMPORTS AND EXPORTS OF THE RUSSIAN EMPIRE, FROM AND TO FOREIGN COUNTRIES, POLAND AND FINLAND, FROM 1842 TO 1861 AND THE TOTAL AMOUNT OF GOLD AND SILVER BOUGHT AND SOLD IMPORTED AND EXPORTED FROM THE RUSSIAN EMPIRE, IN THE YEARS 1844 AND 1850 TO 1860.

| Year | Imports | Exports | Imported | Exported |
|------|------------|------------|-----------|-----------|
| | £ | £ | £ | £ |
| 1840 | 12,895,965 | 13,816,049 | | |
| 1845 | 17,783,684 | 14,083,067 | | |
| 1850 | 18,438,360 | 14,852,014 | | |
| 1855 | 18,167,811 | 14,864,465 | 1,660,568 | 760,798 |
| 1860 | 18,774,388 | 16,088,176 | 1,778,083 | 8,068,148 |
| 1867 | 16,181,117 | 22,854,765 | 8,890,373 | 3,062,446 |
| 1868 | 14,373,397 | 19,869,661 | 969,528 | 8,055,710 |
| 1869 | 14,005,975 | 18,000,408 | | |
| 1870 | 16,420,786 | 17,821,869 | | |
| 1871 | 16,684,554 | 14,666,886 | | |

TOTAL FOREIGN AND DOMESTIC TRADE OF RUSSIA IN THE MONTHS OF JANUARY AND FEBRUARY 1894

| Year. | Domestic. | | Foreign. | |
|-------|-----------|---------|----------|---------|
| | Value. | Yen. | Value. | Yen. |
| 1893 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1892 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1891 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1890 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1889 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1888 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1887 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1886 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1885 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1884 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1883 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1882 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1881 | 4,827 | 585,008 | 4,755 | 569,144 |
| 1880 | 4,827 | 585,008 | 4,755 | 569,144 |

The exports of Russia exceeded her imports up till about the year 1833, since which time the imports have been considerably in excess, as will be seen from the following table showing the progress of Russian commerce since the middle of last century —

| Year. | Imports. | | Exports. | |
|-------|------------|-----------|------------|-----------|
| | Value. | Yen. | Value. | Yen. |
| 1800 | 22,000,730 | 2,746,100 | 16,750,000 | 2,029,000 |
| 1805 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1810 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1815 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1820 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1825 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1830 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1835 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1840 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1845 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1850 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1855 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1860 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1865 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1870 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1875 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1880 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1885 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |
| 1890 | 1,800,000 | 219,000 | 1,800,000 | 219,000 |

| 1883 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1884 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1885 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1886 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1887 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1888 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1889 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1890 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |
| 1891 | 21,100,000 | 2,532,000 | 21,100,000 | 2,532,000 |

Great Britain exports to Russia grain, tallow, hemp, flax, mineral products, wool, iron, hardware, &c. In 1840 1847 and 1848, the value was as follows —

| Imports to Great Britain from Russia. | |
|---------------------------------------|------------|
| 1840 | 23,501,500 |
| 1847 | 7,843,500 |
| 1848 | 6,534,500 |

In the above imports to Great Britain in 1848, the grain figures for 21,100,000, the tallow for 21,743,518, the hemp for 2,607,254, and the flax for 2,607,254.

Weights and Measures.—Accounts are kept in roubles and kopeks or copecks, each of the former containing 100 of the latter. The rouble is of two kinds—the paper rouble, used in accounts and equal to a French franc, or 10d sterling; and the silver rouble = 5s. 2d. The principal coins are, in gold the imperial = 10 roubles, and the demi imperial in platinum a piece of 6, and number of 3 roubles value struck in 1827 and 1830 but now seldom seen in silver the rouble, half rouble or poltina, and the quarter-rouble or poltina and in copper the ukas = 10 kopeks, the paitak = 5 kopeks, and the kopek itself. The standard measure of length is the foot of 13 inches, exactly equivalent to the British imperial foot. The stakhin, or ell, contains 28 inches. The sazhen or fathom, is = 7 ft imperial. For measuring distances the verst is used and is = 2500 ft imperial or very nearly $\frac{1}{2}$ of a mile imperial. The principal land measure is the desiatina = 1600 sq arshins, or nearly 2 $\frac{1}{2}$ acres imperial. It is subdivided into 2400 sq arshins, each = 3 sq arshins. The pound is = 0.902 lb. avoirdupois the pood is = 40 lb. Russian = 36 lb. avoirdupois. The tchetwert or chetwert, the principal measure for corn is = 5 $\frac{1}{2}$ bushels imperial. Wine is measured by the oshok = 68 $\frac{1}{2}$ wine-gallons and the sotok = 68 gallons.

Government, Laws, Finance.—At the head of the nation is the emperor or czar who exercises the title of Autocrat or Autocrat, indicating that he is absolutely supreme, indebted to

none for his power and accountable to none in the exercise of it. All such forms of despotism however are controlled, in some extent, by custom and public opinion; though, in every individual reign, the personal character of the sovereign must, in a great measure, determine that of the administration. Hence, under such a monarch as Paul I. the most extravagant decrees, the dictates of a mind bordering on insanity, had all the force of law, and exposed every subject, who ventured to disregard them, to the penalties of rebellion while on the contrary under the late Alexander the whole administration seemed almost a constitutional form, and the emperor himself publicly declared despotism by declaring that he was bound to rule according to law and that, in the event of his issuing any decree not in accordance with it, the Senate was entitled to remonstrate. In administering the government, the principal authority is the Imperial Council, for the most part presided over by the emperor in person, or a delegate of his sole appointment. It has no limit as to its numbers, but is divided into four departments—legislative, military civil and ecclesiastical, and financial. All matters coming under deliberation are decided by a majority of votes, either by the departments separately or by the whole acting as one body. To each department a secretary of state is attached. The body next in importance to the Council is the Senate, which is also presided over by the emperor in person. It is the supreme judicial tribunal and issues decrees which have the force of law unless the emperor interpose to prevent their execution. It is divided into eight departments, each of which is an appeal court of last resort for certain provinces and governments. The decision of each department must be supported by a majority of two-thirds of the members present and, when the majority cannot be obtained, a general meeting of all the departments is called to decide. The procedure is not public and the whole proceedings are in writing, each case being decided on a statement drawn up by the secretary and certified by the party as correct. The third great body in the administration of government is the *Synod*, or supreme ecclesiastical court. The executive power is intrusted to what is called the College or Committee of Ministers, who are 11 in number and distributed as usual in other governments, into different offices for home and foreign affairs, war, finance, &c. The civil affairs of each government are presided over by a civil governor, the military affairs of two or more governments grouped together by a military governor. To guide and give uniformity to decisions in legal cases, a voluminous code, called the *Svod Zakonov* or *Corpus Juris* has been drawn up, and declared to contain the law of Russia, in so far as not modified by the laws and privileges of particular provinces. It contains an abstract of all the laws and ordinances issued by the different emperors from 1649 downwards, and forms 15 large vols. The laws and ordinances in full, but reaching only to 1832, are contained in 50 vols. of this immense collection, 3 vols. being to the first seven years of the reign of the Emperor Nicholas. The revenue—derived chiefly from a capitation tax on all male boys, whether belonging to the crown or individuals, customs, excise, crown property including woods, mines, &c. monopolies, and a tax on the declared capital of merchants—is estimated to amount to the sum of £16,000,000 sterling. The public debt, in 1853, amounted to £63,537,450.

Army and Navy.—The army consists of 776 battalions of infantry 563 squadrons of cavalry and 290 batteries of artillery of above 3000 guns, numbering in all a nominal effective force of about 800,000 men though there is reason to believe that as this estimate is made on the assumption that the complement is in every case complete, the actual force falls considerably short of this, and does not exceed 600,000. It is raised almost entirely by conscription from the classes of peasants and artisans, every male of proper age being held liable to service. The levies during peace seldom exceed the proportion of 1 in 500 males; but during war this proportion has been doubled, and even tripled. The exemptions from service are very numerous, including nobles, clergy, magistrates, students, and merchants belonging to different guilds but the privileges attached to service are so numerous that, notwithstanding the notorious severity of discipline, many voluntarily seek it as honorable, and at least pecuniarily profitable employment. In the case of nobles, in particular, as it confers freedom, it can only be looked upon

as a valuable boom. The army is divided into regular and irregular troops. A good idea of the appearance of the finest regiments of the former is afforded by the accompanying group in which 1 represents a grenadier of the regiment of

RUSSIAN REGULAR TROOPS.—After W. Tamm

the guard of the Emperor Paul. 2 a Cossack of the guard. 3, a Cossack of the guard. 4, a Cossack of the guard. 5, a Cossack of the guard. In the more select regiments, men and horses are classified in the most minute manner as to resemblance. In one cavalry regiment the horses are all black, in another all bay &c. The men are arranged according to the colour of their hair and beard, or of their eyes and the general shape of their features, so that in one regiment all have aquiline noses, and black eyes and beards, and in another all have cock-noses, blue eyes, and red beards. The general appearance of the irregular troops is shown by the accompanying group; in which 1 represents a Lezghian. 2

RUSSIAN IRREGULAR TROOPS.—After W. Tamm

1, a Don Cossack; 2, a Cossack, in full dress. 3, a Tartar Cossack of the Crimea. 4, a Cossack of line of Caucasus and 5, a Cossack of Orenburg. The Cossacks in the Russian service belong to subdued tribes, inhabiting the plains at the foot of the Caucasus Mountains. The navy is much more formidable than might be expected, when the disadvantages under which Russian labours, in regard to maritime affairs, are

considered. The Arctic Ocean is the only open sea to which she has uncontrolled access. In the Baltic, her vessels must lie half the year frozen up in dock, and cannot reach the ocean without passing the sound which Sweden and Denmark must could shut up, or a hostile fleet outside effectually blockade. In like manner the Straits of Constantinople and the Dardanelles, in possession of an enemy, completely bar the outlet into the Mediterranean. The Caspian, the only other sea is merely an inland lake, lying below the level of the general ocean, and hence necessarily excluded from all direct communication with it. In 1803 the navy in the Baltic and Black Seas was said to consist of 60 ships of the line, of 70 to 120 guns each. 87 frigates, of 40 to 60 guns. 70 corvettes, brigs, and brigantines, and 40 steam-vessels armed with 9000 guns, manned by 42 000 seamen, and carrying 200 000 marines, including artillerymen. Besides these there is a large number of gun boats, galleys &c. in the Caspian Sea and in the Sea of Okhotsk. Nothing can exceed the hardiness and the cool, almost stoical, courage of the sailors but the length of time during which they are compelled to remain idle in their frozen ports, the comparatively narrow limits and smoothness of the waters within which all their training must be conducted, and various other untoward circumstances, necessarily make them deficient in that dexterity of management which constitutes so much to success in naval warfare and can only be acquired by long experience on the wide ocean.

People.—Politically considered the people are divided into the four classes of clergy, nobility, merchants and burghers, and peasants. The clergy are regular or secular. The regular clergy belong to some monastic order and are bound to some particular rule of life. They take the lead in the church and monopolize all its higher preferments. The secular are the proper parish clergy and not only may marry but must be married before they can hold a parochial cure. The nobility are so either by birth or by personal services in a civil or military capacity. To fix accurate standards of determining what persons are entitled to rank in the latter division all the offices of army, navy and state have been divided into 14 grades. Every one of the grades, even the lowest, which is that of ensign in the army or a college registrar in the civil service is a noble, but, so long as he rises no higher than the seventh grade, he is a noble only for life and cannot transmit his nobility to descendants but the moment he attains the eighth grade, that of major in the army, or navy captain or college assessor, his nobility becomes hereditary. In this way the class of nobility is continually receiving large accessions, and absorbing a rather moderate share of all the talent in the country. The third class consists of merchants and burghers. The merchants are arranged in three guilds according to the annual tax, which the individuals belonging to each pay to the state, as a trading license. Merchants of the first guild pay £100 and are under no limitation, either as to the kind of manufacturing and commercial enterprises in which they engage, or to the amount of capital which they may employ in them. Of the second guild pay £40 but are subject to a number of limitations, among others, cannot enter into any contract for more than £2000, nor keep either a banking or an insurance office; of the third guild pay only £10, and may carry on any retail trade, or any manufacture, provided that, in the latter case they do not employ above 83 workmen. The burghers pay from £1 to £3, according to the class of town they inhabit, and the number of workmen not exceeding 18 who they may employ. Burghers paying no license may within specified limitations engage in ordinary manufacturing or retail trades. All burghers pay capitation-tax, are liable to military conscription and may suffer corporal punishment. The fourth class, consisting of peasants or serfs, is the lowest of all, and by far the most numerous. They belong in nearly equal proportions, to the crown and to individual proprietors and though their different conditions admit of considerable diversity, the great body of them are, to all intents and purposes, little better than slaves. It ought to be observed however that the humanity and enlightened liberality of the late emperor, Alexander, formed a new division, to consist of free cultivators. His successor, Nicholas, has followed steadily in his steps and operations are now in progress, by means of which, though at some very distant date, there is reason to hope that the complete emancipation of the serfs

will be effected. Another classification of the people may be called the ethnographical, or that which arranges them according to their original stocks or races. Those taken in their most general acceptation are only two—the Caucasians and the Mongolians—but under each a considerable number of varieties are traced. The Caucasian stock includes Slavonians, Germans, Finns, Tartars, Greeks, and Jews. The Mongolian stock is represented almost exclusively by the Calmucks, who occupy some of the S.E. steppes but have lost many of their distinctive features by intermarrying with Caucasian varieties. Of the Caucasian stock the Slavonians under the names of Russians, Poles, Lithuanians and Lettians, Welshians and Servians, form about nine-tenths. Of these, again, the Russians proper form the great body of the population, and are estimated at about 40,000,000. They occupy, without intermixture, the central provinces between the Dnieper and Volga, form a vast majority in the N. between the Ural Mountains and the White Sea, and in the S., between the Dan and the Dniester and are found more or less intermingled with other varieties, in all other parts of the country. The Poles are naturally found in the greatest number in their own unfortunate country. In that part of it which, in the dismemberment, fell to the share of Russia, they amount to about 7,000,000. The Lithuanians are found chiefly in V. Poland and in Galicia, Wallachia and Moldavia. They are estimated at about 1,500,000. Still farther S. are the Lettians, or as they are often called, Goons, from living chiefly in Courland. They are also the chief occupants of Livonia, are wholly devoted to agricultural pursuits, and may amount to 500,000. The Walerians, and among them a few Germans, are found only in Bessarabia between the Dniester and Pruth. Their language is a curious mixture of Latin, Greek, Italian, and Turkish. They too, do not exceed 500,000. The Tatars, or Finns, forming a second family of the Caucasian stock, from their features bear a considerable resemblance to the Mongolians, but have been recognized as Caucasians chiefly from their light hair and blue eyes. They are settled on both sides of the Gulf of Finland, but on the N. of the Gulf form the two marked divisions of Finns proper and Laplanders, the former living S. and the latter N. of the Gulf. To the S. of the Gulf, the Finns occupy the far greater part of Esthonia, and a small part of Livonia, widely separated from the W. Finns, though the mode of separation is not known, a great number of Lapps, or Finnish tribes are found occupying the W. slopes of the Ural Mountains and the banks of the Middle Volga, under the names of Syrasses, Permyans, Vogles, Ostaks, Tchuvasses, Tcheremissians, Mordvians and Teyptians. The most numerous are the Tchuvasses and Tcheremissians, who live together on both sides of the Volga, in the neighbourhood of Kazan, and are estimated at about 500,000. All the others do not exceed the same number. The third great branch of Caucasians inhabiting Russia are the Tartars, who here form four distinct tribes—the Tartars of Kazan, in some respects the most civilized nation in Russia, though the great majority of them still cling to Islamism, and numbering about 230,000; the Bashkirs, occupying both sides of the Ural Mountains from lat. 50° to 54° N., still given to wandering life, and amounting to about 130,000; the Nogais, occupying a large part of the Crimea and the steppe to the N. of it dispersed over the country E. of the Sea of Azov and the N. base of the Caucasus, and amounting in all to about 600,000; the Metcherians, forming a few small tribes not exceeding 20,000 persons, live among the Bashkirs. The German or Teutonic race inhabiting Russia, consist chiefly of Germans and Swedes, intermingled with a few Lettians. The Germans are dispersed over the Baltic provinces S. of the Gulf of Finland, among the Lettians and Esthonians, where they constitute the greater part of the nobility. They are also numerous both in Petersburg and Moscow and a considerable number of German colonists are settled in gov. Saratov and other parts of the Middle Volga. The Swedes are numerous both along the E. shores of the Gulf of Bothnia and the W. shores of the Gulf of Finland. Their number in these localities and more partially in Esthonia, are supposed to exceed 100,000. The Greeks dispersed over all the E. provinces in Macedonia, and in the Crimea, where they are the occupants of several villages are estimated at about 200,000. The Jews are widely found in the central and N. provinces,

but are very numerous in ancient Poland, particularly gov. Wilna, Grodno, Volhynia and Podolia, where they form the far greater part of the urban population. Their number is supposed to exceed 1,000,000.

Languages.—From the number of tribes and races just mentioned it is evident that many different languages, and a vast variety of dialects must be spoken. The Russian however both as the proper language of the country and the vernacular of at least four-fifths of the inhabitants, is the only one which is necessary here to specify. It is based on the ancient Slavonic but has been much modified by the introduction of Greek, Tartar and Mongolian terms. It has an alphabet of thirty-seven letters, a written and printed character of a peculiar form and a pronunciation which it is hardly possible for any but natives to master. Its dialects are both numerous and irregular making the attainment of it by a foreigner extremely difficult, but it is soft, rich and sonorous, and though long greatly neglected, and hitherto much richer in translations than in original works, has shown itself fit to be the vehicle of any kind of literature, and from the attention now paid to it, will probably are long free itself from one very marked stigma by becoming the court language instead of French by which the honour has been long usurped.

Religion.—A considerable proportion of the less civilized tribes continue, more or less, addicted to their heathen superstitions. The Jews in all parts of the country except the centre, from which they are specially excluded have their synagogues and freely perform their religious rites. Lutheranism is professed by the great body of Germans and Swedes and the E. Catholics form a preponderating majority in Poland. These, however are the only important deductions to be made from the almost universal ascendancy of the Greek church which possesses numerous important privileges as the religion of the state, and in strong is the effectualness of the great body of the people, who give a very invalid if not unlighted assent to all its dogmas and not only willingly perform, but appear to take wonderful delight in performing its various minute and too often superstitious and even ridiculous ceremonies. In its general toleration of all other sects it contrasts favourably with popery though it lays itself out to the charge of intolerance towards its own members by refusing to allow them under any circumstances, to quit its communion. The Greek church strongly resembles the Roman in doctrine but differs essentially from it in government and discipline by rejecting the claims of the Pope, acknowledging the emperor as its temporal head, and submitting to be governed by a supreme synod, composed partly of lay members, in permitting or rather requiring, the marriage of the secular clergy, forbidding the use of images or corporeal representations of any kind, except pictures which it uses lavishly and, more important than all in preventing the free circulation of the Scriptures in the vulgar tongue. In form it is an episcopacy composed of forty dioceses of which four are governed by metropolitans, are seen by archbishops, and twenty by bishops. The churches are extremely numerous, and generally the best-constructed and most conspicuous edifices in all towns and villages, and remarkable either for the number or the enormous magnitude of their halls, the incessant ringing of which appears to be the most characteristic part of the ceremonial.

Education.—Though Russia still ranks among the more imperfectly educated countries of Europe, the government has long taken a distinguished lead in the cause of education, and promulgated a complete national system, which, though not yet carried into full effect, has made, and continues to make, great and rapid progress. The basis of this system was laid by Peter the Great and promoted by Catherine II., but is indebted for its fuller development to Alexander and Nicholas. It divides the whole country into university districts, in each of which a university fully equipped either has been, or is intended to be erected. Each district extends over several governments, all the public schools in which, consisting of a regular gradation of gymnasia, district and parish schools, are under the superintendence of the university. Other important schools not subject to the same superintendence, are placed under the heads of military colleges, and schools to give military and vigorous to the whole system, a state of public instruction has been appointed, and now forms one of the great departments of the state.

Manners etc.—The nobles, as a body are neither highly polished nor highly educated, though not a few of them evince a strong desire to obtain at least a reputation for both these qualities by their liberal patronage of art, literature, and science, in the persons of those who have acquired distinction in them. It is not uncommon to find, even among the nobles who have never been beyond the frontiers, individuals who speak French, English, and German with the most perfect fluency and intonation and almost with the accuracy of natives. Their superiority in this respect, is mainly owing to the remarkable imitative power which they possess in common with the rest of their countrymen. In respect to political ideas they are somewhat in advance, and would not object to assist in curbing the absolutism of the czar. The prevalence of this feeling is strongly indicated by the interference of the government to prevent their free access to foreign countries where their ideas are supposed to be acquired. In their mode of living the nobles generally are ostentatious and luxurious and general report speaks unfavourably of their domestic morals. The want of a proper middle class to fill up the gap between them and their serfs is strongly felt and Russian society too often exhibits only the two extremes of imperious haughtiness and harshness on the one hand and cunning, cringing subservience on the other. Where the peasant has obtained his freedom a better spirit usually appears, but the state of the great body of the serfs is the lowest to be found in any country in Europe. Their time and labour are absolutely at the disposal of their master, and even their person may be sold to belong to him, since the law permits him to inflict corporal punishment, without any official restraint, provided it is not inflicted with such savage severity as to cause death within 24 hours. Still many of the serfs, in so far as more bodily wants are concerned, appear to be in comfortable circumstances. They are seldom stinted in the broad their staple article of food and stout cabbage-soup, with an occasional relish of animal food, are clothed with coarse linen trousers, stockings of woollen cloth and boots of those made of goat leather though more frequently of matted horse-tree bark and over all a long coarse druggel coat, in summer or a sheepskin with the woolly side inward, in winter and live in log-enters which, though rudely constructed and often dirty in the extreme, are generally well heated and not unsuited to the climate. With all this however, a sense of wretchedness is often felt, and too many drown it in intoxicating drinks. A less noxious stimulant, composed by boiling a mixture of herbs, honey and other ingredients is extensively used and a far better indeed the best of all tea, is rising greatly into favour.

History—The earliest annals of Russia only furnish occasional glimpses of S-ythien and other barbarous hordes roaming over its surface, and do not begin to bear marks of authenticity till the middle of the 9th century. About that time a Helio freebooter named Kurik, probably a Dane, having been called in to aid the people of Novgorod pursued the course then common with his class, and made himself master of a great part of the country. He was slain in 988 by a flag, who treacherously aided Kiev, and made it the seat of government. About the year 1000, he was succeeded by a son, who is said to have ruled over a vast empire, and embarked 80,000 men, and sailed from the mouth of the Dniester to attack Constantinople, but was prevented by a tempest. A second expedition in 941 under Igor the son of Kurik was defeated. In 980 a new era commenced by the accession of Vladimir, known in history by the name of St. Vladimir the Great. He married Anna sister of the Greek emperor Basil II. and in 988 embraced Christianity. His example was quickly followed by almost all his subjects. He is the first Russian sovereign who assumed the title of Veliki Knes or Grand Duke. At his death in 1015, he left numerous sons who quarrelled in dividing his dominions, and commenced a series of internal feuds, which continued with little intermission to distract the country for above two centuries. The first appearance of anarchy was produced by a great civil war. The Tatars, who under Genghis-Khan had overrun many countries and overthrown many dynasties of Asia, appeared under his son Touthan on the S. E. frontiers of Russia, to the number of 500,000, and shortly after on the river Kalka near the Sea of Azof gained a signal victory over the combined Russian princes. The sudden death of Touthan prevented the Tatars from completing their conquest till

1238 when they returned headed by Beton, Touthan's son, wasted the country with fire and sword, and brought it entirely under their yoke. For two centuries and a half the Tatars of Kapchak, whose khans now fixed their Golden Horde or Imperial residence on the banks of the Volga, held Russia in bondage, and though allowing the native princes to rule as they wished, subjected them to the most humiliating treatment. On the annual visit of the khans, representatives to receive tribute, the Russian rulers were required to lead their horses by the bridle, and feed with corn out of their own pails of state. During this disastrous period the only part of the country which remained free was Novgorod, which having at an earlier period become an independent republic, had acquired great commercial importance, joined the Hanse league, and increased in population to nearly 500,000. In 1581, when the direct line of Beton became extinct, and the Tatar throne was claimed by rival competitors, the Russians were encouraged to resist and in 1589 Demetrius, one of the competitors, was encountered and signally defeated by Demetrius IV. The Tatar power, however still remained unshaken, and Demetrius, notwithstanding his victory was obliged to sue for peace. At length the Tatars of Kapchak met a foe who was more than a match for them, in the person of the celebrated Timur who, in two invasions of the Russian territory one in 1389 and another in 1395 gave them blows from which they never recovered. The Russians were now able to war with them on more equal terms. By the victories of Ivan or John III. who began to rule in 1462 the vengeance of the Tatars was thrown off and in 1480 the Golden Horde itself ceased to exist.

The reign of Ivan commences a new epoch in Russian history. He not only made the Tatars tributary but defeated the Tatars and Lithuanians reunited the minor principalities and captured Novgorod. His name and deeds became well known in the west and ambassadors from European powers were sent for the first time to his capital of Moscow. In internal administration he proved himself a religious despot, but the vastness and splendour of his achievements entitle him to be regarded as the founder of the Russian empire. He died in 1533 when his son and successor Ivan IV. was only four years old. During his minority great disorders took place under the regency of Helmski. At length in 1545 Ivan assumed the reins, and subordinated the title of Czar for that of Veliki Knes. He proved such an unnatural and remorseless tyrant, that he is known in history by the surname of Terrible, and yet by his energetic measures both at home and abroad he raised the country to an unequalled height of prosperity. In his time Siberia was added to the empire. He died in 1584 the same year in which his eldest son had perished by a blow from his own hand, and left two other sons under the guardianship of his brother-in-law Boris Gudonoff, who became virtually sovereign for the elder son Feodor, though nominally czar, was hopelessly unskilful and the other named Demetrius, was cut off shortly after his father's death, by a foul murder, in which Boris was implicated. On the death of Feodor in 1598 the male line of the freebooter Kurik, whose dynasty had furnished 166 sovereigns, and endured above seven centuries, became extinct. Boris now gained the throne, and at first courted popularity by salutary measures but soon degenerated into a tyrant, and by a just retribution lost his life in defending his throne against an adventurer calling himself the Demetrius whom Boris was believed to have murdered. This Demetrius scarcely reigned a year before he perished in a revolt but a second spurious Demetrius immediately appeared, and for seven years the country became the prey of anarchy. The Poles and Swedes took advantage of it, and had made themselves masters of several provinces when the national spirit took fire, and Michael Romanoff, a descendant in the female line from the house of Kurik, was, after a severe struggle, placed on the throne. From him the ruling dynasty is directly descended. He began his reign in 1613 in very unfavourable circumstances, and was obliged to purchase peace from the Swedes and Poles by ceding all the provinces which gave him access to the Baltic, but he reigned so long and with so much prudence, that at his death in 1645 the prosperity of the empire had decidedly revived. He was succeeded by his son, Alexis, whose minority proved troublesome but who, on assuming the reins, acted with such energy and discretion that he regained a great

part of the territories which his father had been obliged to cede and completed and greatly extended the internal improvements which he had begun. He was twice married and left two by both wives—Fedor and Ivan by the first, and Peter by the second. Fedor reigned from 1826 to 1832, and dying without issue, was succeeded by Ivan and Peter as joint sovereigns, under the guardianship of Sophia, Ivan's full, and of course Peter's half sister. Ivan was weak both in mind and body and Sophia endeavored by excluding Peter from all rule, to monopolize the whole powers of government. The attempt proved a failure. Sophia was confined in a monastery. Ivan abdicated and Peter, in 1855, became sole czar. Neither has private nor his public life as free from blemishes but when the state in which he found Russia, is contrasted with that in which he left it, it must be admitted that no sovereign ever acquired by a juster title the surname of Great and Father of his country. Peter, by his last command conferred the succession on his widow originally a Livonian peasant who succeeded the throne in 1725 under the name of Catherine I and after reigning scarcely two years, was succeeded by Peter II grandson of Peter the Great, who after three years was succeeded by Anna, Peter's first half sister. Anna died in 1740 after having bequeathed the succession to her grand-son Ivan, a mere infant but in consequence of a revolt the bequest was disregarded, and Elizabeth Peter the Great's daughter was called to the throne. During her reign Russia for the first time took a direct share in European politics and sent an army westward beyond her own frontiers. She died in 1762 and was succeeded by her nephew Peter III whose reign and life were terminated six months after by a conspiracy to which his wife is believed to have been party. She by the acquisition of the army and people mounted the throne, under the title of Catherine II, and pursued a course of policy remarkable alike for its unscrupulousness and its success. The most remarkable events of her reign are the wars with the Turks in which the Russian arms were most triumphant and the dismemberment of Poland. Catherine was succeeded in 1796 by her son, Paul whose feeble policy and extravagant freaks had ruined almost dolefully as to his sanity when a band of conspirators deprived him of life in 1801. He was succeeded by his son, Alexander. His personal virtues, the wisdom of his internal administration, and the glorious defeat of a most formidable and unprovoked aggression on the national independence make his reign one of the most illustrious in the annals of the empire and keep his memory in grateful remembrance. He died in 1825 without issue, and in consequence of an arrangement by which his second brother Constantine renounced the succession was succeeded by his third brother Nicholas, the reigning 1854 monarch under whom Russia has acquired a more commanding influence in European politics than she ever possessed before and under whom likewise, the hereditary policy of aggrandizement of territory has been continually continued. The following table of the area of the empire at various epochs, will show the success of Russia in this department of her policy—

| Year. | Area in sq. m. | Year. | Area in sq. m. |
|-------|-------------------|-------|-------------------|
| 1802 | 391,906 | 1763 | 5,112,000 |
| 1809 | 484,102 | 1792 | 3,300,500 |
| 1810 | 5,027,681 | 1825 | 5,978,900 |
| 1815 | 4,685,776 | 1847 | 5,939,136 |
| 1840 | 6,322,400 | 1854 | 6,008,010 |
| 1736 | 4,531,040 | | |

RUSSIAN AMERICA. In 1867 this territory was sold to the U. States. According to the treaties with Great Britain and the U. States in 1824 and 1825 it comprehends all the American coast of the Pacific, and the adjacent islands N. of the parallel of 54° 40' N. and the portion of the mainland W. of the meridian of 141° W. which passes through Mount St. Elias. Area, 485,967 sq. m. The part of the mainland N. of Mount St. Elias consists of a narrow belt, which is continued along a mountain ridge parallel to the coast, and has nowhere a greater width than 10 marine leagues, or about 83 m. The interior of Russian America is very little known but it appears, from several expeditions, that throughout its W. part it is elevated and uneven, while the part lying along the Arctic Ocean is invariably flat, with the exception of a stretch lying between 141° and 152° W. The coast, which is the mainland and the islands have almost all been carefully explored. The N. coast was first discovered in the course of the century. Capt. Cook, in 1773, during his last voyage, reached Icy Cape, lat. 70° 30' N. and 161° 46' W., and it was supposed, from the large masses of ice there met with even in summer that further progress was impossible. In 1826, however Capt. Beechey proceeded E. as far as North Cape or Point Barrow lat. 71° 28' S. N. lon 156° 21' 33' W. while at the same time the lamented Sir John, then Capt. Franklin traced the coast W. from the mouth of the Mackenzie to Ikroavik Reef lat. 70° 32' N. lon. 148° 52' W. The intervening space between Point Barrow and Beztan Reef was first explored in 1837, by Jones and Simpson, officers of the Hudson's Bay Company. The whole of the Russian American N. coast, from Demarest Point, W. to Point Barrow, its most N. extremity stretches with tolerable regularity in a W N W direction and is, with the exception of a small part in the E. a dead flat, often nearly on a level with the sea, and never more than 10 ft. to 20 ft. above it. From Point Barrow the coast takes a uniform direction, from N. E. to S. W. lying gradually towards Cape Labrov, which is 850 ft. high. It now curves S. forming between the two large islands of Kotzebue Sound and Norton Sound, the remarkable peninsula of Prince of Wales, which projects into Behring's Strait, and terminates in an elevated promontory, remarkable as the most W. point of N. America. From Norton Sound it turns first N. W. then S. E. becomes indented by several large bays, including those of Bristol Bay and Cook's Inlet on the opposite side of the long and narrow peninsula of Alaska and is lined almost throughout by several groups of large islands, of which the most important belong to the Aleutian, Kodiak and King of Islands. The greater part of the coast last described is very bold presenting a succession of lofty volcanic peaks two of which, on the W. coast of Cook's Inlet, have the respective heights of 11,370 ft. and 12,066 ft. The climate of Russian America is not so cold as either the E. parts of the same continent, or the E. parts of the continent of Asia under the same latitudes. It is, however far too rigorous to admit of agricultural operations and the whole value of the territory is derived from the products of its fisheries, or of the chase. The latter have been placed under a rigid monopoly by the Russian government, which has conferred the sole privilege of trafficking in them on the Russian American Company. This has led to remonstrances on the part both of the U. States and Great Britain. Those of the former have not led to any particular result but those of the latter have been so far successful that a lease has been granted to the Hudson's Bay Company giving them the exclusive possession of the main land of Russian America, from 50° 40' N. to Cape Spencer lat. 58° 35' N. and the exclusive privilege of supplying the Russians with agricultural produce and provisions. The population of Russian America is estimated at 51,000, of whom perhaps 6000 are Russians, Crochis, Kodiaks, and Aleuts. The remainder about 50,000 in number, enjoy a greater or less degree of independence, and commit almost entirely of Esquimaux.

The remainder about 50,000 in number, enjoy a greater or less degree of independence, and commit almost entirely of Esquimaux.

RUST, or **RUSSA**, a tn. Hungary, Thither Danube, co. and 8 m. N. V. Oedenburg, W. bank of Lake Neusiedl. It has three churches, a townhouse, and an hospital. A famous wine is produced in the vicinity. Pop. 1199.

RUSTCHUK, a fortified tn. Turkey in Europe, Bulgaria, r bank Danube at junction of the Low opposite Gurguovo, and 945 m. N. W. Constantinople. It has woollen, silk, and cotton manufactures, some linen weaving, and a considerable trade, and is commanded by a castle. Pop. 80,000.

RUSTINGTON par Eng. Sussex 1287 ac. Pop. 843.

RUSTON, three par. Eng. —1, (East), Norfolk 2494 ac. Pop. 845—2, (West) York (E Riding) 910 ac. Pop. 185—3 (See or South) Norfolk 471 ac. Pop. 118.

RUSZKA, a vil. Hungary, co. Abauyvar, 17 m. S. Kacschau. It has a flour-mill, and a trade in wine, which is largely grown in the district. Pop. 1869.

RUSZKINOCZ, or **Ruszkow** [Latin, *Russequium*] a privileged market tn. Hungary co. and one of the 16 towns of Epe, in a mountainous district, on an affluent of the Poprad, 7 m. N. W. Leutschau, with two churches.

RUTE, a tn. Spain Andalusia, prov. and 37 m. S. E. Cordova. It has paved streets, a townhouse, a prison, a richly endowed hospital for the sick, a poorhouse, several schools, one of them normal, a granary, a church, numerous hamlets, and a picturesque promenade. Near Rute are traces of an ancient town supposed to have been of the Gothic period; and on the summit of the hill which commands the town is a fortress, with the inscription 'Clodius II. king of the Goths, caused this fort to be built, and spent on it 30,000 pieces of gold. Agriculture, manufactures of linen, coarse cloth, and stockings are carried on, and there are a fuller's-mill, 15 flour-mills, 27 oil mills, and 18 stills for brimley. Near it are marble and Jasper quarries. Pop. 7840.

RUTHFN a tn. Prussia Westphalia gov. and 17 m. E. N. E. Arnsberg on a steep height above the Mohne. It contains three R. Catholic churches, and has important tanneries, several mills, and a trade in cattle. Pop. 1399.

RUTHERGLEN, commonly called **RUTHER**, an ancient royal, and a par. and municipal burgh, and par. Scotland co. Lanark, 8 m. S. E. Glasgow on the railway to Hamilton 1 bank Clyde. It consists chiefly of one spacious street extending E and W with a considerable breadth of houses on either side, and numerous lanes and alleys branching out in all directions and has a townhall parish Free, and U Presbyterian churches. The inhabitants are chiefly employed in weaving muslins for Glasgow manufacturers, and in the print, chemical and dye-works, and the coal mines in the vicinity. Rutherglen was in ancient times an important place, with a large traffic on the river, but both its consequences and its trade have been absorbed by Glasgow which was included in the 12th century within its municipal boundaries. It unites with Renfrew &c. in sending a member to Parliament. Pop. burgh, 6947 par. 7954.

RUTHIN, **Rauvour**, or **Royston**, a par. bor., market tn. and par. W. Wales, co. Denbigh. The town beautifully situated on the Glydd, 6½ m. S. E. Denbigh is well built, has a pleasing appearance, with an ancient church, chapel for Baptists, Independents, Wesleyans Primitive Methodists, and English Independents, a fine county-hall, a townhall and prison, a free grammar-school an hospital for aged persons and a number of other valuable charities. It unites with Denbigh, &c. in returning a member to Parliament. The inhabitants are chiefly employed in agriculture. In the vicinity are the remains of a magnificent old castle, called *Rhyddin*, or *Reil* Fortress from the red stone used in its construction now incorporated with a recently erected Gothic castellated edifice. Pop. bor. 13978. Area of par. including Llanerbydd, 1989 ac. Pop. 1333.

RUTHVEN par. Scotland, Forfar; 3 m. W. Pop. 508.

RUTHWELL par. Scotland Dumfriesshire; 6½ m. by 2½ m. Pop. 1110.

RÜTI, several small places, Switzerland, particularly —1 (or *Rättig*) A vil. and par. can and 19 m. S. E. St. Gall, in a mountain gorge traversed by the Rutilbach. Pop. 1498.—2, A vil. and par. can and 17 m. S. E. Zürich, in a high but fertile district. It contains the wing of an old Franciscan monastery, secularized at the Reformation, and has a flour-mill and a distillery. The Jes. in the neighbourhood, Forest a castle 60 ft. to 70 ft. high. Pop. 1112.

Vol. II.

RUTIGLIANO, a vil. and com. Naples, prov. and 18 m. S. E. Bari. It is walled, and contains a collegiate church, four monasteries, a nunnery and an orphan hospital. Pop. 5800.

RUTLAM a tn. Hindostan Gwalior dom., cap. rajah ship, feudally subordinate to Seindia 44 m. W. by N. Oojein 1650 ft. above the sea, lat. 23° 19' N. lon. 75° 5' E. It is large, well built, and was lately the station of a British political agent.

RUTLAND a vil. and township, U. States, Vermont, on a height above Otter Creek at the junction of West River and East Creek, and on the railways between Boston and Burlington and to Whitehall and Troy, about 50 m. S. W. Montpelier. It is well situated in a fertile district and has an Episcopal and a Congregational church, a courthouse and jail, several schools, a tannery and quarries of a beautiful white and clouded marble. Pop. 3715.

RUTLAND two isls. —1 An inhabited isl. Ireland, co. Down, immediately E. North Arran, comprising about 180 ac. of arable land —2 One of the Adamant Islands, Bay of Bengal, near and S. the Great Andaman.

RUTLAND, or **RUTLANDSHIRE**, the smallest of the English counties, surrounded by the co. Lincoln Leicester, and Northampton Area 91,020 ac. of which 90,000 are arable, meadow and pasture. The surface is beautifully diversified by gently rising hills, with fine valleys between. It is included in the district occupied by the lower formations of the collied series, the prevailing rock is a clay-grained limestone but there are quarries of good building stone and limestone both soft and hard is found in many parts. The soil is almost everywhere loamy and rich. The W. part of the county is under grass, and the E. chiefly in tillage. Great attention has been paid here to rearing choice animals, both oxen and sheep. For the last it is celebrated, as also for its wheat and clover, much of the latter being sold as Stilton. There are nearly 3000 ac. of native woods and plantations in the county, but the extensive woodlands for which it was formerly distinguished are now greatly reduced. It returns two members to Parliament, both for the county. Pop. 22,963.

RUTUNTOOR two tns. Hindostan —1 In N. E. part of Berar dom, 85 m. S. E. Munnah lat. 22° 21' N. lon. 82° 25' E. a ragging place at the junction of numerous roads, and the cap. of a rajahship or dist. termed Chotegaur and the cap. of the Thirty-six Fortresses —2, A tn. dom and 40 m. S. Baroda, near the Nerbudda, lat. 21° 24' N. lon. 73° 28' E.

RUVU, two places, Naples —1 A vil. and com., prov. Basilicata 10 m. S. S. W. Melfi with a monastery P. 9330 —2 A tn., prov. Bari, 12 m. S. E. Barietta surrounded by walls. It is the see of a bishop who has a cathedral of little architectural merit, another church, three monasteries, a diocesan seminary and orphan hospital. Pop. 6418.

RUYEN a vil. and com. Belgium, prov. E. Flanders, 20 m. S. S. W. Ghent, r. bank Scheldt. Weaving brewing, grinding corn and oil, the manufacture of sherry, and husbandry are carried on. Pop. 2616.

RÜYSBROECK, a vil. and com. Belgium prov. and 11 m. S. W. Antwerp, L. bank Rupel with two breweries manufactures of woollen and linen fabrics and an active trade in cattle, grain horses, and manufactured goods. Pop. 1701.

RÜYSSELEDE a vil. and com. Belgium, prov. W. Flanders, in a plain, 12 m. S. E. Bruges. It has manufactures of linen, which employ more than 400 looms, and several oil and flour mills. Pop. 7089.

RUTTON (or **THE ELVEN TOWN**) par. Eng. Salop 4698 ac. Pop. 1165.

RUFABA, a vil. and com. Spain, prov. and to near Valencia, that it may be considered its suburb, on a plain near the Turia. It has a church a courthouse, prison two primary schools and a trade in corn rice silk, and fruit. Pop. about 1700.

RYACOTTA a tn. and hill-fortress, British India presid. Madras, dist. and 60 m. N. by W. Salem on the r. bank Puzos near the Mysore frontier. The town, girt on all sides by jungle, and with a ruinous fort, stands at the foot of a height, up which a broad road winding around it, and flanked by a rampart leads to the citadel. The first defensive works are within 550 ft. of the summit, the flagstaff on which is in lat. 12° 28' N. lon. 78° 6' E. Between the first and second line

of Anticosti are a plateau, magnesia, barrocha, etc., and a new temple is excavated in a precipitous face of the rock.

RYAN (Lacc) a bay of the Atlantic, in the S.W. of Scotland which penetrates deeply into Wigtownshire, and contains with Luce Bay to form the remarkable peninsula known by the name of the Rhynas of Galloway. It is about 7 m long N to S, with an average breadth of 3 m, and forms a beautiful expanse of water with good anchorage, and depth sufficient to float the largest ships.

RYALER par Eng. West 1551 ac. Pop. 449.

RYANER or **RYANER**, a tn. Russia, gov. and 53 m W N W Jaroslavl on the Volga, at the confluence of the Rytynka. It contains three churches, a courthouse, and other public buildings, and has manufactures of linen spinning mills several launseries, tallow melting establishments, and an important trade in grain. Pop. (1847), 5740.

RYBNIK a tn. Prussia, Alsace gov. and 44 m S. E. T. Oppeln, cap. circle, on the Rhine, amidst woods and lakes. It contains a R. Catholic church and chapel, a synagogue, hospital and house of invalids, and has manufactures of woollen cloth a trade in cattle, and two mills. Pop. 2061. — **THE** **WIND** area, 250 sq. m., consists of an extensive well wooded plain watered by the Odra but dry, cold and sandy. Pop. 57,278.

RYBURGH two par. Eng. Norfolk. — 1. *Presb.* 1170 ac. Pop. 940. — *Little* 740 ac. Pop. 190.

RYCKEVICHT a vil. and com. Bliu, prov. Antwerp, 9 m W Tarsout. It has a brewery a distillery and three mills. One of the poor colonies for the suppression of pauperism has its seat here. Pop. 107.

RYDAL, a township, England co. Westmoreland 12 m N W Ambleside celebrated for the remarkable beauty of its scenery and for having long been the residence of William Wordsworth the late po. Laureate.

RYDE a beautiful and thriving village New S. Wales 8 m from Sydney.

RYDF a market in and watering-place England Hampshire, in the Isle of Wight on an elevated and commodious bay an extensive view of the sea. The houses are generally built on the R. facing obtained from quays in the vicinity they form several regular well paved streets, lighted with gas, and numerous detached villas with gardens before them, and ramparts above them in the present a very picturesque appearance. There are altogether eight churches and chapels including one Methodist, one Independent one Primitive Methodist, one chapel of ease one proprietary chapel, a church belonging to the Eng. Isl. Establishment and a R. Catholic chapel. Some of these places of worship are very handsome structures. The other principal edifices are the market house, several handsome hall theatre yacht club house and arcade. The club-house is considered the finest building in the island. The educational mans comprise a free British and infant schools and several academies and seminaries. There are a prosperous literary and scientific institution a philosophical society several libraries and an infirmary called the Royal Isle of Wight Infirmary open to the whole island. Ryde exports grain, four sheep lambs and calves, and has boat and yacht building yards. The pier erected at an expense of £11,000, is nearly half a mile (2265 ft.) long and forms a favourite promenade. Boatsmen cross to Portsmouth several times a day, and there is regular steam communication with Cowes Southampton &c. Pop. 7147.

RYDHAM, a tn. British India. See RATHBON.

RYE, a municipal and par. bor. market tn. and par. England co. Sussex, a member of the Cinque Ports. The town 54 m S. E. London, on the South-Eastern railway is beautifully situated on the Rother which meeting with the Tillingham enters the sea 2 m. from the town and there forms Old Rye harbour. It has several regular streets in well paved and lighted with gas; has a union workhouse, and jail, a spacious church in claret, places of worship for Baptists,

Independents, and Wesleyans, a free grammar-school, and a custom-house. Brewing and ship building are carried on to some extent and the trade of the place is very considerable in coal, corn, timber, hops, oak-bark, fish, &c. The borough sends a member to Parliament. Rye is a place of great antiquity, and was formerly surrounded with walls, some of the gatehouses of which still remain. It furnished some vessels to assist Edward III. in his invasion of France. Pop. (1851) 4541. Area of par., 2318 ac. Pop. 4595.

RYEGATE a tn. England. See REMATE.

RYEGHUR, two tns. Hindostan. — 1. *Presb.* and 74 m S. E. Bombay dist. S. Concan lat. 18° 15' N. lon. 73° 38' E. on the summit of one of the W. Ghats. It contains the burial place of the famous Maratha chief Sevajee, who had a residence here. It was taken from the Peshwa by the British in 1818. — 2. A tn., presid. Bengal, 50 m N W Rm. bhalpoor. In the fertile territory around it, gold, and occasionally diamonds, have been discovered.

RYENKIL, a tn. Hindostan, prov. Benar 84 m S. E. W. Ratanpoor lat. 21° 15' N. lon. 82° 15' E. It is placed in a tract more fertile than most parts of the prov. Gundwana, and according to the last available accounts, it possessed a stone-fort, and several thousand dwellings but this part of India is so uncivilized and remote from great roads that all information respecting it is very scanty.

RYHAI, par. Eng. Rutland 2070 ac. Pop. 1075.

RYHAI, or **RYHAI**, a tn. Russia gov. and 65 m W Koursk on the Sen. at the confluence of the Ryla. It contains four stone and 14 wooden churches, and a monastery and has a considerable trade particularly in vegetables and fruit. Pop. (1849) 7029.

RYME-ISTRECHA, par. Eng. Dorset, 1003 ac. P. 216.

RYMELAM a vil. and com. Belgium, prov. and 15 m S. Antwerp, on the Dyke, navigable to this point. It has two breweries a vinegar-manufactory and two flour-mills inhabited chiefly occupied in weaving fishing, and husbandry Pop. 2012.

RYPIN a tn. Russian Poland 39 m N N W Plock, r. bank Odlek, an affluent of the Drewena. It was once strongly fortified and has manufactures of woollen cloth leather and combs. Pop. about 2000.

RYSEB a tn. Holland. See RUMER.

RYSTON par. Eng. Norfolk 1190 ac. Pop. 40.

RYRWICK a tn. Holland. See RUMER.

RYTCHIA one of the E. branches which the Volga throws off in the lower part of its course before reaching the Caspian. It commences about 24 m N Astrakhan, and has a length of about 40 m.

RYTHOFF par. England, York (W. Riding) 8030 ac. Pop. 354.

RYTON three par. England. — 1. Durham 5.81 ac. Pop. 2737. — 2. *Salop* 1444 ac. Pop. 404. — 3. (*Upper-Dan-* *more*) Warwick 1650 ac. Pop. 623.

RZEDITZ (Odena and Lutzen) a vil. Bohemia, circle Chemnitz, 4 m W Hollitz with a church. Pop. 1430.

RZEPIN or **RZEPIE** a vil. Bohemia circle Buzlau, 16 m. from Bzenice, with a church and a castle. Pop. 1060.

RZESZOW or **RZESOW** a tn. Austrian Galicia, in a deep valley watered by the R. Polok, 94 m W by N Lemberg. It is well built has a criminal court, which holds its sittings in the castle a gymnasium, high-school, and Infirmary. Christians and Jews nearly divide the population. The former are chiefly employed in linen weaving and general trade the latter are almost all workers in a kind of apertuous material called Bessow gold, which they make up into various kinds of trinkets, and employ in setting false jewels. These are not much in request in the home market, but find a large sale in Russia, Wallachia, Moldavia, Servia, and Rumania. Pop. 4994.

RZICZAU, a tn. Bohemia circle Kaurisch, near Blochowitz with a castle. Pop. 1029.

S

[For places not found under S, look under C and Z.]

SAADEN, a to Arabia, Yemen, about 150 m N N W Sana. It is surrounded by walls and defended by a castle, and has iron-mines in the vicinity.

SAAGH, or **SAGH**, a vil. Hungary, Danub., co. and 10 m S.S.W. Temesvár at the foot of a mountain of its name, near 1 bank Marcal with a Greek church. Pop. 8683.

SAAL, a rivulet in Bavaria, Lower Franconia, 14 m. W N W Kitzingen on the Saale here crossed by a bridge. It has a church, a mineral spring, and several mills. P. 1068.

SAALBURG a m. Germany, duchy Hesse, lordship and 29 m. S.W. Gera, on a height above 1 bank Saale, here crossed by a bridge. It has a church, castle, hospital, and old iron works, and two mills. Pop. 1207.

SAALE, three rivers Germany — 1 (*Saaleburg Saale* or *Saale*), rises in Saaleburg, on the frontiers of the Tyrol, flows N N E, past Saalfeld, Weischach, and Lohr enters Bavaria, passes Schleissheim forms part of the boundary between Bavaria and Austria and after a course of about 70 m. joins 1 bank Naab, 4 m. below Naaburg — 2, (*Franconian Saale*) rises on N W frontiers Bavaria, near Kumbhofen flows S.W. to Hertenau past Neustadt and Hammelburg and at Grunhuden joins 1 bank Main after a course of about 70 m. 1 principal affluent, the Mula and Saum. — 3 (*Saxon or Thuringian Saale*), rises N side the Pfleider Gebirge, in the N.E. of Bavaria, flows N N W past Hof into the principality of Hesse; then almost N past Saalburg, W past Eisenach belonging to Prussia, and across Schwarzburg-Rudolstadt, N N W past Saalfeld in Saxo-Coburg N N E into Saxo-Gotha, passes Kahle, Jena and Kainburg enters Prussian Saxony and proceeding very circuitously but in the main nearly due N passing Merseburg Halle, where it becomes navigable for barges of about 75 tons, and Bernburg, the last in the duchy, to Anhalt, and joins 1 bank Elbe, 6 m. below Calbe, after a course of about 300 m. Its principal affluent is, on the right, the Wipper, Rode, White Elster, and Elbe; and on the left, the Loppnitz, between 11 m. Unter Wippitz and Bode. It is of great commercial importance its channel being generally well deep.

SAALFELD a to Saxo-Melungen in the midst of the Thuringian Forest, 1 bank Saale, here crossed by a bridge 21 m. S. Weimar. It is an ancient town, surrounded by walls, with four gates, contains two castles, one of them a ruin, three churches, a rich progeny museum, and infirmary and has manufactures of chimney tobacco dyes and chemical products. On the opposite side of the river is Alt Saalfeld Pop. 4889.

SAALFELDEN, or **LICHENSTADT** a to Austria, duchy and 27 m. S.S.W. Salzburg, in a romantic valley on the Urstein 2000 ft above sea-level. It contains an asylum for persons labouring under incurable disease, and a school. Pop. 1232.

SAANE, or **SARNE** a river Switzerland, rises in S.W. corner, cant. Bern, in Mount Saaneich N slope of the Berne Alps, flows first N through the valley of Gaster, then W through the E part of cant. Vaud, enters the R. of cant. Fribourg, traverses it centrally, in a N direction passing the town of Fribourg, again enters cant. Bern, passes Lauigen, and about 5 m. below joins 1 bank Aar after a rapid course of nearly 70 m. Of its numerous affluent the chief are the Jura, Aargau, and Emme, on the right and the Glâne on the left.

SAANEN, or **GERMANY**, a to, and part Switzerland cant. and 53 m. S.S.W. Bern, in a valley of the same name. It contains a house of the one of the largest rural churches in the canton, built in 1444, an hospital, and an extensive trade in cheese, produced within the district, but generally known by the names of Gruyère. Pop. 9169.

SAAR, two places, Austria — 1, (or *Ziemer*) A to Maria, circle and 20 m. N.E. Igau, in a mountain plateau near 1 bank Inn, here crossed by a handsome bridge. It contains the ruins of an old Cistercian abbey, and a church. Pop. 2362 — 2, (or *Sar*), a vil. Hungary, Litha, Theiss, co. Havas,

4 m. from Gyurgyute with a church, excellent table-wine is produced in the vicinity. Pop. 1864.

SAAR-UNION or **BOUQUIMON** a to France, dep. Bas-Rhin, on both sides of the Saar 28 m. N W Strasbourg. It consists properly of the two small towns of Bouquimon and Neu Saarwerden, connected by a bridge across the Saar. It is a cheerful-looking place, and has manufactures of woollen hosiery, and bonnets dye-works, tannery and tile works. Pop. 3726.

SAARBRÜCK, a to Rhensish Prussia, gov. and 41 m. S.S.E. Treves, 1 bank Saar which here becomes navigable, and is crossed by a stone bridge communicating with the suburb of St. Johann. It is tolerably well built, has several courts and public offices, a castle, long the residence of the prince of Nassau, a Protestant and a Catholic church, a synagogue and gymnasium manufactures of iron, cloth, alms and tobacco and a trade in wool, iron and coal, the two last being extensively worked in the neighbourhood. It was founded in the 10th century was given to the church of Metz by the Emperor Henry III and subsequently governed by its own counts till 1880 when it came by marriage into the hands of Nassau. It was afterwards fortified, and suffered much by war. In 1875 it was almost entirely burnt down, and its fortifications dismantled. Pop. 9031.

SAARBRÜCK, a to Rhensish Prussia, gov. and 12 m. S.S.W. Treves, 1 bank Saar at the junction of the Louk. It contains a castle, a Catholic church and chapel, and has manufactures of sail ammunitions, alms, and leather and some shipping. Pop. 2029.

SAARFELD a to Holland. See **ZAANDAM**.

SAARFELD, or **SARFELD**, a to Rhensish Prussia, gov. and 43 m. S.E. Treves, 1 bank Saar, a circular base is occupied out from an elevated plateau. It is a place of some strength surrounded by walls, & defended by several forts and capable of being, immediately contains a Protestant and two Catholic churches, a synagogue, hospital, arsenal, and barracks occupied by a garrison 2782 strong, and has manufactures of wire and articles in steel, a building yard and trade in iron and lead obtained from mines in the vicinity. Barons Louis belonged to France and was fortified by Vauban under Louis XIV. It fell to Prussia in 1815 and has since been fortified. **SARFELD** a vil. Rhensish Prussia, gov. and 13 m. N.W. Düsseldorf, 1 bank Ruhr. It has a Catholic church, and an important manufactory of fire-arms. P. 1877.

SAARWELLINGEN a vil. Rhensish Prussia, gov. and 30 m. S.E. Treves, on a small affluent of the Sarre with a church, a synagogue and three mills. Pop. 1457.

SABAZ, **ZAVRZE**, **LUTZKO** or **BOZONOVIC**, a to Bol-esna, cap. circle, on a lofty hill above 1 bank Eger, here crossed by a chain bridge, 40 m. W N W Jagers. It consists of the town proper and two suburbs. The former is surrounded by walls with three gates, each of which is surmounted by a tower. It is built with some regularity, but is on the whole a miserable place. It has seven churches of which the principal one is a large but clumsy edifice, with four towers, a townhouse which is rather handsome, a court-house and gymnasium, and manufactures of nails and rosoglio. St. John of Nepomuk the famous Bohemian saint, pursued his studies here. Pop. 4990. — The circle, area, 660 sq. m., separated from Saxony on the N. by the Ezer-Gebirge, which, with its ramifications, covers a considerable part of the circle in that direction. Elsewhere the surface is flat, and well watered by the Eger and Goldbach. The higher lands are much wooded, and abound with game the lower generally fertile, producing rich crops of corn, hemp, rye, and flax. The minerals are chiefly alum, lignite, and iron. Pop. 142,344.

SABU, one of the Dutch W. India islands, 15 m. W N W from 1 point of St. Eustatius lat. 17 39' N; lon. 63 19' W. It rises abruptly from the sea, and is inaccessible except upon the S. side, where are a little creek and a land-

ing place the latter so intricate and narrow as to admit one person only at a time. The island is inhabited by a few Dutch families, who cultivate the cotton-plant, and manufacture stockings and shoes, &c. Pop. (1851) 1899.

SABADELL, a tn. in Spain, Catalonia, prov. and 10 m. N. Barcelona, near the Ebro. It has a church, a suppressed convent primary and superior schools, manufactures of woollen and cotton goods, and a trade in these articles, and in agricultural produce. Pop. 3000.

SABANJAH, a small tn. and lake, Asiatic Turkey, prov. Anatolia. The town, about 12 m. S.E. of Ismail, is a mere travelling station, full of coffee-houses and stables, with about 500 houses and two mosques. The lake (see *Sepon*) lies a little N.E. of the town, it is of an oval form, and upwards of 8 m. long. It has little pretensions to beauty but to the N. the woods are of noble growth, and rate to the summit of the mountains, at least 1000 ft. above the lake.

SABARA, a city, Brazil, prov. Minas-Geraes, r. bank Guacobi, or Velhas, below the confluence of the Sabaratia, over which river there are three stone bridges, 50 m. N.W. Ouro Preto. It stands in a kind of basin, completely surrounded by hills, 2300 ft. above the sea, and has a very hot though not an unhealthy climate. It is tolerably well built, the streets being paved, and the houses, though of earth, regular in form, and covered with tiles. It has a civil and criminal court, five churches, a townhouse, courthouse, hospital and a Latin and a primary school. The chief trade is in gold, worked in bars and in dust, provisions and spirits. Pop. about 4,000. The district is rich in gold and has also mines of platinum. The soil is admirably adapted for coffee and sugar which have long been its leading crops. Pop. 101,000.

SABDIO, a vil. and com. Univ. Lombardy, gov. Milan, prov. and 13 m. N.E. Brescia, in the Val Sabbia. It consists of two parts on the opposite sides of the (hence the one on the l. bank, called *Sabbio di Sopra* and the other on the r. bank, called *Sabbio di Sotto*). It contains a handsome parish church, two auxiliary churches and has important iron manufactures and several oil mills and tile-works. Pop. 1129.

SABBIUNO, a tn. and com. Univ. Lombardy, gov. Milan, prov. and 18 m. S.W. Mantua. It was anciently an important place but is now greatly decayed. It is the seat of a court of justice and other public offices and has several churches, an old palace now used as a courthouse, a poorhouse, an ordinary and an orphan hospital and manufactures of rosoglio. Pop. 7016.

SABDEN, a vil. Reg. Lancashire, in a hilly district, on a tributary of the Calder 4 m. N.W. Barnley. Pop. 1160.

SABERMUTTY, a river India. See *SABERMUTTY*.

SABINA, an anc. prov. Papal States, which was bounded N. by Umbria, W. the patrimony of St. Peter & the Campagna di Roma, and E. Naples. It now forms part of the dioceses of Spoleto and Rieti and the commerce of Rome.

SABINE, a river, U. States, rises in Texas lat. 32° 30' N. forms, for about 180 m. the boundary between Texas and Louisiana, and after a tortuous course, chiefly E., of about 900 m. falls into the Gulf of Mexico in lat. 29° 30' N. lon. 94° W. Before entering the Gulf of Mexico, it enters and passes through a lake, to which it gives its name. At certain periods it has only 4 ft. water on the bar at its mouth, but is navigable for steam-boats for about 180 m.

SABINCELLO, a peninsula, Dalmatia, forming the N. extremity of the circle of Ragusa. It projects into the Adriatic, and is connected with the mainland by an isthmus scarcely 1 m. wide while its whole length is about 45 m. and its maximum breadth 8 m. It is very rocky and even mountainous. The chief place upon it is Ragusa.

SABOTE, a tn. Spain, prov. and 28 m. E. Jaen, near l. bank Guadalquivir and inclosed within a strong wall, with a well-preserved fort, belonging to the Marquis of Camarasa. It has a townhouse, prison, an endowed elementary school for each sex, besides a private one for girls, a parish church, a substantial edifice with three naves, some beautiful furniture, a nursery and a chapel, a flour and seven oil mills, and an annual cattle-fair. Pop. 3061.

SABLATH, or *SABLATH*, a market tn. Scotland, circle Fife, r. bank Firth of Forth, about 26 m. W. Dundee, with a church, school, townhouse, hospital, a tile-works, and two mills. Near it are excellent glass-works. Pop. 700.

SABLE [anc. *Sablon*] a tn. France, dep. Sarthe, pleasantly situated on the Sarthe, 14 m. N.W. La Flèche. The river divides it into two unequal parts, which communicate by a bridge of black marble, and on a height immediately above the town, is a magnificent chateau, on the site of a strong castle, of which only a few ruins now remain. It has a church, manufactures of gloves, hats, and serge; several woollen mills and a trade in corn, fruit, salt, wood, dyes, and marble; the last two being extensively quarried in the neighbourhood in which there is also a mine of anthracite. Pop. 4631.

SABLE ISLAND, a bare treeless isl. N. Atlantic Ocean, off E. coast, Nova Scotia, lat. (E. end) 43° 59' N. lon. 59° 47' W. (N. end) 44° 25' N. lon. 59° 15' W. It is about 25 m. long and 1 m. to 5 m. broad. It is formed of two nearly parallel ridges of sand, shaped like a bow and meeting in a point at either end. It is wholly or partially covered with grass for considerable spaces, in others scooped out by the wind into bare crater-shaped hollows or bays up into sandhills, attaining the elevation of 75 ft. above sea-level. Between these ridges a long pond, in some parts 12 ft. deep, extends from the W. end for a distance of 11 m. The island is almost entirely composed of white sand, easily moved by the winds, which causes it to drift like snow forming and removing large hills in a very few years. Although presenting hardly anything deserving the name of soil the amount and variety of its vegetation is extraordinary. Besides two kinds of grass, there are wild peas and other plants, affording subsistence to 400 or 500 wild horses and innumerable rabbits besides domestic cattle. There are strawberries, plums, berries, juniper-berries, and currants the latter so abundant as to have been proposed as an article of export. The coasts abound in fish of various kinds. So numerous and fatal have been the shipwrecks that have taken place from time to time on the island, and on the formidable sandbars with which it is surrounded from the frequency and density of the fogs that prevail, and the violence and irregularity of the currents around it that an establishment for the relief and removal of shipwrecked persons, and for preventing the plunder of the wrecks has been erected here, and is maintained at the joint expense of the Legislature of Nova Scotia and the home government. Sable Island was discovered early in the 16th century. Its name, Sable, is French, and means sand.

SABLEN or *SABLES D'OLONE* (anc. *Sanc. Arane Antonece*) a seaport in France, dep. Vendée, 30 m. S.W. Bourdeaux-Vendée. It stands on a peninsula, connected with the mainland by the E. side only and consists of three or four long, clean, and well-paved streets, almost parallel to each other and to the coast. The S. part of the town rises on a gentle eminence in the form of an amphitheatre, while the N. part is on a flat, scarcely raised above the level of the sea. The harbour is good, and is an important haven of refuge on a very dangerous coast for the numerous vessels trading between Nantes, Rochelle and Bourdeaux. Its entrance is defended by batteries. The trade is considerable in corn, salt, wine, tar, cattle, and fresh and salt fish. The fishing on the coast, including that of shell-fish and sealions, is very active. Sables possesses a court of first resort, a commercial college, and a fourth-class school of hydrography. Pop. 5680.

SABON, a river, Spain, Leon, formed in N.W. of prov. Zamora, by the junction of several torrents from the sierras of Gamoneda and Tejera, enters the Portuguese prov. Trás-os-Montes, flows S.W., passing near the town of Moncorvo, and joins r. bank Douro, after a course of about 75 m.

SABRAO an isl. Indian Archipelago. See *ADENARA*.

SABRINA, a volcano isl. Azores, which suddenly arose about 1½ m. off N.W. coast of St. Michael, opposite Ponta da Ferraria, and was so named after H.M. S. *Sabrina*, which happened to be cruising in the neighbourhood. On 18th June 1811, the volcano erupted commenced by the ejection of enormous columns of water, smoke, and steam, accompanied with subterranean explosions. On the 16th the water appeared, and two days after, attained the height of 180 ft. On the 4th July when the eruption ceased, an island had been formed, 800 ft. high and ½ league in circuit, with a little center inclosing a basin of boiling water. About the middle of October of the same year the whole disappeared in an unfathomable depth.

SABUGAL, a tn Portugal, prov Beira-Raua, on the Cos, 38 m. S.E. Braga, defended by a castle with a very lofty tower. It has a Latin school, hospital, and almshouse. P 380

SABY, a tn Denmark, Zealand, bell Hjørring at the mouth of a small river of same name in the Kattegat. It was once a place of some importance, but suffered much from inundation, and, in 1792 its harbor was completely sanded up by a storm. Since then it has been in a state of gradual decay. There is a regular ferry from Sliby to Læba. P 800

SABZAWAR, or **SURAWAR**, a tn. Puzna, prov Khorezm, in an extensive plain of some name 65 m. W. Kishapoor. It is a very ancient place, and became the seat of an independent dynasty, but was afterwards ruined, and continued almost totally deserted till a comparatively recent period when its walls and fortifications were rebuilt. It is still, however, an insignificant place, with a miserable bazaar. Pop. about 3000

SACATECOLUCA, a tn Central America, state and 28 m. N.E. San Salvador in the low country which borders on the Pacific, near a volcano of the same name. A considerable quantity of indigo is grown in the vicinity. Pop. 8000

SACATEPEC, **SACATEPECQUE**, or **SACATEPECQUE**, a corregimiento or prov Guatemala, Central America, bounded N by that of Yucatan, N.W. Solola, W and B Guatemala area, above 3000 m. It is generally mountainous and the climate, though sometimes inclining to cold, is, for the most part mild and agreeable. One of the most remarkable summits is the Volcan-de-Agua, which rises up in the form of an almost perfect cone, to the height of 13,678 ft. and though not beyond the snow limit, becomes occasionally whitened with hoar-frost or snow. Immediately to the W of it, another vast mountain the Volcan-de-Fuego, is continually emitting smoke and ashes. It is probably higher than the former though it has never been accurately measured the loose and hot ashes on its sides make its ascent impossible. The soil of the province is rather barren in the N, but, in the S, is remarkably productive of maize and other grain various kinds of fruit, vegetables, sugar, cotton, and tobacco. In many situations coffee might be successfully grown. The *Cactus opuntia* has been introduced in recent times and the yield of cochineal from the plantations is already as great as that of Amatlan. The capital is Old Guatemala or Antigua. Pop. about 50,000

SACATEM, a tn Portugal, prov Fátima; N side, fifth of the Tagus, at the mouth of the Frelas, 7 m. N Lisbon. It is an important entrepôt for wine. Pop. 2400

SACATOU or **SARATOU**, a city Soudan. See **SACATOU**

SACCO a tn. Naples, prov Principato-Citra 15 m. N.E. li Vailo, with a church. The environs are fertile, and rich in medicinal plants. Pop. 3000

SACCONDEE, a small maritime prov Upper Guinea, Gold Coast, W. Abiana with a Dutch fort, and a small village belonging to Great Britain. Besides its capital—Sacondee—it contains several villages. Bananas, yams, and maize are raised, and some trade is done in gold and palm oil. Pop. estimated at 8000 fighting-men

SACCONEX **GEMET** and **LATTE** two vills. forming two parts Switzerland, one, and 2 m. N.W. Geneva. They contain a great number of country-seats, among others, one called Delices, in which Valère resided for five years. Pop. 2004

SACDON a vil. Spain, New Castile, prov Guadalajara, 64 m. E. Madrid, in a picturesque valley at the foot of a mountain called Pucara-del Indero. It has a townhouse and a prison, an endowed primary school, a church, oil and flour mills, brandy-stills, some weaving and a pottery. The baths of Sacedon, supposed by some to be the *Thermæ* of Ptolemy are much frequented by the sickly Madrileños, in the season from June to September. Ferdinand VII. created a small bathing-town near the springs, which is now called El Real Nido de Leñal. Pop. 1275

SACHSA, a tn. Prussia Saxony, gov and 45 m. N.W. Erfurt at the foot of the Hara, with a church, and manufactures of Hens and hats, gypsum-kilns, a marble-quarry and a trade in cattle. Pop. 1248

SACHSEN, Germany. See **SACHSEN**

SACHSENBERG, a tn. Germany, princip. Waldeck, dist. Eisenberg, 11 m. S.W. Corbach, with a church, and several well-frequented fairs. Pop. 1000

SACHSENBURG, a market in Austria, Illyria, circle Villoch, dist. and near Spital, in a beautiful valley, r bank

Drave with a church the ruins of an old castle, iron-works, and a mine of antimony. From the number of calcareous, siliceous, and other minerals found in it, it is supposed to be the Roman *Therma* or *Lidæa*.

SACHSENHAUSEN, several places, Germany. The largest is situated 1 bank Main, opposite to Frankfurt, and is considered one of its suburbs. The only other deserving of notice is a vil. princip. Waldeck, 6 m. E.S.E. Corbach, with a church. Pop. 946

SACILI E a tn and par. kingd. of Italy gov and 37 m. N. N. E. Venice, on the Livenza here crossed by a bridge. It is a vil. has a parish and three auxiliary churches, an hospital several handsome buildings among which the palace formerly occupied by the podestà is conspicuous and many features of woodlans, linen and paper. An excellent wine is produced, and there are mineral springs in the neighbourhood. Pop. 4600

SACKAFOO, a city Central Africa, lat. 13° 4' 52" N lon 6° 15' E occupying a long ridge which slopes gently towards the N, and is laid out in regular well-built streets. It is surrounded by a wall 20 ft. and 30 ft. high and has 12 gates, which are regularly closed at sunset. There are two large mosques, besides several other places for prayer. In the centre of the city is a spacious market-place and there is another large square in front of the sultan's residence. The dwellings of the principal people are surrounded by high walls which inclose numerous flat-roofed houses, built in the Moorish style. The inhabitants are principally Felmahs, possessing numerous slaves who are employed in domestic duties weaving house-building shoe-making, and iron-works and in tending cattle. The necessaries of life here are cheap. Indian-meat is in great plenty and very good. The exports are principally ivory and hide-skin robes, called *shams*. The common imports are Gores out, brought from the borders of Ashantee and coarse calico and woollen cloth, in small quantities with brass and pewter dishes and a few spices. The Arabs from Tripoli and Ghadames bring unwrought silk, otto of roses, spices, and beads. Slaves are both exported and imported. A great quantity of Guinea coin is taken every year by the Felmahs in exchange for salt. The market is extremely well supplied and is held daily from sunrise to sunset. — Denham and Clapperton

SACKLETS HARBOUR, a vil and port U. States New York 150 m. N.W. Albany on Black River Bay, an inlet at the E. end of Lake Ontario, of which it is one of the most secure harbours. It contains three churches, a shipyard, Malison barracks belonging to the U. States, and a number of manufacturing establishments. Cleared (1849) for foreign ports 258 vessels, tonnage 142 799 entered 279 vessels tonnage 108 161

SACKLÉNEN, a tn. Baden, circle Upper Rhine r bank Rhine here crossed by a bridge, 61 m. S.E. Friburg. It is walled and has an old church a banking establishment, and some shipping trade. Pop. 1500

SACOU a tn, U. States, Maine, on the Eastern and the Boston and Maine railways and on a river of same name, which here mingles with the tide-water after a beautiful fall of 43 ft. It stands in a district distinguished both by its fertility and the beauty of its scenery contains many handsome dwellings and public edifices, including five or six churches, and is connected by bridges with Biddeford with which it properly forms only one town. The water-power furnished by the falls, has led to the erection of important industrial establishments, including a woollen wine lace cotton, and a great number of saw mills. Pop. 5794

SACOMB, par. Eng. Herts., 1510 ac. 1 op. 813

SACRAMENTO, a tn U. States, on river of same name, at the junction of the American about 150 m. N.E. San Francisco. It occupies a low and level plain, materially inundated during the rainy season, but partly protected by an embankment and since 1849 when it contained only four houses, has suddenly sprung up into a handsome city having become the grand depot for the supply of all the northern gold-mines. The streets cross each other at right angles, and many of them are lined with large oaks and sycamores of the original forest. It has repeatedly been almost destroyed by fire, but has since reappeared in a neater and more substantial form; and contains Episcopal, Presbyterian Baptist, R. Catholic, and three Methodist churches. One of the last for coloured persons;

several hotels of a very costly description, several breweries, steam-mills, syrup and soda manufactories, numerous smithies, &c. Pop. (1855), 10,000.—The river, 800 m. in length, varies in width from 200 yards to 300 yards, is navigable to the town of all seasons, and a considerable trade is carried on, both by sailing vessels and steamers, which ply daily between Sacramento and San Francisco. Its general course is S.; it receives the Feather, American, Butte, and numerous smaller streams, and near its mouth is found the Joaquin, when the united stream falls into the Bay of San Francisco.—The valley with that of San Joaquin, is a vast depression between the Sierra Nevada and the coast-range.

SACRIFICIOS—A small green island, Pacific W coast, Mexico, about 4 m. long, and about that distance from the land lat 15° 40' N lon. 98° 6' W.—An Isl Gulf of Mexico, off the coast and 8 to N. E. Vera Cruz. The channel between it and the mainland affords the best anchorage on the E. coast of the gulf. On the island itself, which appears to have been used by the ancient Mexicans for sacrifices and burial, excavations have been made and a number of remarkable antiquities obtained including a beautiful urn carved in white marble or alabaster, and great numbers of clay-vases covered with paintings and designs.

SACCHI or **SOWUL**, a river brand, formed in prov Minas-Geras, by the junction of the Coates and Vermelho and after an E. course of about 230 m joins I. bank Doce It is navigable for about 200 m.

SADIA SANTA MARIA, a tn. and par Spain, Galicia prov and 9 m. E. Orense. W shore, Bay of Ares with a church a harbour, which admits vessels of considerable size and a valuable sardine fishery 1 op 2198.

SADABA a tn and coast Spain, Aragon prov Sara gossa, on a plain, r bank Jilquel. It is surrounded by ancient walls, with four gates is modernly built and has a church a suppressed convent, two primary schools, a courthouse prison, and a trade in corn.

SADAO a river Portugal, Sec 501 D 10.

SADDELL, also **SADL VES** par Dept Argive 23 m by 3 m. Pop. 1400.

SADDING (C) par Eng 1650 ac. Pop. 228

SADULE an isl in America off coast of Puerto-del Fuego lat 55° 25' 50" S lon 64° 4' 30" W It unites with other two islands in forming the excellent harbour of Port Maxwell and is coney sed, particularly towards its summit, of large blocks of greenstone which, from their ferruginous nature, have a remarkable effect upon the compass. Its surface is partly covered with low stunted brushwood, and its coasts abound in fish.

SADUPESAI E a mountain, England co. Cumberland immediately E. of Skelton. It has a height of 4787 ft. and consists of a nucleus of granite, overlain by green hornblende and slate.

SADDLEWORTH with **QUICK** a vil and par England, co. York, about 12 m E. N. E. Manchester It is one of the central localities of the cotton and woollen manufacture and is traversed both by the Huddersfield canal and the Manchester and Huddersfield railway has several chapels of ease and Independent and Wesleyan chapels, national and catholic schools a paper and numerous cotton and woollen mills freestone quarries, and coal-mines. Area of par 182 260 ac. Pop. 17793.

SADU an isl Japan Sea lat. (R. point) 36° 20' N lon. 134° 30' E is a large bay, 4 com. Nippon It is about 90 m. in circumference.

SADJAH a decayed tn. Hissatouba, 42 m. S. W. Madras, lat. 12° 51' N lon. 80° 14' E. It was formerly a populous place, and celebrated for its gingham. A few Dutch houses, and a miserable native town to the W see all that remain of this once flourishing place.

SADOKA **HAKKA** or **SADOKA**, a tn. Bohemia circle and 23 m. S. W. Miesebow on the Salswasser. It has a parish church, a castle, an hospital, and a bathing establishment. Pop. 2219.

SADVAL-AL, a river Sweden which rises in Umeå 1 uppearr, near the frontiers of Norway, flows S. E., and after a course of above 100 m., falls into the Gulf of Bothnia, 12 m. E. Umeå.

SADLICES a tn Spain, New Castile prov and 30 m. S. W. Leonia with a church, courthouse, prison, and primary

school brick and tile works, flour-mills, and a trade in rice, oil, and wine. Pop. 1754.

SADENS (SR), a tn France, dep. Seine-Inférieure, on the Arques, 24 m. S. N. E. Rouen with manufactures of linen, glass, leather, and glass Pop. 1816.

SADTEL, or **SADENIA**, a tn Sweden, Hls and 20 m. S. S. E. Falun. It is a small place, but has important manufactures in its vicinity manufactures of articles in iron, and several saw-mills.

SADFAKES, a seaport in Tunis. See **BRAX**.
SADFTT, or **SADEN**, a tn. Syria, 25 m. E. by N Acre This was one of the five holy cities whither the Jews resorted from all parts of Christendom in old age to die and be interred. It was utterly destroyed by an earthquake in January 1857 when nearly the whole of its inhabitants, from 6000 to 7000, also perished.

SAD FAL AERKE, a vil and com. Holguen, prov E. Flanders, 7 m. N. E. Ghent with two flour-mills two heavy forges, and a vinegar-manufactory. Inhabitants chiefly employed in weaving and agriculture. Pop. 2974.

SADFI or **SADFEZ**, an ancient seaport in Morocco, W coast, S. Cape Cantin on the slope of a hill, in a sandy barren district lat 32° 20' N lon 6° 12' W It is surrounded by a wall 91 ft. high and a ditch on three sides, which is, however, filled up in many places and on the fortifications fronting the sea there are 24 heavy guns mounted. Water is scarce and in summer has to be procured from wells. The bay in front of the town during the summer months, or from March to October affords as good anchorage and smoother water than any other on the coast but is entirely exposed to W winds the bottom is sand and mud and there is generally about 15 fathoms water a mile from the shore. The population of Sadfi is gradually decreasing some years ago it was estimated at 8000 to 9000.

SADFON WALKER bar market tn. and par Eng. See **WALDEN HATTON**.

SAG HANBOU R, a seaport in U States, New York, in an inlet of same name on the S shore of Gardner's Bay, at the E. extremity of Long Island, about 100 m. E. New York city. It has four churches, several mills, and a port which, in 1851 sent out 4444 tons of shipping to the whale-fishery. The whole tonnage of the district is 12,396 tons. 1 op, about 3000.

SAGA a tn Japan isl Kiusiu cap prov Fuzen and the most important town on the island lat 33 15' N lon. 130° 18' E. near one of the tongues of the Gulf of Simabara. Including the suburbs, it is about 8 m. long and 3 m. broad. Its numerous streets cross each other in exact order in the direction of the four cardinal points. The principal street is spacious and well kept, although the houses which are situated by tradespeople and workmen are low and of mean appearance. The town is traversed by many brooks, and a considerable number of channels the principal of the latter that of Sentopotan, is nearly 50 m. long and uniting the Gulf of Simabara with the Northern Sea, is of great importance to the inland commerce of Kinsu, of which Saga is the centre.

SAGALASSUS, a seaport, Asia Minor See **BOZDOUM**.

SAGALIN OULA a tn. China, Manchouree, r bank Amoor or Sagalin 620 m. N. N. E. Pekin; lat. 40° N, lon. 127° E.

SAGAN or **ZAGAN** a tn. Prussia, Silesia, prov and 49 m. N. W. Legnica, r bank Bobber. It is enclosed by ditches and a double wall has six churches, a castle, with fine gardens and park, theatre, lycæum, and houses of correction, manufactures of woollen and linen cloth, blacksmiths, distilleries, tile-works, and copper worked, oil, saw paper, and numerous other mills. Pop. 7102.

SAGGART, par and to Irel Dublin, 4458 ac. F 1408.
SAGII numerous places, Hungary, particularly —1 A vil Hungary, co. Nash, 1 m. from Martinsburg, with two churches and a trade in corn. Pop. 318.—(Kerenski) A vil. Hither Danube, co. Megyer, on Mount Kerecs, about 8 m. from Buda; with a church. Pop. 1069.

SAGH DOLY, or **SAGH AN-DOLY**, a market in Hungary Hither Danube, co. Honth on the Toly, here crossed by a stone bridge. It has a R. Catholic church, and a trade in salt. Pop. 1264.

SAGHALIEN, an isl Asia. See **TANBARAT**.

SAGHALIEN, a river, Asia. See **AMOUR**.

SAGHVAR, a vil Hungary, co Veszprim, 4 m. S. Sio-Fok, with a trade in corn and wine. Pop 1210

SAGINAW a bay, U States, Michigan, a large inlet of Lake Huron, 60 m. long, by 80 m. wide, containing a number of islands, of which Shawanunk, near the centre is the largest. It is navigable for ships of any burden, and contains numerous excellent harbours.—2, A river U States, Michigan formed by the union of several branches, flows N E. into the bay, it is 25 ft. to 30 ft. deep total course, 80 m. There is a bar at its mouth, with generally not more than 5 ft. or 6 ft. water.—3 A vil on the river 23 m. from its mouth with a U States land-office, a courthouse, and two steam sawmills. Pop. 1860. 917

SAGLIANO, a vil and com Italy Piedmont div Turin prov Biella beautifully situated and traversed by a very handsome and commodious street It has a church, and a suppressed Carmelin convent. Pop. 1801

SAGOAREMA a maritime vil Brazil, prov and 40 m E. Rio Janeiro, and about 60 m. W. Cape Frio

E side, entry of the Hooghly forming the Bay of Bengal, along the Sundarbans, and extending about 30 m to a little beyond 5 m to the beach. It is a low alluvial tract, very little raised above sea-level bordered along its shore with trees and mangrove thick undergrowth which cannot be removed without expatriation of the forest. The forest is a dense growth of mangrove covered mostly with grass-like *Tinctoria* as situated at the junction of the holiest branch of the Ganges with the ocean, it is held in high veneration by the Hindus, who visit it in vast numbers and have here a great temple, where large numbers of aged persons and children used to be annually sacrificed.

SAGRES, a seaport in pr. Portugal prov. Algarve, near Cape St. Vincent, 20 m. W. W. Lagos. It was founded in 1416 by the Infante Dom Henriquez, and John I. who established it as a school of astronomy, navigation, and oceanic commerce, and sent forth from its harbors the early Portuguese expeditions which discovered the Madeira and Azores, and explored a considerable portion of the African coast, paving the way for the grand exploit of doubting the Cape of Good Hope. It was burned by Drake in 1587, and destroyed by the earthquake of 1755. Pop. 310.

lets of Lake St. John which unite on 3 m. below the two outlets of the Saguenay, a river Lake Ontario, formed by two outlets from which point the river flows S.E. and fills into the St. Lawrence at Tadoussac Harbour lat. 48° 5' N. lon. 69° 45' W. Its entire length being about 90 m. to 100 m. It is interrupted in its course by abrupt precipices, over which it dashes its foaming current and being bounded by banks of great elevation is remarkable for the depth and impetuosity of its flow. The current is rapid, and the water is from 200 ft. to 1000 ft. high, and presenting remarkably picturesque scenery. It is of great depth. In mid-channel at low water, bottom was not found with 380 fathoms to 1400 fms. At about 2 m. higher up, it was found to be 180 fathoms to 1400 fathoms, and from 0 m. to 60 m. from the St. Lawrence 50 fathoms to 60 fathoms. The impetuosity torrent of the Saguenay when the tide is low, is sensibly felt in the St. Lawrence, and the current is so rapid that it is not possible to yield to its impulse and vessel, apparently going their course, have thereby been carried adrift in a different direction. Above thirty rivers pour their tributary waters into the Saguenay, twelve of which are navigable for canoes, and some of them for large boats. The Saguenay is navigable for small boats of any size for a distance of about 30 m. to 60 m. from the St. Lawrence, and at high water for vessels of large dimensions from 15 m. to 20 m. The Saguenay ceases to run into the Saguenay Bay from Quebec during the summer months, and with difficulty in its passage.

SAGUR, British India. See **SANGUR**.

BAGUEN a vil Spain, prov and 86 m. S.E. Leon on the Oca. It is walled has some elegant and substantial houses, a townhouse, two primary schools, an hospital as prison, a granary four churches, four hermitages, a nursery and two suppressed convents; four flour and three houses mills; a tannery and fifty houses for luena, sergeos, &c. In 1808, General Moore defeated a small party of French exiles and established his head-quarters at this point. Pop 3403

SAHAM Toney per Eng. Norfolk 4048 ac. P 1292
SAHARA. is the plural of Sahara which signifies in

The Sahara, it was pointed out, covers a width against an
 Arabic extension and unimpeachable plain, without trace of
 cultivation, the frequency of its application to the whole of
 Africa, this term has come to be considered as the proper name
 of the vast deserts which extend throughout the interior.
 S. of Morocco and Barbary from the Atlantic to the Nile.
 Some, indeed, affect to distinguish between the Sahara in the
 W. and the Libyan deserts adjacent to Egypt. But neither
 usage nor reason countenance such distinction. The deserts
 E. and W. in Northern Africa are alike vast and unexploitable,
 and all equally entitled to be called Sahara.

Boundaries.—The limits of this country towards the N and S, do not admit of being fixed with precision. On the E, the desert commences at the Lihyan Hills, which, in Egypt, confine the valley of the Nile on the W. higher up in Nubia, the desert, arid and dismal of reddish sand and black rocks often reaches down to the river thence it extends without interruption westwards to the Atlantic Ocean through 40° of longitude, and 1000 m. of latitude. The highest point depends on the extension northwards of the range, the line of which, taken c. 16° nearly may be said to lie in lat. 17 30' N. But there are many circumstances of local configuration which affect both the extension of the range, and their influence on the character of the adjacent country. In general, the Sahara has on the S. a broad seam of country too dry for cultivation, yet abounding in excellent pasturage for several months in the year, with frequency of small oases, and a few small towns, chiefly Timbuktu, and the Doum-palm (*Hyphaena* *thalystra*). The desert of Baharyah adjoining the Nile W. of Marco, is of this description resembling a rich park at one season of the year (about autumn) while at another it is little better than an arid and desolate waste. Such also seems to be the northern districts of Darfur and Wadai. On the frontiers of Bornu also and of Housa, the valley of Kaverre and the country named Ashir or Abir of which Agades is the capital, are fertile and well cultivated, and the Nile, as it flows, is interpreted forth to the banks. Further west, the desert seems to reach southwards to the banks of the sea, or river of Timbuctoo. This town, about 8 m. from the river, is surrounded by desert. But at a distance of a few days' journey to the N, and N are the coasts of Malabar and Aráwen which, seem however to be of the poorest description. Farther W lies Senegal which rock-salt is abundant. Perhaps, formerly it was a fertile valley, but now it is a desert. The coast of Senegal, from Tidjebou to the mouth of the river, is fertile, and the country of Tidjebou is fertile. Not far from Tidjebou, on the N W is Walida or (in the plural) Iwalien one of the chief oases of the western desert. W of Walida, halfway perhaps to Arguin on the coast, is Waden where the Portugese (who called it Holom) had once a factory. S.W. of Walida are Tugit and Igahout, the latter but seven days from Kanza thence the gum tree forest extends westwards along the N coast of Senegal, and the country is fertile. The country of the Senegal, and the large sandy forest, extends S. of the Senegal, and beyond Cape Verde.

the Soudanese Government, and the latter is still more irregular and less perfectly defined than the S. Wad Van may be conveniently assumed to be its commencement on the W. and thence, a line drawn E. to Tost or Touat crosses a tract which is more desert during eight months of the year. I was itself an extensive oasis in the midst of wastes, over its comparative fertility to the converging drainage of numerous streams from the distant mountains in the N. From the southern base of the same range of mountains rises a powerful stream, the waters of which are collected in the individual valleys or oases of Wargla, or Oargla, Tougourt, or Tougourt, Souf Tougourt or Tost, &c. These, therefore, confine the great desert as far as the Hamda of Tighot (itself an elevated desert plain) beyond which the Behra reaches to the Mediterranean Sea on the shores of the Great Syrtis or Gulf of Sidrah (this is the name of the Lotah muppin, the climatometer plant of the country). E. of this lies the extensive oasis of Fozzani, and at a less distance, towards the S.E., that of Ajgha or Ajgha. On the coast of the Mediterranean Sea, between Ajgha and Tougourt, lies the town of Tougourt, farther in, towards the S.E., towards fractures in the limestone rock allow the waters to gush to the surface, the oases of Bihwah, of El Wah, El Bahareh, El Khazib, and others adjacent to Egypt, presenting various pictures of luxuriance and dense population in the midst of the desert.

midst of burning sands. The deserts lying beyond the lines thus drawn, particularly N of Tawt and Wargla, are of great extent. The Hamada of Wargla is an elevated and stony tract, cold and utterly desolate, and six or eight days' journey in extent and probably they equal in area the oases scattered within them. The area of the Sahara, therefore may be estimated ascertained to be not less than 2,000,000 sq. m.

Dry Desert.—In the W. Sahara there is a coastal region named *Atawad* or the Dry which is peculiarly dangerous as it unites all the worst characters of the desert—want of water, intense heat, and moving sands, which obliterate every track, and render it difficult to find the way. And here superstition too adds its terrors, for the rolling sandhills are supposed to be haunted by spirits, who, calling the travellers by name, bewilder and lead them to destruction. The *Atawad* begins, probably on the shores of the Atlantic, and seems to rise chiefly between the 19th and 22d parallels. On the road from Tawt or Touat to Timbuctoo, it has a width of ten days' journey; and further E the route from Agades to Tawt crosses a sandy desert for 12 or 14 days. This utterly inhospitable tract probably extends, therefore, from W. to E. 1000 m. or 1200 m.

Climate.—The barrenness of the Sahara is obviously the consequence of its climate and of almost total privation of rain, the explanation of which would be hard to give, but it may be remarked, that the deserts of N. Africa are but the first portion of a desert zone which lies across the Old World in Arabia, W. India, Persia, and Chinese Tartary. As the skies are generally bright and unclouded so the evaporation is rapid and hence the nocturnal cold is often extreme. Ice has been found in Fezzan as well as on the Nile in Upper Egypt, and this phenomenon is more frequent in dry years. In the noonday sun, on the other hand, the sand often attains a heat of 140° F. and even the rocks appear scalded. Where there is moisture in concealed parts of the ground it often increases with salt. The fall of occasional rains seems to be determined in some measure, by the inequality and elevation of the ground. The *Regen* Mountains, near Agades, are often visited by sudden torrents, which diffuse joy and plenty through the surrounding valleys. The floods rapidly abated fill the wells to a great distance, and these are in many cases carefully covered with skins to screen them from the sun's rays.

Configuration.—As the African continent presents externally a remarkably compact figure, little indented or penetrated by arms of the sea, so it exhibits internally few proofs of physical revolutions in the form of great chains of mountains. The mountains of *Regen*, which advance into the Sahara from the S. (in lat. 18° N. lon. 8° E.) form but a small group, and rarely exceed 3000 ft. in height, but within the vast area of the desert, though we often hear of abrupt and rocky regions, there is no intimation of a chain of mountains. In crossing *Jebel Aures* southwards from Constantine to Algeria, the division of the waters is found at the height of 3500 ft. thence the descent is rapid to Biskra (lon. 2° E.), the absolute height of which is but 130 ft. But the river of Biskra descends a few days' (200 m. perhaps) before it reaches the Sahel and Lake Chad, and the extensive plains of *Togocara* which are, therefore, probably not above the level of the sea. The Hamada of Tripoli, which is a uniform sandstone plateau, 2000 ft. in height, is as abrupt and apparently as elevated as its descent into Fezzan, so on its northern edge, and this oasis, which collects apparently all the waters of the plateau, can hardly rise much above the level. In like manner it is evident that Lake Teind can have but little elevation. The desert in the W. appears to fall rapidly towards the gum-forests of the Senegal, and from the ridge there formed a windy or water-course, very rarely filled, called *El Hamra*, runs N. to W. and E. The desert E. of the road from Fezzan to Bornu is reported to be very mountainous and rocky, but nothing is known of its authentic details.

Geology.—Greece seems to be the rock which most frequently breaks through the sandstone covering of the waste. Towards Egypt, limestone comes into view. The Tripolitan Hamada is divided from E. to W. by a volcanic line, marked by at least one well-preserved crater, Tuggurt. Connected with this system, are the numerous hot springs, which issue forth copiously in many places towards the interior, particularly at Ughit (lon. 10° 30' E.), and spread luxuriance around them.

Ferruginous sandstone is common, and many rocky spots, chiefly in the W. desert, S. of Wad Nuan, have the reputation of containing iron. Copper was once obtained in abundance from the hills W. of Agades, but at present the only mineral which increases the resources of the Sahara, is salt evaporated at Tawdout on the route from Timbuctoo to Wad Nuan, and at Bilma in the country of the Tibboos E. of the route from Bornu to Tripoli.

Zoology and Vegetation.—In the desert, properly so called, there is little of animal or of vegetable life. The large animals which characterize S. Africa, are here wholly wanting. A few species of antelopes are met with in favored spots. The lion avoids the parched country. Leopards, jackals, and serpents of many kinds, little undisturbed possession of the burning sands. The least tortoise of great size, is said to be common towards the S. where bushes grow; there the *Arak*, or *Salicaria* Fernox, generally prevails. Prokely salafin, with other tough and humble plants, are comprehended under the Arab name of *haskal* or herbage. As the country improves, the *Acacia ferruginea* appears, then the *Talia* (*Acacia Arabica*) and other trees, till the *Doum* and date palms mark the limits of the desert. Yet the date-palm itself usually thrives best beyond the limit of the rains. In Fezzan and other tracts where the *date-grove* constitutes the wealth of the inhabitants, heavy rains often fail to the rain, by dissolving and carrying to their roots the salt formed on the surface of the ground.

The People.—The inhabitants of the Sahara, according to Leo Africanus, are all of one race, though distinguishable into five branches, viz.—1. The *Zanaga* Zanaga in the extreme W. 2. The *Zowagha*, next to them on the E., from Tawt towards Gaber. 3. The *Targi* occupying the middle of the desert, from Agades to Ghadames and Wargla. 4. The *Lempia* towards the S. E. and 5. The *Berbers* in the N. E. adjoining Egypt. Of these, the *Targi* alone retain their place and celebrity of name. The names of the other four have all become obscured or lost by subdivision or dispersion. It has been supposed of late years that the Tibboos in the Eastern Sahara are not of the Berber race as, though not negroes in feature they are quite black, and speak a language totally different from that of their western neighbors. But the Berber traditions collected in Algeria, represent them as members of the *Lempia* family, and as Dr. Barth also says, that the people of Ahir N. of Agades, call the Tibboos, *Berkus*, we may consider the question of their descent doubtful. For the *Berkus* are one of the two main branches of the Berber family. The fact then seems to be that on the borders of Wady and Darfur the people of the desert have mixed with their southern neighbors, till this mixture has affected their complexion and language. But the flexibility in respect of the latter may be ascribed in a great measure to their position as carriers and agents between the interior and the coast. Their change of language is not more remarkable than that of the people of Agades (*Targi* or *Tawink* by descent), who now speak the Songay or Klamir language, but it is to say the language of *Nigroland* introduced by the great river S. of Timbuctoo, and which was probably carried eastward from Kaghia by commerce alone, though certainly in the 14th century Agades was subject for a short time to the empire of Mali.

Tawink.—The *Targi*, or as they are called by the Arabs, the *Tawink*, or *Towarik*, form the most characteristic portion of the population of the desert. Their chief tribe, the *Asgar*, are said to have come originally from Arabia, but they have been settled for centuries in the Sahara between Ghât and Tawt. The *Schamren* and the *Imrit* or *Murshik* both tribes of the same family the latter very ancient but impoverished, extend further S. and W. and perhaps occupy still the same territory as in the 11th century, when the *Murshik* (*Imrit*) adjoined Ghazal in the E. The *Targi* are a handsome, well featured, dark complexioned race, strict or even fanatical Mohammedans, and in mode of life resembling the Arabs. But they are singular in dressing it improper to let the mouth be seen. Hence, while they fold their ample tunic of white cotton over the head so as to form a hood, they tie a muffler also round the lower part of the face, which conceals all except the eyes. To the use of this muffler, called *el hana*, they owe their Arab designation of *Mohammedans*, or the veiled people. The *Berbers* Songay, who now hover over

Timbuctoo on the E., are generally reckoned as Tawarik but the name Anadimides (Adimides), given to them by the other tribes of the desert, seems to signify that they belong to the Lempsa. Further W. the Berber tribes, such as the Tamas, Braknas, and others, near the gum-forests, belong to the Sargha family, or are fragments of the great Mauritanian or Guelman tribes, the Magarawa, Lamptuna, &c. who sought refuge in the desert in former ages from the consequences of the Islamic wars in which they were perpetually engaged. But it must be observed that the Arab tribes throughout the Sahara, are nearly as numerous as those of Libyan origin nor can the two races be always readily distinguished, for in general the Berber dialects are confined to the towns and oases and the nomadic or desert tribes speak Arabic. The Targha have an ancient written alphabet which they call Taisnek (Phoenician?) and boast of a few inscriptions. But these monuments of a civilisation now wholly extinct lie chiefly within the limits of the ancient Carthaginian and Roman provinces, and belong to the Tunisian territory rather than to the Sahara.

Character.—The tribes of the desert are collectively camel breeders, slave and dealer, guides and robbers. A few on the borders of the Sahara possess alleys producing dates, but in general they subsist on the milk of their herds, obtaining grain or fruits by barter from the Sahel or maritime district in the N. or from Negroland in the S. The towns, such as Timbuctoo, Agades, Twa, Ghât, &c. formed on the margin of the desert by the course of trade are generally remarkable for licentiousness as well as rapacity. They resemble resorts frequented by pirates. There, man stealing is the most natural industry, slaves the chief wealth. None are so elevated by thought or fortune, as to take account of human misery. Perhaps the Sahra is fully as remarkable from the moral as from the physical point of view and may be regarded as the arid buttress on which rests the barbarism of Africa. In the middle ages, with the intervention of the Arabs, a great trade was carried on across the desert, chiefly in gold-dust and Guinea pepper besides slaves, ivory &c. But it is inconceivable that such a commerce should ever revive. As the waters of Guinea become more perfectly explored, its commerce will necessarily be diverted more completely from the desert.

There is no reason to believe that the routes across the desert to Negroland were beaten or frequented anterior to the arrival of the Arabs in the N. In the later Roman histories, there is not the least hint of a gold or pepper trade, or of any established commerce between Mauritania and the S. The names which Strabo's map of Libya, S. of the river Niger (an hypothetical river representing collectively the Wadis from Twa to the Bileda / Jardi) are obviously all of Berber form, and probably belonged in reality only to the N. portion of the desert.—(*Proceedings of the African Association*, *Travels of Hornemann* Lyon, Dehman, &c. *Kiley French of the Brag Commerce* *Caillé's Travels to Timbuctoo* *Cooley's Negroland and the Arabs*, *Carsten*, *Le Sahara Algérien* *Barth and Overweg's Journey*, in *Jour. Roy. Geo. Soc.* 1852.)

SAHARUPOOR, or GHANARUPOOR, a dist. and in Hindostan, formerly included in the upper provs of the presid. Bengal (or Agra) now in the new presid. Lahore lat. 29° 30' to 30° 30' N., lon 77° to 78° 30' E. bounded N and W by the protected Sikh territory E. and S. the dists. Moradabad and Meerut. Area, 2165 sq. in. Its surface is level to the very base of the hills, which here rise abruptly on the N. frontier. The Jumna forms the boundary on the W. and the Ganges crosses its E. part, bordering which river is an extensive tract lower than the rest, and covered with tall grass. The plain of Saharpoor about 1000 ft. above the sea, has for half of the year a tropical, and during the rest an European climate and vegetation. The thermometer at the capital sometimes descends below the freezing point, but snow never falls there.—(*Madras Jour.* *Jaquesmont*). Four-fifths of the soil are cultivated or capable of culture considerable quantities of sugar and wheat, with opium, indigo, and tobacco are raised, and this was formerly one of the most flourishing parts of the Mogul empire but for a century anterior to 1803, when it became a British possession, it had suffered almost incessantly from invasions and depredations of the neighbouring Sikhs. Tibeti-Khan's

canal, which extends from the base of the hills to Delhi, intersects the W. half of this district. Principal towns—Saharpoor, thecap. Haridwar Ambala, and Deoband. P. 537,368

—The rivers in lat. 29° 57' N.; lon 77° 32' E. 30 m. in E. by E. Delhi, is according to Jaquesmont, one of the best sunset stations in British India. It is unobscured by walls, but has a large quadrangular fort, with a double ditch, and ramparts faced with brick masonry the town contains many brick residences, and is increasing by the addition of houses in the European style. Its environs are level and watered by an affluent of the Jumna and in the vicinity is a botanic garden intended for plants which will not thrive at that of Calcutta. Pop 8000 to 10,000.—(*Jaquesmont*, *Voyage dans l'Inde*, vol. III. p. 1, Col. *Sylvan in Jour. Stat. Soc.* vol. x p. 250, *Trigon. Survey of India*.)

SAI-GUN or SAY-GON a city and river-port. Anam, cap. prov. Chienape of which and of Cambodia it is the chief tradingemporium, on the river Sai-gun, 85 m. from its mouth in the China Sea, lat. 10° 47' N., lon. 106° 45' E. It consists of two distinct towns about 2 m. apart, connected by a navigable stream and a good road lined with straggling Malay houses. Sai-gun proper the commercial town, stands on a point formed by the confluence of two branches of the Demosa river. Eng-hi is on the W. bank of the Sai-gun river opposite the anchorage for large ships, and contains the citadel and residences of the Chinese merchants. Both towns extend 4 m. to 5 m. along the river. The streets are regular wide, and mostly lined with wooden or bamboo houses of one story thatched with palm leaves or rice-straw, some few are of brick, tiled, and with overhanging chambers ascended by ladders on the outside and many are built within courts or gardens. The citadel, begun on an European model by a French engineer in 1760, remains incomplete. It is a square fortress, with square, battical horn works, a glacis, saps, rade, and dry ditch. But it is at present incapable of regular defence. In the N. E. part of Sai-gun proper on a deep creek are the naval yard and arsenal the largest in the empire, and where many large junks and war boats are annually constructed. In the W. part of the city are two large Chinese pagodas, besides which Sai-gun has a royal palace built of brick and several extensive rice-magazines. It communicates with the Cambodia river by a canal about 25 m. long 70 ft. wide, and 12 ft. deep, and has an active trade with China, Siam, and Singapore, and is generally in junks navigated by Chinese. The principal articles exported for sale are Chinese pottery and iron goods, silks paper tea &c. with glass-bottles and broad-clothes, but scarcely any other European articles. Owing to the extortion practised by the Chinese and native traders and the faithlessness and rapacity of the government, both the Japanese and Portuguese of Macao have relinquished all connection with Sai-gun. Rice is a royal monopoly, and its exportation is prohibited under capital penalty. The markets are well supplied with poultry, hogs, oxen &c. together with dogs, deer and slaughter for native consumption. Rice, areca palms, and many intertropical fruit-plants grow in abundance around Sai-gun, being chiefly cultivated by women, and the variety as well as excellence of the fish in the river can hardly be surpassed. Pop, perhaps 120,000, of whom 10,000 are Chinese.—(*Crawford's Siam and Cochin-China*, vol. I. p. 219-488 *Tomlinson's Mission* *White's Voyages to Cochin-China*, *Jour. Ind. Archipel.* vol. II.)

SAI-SERK or SAY-SERK, a mountain chain on the frontier of Sibiria and the Chinese empire. It branches off near at right angles from the Altai or Taigun Mountains, stretches first N. and then N. E. till it becomes linked with the ranges which proceed without interruption to Lake Baikal having a total length of above 800 m. All the rivers which descend from its N. slope belong to the basin of the Yenisei.

SAIDA or SAYIA a Saxony, circle and 26 m. from Dresden, in a bleak district, between the Freiburg Mide and the Elbe. It has an hospital, a chapel and manufactures of shoes and lace a brewery, some trade, and copper-mines. Pop. 1165.

SAIHUR a town and strong fortress Hindostan prov. Agra, 68 m. from Jajpore. The town contains some good houses as surrounded by a strong mud-wall and wet ditch, and covered on one side by a pool or shallow lake. The fort is of masonry

and presents a lofty and striking group of castellated buildings, covering the entire ridge of an isolated white rock rising from the midst of an extensive plain.

SAILAUF (MIRVET, OMA, AND URTEN), three contiguous vils. *Bavaria, Lower Franconia, near Aschaffenburg* with a church, and several mills. Pop. 1038.

SALMA, a lake, Russia, in S. of Finland. It is very irregular in shape, and contains a great number of islands; greatest length, N to S, about 45 m.; greatest breadth about 23 m. It discharges itself by the *Wosna* into Lake Ladoga.

SALINGHIN-AN WETZAN, a vil. France, dep. Nord, 11 m. S.W. Lille. Pop. 1646.

SALINS, a vil. France, dep. Aisne, 24 m. N. Laon. Pop. 1293.

SALT ANAHE a m. and com. Belgium, prov. and 15 m. S.W. Antwerp, on the Scheldt, with a church, and two chapels. commercial house, a mineral spring, a boarding and a communal school, and considerable manufactures of linen, coarse woollens, and cotton stuffs also, breweries, tanneries, a salt refinery, soap work, rope walk, and bleachfield. Pop. 3066.

SALT ANKHOFF a m. France, dep. Gard 11 m. Y. L. Alais, r. bank Cose, in the midst of the mountains of the Cevennes; with a Calvinistic church, manufactures of silk hosiery, a blast furnace, a manufactory silk mills and a trade in silk, olives, chestnuts, and wine. Pop. 3210.

SALT ANKOFF, a vil. and com. Belgium, prov. W. Flanders, 2 m. N. *Brux*, with two breweries, a distillery two flour-mills and a trade in corn and flax. Pop. 1719.

SALT ANKOWA, a m. Lower Canada, on the Rivière du Nord, on Two Mountains, 3 m. from the Ottawa at Grenville, and 45 m. W. Montreal. It has a S. Catholic and three Protestant churches, and several schools. A large quantity of sawed lumber is produced in this part of the country and there are several extensive sawing and great mills, a cloth factory carding and fulling mills, &c. P. 1250.

SALT ANKOWA, a vil. France, dep. Nord 10 m. from Cambrai. Pop. 274.

SALT AVOLDA a m. France, dep. Meuse, 10 m. W. Sarrebourg, on the Roelle. It is an ancient but well-built place, with some interesting remains: manufactures of molasses, and French blue, silk-works, dye-works, and tanneries. In the vicinity are an old Roman fort, and the ruins of a temple of Apollo. Pop. 2990.

SALT BERRY LE CHATEAU a m. France, dep. Loire 11 m. S. Montbrun on a height, in a wild and romantic district, and on a fine old Roman road. It is an ancient place, which was once fortified, and has a large and handsome Gothic church with two steeples; manufactures of lace and locks and a trade in pitch and timber for building barges. Pop. 2035.

SALT BRADDOCK, a group of 12 small is. on the Brandon Bank, Indian Ocean N. of the Mauritius lat. 16° 26' S. lon. 59° 35' E. They form five groups, 3 m. to 6 m. distant from each other and extend over an area 27 m. by 12 m. These islands have no permanent population, but are sometimes wholly submerged in great storms.

SALT CALAIS a m. France, dep. Sarthe, on the Amblie, in a hollow, surrounded by moors and forests, 25 m. E.S.E. Le Mans. It is tolerably well built, has a court of first resort, two fine promenades, a large square, a handsome Gothic church of some historical interest, a communal college; manufactures of linen, serge, and bombazine, and a trade in corn, clover-seed, wine, wool, poultry, and cattle. P. 5021.

SALT CANTERBURY, a flourishing m. Canada West, on Lincoln, finely situated in a fertile district, 31 m. S. Toronto, on the Welland canal. It has a R. Catholic and six Protestant churches, a grammar and several other schools, a public library and reading-room, and a mechanics' institute, large manufactures of cloth, iron ware, leather, and pottery, several distilleries and breweries, and some of the finest flour grist, and saw mills in Canada, supplied with unlimited water power by the canal. Ship-building is likewise carried on to some extent. P. (1852), 4868 (Jan. 1854) about 5400.

SALT CLOUET, a vil. France, dep. Vaucluse, about 10 m. from Orange with silk-mills, and a trade in silk. Pop. 1611.

SALT DESAN, a vil. and com. Belgium, prov. Hainaut, 4 m. N.E. Muna. It has an extensive cotton-mill, established

in an ancient abbey of same name; manufactures of sherry; a flour-mill, and a trade in corn. William, Prince of Orange, afterwards king of England, treacherously attacked Marshal Luxembourg in the plains of St. Denis, after the peace of Nijmegen was signed, but gained no decisive advantage. P. 744.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, r. bank Lys, 5 m. S.W. Ghent, with a flour-mill and a trade in corn. Pop. 1464.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SALT DESAN-WETZAN, a vil. and com. Belgium, prov. F. Flanders, on an affluent of the Lys, 28 m. S. Bruges. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather; a bleachfield, brick work, and several mills. Pop. 5913.

SAINT-CECIL, a vil. and com. Belgium, prov. Luxembourg, on the Moselle 30 m. W. Arlon. It has manufactures of serge, and three saw-mills. Pop. 1584.

SAINT-CECIL, a vil. and com. Belgium, prov. W. Flanders, 5 m. N. Bruges, with two flour-mills and a trade in corn and cattle. Pop. 1684.

SAINT-CECIL, a vil. and com. France, dep. Savoie, prov. Tarentaise, 9 m. E.S.E. St. Maurice, in a valley of same name, on a small stream near its confluence with the Isère. It has a considerable trade in cattle and dairy produce, and there are valuable minerals in the vicinity. Pop. 1668.

SAINT-CECIL, a vil. France. See ALER.

SAINTES, or **SAINT-BENIGNE**, a vil. and com., prov. Brabant, 13 m. S.W. Brussels. It has a brewery, a hospital, and a trade in cattle and agricultural produce. P. 1993.

SAINTES (anc. *Santonis*), a tn. France, dep. Charente-Inférieure, on a slope above the Charente, here crossed by a bridge, on which a remarkable Roman triumphal arch stands 80 m. N.W. Le Rochelle. It is a place of great antiquity, and rose to much importance under the Romans, of whose magnificent edifices, an amphitheatre, baths, and the arch already mentioned, are most interesting remains. The modern edifices deserving of notice are the cathedral originally founded by Charlemagne, but since rebuilt the church of St. Eutrope, with an elegant belfry of the 15th century, the church of St. Marie des Dames, classed among the historical monuments of France, the library of 25 000 vols. the courthouses, and theatre. It has a court of sessions for the department, a court of first resort and commerce, an agricultural society, a society of sciences and art, and a communal college manufactures of lumbric earthworms, snails, and leather, and a trade in corn, wine, Cognac brandy, timber, and wool. It was the capital of the ancient province Saintonge. Pop. 7969.

SAINTES (THE) a group of rocky islands, French W. Indies, between Guadeloupe and Dominica, about lat. 16° 51' N. lon. 61° 44' W. They consist of lofty and steep peaks some of which are noted by flat ground and ridges of inferior elevation, others are entirely separated by the sea. The two largest are called Terre d'en Haut, and Terre d'en Bas, or the Upper and Lower Land the first is about 4 m. in circumference, and contains a town or village, which is situated on the W. side. The inhabitants are poor and live chiefly of fish and vegetables. Exports, cotton and coffee. P. (1849) 1811.

SAINTFIELD, a small tn. and par. Ireland, co. Down. The town, 11 m. N.W. Downpatrick has a large and elegant church and carries on a considerable trade in weaving linen cloths, corduroys, &c. Area of par. 19,334 ac. Pop. 5391.

SAINTONGE, an anc. prov. France now forming the greater part of depts. Charente and Charente-Inférieure. It was originally inhabited by the Santones, and under the Romans was included in Aquitania Secunda. On the decline of the Roman empire, it was seized by the Franks, and in 1120 fell into the possession of the English, with whom it continued till it was finally united to France by Charles VII. Its capital was Saintes.

SALA, a ruined city Egypt, near r. bank Rosetta branch of the Nile, 67 m. N.W. Cairo. It was a place of great importance during the reigns of the Saite kings, who ruled Egypt about 180 years, until the Persian invasion under Cambyses. Sala was the place where the fate of burning lamps was particularly celebrated, and to which strangers resorted from different parts of Egypt to assist in the ceremony.

SALADWALA, a considerable walled tn. Punjab, near r. bank Ravee, lat. 31° 5' N. lon. 73° 16' E. with a spacious and well-furnished bazaar, close to it on the W. is a mud fortress of considerable strength, surrounded by a trench.

SALIZON, a river France rises in the S. slope of the Pyrenees, dep. Basses-Pyrenees, flows N.W. past Marleux, below which it sometimes takes the name of Gave-de-Marleux, and after a course of about 45 m. joins r. bank Gave-de-Oleron.

SAJO, a river, Hungary rises in Mount Trench, near the source of the Gran, in N. of co. Glitch, flows very circuitously S. past Rozsnyo and Felsot, then S.E. and joins r. bank Bodva, a little below Onod, total course, about 90 m. chief affluents, the Tolva, Turcoa, Rima, and Bodva.

SAJTERY a vil. Hungary Thibor Thalm, co. Csanad, on the Szamos, 10 m. from Batsonya. It has a Greek church, several mills, and a trade in cattle. Pop. 4582.

SAL, a salt-lake, Russia, near W. shore, Crimea, gov. Taurida, 12 m. E.S.E. Eupatoria. It is about 8 m. long, by rather more than 1 m. broad, and is celebrated for the mud baths which have been established upon it.

SAKARIA, **SAKARYA**, or **SALA** (anc. *Asperus*, or *Sangarius*) a river Asiatic Turkey pushes Andolia, has its rise near Afium-Kara-Hissar whence it flows N.E. for about 50 m., when it takes a N.W. and subsequently a N. direction, and falls into the Black Sea 20 m. E. Cape Kurpa, after a course of about 350 m. in some parts very tortuous and much broken by falls and precipices. Its whole basin rests upon a sy.

SAKAYT, or **SEKERT** a large mining vil. Upper Egypt, about 25 m. from the Red Sea lat. 24° 35' N. lon. 34° 47' E. It consists of numerous miners huts and houses, with a temple excavated in the rock, and some Greek inscriptions.

SAKHFE SLUKAW, a large vil. Afghanistan, 88 m. W. Dera Ghasee Khan lat. 30° 5' N. lon. 70° 26' E. It gives name to a celebrated pass which commences 4 m. W. from it.

SAKKA a tn. Africa. See FENAKA.

SARKARA or **SARKARA**, a vil. Egypt near r. bank Nile 21 m. S.W. Cairo, celebrated for its pyramids the largest of which has its degrees or stores striped of their triangular exterior. It measures about 187 paces square, and is surrounded by what may be considered a sacred inclosure, about 1750 ft. by 950 ft. Besides this, the largest pyramid, there are nine or ten smaller. Amongst the most curious of objects here are the two mummy-pits.

SARKARA a river, Sibutu, rises in an E. branch of the Ural Mountains flows first S. and then W. in a direction nearly parallel to that of the Ural and joins the r. bank of that river about 10 m. below the town of Orsk. Total course, above 450 m. Its principal affluents are the Ik and Salmech both of which join on the right.

SARKOURA, an isl. Japan upper part of a large bay lat. Kusiu formed on the S.E. by Cape Teshinagoff, and on the N.W. by Peak Horner. It is very elevated, and contains a lofty mountain called Mitake lat. 31° 20' N. lon. 130° 42' E.

SALA, of Sax., the most N.E. of the Cape Verde Islands, about 22 m. N. Boavista, lat. 16° 45' N. lon. 23° 3' W. greatest length N to S, 20 m. central breadth, about 5 m. Like the rest of the group, it is of volcanic origin and has several conical summits one of which the peak of Mariz, rises nearly 1400 ft. above sea-level and is 80 m. off. In the S. are several tracts impregnated with salt, and on the E. a salt-lake and a hill composed chiefly of saline substances.

Turtle abound on the coast, which afford several good anchorage. Salt has been, but is no longer collected.

SALA, a river Peru rises on the S. slope of the Andes, near Curato de los Cerros, flows first E. then N.E. and near Huancabamba with the Jaura in forming the Mantaro after a course of above 180 m.

SALA, a river Russia, rises in W. of gov. Astrakhan, flows N.W. into gov. Don Cossacks, then W. across that government, and after a course of above 800 m. joins r. bank Don, about 20 m. E. of Novo-Felersk. Its principal affluents are the Gaidun and Irtash both on the right.

SALA, a vil. and com. duchy and 9 m. S.W. Fargus. It has an old castle in a ruinous state, a church, a primary school, and a trade in corn, wine, oil, salt, chestnuts, and other fruit. Near it is the beautiful palace of Caline de Bostch belonging to the duke. Pop. 3305.

SALA a tn. Sweden, lat. and 21 m. N. Westerås, on a plain, and traversed by a stream. It is well and regularly built, and has the largest and most productive silver-mines in Sweden. There is here a shot-factory but instead of a tower from which to pour down the molten metal, an old mine-shaft is used. In the vicinity is the old castle of Biskop, which was the occasional residence both of Gustave I. and II. At a short distance are the mineral springs of Skita. Pop. 1600.

SALA -1, (Lz), A tn. Naples, prov. Principato-Ultra, on a rocky eminence, 20 m. E.S.W. Potenza. It is well built, and contains the palace of the Bishop of Oppidone, 4 handsome edifices, five churches, and a Capuchin convent. -3,

(-Beilash, A vi and com. Lombardy, div Turia, prov Blilia. It was founded by an ancient castle, of which only a single tower remains; and has a church, and near it an old Benedictine abbey in ruins. Pop. 1638. — 3 (4th div). A m. Naples, prov Principato-Citra, 3 m N W of Valle on a lofty hill. It sometimes takes the name of Salsola, P. 1250.

SALADO-DE-TARIFA, a small river Sagra, prov Cadiz, celebrated for the great battle fought on its banks, in 1340 in which the Moors under Abu'l Thau were again defeated.

SALADO (Rio) two rivers, La Plata — 1 Rises in the Andes, prov Salta W from the Cordillera de los Valles about lat. 24° 20' S, whence it flows, under the name of the Avenida, S E. to lat. 25° 40' S when it turns N E, and now assumes the name of Salado, till it reaches lat. 24° 42' S, when it takes a S S E. course, and after a run of upwards of 600 m. falls into the Paraná at Santa-Espiritu, lat. 25° 30' S, its entire course being about 850 m. In the mountain region the waters of this river are fresh but in the flat saline country through which they afterwards run, they unalike a brackish taste from which the river takes its name of Salado or Salt River. In its course the Salado passes through the provinces of Salta, Tucumán, Santiago and Santa-Fé. By means of the stream natural vessels bring down the hides and tallow of Tucumán — 2 From Salta, Ayra rises about lat. 34° 23' S. lon 68° W shows S E through the pampas, and falls into the estuary of the Plata, 100 m S S E. Buenos Ayres, after a course of about 400 m. Although impregnated with salt in the early part of its course only it maintains its brackish taste throughout.

SALAHYAH a ruined in Asiatic Turkey on the Tophratus about lat. 31° 30' N. lon. 40° 30' E. The walls a noble gateway and an extensive castle are all that remain but these relics are imposing from their massiveness and simplicity.

SALAVIA a in Central America, Guatemala — W Yucatan, in a mountainous district, on the Babinal, 55 m N of Yucatan. Most of the inhabitants are Indians P. 4,000.

SALAMANCA, a in Yucatan. See BUCAR.

SALAMANCA a small in Mexico dep. Guanajuato, on a gently rising plain 70 ft above sea-level, 150 m N W Mexico. It is a neat and pretty looking town and has considerable manufactures of woollen cloaks and cotton shawls. Pop. about 10,000.

SALAMANCA a prov Spain Leon, bounded N by prov Zamora, E Valladolid and Cáceres, and W Portugal area 7455 sq m. It is watered by the Douro, the Tormes, the Alagón, and various other smaller streams. A great portion of its consists of mountains, on some of which there is perpetual snow and above three fourths of the whole surface of the province are covered with forests especially of oak, ash, poplar and elm. There are thermal waters in various localities, and mines of iron, copper, lead, rock-crystal and sulphate but many of them are abandoned. Pure gold is also found in the sands of the Alagón. There are likewise extensive pastures grazed by sheep, goats, horses, and cattle, wild and tame while the rivers are abundantly supplied with salmon. Grain and seeds of every kind, especially of wine, honey and almonds are plants fully grown. The Salamancans are grave, honourable, and courteous and the costume both male and female, is elegant and picturesque. Education has of late made some advances, but still much remains to be done. There is considerable contraband traffic carried on, from the proximity of the province to Portugal and crimes are somewhat more numerous than might be expected from the general character of the people, and their peaceful agricultural pursuits. Pop. 240,000.

SALAMANCA (see Salamanca), French Salamanque, a city Spain, Leon, cap. above prov 120 m N W Madrid, on three hills, in the middle of a kind of a horse-shoe, formed by the river Tormes, which is here spanned by a fine Roman bridge of 17 arches, 500 paces in length and 12 paces in breadth, said to have been rebuilt by Trajan. The houses are, with few ex-

ceptions, old-fashioned but generally commodious and well protected from the cold, which is here felt with great keenness. The great square, the largest in Spain, is surrounded with colonnades, under which are shops, the post-office, and the town-hall, and in another square near it is the glorious aqueduct vegetable-market. Among the numerous edifices which adorn Salamanca, and which have procured for it in Spain the appellation of Little Rome, are the cathedral, a splendid example of the Social Gothic, begun m 1512 with beautifully carved portal, and three aisles, the roof studded with gilded roses, and supported by graceful shafts with small capitals painted in blue and gold the old cathedral, erected in 1102 a simple and many structure, in the Norman-French style, but low damp and neglected the college of St. Bartholomew or Old College, founded in 1410, but renovated in 1760, a classical edifice, with a grandiose Ionic portico, the college of the Jesuits, that of the military orders of Calatrava, with a noble facade King's College, with a serious and ample Doric quadrangle, partially restored from the ruinous state in which it was left by the French, and now converted into infantry barracks, the College of the Archbishop, founded in 1522 by Alonso de Fonseca, Archbishop of Toledo, and on which Pedro de Ibarra, Alonso de Covarrubias, and Berenguer, the three great artists architects of their age, were simultaneously employed it is a classical and sumptuous fabric with a magnificent facade the principal corner is particularly noteworthy for its double gallery of light, airy, fluted columns, and the elegance and delicacy which reign throughout. It has a beautiful chapel, with sculptures on the high altar by Michel Angelo and Berruguete. It is in good preservation and is now occupied chiefly by the Irish students, and a military hospital. Of the numerous conventional establishments the most remarkable is that of St. Domingo a sumptuous building, combining various styles of architecture with a chapel entirely in the modern Gothic style. The university of Salamanca is one of the oldest and most celebrated in Europe. It was founded about the close of the 12th century and a century later was resorted to from all quarters, the number of students amounting at one time to 16,000 and its fame continued to increase till the 16th century after which it began to decline, and now its courts are almost deserted. The university consists of two colleges, called greater and lesser schools, begun in 1416 and finished in 1433 for up to that time the schools were kept in the old cathedral cloisters the cloisters of both are fine, those of the latter having graceful arches and elaborate mouldings, and those of the former being remarkable for classic and elegant simplicity. Philosophy general literature, chemistry, physics, political economy jurisprudence natural history Greek and Latin, &c., are taught in the university. There are besides 24 parish churches few of them possessing any

PALACE OF THE COURT OF MONARCHS SALAMANCA.
From the public collection of the Monarchs.

architectural beauty; numerous primary schools, a normal school, and a school of design a theatre, a bull-arena, capable of accommodating 8000 persons an asylum for the poor, a

founding hospital, an hospital for the sick, and several other charitable institutions; various barnyards and oratories, several fountains, neither remarkable for beauty nor well supplied with water. Many of the private houses and palaces are also remarkable, either for their size and magnificence or for their elegance; those most distinguished are the palace of the Marquis of Vidossquez, and the Courts Garra-gorda, Maldonado, Pacheco, and Menchero. Salamaca possesses manufactures of leather, ordinary cloths, and excellent blankets; four manufactures of coarses have several of coarses earthenware and four flour mills and a trade in wheat barley, vetches, and dressed leather. Salamaca was a large and ancient city of the Yvetones. In 323 a.c. it was taken by Hannibal. Under the Romans it became the ninth military station on the road from Menda to Saragosa, and was under the Goths a favoured city. It was ravaged by the Moors, and finally reconquered in 1065. In 1484-5 Columbus was lodged in the Dominican convent, the monks having espoused his scheme of discovery after it had been condemned by the university. In 1548 Philip II was married here to Mary of Portugal. The elegant and pathetic lyric poet, Louis de Leon, is buried in the Agostine Calzados, and among the more recent ornaments of the university were Melendez and Quintana. A famous battle was fought in this neighbourhood in 1811 July 22 between the French army under Massena, and the English and Portuguese, commanded by the Duke of Wellington, when the latter obtained a complete victory. Pop. 15,736.

SALAMIN or **KOLUMA**, an island Greece in the N of the Saronic Gulf, about 10 m. E. Athens. It is of very irregular shape, nearly 10 m. either way N to S. and E to W and by its opposite extremities, which are separated from the mainland by narrow winding channels, closes in the beautiful Bay of Eleusis, so as to give it the appearance of a lake. It has a rocky surface with a thin but not unproductive soil and in some parts is well adapted for the olive. Its other principal product is honey, but the vine thrives well and might with care produce excellent wine. The old city of Salamis stood on the S. coast, facing the island of Egina, and the celebrated battle, a.c. 480, in which the vast and invincible Persian was signally defeated by a much smaller Grecian fleet, was fought chiefly in the narrow E. strait.

SALANDRA, a N. Naples, prov. Basilicata 21 m. S W Matera, near the source of the Salandrella, a small stream 45 m. long, which falls into the Gulf of Taranto. It contains a church, five chapels, and a Franciscan convent and has manufactures of linen and cotton from raw materials grown within the district. Pop. 1400.

SALANGORE, a N. and maritime state Malay peninsula, W coast. The town is situated a short distance up a river about lat. 3° 30' N. lon. 101° 30' E. It has a fort, constructed of mud and brick work, on which are a number of guns, some of large calibre in bad repair. The river is shallow, and practicable only for vessels of little burden. Artificial obstructions have been made by the inhabitants. The Dutch had formerly an establishment here for the monopoly of tin. The river or strait lies along the W coast of the Malay peninsula, between lat. 3° 50' N. and the shipping river, about lat. 3° 40' N. 130 m., and about 45 m. broad, or interiorly. It produces fish of excellent quality—dammer-wood, oil, and resins. The population, less than it once was, is supposed not to exceed 15,000. It is principally composed of the descendants of a colony of Bugis, from Goeck, in the Celebes, who settled here towards the commencement of the last century.

SALANKEMENT, or **SLANKAMENT** (Stank), a Hungary, co. Syrmia, generalship Peterwardein, near the confluence of the Theiss with the Danube, about 6 m. from Fodok. It was once strongly fortified, and has a B. Catholic and two Greek churches. In 1691, Louis of Baden here defeated the Turks, of whom 25,000 were slain.

SALAE, a N. Spain, Andalucia, prov. and 37 m. W S. Granada, E. slope of Sierra de Alhama. It contains a church and two old castles, one of them used as a prison and another as a courthouse, and has oil and flour mills, and a trade in wheat, charcoal and spar. Pop. 1839.

SALABA a vil. kindg. of Italy, gov. Yenne, prov. Foll. some on the Po, 18 m. S. S. W. Rovigo. It has a B. Catholic church. Pop. 1400.

SALARINGE a vil. and com. Belgium, prov. H. Flandres, 21 m. S. Ghent; with manufactures of linen two flour-mills and a trade in agricultural produce. Pop. 1636.

SALARER, a N. Spain, Andalucia, prov. and 25 m. E. H. E. Maseja. It has a regularly-formed square, a church and a primary school and a trade in resins and wines. P. 1025.

SALAS-GOMEZ a small isl. S. Pacific Ocean lat. 26° 37' 48' S. lon. 105° 20' W., somewhat less than 1 m. long, and 1 m. wide a good place for the sea-fowl, apparently of volcanic origin.

SALAT, a river, France, which descends from the S. slope of the Pyrenees, dep. Arizgo, flows very turbidly N N W passing St. Giron, and after a course of nearly 60 m. of which 20 m. are navigable with the current, joins R. bank Garonne, in dep. Haute-Garonne. Its chief affluents are the Aeth which joins it on the right, and the Lizard or Laxenne, on the left.

SALAWATTY a considerable isl. Indian Archipelago, off N W extremity of Papua, from which it is separated by a narrow strait, lat. (W point) 9° 56' S. lon. 130° 55' E. (a). It is about 80 m. long by 25 m. broad. The shore is mostly steep, and except in a few places is also bold to approach. The island produces great quantities of sugar of excellent quality.

SALAYER, or **SALAYAN** a group of isl. Indian Archipelago, off S. coast, Isl. Celebes, forming part of the Dutch province of Macassar. It consists of the islands of Salayer or Salsayer, Kalama, Bousetta, Hog Island, and the Boegerana. Salayer Island about 30 m. long, N to S. by 8 m. broad lat. (N point) 5° 47' S. lon. 120° 23' E. (a). It is separated from Celebes by the Strait of Salayer 13 m. broad and interspersed with several islands. It is mountainous and woody but thickly peopled and well cultivated. The principal produce is millet which is the chief subsistence of the natives. Cotton also is raised from which coarse blue and white striped cloths are manufactured. The houses of the natives are good. Pop. 60,000.

SALAZA a vil. com. Italy Piedmont, dep. Turin prov. and 12 m. S. W. Ivrea r. bank Orso. It is an ancient place and was once surrounded by walls and defended by a strong castle, of which only a tower, now used as a belfry, still exists. It has a church, a confraternity three oratories, and an elementary school. 1 op. 1183.

SALCITO a N. Naples, prov. Salerno, 15 m. N W Campobasso near r. bank Trigno, with three churches eight chapels and an hospital. 1 op. 2700.

SALCOMBE a vil. and chapelry England, co. Devon 5 m. S. Kingsbridge, W side, entrance to Kingsbridge harbour. It has several handsome villas and marine residences in its vicinity. It is in general well built and contains an Episcopal chapel and places of worship for the Baptists and Wesleyans. About 60 vessels belonging to the place are employed principally in the fruit and coasting trades, and ship-building is carried on to some extent. Near it are the remains of an ancient castle. Pop. 1656.

SALCOMBE-REAR, par. Eng. Devon, 2806 ac. P. 476.

SALCOTT par. Eng. Essex, 255 ac. P. 39.

SALDAÑA, a N. Spain, Leon prov. and 85 m. N Palencia, in a beautiful plain watered by the Carrion, here crossed by a stone bridge of 23 arches, in a somewhat dilapidated state. It has three churches a good townhouse, primary school hospital and the ruins of an old castle, crowning a steep height manufactures of linen leather and earthenware, and several oil and flour mills. Pop. 920.

SALDANHA BAY, B. Africa, Cape Colony about 70 m. N W Cape Town, lat. 36° 1' 42' S., lon. 17° 54' E. (a). one of the best and most commodious harbours in the world. It extends about 85 m. S. W. to S. E., with a comparatively narrow entrance, not quite 5 m. wide. It affords, at all seasons, very excellent shelter and anchorage.

SALDE a vil. Sonogambila, Fouta l. bank Senegal lat. 16° 21' N., lon. 18° 37' W. Here ships bound for Galam stop to pay their customs-duties to the Almamy of Fouta. Here also is a mudbank which ships cannot pass in the dry season without discharging their cargoes.

SALDINSK (NAMES AND VERKHOI) two vils. Russia, gov. and 220 m. S. N. E. Perm, on the Balda, an affluent of the Tura. They have two blast, and a great number of saw-mill furnaces.

SALEP—1 A to Italy Piedmont, div Alessandria, prov and 10 m N W Torino, in a plain, consisting of a rich alluvium left by the Po, which originally had its channel in it. It was once surrounded by fortifications, of which no traces now remain, is the seat of a court of justice and has three churches, two schools and an hospital. Pop. 5684.—2, A vil and com Piedmont, div Coni, prov Mondovì in the valley traversed by the Salisette. It has a church and a charitable endowment. Pop. 1314.—3, A vil and com. Ital Venetia, prov and 15 m N W Brussa, on a height above the E. shore of Lake Iseo with several churches, and manufactures of woollen cloaks, which form an important article of trade. Pop. 1744.

SALE-CASTELLERVA a vil and com. Italy Piedmont, div Turin, prov Ivrea, a little N. Castellanova, in a mountainous district, on a tributary of the Orco. It is a mere vil lage with a church. Pop. 2178.

SALEBY par Eng Lancashire, 1770 ac. Pop. 248.
SALES, **SALLES**, or **SALA** a seaport to Marocco, W coast, at the mouth and on r bank El Regreb lat. 34° 3' N, lon 6° 50' W. It is encompassed by a wall 85 ft high, strengthened and flanked by towers at regular distances, but is nevertheless weak, and could offer little resistance to a regular attack. At the S.W. angle of the town there is a battery mounting 18 heavy guns, which commands the N passage over the bar of the river. The fortifications towards the sea are of a recent date, and kept in tolerable order: the guns are of large calibre, but the batteries are badly situated. The water is deep close to the shore and a frigate might approach within a cable's-length of the batteries. The export trade consists principally in wool. There is here a manufactory of carpets, the colours of which are beautiful and the texture excellent: but, being made for home consumption, they are generally too long in proportion to their width. The practical propensities of the people of Sales, which rendered them at one time so notable, seem now to have entirely departed from them: no such lavished pretensions being now attempted. Opposite Sales on the l. bank of the river is the town of Hest (which see). In November 1851 both Sales and Hest were bombarded and nearly destroyed by the French. Pop. (Sales) about 10 000.

SALEHUNST par Eng. Sussex 3750 ac. Pop. 950.
SALEM several places, U States.—1 A seaport to Massachusetts, on a peninsula nearly surrounded by water and on the Boston and Salem railway and several other branch-lines, commencing at with Marblehead on the S, Cape Ann on the E. and Lawrence and Lowell on the N W, about 14 m N E Boston. Its site though low is pleasant and healthy being formed by two inlets of the sea, the one of which, called the North River is connected with Beverly by a bridge nearly 1500 ft long while the other called the South River is the harbour. Not having been laid out according to any preconceived plan, it has assumed a very irregular shape and consists, for the most part of angular and winding streets, lined with houses built partly of brick and stone, but chiefly of wood. Many elegant houses have been erected in the vicinity of the Common, an inclosure of above 8 ac in the E. part of the town tastefully laid out in gravel walks bordered with lofty trees. Among the public edifices are about 50 churches, several of them possessed of much architectural merit, and one, called the North church, distinguished by its beautiful Gothic front, the city-hall with a fine front of granite the courthouse a new and beautiful structure finely situated the custom-house, market-house, almshouse hospital, the atheneum, occupying a spacious hall, and possessed of a library of 11 000 vols., the Essex institute, designed to promote the study both of natural and civil history; the aqueduct, by which an ample supply of soft and spring water is furnished, and the museum belonging to the Essex India Marine Society. The manufactures, though not enjoying the benefits of water-power, are of considerable extent, and include a large steam cotton, two saw and two flour mills several distilleries and rope-walks, and numerous tanneries. The trade is still more important, and employs above 100 vessels in foreign commerce, besides a number in the whole-fishery. The East India trade, in which Salem had at one time a decided lead, has been unable to withstand the competition of Boston and New York, though many vessels which deliver their cargoes at these ports are still owned

by its citizens. In 1851 the number of vessels which cleared from the port for foreign countries was 508, tonnage, 45,989.

Salem was first settled in 1680, and is next to Plymouth the oldest town in New England. In 1652, strange delusions with regard to witchcraft having become prevalent, so few as 19 persons were condemned and hanged as witches at a spot which still bears the name of Gallows Hill. During the Revolutionary war, Salem distinguished itself by its naval prowess, and fitted out about 60 armed privateers, manned by 4000 men. Pop. (1850) 18,582.—2, A vil and township, New Jersey 37 m W S W Trenton, E. side, Salem Creek with a courthouse, jail, eight churches, an academy and some shipping trade. Pop. 3003.—3, A vil and township, New York, 44 m N E Albany. It contains Washington Academy, has some manufactures and several mills, and is noted for its wool-market. Pop. 9304.

SALEM a dist and tn. Hindoostan presid. Madras. The dist lat. 11 to 18 N, lon 77° 40' to 79° E, is bounded W. and S.W. by the Cavery river, separating it from Coimbatore, N Mysore and the dist. N Arcot, E. and S. by S Arcot and Trichinopoly length N to S, 130 m breadth, from 60 m to 100 m. Area, 8200 sq. m. It consists partly of a tract below the Ghats, but chiefly of the Barren plain above them: a fine tableland rising in many parts to between 5000 ft and 6000 ft above the sea, well cultivated and producing great quantities of tank, sugar, and rice, and coffee, tobacco &c. About one-third of the surface is cultivated and three-fourths are under the ryotwari settlement (see INDIA BARREN) the remainder being in small communities. Half of the population is estimated to be employed in agriculture. Cotton of various species, indigo, tobacco, coffee, maize, and rice, are raised: iron-ore is very abundant and rich and some of it magnetic, native carbonate of magnesia is met with: cotton cloths are, or lately were, made for export to the W. Indies and America; iron and steel are manufactured; the chief exports are cloth, iron, grain, fruit and oil seeds, imports are sugar, pepper and silk. Pop. 946,181.—**SALEM** the cap. and only city of importance, is in the S. part, E. bank of the Teyrnary 70 m N N W Trichinopoly, and 1070 ft above the sea lat. 11° 29' N, lon 78° 32' E. It consists of two wide and many narrow streets, with numerous houses built of brick and tiled; and it is on the whole clean and improving, but not salubrious, from being seated in a narrow valley, and subject to great daily ranges of temperature. Many of the inhabitants are silk and cotton weavers, and these are the most healthy. Pop. 19 000.—(Madras Adm. Rep. on Statistics of Madras Presid. S. Division.)

SALMBRIA, or **SALMBRIA** (anc. *Samus*) a river, Turkey in Europe, which rises near Mount Pontus, on the frontiers of Macedonia, Albania, and Thessaly flows S.E. past Kalabaki, E N E. to Larissa, then N N E, and falls into the Gulf of Salomon at Karli, after a course of about 110 m. Its principal affluents are the Farni Salanga and the Saranta I orca. It is navigable for about 50 m, and is remarkable for the impurity of its waters.

SALEMI (anc. *Halym*), a tn. Sloly prov and 21 m S E Trapezus. It is in the line, and is fortified, and contains a great number of churches and convents, but is on the whole a miserable poor place, with no kind of industrial establishments. Pop. 8004.

SALINGH a vil and com. Italy, Piedmont, div Turin, prov and 2 m E Pinacolo. It was walled, and is still entered by two castellated gates from one of which the belty rises, and has two churches, a communal, and a free school an hospital and a charitable endowment. P. 9961.

SALERANO, a vil and com. Italy, Lombardy, gov. Milan, prov and 5 m W Lod, r bank Lambro with a church; an oil-mill, and some trade in cheese. Pop. 1008.

SALERNE, a tn. France, dep. Var, in a fertile district, l. bank Gironde, 18 m N W Draguignan; with quantities of coarse woollens and sail-cloth; and a trade in wine, figs, olive-oil, silk, cattle, &c. Near it are the ruins of an ancient fortress built by the Saracens. Pop. 1727.

SALLENO (anc. *Poluntinus Anus*), a gulf, W coast, Naples, formed by Campanella Point on the N W., which separates it from the Gulf of Naples, and Fofo Lido on the S E. It is about 29 m across its entrance, and 24 m deep; receives the rivers Sella and Tundano, and has the towns of Salerno and Amalfi on its N shore.

SALERNO [see *Salerum*] a sz. and seaport. Naples, cap. prov. Principato-Città, at the N. extremity of the gulf of its name, 30 m. S.E. Naples, finely situated on the side and at the foot of a hill, crowned by the remains of an ancient citadel. It is inclosed by walls, and has a broad road extending along the shore, which forms an excellent promenade. The harbour is large, deep, and irregular and is fringed by a low, grassy looking town, very fertile in bulk. The principal edifices are the cathedral, erected by Robert Guiscard, a Gothic structure, adorned with a facade of 28 figures (Guzian, 1811), and possessing an ancient tomb, and to contain the ashes of the apostle Matthew the governor's palace, three churches, 17 churches, several convents, an extraordinary seminary, a theatre, a library, a museum, a hospital, a school, a shallow, and frequented wharf by fishing vessels, Naples having carried off its trade, which was at one time of some importance. Salerno is the see of an archbishop, and has a high criminal and a civil court, a secondary lyceum, and a university which had acquired great celebrity in the 11th century, but which has since fallen into decay, and has lost its reputation. The foundation of the town is attributed to the Romans. It became a place of great importance under the Romans, from whom it passed first to the Goths and afterwards to the Lombards who retained it in possession till the 11th century, when they were expelled by the Norman. Frederick II. It was ultimately annexed to the crown of Naples. *Pop.* 12,000. *Dist.* 12 m. *Neap.* 30 m. *sz. salernitan.* *Com.* 18800. *AS.* 2.

SALFORD a bor tn. and par Eng. See MANCHESTER.
SALGADO a tn. Brazil, par Minas Geraes about
 4 m from L bank São-Francisco, 870 m. N Ouro-Preto. It
 stands on a height, surrounded by marshy plains and has a
 church, Latin and primary school and a considerable trade
 in cotton, sugar, rum, and cattle 1 op. (dist.), 4000

SALGADO a river Brazil rises in S. of prov Ceara under the name of the Forcos, flows N. and descending from the slopes of a serra, after many windings, takes the name of Salgado, shortly after becomes navigable waters the surferous districts of São-Vicente-da-Lavras and Ico, and several miles below the town of Ico joins r. bank Jacaribá.

SALGHIR, a sluggish muddy river, Russia, rises in the **Elle Mountains**, in the S. of the **Caucasus**, gov. **Tavrisia**; flows N.N.W. past **Samurapoli**, then N.E. and, after a course of about 110 m., falls into the **Gulf of Sivach**, in the large lagoon separated by a narrow belt from the Sea of **Asof**. Its principal affluents are the **Buralitsha** and **Karzen**.

SALHIH or **SALAHIN**, a tn Lower Egypt about 60 m N E. Cairo and at some distance S. of Lake Menzalah. It is a place of some strength, and is regarded as the key of Egypt on the side of Syria. It has a large mosque. All around

it are seen wounds indicating the remains of ancient cities. One of these, Tel Defeneh, situated in a direct line between Salkiah and Paludam, the modern Tineh, marks the site of Daphne, identical with the Tahpanhes of the Bible, where the fall of Egypt is said to have taken place.

SALHOUSE, par Eng Northk. 2060 ac Pop 691
SALIAN, an [a] Transcaucasian Russia formed by the

two arms by which the Kur falls into the Caspian. On the N. side of it stands the town of Salan, cap. dist. of same name, and an important station for the sturgeon fishery.

SALIBABOO, or **TULOU** ISLANDS, a group of thirteen islands. Archipelago, between Mindanao and Gilolo. The S. end of the most easterly, Kabuang, is lat. 8° 47' N. Jan. 1877 1° E. Karabang, the largest and most N. island, is about 27 m. long and 6 m. or 7 m. broad. They are hilly and fertile, and yield rice, sweet potatoes, and coconuts; ginseng, pigs, and fish are plentiful, as is also water. The islands are partly under the sway of the Prince of Sangay. Though the natives of some of the islands are partially civilized, those of others of them are in a very low state, having no knowledge of a God, and living together like cattle. Feb. 11, 1900.

SALICETTO a vil. and com. Italy, Piedmont, div.
Com. prov. and 18 m. E N E. Mondovì, r bank Borromea

It is walled, entered by two gates is traversed by a spacious street, opened into by several minor streets, and has a church, and an ancient castle in good preservation. Pop. 1674.

SALIES, a m. France, dep. Basses-Pyrénées, 80 m. V N W Pau. It derives its name from a saline spring, from which the salt obtained is remarkably pure, and is said to have no small share in improving the hams of the department, so well known under the name of Hams of Bayonne. The trade in salt and salt provisions, horses and cattle. P 8673

SALIKI Bazar, a considerable one. Punjab, 1 bank Indus, on the great route to Cashmere by the Dab Pass lat 34° 6' N lon. 75° 55' E. It has a large and well-supplied bazaar and within 2 m. of it is the fort of Kriakun Ghar, one of the finest specimens of the square regular mud-fort in the Punjab.

SALINA, about 100 miles New York, E. extremity of Onondaga Lake, about 140 m W Albany, and 1½ m N Syracuse, which, though originally inferior, has so much outstripped Salina that it may now almost claim it as a suburb. It is celebrated for its salt-springs which both supply extensive salt-works on the spot and at Syracuse from which, in 1850, about 789 400 bushels of salt were made. Salina has also extensive flour-mills, for which water-power is obtained from the Onondaga canal, and an extensive furnace, machine-shop and other manufactures in which steam-power is employed. *Pop* 2142

SALINA, or **BAZILI** [anc. *Diagon*? one of the *Lipari* Isles off N coast, Sicily and 3 m W of *Lipari*, greatest length, E to W about 8 m., mean breadth about 4 m. It is of volcanic origin and mountainous the chief summits being *Mount Vergine* on the N and *Mount Salvatore* on the S. It is very fertile, and produces much oil, fruit, and wine. It is named from a lagoon on the S E coast from which a great deal of salt is made. Pop. 4000.

SALINE, par Sect. Five, 7 m. by 6 m. Pop. 1702

SALINEA, a maritime vil E coast Isl Cyprus, on the Gulf of Salina. It has a citadel, bazaar, and salt-works.

SALINE (Gaz. fr. par Eng. Electr., 1661 an. Pop. 836.
SALINE [see Saline], a tn. France, dep. Jura. In a

harrow gorge between two lofty hills, at the extremity of a fertile valley, 24 m NNE Lonsdale-Sumner. It owes its name to salt works carried on in a vast edifice about 300 yards long which stands in the midst of the valley. It is surrounded by high walls and derives its supplies from the sea through a long pier, the remains of ancient fortification. The whole town, with exception of the establishment already mentioned and the hospital, was destroyed by fire in 1825 and has been rebuilt chiefly by voluntary subscriptions obtained throughout the kingdom. The manufactures consist of salt and sulphate of soda, trestler and brandy. The principal exports are salt, sulphate of soda, trestler and oak timber and gypsum. The last is extensively quarried in the neighbourhood. *Fou. 6387*

SALIS, a river Russia, issues from a small lake, which rises near the centre of gov. Adonta, flows easterly to W., and after a course of about 100 m. falls into the Gulf of Riga, near the town of Salis or Sahsburg which contains a castle, and has a small harbour rendered almost inaccessible by sands which have silted it up.

SALISBURY, several places United States—1, A township, Connecticut, 41 m N W Hartford with several furnaces, furges manufacturers of guns, anchors, engines, scythes, wrought-iron &c Pop. 8103—2, A township, Massachusetts, 66 m N E Boston, on the Merrimack, at the junction of the Powow, with several churches, extensive woolen factories, manufactures of cottons, three tanneries, fulling-mills and plan-building Pop. 8100

SALISBURY or NEW SALHAM, an ancient city with an extensive park, 7½ mi. E. of Salisbury, Wiltshire, England, cap. co. Will. 80 to S.W. by W. London on the R.-Western railway in a pleasant and fertile valley at the junction of the Upper Avon with the unstreamed stretch of the Willey and Nadder. Its houses, all of brick, are far from being handsome, and are greatly wanting in uniformity. The city is lighted with gas, and abundantly supplied with water from the Avon by means of a fine aqueduct, which crosses the river by three artificial channels. As the seat of its public buildings stands the magnificent cathedral, begun in 1220 and completed in 1260, one of the finest and most important specimens of Gothic architecture in the kingdom. It is in the form of a double cross, with a highly enriched tower.

404 ft. in height, the interior is exquisitely beautiful from the loftiness of its elevation and the delicacy and lightness of its structure. There are three parish churches in the city all fine edifices, as is also the R. Catholic chapel, a structure of great beauty by Pugin. There are places of worship for Baptists, Wesleyans, Independents, and several meeting-houses for other bodies. In the centre of the city is the market-place, a large open area, in which markets are held twice a-week; on every alternate week, one of the largest cattle-markets in the world of England. At the S.E. corner of this area stands the council-house, a modern square building of white brick, with a handsome Doric portico. There are several ancient edifices in the city interesting from their antiquity and architectural merits, but now in a state of decay or altered to suit other purposes than the original. The principal schools are the chorister's, the city grammar and the bishop's school, in which last 40 boys and girls are clothed and educated at the expense of the see, a training school for governesses in connection with the church of England, the British and national schools, and various private establishments. The charitable institutions are numerous; they comprise an infirmary the Godolphin charity endowed for the maintenance and education of eight young orphan ladies seven hospitals, the college of matrons and various other endowed charities. Salisbury was at one time celebrated for its woollen manufactures, particularly hannels, but they are now extinct; the manufacturing industry of the city being at present limited to the making of saddles and other fine cutlery a rope, twine, and sock factory and to one or two establishments for hair-cloth weaving. Malt-making is extensively carried on and the trade in beer is considerable. Salisbury returns two members to Parliament. Pop. 11,557.

SALISBURY a [w] British N American, Hudson Strait lat. (E. point) 63° 27' N lon 76° 40' W (w.) about 30 m long N W and S E and about 10 m broad

SALISBURY PLAIN an extensive and elevated chalk tract, England, Wiltshire immediately W of the city of Salisbury extending about 20 m to N W and 14 m to S. Its general appearance at a distance entitles it to be called a plain, but on a closer inspection it is found to have a undulating surface, and to be intersected by numerous small valleys. It consists generally of a thin light soil covered with flints, and though not well adapted for agriculture, is for the most part covered with a fine green sward, forming excellent sheep-walks. The high price of grain during the late war tempted several of the proprietors to bring large portions of it under the plough, but the crops, barley, &c. at first, rapidly fall off as soon as the accumulated vegetable matter began to be exhausted, and the anticipated gain issued in a very serious loss, from the difficulty of re-forming the sward which had been destroyed. The most remarkable objects on Salisbury Plain are the Druidical remains of Stonehenge.

SALKEELD (Garrat) par Eng Cumberland, 3724 ac. Pop. 497

SALL, par Eng. Norfolk 1802 ac Pop. 252

SALLÉ, a tn. Naples, par Abruzzo-Citra, S.W. Cilici, on a low but salubrious site with four churches. A great many silk-worms are reared in the neighbourhood. P. 1100

SALLÉ (LA) a vil and com. kingd of Italy Piedmont, div and about 12 m W Aosta, 1 bank Dora-Baltea, here crossed by several wooden bridges. It has two churches a charitable endowment, and several primary schools. Many of the inhabitants emigrate to obtain the means of subsistence. Charrette, who distinguished himself as a leader of the Vendée during the revolution in France was a native of La Salle. Pop. 2273

SALLENCHÈRE, a tn France dep. Haute Savoie, prov Faucigny on a height above 1 bank Arve, about 12 m W N W Mont Rhône, and 30 m S.E. Geneva. It was almost entirely destroyed by fire in 1840 and has been again rebuilt. It is the son of a bishop; has a court of justice and a considerable trade in cattle, hides, butter and cheese. Pop. 2083.

SALLÓ (Nagy) a market to Hungary, Nithe Danube, on Hars, about 10 m from Léva with a church, and very important cattle-markets. Pop. 1618.

SALLM, an ancient principality Germany belonging to a noble family which in the 13th century divided into two

branches; the elder possessing Upper Salm, on the E. frontier of Lorraine; and the younger, Lower Salm, in Luxembourg, both on the left bank of the Rhine.

SALMERON a tn. Spain, New Castile, prov and 37 m. S.E.E. Guadalajara, on a height with a church, overhauled, and primary school, several oil and flour mills; and a trade in corn oil, and wool. Pop. 1158

SALMON, several rivers, U States 1.—1. River in state of New York, flows W through or. Oregon, south into Mexico Bay in Lake Ontario. It is navigable by boats for 14 m to the falls at Orwell, where a volume of water 250 ft. wide is precipitated over rocky precipices from a height of 107 ft.—2. Connecticut, falls into the river Connecticut at Haddam.—3. California, an affluent of the Klamath. It flows W., and gold is found throughout its whole course.

SALMONBY, par Eng. Lincoln 961 ac Pop. 110

SALMUNSTER, a tn. Hesse-Cassel prov and 37 m N.E. Hann., cirke Koblentz at the confluence of the Sals with the Kung. It is walled and has a church, the remains of a Capuchin monastery, manufactures of woollens and four mills. Pop. 1890.

SALO a tn and com. Italy, Lombardy, prov and 15 m N.E. Brescia, beautifully situated at the head of a bay on the N. shore of Lake Garda. It was once walled, and is still defended by an old castle, a wall built, has well-ordered streets and spacious squares, lined by handsome buildings is the seat of a court of justice and several public offices and has several churches, an ecclesiastical seminary a gymnasium an academy founded as early as 1534 a casino a theatre and several charitable endowments. The manufactures consist chiefly of thread and of distilled stomachic waters, which are held in much esteem, the trade is chiefly in lemons and other fruits. The surrounding district, covered with lemon and orange groves and a profusion of flowers, is one of the most beautiful in Lombardy. Pop. 4480

SALOBRENA [anc. Salombrina] a tn. Spain, Andalucia, prov and 89 m. S.E.E. Granada, on a rather high and steep rock. 2 m from the Mediterranean, r bank Guadalquivir, surrounded with remains of ancient walls. It contains a townhouse, prison two primary schools, and a large and strong fort in a ruinous state and has some traffic in cotton with Barcelona, and in potatoes, figs, and apart from the prov of Valencia and the ports of the west. Pop. (agricultural), 3044

SALOMAN or **SOLOMON ISLANDS**, a group, S. Pacific, having New Britain and Papua on the W, and Queen Charlotte's Islands on the E. Ymbel Island near the centre of the group, is in lat. 8° 34' S, and lon. 169° 58' 54" E. The Solomon Archipelago extends N W to S E. for about 600 m., and contains eight or ten principal, with numerous minor islands. Their structure is similar throughout, consisting of a mountain chain often very lofty stretching in the direction of the group, and forming a kind of central axis from which the sides slope gently, and finally merge in low shores, often furnished with a belt of mangroves touching the water. The soil judging from the vigour of the vegetation is of great fertility. The inhabitants are numerous, and apparently in a very savage state.

SALOME-BERKICH, par Eng Oxford, 679 ac. P. 162

SALON [anc. Salona], a tn. France dep. Bouches-du-Rhône, 20 m N W Aix in a fertile plain, on the canal of Crupin. It consists of the old and new towns. The former, situated near the centre, is nearly of a circular form, and was surrounded with ramparts, of which only some ruins remain. It contains some good houses, and a church built by the Templars in the 13th century but the streets are irregular. It is separated by a well-planned boulevard, adorned with fountains, from the new town, which is entirely of modern construction, and built with great regularity. The parish church contains the tomb of the celebrated astrologer, Nostradamus, who died here, and is said to have occupied an old castle, built upon a rock at the extremity of the town. The townhouse is a handsome edifice. The manufactures consist of olive-oil and soap and there are several silk and numerous flour mills and wax-refineries. The trade, which is important, is in oil, silk, almonds, wool, wax, cattle, &c. Pop. 4590.

SALONA, a ruined city, Dalmatia, about 8 m N N.E. Spalatro at the head of a gulf of same name, at the mouth of the Zadar, or Gladra, here crossed by a bridge. An insignificant modern village occupies a small portion of the S.E.

corner of the old city, the position and extent of which can still be traced by the remains of the wall though the houses and public buildings have been destroyed. It was first taken by the Romans, 117 B.C. immediately became the capital of Dalmatia, rose rapidly in importance, and was embolished by the emperors, particularly Diocletian with many splendid buildings, and furnished with a harbor and docks capable of containing and sheltering any number of vessels. The principal ruins are those of the theatre and the amphitheatre, the latter an elliptical structure, with six arches of its outer circle entire.

SALONA (anc. *Aspinum*), a town Greece, Laevia, in a fertile valley, at the foot of Mount Parnassus 35 m. E N E. Lepanto, on the Skios, which a few miles below falls into the Gulf of Salona. It is defended by a castle and has several well built churches, commodious baths, and manufactures of cotton goods, yellow morocco leather, and tobacco.

SALONICA (anc. *Thessalonica*, Turkish, *Salonica*, French, *Salonique*), a large seaport city, Turkey in Europe on gulf of the same name, 416 m. W S W Constantinople, lat. 40° 37' 47" N lon. 23° 58' E It has a magnificent appearance from the sea, being placed on the acclivity of a steep hill which rises from the N E. extremity of the gulf surrounded by lofty stone walls, about 5 m. in circuit, which ascend from the sea in a triangular form, and surrounded by a fortress with seven towers. Domes and minarets are numerous, and being crowned as usual by cypresses, add to the imposing appearance of the city. Salonica retains the form of its ancient fortification the lower part of the walls is Cyclopean, the upper brick work. By means of aqueducts, water is brought from the hills for the supply of the city. The

Gulf of Monte Santo, and Cassandreia, with that of Centaurea on the N E and Salona on the S W. The general aspect of these peninsulas is rugged, being intersected by immense rivers. The strait (anc. *Thermaia fluvius*) is a large arm of the Aegean Sea, between the most W of the peninsulas above described and the coast of Thessaly. It is about 35 m. long. S. E. to N. W. with an average breadth of about 65 m. The best anchorages in the gulf are on the E. side, and the form of the gulf renders them secure, while the access is by no means difficult.

SALOP, or England. See *SINORUM*.

SALOP, a river Spain Extremadura, prov Caacera, rises S E of Montaneros flows N, till near Torremocha, when it bends W., and then N W until it discharges into the Tago, about 8 m. N Salorino. Total course, 50 m. chief tributaries, the Ayala and Pontones.

SALORINO a vil. Spain Extremadura, prov and 33 m. W Caacera, between the sierra of San Pedro and the river Salor. It has a church, with a tower a courthouse, prison, and primary school manufactures of woollen and linen cloth file-works, several flour-mills a considerable trunk trade, and a trade in honey wax, and bread. Pop. 5007.

SALOU a small seaport, Spain, Catalonia, prov and 33 m. S W Tarragona lat 41° 7' N lon. 7° 12' E. on cape of same name, which juts out about 1 m. into the Mediterranean. It exports brandy fruit wine, and paper and imports sugar hides coal, staves, woollen cloths &c.

SALPERTON par Eng Gloucester, 1210 ac. P 145

SALPI, a lake, Naples, prov Capitanata, dist and 22 m. E Foggia, and only separated from the Adriatic by a very narrow tongue of land length, S. E. to N. W. 10 m, breadth 2 m. Royal salt-works are established on its shores and on the W side, are the ruins of a town of same name.

SALSA a tn Naples, prov Principato-Ultra, W San Angelo de Lombardi, with three churches. Pop. 1280

SALSETTE, an isl. off W coast, Hindooistan, and so near that on which the town of Bombay stands that it has now been connected with it by a causeway length, N to S. 18 m. median breadth, about 11 m. The surface is well diversified, presenting an alternation of rocky hills, covered to their tops with under wood and valleys, partly fertile and well cultivated, particularly in the S, but more frequently covered with groves of mangoes, palms, and other timber-trees. Among the jungle the tree palm and coconut grow spontaneously. The principal crops are sugar andigo, cotton, rice and hemp. Game is very abundant. Great numbers of monkeys frequent the jungle, and even tigers are occasionally seen. The early colonisation and prosperity of the island are indicated by a number of remarkable antiquities, among which are a great number of caverns artificially excavated in the rocks. One of these is a Buddhist temple, with two gigantic figures of Buddha, about 30 ft. high, one on each side of the vestibule. The Portuguese, who have possessed the island, and converted great numbers of the native Hindoos, transformed the temple into a Christian church. They were dispossessed, about 1750, by the Maharras who, in their turn were driven out by the British in 1778. Pop. estimated at 50,000 of whom about one-fourth are of Portuguese origin.

SALSO (anc. *Ilavara* a river Sicily, rises in S. side of the Madonia Montagna, prov Palermo, flows S. S. W. through prov Caltanissetta and after a course of about 70 m., falls into the Mediterranean at Alcanali. The country through which it flows abounds in salt and sulphur.

SALSO-MASCIONE, a vil. and com. duchy and 31 m. W by S. Parma, on a low flat. It has an ancient courthouse, with a tower; a primary school, a stone-bridge, extensive salt-works, and a trade in corn, wool, and fruit. Pop. 5008.

SALT, a river, U States, formed by the junction of two streams of same name, which rise near the centre of Ken-

SALONICA seen from the Turkish Cemetery from Capt. Dorman, View on the Mediterranean.

neers are numerous, and well supplied. The mosque of St Sophia is a beautiful structure, similar to but on a smaller scale than that at Constantinople. There are other nine large mosques, besides Greek churches and Jewish synagogues. The principal remnant of antiquity is the propyrium of the hippodrome, a magnificent Corinthian colonnade of five pillars supporting an entablature, over which is an attic, with figures in alto-relievo. The whole sculpture is in marble, and is considered among the finest specimens of the art existing. Two triumphal arches, and some remains of vast antique pillars, are also included in the antiquities of this city. The trade of the place is very considerable. The principal exports consist of wax, cotton, tobacco, timber, and wool, the imports of sugar, coffee, dye-woods, indigo, colonial, molasses, printed calicoes, iron, lead, tin, watches, &c. The vessels at Salonica lie at anchor before the town. Pop. above 70,000 of whom a large number are Jews and Greeks. — S. E. from the city are three remarkable peninsulas of about 25 m. long each, by nearly 4 m. broad, projecting in a S E direction and almost parallel to each other, into the archipelago, enhancing the

tucky, flow W, white, and soon after John 1 bank Ohio, about 20 m. below Louisville, after a course of about 100 m., partly navigable.

SALT HILL, a vil. England, co. Buckingham, 2 m. N. From. It is a village of notes only as having been connected with the now abandoned transatlantic railway called Mountain of the Blue scholars, who they required as permission to a quarry on the S. side of the road, and lavard contributions on the passers-by.

SALT LAKE CITY a tn. U. States, territory Utah, on the Jordan, which connects the Utah and Great Salt Lake, 105 m. N. by E. Fillmore City, about lat. 40° 15' N. lon. 112° W. It stands at the W. base of Wasatch Mountains, more than 4000 ft. above sea-level and consists of spacious regular and well-planned streets, lined with houses, principal parts of sun-dried brick, and neat appearance. It is the head-quarters of the Mormons, and was first founded in 1847 by Brigham Young, the successor of Joe Smith, the originator of the sect. Its progress has been very rapid, and its condition is apparently prosperous, notwithstanding the persecutions which are publicly mentioned in it. Pop. estimated at 8000.

SALT LAKE (GREAT) See GREAT SALT LAKE.
SALT RANGE, an extensive mountain group Pungah extending S.E. from the Khyber or Tera Range on the N.E. confines of Afghanistan to the Jellala, a distance of nearly 200 m. It is a barren and regular appearance, exhibiting little vegetation, while bold and bare prospect rise in many places at once from the plain but some of its peaks exceed 2500 ft. Limestone, sandstone, and clay of various colors are the chief formations. Salt pervades them all but is principally enveloped in clay, occurring in enormous masses, some of which are 200 ft. thick, varying in hue from white to flesh-color. The quantity of salt raised annually from the mines, some years since, was 90,000,000 lbs. Most of the torrents of the Salt Range carry down gold-dust in their sands.

SALT RIVER, a river U. States, rises in the territory N. of the state of Missouri, and flowing first to the S., and then to the E. falls into the Mississippi in Missouri, after a course of about 250 m.—2 Kentucky rises to the centre of the state, and flowing N. about 40 m., turns to the W. and after a course of about 100 m., unites with the Rolling Fork from the S. and again turning to the N.W. enters the Ohio at Shepherdsville.

SALTA a prov. and tn. of La Plata. The province, which is the frontier one to the N. extends from lat. 26° N. northwards to the confines of Bolivia, is bounded E. by El Gran Chaco, E. by provs. Tucuman and Catamarca, and W. and N. by Bolivia. It consists of lofty mountain ranges, fertile valleys and tracts covered with wood or pasture, with a climate varying from tropical heat in the E. part of the prov. to intense cold in the mountain districts on the W. The principal rivers are the Yerneco and the Salado. It yields wheat, maize, indigo, cotton, and sugar; and the vine to a certain extent is cultivated and some trade is carried on in its wines. Pop. about 60,000.—The river lat. 24° 35' S. lon. 65° W. about 500 m. N.W. Buenos Ayres, at the bottom of a narrow valley visible to occasional indentations has a neat appearance, possesses a cathedral and several churches, but from the station is unhealthy at certain seasons. Pop. about 9000.

SALTASH a market tn. England co. Cornwall 4 m. N.W. Plymouth, r. bank Tamar, on a steep acclivity rising abruptly from the river, across which there is here a steam-ferry. It has an ancient chapel with a fine massive tower—place of worship for Wesleyans and Baptists, a free school, and mechanics institute. The inhabitants are mostly seafaring men or engaged in fishing. Pop. 1621.

SALTAY prov. Eng. Lancashire; 2860 ac. Pop. 296.
SALTAY, a port in Scotland on the Firth of Clyde co. Argy. 24 m. S.W. Glasgow, with which it is connected by railway. It is irregularly built, and by no means of pretentious appearance has a town hall, Established, Free, and three U. Presbyterian churches, and a Baptist meeting-house, several schools, and a library. Many of the inhabitants are occupied in weaving mantles. There are extensive chemical works at either end of the town; some salt is manufactured; and at the harbour considerable quantities of coal are exported. Pop. 4528.

SALTRE, two small isles. Ireland co. Wexford, R.E. coast, St. George's Channel lat. 52° 5' 30" N. lon. 6° 41' W. The largest is about 1 m. long, by ½ m. broad; the smaller about half that size.

SALTRE-ELF, a river Norway, half Nordland, rises in a mountainous district on the coast of Sweden, near lat. 67° N.; flows N.W. and falls into the Arctic Sea by a wide estuary, which takes the name of the Saltreldfjord; and at the mouth of which are several violent whirlpools, by which vessels have been repeatedly engulfed. The whole course of the Saltre exceeds 100 m.

SALLDA a river U. States, rises in the Blue Mountains, S.W. frontier of N. Carolina, enters N. Carolina, flows S.E. and at Columbia unites with Broad River in forming the Can. gaves, after a course of about 130 m.

SALUEN SALUEN or THAK-LUEN, a large river of S.E. Asia, forming nearly all the E. boundary of the Burmese empire. It rises in Kachin (E. Tibet), apparently by three principal heads, flows S. at first between high mountain ranges, and afterwards through the W. part of the Chinese prov. of Yunnan, under the names of Non-hang and Lo-king bounds throughout the territory of the free Laos on the W., separates the British Transvaal provs. on the same side from the Burmese dominions, and finally enters the Gulf of Martaban by a wide mouth between the towns Maitman and Martaban. Its course, estimated at 600 m. (but probably much longer) appears to be almost uniformly to the S., and between lat. 9° 00' and 9° 30' E. It forms very large floods, and differs from nearly all the other great rivers of Asia in not having a delta, neither has it any considerable affluents, but according to maps a communication with both the Hoang and Irrawadi. It has been but scantily surveyed or explored, boats may ascend it to about 100 m. from the sea, beyond which its navigation is said to be interrupted by rapids and cataracts. It flows, however through a country profusely timbered, and doubtless of great natural resources.—(Meyers Almanac, &c.)

SALUGGIA a vil. and com. Italy, Piedmont, Riv. Novara, prov. and 24 m. W. Verceil, near r. bank Dora-Baltea, with five churches, a convent, and a school. Pop. 3827

SALUEN or SALUGGIA a vil. Austria, Tyrol, about 16 m. S.W. Bozzen 1 bank Adige. It has a church, and ruins of a castle. In the vicinity a little above the village, there is a remarkable water-fall nearly 500 ft. high. P. 1116.

SALUZZO, a tn. Piedmont, Savoy, prov. of some name, 30 m. S. by W. Turin, partly on a hill, and partly in a plain between the Po and the Tanaro. It consists of an upper and a lower town, the former once surrounded by strong walls,

and still entered by three gates, and wall built, though the streets are steep, and the latter of considerably greater extent, and in general of more modern construction. Saluzzo is the seat of a bishop, the residence of the marquis of the name, and the seat of several important public offices and has a large and handsome cathedral erected in the 15th century, surmounted by a lofty and elegant tower. The church of St. Bernard, not of much architectural merit, but containing several splendid and interesting monuments. The church of St. Domingo, also chiefly remarkable for its monuments several suppressed and two existing convents the court-houses, ancient townhouses, colleges, and other public schools a large old castle, now converted into a house of correction, cavalry barracks, a new theatre, a foundling and two other hospitals a *mont-de-piété*, and several charitable endowments. The manufactures consist of iron and iron-ware, articles in copper, brass, bronze, gold, and silver hats, leather and span silk the trade is chiefly in wine, corn, and cattle. Pop. 14,426. —The province, area, 618 sq. m. is bounded N by provs. Turin and Pinerolo, E Mondovì and Alba S. Com. and W France. In the W it is covered by the Maritime Alps, among which is here the lofty summit of Monte Viso. The chief rivers are the Po, which rises within the province, and its tributaries Maieva and Traza. The soil in the lower districts is very fertile, and having the advantage of an excellent climate produces in abundance corn, hemp, fruit, wine, and silk. In the higher districts great numbers of cattle and goats are fed. The minerals include iron, copper, marble and roofing slate. Pop. about 156,459.

SALUZZOLA, a in Italy Piedmont, div Turin prov and 10 m. S.E. Biella on a slope above r. bank Elvo, here crossed by a modern bridge of five arches. It has a court of justice and a market square. Pop. 3181.

SALVADOR, a republic, Central America, bounded N and N.E. by Honduras N.W. Guatemala, from which it is separated by the Rio Paso. E. by Nicaragua N.E. by the Bay of Conchagua or Fonseca, and S. the Pacific Ocean area, about 7800 sq. m. The coast line, which extends nearly 160 m. is deeply indented, particularly in the S.E., and furnishes several good harbours, of which the most frequented are La Unión, within the Bay of Conchagua, the residence of Libertad, and Amacuta on San Juan. The distance from the shore N. for about 15 m., is moderately low and level, but it shortly after becomes broken and rugged and is traversed by mountain masses in distinct groups, giving it a wild appearance. This is increased by no fewer than five volcanoes, which may be considered the distinguishing features of the state. The most active is Yalalo, but the loftiest are San Vicente and San Salvador each about 9000 ft. high. The inequality of surface produces a considerable variety of climate, which inclines to cold in the higher and becomes excessively warm in the lower districts near the coast, but taken as a whole, is very healthy. The largest river is the Lempa, which issuing from the Lake of Guila, flows S.E., forming part of the boundary between Salvador and Honduras. Other streams, though generally of small dimensions, are both large and numerous enough to furnish the means of irrigation, and thus dispense fertility in all directions. The most important and next in magnitude to the Lempa, are the Pasa and the Bira or San Miguel. Beside Lake Guila already mentioned, which is about 15 m. long by 5 m. broad. There is another called the Yagango, 5 m. E. of the town of San Salvador, 9 m. long by 8 m. broad. Numerous mineral and thermal springs occur in many quarters. The soil possesses great fertility and the whole state was one of the best cultivated in Central America. Of several discord broke out, and among other devastating effects, three large tracts out of cultivation. The most important crop is indigo, which is generally grown, and is both abundant and of excellent quality. Maize, sugar coffee, tobacco cotton &c. thrive well, but wheat does not succeed except in a few places and fruits, though by no means deficient, are neither so various nor so abundant as in the state of Guatemala. Cattle of a fine size, and hogs and poultry are numerous, but sheep are few and very inefficient. The dairy produce is chiefly confined to cheese of very ordinary quality which forms one main article of subsistence, on some estates particularly near the coast, a rich and excellent cream-cheese is made. The mineral deposits, once supposed to form the chief wealth of the state, appear to be very much exhausted. Gold and silver

are still extracted, but the returns are not understood to be very profitable. Iron of excellent quality used to furnish ore to two or three smelting-furnaces in the neighbourhood of Escapa, but is no longer worked, though it still might be to advantage, as the iron is admirably adapted for being converted into fine steel and is said to resemble in this respect the celebrated woods of India. The part of the coast between Amacuta and Libertad is famous for producing the article known in commerce as the balsam of Peru, of which from 15 000 lbs. to 20 000 lbs. weight are annually obtained. Another tree of almost equal value with the balsam is the cedar; large quantities are annually cut for timber. For administrative purposes the state is divided into four districts called from their chief towns—San Miguel San Vicente San Salvador and Santa Anna or Sonsonate. The inhabitants had long the reputation of being the most industrious in Central America, and the state, in proportion to its size, is still the most densely peopled. Pop. 280,000.

SALVADOR (SAN, a in Central America, esp. above state, on an elevated plain terminated by a lofty mountain, lat. 16° 46' N. lon. 89° 8' W. It was founded as early as 1528 as the seat of a bishop the seat of government, and of several important public offices, is tolerably well built, containing many good private dwellings and several churches, convents, and other handsome edifices possesses a well-furnished market, and has a considerable trade, particularly in indigo and tobacco. Pop. 28 000 April 16, 1854 it was completely destroyed by an earthquake.

SALVADOR (SAN, CAT ISLAND, or GUANAJANI, one of the larger of the Bahama Islands; lat. (S.E. point) 24° 9' N. lon. 75° 27' W. It is about 86 m. long, and from 5 m. to 7 m. broad. Its E. side is bound by a reef, on which the sea continually breaks, and renders it inaccessible on the S.W. side is good anchorage. This island was the first land seen by Columbus on his first voyage of discovery in 1492. He landed on it on the 12th October in that year, and gave it the name of St. Salvador.

SALVADOR (SAL), a city Brazil. See BAHIA.

SALVAGES (THE) two separate groups of rocky islands, N. Atlantic, between the Canary and Madeira Islands, distant from each other about 8 m. in a N.E. and S.W. direction with a wide passage between them. The N.E. group is formed by the Great Salvage, with its surrounding rocks. It is high and rocky and may be seen at a distance of from 34 m. to 27 m. The W. point of the island is in lat. 30° 7' 61' N. lon. 16° 51' 20' W. The S.W. group consists of two islands called the Great and Little Piton, surrounded by rocks and reefs. The Little Piton is about 1½ m. to the W. of the Great Piton. The latter is in lat. 30° 1' N. lon. 16° 0' 1' W. N.

SALVALEON, a vil. Spain Extremadura, prov. and 27 m. E. Badajoz. It has a townhouse prison, granary three primary schools, a church, and two hermitages. In the vicinity manufactures of coarse frieze and sackcloth, lace and net, beehives and agricultural implements an oil and 17 flour mills and some traffic in agricultural produce hams, and pork-sausages. Pop. 2098.

SALVATIERRA, two places, Portugal. —1. (do Estremoz), A. in and par. prov. Beira-Baixa 38 m. E. Castello-Branco r. bank Ega, which separates it from Spain. It is defended by a strong castle, and near it are mineral springs, which are much resorted to. Pop. 900. —2. (do Agueda), A. in and par. prov. Estremadura, 18 m. S.W. Santarém, in an extensive plain between L. bank Tagus and the Beira. It is regularly and well built, and has a hospital and almshouse. The Tagus both furnishes facilities for trade, which is of some extent, and employs a good many persons in fishing. Near it is a theatre and royal palace. Pop. 3140.

SALVATIERRA, a in Spain Extremadura, prov. and 18 m. S.E. Cáceres on a mountain slope, near the Tagus, with a church, convent, and endowed school, manufactures of linen several oil-mills and a trade, chiefly transit, in oil, corn, and hides. Pop. 1206.

SALVATIERRA DE LOS BARROS, a vil. Spain, Extremadura, prov. and 28 m. S. Badajoz. It has a townhouse, prison, elementary school, church, and two hermitages, and on the neighbouring hill-tops stand a Franciscan convent and ruins of castle, belonging to the Duke of Medinaceli; coarse earthenware is made. Pop. 2069.

SALVATORE (Sav), a tn. Italy, Piedmont, 517 and 7 m. N W Alessandria, beautifully situated among sloping vineyards. It was once fortified by bastions, of which part still remains; is the seat of a court of justice, and has two churches, a school and an old castle, seated on a lofty rock, and still in tolerable preservation. Pop. 5329.

SALVÈ, s. to Naples, prov. Otranto, S E Gallipoli, on a hill; with a handsome church, and a Capuchin convent. Pop. 1350.

SALVIAC, a vil. France, dep. Lot, 14 m. N Cahors with numerous tenancies. Pop. 1189.

SALWARPER, par. Eng. Worcester 1850 ac. P. 446

SALY a vil. Hungary, Nithier Thein, co. Hornd, on the Raitzthal. 7 m. from Hungary with a Protestant and a R. Catholic church, and three mills. Pop. 1511.

SALZA, or **SALZACH**, a river Germany rises in the N W corner of the Pinzgau, in the lofty mountains which separate Salzburg from the Tyrol flows almost due E till it reaches St. Johann, then N W to the town of Salzburg. Shortly after leaving Salzburg, it receives on the left its only important tributary the Saale, and thenceforth pursues first a W N. and then a N E. direction, forms the boundary between Austria and Bavaria till its junction with r. bank (w. about 7 m. above Braunau. It has a course of about 135 m., of which about 90 m., beginning at Hallein, are navigable.

SALZBRUNN (New Norren, and Osnab), three adja. cent vils. Prussia, 81000 ac. gov. and 87 m. S W Breslau. There are here six mineral-springs, with a bathing establishment which is much frequented. About 2 500,000 bottles of water are annually exported. Pop. 3207.

SALZBURG [anc. *Juvavum*] a tn. Upper Austria, cap. circle of same name at the base of two precipitous heights on the Saale, 156 m. W S W Vienna. Its site is so fine, that it is generally regarded as the most beautiful spot in Germany. It stands in a narrow defile half covered by the Hohe Alps, through an opening in which the Saale passes out to join the Inn. The rich fields and meadows through which the river winds, the wooded slopes and abrupt precipices on either side and the ridges of hills rising tier above tier till they are terminated and overtopped by the main chain of the Alps, form scenery which suffers little by comparison with the finest parts of Switzerland. The town itself is not particularly attractive. It is divided by the Saale into two unequal

by Haggenau. Between the two appears stands the cathedral, a heavy Saxon structure, 410 ft. long, by 360 ft. broad, with a facade of white marble, a dome, and two towers. Adjoining the cathedral is the archbishop's palace, an extensive edifice, now partly used as public offices. In the same neighbourhood is the collegiate church of St. Peter, with a monument to Haydn and a cemetery remarkable for the number of curious ancient tombs which it contains. Attached to this church is an elegant hall with a library of 45,000 volumes, and an extensive collection of coins, engravings and natural curiosities. The castle, already referred to, is one of the most interesting edifices, though it has long been dismantled, and serves only for barracks. In one of its towers is shown the torture-chamber with part of the inhuman apparatus employed. The Protestants, who were ultimately to the number of 80 000 mercilessly driven out of the town are understood to have furnished numerous victims, the castle having been the residence of the archbishops, who were at the same time princes of Salzburg and of the German empire, and had temporal sovereignty over 300 000 souls. The continuation of the ridge on which the castle stands forms the Hohenberg, which is surrounded on three sides by steeply projected precipices and has a flat summit of considerable extent laid out in fields and pleasure-grounds, and well planted with trees, through the openings in which views of exquisite beauty over mountain and valley are obtained. Through the sandstone-breeds, of which the hill is partly composed, a tunnel called Sigismund's Thor has been driven 415 ft. long 22 ft. broad, and 89 ft. high. The manufactures consist chiefly of leather, ironware, cotton goods, and majolica. The trade both in these articles and transit is considerable and there are two important annual fairs. Salzburg is the see of an archbishop, the seat of superior provincial courts and offices and possesses a library with an extensive and valuable library a gymnasium, several industrial and other schools, a physical and zoological museum botanical garden and dumb institution lunatic asylum, large houses of correction theatre, and several hospitals. It is a place of great antiquity, and under the Romans had acquired an importance of which ample proof is still afforded by the antiquities which it contains. The Roman town was destroyed by Attila in 458. It was rebuilt by the dukes of Bavaria, but in 1338 fell a prey to the flames. It soon rose again and assumed much of its present form, under a succession of archbishops-princes, who continued to govern it till 1805 when it was secularized with the extensive domains which belonged to it, and given first to Tuscany and then to Bavaria, from which, with exception of the territory of Berchtesgaden, it passed to Austria in 1816. Pop. (1846), 14,165.—The circle, called also the duchy of Salzburg, area 2080 sq. m. is a rugged mountainous country intersected by numerous valleys, of which that of the Saale is the principal. These valleys are chiefly pastoral, but in many of them much corn and fruit are raised. Wood is abundant, and the minerals, which are very valuable, include gold, silver, lead, copper, cobalt, iron, salt, and marble. Pop. 146,507.

SALZDERHELDEN a vil. Hannover gov. Hildesheim, 1 bank Leine, 4 m. S S E Einbeck with a church, manufactures of woollen and linen goods, and salt works. Pop. 1000.

SALZE (Quom) a tn. Prussia, gov. and 8 m. S S E Magdeburg. It is entered by three gates; contains a Protestant church a synagogue, two hospitals, and workshops for the province; and has a bathing establishment, and five mills. Pop. 2563.

SALZKAMMERGUT, a dist. Upper Austria, in the S E corner, between Salzburg and Styria, has, with the county of Orib and the lordship of Traunkirchen, an area of 956 sq. m. It is covered almost altogether by high Alps, is watered by the Traun, contains the beautiful Lake of Traun and Hallstätt, and from its wild and romantic character has received the name of Austria Switzerland. It has little fertile land, but rears great numbers of cattle; is well wooded, well supplied with game and fish; and is rich in minerals, in-

SALZBURG.—From Salzburg Cathedral

parts, which communicates by a wooden bridge, above 570 ft. long and is surrounded by a wall with 10 gates. The greater part of the town is on the left bank, where it is overtopped by a lofty height, crowned by a magnificent old castle. Many of the squares are handsome and regularly formed, and the superabundance of marble employed in the construction of the houses has a striking effect, but the streets are narrow, crooked, and gloomy and in many parts have a deserted look from being grown over with grass. The two finest squares are the Residenz or Haupt-Platz, and the Domplatz. The former is adorned with a beautiful statue of white marble, 45 ft. high; the latter by a noble bronze statue of the Virgin,

cluding marble, coal, and more especially salt, of which about 85,000 tons are annually produced. The chief towns are Ischl and Landen. Pop. 16,000.

SALZKOTTEN, a tn. Prussia, Westphalia, gov and 44 m S.E.W. Münster. It is walled, has a R. Catholic church, postoffice, distillery, and salt-springs. Pop. 1604.

SALZSCHLIEF, a vil. Hesse-Cassel, circle and 10 m N.W. Fulda, 1 bank Aulfeld; with salt-works and several mills. Pop. 1098.

SALZURLEV, a tn. Germany, Lippe-Desmold, on the Salze, 10 m N.W. Desmold. It is walled, contains a church and a postoffice, and has valuable salt-springs. Pop. 1864.

SALZUNGEN, a tn. Saxa-Maunfingen, 1 bank Werra, 20 m N.W. Mühlungen. It is walled; has several courts and public offices, three churches, two hospitals, a postoffice, and the old strong castle of Schreyburg situated on a lofty mountain-tops, and several taverns, dye-works, and mills. Rock-salt is worked to some extent in the neighbourhood. Pop. 8077.

SALZWEDEL, a tn. Prussia, gov and 54 m N.W. Magdeburg on both sides of the Jette with four churches, a chapel, synagogue, gymnasium, and several schools and manufactures of shoes, and woollen linen, and cotton goods. Pop. 339.

SAN BARTOLOME-DE-LLOREBAT commonly called **SAN BARTOLOME**, a vil. Spain, Catalonia, prov and 6 m W. Barcelona, 1 bank Llobregat. It has a two-house, prison, church, a castle commanding the town, and several schools; and manufactures of lace. Pop. (agultual) 2502.

SAMADURA an vil. Hindostan, *See* SYKRA.

SAMAJPATÁ a small tn. Bolivia, dep and 70 m S.E.W. Santa-Cruz-de-la-Sierra. Around it are cultivated potatoes, oats, and excellent tobacco, in which last a great trade is carried on, and oxen sheep and a great quantity of mules and asses are reared. Pop. 1000.

SAMAKOV a tn. Turkey in Europe, N. slope of the Balkan, in S.W. extremity, Bulgaria, 33 m S.E.E. Sophia. It is surrounded by an embattled wall flanked with towers and has foundries and other iron-works supplied from mines worked in the neighbouring mountains. Pop. about 7000.

SAMAMBAIA a vil. Brazil, prov Rio-de-Janeiro, dist Cantagallo, beautifully situated near the Paqueta in a wild and romantic district. Its existence is of very recent date, but it has made rapid progress; and now contains a handsome church of stone, with a number of good houses clustering round it.

SAMABA, a peninsula and bay N.E. coast, in Hayti, republic of Santo-Domingo. The peninsula stretches W. to E. 35 m, is 11 m across at its greatest breadth, and is terminated at its E. end by Cape Samana. Lat. 19° 18' N. lon. 69° 8' W. Its highest peak, Sugar-loaf Hill, is 1986 ft., and Morue-du-Diable is 1800 ft. above sea-level. There formerly existed a water-communication across its W. end, separating it from the island of Hayti, which though now silted up, could easily be re-opened, so that what is now a peninsula was formerly an island. Its soil is extremely fertile to a great extent it is covered with timber suited both for ship-building and cabinet-work, and it contains copper, gold, and bituminous coal. Pop. (1851), 1721. The bay lies on the S. of the peninsula, is about 43 m. E. to W., by about 8 m broad and at its W. end receives the Yuna, the largest river in the Dominican republic. It forms one of the finest harbours of the world, and may be regarded as a most important maritime position in reference to the trade of the Gulf of Mexico and the inter-oceanic routes across Central America, both in a commercial and military point of view. On its N. shore is the small town of Santa-Barbara. It lies in a bight of a land-locked bay, lat. 19° 18' 30" N.; lon. 69° 19' 18" W.; and has natural facilities for repelling or receiving vessels, a depopulated R. Catholic church, a neat Wesleyan chapel, and a custom-house. Samana being one of the open ports of the Dominican republic, the government maintains here a garrison of about 250 men, under a colonel who possesses the chief authority in the place.

SAMANOJO, a bay, coast of Peru, between the bays of Camana and Ferrol. Lat. 5° 15' 30" S. lon. 78° 55' 45" W. It extends about 5 m. between N.W. to S.E., with a width of 3 m., and is the most extensive harbour on the Peruvian coast N. of Callao. Its E. side is formed by a steep bluff

headland of same name. The river Yaguna, though the largest and most rapid on the coast of Peru is unable to force its way to the sea, and terminates in a lagoon at the S.E. extremity of this bay.

SAMAR, an isl. Indian Archipelago, forming a prov. of the Philippines. It is washed on the W. by the Bayan Sea, and on the E. by the Pacific and is separated on the N. from Isl. Luzon by the Strait of Bernardino, and on the S. from Leyte by the narrow channel of San Juanico. It extends from lat. 11 to 12° 48' N. lon. 124° 22 to 126° 52' E., with a length of 147 m. and an average breadth of about 50 m. Though thickly wooded, the climate is not unhealthy and epidemics are unknown. It is abundantly watered and fertilized by rivers of considerable size as well as brooks. The mountains are lofty and rugged. In these iron-stone and gold are found, and copper is said to exist. The forests produce useful trees of various kinds, some resins, others used for ship-building. Although now less so productive as it might be, with greater security from piratical attacks and a better government, the scanty population of the rugged island cultivates cocon palms for oil, rice, and excellent cacao. Samar produces also Manila hemp, wax, mother of pearl, pearls and tortoise shell indigo and to equal that of Guatemala and trapping. The palm oil is of bad quality. St. Ignace mts were abundant and were once profitably exported to America. *Sinangays* and *sepus* are manufactured, and also wax, called *decegar*, from a plant of that name. The inhabitants are mostly Melis (descendants of Spaniards by Indian mothers). They trade with the other Philippines and the Polynesian Islands. Many Indians seek escape from the capitation-tax in the mountains, but there are no Negritos in the island. The province contains 28 pueblos. Its capital is Catbalogan, situated on a creek in the W. coast. It is built with some regularity mostly of wood and nipa, but the church and governor's house are with a few others, built of stone. Pop. 96,470. (Mallet's *Les Isles Philippines*).

SAMARA a gov. Russia, 1 bank Volga, formed by a decree of December 18, 1850 and consisting of three districts of gov. Orenburg two districts of gov. Saratov and of the districts of Samara and Stavropol in gov. Simbirsk. Area. 89,000 sq. gov. Pop. (1846) 1,115,968.

SAMARA a tn. Russia, gov. same name, 650 m S.E.E. Moscow at the confluence of the Samara with the Volga. It contains two wooden and three stone churches and has manufactures of leather and soap and carries on an extensive trade, particularly in caviar, and fresh and salt fish, corn, wool, lamb skins, and hides. Pop. (1851), 13,753.

SAMARHA, two rivers Russia — 1. Rises on the S. frontiers of gov. Kharkov enters gov. Ekaterinoslav, flows e. into the Volga W. across that gov. and joins 1 bank Dnieper a little above the cataracts which impede the navigation of that river and a little below the town of Ekaterinoslav. Its principal affluent is the Volchuk which it receives on the left total course, about 170 m. It abounds with fish but the water is bad — 2. Rises in gov. and about 80 m. from the town of Orenburg flows W. N.W. enters gov. Simbirsk, and turning first N.W. and then W., joins the bank Volga at the town of Samara. Total course, about 800 m. Its principal affluent is on the right, the Lren Tok and Dol Kinet and on the left the Buzuzink. Its banks are generally covered with fine forests.

SAMARANG a seaport in Java, N. coast, cap. prov. of its name, 253 m E. by S. Batavia lat. (approx.) 6° 18' S., lon. 110° 37' E. (n). It lies near the mouth of the Samarang river which forms a kind of harbour, but large vessels lie in the roads, in which there are 3 fathoms, about 2 m. off. The roads are defended by a mole, with five bastions. The town is walled, and tolerably well built, but the streets are confined and airless, and consequently very hot, and the houses being kept white-washed, the eyes are so severely taxed that nowhere in Java are so many blind and half-blind people to be met with. It is, however, a healthy place, for the malarial in the vicinity are kept fresh and sweet by being daily covered by the tide. Behind the town, the country rises rapidly to heights of considerable elevation. Samarang has a Protestant and a R. Catholic church, several mosques, a public school, an observatory, government offices, law-courts, a warehouse, a general hospital, and an hospital for old men. It has manufactures of leather and of cotton fabrics, and carries on a

considerable shipping trade, exporting cotton, coffee, sugar, indigo, &c. Through the numerous Chinese settled here, a considerable business is done with Borneo in gold and dis-

SAMARATE SCENE ON THE BANKS OF THE CANAL.
From *Illustration* D. Little. *Yong* to Feb. 1884.

monds. Pop. (1845), 50 000.—The PROVINCE, bounded N. by the Java Sea, E. by Java and Rambang S. Samarate and Andoe, and W. Pekalongan and Bagelen, is 80 m. long, E. to W. by about 80 m. broad and is divided into the governments of Samarang, Demak, Gekropan and Kendal. It is a hilly but the coasts are low and marshy. It is well watered by the Boengwaroe, Boelen, Kendal Samarang Turbaya, &c. and is very fertile in rice, coffee, sugar tobacco and indigo. Tigers and other wild animals are numerous and fowls, buffaloes, sea and river fish are plentiful. Pop. (1845), 536,000.

SAMARATE, a vil. and com. Austrian Italy prov. Milan, 2 m. S. Gallarate. It has two churches and a charitable endowment. Pop. 2457.

SAMARAT, a vil. of SAMARANG, a tn. khandat, and 100 m. E. by N. city of Bokhara, in a beautiful and fertile valley well watered by streams from the N. slopes of Agalik Tan. It is nearly in the form of a regular quadrangle, surrounded by a wall in good repair with six gates, and defended by a citadel, which is situated on the W. side, and continued beyond the walls so as to form a suburb. The walls inclose an area of about 8 m. in extent, but a comparatively small part of it is occupied by inhabited houses, the much larger part being covered with ruins or occupied as gardens. Notwithstanding the ancient celebrity of Samarand, particularly in the time of Timur it is now insignificant, and has almost nothing in its modern structure to attract attention except its four concentric walls and its bazaar, which is of considerable extent, but only indifferently supplied. Bokhara having earned off most of its trade. The principal objects of interest are the rulers' palace, situated within the citadel, and containing the celebrated blue stone on which every new Khan must sit in order to have his title from challenge; the coffin of Timur placed in a lofty octagonal edifice, crowned with a dome, and consisting of two apartments, the floors of which are paved with white marble slabs and the walls ornamented with gilding and inscriptions from the Koran three madrasahs or colleges built by Timur each forming a handsome quadrangular edifice, with walls of porphyry mosaic, and minarets, nearly in a round style, at the angles; and several mosques attached to the madrasahs, and though generally in a ruinous state, exhibiting many traces of former splendour. Outside the walls, a little N. of the town, the palace of Timur still forms an extensive and magnificent ruin. The business of Samarand is carried on chiefly on Tuesdays and Sundays, during which it is visited by great numbers of Arabs, Uzbeks, and gipsies. On other days it is comparatively lifeless, and seems not to have a population exceeding 25,000 to 30,000.

SAMARILLA, or **PARASITE** (modern, *Subsistit*), an ins. in Palestine, formerly cap. of a prov. or kingdom, and finally situated among terraced gardens and olive groves, on the beautiful hill of some name, 56 m. N. N. W. Jerusalem. It con-

sists chiefly of a number of cottages, substantially built for the most part out of the materials of the ancient city, but contains several remarkable ruins, the most conspicuous of which are those of a church, dedicated to John the Baptist, because according to tradition either the scene of his martyrdom or place of his burial. Samarra was built by Omri, king of Israel, about A.C. 925, and continued to be the metropolis of the two tribes till they were carried away into captivity by Sennacherib about two centuries after, A.C. 720. After having been razed to the ground and again rebuilt, it was given by Augustus to Herod, who, in honour of the emperor, gave it the name of Sebaste, a Greek term equivalent to the Latin Augustus, surrounded it with a strong wall, and adorned it with many splendid structures. The province or kingdom of Samarra formed the central portion of Palestine, having Galilee on the N., Judea on the S., the Jordan on the E. and the Mediterranean on the W.

SAMARRAH a tn. Arabia Turkey, path. and 65 m. N. W. Bagdad, on a height above a bank Tigris. It is an ancient place, indebted for its only importance to two handsome tombs surrounded by cupolas, which annually attract about 10,000 pilgrims from all parts of Persia. Pop. scarcely 1000. Ancient Samarra was a much more important place. Its site and extent are indicated by heaps of ruins in all directions. **SAMASSI**, a vil. and com., Ital. Sicily, 5 m. and 21 m. N. N. W. Cagliari, in a fertile but unhealthy plain, with a church and a monastery. Pop. 1783.

SAMATAN (anc. *Somethan*), a tn. France, dep. Gers, 1 m. bank Save, 20 m. S. E. Auch, with manufactures of leather and bricks, and a trade in corn wool and cattle. Pop. 1224. **SAMBA** COVRA, a vil. W. Africa. Benion. between Bakel and Boulemane, lat. 14° 41' N., lon. 13° 25' W. with an earthen citadel and mosque.

SAMBAS, a state its cap. and a river, in Borneo. The river, on the W. coast, E. of Sarawak, is shaped somewhat like a triangle, each side of which measures about 100 m. It is separated from Sarawak by the Krimbang Mountains, from which it slopes S. W. to the sea; and is watered by the Sambar its principal stream, the Selakoo, Sakawan, &c. It is fertile, and contains the richest gold-mines in Borneo, which are worked by a colony of Chinese. It is very populous, and is governed by a Mahometan sultan.—The towns, near 1 m. bank Sambar, about 50 m. from the sea, about lat. 1° 19' N. lon. 109° 29' E. has on a low marshy site, and is the seat of the sultan and of a Dutch resident, who has a small force for the protection of Dutch interests. The houses are raised above the ground on piles, and the sultan's palace is a large building surrounded by a sort of fortification. Many of the inhabitants are prahs.—The river rises near the frontier of the state, flows N. W. for about 50 m., then turns S. W., and enters the Strait of Carimata by a broad estuary after a total course of about 100 m. It is navigable as far up as Sambar for native vessels, and contains a good deal of gold in its sands.

SAMBATIKILA, a walled tn. W. Africa, Mandingo country on the route from the coast to Jemba; lat. 6° 58' N. lon. 7° 59' W.

SAMBER, a tn. Hindostan, prov. and 51 m. N. N. E. Ajmer city, lat. 26° 58' N. lon. 74° 57' E. To the N. E. is a large salt-lake, 30 m. long by 14 m. broad, whence a considerable portion of Upper Hindostan is supplied with salt. It is collected towards the close of the hot season, without having undergone any artificial process, being found crystallized in large quantities under a layer of mud.

SAMBILANG, or **HEIN ISLANDS**, a group of isles, Indian Archipelago, Strait of Malacca, off the entrance of the river Perak or Perak. About lat. 4° N. lon. 100° 50' E. They extend 7 m. N. to S. N. E. and S. W. and are mostly small high, steep islands, covered with trees. The channel between the islands and the peninsula is deep, with soundings of 15 to 25 fathoms.

SAMBOANGA, **SAMBOANGAM**, or **NURUTHA** **SEBORANG**, **PIRAN** or **ELABANGA**, a to. Philippines, on the S.W. extremity of Mindanao, lat. 8° 54' 37" N; lon. 118° 5' E (2). It occupies a low site on the shore, at the mouth of a small stream, and is, after Manila, the most important fortress which the Spaniards possess in the Philippines. It is built in the form of a square, with a bastion at each angle and has more

A STREET IN SAMBOANGA.—From *Dunster* *l'Uerthe*, *Voyage au Polo Sud*

over an inner inclosure flanked by four bastions which serves as a citadel, and occupies the only buildings of note. There are on the inner citadel a dilapidated castle, a new chapel, a governor's palace, and an hospital. The houses of the town erected on posts, fenced off by bamboo and covered with mats, are generally of very poor appearance. The district depending on the fortress is a kind of penal settlement, and though of considerable extent, does not produce sufficient food to maintain its inhabitants, cultivation being almost confined to some fields in the vicinity of the town. The anchorage of the roads is good, but becomes unsafe at certain seasons and there is no harbour. The want of it is in some measure supplied by that of Caliana, which is about 8 m. W N W, and may be considered as the port of Samboanga.

SAMBOR, a to. Austria, Galicia, in an extensive plain, 1 bank Dunster 45 m. S.W. Leobing. It is well built: has a Catholic and Greek mixed church, a gymnasium, a criminal court, and several district offices. It has some manufactures of damask, and a bleachfield. Pop. 6800.

SAMBRE (anc. *Salsus*) a river which rises in France, in the forest of Haye Carigny near Fontenelle dep. Aisne, and proceeds N. W. E. to Landreville, then N. E. to Marcheng, enters Belgium a little W. of Marais, prov. Hainaut, and proceeds to Charleroi. Here it turns almost due E. and reaching Namur by a long series of remarkable windings, bathes its S. extremity, passes immediately beneath its citadel, and falls into the Meuse. Its whole course is about 120 m. Its navigable course, which commences at Landreville, is about 96 m., of which 42 m. are in France, and 57 m. in Belgium. The chief traffic upon it is in coal, wood, sandstone, and iron. It is well supplied with fish.

SAMBUCA.—1. A to. Sicily, prov. and near Girgenti. Pop. 8000.—2. (*della Montagna*) A vil. and par. Tuscany, comp. Florence, about 17 m. from Pistoja, with a court of justice, a parish church, a castle, a school, and a trade in cattle. Pop. 1206.

SAMBUCCO, a vil. and com. Italy, Piedmont, div. Codi near Vinadio, with two churches, and an oratory. P. 1412. **SAMER** (anc. *Palmarum Monsstrum*), a to. France, dep. Pas-de-Calais, 8 m. S.E. Boulogne, on a gentle height overlooking extensive meadows with the remains of a celebrated abbey. Pop. 1227.

SAMOGAN ISLANDS. See **NAVIGATOR ISLANDS**. **SAMOCEIN**, or **SAMOCETIN**, a to. Prussia, prov. Posen, 26 m. W.S.W. Bromberg, in a fertile district, watered by the Netze. It contains a synagogue, and has manufactures of woollen cloth, tile-works, and a trade in cattle. Pop. 1845.

SAMOEBS, a to. France, dep. Haute Savoie, prov. Faucigny, in a valley, r. bank Giffre, 16 m. E. Bonneville, with a court of justice, several schools, and charitable endowments. Manufactures of linen and cotton cloth and a trade in cheese and in cattle and oxen. Pop. 3911.

SAMOGITIA, an ancient territory, which formed a province in the kingdom of Poland and was bounded N. by Courland and the Baltic, W. the Baltic and Prussia, and S. and E. Lithuania. The greater part of it is now included in the Russian gov. Wilna.

SAMOR, or **SOMAM** **ADAM**, an isl. Asiatic Turkey, S. side, Gulf of Scala Nuova 45 m. S.W. Smyrna lat. 38° 10' 37" N lon. 28° 53' 45" E (2), greatest length, E. to W. 25 m. central breadth about 12 m. It is separated from the coast of Asia Minor on the E. by a narrow channel, called the Little Bosphorus, not more than 2 m. wide and from Nikaria and the Fuzul Islands on the W. and S.W. by another channel called the Great Bosphorus, nearly 8 m. wide, and with its N. coast forms the S. side of the Gulf of Scala Nuova. Its coast furnishes several good harbours, well situated for commerce, and its interior is traversed by two mountain ranges, mostly rocky and barren, but occasionally relieved by pine-forests while their lower slopes are covered with vineyards and olive-gardens. The valleys are generally well watered and fertile, and present much beautiful scenery. Besides corn, fruit, and vegetables, the vine is extensively cultivated, and produces excellent Muscadine wines, which are much esteemed in the Levant and form the principal source of revenue. The minerals though not worked, include silver, lead, iron, mercury, cobalt, and white marble the last particularly abundant, as most of the rocks are composed of it. The principal towns are Vathie, which is situated on the N.E. side, and has a commodious harbour, and Cora, which is considered as the capital. This honour it owes to its occupying part of the site of the ancient Samos, which was once among the strongest and most flourishing cities of Greece and is celebrated as the birthplace of Pythagoras. This island, known by the name of Samos of Ionia, to distinguish it from Samos of Thracia, an island near the Dardanelles and Samos the Sun, the present Cephalonia, is fabled as the native place and favourite abode of Ulysses, who had here one of the most celebrated temples in the world. It was situated on Cape Colonna, the most S. promontory of the island, and still marks its site by a standing column of white marble. Pop. about 20 000.

SAMOBONY, a vil. Hungary, co. Geografd, about 4 m. from Komlos, in a fertile district; with a considerable trade in fruit and tobacco. Pop. 1137.

SAMOTHRACI, or **SAMOTRACE**.—An isl. Turkey in Europe, in the N. part of the Archipelago, 40 m. N.W. the entrance to the Dardanelles, greatest length, E. to W. about 14 m.; breadth, about 8 m. It is of a somewhat oval shape and very mountainous, one of its summits rising 2248 ft. above the sea. Its principal products are corn, oil, honey, and wax. It also feeds a considerable number of goats. On its W. coast are the ruins of ancient Samothrace.—3. (*Samoethrace*, or *Samoethrace*) One of the smaller Ionian Isles, 6 m. W. Corfu, and about 8 m. long.

SAMOYEDS, or **SAMODENS**, a people inhabiting the shores of the Arctic Ocean, from the mouth of the Peleorus in the N.E. of gov. Archangel, to the Gulf of Khatanga, in the N.E. of gov. Yanktisk. They consist of three principal tribes, speaking different dialects. Their origin is unknown, but they are supposed to have come from more S. regions, and have been erroneously confounded by the Russians with the Laplanders whose country called in the Lapland tongue Samandis, has probably given them their name. They are nomads, and live chiefly by hunting and keeping reindeer.

SAMOEZERO, a lake, Russia, in W. of gov. Olonets, 21 m. long, 7 m. to S.E., by 9 m. broad. It sends its waters into Lake Onega, by an affluent of the Sirena.

SAMPER-DE-CALANDA, a to. Spain, Aragon, prov. Teruel, r. bank Martin on a gentle slope between two hills, 45 m. S.E. Saragossa. It contains parish church, hospital, and two primary schools, and has manufactures of linen, dyewoods, a flour, a tanning, and several oil mills. Pop. 1828.

SAMPYRE a tn. Italy Piedmont, div. Coni, prov. and 17 m. W. S. W. Saluzza. It bank and in the most mountainous part of the valley of the Vnita. It is tolerably well built, containing a number of handsome houses, and a square faced with porticoes has a court of justice, a handsome parish church, a public school, and a charitable endowment. P. 4985.

SAMPFORD par. England—1, (Drumilly), Somerset, 1144 ac. Pop. 615—2, (Drumilly), Somerset, 933 ac. P. 246—3, (Groveport), Devon 1968 ac. Pop. 1084—4, (Groveport), Devon 1968 ac. Pop. 1084—5, (Laid), Essex 1890 ac. Pop. 471—6, (Fleet), Devon 2000 ac. Pop. 855—7, (Spence), Devon 1731 ac. Pop. 522.

SAMPSON (St.), par. Eng.—1, (or Poland) Cornwall 1470 ac. Pop. 335—2, (Lal. Guernsey) Pop. 3005.

SAMBOE, or **SANTS**, an isl. Denmark, near the middle of the Samsø Belt, 76 m. W. N. W. Copenhagen greatest length, N to S, 15 m. greatest breadth, about 4 m., area, 82 sq. m. Two bays Belvig on the W. side, and Florde on the E., which are only separated by a narrow isthmus, divide it into two unequal portions, of which the N. and far less, called Hørsholm, is hilly particularly along the N. W. coast, while the S. and larger is flat, and poorly provided with wood. The soil is very fertile, producing much corn particularly barley, and some pasture, and rearing a good many cattle. Samsø, with the small islands of Kyholn and Thunse annexed, forms a district of its own name. Pop. 5550.

SAMSON a vil. Hungary Thier Thelso, co. Bihar about 6 m. from Debrecen with a Protestant church. Inhabitant chiefly employed in agriculture, and though nominally living in a village named Samson occupy houses which are scattered over a considerable tract of country. P. 22 247.

SAMSON **SAMSON** or **SAMSON** a township in Amate Turkey push Straits, on the Black Sea, 166 m. W. N. W. Trebiseud lat. 41° 20' N. lon. 36° 25' E. At the E. extremity of the town, is a fortress now converted into a prison and at the W. extremity is a capacious government store. The houses, though small are well supplied with merchandises. About their centre is a stone building used as a retail market for the sale of manufactured goods and there are, besides it, several warehouses and large stone-built khans. The local consump-

SAMUGHEU, a vil. and com., isl. Sicily, div. Cagliari, prov. Sassari, on an affluent of the Tind, 21 m. E. Oristano. It has a fine marble-quarry. Pop. 1550.

SAMULOOTTAH a tn. Hindoostan, presid. Madras, dist. and 25 m. E. by N. Raghunumy, lat. 17° 4' N.; lon. 83° 17' E. It is a healthy station, and has been selected as the chief garrison-post in the district. Its old fort was levelled in 1835.

SAN, SAAR, or SANA, a river Austria, which rises in S. W. corner, circle Sambar in Galicia, in the N. slope of the Carpathian chain, near Sunka, on the borders of Hungary, flows N. W. to Sank and then by a long circular bend, first N. and then E. reaches Przemysl. Here it remains its N. W. direction, traverses a considerable portion of Galicia, and on reaching its N. frontier joins r. bank Vistula, about 8 m. below Sandomir. Its whole course is about 220 m., the first part of it as far as Przemysl over a rocky bed the narrow valleys, hemmed in by lofty precipitous mountains; the latter part of it through a level open country. Its chief affluents are, on the right bank, the Wisn and Ulanow; and on the left bank, the Olsza and Wialok.

SAN a river, Austria, Styria, rises in a valley near Mount Sals, on the frontiers of Styria, flows E. S. E. to Ollil, and then nearly due S. to its confluence with r. bank Sava. Total course about 50 m. It is much used, particularly below Ollil, and furnishes water-power to a vast number of saw and other mills.

SAN ALERMANDE a vil. and com. Italy Lombardy, prov. and so near the S. side of Brescia, as to be properly its suburb. It stands on a height, and contains a church with eight chapels. Pop. 2030.

SAN ANTONIO IN TEXAS. **SAN ANTONIO-DE BEXAR** (SAN) SAN BLAS, America. See Blas (San).

SAN CIPRIANO a vil. and com. Italy Piedmont, div. Genoa, at the confluence of the Rivoce with the Verda. It consists of an upper and lower part and has two churches, one of them a handsome structure, an old castle, and a Capuchin convent. Pop. 3048.

SAN-CRISTOBAL, a lake, Mexico, forming one of five situated in the valley, in the immediate vicinity of the capital.

It is to the N. of that of Texcoco, into which it discharges itself, having a level of 12 ft. 8 inches higher, and covers an area of nearly 4 sq. leagues. A dam divides it into two basins—a N. called the Laguna de Xaltocan, and a S. called properly San-Cristobal. It contains several islands on two of which, in the N. division, the villages of Xaltocan and Texcoco have been built. The village of San-Cristobal stands on the S. shore.

SAN DANIAHO, a vil. and com. Italy Piedmont, div. Alessandria, prov. Voghera; with a church situated in a central square, and an oratory P. 1160.

SAN DAMAZIO, two places, Naples—1, A vil. and com., prov. Avellino-Ultra II. 11 m. S. E. Aquila; with three churches. Near it sheepskin and cotton abound. Pop. 2000—2, A vil.

and com. prov. Calabria-Citra, 18 m. N. N. E. Cosentino; with a R. Catholic and a Greek church, inhabitants almost all Albanians, for whose instruction and that of their countrymen throughout the kingdom, a college was founded in the vicinity by Ferdinand IV. Pop. 5040.

SAN DIEGO, a tn. California. See Diego.

SAN DOMINGO (SALADO) or; **San HAYTI**. (REPUBLIC AND CITY OF) See Santo-Domingo.

SAN DOMINGO, a vil. and com. dachy and 4 m. E. Parma, with a church, manufactures of tobacco and paper; and a trade in corn, wine, silk, and cattle. Pop. 2084.

SAN FELIX-DE-BAGALLA, a vil. Yucatan. See Bagallala.

SAN-FELIX-DE-LANERAS, a tn. Mexican Confederation; 2 dep. New Leon, 40 m. E. by E. Monterrey. Pop. 6000.

SAMSON. From a sketch by Dr. G. F. Smith.

tion of foreign goods here is trifling but as a place of transit it is of great importance. The country inland, and the districts along the coast to the E. and W. of Samson, yield wheat, barley, maize, rice, hempseed, humped, hemp, flax, hides, and bees wax, as well as large quantities of tobacco, and from the interior wool, silk, galls, gums, and grain are obtained. The roadstead is open, and reputed unsafe in winter by the native mariners, but foreigners entertain a more favourable opinion of it. Samson serves as an active coasting trade with Cochin-China. Pop. 3000.

SANTER, or **SANITVEL**, a tn. France, gov. and 30 m. N. W. Poissy, on a small affluent of the Marne. It has several courts and offices, a R. Catholic church, synagogue, and cattle; and manufactures of linen and leather. Pop. 2686.

SAN FRANCISCO-DE SELVA, a tn Chili. See **COPILLO**.
SAN FRUTUOSO, a vil and com Italy Piedmont, div and E Genoa, in the valley of Buegnone. It has a number of elegant mansions, belonging to the citizens of Genoa, and a handsome church. Pop 8700.

SAN GEXE (anc *Aquapertus*) a tn France dep Savoie situated at the confluence of the Givre with the Rhone, 18 m W N W Chambery. It is tolerably well built, and has several silk mills, silk forming the principal trade. Pop 1786.

SAN GIORGIO—1 A tn Italy Piedmont div Turin prov and about 18 m S W Ivrea, at the foot of a hill crowned by a very ancient castle. It is a handsome place consisting of several spacious streets and three public squares. Has a court of justice, a beautiful public walk about 1 m in circuit, four churches, and a superior school. Pop 9656.—2 A tn Sardina Sardinia, div Novara, prov Lomellina, in a plain between the Turpedino and the Agogna, about 7 m S E E Mortara. With a court of justice, a church, a convent, the only ones now existing in the province and a charitable endowment. Pop. 1634.—3 A vil and com. Parma, duchy and 6 m S Piacenza, in a plain on the Nure, here crossed by a wooden bridge. It has a fine old castle, a primary school and a trade in corn, cattle, and excellent wine. Pop 3407.

SAN GIOVANNI BATTISTA, a vil and com Italy Piedmont, div Genoa, close to Sciar-de-Poentes, beautifully situated on a hill covered with vines. It has a handsome church. P 1249.

SAN GIUSEPPE, a tn Italy Piedmont div Ivrea, prov Ivrea, not far from San-Giorgio. It consists chiefly of a large circular square, lined with houses and laid out in walks, with a handsome church in its centre. Pop 2461.

SAN ILARIO, a vil and com Italy Piedmont, div Genoa, mand Nervi, on a mountain slope. It has a parish church and a communal school. Pop 1345.

SAN LUDOVICO, a group of isls S America, S of Terra-del-Fuego, and about 30 m. from the mainland. It consists of a number of rugged islets and rocks, extending 6 m from N W to S E and much frequented by seals and sea-gulls. They can only be approached in very calm weather. lat. (middle) 52 S, lon 69 19' W (2).

SAN JACINTO, a river Texas. See **JACINTO**.
SAN JACINTO OCOINGO, a tn in Mexican Confederation dep Chiapas, on an affluent of the Usumacinta, 70 m N N E Ciudad Real. The inhabitants are chiefly employed in raising cattle, and cultivate cacao and corn. In the vicinity are some remarkable remains. P 8000.

SAN JOAQUIN, a river California, which rises in Tulare Lake and the Sierra Nevada flows first S W through a fine valley into open plains, then S W for about 80 m. and in flowing gradually N, joins the Sacramento after a total course of above 300 m. It is navigable for a considerable distance by vessels of 9 ft draught, and abounds with salmon and other fish.

SAN JOSE, a tn California. See **JOSE**.

SAN JUAN CHAMALA, a tn Mexican Confederation dep Chiapas, on the frontiers of Guatemala S. of Ciudad-Real. Pop. 4080.

SAN JUAN DE LA FRONTERA, a prov tn. and river Peru. See **CHACAPOTAS**.

SAN JUAN DE NICARAGUA, a seaport in Central America. See **GRATIAVIA**.

SAN MARINO, a republic and tn Italy. See **MARINO** (Bary).
SAN MARCO—1 A tn Central America state Salvador, cap. dist. and on a river of same name, sometimes called the Rihona, 80 m S E E San-Salvador. It is an ancient place, founded about 1530, and has many substantial and well built houses partly constructed of lava, quarried from streams which have issued from the volcano of San-Miguel, which stands at some distance to the S.W. of the town. The trade is wholly in Indigo, for the cultivation of which the district is celebrated. Pop. 9000 to 10,000. The volcano which rises from low level ground to the height of about 5000 ft, has a base of several leagues in circuit and has sent forth repeated discharges of volcanic matter at intervals of about 25 years, though none of serious violence have occurred in modern times.—2 A gulf, New Granada. See **MARCO**.

Vol. II

SAN PO, the principal river of Tibet. See **YANG TSANG** (No. 70).

SAN SALVADOR, a tn Cuba. See **BAJAMO**.

SAN-SALVADOR. See **SALVADOR** (SAN).

SAN SEBASTIAN—1, A city and seaport, Spain, cap. prov Guipuzcoa, on the side of Mount Urgull, at the extremity of a low sandy tongue of land washed on the E by the Urumea, here crossed by a bridge, and on the N and W by the Bay of Biscay and stretched to the wharfed only on the S by a narrow isthmus, 42 m N N W Pamplona. lat. (summit Urgull) 41 53' N lon. 3 19' W (2).

It is a place of great strength both by nature and art, being surrounded by walls vaulted by the sea though partly left dry at low-water and elsewhere defended both by outworks and by the castle of Mola placed at an elevation of about 430 ft on the summit of Urgull. It is built in the form of an irregular pentagon and having been nearly destroyed by a conflagration in 1813, when it was taken by the British, consists for the most part of modern houses, arranged with considerable regularity in spacious streets and squares. The more important public buildings, are the parish churches of San Maria and San Vicente both large irregular structures of three naves possessed of little architectural merit, a monastery, finely situated on a height overlooking all the other houses a suppressed monastery now converted into an arsenal a handsome courthouse with a Doric portico, navigation commercial, and elementary schools public baths, barracks, theatre, and civil and military hospitals. The manufactures comparatively insignificant, consist chiefly of cordage, stained paper, bear leather candles, and soap. The harbour is small exposed and difficult of access, and though once important has greatly decayed. Its principal articles are imports of colonial produce and salt-fish. San-Sebastian is a place of considerable antiquity and having by its early fortification become the key of Spain on the side of France, figures much

SAN-SEBASTIAN.—From London's View in Spain.

in all the wars between the two countries. Of the numerous sieges to which it has been subjected, the most celebrated, and at the same time, the most disastrous, was that of 1813 when being in possession of the French it was stormed by the British with a loss of about 5000. The victors suffered their laurels by fearful atrocities perpetrated, apparently without distinction, on French and foe, and the greater part of the town was laid in ashes. Pop 10,036.—2, A tn Castile, capital Guzmara, between three mountains on the E shore. It is tolerably well built, is well supplied with excellent water contains a parish church with three naves; a courthouse prison, primary school and suppressed convent; and has a good harbour, defended by two forts manufactures of tobacco, an active fishery, and a trade in fruit, wine, and silk. Pop 1694.—3 (de-see-Roya) A vil Spain, New Castile, prov and about 10 m from Madrid, near the Jarama. It consists of a church, courthouse, prison, and primary school. The inhabitants are almost all employed in agriculture. Pop. (agricultural) 1287.—4 A cape and bay, S America, E coast, Terra-del-Fuego, lat 53° 19' S, lon. 68° 10' W. The cape is a bold cliff headland of a dark colour, terminating land

which rises to a height of 1000 ft. above the sea. The bay, situated between the cape and Aramus Point, forms a spacious and well-sheltered harbour.

SANA is an Arabian, cap. Yonna, and residence of an independent prince lat. 15° 23' N; lon. 44° 31' E. 15 days' journey N.E. by N Mecca, and probably about the same distance due N Aden. This is on many accounts the most interesting of Arabian cities. Its undoubted antiquity, the superior civilization of its inhabitants, its vicinity to the ruins of the great dykes at Mareh, the ruins of which constitutes so important an epoch in Arabian history; the fact that it was a city of the Sabians whose commercial greatness may be traced back to the earliest ages of history, these circumstances all combine to render it an object of attentive inquiry. The valley in which Sana stands has an elevation of about 4000 ft. above the sea. It is 6 in to 9 m. wide, extending N. as far as the eye can reach. E. it is bounded by a ridge of mountains called Jabal Niham, rising about 1500 ft. above the plain. W. is the table land of Asmar about 1900 ft. in height, while S. it contracts into a narrow valley called Turk-el-Yemen (Yemen Road). On the summit of Mount Niham, E. of the town, are the ruins of a castle, popularly said to have been built by Shem the son of Noah. On the hill of Ghurudif lower down, stands a modern castle, state prison, mint, and other buildings inclosed by walls with towers and other defences. W. of the town again are two royal palaces and gardens, with their separate walls and fortifications. The city approached from the E. is entered through the suburb called the Bar-el Asah, in which is the Jews' quarter. The stranger on entering Sana is agreeably struck by the width of the streets, and their comparative cleanliness. A well-informed traveller (Dr. Seetzen) has declared that Sana is in many respects the handsomest city in the East. The houses indeed are crammed close together but they are massive, lofty and well whitened or painted. In his opinion, Constantinople has no advantage over Sana except in its mosques and minarets and even the 20 gardens of the latter city neatly inclosed and its streets paved it might be deemed pretty well according to the European standard. The wall inclosing Sana and the suburb of Bar-el Asah has a circuit of 5½ m. It has everywhere a mean appearance, being built of clay and in bad condition. The two palaces of the Imam with extensive gardens at the W. side of the city have

the E. side of the town, and is crossed by a neat stone bridge. On the E. side, at a little distance, flows a larger stream, the banks of which are covered with gardens and handsome villas.

Besides the Imam's palaces, Sana has several large public buildings, particularly baths and caravanserais, one of the latter of which, the Bimarsa-el Mahdide, is three stories high and a handsome edifice. There are 10 minarets and a great many mosques the smaller of which built by the Turks are the most adorned. An aqueduct, which supplies the city with water from the mountains on the E. is also of Turkish origin. Sana is said to have been anciently called Oud, or Uad, after its founder the son of Shem (Sennas x. 57), and the Jewish quarter while it was still a separate village, and not joined to the city by an inclosing wall, preserved the name of Oud. But at present there are few or no monuments of early age, or remains of ancient buildings in Sana. Building materials and space are so valuable, that ruined walls are speedily removed. A recent traveller (M. Arnaud) saw stones, with inscriptions built into a fireplace and into a doorway. Similar stones seen by Mr. Gutzlaff, who copied the inscriptions (amongst Hanyarib) had been brought from Mareh, five days distant, to the N.E.

The climate of Sana is comparatively cold, owing to the elevation of the place, while the people in the Tehama go nearly naked, the peasants in the hills of Yemen wear sheepskin jackets, and in the capital the better classes wear furs. During winter the nocturnal frosts are severe. Sana is expected three times a year—in January when it falls in small quantity in June when the harvest is over and the sowing begins and again at the end of July when the rains are heavy, and the hill torrents, swelling suddenly cut off all communications. But the general defect of the climate is the deficiency of rain which sometimes fails for several years in succession. The long-continued drought, always accompanied by swarms of locusts, is then followed (as in 1880) by pestilence and famine, which tend to disperse the people, or otherwise to produce revolutions.

The chief people of Sana are the merchants, who are generally wealthy and live in good style. Comparing themselves with other Arabs, they may fairly boast of still surpassing the Sabians, whose merchants are poorer. To European visitors they have uniformly shown the utmost kindness and hospitality. Although, as Zeffel, they are forbidden to smoke yet in private they indulge in tobacco as well as wine. They constantly chew *khat* (*Coffea arabica*), an exhilarant much used in Yemen) which they offer their visitors with *kahr* or the infusion of the coffee-busk for strange to say, in the heart of the coffee country coffee is never taken as a beverage, being thought too heating. The *kahr* is said to be very palatable and refreshing. The lower class live chiefly on fruit, peaches, apricots, plums, &c. which are abundant. There are said to be 20 varieties of the grape at Sana, ripening at different seasons, so that fresh grapes may be had there throughout the year.

The artisans in Sana are mostly Jews, who number about 2000 and live in a quarter appropriated to them exposed to much insult and extortion. They are the gold and silver smiths, they make the wine, distil the brandy and manufacture the gunpowder consumed in the country. Though much oppressed they are by no means indigent, and are on many accounts an interesting people. The Banyans in Sana are comparatively few, not above 150 perhaps, and are also subject to heavy exactions, yet they have the reputation of being extremely wealthy.

The staple article of trade in Sana is coffee, which does not grow, however, on the high land round the city; the nearest place in which it ripens thoroughly is Hiddah, a short day's journey to the S.E. Since the Turks have taken possession of Mecca, the coffee is warehoused in Sana, instead of being sent as hitherto to the former place. Dried fruits and raisins, especially of the stamless kind, called in the East *al-mahmal*, fine salt from Mareh, some camellins, gunpowder, and a few sword-blades of very inferior quality are the exports. The imports are chiefly piece goods, Persian tobacco, and dates from Tehama, with a great quantity of thread or twist for

THE IMAM'S PALACE AT SANA.—From Col. G. S. S. 1880.

their separate walls and fortifications. The larger is called Bostan-el Sultan, or the Sultan's Garden; the other which is the more ancient Bostan-el-Matawakkil (from the Imam's title *Matawakkil* which he who trusts in God). They are built of hewn stone and covered with a gray plaster and have the cornices and windows whitened. Fountains, which ornament all the good houses in Sana, are not wanting in the palaces. In many of the houses the place of window-glass is supplied by small plates of alabaster joined neatly together, but the windows of the higher classes are of fine Venetian stained-glass. A small river, dry in summer runs N through

weaving Glass is in great demand, and is supplied through Egypt. The duties on importation are little more than nominal.

The Imam of Sana keeps what may be called great state. He goes to the mosque on Fridays in splendid procession the gates of the city being closed in the meantime. But his real power is now much very low. A great number of the sheikhs are nominally dependent on him, neither pay him tribute nor hearken to his commands. The Turks, taking possession of the Tahrirah, have deprived him of his seaports, and greatly impaired his revenue, so that the ruler of Yemen is hardly able to maintain a force of 2000 men. In 1888 the Imam Ali Mansur was deposed by a sudden revolution, directed by his uncle Sidi Khamar, who succeeded to the sovereignty power.

About 5 m N W of Sana is the village of Bahah, which is much more clean and elegant than the city being the residence of the chief merchants, who retire to their country houses when the business of the day is over. Five miles W of Bahah is Wadi Dhar distinguished like the former for the excellence of its gardens and vineyards. The vines are trained on trellis-work 4 ft. high and cover a great extent of ground. The town of Jash, half-way between Bahah and Sana, supplies with vegetables the market of the latter place. Each of these towns or villages is governed by an emir who levies the taxes in the name of the Imam. The population of Sana and its suburban dependencies has been estimated at 70,000 souls of whom 40,000 live within the walls of the city. Could direct communication and intimate relations be established between Sana and Aden the results would not fail to be highly advantageous to both.—*Deborah's Travels in Arabia, Constantin, in Jour of the Royal Geo. Soc. vol viii; Wolf's Missionary Journey*

SARAHUA a town Spain Catalonia prov. and about 41 m N N E of Gerona, on the Riera di Sana. It is in a very elevated state, many of the houses having been ruined during the last civil war. It contains a church, an old Episcopal palace, a primary school, and an hospital and has a trade in corn, wine, oil and wool. Some suppose the town to be the ancient Aleranaga mentioned by Livy. Pop. 1087.

SARGLLO, a vil Spain prov. and about 80 m from Leon; with a church a primary school manufactures of linen and a trade in corn and cattle. Pop. 1089.

SANCERRE (anc. *Sarum* *Sarum*) a town in France, dep. Cher situated on a hill covered with vineyards, 39 m N N E Bourges. It is for the most part poorly built has irregularly steep streets, almost inaccessible to carriages a good promenade, three tolerable squares several churches, a college and hospital a court of first resort, a communal college, and agricultural society, manufactures of hosiery and leather, and a trade in corn wine, walnuts, cattle, wool and marble obtained from neighbouring quarries. P. 2818.

SANCOINS (anc. *Fremaux*) a town in France, dep. Cher on the canal du Centre, 34 m S E Bourges with a trade in corn, wood, cattle, and gypsum. Pop. 1487.

SANCREE, or **SANCERY**, par Eng Cornwall 4471 ac. Pop. 1884.

SANCT LEAS a vil. Baden circle Lower Rhine near Philippsburg with a church. Pop. 1372.

SANDTON, par Eng. York (E Riding) 4706 ac. P. 619.

SAND LAKE, a vil and township, U. States, New York on the Postenkill and Wynnemkill creeks, 9 m E Albany with woollen and cotton factories, glass-works, a tannery, and several mills. Pop. 8568.

SANDA, an isl. Scotland, about 5 m. off S.E. extremity of the peninsula of Kintyre, co. Argyll, 1½ m. long, and ½ m. broad. There is a good natural harbour between the island and the main. It contains the ruins of an old chapel dedicated to St. Columba. Sanda was a common place of residence of the Scandinavian fleets. Pop. 28.

SANDALL (Dzert), a vil. and par England Yorkshire pleasantly situated on the S. side of the vale of Calder 2 m. S.E. Wakefield. It has a handsome church with a square embattled tower an endowed school, some remains of an ancient castle which figures in English history, coal mines, and freestone quarries. Area of par., 7773 ac. Pop. 4038.

SANDALL (Sand), par Eng York (W Riding), 990 ac. Pop. 329.

SANDALWOOD ISLAND, or **JAKEDANA**, a large isl. Indian Archipelago, S. Flores lat. (E. extremity) 10° 0' S

lon 126° 45' E. about 100 m. long by 80 m. broad. The S. point of the island terminates in a peninsula, almost as high and apparently as inaccessible as the rock of Gibraltar, leaving a spacious bay on each side of it. The other coasts of the island are generally bold, and no soundings are got until near the shore in some places. Edible birds-nest, bees wax and sandal-wood are obtained here. The natives are described as treacherous and ferocious.

SANDAU a town Prussia, gov. and 49 m N N S. Magdeburg on the Elbe. It is walled has a Protestant church, tile-works some shipping trade, and several mills. 1 1968.

SANDAU, or **ZIANDOW** a town Bohemia, circle Leitmeritz, near Pölnitz, with a church, an hospital tile-works and a mill. Pop. 1076.

SANDAY, or **SANDA** an isl. Scotland one of the Orkneys, lying open on the W. to the Atlantic Ocean and separated on the N. and E. by the Ronaldsay strait from the island of North Ronaldsay and on the S. from that of Burray, by a strait of about 2 m. wide, interspersed with several islands lat. (True sea, on E coast) 59° 13' N. lon. 2° 18' W (N). It is very irregular in shape having a length of 13 m. with a breadth varying from ½ m. to 3 m. has deeply indented coasts and a very black and generally barren surface. Pop. 800.

SANDBACH a market town and par England co. and 34 m. E by S Chester on an eminence, at the foot of which flows a streamlet called the Wheelock. It is amply supplied with water of excellent quality and is lighted with gas. The houses are mostly of red brick, and well built and in the market-place there are two antique obelisks. Sandbach possesses a handsome church in the Perpendicular style chapels for Primitive Methodists, Old Methodists, Wesleys, and Calvinists a spacious grammar-school in the early English style a national small British and other schools several charities including an extensive one called the Burdett charity. Boots and shoes are manufactured here to a considerable extent, though much more limited now than formerly. There are two large factories for silk throwing employing about 600 hands and several salt-works are carried on at a short distance from the town. Pop. (in) 2752. Area of par. 18 610 ac. Pop. 8533.

SANDGROFT par Eng. Sussex. See **YEMMAM**.

SANDHOL (Bary or Azy) a town Austria, Galicia, circle Sandomir, on the Poyad, here crossed by a long wooden bridge, 154 m. W S W Lemberg. It has a deanery church a castle an educational institute, a nunnery, and a female school. Pop. 3060.

SANDELPAY one of the Barra isls., Scot. See **BARRA**.

SANDERS LHPN a town Anhalt-Dessau, a bank Wip per, 28 m W S W Dessau entered by four gates, with a castle townhouse church, synagogue and hospital gymnasium and lime kilns and several mills. Pop. 1779.

SANDLESTEAD par Eng. Surrey 8600 ac. P. 615.

SANDFORD a vil. and par. England, co. Devon, 2 m N N W Crediton with a neat church surmounted by a low square tower and an annual cattle-fair. Area of par., 7738 ac. Pop. 1970.

SANDFORD (Ordnance), two pars Eng. —1, Oxford 1600 ac. Pop. 528 —2 Somerset 1091 ac. Pop. 940.

SANDGATE, a maritime vil. England, co. Kent, 1½ m. W by S Folkestone. It is pleasantly and healthfully situated on the shore with hills immediately behind it. It contains principally of one long street formed by irregularly built houses with a neat cruciform chapel and a place of worship for Wesleyans. It is now much resorted to as a sea bathing place. Upon the heights above it is Sherborne camp.

SANDHURST, three pars. England —1 Co. Berks about 5 m. S. by E. Wokingham famous for its royal military college, which is a simple but majestic structure with a fine Doric portico, situated in the midst of extensive and picturesque grounds, and capable of accommodating 400 cadets, who here receive a complete military education area, 4652 ac. Pop. 615 —2 Gloucester 2227 ac. Pop. 494 —3 Kent, 4382 ac. Pop. 235.

SANDIACRE a vil. and par. England co. and 9 m. E Derby on the Erwasch and Derby canal, with a very ancient parish church, finely seated on a height; a Wesleyan chapel, and manufactures of starch and lace. Area of par., 1420 ac. Pop. 1055.

SANDIGLIANO a vil and com Italy Piedmont, div Turin prov and A.S. Buila. It was originally defended by two castles and has a handsome church. Pop. 1106.

SANDOMIL, a tn and par Portugal prov Beira-Baixa com. Cas. about 27 m. S. Viseu. Pop. 1401.

SANDOMIR, or **SANDOMIR**, a tn. Russian Poland on the Vistula, 56 m. S.W. Lublin. It is surrounded by a wall and fence, entered by six gates. It has an old castle, seated on a rocky height, a collegiate church, four monasteries with churches, a synagogue, a gymnasium and a considerable general trade. Pop. (1841) 3279.

SANDON three pars Eng. —1 Essex. 2378 ac. P. 536. —2. Here 1843 ac. Pop. 770. —3. Bedford. 8640 ac. P. 556.

SANDOWA or **SANDHAW** a vil and fort, B. E. shore, Isle of Wight on a bay of mussel muss which sweeps round in a beautiful curve. A castle was built here in the reign of Henry VIII but the encroachment of the sea threatening its destruction, it was taken down and its materials were employed in building the present fort, which defends the part of the coast most accessible to an enemy.

SANDOWY a tn British India prov and 175 m. S. E. Aracan lat. 18° 10' N. lon. 94° 5' E. This place has been selected as a head-station for a British corps, on account of its reputation for salubrity some years ago it was unsuccess in extent and population.

SANDRIDGE par Eng. Herts 576 ac. Pop. 884.

SANDRICHAN par Eng. Norfolk 1172 ac. 1 60.

SANDRITING and **ATTREING** par Scot. Shetland 10 m. by 9 m. Pop. 2603.

SANDUSKY a tn 1 State Ohio on a sandstone ridge, R. side of Sandusky Bay opposite to the point where it opens into Lake Erie and at the common terminus of several important lines of railway about 100 m. N. Columbus. The town built on ground rising gradually from the water, commands beautiful views of the scenery of the lake and is laid out with great regularity in spacious streets, a large square and substantial and elegant houses composed of the fine sand at once, if which the whole site may be considered as an inexhaustible quarry. The principal public edifices are five handsome churches, and an academy occupying a large and commodious building three stories high. Its most important industrial establishments are building yards, in which a great number of sailing vessels and steamers are annually constructed, and extensive iron-works, chiefly for the manufacture of iron articles connected with railways. The trade is very extensive, the position of the town giving it a large share of the transit both in passengers and goods, between the N. E. states and the valley of the Mississippi. To accommodate this traffic, several elegant hotels and wharfs, lined by large warehouses have been erected. Pop. (1850) 6048.

SANDWICH a vil and township, U. States, Massachusetts, on Cape Cod Bay 33 m. S. E. Boston, with which it is connected by railroad. It has four churches, an academy and an extensive glass-manufactory. Pop. 4536.

SANDWICH a man and part bar and market in one of the Channel ports England, co. Kent, r. bank 46 m. or about 2 m. from its influx into the sea at Pegwell Bay 65 m. S. W. London and on the South-Eastern railway. The streets are narrow and the houses many of which are ancient are irregularly built: part of the old walls, and one of the gates, are still standing. It has an ancient guildhall, a commodious jail assembly rooms, and a custom-house, an ancient and spacious church places of worship for Baptists, Unitarians, and Wesleyans, a free grammar-school, a national school and several churches. Woollen-draping and silken-draping are carried on to a considerable extent. There are also several large breweries malt-houses, and ten yards. Some coarse tawelling and sackcloth are made. The harbour has been neglected and is at present so choked up with sand, that small vessels only can enter it. It retains some small foreign trade with Norway, Sweden, and the Baltic for timber and iron, and a home trade with London, Wales, Scotland, and the N. Sandwich goes by the title of Earl to the family of Montagu and, in conjunction with Deal and Walmer sends two members to Parliament. Pop. 2966.

SANDWICH a tn. Canada, West, co. of Essex, on the Detroit, nearly opposite to the U. States town of that name, occupies a fine elevated ridge and has a very pleasing appearance most of the houses having neat gardens attached to them. It

has Episcopal Methodist, and R. Catholic churches, and several schools. Pop. (in) about 501 township (1862) 4928.

SANDWICH, two isls B. Pacific —4. One of the New Hebrides, lat. (S. E. point) 17° 55' S. lon. 168° 25' E. It is about 30 m. N. W. to R. E. presents a beautiful appearance, is moderately elevated and has a productive soil yielding bread-fruit, cocoa nuts, bananas, and sugar-cane in abundance; many varieties of fine timber, and several good harbours, particularly one on the W. side, which is spacious, of easy access, and sheltered from all winds. The natives are cannibals, and supposed to be treacherous —5. An isl. nearly equidistant from New Hanover and New Ireland, being separated from the former by a channel 7 m. broad lat. 2° 55' S. lon. 150° 44' E. It is about 17 m. long, is N. E. to W. S. W. of moderate height, wide towards its E. end, and narrow towards its W. end, which terminates nearly in a point. It is well covered with wood, and appears to have a fertile soil, affording subsistence to a large number of inhabitants. On its N. part is a remarkable peak, in the form of a sugar-loaf, corresponding to another of similar form on the opposite coast of New Ireland.

SANDWICH ISLANDS, or **HAWAII GROUP** situated in the N. Pacific, between lat. 18° 55' and 22° 20' N. and lon. 154° 50' and 160° 40' W., consist of 13 islands, which extend in a curve from N. W. to N. E. Five of them are more or less all the other eight are uninhabited, but only four are of considerable size. They are all high, steep, and mountainous with many lofty summits which are entirely of volcanic origin but, not being protected by barrier reefs except in one instance, are almost destitute of good harbours. Hawaii the most E. and largest of the islands is particularly elevated on its W. coast. These, overhanging a narrow arid beach, rise into steep, black volcanic mountain slopes which only in their upper parts become wooded and afford cultivated ground to maintain a considerable population on the other coasts the slopes are less rapid, the shores spread out into wider plains and the valleys opening from them contain much fertile soil. The interior of the island forms a plateau from 3000 ft. to 4000 ft. high, and is almost entirely covered by thick forests, partly razed over by herds of wild cattle. Above the plateau rise three volcanic peaks, still active the loftiest 12,800 ft. high. Of Mauna-Loa, one of these peaks, a great eruption took place in 1822 when a column of molten lava was projected into the air to the height of 500 ft. The lava formed in some places a river 1 m. wide and filled up ravines 100 ft. deep, and 300 ft. deep. The altitude of the eruption was about 10,000 ft. above sea-level. The second island, Maui W. from Hawaii is no less mountainous, and consists of two peninsulas connected by a flat isthmus, the one on the W. with hills of only moderate height, and a fertile soil while the other runs to the height of 10,000 ft. (Oahu the third large island, has in its N. part two summits rising from 3000 ft. to 4000 ft. but the whole of this N. part consists of a large and fertile plain forming the best cultivated and most populous district of the whole group. On its N. shore, a wide barrier-reef contributes to form the excellent harbour of Honolulu. Kaula, the fourth large island, resembles Hawaii in its formation, and has an elevated plateau with mountains rising from it to the height of 7000 ft.

The inhabitants of the group belong to the light-coloured Oceanic stock, and bear a very close resemblance to the other Islanders of the Pacific, particularly the Tahitians, in bodily appearance as well as in customs and modes of life, though in none of the other groups has civilization made so decided progress, and produced more abundant fruits. In 1823 the number of free schools was 635 and of scholars 15,462. The islands were discovered by Cook in 1778 and though that distinguished navigator afterwards lost his life by the natives at Hawaii, they from the first manifested a decided inclination to live on friendly terms with Europeans and a peculiar aptitude for understanding and adopting European manners and arts. They also gave a welcome reception to the Protestant missionaries sent among them, and voluntarily exchanged hostilities for Christianity. The benefits thus obtained have been successively interfered with by the intermeddling of Polish priests whose alleged ill usage by the natives has furnished the French with a pretext of demanding redress, and thereby endangering the independence of the native government, though the monarchical principle was more

fully recognized in it, and less hampered by the influence of powerful currents, than in most other islands of the Pacific. The advantageous position of the Sandwich Islands making them a kind of connecting link between America and China, led to the early establishment of numerous European and American settlers, and the rapid rise of a very extensive trade. To the three principal whaling-grounds of the N Pacific—one on the Equator, another near Japan, and the third toward the Aleutian Sea—they form a kind of common centre to the ships passing between them and hence Honolulu, the capital of the group, promises to become the entrepot of the N portion of the great ocean. One very remarkable circumstance connected with this group is the rapid decrease of its population. Capt. Cook estimated it at 400,000. Probably 800,000 would have been nearer the truth. In 1833, within the course of half a century it had diminished to 140,000. An actual census in 1832 gave only 130,810, and another in 1836, 108,579. In a census of 1853 the population numbered only 78,157. The decrease has thus continued without interruption since the islands were discovered and independent of the census, is proved by the quantity of rubbish land now occupied but now lying waste from want of hands to cultivate it. One cause of decrease is the number of young men who leave the islands in whalers and other ships, and never return, but the main cause appears to be the prevalence of measles, hooping-cough, and similar diseases by which in 1846, called significantly the year of death, 10,000 persons are supposed to have lain out.

SANDWICK par Scot Orkney 6 m. by 4 m. P 1107
SANDY, par Eng Bedford, 4010 sq. Pop. 1948

SANDY a lake, U States, W S Lake Superior in the Wisconsin territory. It is about 80 m. in circuit, receives the Neversink on the E, and discharges itself into the Mississippi not far from its source.

SANDY three rivers N America.—1 Upper Canada, falls into Lake Superior 90 m. E Cape Chatham.—2 (Dig) U States, rises in the Laurel Mountains, and forms part of the boundary between Virginia and Kentucky and flows N N W into the Ohio 40 m. above the Susquehanna. It has a course of about 180 m. and is 200 yards wide at its mouth.—3, (Little), U States, Kentucky falls into the Ohio.

SANDY BAY v. U States, in the Land 1 bank Derwent, co. Buckingham. It is low and straggling, but contains several neat residences with well cultivated farms and gardens.

SANDY HOOK a sandy (al) or promontory U States, New Jersey 6 m. long by 2 m. broad near the entrance to New York Bay. There is a lighthouse on it.

SANDY LUCK, a river, U States, which rises in the N W of Pennsylvania, flows S W and joins I bank Allegheny after a course of about 70 m.

SANDYMOUNT a maritime vil Ireland co. and 8 m. S E by E Dublin. S coast, Bay of Dublin. with about 100 houses, many of which are handsome, and a church, in the Anglo-Norman style, of recent erection. The neighbourhood is much frequented in summer for sea-bathing. Pop. 1419

SANFELICE a vil and one Italy Piedmont div Cune prov and 12 m. N Alba with two squares several elegant mansions and several churches. Pop. 1719

SANFRONT a vil and one Italy Piedmont div Cune prov and 7 m. W Saluzzo, in a valley r bank Lo. with a court of justice, a church, a confraternity and a charitable endowment. Pop. 4115

SANG-HOI or **TONGHUN BYEN**, India. See **TONGHUN**
SANGALHOB, a tn and par Portugal, prov Douro, com and 12 m. E Avaro r bank Agueda. Pop. 2150

SANGAMON a river U States, issues from a lake in E of Illinois, flows S W, then circuitously N W passing this town of Springfield, and joins I bank Illinois after a course of about 160 m. partly navigable.

SANGAR, or **TOWAK**, a strait communicating between the roan ocean of the N Pacific and the Sea of Japan, and separating the island of Nippon on the S from that of Yesso on the N. At its E. entrance between Cape Ekoro and Jesso in Yesso, and Suruga-bay, in Nippon, it is about 37 m. wide Matsuyama or Matsuno, the capital of Yesso, is situated on a bay at its N W entrance.

SANGAY a remarkable volcanic mountain S America, in the Cordillera of the Andes, state Ecuador, about lat 2° 7

S. It has a height of 16138 ft. and having been in a state of almost constant activity since 1738, has covered the surrounding district with lava and ash, making it almost sterile. **SANGREAL**, a tn. Prussia Saxony gov and 33 m. W N W Merseburg cap. circle, on the Elbe. It consists of the town proper surrounded by walls, with four gates and of two suburbs; contains two castles, two churches, two hospitals, and an orphan asylum has several courts and offices manufactures of linen, leather and earthenware, a copper-furnace, oil mill, and two salt-petre-works and a trade in corn fruit, and garden produce. Lignite is worked in the vicinity. Pop. (1848) 6238. The church, area, 234 geo. sq. m. is generally flat, though occasionally broken by a few low hills, is watered by the Unstrut, Selke, Gonna, Tyra, and the Wipper and is very fertile both producing much corn and rearing great numbers of cattle. Pop. 6238

SANGRE, or **SANGRE**, an Indian Archipelago, Celebes Sea, lat 8° 38' N. lon. 124° 44' E about 30 m. long by 10 m. broad. It is of moderate height in the N part, but mountainous northward where is situated the smoking volcano of Aboe. There is said to be a harbour on the E side formed by some adjoining small isles several of which are at a considerable distance from Sangre conspicuous to the S. part there are other islands. The W side is indented by several small bays, with soundings of from 40 fathoms to 80 fathoms about 1 m. and 2 m. off shore. Poultry, fruit, and vegetables are obtained here in abundance, and are readily exchanged for handkerchiefs, knives, &c. Pop. 12,000 Sangre is surrounded by about 40 small islands, called the Sangre Islands, some of which are inhabited.

SANGO a river Madagascar which descends from the range of mountains which traverse the island longitudinally flows N W and falls into the Channel of Mozambique about lat. 21° S. after a course of about 160 m.

SANGORA a maritime in Lower Siam on a bay W side Gulf of Siam lat 7° 10' N. lon 101° E from the sea the town has an imposing appearance from the numerous pagodas everywhere visible. It is divided into a Chinese, a Siamese, and a Malay quarter that inhabited by the Chinese being the centre of trade and containing about 1000 people There are many brick houses in the town, but built separate one from another each having its own private wall and the doors and windows being all covered with brick and mortar in order to prevent the spread of fire. The trade of Sangora is principally confined to junk and native vessels passing up and down between Siam and Siam r. Its exports are iron, dried prawns, and a little pepper.

SANGRO (anc. *Sugra*) a river Naples, rises in prov Abruzzo-Ultra II near Grotto flows lat 43.1 then circuitously E. enters Abruzzo Ultra in a N E. direction, forms part of the boundary between that prov. and Sanzio, and turning S W E. proceeds across Abruzzo-Ultra to its mouth, in the Adriatic, 11 m. N E. Ortona. total course about 80 m.

SANGUISA a tn Spain prov Navarro, 25 m. S E. Pampelona I bank Aragon in an undulating country. It has four large and three small squares streets generally straight and some paved a primary school an educational establishment, managed by Sisters of Charity in which there are about 200 girls a promenade on the banks of the river two churches, several suppressed convents, and an hospital Sanguesa is a very ancient and populous town Roman remains ruins and antiquities. Pop. agricultural 2412

SANGUIN, a river W Africa, Guinea, Gambia Coast, falls into the Atlantic about 110 m. N W Cape Palmas
SANGLINEFTU, a tn Italy gov Venice prov and 20 m. S S E Verona. It is well built and has two churches and manufactures of hats and a wool-walk. Pop. 000

SANKABER a tn Hindoostan prov Bijapur I bank Hurrumasey, 280 m. S S E Bombay. It is a place of considerable extent, and has a remarkable temple of Mahadeva to which the town and adjacent lands belong. On a hill above the town is the fortress of Wullughur.

SANKBY (Garrat) a vil and chapel England, co. Lan. on the bank of the Sankby, 8 m. W Warrington. It deserves notice for its canal which was constructed in 1755, and is the first which was cut in England for purposes of trade. P. 527

SANLUCAR-DE-BARRAMIDA a city and seaport, Spain, Andalusia, prov and 18 m. N Cadix, at the mouth on bank Guadalquivir lat 36° 45' N, lon. 6° 21' W amid a tree-

spacious square, with arcades on one side; a church, chapel, and rubens convent, a flour-mill and two glass works. Pop. (agricultural) 8180

SANTA GUZUELA a tn Sardinian States, div Alessandria, prov Voghera, with a court of justice, a church, and four centuries Pop. 2070

SANTA ROSA—1 A tn Chili prov Aconcagua 65 m E. by N Valparaiso, 1 bank Aconcagua. Pop. 6000.—2 A tn. Mexico, dep. and 40 m N. Coahuila and esteemed one of the most healthy stations in the department. It has fruit in abundance, and excellent water. Near it are some rich silver-mines. Pop. 4000

SANTA RÔ, or **CRICRIZ** a tn Brazil prov and 280 m W N W Bahia r bank São Francisco with a court of justice a church a primary school and a considerable trade in salt obtained from salt-mines in the district

SANTAELLA, a vil Spain, Andalucía, prov and 20 m. S-S W Cordova with a townhouse prison, ancient castle, two primary schools, a church, and several fountains some mineral sulphureous springs discovered in 1828 and much resorted to a brandy-distillery oil and flour mills, and potteries. Pop. (agricultural), 1948

SANTAFÉ a tn Spain Andalucía, prov and 7 m W Granada, a somewhat marshy plain in the vega of Granada. It has straight but badly paved streets a large square in the centre of the town, in which stand the town house, granary prison and hospital; symmetrically disposed two primary schools, a church of the Doria order with three naves and a suppressed convent. Santafo was built by Ferdinand and Isabella while besieging Granada, and the destruction of population was stopped here. It was also from this place that Columbus set out on his first voyage of discovery, after having at length obtained the royal sanction. In 1806 it was much shattered by an earthquake. Pop. (chiefly agricultural) 4172

SANTAGRÏ a tn Spain Isl Majorca 29 m S.E. Palma. It consists of about 1100 houses but in the N and S there is a great number of hamlets and mills scattered at short distances from one another which add greatly to the apparent length of the town. Near its centre stands an old fortress, which served as a protection against the frequent attacks of the Algerine pirates. It has a school for primary and advanced education, and an elementary school for girls a townhouse, prison, fish-market, flesh-market, and a solid and spacious church, brandy-distilleries, and flour-mills. Grain and frosts are exported. Pop. 5214

SANTA NDER, a maritime prov Spain bounded, N by the Bay of Biscay E by prov Biscay S.E. Burgos, S.W. Palencia, and W Oviedo area, 9408 sq m. It is surrounded on all sides but the W with lofty peaked mountains in which the Duero, Carra, Nansa, Sopa, Borsaya, and other streams take their rise and which abound in forests, whence timber is obtained for building and other purposes. Between them lie fertile valleys, which produce all kinds of grain especially maize, fruit, and vegetables, and afford pasture to every description of cattle. Besides mines of iron, argenteous lead, and other metals, there are various quarries of limestone marble, and gypsum, and in the neighbourhood of the capital Santander are beds of plastic clay. In different parts of the province also are found mineral-springs, some of which have considerable value. The principal sources of wealth to Santander are its extensive forests and iron-works, besides which a considerable number of people are employed in catching and curing fish, manufacturing leather cotton stuffs, implements of tillage butter, &c., but trade of all kinds is greatly hin-

dered by the want of good roads. The people of this province are sober peaceable, and industrious. They stand higher in point of education than most other provinces of Spain but have a marked tendency to litigation, arising perhaps from the minute subdivision of property. Pop. 194,000

SANTANDER (Portus Blendava) a city Spain, above prov 207 m N Madrid lat 43 39' N, lon. 37 41' W on the S. tongue of a headland and protected to the N by a hill in a large and secure bay in the Bay of Biscay, with good anchorage and shelter but which requires constant efforts to prevent the accumulation of deposits brought down by three streams which discharge into it. The mole is a handsome construction 700 yards long, with unfinished docks, embracing a circumference of 850 yards. Scarcely a trace of the ancient walls of Santander is to be seen, and the city now extends far beyond its circuit. It may be divided into the high and low town, and the latter into two portions the old and the new. In the more ancient quarter the streets are narrow and straight, and the houses lofty while in the modern the streets are spacious as well as straight, and the houses of moderate elevation but good architecture. There are 10 squares large and small, a townhouse and prison, theatre, stables, baths two public markets, three promenades and an elm-planted road surrounding the entire city. There is also a handsome hospital for the sick, an asylum for the indigent, a founding hospital a custom-house an educational establishment, called the Provincial Cantabrian Institute, with professors of mathematics, Latin, experimental physics and chemistry, natural history general history with that of Spain, religion and morals rhetoric and poetry French English, geography navigation commerce, and design a normal school, and numerous primary schools. Santander is a busy thriving and at the same time a cheap and well provided place, the fish both of sea and fresh water are plentiful and excellent. A line of steam vessels plies between Malaga and Havre which touch here as well as San Sebastian Coruña, and La Coruña. It has a cigar-manufacture in the suppressed nursery of Santa Cruz in which 1060 persons are employed and about 300 000 lbs of cigars are made yearly a sundry brewery cooperages fish curing establishments tanneries besides manufactures of refined sugar sugar-candy, wax and tallow candles, vermilion hats, &c. In 1847 834 vessels entered the port, tonnage 52 636 and 747 tonnage 59 914, cleared. The imports consist chiefly of sugar breadstuffs hides coffee dry-woods dried oil, wrought iron tin plates oil, rice, bar-torn figs and raisins &c. and the exports, of flour rice, hides, wheat, maize, nails, gypsum, pulses, kidney beans, brandy, &c. Santander has prospered at the expense of Bilbao for during the civil wars the merchants removed their establishments to this less disturbed district. Here, as in Bilbao, porters work is done by women. The bay and port were much esteemed in the early periods of Spanish history. It afterwards decayed into a mere fishing town, but rose when made a *puerto habilitado*, or port entitled to trade with S America, and it still supplies Cuba with corn from the Castles, bringing back colonial produce. Here Charles V landed, July 16, 1522, to take possession of Spain and from the same quay our Charles I embarked to quit Spain after his romantic visit to Madrid. Santander was sacked by Bonni in 1808. Pop. 16,221

SANTANDER, a river, Mexico, proceeds from some small lakes, state Zacatecas, whence it flows E. until it enters the state of Tamaulipas, where it runs N.E. then E. and falls into the Gulf of Mexico, lat. 23 46' N, lon. 93 6' W after a course of about 200 m. above 100 m. N. Tamaulipas.

SANTANILLA, or **SWAN ISLAND**, two isls. Caribbean Sea, at the entrance of the Bay of Honduras, lat. 17° 36' N lon. 83 50' W. They are situated on a bank of 5 fathoms, which stretches 5 m. to the W of the western island.

SANTA NEM, a tn Brazil prov Para r bank Amazon, at the confluence of the Tapajós. It is a well-built and thriving place, and has a considerable commerce with Para and the countries on the Tapajós and Amazon, and even with the towns in the valley of the river Huallaga in Peru, especially Tarpoto. Pop. 3000 to 4000

SANTARÉM (anc. *Prædium Jubaen*) a tn. Portugal, prov Entre-douro on the slope and crest of a rugged hill. r bank Tago, 46 m. N.E. Lisbon. It is divided into three

quarters and is generally well built but many of the houses have been allowed to become ruinous. It contains 13 churches, seven monasteries, two nunneries, a diocesan seminary, two Latin schools, an orphan asylum, a hospital and other benevolent establishments, and carries on a considerable trade with Lisbon, chiefly in oil grain and wine. There are many interesting antiquities in the town, and the district around is remarkable for its fertility. Pop. 7862.

SANTOPIHUA—A vil. and com. Belgium prov. E. Flanders, on the IJzer 21 m. S.E. Ghent. It has manufactures of linen, two flour mills and a trade in corn. P. 1333.

SANTOPIE, a river U. States. See **ATAPWA**.

SANTIERM—A river Italy rises in com. Florence Tus. cany flows E. then N.E. enters the Pomposa, and after a course of about 70 m. joins the Po di L. runs a little N. of the lagoons and 12 m. N.W. of the town of Comacchio.

SANTOPIE, an anc. dist. France which belonged to prov. Picardy and now forms the E. part of dep. Somme.

SANTOPIE—A vil. and com. Italy E. Piedmont, div. Novara prov. and 18 m. W. of Verceil in a fertile plain near the canal between Ivrea and Verceil. It is an ancient place, consisting of three square fort streets and a public walk, and has several churches, a college and superior school, a townhouse, and theatre. Pop. 4174.

SANTIAGO or **COMPOSTELA**—A vil. Spain Galicia, prov. and 32 m. S. Orense, picturesquely placed on an eminence, with an uneven and irregular site. The houses are generally three stories and well built, streets for the most part broad and paved. Many of the latter radiate from the cathedral, which occupies the centre of the city. It is a damp, old southern looking place. On the noble Plaza or square the bell rings take place and fireworks are set off especially on the day of Santiago (St. James the Elder) the patron of the city and of Spain. Among the public edifices are the cathedral dedicated to Santiago, completed in 1123, well preserved and very attractive; internal v. the episcopal palace, the hospital, a grand building; the townhouse built after the plan of the royal palace at Madrid with a fine equestrian statue of Santiago on its facade; the college of Fonseca, now suppressed; the enormous convent of St. Martin, partly overhanging a ravine, and with a fine garden; it was once one of the wealthiest of the Benedictine establishments; now it is a barracks and to chapel a parish church; the university, a heavy building with an ample portico but with a fine court in the simple Doric. In it are taught theology, jurisprudence and medicine. It is much frequented as the minor colleges have been suppressed and incorporated with it. There are altogether two colleges and 15 parish churches, various nunneries, numerous suppressed convents, which were plundered by the invaders in 1809 and now untenanted and ruinous, add to the melancholy appearance of the town. Clinics and pharmacies, public and ecclesiastical prisons, a granary, numerous schools for elementary and advanced education, with which Santiago is better supplied than any place in Galicia; a college of advocates, theatre and besides the hospital above mentioned various other benevolent institutions. The town is well supplied also, with provisions and fountains, and washed by two small streams the Sar and the Baralla; there are also mineral springs in the neighbourhood. It has manufactures of leather, numerous handlooms, flour-mills and many silversmiths, engaged in making great numbers of little prayer images, trinquets, and laces, as well as medallions of Santiago which are purchased by pilgrims. Santiago declined after the Reformation, which diminished the number of pilgrims, offerings, and legacies, and the removal of the captain general and the audiencia to Orense has completed the impoverishment, by taking away the military, the legal profession and clerical. Pop. about 36,000.

SANTIAGO several places, S. America.—1. A vil. Ecuador prov. and 150 m. N.E. Jenes-de-Buencorazon, at the junction of the Santiago with the Marañon. —The river, formed by the junction of the Puta, which rises near Cuenca, and the Zamora, flows E.S.E. and has a total course of above 240 m. —2. (Porto). A vil. Ecuador, prov. Esmeraldas, on the Santiago, 50 m. N. The river rises near Esmeraldas, flows N.W., and falls into the Pacific in Salinas Bay lat. 1° 30' N. total course, about 80 m. —3. A vil. Bolivia, dep. Chiquitos, 270 m. S.E. Santa-Cruz-de-la-Sierra. —4. A vil. Paraguay cap. dep. of its name 140 m. S.E. Assumption.

SANTIAGO, several places Mexico.—1. A vil. Lower California, on the Gulf of California, 40 m. N.E. Capa M. Lucas. —2. A vil. dep. Jalisco, 135 m. N.W. Guadalajara. —3. (San-Gratiano-de). A vil. Mexico, dep. Jalisco. See **TOLOPATLÁN**. —4. A vil. dep. Vera-Cruz, near Jalapa.

SANTIAGO a vil. S. coast, Isl. Tenerife consisting of very indifferent houses built of wood and mud with a parish church. The inhabitants live chiefly by fishing. Pop. 1067.

SANTIAGO or **ATITLAN** a vil. Central America, state and 30 m. N.W. Guatemala, on the shores of the large lake of Atitlan (which see) with manufactures of woollen and cotton goods and a trade in agricultural produce. Pop. about 2000.

SANTIAGO or **St. Jaco**, the largest of the Capa Verde Islands lat. (E. point) 16° 1' N. lon. 23° 26' W. (w.) about 35 m. long by 17 m. broad. It rises in the centre to 7400 ft. and although the coast presents little that is attractive, the interior country is exceedingly beautiful presenting numerous and fertile valleys. Fruit is abundant, including oranges, grapes, plantains, bananas, sour-sops, mangoes, apples, pineapples, guavas, guineas, sapodillas, papaw-apples, pineapples, melons, medlars, figs, and occasionally apples. Large crops of corn are also obtained. Vegetables of various kinds are abundant in their season. Wild guinea-fow are found in flocks, and there are wild-cats in the unfrequented parts of the island. Boats, turkeys, and pigs are very plentiful. From August to October is the rainy and sickly season excepting this period the wind is always N.E. and then the sky is clear and the sun very powerful. Pop. estimated at 20,000.

SANTIAGO two places, Cuba.—1. (de-Cuba). A vil. port in S.E. coast lat. 19° 57' 39" N. lon. 76° 5' 40" W. at the mouth of a small stream of same name. It is the oldest town of the island, is well built, consisting of a handsome square and a number of straight and regularly formed streets, lined with houses constructed for the most part of stone, is the seat of an archbishop, and has a fine cathedral, and several other churches, some convents and hospitals and a harbour which though difficult of access from being narrow and crooked at the entrance, is spacious and deep within and defended by several strong forts. Its trade is considerable, both with Europe and America, but has declined much since the rise of Havana. Pop. about 12,000. —(de-las-Vegas). A vil. 19 m. S. Havana. Pop. 5600.

SANTIAGO a prov. Chili extending from the Cuesta de Chacabuco in the north to the river Maipo and from the 6° about 120 m. long, and 114 m. broad. It embraces some of the richest valleys in Chili, and agriculture is here in a more advanced state than in any other part of the country. It yields in abundance every kind of grain, pulse, vegetables and fruit the grape, almond and olive grow luxuriantly everywhere, and require little or no care; they are among its most valuable productions. Hemp of excellent quality could be easily raised, but the cultivation of this plant being deemed less remunerative than that of many others it is grown only for the consumption of the district. Tobacco in like manner finds here a congenial soil and climate but as it happens that the state derives a large revenue from the monopoly of the article, its cultivation is strictly prohibited throughout the land, and all that is consumed is imported from foreign countries. The rearing of cattle is another lucrative branch of rural industry besides supplying the wants of the province, and that of Valparaiso, a large quantity of jerked beef is prepared for exportation to the mineral districts of the N. and indeed to every part of the coast. California, by opening a new outlet for the productions of this province, has done much for its prosperity and the railway now (1854) in course of construction, intended to connect it with Valparaiso and Aconcagua, will tend still more to develop its natural resources. Here are some valuable mines of silver and copper, iron lead and many other metals are found also, but the first two only are thought worthy the attention of the miner. The province of Santiago is supplied with foreign commodities through Valparaiso, which is also the outlet for its various exports consisting of grain, flour, pulse, hides, tallow, cattle, dry and preserved fruits, jerked beef, gold, silver and copper. The Maipo is a mountain torrent flows through the capital and, during the heavy rains of winter frequently overflows its banks, causing extensive and disastrous inundations; it loses itself in a sandy bed a little to the W. of the city and reappears, after a while, purified as it were, and free, in a

great measure, from the slumy matter it formerly carried with it by and by it unites its waters with those of the Mapocho, a stream issuing like itself from the Andes and like it, also swift and turbid. The latter traverses a great part of the province, and, after fertilizing the beautiful valley of Rancagua, suddenly turns W. towards the coast and ultimately falls into the Pacific a little to the S of Valparaiso. Within that portion of the Andes that runs through the province, it is to be found the stupendous peak of Tupungato, rising to the height of 22 000 ft. besides other mountains of nearly the same elevation. Within its limits, also, are the mineral waters of Collina and Apogando strongly impregnated with sulphur and much resorted to by invalids. Here were fought two battles against the Spaniards, celebrated in the annals of Chile: that of Chacabuco in 1817 under General San Martín, who obtained a complete victory; and that of Maipo, on April 5, 1818, under the same general, which proved still more fatal to the Spanish arms, and finally sealed the independence of the country. Principal cities—Santiago and Rancagua. Pop (1847) 307 484 (1866), 941 638.

SANTIAGO DE LOS CABALLEROS, the cap. city of the república of Chile and of above prov., is situated in a large and fertile plain at the foot of the Andes lat $33^{\circ} 40' N.$, lon $70^{\circ} 43' 88'' W.$ at an elevation of about 1500 ft. above sea level, and 90 m. E of Valparaiso. It is watered by the Mapocho, a rapid stream issuing from the Andes which divides it into two unequal parts connected together by a substantial stone bridge, the principal one being on the northern or right bank of the river.

Santiago was founded on February 12 1541 by one of the early Spanish conquerors, Pedro de Valdivia, who struck by the beauty of the spot, and the uncommon fertility of the soil resolved to fix here the metropolis of his recent conquest. At first he established his headquarters on San Gabriel a commanding point to the left bank of the river where he erected works of defence, both to guard against a sudden surprise by the natives, and to form a secure retreat in the event of future reverses. Nor was it long before the infant settlement was put upon its trial, for, during the temporary absence of the general, who had marched S with part of his followers the Indians suddenly fell upon it, and but for the strength of the position and precipitate return of Valdivia, all must have been exterminated. Valdivia, however, by a judicious course of tactics, contrived gradually to overcome the hostility of the natives and, by means of time, converted them into faithful and devoted auxiliaries, through whose active assistance he achieved the subjugation of the S part of Chile. Santiago soon emerged from its insignificance, and early became a populous and opulent city. But the jealous policy of Spain and the oppressive restrictions which she imposed on her colonies, naturally checked the progress of this, as of every other place subject to her dominion and it was only when Chile threw off the yoke of the mother country that it sprang into real and active life. From that time it has steadily and rapidly advanced by civilization, population and wealth, and it is now fully entitled to be ranked among the most important and flourishing cities in S. America. Few places on coast of a finer situation more delightful climate and grander scenery than Santiago. It is situated at the very base of the mighty Andes which stretch N. and S to the utmost bounds of vision rising in sublime grandeur before the spectator, like a great wall viti forming the confines of a world, its summits of dazzling white exhibiting a magnificent contrast with the deep shades below. To the W. of the city runs a parallel range of much less elevation consisting with the main chain upon which the natural boundaries of the plain of Maipo, in which the city is situated. The climate is at once genial and salubrious, and supports a vigorous vegetation, which includes every necessary and many of the luxuries of life. In a country like this, subject to a regular recurrence of droughts a plentiful supply of water is of great consequence and the Mapocho, by its copious and never-failing stream, affords it in the greatest plenty, not only for the use of the city but also for the purpose of irrigation to which it is largely applied. Large canals, fed from the Mapocho have been cut at great expense through tracts of land formerly mere barren wastes and what was before with out the least value, has become, through this means a perfect garden, teeming with all the varied productions of this

favoured clime. Much attention has of late been devoted to agriculture many improvements have been introduced, both in the mode of cultivation, and in the implements used in husbandry chiefly through the zealous efforts of a body styled *Sociedad de Agricultura*, whose labours in this respect cannot be too highly commended. The country immediately round Santiago is very well cultivated and is chiefly made up of small properties, or farms belonging to the wealthy with tasteful villas on them, where they generally go to spend the summer-months not a few of these are extremely pretty and fitted up in a style of comfort and elegance not often exceeded in similar residences in Europe. Santiago, like all Spanish cities in the New World is laid out in squares intersecting each other at right angles. Owing to the prevalence of earthquakes, which are much dreaded by the natives, the houses are seldom more than one story high and generally occupy a large space of ground having gardens and patios or courts in the interior intended to afford a refuge to the family on the occurrence of these dreadful convulsions. All the houses are plentifully supplied with water from the Mapocho. A better style of architecture has been introduced of late years, and many stately mansions are now to be seen fitted up with great splendour and elegance. The approaches to the city, particularly on the Valparaíso side, are exceedingly unpromising, the houses are mostly low, dirty and unwholesome, and the streets always deep with mud are wretchedly paved. On penetrating farther into the city matters gradually improve still it was but a century ago that Santiago did not deserve the appellation of a clean well paved or well-drained city. Santiago possesses very fine public walks. The Alameda, planned by the late General O'Higgins is truly a magnificent promenade of more than 1 m. in extent, consisting of three double rows of stately poplars, with a stream of running water between each imparting at all times a delicious coolness to the air. A fine marble fountain lately brought from Italy forms the termination of this charming walk. The Pajarito on the banks of the Mapocho, is nearly 3 m. in extent, and consists of an arrangement of solid masonry erected last century by one of the Spanish governors for the purpose of protecting the city from the floods of the river which previous to this time had occasionally swept away portions of it by overflowing its banks this is a very favourite walk in the winter-months. The view towards the Andes is here wonderfully unobscured; it embraces the grandest display of mountain scenery perhaps to be found in the world and towards sunset when the declining sun illuminates with a flood of golden light the mighty bulwarks of nature the spectacle is magnificent beyond all description. The hill of Santa Lucía, in the centre of the city commands a noble view of the place and environs and of the whole plain of Maipo the ascent is easy and the charming panorama which gradually unfolds itself to the stranger as he progresses upward amply repays him for any little fatigue he may have to undergo. Here is a small fort, and above it an observatory lately erected, where some scientific gentlemen from the U. States have for some years been prosecuting a series of astronomical observations. The Plaza, or Great Square is a large open area, adorned with a fine fountain on the N. side the old palace an irregular heavy looking pile formerly the residence of the presidents now used as barracks public prison and treasury the S. side is ornamented with lofty pinnacles, which, and in the neighbouring arcade, called Duinas Arcade are to be found most of the fashionable shops in the city, this is the favourite resort of the fair Santiaguinos particularly after mass in the morning when they are seen in their church dress so striking to a stranger and at the same time so appropriate and elegant. On the W. side stands the cathedral, a spacious and not particularly fine edifice, built of a coarse kind of porphyry successive shocks of earthquakes have seriously injured its walls and arches and in 2000 persons principally ladies were burned to death on Dec 8 1863 during a festival. The fire was communicated from the altar light to the chimney with the result that the building was profusely damaged and while it was crowded with worshippers. The Moneda, or Mint has a stately and commanding appearance here is an extensive counting establishment from which has issued all the coined money now existing in the country, a part of this large building is fitted up as a new palace for the president, and into offices for the ministers. Santiago is an archbishop's see, the

east of the supreme government, of the courts of law and of the legislature. It has also numerous churches and monastic establishments, two large and well-endowed hospitals that of San Juan-de-Dios for males and that of San Francisco-de-Asis for females. The inhabitants of Santiago are naturally affable and courteous, and are remarkably kind and hospitable to strangers, whom they readily admit into their circles. The children of the wealthy are all taught foreign languages, particularly French and Latin. All classes are remarkably fond of music and many have acquired a degree of proficiency in it, especially in older and more advanced countries. There are in Santiago eight printing establishments, one daily and one weekly paper besides other periodical publications. The university of Santiago, formerly San Felipe, obtained its first charter from the king of Spain in 1738. It was re-organized a few years ago and constituted into five faculties, namely philosophy, mathematics and physical sciences, medicine, law and theology. The Instituto Nacional (National Institute) is the oldest and best conducted college in Chile, and here are educated the children of the wealthy families destined for the learned professions. There are besides numerous private schools, where are taught the usual branches of education. The Military academy is a government institution for the education of young men intended for the army and navy, it is conducted on the French system and has done much to improve the personnel of both services. The Normal is also a government institution and is intended for the training of those destined for public teaching in the government schools. It is an tier for the superior levels of the number of students. The National museum is not extensive but contains a good collection of minerals, and many interesting specimens of the animal and vegetable kingdoms, particularly of such as are peculiar to Chile. There is a medical school, *Primeros cursos* for the special object of examining candidates for the medical profession. The national library contains upwards of 21,000 volumes, and which are numerous ancient and rare manuscripts. 1. 1800. 110. 377.

SANTIAGO DE LOS RIOS, *de Mendoza*, a town in a strategic position, 108 m. S. S. E. of San Juan and within 4 m. of the sea. It is regularly built, has many fortifications and other architectural remains showing its former importance. At one time it was a number of orchards producing export crops and the best peaches in the kingdom. 1. 1800. — *Incaes. Geo. do Reino de Portugal* 14. 11.

SANTIAGO DE LA LATA, *de Santiago*, a town in Spain, Andalusia, prov. and 18 m. from Jaen, with a church, courthouse, prison, primary school and a trade in corn. Pop. 1104.

SANTIAGO DE LOS RIOS, *de Estremadura*, a town in Spain, Estremadura, prov. and about 50 m. W. W. W. of Cáceres, near the Tagus, with a church, courthouse, primary school, oil and flour mills and a trade in corn and excellent cheese. 1. 1800. 91.

SANTIAGO DE LOS RIOS, *de Leon*, a town in Spain, Leon, prov. and about 70 m. from Leon, poorly built with a church, courthouse, prison, primary school, several flour-mills, and a trade in cattle. 1. 1800. 373.

SANTIAGO DE LOS RIOS, *de Leon*, a town in Spain, Leon, prov. and about 100 m. from Leon, and 10 m. from the sea, with a church, courthouse, prison, primary school, several flour-mills, and a trade in cattle. 1. 1800. 373.

SANTIAGO DE LOS RIOS, *de Leon*, a town in Spain, Leon, prov. and about 100 m. from Leon, and 10 m. from the sea, with a church, courthouse, prison, primary school, several flour-mills, and a trade in cattle. 1. 1800. 373.

SANTIAGO DE LOS RIOS, *de Leon*, a town in Spain, Leon, prov. and about 100 m. from Leon, and 10 m. from the sea, with a church, courthouse, prison, primary school, several flour-mills, and a trade in cattle. 1. 1800. 373.

SANTIAGO DE LOS RIOS, *de Leon*, a town in Spain, Leon, prov. and about 100 m. from Leon, and 10 m. from the sea, with a church, courthouse, prison, primary school, several flour-mills, and a trade in cattle. 1. 1800. 373.

SANTIAGO DE YAGUA, *de Yaguajay*, a town in Spain, Estremadura, prov. and about 20 m. from Cáceres, on a gentle height, between the Alagon and the Brucos. It is well supplied with water and has a church, courthouse, primary school and a trade in corn, oil and cattle. Pop. 1200.

SANTIPONCE, *de Ponce*, a town in Spain, Andalusia, prov. and N. W. Seville, near the bank Guadalupe, it is on the site of the Roman Iulia. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse and a trade in maize oil and molasses. Pop. 953.

SANTIPONCE, *de Ponce*, a town in Spain, Andalusia, prov. and N. W. Seville, near the bank Guadalupe, it is on the site of the Roman Iulia. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse and a trade in maize oil and molasses. Pop. 953.

their authority to him, leaving thereby the whole island under one government. The Haytiens governed the former Spanish colonies with great oppression. After twenty-one years of suffering under an iron yoke, the latter on the fall of General Royer declared themselves independent.

A number of young determined men, rose in the night of February 26, 1844, and having succeeded in driving the Haytian garrison into the island they proclaimed at the sun rise of February 27 the Dominican Republic. The Haytian troops were obliged to capitulate, and they were embarked for Port au Prince. The new president, Hérard Rivière marched with an army of 30,000 men upon Santo Domingo, but General Pedro Santana defeated him at Azua, and compelled the invading army to retreat within their own territory. The provisional Junta of the Dominican Republic framed now a constitution and elected Pedro Santana as first president. He was followed, in 1848, by General Jimenes. Souleque, the present (1854) emperor, then president of Hayti, attempted in 1849 anew to re-conquer the territory with an army of about 5000 men, but was signally defeated at Las Caobas, on the river Yoco, April 21 1849 by General Santana, who had only four hundred men under his command. For this great victory Santana received the title of "Libertador de la Patria," and pecuniary votes from the Congress.

General Jimenes the president of the Dominican Republic, not being fitted for his task, and the invading army having been driven out of the country, General Santana was called upon to restore order within the republic and to force Jimenes to resign. The latter refused and Santana laid the city of Santo Domingo which was in the possession of Jimenes under siege. After some bloodshed the consuls of Great Britain, France, and the United States, succeeded in inducing Jimenes to resign, and to embark with a number of his partisans on board of a British ship-of-war for Cap-Haïtien.

General Santana directed now the affairs until a new election had taken place, by which upon his recommendation Señor Bustamante Rias was named president. During his administration Rias succeeded in entering into treaties for the recognition of the republic and reciprocal commerce with Great Britain, France, and Denmark. The mediation of Great Britain, France, and the United States was likewise solicited to procure a peace with Hayti and the recognition of the independence of the Dominican Republic. But Souleque now emperor of Hayti has hitherto (1854) strenuously refused to recognize the independence of the Dominican while Britain and France have declared that on any invasion by Souleque of the Dominican territory they will blockade his ports. It may be likewise observed that Spain has not yet (1854) relinquished her rights upon her former colony, although her rights upon the constitution of the Dominican Republic is based upon that of Venezuela. The Congress, which under ordinary circumstances assembles annually consists of 15 deputies, three for each prov., who form the Lower Chamber or Tribunado, and five senators, one for each prov. constituting the Upper Chamber, or Consejo Conservador. The French mode of the Restoration has been adopted in legal proceedings, and for the maintenance of order. The executive power rests in a president, who must be a Dominican by birth and 35 years of age. He is elected for four years. The Dominican Republic claims for her possession the extent of territory as settled by the treaty of limits between Spain and France in 1777. The area comprises more than three-fifths of the whole island, and may be taken on a general estimate at 17 000 geo. sq. m. Consequently the territory is larger than the kingdoms of Hanover and of Holland and equal to Switzerland. It is divided into the following five provinces, which are subdivided into communes.

| Total | 142,000 |

Santo-Domingo is the largest city in the S., Santiago in the N.

The two principal ports are Santo-Domingo and Porto Plata, but it is probable that the Bay of Manzanillo (which see) will by and by outstrip Porto Plata. Among the towns and places in the interior the following deserve to be mentioned, namely Azua, where Hieronimo Cortes was a public notary, Concepcion-de las-Yemas for the proximity of Fort-Concepcion now erected by Christopher Columbus, and San-Carro where he erected a cross. The ancient town of La Vega, situated at the foot of Santo-Carro, was buried by an earthquake in 1684. It was afterward removed to its present situation on the r. bank of the Lanzo. Santiago-de los-Caballeros was founded by the desolate Indians in the company of Christopher Columbus. It lies on the r. bank of the river Yaco, and is the second town in the Dominican Republic. Besides these, Higüey, Seybo, San-Juan-de-Magüey, Noyba, Dain, San-Cristobal, Bayaguan, Monte-Plata, Caba, and Baya Caima are the place of refuge of Urruquillo, the last of the Haytian caesars whom Charles V. permitted to retire there with the miserable remnant of the indigenous race. The products in the S. provinces of the republic consist of the spontaneous produce of mangrove (of which Santo-Domingo furnishes the best in the world) satin wood, flax, lignum vite and brazil wood in prov. Seybo generally raised but by far the most important part is the cane, usually called the "Chao" where the staple article consists of an excellent quality of tobacco, of which according to the season 50 000 to 80 000 arrobas (1 cw. each) are produced.

The soil of the republic is suited for any tropical produce, but unfortunately a great indolence prevails amongst the generality of the inhabitants and the great advantages which nature has bestowed it remains undeveloped.

The following table exhibits the imports and exports, &c. of the Dominican Republic during the undetermined years —

STATEMENT OF THE NUMBER OF VESSELS AND TONS OF MERCHANDISE AND FREIGHTS OF THE DOMINICAN REPUBLIC, during the undetermined years

The revenue of the republic amounted in 1852 to 374,516 Spanish dollars (£78 0/4). The expenditure under ordinary circumstances amounts to about 250 000 Spanish dollars (£50,000). The republic owes no foreign debt. Unfortunately a deficit in currency is in circulation, which as it is not redeemable, is subjected to continual variation.

The effective army amounts to 12 000 men but in case of need 16 000 men may be raised. The republic possesses, moreover, three corvettes and five schooners, equipped as men-of-war and mounted with 41 guns.

The prevailing religion is R. Catholic, with an archbishop, who still bears the ancient title of Primate of the Indies, although he has not a single suffragan. Other creeds are tolerated. The R. Catholic inhabitants are superstitiously religious. public instruction is neglected even in the primary elements. — (Communicated by Sir Robert H. Schomburgk, K. R. M. General, Santo Domingo)

SANTO-DOMINGO more commonly, SAN DOMINGO, the capital city of the Dominican Republic, which includes the E.

San-Domingo, the usual form of the name in English works, is customary in Spanish provinces far through the south of the peninsula before the proper name of salute, yet the names Domingo, Tomas, Tunc, and Tordilla, form an exception to this rule.

part of the island Hayti, on the S. coast, at the mouth of the bay of San Juan. It is nearly in the form of a triangle, extending about 4 m. E. to W. with nearly the same maximum breadth and is surrounded by walls fortified with bastions. It is built with great regularity, consisting of numerous but mostly unpaved streets which intersect each other nearly at right angles, and are lined by houses the greater number of which are of stone and the remainder of wood. The houses have generally only one story flat roofs, and barred windows with projecting lattices. Some of the houses built by the early settlers in the Moorish style, are still standing. The most conspicuous public building is the cathedral, commenced in 1514, during the government of Don Diego the son of Columbus, and finished in 1540. It is a large and handsome Gothic structure, with a lofty roof supported by 14 massive columns and a richly ornamented high altar. The ashes of Columbus and his brother Bartholomew reposed in it for nearly two centuries and a half, but on the occasion of the island's France were removed to Havana. Besides the cathedral there are 14 other churches and chapel, out of the latter belonging to the Franciscans. The convents of which there were several are now in ruins. The largest and most celebrated that of San Francisco, during its greatest splendour contained 400 monks. Its extensive ruins form one of the most striking features of the city when approached from the sea. The other principal buildings are the natural palace where the Spanish governor used to reside and immediately adjoining it the ruins of Don Diego's palace the handsome modern building where the archives of the national archives are held the treasury or cabildo an ancient, neoclassical structure with Moorish arches and an old carved ceiling in its principal hall. The Jesuits college, now a ruin a few colleges indifferently attended a citadel with extensive barracks a well kept arsenal a military and a large hospital. Santo Domingo was founded in 1496, by Bartholomew the brother of Columbus, on the E. or left bank of the Ozama and here it was that Hernan Cortes and Columbus. In consequence of a great hurricane which laid the town in ruins in 1502 it was transferred to its present site on the right bank and advanced so rapidly that its history of its buildings.

REMAINS OF THE PALACE OF DIEGO COLUMBUS, SANTO DOMINGO.—From a Daguerreotype.

grapher Oviedo in describing it to Charles V in 1522, described it for the same of

the regularity of streets and the magnificence. The first blow to its prosperity was struck in 1586 by Sir Francis Drake, who took it by assault, pillaged and nearly destroyed it. The earthquakes of 1684 and 1691 ruined most of the magnificent buildings which Drake had spared. The spoils of the Haytiens during their occupation of the city from 1822 to 1824, deprived it of many of its most interesting monuments. Pop. settled at 10,000.

SANTOMERA a vil Spain, prov and 6 m. N.E. Murcia with two schools, a church and, outside, a cemetery and a hermitage. Pop. (chiefly agricultural) 3078.

SANTON HOUSE, par Eng Norfolk, 1500 ac. Pop. 84.

SANTONIA a small fortified town and resort, Sicily, on the Bay of Blatny and 19 m. E. of the city. lat. 37° 30' N. lon. 15° 19' W. at the extremity of its beautiful and extensive bay and at the foot of a hill which advances into the sea forming a peninsula, a position which gives it some resemblance to Gibraltar. It has a town-house, schools, lyceum, church, military hospital, custom-house, &c. and contains some ruins of the Roman period. The commerce of Santonia is considerable, as it is an outlet for the iron of Sicily. English

and French vice-consuls reside here. This is one of the best points of defence in the whole Spanish peninsula, and was strongly fortified by the French who were regularly supplied from France by sea. It capitulated in 1814. Pop. 725.

SANTORIN *Thera* or *Calistru*, the largest of a small group of islands in the Grecian Archipelago, about 60 m. N. Crete, and 10 m. S. Rio. It is in the shape of a horseshoe, or rather of a crescent, with its two extremities elongated and pointing W. The outer curve has a length of about 18 m. and the inner curve of about 12 m. thus making the whole circuit of the island about 50 m. Its width nowhere exceeds 3 m. and in some parts falls short of 1 m. The shores round the inner curve present frightful precipitous from 500 ft. to 1200 ft. high and coloured like iron-ores except where their summits are capped by a deep layer of pumice-stone. They are evidently the edges of a crater which stretches without interruption to the two terminating capes of Akrotiri and St. Nizolio and meets also at one time have been continued between these capes though the continuation is marked only by the conical island of Therasia and the little island of Aspro Nisi. Within the crater thus marked out, and not far from its centre, the three islands of Nea Kalloni Palaeo-Kalloni and M. Kalloni, are evidently of the nature of cones thrown up by the volcanic force. Accordingly as might be anticipated under such circumstances the water around these cones is at first seldom more than 50 fathoms but deepens rapidly as it recedes from them, till, at a short distance from the edges of the crater it varies from 150 fathoms to 200 fathoms. *Echinomeria*, *Murex*, and *Thera*, the principal towns of the island are built along the edges of these precipices and the houses many of them perched like eyries or excavated in the pumice-stone, have a very singular appearance. The access to them is by zigzag stairs or roads which have been cut in the sides of the precipices with immense labour. The N. part or the island consists entirely of volcanic substances the S. part is of limestone formation and in its highest peak, called the Crater of Zeus, attains the height of 1827 ft. above sea level. From the W. cliffs the island slopes rapidly E., N., and S. and in summer presents a very beautiful appearance consisting in fact, of one uninterrupted smiling vineyard. The principal product is wine, of which two kinds are made—*vino-brusco* a rough, or dry wine, resembling Rhensish and *vino-ambo*, a dark red very sweet and innocuous wine scarcely inferior to that of Cyprus. Of the former, the annual quantity is about 55 000 barrels of seven to the pipe of the latter 2500 barrels. The other principal products are barley vegetables or a sort of pea mutton eggs and cotton. Pop. about 14,850.

SANTOR a town and seaport, Brazil prov. and 40 m. S. E. São Paulo, on a height above N. shore of the island of King's-Guay. It is built for the most part of stone and contains two churches a townhouse arsenal two hospitals, and various convents, and has building docks and a harbour with depth of water sufficient for the largest vessels, at which almost all the exports of the province are shipped consisting chiefly of sugar rum rice, coffee raw hides tobacco, and cotton of all striped blue and white. Owing to the numerous swamps in the neighbourhood, *ague* is very prevalent.

SANTOS (Los) *San Matheo*, a town, Esp. Estradual prov. and 40 m. S. E. Rio de Janeiro. It has a townhouse prison, two public fountains, two primary schools, a suppressed convent, an hospital a church, and a chapel and near it a ruinous castle. Most of the inhabitants are engaged in tillage and there are four oil presses, numerous flour-mills, and two maize factories of carlin jars. Pop. 4150.

SANTUR, par. and in 1st Dublin 4726 ac. P. 1140
SANTUR, a village and com. Belgium, prov. and 10 m. N. W. Antwerp, a bank school with a church, primary school, a brewery tannery and several mills, and some trade in grain. Pop. 1874.

SANYIO [anc. *Saxones Ties*], a town, France, dep. Seine-Inférieure, 3 m. S. E. Havre. It has manufactures of earthenware, and brick and tile works. Pop. 2080.

SAZA, a town, Naples, prov. Principato-Citra, 13 m. S. La Sala, on a lofty hill with a convent, marble is quarried in the neighbourhood. Pop. 3260.

SÃO-BRASIL, a town, Brazil, prov. Maranhão 180 m. S. S. W. Alcantara, with a parish church. The cotton grown in the district is of superior quality.

SÃO-BERNARDO, or *Roubaix*, a town, Brazil, prov. and 50 m. E. S. E. Ceara, with a parish church, and a trade in cotton and cattle sent chiefly to Natal and Paraíba. Pop. (dist.) 6000.

SÃO-CARLOS a village and par. Brazil, prov. Minas Geraes 11 m. N. W. Mariana. It contains a parish church and a primary school. Cotton and indigo thrive well in the district. Pop. 1200.

SÃO-PALO, a maritime prov. Brazil, lat. 30° to 28° S. and lon. 44° 30' to 55° W. bounded, N. by prov. Goyas, N. E. Minas-Geraes and Rio-de-Janeiro, E. the Atlantic S. Santa-Catherina and São Pedro-de-Rio-Grande, and W. the republic of Paraguay and prov. Mato-Grosso area, 173,160 sq. m. The coast line stretches N. E. to S. W. for above 400 m. Part of it in the N. E. is bold and rocky but the rest is generally low. At a short distance behind it, however the surface begins to rise rapidly and soon terminates in mountain chains which have a direction nearly parallel to that of the coast. These chains, composed chiefly of granite form the great watershed of the province dividing it into two basins of very unequal magnitude that on the S. side consisting of a belt of land along the coast, which sends its waters directly E. to the Atlantic by numerous small streams, or V. to swell the channel of the Paraíba while the larger basin comprehending at least four-fifths of the surface, belongs to the Paraná which bounds the province on the W. and drains it by a vast number of streams, of which the most important are the *Tapac* and *Ivaí*. The mountains are generally clothed with forests furnishing inextinguishable supplies of the finest timber particularly cedar and pine but the lower slopes, and the valleys and plains which lie along the banks of the river are with few exceptions of great fertility. At one time wheat sufficient for the home consumption was grown, but the introduction of American flour has almost entirely superseded it, and its place is supplied by more profitable crops of sugarcane a coffee, rice millet, mandioc, tobacco and *mandioca*. Lying just beyond the tree line, the climate is mild and healthy, and seemed likely to be well adapted for the tea plant of China Attempts were accordingly made to introduce it but the hopes entertained were disappointed, and the attempted culture has almost if not entirely, ceased. One cause of failure may be the prevalence of hoar frosts which have had the effect of excluding cotton from the regular crops of cultivation. The province is well supplied with means of communication both by land and water and has several harbours on the coast, particularly that of Santos, admitting all ordinary sailing vessels. An important trade is carried on with the interior which sends by land, chiefly to Rio de Janeiro horses cattle and wine, and exports by sea rice coffee sugar bacon, tobacco cheese, and meat or Paraguay tea. For administrative purposes São Paulo is divided into seven comarcas—São Paulo Santos, Curitiba, Ita Jundiaí, Igarapé and Franca. It sends nine deputies to the general legislative assembly, and appoints four senators. The provincial assembly is composed of 26 members holds its sittings in the town of São Paulo. Pop. 459,000.

SÃO PAULO a town in Brazil cap. above prov. an elevated but uneven piece of ground between two small lakes, 220 m. W. S. W. Rio-de-Janeiro. It is built with little regard to regularity. The streets are narrow, but have both curbs and side pavement and the houses are of earth plastered over and white-washed generally of a straw yellow or pink colour which gives them a clean comfortable and cheerful appearance. They are all roofed with tile and for the most part two stories high with occasional balconies. The environs are still more attractive than the town being generally laid out in handsome villa and gardens. The principal edifices are the cathedral more remarkable for its size than its archi- tecture the parish church of St. Ignace, several monasteries and convents, with churches attached the governor's and the bishop's palace, the townhouse prison infirmary and military hospital. The educational establishments include a school of law an ecclesiastical seminary a Latin school school of philosophy and several primary schools São Paulo as the capital of the province, is the seat of several important courts of law and public offices the place where the provincial assembly holds its sittings the residence of the president, and the seat of a bishop. It also possesses a public library, and an extensive botanical garden. Pop. 52 082.

SÃO-PEDRO D'ALCANTARA, a town, Brazil prov. Goyas, on the frontiers of this prov. and Maranhão, a bank Tocantins,

410 m E W Maranhão. It contains a church, and possesses to become an important point for the commerce of the interior.

SÃO LÉO DO RIO-GRANDE, or **SÃO-PIEDRO-DO-SUL**, a maritime prov in the S. of Brazil bounded N by prov São Paulo N E Santa-Catharina N and S E the Atlantic, and W by the state of Santa-Rita. In the S. it possesses almost a point, and has for its extreme frontier Lake Mirim lat. $23^{\circ} 30'$ to $34^{\circ} 30'$ S; lon $49^{\circ} 40'$ to $54^{\circ} 40'$ W area, 113,788 sq. m. This province is divided into two unequal parts by a mountain chain, which takes the general name of Serra-tal, but in the N is better known by the names of Serra-de-Veas and Serra-do-Horral and in the S. by that of Serra-dos-Fapes. Between this mountain chain and the sea lie the vast lakes of Viamão, Patos, and Mirim which form one of the characteristic features of the province communicate with each other and have a length of about 340 m. with a breadth varying from 4 m to 38 m. A considerable portion of the S. division of the province pours its waters into these lakes but, in the N portion of the province, the rivers take an opposite direction, and flowing W, belong partly to the basin of the Parana, and partly to that of the Uruguay. The sea-coast is generally flat and sandy but is lined by a series of reefs, which makes the navigation dangerous. The interior though partially occupied by arid areas, is generally fertile. The productions, however, are not those common in other parts of Brazil. Instead of the tropical fruits a temperate climate prevails, and coffee plants and bananas are cultivated more as objects of curiosity than of general utility. The flower fruits of Europe particularly apples and peaches find a general soil the ordinary cereals more especially wheat, enter largely into the general course of cultivation their place being occasionally supplied by rice and cassia. Building-timber is somewhat rare, but the quality is superior. The minerals include gold and, it is said, silver particularly rich beds of iron in sulphur and the most porcelain clay. The principal occupation of the inhabitants however is the rearing of cattle which are, partly sent in droves to São Paulo and Rio-de-Janeiro but to a much greater extent slaughtered to furnish the dried beef for which the province has long been famous and which is exported to all parts of Brazil and to Mexico, Havana, and the I. Brazil. The same cattle likewise furnish an important export of hides and tallow. Horses and mules also especially the latter are reared in great numbers, and with particular attention to the excellence of the breed and have a large sale often at high prices, in the other provinces. As a frontier province São-Pedro-do-Rio-Grande is divided into four military divisions—Porto-Alegre I in Grande-Rio-Pardo and Santa-Maria. It sends three deputies to the general legislative assembly and appoints one senator. The provincial assembly consists of 24 members. There is a German colony which in 1841 had a population of 5311 at St. Leopoldo about 40 m N Porto-Alegre. Pop 260,000.

SÃO DOMINGOS DO MARÃO a m Brazil prov Minas-Geraes, in a low plain subject to inundations, 1 bank N E Francisco lat $15^{\circ} 10'$ S $34^{\circ} 30'$ W. Salgado. It is tolerably well built has two churches and a considerable trade, being the entrepôt for the various kinds of produce sent from the surrounding districts to be exported by the São-Francisco. The chief articles of culture are the mullet, especially particularly the last which furnishes a large export of sugar and spirits. Great numbers of cattle also are reared. Pop (dist.) 3000.

SÃO ROQUE, a m Brazil prov and 30 m S W São-Paulo. It is the seat of an electoral college, contains a parish church, and exports a good deal of produce to São-Paulo. Pop (dist.) 4000.

SÃO ROQUE, a cape, Brazil. See ROQUE.

SÃO SALVADOR, a city and seaport Brazil. See HATIA.

SÃO-SALVADOR-DOIS-CAMPOS, a city Brazil. See CAMPOS-DOIS-CAMPOS.

SÃO-SALVADOR a m. and seaport, Brazil prov São-Paulo. It is the seat of a municipality which projects into the Atlantic, opposite to an island of same name 65 m E N E. It is built on a hill, the houses being very lofty and the streets merely covered with sand. It has a church a Franciscan convent, a 1st and a primary school and a spacious harbour, with a depth of 24 ft. at which an extensive trade is carried on, all the produce of the neighbouring districts consisting chiefly

of sugar coffee, raw tobacco, and earthenware, being shipped at St. Pop. 7000 (dist.) 6000. — The island, lat (S. point), $23^{\circ} 57'$ S, lon $45^{\circ} 15'$ W (a.) separated from the town by a deep but narrow channel, called the Strait of Igoe-Toque, is of a somewhat triangular shape and, at the widest, is about 10 m. across. Its shores are steep and rocky, but vessels sail along them in safety and find easy and safe anchorage in from 3 fathoms to 35 fathoms. The interior is elevated. The soil is fertile, and yields abundance of sugar-cane and the other produce of the climate. Vessels obtain cheap supplies of fresh meat, poultry and other provisions, and there are copious springs, where they can take in excellent water. A whaling establishment has long existed on the island, and a small town, called Villa-Rhila-da-Princesa has recently been built on its W. shore. Pop 3000.

SÃO VICENTE, a m Brazil prov and 45 m E S E São-Paulo, on a strait which once took the name of the river of São-Vicente. It was the first town founded by the Portuguese in Brazil and was long regarded as its southern capital but owing partly to the increase of the bar across its harbour and the rise of the town of Santos in its neighbourhood it has dwindled away till its population barely amounts to 600.

SÃO-VICENTE-DAS-ÁGUAS, a m Brazil prov and 125 m S S E Curitiba, a bank São-Pedro, about 40 m above the town of São-Pedro, with a church, inn, and prison and a considerable export of cotton and other produce to Araxá and Pernambuco. Pop (dist.) 5000.

SÃO-VINÍCIUS, an isl. off S L coast Brazil lat $18^{\circ} 12'$ N lon $68^{\circ} 31'$ W (a.) about 10 m long E to W and 3 m to 5 m broad covered with trees and surrounded with a white reef in the distance of 2 m. The N. L. point of the isl. is bold and the S. L. low. The passage between it and the mainland is short and narrow and practicable for small vessels only.

SAONE [anc. Arar] a river France, rises at Vionenil dep Vignes flows S W through that dep enters dep Haute-Saône which it traverses, flowing first S E, then S W and immediately on quitting it for dep (dist.) it is greatly augmented in volume by the access of the Ognon. Thence it continues its S W course, passing Auxonne, and receiving its most important tributary—the Doubs. After reaching Lons-le-Saunier, its course becomes almost due S. past Macon to Lyons, where it joins or from its volume may more properly be said to be joined by the Rhone. Its whole course is about 280 m. of these 190 m are navigable. The importance of its navigation is greatly increased by means of three canals—the canal de Centry canal de Thurgogne and Rhone and Rhine canal—which bring it into communication, respectively with the Loire, Seine, and Rhine.

SAONE, or **SAONE**, a dep. France, bounded, N by Côte-d'Or E by Jura, S E. Am S. Rhone and Loire and W. Allier and Nièvre. Its greatest length E. to W, 75 m average breadth 10 m. area, 3270 sq. m. It is traversed N to S by a mountain range, which forms the commoning ridge of the Cevennes. The culminating point Mount Buvray has a height of 3230 ft. above the sea. Its range divides the department into two distinct basins, that on the W belonging to the Loire which first traverses its S W corner and then bounds it on the W and that on the E belonging to the Rhone, which traverses it N to S, and transmits its waters to the Rhone. In addition to these two rivers from which the department takes its name, important water communication is afforded by the canal du Centre. The climate is in general temperate and healthy. More than one-half of the whole surface is arable, and one sixth is in wood. The waste-land is about one-thirtieth. The soil on the whole, is not of remarkable fertility, the grain raised barely sufficing for the consumption. The finest part of the department is the valley of the Saône, where the surface is beautifully diversified by hill and dale, valley and plain, vine and olive slopes, rich pastures and fertile corn fields. The vine is extensively cultivated, and though none of the wines are of great quality, they are much esteemed as was evidenced and largely exported. Those in most regular demand are of Macon. Hemp, of excellent quality, is grown in several cantons and attention has lately begun to be paid to the culture of the mulberry for rearing silk-worms. Excellent cattle are reared on the pastures and the horses, though generally of small size, are hardy and active. The most important mineral is coal of which there is an extensive field; but the

quality is inferior. Iron is also partially worked but the ore is seldom rich, and there is a mine of manganese. The most important branch of industry is the manufacture of iron. After it may be mentioned leather, glass, linen and cotton goods, hats, and earthenware. The trade is chiefly in agricultural produce, coal, iron wine, and leather. For administrative purposes the department is divided into five arrondissements—Mâcon (the capital), Auxois, Chalons-sur-Saône, Charolais, Louhans—subdivided into 48 cantons, and 686 communes. Pop (1856) 574 720.

SAÔNE (Haut-) [Upper Saône] a dep France bounded N by dep. Voges, E. Haute-Rhin, S. Doubs and Jura, S. W. Côte d'Or and N. W. Haute-Marne. Greatest length N to S. W. 70 m. average breadth 40 m. lat. 47° 15' to 48° N., lon. 5° 25' to 7° 50' E. area, 2028 sq m. This department consists in a great measure, of an extensive basin enclosed by a succession of mountain ranges—the Vosges the chain of Langres, the Côte d'Or, the mountains of the Jura and the Jura. In the N. E. a portion amounting to nearly a fourth of the whole surface is entirely covered by mountains. The soil on the whole, more temperate than that of the adjoining departments, but is subject to sudden and violent alterations, particularly in spring by which vegetation often suffers severely. The mountainous part of the department is extremely rugged and the soil is arid so that the ordinary cereals are scarcely able to maintain a languishing existence. The rest of the department, lying within the extensive basin already referred to is very fertile and has a surface finely diversified by gentle slopes often covered with vineyards extensive, well watered verdant meadows, and productive corn-fields. The crops raised, after supplying the home consumption leave a considerable surplus for export. About one-half of the whole surface is arable and considerably more than one-fourth is covered with wood which furnishes excellent timber and is one of the principal sources of wealth. In addition to cereals, flax and hemp are extensively cultivated. The ordinary fruit is generally thrives well and some districts are almost covered with cherry plantations the produce of which is employed in the manufacture of cherry brandy. The minerals of the department are numerous but by far the most important is iron, which is so extensively worked and manufactured as to form the most important branch of industry. The other principal articles of manufacture are cotton tissues paper glass and earthenware. The trade is chiefly in corn flour iron and ironmongery wine wood, butter cheese horses and cattle. For administrative purposes the department is divided into three arrondissements—Vosges (the capital) Gray. It is subdivided into 28 cantons and 683 communes. 1 pop (1854) 347 480.

SAOBERIO a town in France dep. Alpes-Maritimes. It is in the N. of Nice on the Riva in a wild alpine district. It consists of numerous houses, which are built like nests among the rocks and has two churches, a convent, a communal school an hospital, and the ruins of an old castle. Pop 2689.

SAOUK a river, Russia rises in gov. Lwowa, flows S. S. W. and forming a junction with the Parnau at the town of that name, falls into the Gulf of Livonia, after a course of about 45 m.

SAOÛNE, a river France, which rises in the S. of dep. Lot, near Langsch flows S. W. and joins a bank Garonne, 4 m. S. E. Agen after a course of about 45 m.

SAP (Maz) a vil Hungary. It lies between the Danube, about 3 m. from Nyerges-Lipén. It has a church, a paper-mill, and a trade in corn, cattle and wine. Pop 1257.

SAPAN TAÖH, a bare, treeless mountain. Asiatic Turkey, peak and 40 m. N. W. Van, on N. side Lake Van supposed to rise 9500 ft. to 10 000 ft. above sea level. It is apparently of a volcanic nature, although there is no record or tradition of its having been in a state of activity.

SAPAHOUJA, or HOXTOMA, an ind. Indian Archipelago one of the Moluccas, off S. W. coast, Ceram. lat. 8° 30' S. lon. 135° 54' E. (N.). There is a village of the same name, and a fort at the head of a bay formed between the S. and S. E.

points of the island there is good anchorage in 12 fathoms near the fort. This island is very fertile, yielding large quantities of coconuts and coconut oil and as great an amount of cloves as the islands of Amboina, Harrokon, and Noos last collectively.

SALATA or **PULO SARITA** a small elevated barren island. Celebes Sea. lat. 10° N. lon. 109° 2' E. (N.). In appearance from the sea it is nearly perpendicular and white with immensurable snow-fall continually hovering over it.

SAPCOLE par Eng. Leicester, 1385 ac. Pop 724.

SAPLY two par. Eng. —1 (Lower or Frickers) Worcester 1607 ac. 1 pop 143. —2 (Upper) Hereford 2190 ac. 1 pop 851.

SAPIENZA an isl Greece S. W. coast, Morea, 3 m. S. of the town of Modon. It belongs to the group anciently called Cénæus and is now included among the Ionian Islands, and the prehistoric of Great Britain. It is of very irregular shape, about 6 m. long, N. to S. by about 3 m. broad and has a finely diversified surface. It is inhabited chiefly by Greek shepherds, but has a good harbour in Port Longoni.

SAPISION par Eng. Suffolk 1230 ac. 1 pop 205.

SAPONARA a m. Naples, prov. Basilicata, 30 m. S. Potenza on a rocky height. It contains two churches, two monasteries, two nunneries and an hospital. A little below it are seen the ruins of Græcætan an ancient Roman colony under the walls of which the consul C. Iulius found a victory over Hannibal. Pop 4000.

SAPORNIK a vil. Russia gov. ul. 60 m. S. E. Nizhny on the Sayan. It has manufactures of linen and cotton goods. Pop (1849) 3104.

SAPMILKEK or **SAPMILKE**, a vil. Holland and 11 m. N. N. Groningen on the Van Sloter canal with three churches and a school. Some building yards, rope-works, saw mills and a considerable transit trade on the canal. 1 2240.

SAPPLETON two par. Eng. —1 Gloucester 8908 ac. Pop 146. —2 Lincoln 656 ac. 1 pop 61.

SAPULI (also **Syres**) a m. Naples prov. Principato-Capri 26 m. S. E. La Spezia on the Gulf of Spezia where it has a large and commodious port, and an active fishery. 1 1430.

SAPULI a vil Hungary. Hither Danube, on a bank on the Tapis, about 24 m. from Kerepes with a R. Catholic church. Pop 1379.

SAPULI a vil Brazil prov. Minas Geraes, 20 m. S. W. Campanha I bank Sapucaia with a church. It has a fertile district, in which millet rice, haricot, and cotton are grown and many cattle are reared. 1 pop (1840) 8000. The river rises in the slope of Serra-de-Masquara, in S. of prov. Minas-Geraes flows N. W. receiving on the left the Divisado, Serro and Santa-Barbara, and then W. till it receives the Verde and Texe, and running due N. for nearly 40 m. joins I bank Grande after a course of 160 m. of which about 80 m. are navigable.

SAPULI or **MAQUARIMA** a vil Brazil prov. and 46 m. S. E. Rio-de-Janeiro near Cabo-Fran between the sea and a lake of its own name. It contains a parish church, townhouse and prison. It carries on an active trade with Rio-de-Janeiro in timber, coffee and fish. Both salt and fresh. Much of the district is annually flooded by the lake. Pop (1817) 7000.

SARA a river Russia, rises near Ivanovsko gov. Jaroslavl, flows E. then N. N. E. and falls into S. shore of Lake Nura 4 m. S. Roatso after a course of about 48 m.

SARABAI, or **Kendou** (anc. **Zernus**) a river Asiatic Turkey. par. Anatolia rises near Mount Dagh in the N. of sandjak Kerman flows first S. S. W. then E. and about 12 m. N. W. W. Ruyva, falls by several mouths into the Gulf of that name, after a course of about 200 m. Its principal affluents are on the right the Hylla, and on the left the Koptan. Ains-Tehri and Begouly or Aclun.

SARABIA or **SARABIA**, a river New Granada, rises about 30 m. S. W. Tunja, near the centre of the state, flows N. E. in a direction nearly parallel to that of the Magdalena, and after a course of about 160 m. joins I bank Galmazo or Bogomazo, an affluent of the Magdalena.

SARACENA (anc. **S. stem**) a m. Naples, prov. Calabria-Citra, dist. and 3 m. S. E. W. Cassio-Villa, at the foot of a mountain with two churches, several chapels, and two can. wheat, cotton and maize are produced in the neighbourhood. Pop. 3367.

SARAGOSSA a prov. Spain, Aragon bounded, N by Navarre, E. prov. Huesca, N Teruel, and W Soria Logroño, and Navarra; area, 7810 sq. m. Although not so mountainous as the rest of Aragon, it is crossed by several ranges of hills, of which the highest is El Moncayo, with its ramifications in the W., containing various kinds of minerals, especially lead, copper, argenteous galena, iron and sulphur, but there are very few mines in operation. They also abound with limestone, pyrites, granite, alabaster and jet, and the forests with which they are clothed are haunted by bears, wild boars, wolves, and deer. A considerable portion of the province is tolerably level and where there are facilities for irrigation very fertile, the richest tracts being that surrounding the city of Saragossa, and the plain of Caspe. The principal streams by which this province is watered are the Ebro, Jalon, Gallego, Jiloca, Moerva, Aragon, Arba, Quellas, Piedra, Alcanadre and Aranda. Besides wheat, rye, barley, oats, and maize, its chief productions consist of flax, hemp, silk, oil, barilla, good wine is also produced, but lacks a ready market. The forests only yield wood for charcoal. This being an essentially agricultural district, there is little attention paid to manufactures. Silk and soap which were formerly manufactured to a great extent, have now sunk to insignificance. Education, although not quite so backward as in some other provinces is nevertheless in an unsatisfactory state. The people are a vigorous active and warlike race, with a certain Spartan simplicity, but they are stubborn, prejudiced and contempt of civilisation. Pop. 450,000.

SARAGOSSA, ant. *Cesar Augusta*, north Spain, Aragon, cap. above prov. as W. 1° 15' of the ancient kingdom of Aragon, 1° 4' N. E. Madrid lat. 41° 47' N. lon. 0° 42' 38' W. in a fertile plain irrigated by the Ebro. This noble stream separates the city, which is entered by eight gales from the suburb and is crossed by a good stone bridge. Seen from outside the place with its sum towers, cupolas, and spires, has an imposing character, but inside the streets are miserably tortuous lanes ill-paved and worse lighted except the *Casa de la Moneda*, which is the great thoroughfare containing many good specimens of Saragossan architecture, mingled with Arab marks and altogether the town is dull gloomy and old fashioned. The houses are mudcast castles being built in solid masonry but bare, and have been abandoned by the Aragonese to build for Madrid and their mansions are falling into a state of dilapidation. rare to agriculturists, who convert the noble courts into *arrapades* with dingy pigs. Here the architect, besides the substantial style of building will observe the superbly carved subtle rafters and external corners, the rich internal cinque-cento decorations and the slender church bell-towers which are usually constructed in brick, angular in form, and ornamented outside with an embrocated tracery, while the artist may study a school of painting little known in Spain and quite unknown out of it. Among the principal edifices are the two cathedrals, the chapter residing in each alternately for six months the one an ancient severe Gothic church, raised to the Baroque and the other a modern theatrical temple, dedicated to the Virgin, and to which 50,000 pilgrims have been known to resort to see the *cofrades* (priors) on which she descended from heaven as an object of great devotion in Saragossa, the vast exhumed palaces which was gutted and plundered by the French the remains of a parliament house, built in 1437-40 whose magnificent saloons contained the rich national archives, an excellent library and the portraits of the Aragonese worthies—all utterly destroyed by the invaders the exchange, built in 1501, a square brick edifice with projecting enriched soffits, covered with green and white tiles, and a noble interior the Torre Nueva (new tower) or tower of San Felipe, an octagonal clock tower for the city which looks considerably (about 5 ft) out of the perpendicular. Like the towers of *Pisa* and *Bologna*, the old irregular cathedral called the *Alfalfa* built by the Moors which Suleiman converted into a barracks after having damaged it with his bombs and during the civil war was degraded into a prison. There are besides an hospital *Casa de Misericordia* which takes in 600 to 700 old and young, although with very inadequate funds a new general hospital one of the largest in Spain, the former having been recklessly burnt with its patients by the French; various other benevolent institutions, numerous churches, among which one of the best is San Pablo, with five *capillas* and columns,

and grand *plateresque* high altar, a townhouse, chamber of commerce, new university in room of that destroyed with its precious library by the French, a normal school, academy of medicine and surgery, theological college, and various other

THE LEANING TOWER OF SAN FELIPE, SARAGOSSA.
From Lecher's View in Spain.

educational establishments, numerous monastic institutions, most of them suppressed a theatre, baths, botanic garden, a museum of pictures and sculptures, a bull ring and beautiful promenades on all sides of the town. Aragon true contains the main occupation of the inhabitants, and there are several extensive manufactures of many several kinds, dye-works and a large calico work, the other articles manufactured consist of soap, brim, liquors, beer, coarse paper, bricks and tiles, sheep-skins, linen and cotton stuff, silk-reelings, starch, boots, blankets &c. Some of the articles just mentioned are also imported as well as rice, dried cod, bar-iron, timber, dye-stuffs. Among the articles exported are chocolate, paper cast in a wool dyed silk, hats, soap, and above all wheat and flour, the last two chiefly to Catalonia. Saragossa was the *Palatium* of the *Celestianus*, but when Augustus became its benefactor it was called after him and the modern is a corruption of the Roman name. It was always a free city or *colonia*, *municipe*, had a mint, and was a seat of judicial appeals. But no traces of the ancient city are left except in the walls. Saragossa only renounced Paganism and here Aulus Plautinius the first Christian pontiff, was born A.D. 248. It was captured by the Moors in the 8th century and was wrested from them in 1118, by Alonso of Castile after the siege of five years when the stubborn population had almost all perished of hunger. Below the hill of Teruya, which commands the town, General Sanjurjo 20th August, 1710 came up with and completely defeated Philip V., dying from his descent at *Lecida*, the few abandoning muskets, colours, and everything. In 1808 it sustained two memorable sieges. The first was raised by the defeat of the French at Bailen, but being again invested it resisted most heroically for 62 days attacks conducted by the four French marshals Lannes, Mortier, Murey and Junot, but ultimately capitulated, February 20, 1809. These two sieges cost the lives of nearly 60,000 brave men, and for nothing, as the defence of the town was altogether a military mistake, and entirely the result of popular impulses and accidents. 1, 30,000,

SARAIK a tn. Russia, gov and 35 m. N N W. Ruzan, on the Oestr. It contains five stone and three wooden churches, and has several manufactures, and a trade in fat cattle and honey. Pop. (1840), 6022.

SARAKINO or **PARAKINO**, an Isl. Grecian Archipelago, lat. 39° 12' N., lon. 24° E. It is situated to the E. of Kildrona or Hellenos, from which it is separated by a narrow channel and is about 7 m. long, by 2 m. broad.

SARAMACA, a river Dutch Guiana, which falls into the Atlantic near the mouth of the Coppename, 45 m. W. Paramaribo after a course (chiefly N) of about 520 m.

SARANOK a tn. Russia, gov and 75 m. N Pensa, on the Saraga, at its confluence with the Insara. It is irregularly built, and consists of narrow winding unpaved streets and has eight stone and two wooden churches, a monastery and a bazaar; numerous soap-works, and numerous, and a considerable trade in wine, and in woolen cotton, and silk goods. Pop. (1848) 10,109.

SARAPUL, a tn. Russia gov and 197 m. S.E. Viatska on the Kama, at the confluence of the Jourmanka. It occupies the site of an ancient Tartar town and is poorly built consisting of very indifferent houses, and winding and extremely dirty streets. It contains a kind of fortress within which the courts of justice and the principal church are situated and two other churches and has manufactures of soap and leather and a considerable trade greatly facilitated by the Kama, and exporting chiefly in corn and wool. Pop. (1850) 5,437.

SARAKE a river Brazil, near Mato-Grosso enters the Campos-Parecis, and flowing first E and then W joins the bank Guapore, in lat. 14° 51' S lon 60° 30' W. At one place it passes within 4 m. of the Saourin an affluent of the Juruna and both streams being navigable at this point canoes are drawn across from one to the other and thus are enabled to continue their navigation over an immense tract of country.

SARASWA a rl. river, Upper Hindostan which has its source in the hills towards the N E of Burhal whence it flows S.W. into Rajpootana, where it is absorbed during its progress through that region.

SARATOGA SPRINGS, a tn. U States, New York, about 2½ m. N Albany pleasantly situated on a sandy plain partly surrounded by a beautiful grove of pines, and brought into communication with distant parts of the country both by line of railway and by Lakes George and Champlain. It owes its existence and prosperity to its mineral-springs, which have made it the most celebrated watering-place in the U States and consists chiefly of a spacious street, fringed the W margin of a narrow vale, and presenting a very imposing appearance with the churches and other public edifices, and more especially the hotels. These are on the most extensive and magnificent scale, with spacious piazzas and colonnades and generally with beautiful grounds attached to them. The U States hotel, considered the largest and most splendid of these establishments, can accommodate 400 visitors. The springs 10 or 12 in number are found in the vale already mentioned and are characterized by their saline and chalybeate ingredients, combined with carbonic acid gas. They are not only very efficacious in many cases of inveterate rheumatism, but have a powerful effect in renovating the system when enfeebled by sedentary habits or over-exercution and are hence in such request as annually to attract in the summer season upwards of 25,000 visitors. Besides the water thus used large quantities are bottled and sold in various parts of the Union. Pop. (1850), 4650.

SARATOV, a gov in S.E. of Russia lat. 49° to 56° 10' N., lon. 42° 30' to 51° 30' E. bounded N by Icosia and Simbirsk, E. Orenburg S. Astrakhan, S.W. Don Cossacks, and N.W. Tambour greatest length, N to S, 370 m. greatest breadth 81½ m., area, 85,672 sq. m. The surface is divided into two nearly equal parts by the Volga, which traverses the government in a S.S.W. direction. The land on the E. and S.E. consists of an immense steppe, thinly wooded very infinitely supplied with fresh water, and exposed on every side to the violence of the winds. On the W side a range of heights of moderate elevation extend at a short distance from the river and in a direction nearly parallel to it, forming the water-shed between the basins of the Caspian and the Sea of Azov. To the former basin the far greater part of the government belongs, but the whole of the S.W. belongs to the latter, being drained chiefly by the Choper and Medveditsa,

affluents of the Don. The W division is much more fertile than the E. and presents a much more pleasing appearance the monotony of the steppe being here broken by numerous hills and low ranges, with intervening valleys, where a mild climate and good soil combine in raising heavy crops of corn and covering large tracts with the richest pasture. Many parts of the E. division are rendered almost sterile by the excess to which the soil is impregnated with salt, which increases the surface not of the ground merely, but also of the surface of the lakes, and makes them appear as if they had received a coating of ice. The most remarkable of these lakes are the Gork Solonch, and the Jelon both in the S.E. The salt thus accumulated is collected in vast quantities, and forms perhaps the most valuable of the exports of the government. The other principal exports are corn, hemp, flax, tobacco hops, and madder in the neighbourhood of the town of Sarskov the salt-hurry is cultivated to some extent for rearing silk worms. With exception of salt already mentioned, there is no mineral product of any consequence. The great majority of the inhabitants are Russians with a considerable mixture of Tartars, Cossacks, Tschuwashes, and Mordwina. Besides these, a number of colonies, consisting of Germans, French Swiss and Swedes have been introduced. They amount to about 10,000 and have considerably improved the industry of the district both by their labour and their example. For administrative purposes the government is divided into 10 districts. Pop. (1850) 1,769,000.

SARATOV a tn. Russia, cap. above gov. r. bank Volga 459 m. S.E. Moscow in a warm and fertile valley, enclosed by lofty and well wooded limestone hills. It consists of the town proper surrounded by a wall and fence, and of a suburb and having been nearly burnt down in 1811 has been rebuilt in a much improved form, though most of the houses still continue to be of wood. It is the seat of several important courts and public offices contains six churches, two monasteries, a schoolhouse, a merchant house, gymnasium, with botanical garden, and several handsome mansions, and is by its vicinity and its manufactures of calico and hats an important trade, principally transacted by the Volga, between Moscow and Astrakhan and a very large annual fair. Pop. (1842) 42,337.

SARATOVKA, a vil. Russia, gov and S.W. St. Petersburg, r. bank Neva. It is inhabited by a German colony who send large quantities of dairy produce, vegetables, and poultry to the capital.

SARAWALL, a large and populous tn. Burmah, prov Pegu on the Irrawadi, 80 m. N W Rangoon lat. 17° 30' N lon 95° 40' E. It was formerly the head quarters of his Burmese majesty's war boats in Pegu.

SARAWAK a tn. in the W. of Mal. Borneo, cap. rajah shipah and on a river of same name, lat. 1° 33' N lon 110° 20' E. It consists of a native and an European town the former built on each side of two reaches of the river and divided into kampongs or clusters, each named after the chief whose house is placed in the centre, and the latter occupying some heights on the left bank of the river. A sugar battery commands the reach immediately below the town, and there are a number of Chinese houses here built. Many of these houses, raised on posts, and formed of wood have a very respectable appearance. The trade of the town is considerable and is carried on chiefly in large boats, some of them of 100 tons, which sail annually to Singapore, with tigo and other productions of the coast, receiving in exchange European goods, Javaoise cloths, brass-work and coarse earthen ware, made in China. Many of the inhabitants are employed in the gold mines in the vicinity. Pop. estimated at about 8000.—The **RAJAPUTRA**, situated in the W. corner of the island, extends from Pongay (Pong) Beton on the W to the river Samarling on the E. having a coast-line of about 80 m. fronting to the N and nearly the same average breadth, bounded W and S by rajahship Ranzies and E. by Borneo Proper. The shore is generally low and undulating, but immediately behind it the ground rises rapidly, and becomes mountainous. The soil consisting generally of a covering of black vegetable mould, resting on a strong yellow loam is very productive, and seems peculiarly adapted to the sugar cane, which grows readily even without cultivation, and under the careful culture of the Chinese, attains a height of 18 ft., and abounds in saccharine juices of the richest quality. Cloves, nutmegs, and cinnamon also thrive well but the

more important vegetable productions are coconuts, rice, and sugar. Metals, particularly gold, antimony, and nickel, are very abundant, and are worked to a considerable extent. Diamonds and other precious stones are also found and excellent coal, favourably situated both for working and shipping, has been discovered. The inhabitants appear to have come originally from Java, but are now very much intermixed with Malays and Chinese. They had made considerable progress in civilization, but owing to misgovernment and marauding expeditions, for the purpose of obtaining slaves and other plunder were in a wretched condition till Sir James Brooke was appointed ruler. Under his mild yet vigorous administration a happy change has been produced, and promises to extend its benefits beyond Sarawak to the adjoining territories.

SARAWAK or **SARAWAK** a prov. Borneo, bounded N. and W. by Afghanistan, E. by Dutch-Guinea, S. by Java. It is about 100 m. long, and nearly the same broad and in most parts, particularly the E. and N. E., mountains and rugged, rising in the latter to the lofty heights that overtop the Bolen Pass, and on the N. frontier attain to the mountain Taktos, an elevation of between 11,000 ft. and 12,000 ft. With exception of the Bolen, a small stream which traverses the Bolen Pass, there is no river in Sarawak. A few scanty rivulets and transient torrents, widely distributed, are the only sources of irrigation. To compensate this deficiency a cool temperature, the result of elevation, is favourable to vegetation, and allows the soil to retain for a sufficient period the moisture supplied by the vernal rains, so generally to insure good harvests of grain. Owing to the same cause, the hills and plains are covered in the spring and summer, with a profusion of flowers and herbage, yielding abundant pasturage to the numerous flocks of sheep, which constitute the greater part of the wealth of the inhabitants. When spring and summer however have passed away the flowery plains become cheerless wastes, presenting only a scanty clothing of wild thyme, and similar plants, which thrive in soil and elevated tracts.—(Mason, Thornton)

SARAWAK, a small Is. Borneo, prov. Sarawak 80 m. W. of B. lat. 28° 47' N. lon. 64° 50' E. It consists of about 400 houses, built of mud and surrounded by a mud-wall with bastions.

SARONI a vil Naples, prov. Basilicata, 13 m. N. N. E. Lago. It has an important fair which lasts three days.

SARDAM, a tn. Holland. See **SAARDAM**

SARDARA a vil and com., Is. Sardinia, div. and 33 m. N. W. Cagliari, on a plain at the foot of a hill, in a fertile but unhealthy district. Near it are thermal springs, with a temperature of 139° and a bathing establishment, which though very defective is much frequented. Pop. 2000.

SARDINIA (Island of) [Italian, *Sardegna*; French, *Sardaigne*; German, *Sardunien*; Dutch, *Sardanië*; Spanish, *Sardegna* or *Cordeña*; also *Isola*]; the largest island in the Mediterranean Sea after Sicily and before the formation of the kingdom of Italy forming with its surrounding islands, the principal of which are *San Antonio*, *San Pietro*, *Asinara*, *Madalena*, *Tavolara* and *Asprara* that part of the Sardinian States named the Kingdom of Sardinia. It extends from lat. 38° 0' to 41° 15' N. lon. 8° 5' to 9° 50' E. greatest length from Cape Teulada to the N. to Longa Sardo on the N., 152 m. central breadth, about 60 m. area, including the small islands along the coast 9240 sq. m. It is divided into three divisions, subdivided into 11 provinces, which with their pop. are enumerated in the following table.

DIVISIONS AND PROVINCES OF THE ISLAND OF SARDINIA, and their POPULATION IN 1862.

| Divisions. | Provinces. | Area in sq. m. | Pop. 1862. | |
|-------------|------------|---|------------|---------|
| CAGLIARI. | Cagliari. | The total area of the island of Sardinia is 9246 sq. m. The provinces have not yet been measured. | 109,117 | |
| | Carbonara. | | 47,226 | |
| | Oristano. | | 93,969 | |
| | Oristano. | | 70,444 | |
| NUORO. | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| SASSARI. | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| | Oristano. | | 57,350 | |
| Total | | | 9246 | 567,696 |

It is nearly in the form of a parallelogram, and though not without considerable indentations, especially on the S. and W. coasts, is very compact. On the N. it is separated from the island of Corsica by the Strait of Bonifacio, not quite 7 m. wide. The opinion of geologists, founded on the similarity and general appearance of the strata on the opposite coasts, is that the two islands were originally one, and that a subsidence in the strata formed the channel which now flows between them. This view is confirmed by the number of islands which lie in the S. part of the channel, and form a kind of connecting links by which the continuity of the two islands is still rendered almost visible.

Coast.—The N. coast is generally rugged and precipitous, presenting a succession of bold headlands, of which those of *Tetta Grossa*, near the Bay of Santa Reparata, and *Falcone*, are the most conspicuous. The principal bay is that of *Porto Torres* in the Gulf of Asinara having a low beach, with lagoons extending along its E. and S. shores, but rising towards the W. into precipitous cliffs, terminating on the mainland at *Cape Falcone*, and thence for a considerable distance along the rugged island of *Asinara*. The coast, stretching S. from *Cape Falcone*, continues steep and rugged, and presents, among other remarkable headlands, that of *Cape Argentario*, forming the extremity of a rocky mountain upwards of 3000 ft. in height; but beyond this, after passing the bold and picturesque cliffs of *Monte Ghimera*, the coast turns suddenly E., and forms the Bay of Alghero where a remarkable change takes place, and the beach becomes lined with hills of fine white sand. To the S. of Alghero the sand disappears, and a range of gentle hills, planted with vineyards, lines the shore, as far as *Porto Cervo*, when the coast again resumes its rocky character, presenting a succession of trap cliffs which extend to *Cape Murru*, and thence to *Point Mura*, near the town of *Bosa*. A kind of table-land succeeds, and is continued, though with occasional interruptions, as far as *Cape Mannu*, conspicuous by the round tower on its tabled cliff of moderate height. The beach now lowers, and trending E. forms the large and nearly semicircular expanse of the Bay of Oristano, the N. and S. extremities of which, *Cape San Marco* and *La Fienosa*, are above 5 m. apart. The shore around that bay consists of a low alluvial tract, bounding a succession of low lagoons. Rocks again appear towards *Cape La Fienosa*, a long flat point of moderate height, but no great elevation is attained before reaching *Monte Arzo*, a sterile headland presenting bold cliffs to the sea. These continue with little interruption to *Cape Fecore*, from which the coast trends along the base of *Monte Fenu* to *Point Rame*, where a remarkable conical rock, called *Pardu Zucobere*, comes into view. A large open bay, called *Porto Pagia*, succeeds, and beyond it the coast becomes lined by a group of islands, of which *St. Pietro* and *St. Antonio* form, with their opposite coasts, a spacious harbour, with safe anchorage in every wind. Between the E. coast of *Antuco* and the mainland in the Gulf of Palmas, the N. shore of which consists of a succession of flat islands which often join at low water, while its S. extremity after presenting the bare and sloping promontory of *Point Flombe*, terminates in the still more remarkable headland of *Cape Teulada*, which consists of a long range of precipitous cliffs, nearly 900 ft. high, running out into the sea, with a breadth of little more than half a mile and forming the most S. point of the whole island. A bay of the same name opens between this headland and *Cape Argentario*. The shore is in some parts flat, but in others runs along the base of rugged granite mountains, and particularly towards the E. has a barren and desolate appearance. Turning N. from *Cape Argentario*, a number of rocky islets present themselves, lining a low and marshy beach, which continues almost unbroken till the island of *San Marco* is reached, forming the S. W. extremity of the Gulf of Cagliari. This gulf, extending from *Cape Pala* on the W. to *Cape Carbonara* on the E., a distance of about 34 m., and stretching inland for nearly 12 m., is in many respects the most important of the island. The bay having the capital situated on its N. shore, its very fertile flanks afford excellent anchorage in every depth, and in the grounds along and behind it, exhibit the best specimens of cultivation of which Sardinia can boast. The E. coast, from *Cape Carbonara* northwards, stretches nearly in a straight line, the continuity of which is seldom interrupted by indentations. The only bays deserving of notice are those of *Terranova* and *Costa*.

The coast-line presents number features to those which have already been described, low beaches and rocky cliffs often succeeding each other within very short distances. The most conspicuous of all the headlands is that of Monte Bantio, a rugged promontory of nearly 1400 ft. sloping towards the sea, and terminating in bold precipitous limestone, within which is an extensive bay fantastically adorned with enormous milk white stalactites.

Mountains and Streams.—The interior is generally mountainous, the great chain which traverses Corsica, from N to S, being evidently, notwithstanding the interruption of the Strait of Bonifacio continued into Sardinia, where it usually follows the same direction but occasionally sends out transverse branches E. to W. The culminating point of these mountains is the peak of Gennargentu, which is situated a little to the E. of the centre of the island, and attains the height of 5278 ft. The next highest summit is the peak of Limbara, 3888 ft., belonging to the transverse range of that name and situated in the N. Several other summits reach 3000 ft., though the average height does not exceed 2000 ft. Between the mountain ridges are several extensive plains, of which the most celebrated for beauty and fertility are those of the Campidano in the S., stretching between Cagliari and Oristano, and of Ozieri in the N. Besides these there are several large sandy or stony districts called *macchie*, of a very sterile nature. The streams are numerous, and all contribute to the fertility of the districts through which they pass, but are of no navigable importance. The Tirso, the largest, pours its waters into the Gulf of Oristano on the W. coast. Next to it are the Coginas, which flows N.W. into the Gulf of Porto Torres or Asinara, the Flumendosa, which pursues the easterly part of its course between two mountain ridges turns S.E. and discharges itself on the E. coast and the Mannu which falls into the Gulf of Cagliari. The lakes are situated chiefly in the vicinity of the coast, where they form a series of lagoons.

Geology.—In regard to geological structure, the greater part of the rocks are of crystalline texture, and belong to the earliest formations, consisting of granite overlain by gneiss and mica-schist. These rocks extend without interruption over the whole of the N.E. and E. side of the island and after disappearing beneath an irregular belt of sedimentary rocks of the Silurian system again rise to the surface and occupy considerable tracts both in the S.E. and S. Trachyte, basalt, and other rocks of volcanic formation are most largely developed in the N.W., but also occupy a great number of isolated spots throughout the island, and more especially in the S.W. where the adjacent islands of St. Pietro and St. Antioco are almost entirely composed of them. In many cases the mouths of ancient craters and the lava-streams issuing from them, can be distinctly traced. Besides the sedimentary Silurian rocks, already mentioned as breaking the continuity of the granite on the E., a large tract in the S.W. belongs to the same formation, appearing on the W. coast both to the N. and S. of Cape Pevero, extending considerably inland past the town of Iglesias, and then curving round in a S.W. direction till it reaches the S. extremity of the island, and forms the remarkable promontory of Penella. The limestones and chalks at the top of the secondary formation are not largely developed, but occupy a number of isolated tracts both in the interior and on the coast. In the latter portion they form conspicuous objects in the N.W., where the cliffs to the E. of the Gulf of Alghero are composed of them, and in the E. where they form the great mass of Monte Bantio and contain its celebrated stalactitic cave. Tertiary rocks of travertine, marl, and sandstone, occupy a considerable tract near the town, and along the Gulf of Sanas, and also in the S. where they form the E. boundary of the plain of Campidano. That plain itself, however, has a deep covering of alluvium, which partly accounts for its remarkable fertility. Similar tracts of alluvium, though of much more limited extent, are found in the plain of Ozieri in the N., and along the Gulf of Palmas in the S., and that of Paglia in the S.W.

Minerals.—The mineral riches of the island were well known to the ancients, whose extensive workings can still be traced. Tin mines were found long among its metals but no traces of it can now be found. Lead, however exists in considerable abundance, and is generally highly argentiferous. Mines of it are produced in several districts. Copper though less widely diffused, occurs in several quarters, and

occasionally furnishes beautiful specimens of malachite. Quick silver has been found, and was once partially worked, and both basalt and andesite are said to exist. Iron of excellent quality is plentifully distributed, and is worked in several districts.

The other mineral products deserving of notice are porphyry, basalt, alabaster, marble, volcanic cinnabar, rock crystal, and a variety of beautiful pebbles, hematite, gypsum, and nitre. Salt, in its mineral form, has only been found in the grottoes of Serravalle, but is extensively obtained from the salt-pans along the coast, and forms one of the most profitable sources of royal revenue, for the sake of which it is strictly maintained as a monopoly.

Climate.—The climate of Sardinia has for many ages borne a very bad name, and though the cause cannot be easily ascertained there can be no doubt as to the fact that, at certain seasons, large districts become so insalubrious as to be regularly deserted by their inhabitants while in others the mortality is remarkably great. The range of the thermometer is between 34 and 90° and the mean annual temperature 61.7. Hence neither heat nor cold can be said to be in excess. The weather too, though variable, is not more so than in many countries remarkable for healthiness, and refreshing breezes blow regularly from the sea towards noon, and are as regularly succeeded by a land-wind as the sun goes down. The unhealthiness of the climate would, therefore, appear to be owing not to general but to local causes among which the extensive lagoons and marshes which line the coast, and are also prevalent to some extent in the interior, are the most obvious. During the hot season feebler miasmas are continually arising to taint the air the malignant properties of which become so violent that the very breathing of it by a stranger at night or in the cool of the evening, is considered as fatal as it would be to swallow poison. At such times the natives never quit their homes until an hour after sunrise, and hasten to return before sunset, carefully closing every door and window. The disease which then prevails is known by the name of *maltempo*, and is said to be even more fatal than the *malaria* by which parts of Italy and Sicily are infested. That human agency by the removal of noxious substances and the draining of marshes, can do much for the removal of this scourge, has been proved in many instances, but the subdivisions of property contending interests, and the natural indolence of the inhabitants, opposes apparently insurmountable obstacles and many of what ought to be the fairest portions of the earth's surface are permitted in consequence, to remain dreary wastes.

Vegetation.—The whole surface of Sardinia has been divided into three portions—one occupied by mountains which, where not absolutely barren, are covered with forests or clothed with pasture one occupied by marshes, lagoons, and the almost sterile *macchie* and one under tolerably regular culture as arable land or vineyard, &c. Much of the land is of very remarkable fertility and though from the very imperfect system of agriculture pursued, the average produce does not exceed one in seven or eight, a return of 15 to 20 in some favoured districts, is not uncommon. The grain thus raised considerably exceeds the consumption of the present inhabitants, and might easily be increased so as to supply three times the number. The whole operations of the farm are conducted in the most antiquated and slovenly manner. The plough a rude instrument without a collar and frequently devoid of any iron appendage, merely scratches the ground to the depth of two or three inches and the sown, first thrashed on the ground by the tread of man and oxen on a tool called *argallo*, prepared by paring the sward and beating it smooth with a mallet, is sown by being thrown up into the air. The principal crop is wheat, which is generally of excellent quality, and forms an important article of export in the form not only of grain but of flour, biscuit, and macaroni. The culture of barley is more limited and the quality of the produce is comparatively inferior maize thrives well, and though not yet a general crop, is raising rapidly into favour beans and pease are extensively grown, both for home consumption and export. The vine, being well adapted both to the climate and the soil, already occupies extensive tracts, and its culture is every year becoming of increasing importance. The produce, however, is more remarkable for its quantity than its quality, all the preparatory processes being conducted in a careless and imperfect manner. The most

estimated where are those of the Campidano, Alghero, Sornu, and Cagliari. Beautiful and extensive olive-grounds are met with in various quarters, but the culture might easily be extended, and made much more profitable than it has yet proved to be. The best oil is that of Sassari. The only other crops deserving of notice are tobacco, which is grown to some extent in several districts, but particularly around Sassari, Alghero, and the adjacent interior, which is increased in the greatest abundance in the neighbourhood of Cagliari, cotton, for which the soil and climate of the Campidano appear well adapted; madder, which grows wild in many parts of the island, and though neglected, might easily be cultivated to great advantage; and silk, well fitted to become a staple product, but at present produced chiefly for amusement.

Zoology.—Among domestic animals, the first place is due to the bullock, which, though of small size, is the principal animal used for draught, and gives beef of excellent quality. Cows are much neglected, and little milk is obtained from them, but the making of cheese from the milk of goats and sheep forms a very important branch of rural economy. The sheep themselves are of very tolerable breeds, and the swine are said to be among the best in Europe. The horses are in general free from vice, patient of fatigue, and easily kept; considerable attention has been paid to the improvement of the breed the mule, though admirably adapted to the country is unknown; but a small pony anciently in high esteem with the Roman matron for its liveliness and easy pace, still retains its character. Game of all kinds is very abundant. Wild boars, stags, deer and muntjacs frequent the woods and forests, and hares, hares, and rabbits are so numerous, that their skins furnish a considerable article of export. From the extent of sea-coast, the fisheries naturally form an important branch of industry; but the sluggishness of the Sardinians has allowed the management of them to fall almost entirely into the hands of strangers. The most valuable fishery is that of the tunny which is carried on extensively on various parts of the coast. Anchovies and sardines, the latter at one time so numerous as to have derived their name from the island, have become comparatively scarce. Tuna, mullet, bream, eel, and other fish abound, and are staple articles of consumption and commerce. The coral-fishery, more celebrated in ancient than in modern times, are still carried on on the W and S coasts where they employ from 200 to 300 boats which arrive annually from Naples and Genoa. The *Purpur* shells, also the inhabitant of a shell of from 15 to 27 m. in length, abounds in the smooth water of shallow bays, as at Porto-Conte and Lanusa, and becomes the object of an important fishery partly on account of the pearls, generally of very indifferent quality obtained from it, and still more on account of its byssus, or tuff of silky hair which is about eight inches long and is spun into gloves, stockings, or other articles of dress.

Manufactures and Trade.—Manufactures have made very little progress, and are chiefly confined to a few coarse tissues woven by the women at their homes for private use. Farms, however produce linens, carpets, and bed-covers, which, though coarse, are in general use and at Dorgali, a coarse kind of silk goods is made for sale. A few coarse woollens and cottons, leather earthenware, and glass are also made to be used and gunpowder, while the salt government monopolies are manufactured to a considerable extent. The trade consists of the exports of raw produce, the greater part of which have already been mentioned, including corn, wine, brandy, timber seeds, fish, cattle, milk, tobacco, &c., the imports include all the ordinary tissues, more especially cotton colonial produce, luxury hardware, and metals, hemp, and cordage, &c. One great obstacle to the progress of trade, was the miserable state of the roads, which long continued impracticable for wheel-carriages. This has been to some extent removed by the formation of a good road, which traverses the island through out its whole length from Cagliari to Sassari, and of several branch roads to the most important places, not on the direct line.

Coin Weights, and Measures.—Aerounds are kept in two, *old*, and *new*, the latter being = 1s. 6d. sterling; the *old* = 1s. 12d. and the *new* = 1s. 12d. sterling. The principal coins are, in gold the *corona* = 24 lire 5 soldi, or 23 sterling nearly; and the *scappo* = 2s. sterling in silver, the *scudo* = 2s. 9d. sterling, the *lira* = 1s. 6d., and the *cuola* = 4½d. and in

copper, the *solida* nearly = 1d. sterling, and the *denaro* = ½d. sterling. The principal weights are the *libra* subdivided into 12 oz. = 14 oz. 5 den. avoird., the *libra* = 28 lbs. 4 oz. 3 den.; the *cento* = 4 rubbi and the *scopo* = 10 matori. For linear measure, the *palmi* chiefly is used = 10½ inches imperial; it is subdivided into 2, 4, 8, 16 and 32 *palmi*. For greater length, the *canna* is used, but its length varies, the *canna* containing 83½ the *Scasso* *canna* 108½, and the *Tiradeusa* *canna* 154 inches long. Wine is measured by the *pinta* = 3½ pint imperial, the *quartaro* = 1 gal. 1 quart 0½ pt., the *brocca* = 3 gals. 1 qts. 1½ pts., and the *botte* = 182 gals. 3 qts. 0½ pt., all by the *Scasso* = 1 gal. 0 qt. 0-8 pt., the *gerra* = 4 quartaro, and the *barrel* = 3 galls salt by the *solis* = 1400 Sardinian lbs. or nearly 81 bushels imp. and corn by the *sterello* or *scoppo* = 1 bush. 1 peck 1 gal. 1 pt., and the *rotolo* = 7 sterelli. The principal measure is the *sterello*, which varies in extent, that of Cagliari containing 240 square pints = 8 rods 27 pints 18 yards, while that of Sassari contains only 170 square pints = 1 rod 26 poles 24½ yards.

Government, People, and History.—Sardinia until 1848, was governed by a viceroy. It is now governed in the same manner as the divisions on the mainland, by General Intendant, one of which superintends each of the three divisions—Cagliari, Nuoro, and Sassari—into which the island is divided. The inhabitants bear a considerable resemblance both in physical features and in manners and customs, to the Sardinians. They are of middle stature, and well shaped, are exceptionally attached to their country and have good intellectual capacities. They have suffered much however from long neglect and misgovernment, are both ignorant and bigoted, and when they have received an injury are insatiable in their thirst of revenge. Feuds of course become almost implacable, passing down with unabated animosity from father to son and monstrous crimes, too often either whined at or leniently punished by the authorities, are of common occurrence. It is said that great improvements have recently taken place, and that one of the first results of a more general diffusion of education, has been a marked diminution both in the number and heinousness of crimes. The early history of the island is involved in much obscurity. Its original inhabitants, according to Cicero, of Lilybaeum and according to Strabo of Tyrrhenian extraction, were living independent, when, about a.d. 530, they were attacked by the Carthaginians, and obliged, after a valiant but ineffectual resistance, to quit the low country and retire into their mountain fastnesses. During the first Punic war the Romans made strenuous assertions to become masters of the island, and ultimately, on agreeing to make peace, obtained a formal cession of it. Thus cession appears to have left a ranking feeling in the breasts of the Carthaginians, and is expressly mentioned by Livy as one of the causes which led to the second Punic war, in which Rome, though finally victorious, was brought to the brink of ruin by Hannibal. During the struggles between Rome and Carthage, Sardinia often became the theatre of war and suffered equally from both the powerful states which contended for its possession. At a very early period, the inhabitants were converted to Christianity, and were, in course of time, brought into close connection with the Papacy, which, having once fixed its hold, has never relinquished it. In civil affairs they were not more fortunate, and passed successively into the hands of the Vandals, the Goths, the Lombards, and Saracens. The modern history of the island possesses little interest.

SARDINIA, a former state of Europe in N Italy cap. Turin now incorporated in the kingdom of Italy. It was composed of 1st Sardinia (which see) and a continental portion called the Sardinian States [Italian, *Stati Anzati di Terra Ferma*] comprising the duchy of Savoy, the marquisate of the monarchy, the principality of Piedmont, the comitatus of Nice (the latter were the principality of Monaco), the duchy of Montferrat, a part of the former duchy of Milan, and the duchy of Genoa, with the island of Corsica. This continental portion extends from lat. 45° 58' to 46° 27' N.; lon. 5° 58' and 10° 5' E.; and is bounded, N by Switzerland, E. Switzerland, Lombardy, Parma, and Tuscany; S. the Mediterranean, and S.W. and W. France, greatest length, N.E. W. to S.E. W. 249 m., greatest breadth from N. N.E. to S.E. W. 301 m. For administrative purposes they are arranged in 11 divisions,

subdivided into 39 provinces, of which the names, areas, and populations are as follows:—

DIVISIONS AND PARTS OF THE CONSTITUTIONAL STATES OF SARDINIA: (Late Area and Population in 1901.)

| Administrative Division | Province | Area in sq. ft. | Population, 1901. |
|--------------------------------|----------|-----------------|-------------------|
| CONTINENT | Alghero | 301 | 154,544 |

| Total of continental provinces | | 18,994 | 4,597,850 |
| Island of Sardinia | | 9,282 | 343,856 |
| Total of Sardinian monarchy | | 28,276 | 4,941,706 |

Its area is consequently greater than that of the kingdom of the Netherlands but smaller than that of Portugal. The surface is covered and traversed in various directions by the loftiest mountain chains of Europe. These, commencing at the N.E. extremity on the frontiers of Switzerland form the boundary between the two countries, proceeding first under the name of the Helvetic or Lepontine Alps to Mount Rose, and then almost due W. under that of the Pennine Alps to Mount Blanc, which lies wholly within the Sardinian territory. From Mount Blanc the principal chain proceeds under the name of the Graian or Graian Alps, first easterly S. and then W. so as completely to isolate Savoy from the rest of the Sardinian Basin. Having reached the frontier of France, it proceeds along them in a S.E. direction to Mount Viso, to the S. of which it becomes linked to the Maritime Alps. These quitting the French frontier stretch eastward between Piedmont and Nice, and, finally, almost skirting the Gulf of Genoa, become linked a little above Savona with the main branch of the Apeninæ, which at first reaches a little from the shore, and then proceed E. through div. Genoa to the frontiers of Parma and Tuscany. The lofty chains which have now been traced derive not numerous branches sometimes parallel and sometimes at right angles to their principal axis and hence, as it is obvious that the far greater portion of the Sardinian surface must be decidedly mountainous, it might hastily be concluded that no space is left for the expansion of plains. The fact, however, is, that between the S. slopes of the Pennine and Helvetic Alps, and the N. slopes of the Maritime Alps and the Apeninæ, large open plains of almost unrivalled beauty and fertility occur, and render a country which, from containing the loftiest mountains, might be supposed to be one of the most barren, actually one of the most productive in Europe.

Rivers and Lakes.—From the configuration and position of

the mountain chains, it is evident that they must form several water-sheds, and share the drainage of the country among several basins. Thus Savoy, which, as already observed, is completely isolated on the E. and S., is forced to find an outlet for its waters either by the W. or N., and thus belongs to the basin of the Rhone, which, watering the W. frontiers, receives part of the drainage directly, and a much larger part indirectly, by the Lake of Geneva, the Arve, and the Isère. In like manner in the E., the Maritime Alps and the Apeninæ cause all the water sent from their S. slopes, or collected on the narrow belt of land below to descend directly to the Mediterranean in numerous streams, all of them, except the Var in the W., and the Arve in the E., too insignificant to be deserving of special notice. A third basin of far more importance, since not less than three-fourths of the whole surface belongs to it, is that of the Po. This important river, commencing its course in the mountains on the W., proceeds across the country to its E. frontier, winding somewhat circuitously but never wandering far from its centre, and receiving constant accessions from numerous affluents, which hasten to join it on either bank with water often furnished from exhaustless reservoirs among the regions of perpetual snow. These affluents alone drain on the left bank an area of 7856, and on the right an area of 4211 sq. m. On the right the only affluent of consequence is the Tanaro on the left the most important are the Tice, Dora-Baltea, and Sesia. In general, however, their currents are too shallow or too rapid to be used for transport, and the benefits which they confer on all the districts through which they pass are confined to irrigation. While the rivers are thus numerous, there is a remarkable deficiency of lakes. Neither the Lake of Geneva nor Lago Maggiore properly belongs to Sardinia, and the only lakes worthy of the name within the territory are the comparatively trivial ones of Anney and Bourget in Savoy.

Climate.—The climate necessarily varies much according to locality. In the regions of perpetual snow and in all the districts so near as to be within the sphere of the icebergs, the winter-cold is severe, the weather at all times variable, and violent storms frequent even when the season has far advanced. In the lower districts and especially in the plains of Piedmont, a much milder and more genial climate prevails, the winter is short, and in summer long tracts of the brightest sunshine continue without interruption from either clouds or rain. The heat, however, is often extreme, and the ground becomes so scorched that the crops are only saved by the general practice of irrigation. In spring the worst feature in the weather is its variability. Violent winds often blow from the surrounding mountains and local storms of hail descend with an impetuosity which not only devastates the fields, but sometimes proves fatal to animals. In the S. portion of the Sardinian Basin, situated on the S. side of the Maritime Alps and Apeninæ, and forming the divisions of Nice and Genoa, the complete shelter from the N. and the vicinity of the sea, combine in forming a climate remarkable for the mildness of its winters and its almost tropical summer-heats. Here the orange flourishes vigorously in the open air, the olive is the most important object of culture and many plants, seldom found within the same latitude, are found growing spontaneously among its rocky and sunny slopes. Turin, situated not far from the centre of the country, may be considered as furnishing a tolerably fair average of the mean temperature, and as meteorological observations have been made for many years at the observatory there with great accuracy it may be proper to mention that the medium summer temperature thus ascertained is 72° and the ordinary maximum 85° 32, but that the thermometer exposed to the sun has a mean height of not less than 91° 57. The average annual fall of rain deduced from ten years' observation is nearly 57 inches, and of these the large proportion of 25½ inches falls between March and September. The rainiest month is May and the next rainiest August. The prevailing winds throughout the country are the W. N. and E. The S. is felt particularly in Savoy and in parts of Piedmont, but being varied off by the Maritime Alps and Apeninæ, makes little impression in div. Nice and Genoa.

Geology and Minerals.—The lofty chains of the Alps are composed mostly of granite and crystalline schists. To the W. of the chain which forms the W. boundary of Piedmont,

the Jura limestone is largely developed, and extends over the greater part of Saveri. The same system also extends to a considerable distance along the S. slopes of the W. part of the Maritime Alps, and descends to the shore near the W. entrance of the Gulf of Genoa. The most striking display of volcanic rocks is near the same gulf, near the point where the Maritime Alps are considered to terminate and the Apennines to begin. In the interval between the chains, the rocks are composed chiefly of serpentines. To the E. the cretaceous system begins to prevail. Almost the whole of the Apennines within the Sardinian States, and the slopes on both sides of it, are composed of calcareous rocks belonging to this system. They exhibit numerous marks of violent disturbance, by volcanic rocks, which, though nowhere largely developed, are seen placing the surface in many isolated spots. Another large development of the cretaceous system is seen in the S. W. where it stretches both along the shores and backwards into the interior forming no small portion of the N. side. The tertiary formation predominates in Piedmont on the slopes and including plains situated on the right bank of the Po. The plains on the left bank appear also to be tertiary but are covered for the most part with thick beds of alluvium. The materials include most of the known metals, but in such limited quantities as to possess little economical value. Gold has been washed from the sands of several rivers, particularly the Orco and Dora-Baltea, and from a mine of sulphurated iron in prov. Orsola, both gold and silver have been extracted. In Saveri the mines of argentiferous lead, which have been worked from an early period by Phoenicians and Romans, still continue productive. Iron is smelted by the natives in various quarters and several extensive salt-works have been erected to purify the salts obtained both from mines and springs. Gypsum, chalk, limestone, and slate are very abundant, and there are few provinces in which excellent quarries of alabaster and marble might not be opened. Amethysts, garnets, and rock-crystals of great size and beauty are often found. No coal fit for fuel has been discovered, but there are several seams of lignite.

Vegetation, Agriculture, &c.—Many of the mountains either rise above the limit of perpetual snow, or retain their snowy covering till the spring is so far advanced that they have scarcely time to cover themselves with any kind of vegetation. Beneath these snowy regions, where the harder trees can grow, many well-wooded heights are seen, particularly in Saveri, and on parts of the Apennines and Maritime Alps; and at the same or similar elevations in all the mountainous districts of the country extensive pastoral tracts occur where great numbers of cattle sleep, and goats are reared chiefly with a view to the dairy produce which may be obtained from them. In still lower regions the pine, birch, alder and hazel are succeeded by the more valuable species of hardwood timber and among others by the Spanish chestnut, not more valuable for its timber than its fruit. In Saveri and other mountainous regions of the N. the extent of arable land is very much limited, both by the nature of the climate and the configuration of the surface and though, in lower and more favoured spots, the vine is successfully cultivated, and corn-fields are sometimes seen stretching continuously over considerable tracts, the cereals produced fall far short of the consumption. In the N. div. of Nice and Genoa the quantity of cereal produce is equally deficient, not certainly from any want of genial climate, but partly from the thin soil and soil, either covered with stones or bristling with rocks, and partly from its adaptation to the growth of plants from which a more valuable return can be obtained—the orange, the vine, the mulberry, and, above all, the olive, which grows here in the greatest perfection, and yields an oil equally abundant in quantity and excellent in quality. The true granary of the Sardinian States must be sought for in the plains of Piedmont, where the soil, deep though light, possesses great natural fertility and has in numerous seasons this fertility increased tenfold by careful and skilful management. The light nature of the soil, and the withering effect of long-continued droughts, must early have called the attention of the Piedmontese to the importance of artificial irrigation, while the vast number of streams descending with rapidity from elevated sources must have suggested every mode of diverting them from their native beds to water and fertilize the adjoining fields. To such perfection has the system now been carried, that whole

tracts of country are literally covered by artificial channels of various dimensions, so that in the plains of Piedmont 486,618 acres are under regular irrigation, the supplies of which are received and paid for according to fixed rates, forming a most enlightened hydrographic code. The results are astonishing. Whole districts, which had remained almost waste because the soil, when light, was parched up, or when heavy was so retentive of moisture as to form pestiferous marshes, have been converted, merely by the application of irrigation, into luxuriant corn-fields, vast meadows, and rice-grounds, and instead of a scanty and impoverished population, now rival the most densely-peopled regions of Europe. A considerable portion of the ground thus irrigated is kept in permanent meadow which yields repeated heavy cuttings of grass and luxuriant crops of hay for the maintenance generally of Swiss cows, which are kept in large dairies, their produce forming one of the principal sources of agricultural wealth. A still larger portion of the same land is under a regular rotation of rice, maize, green crop, and wheat. French, beans and lupins are extensively grown, and barley and rye more partially. Much of the ground not irrigated is devoted to the culture of the vine, and more especially of the mulberry, for the rearing of silk-worms. The silk obtained is abundant and of excellent quality and both in its raw and spun state forms one of the principal articles of export. Fruit of the finest kinds is every where abundant.

Manufactures and Trade.—The former occupy a very unimportant place compared with agriculture, and consist chiefly of silk stuffs, velvet, silk hosiery, woollens generally of coarse quality, linen chiefly for domestic use, hardware, earthenware, porcelain glass, leather, soap, paper articles in alabaster marble, and coral combs and perfumes, white lead, brandy, liqueurs, chocolate, vermouth, &c. The transit trade between France, Switzerland, Germany and Italy is very extensive, and an important foreign trade is carried on, chiefly through the port of Genoa. The principal exports are olive-oil, corn rice, silk silk goods, velvet, white lead, and several of the above articles of manufacture the principal imports are colonial produce, cottons, metals, hides, salt-fish, tar and pitch, &c.

Weights and Measures.—Accounts are kept in lire, which in name and value nearly correspond to the French livre or franc—about 10d. but old lire, which vary in Piedmont and Genoa, are also used. The principal coin are, in gold, the new pistole or doppa—about 16s. sterling, the half pistole and the sequin—10s. nearly and in silver the scudo or crown—about 5s. the demi-scudo, the quart-scudo, and the demi-quart-scudo. The Piedmont foot is about 18 inches imperial. The pace contains about 5 and the braccia 8 of these feet; 500 braccia make a mile. Rice, Genoa, and Saveri have separate measures. The principal measures of capacity are the sacco for grain = 2.45 bushels; the carro for liquids = 108.474 gallons.

Government, People, &c.—The government is in form an hereditary monarchy, in which the powers of the sovereign have recently been placed under proper constitutional restraints. This new constitution voluntarily granted by King Charles Albert in 1848, appoints a legislature of two chambers, which meet annually, guarantees the freedom of the press, and introduces many other important reforms. The clergy and nobility had from an early period possessed peculiar privileges, which exempted them from taxation, and in a manner placed them above the law. These privileges had long been felt to be intolerably oppressive by the great body of the people, and had engendered feelings which became so strong and general as to render some modifications of them imperative. These have met with serious resistance, especially from the clergy who, backed by the court of Rome, and probably also by the bigotry and ignorance of great numbers of the peasantry, have almost set the government at defiance, and attempted to overturn it by threats of assassination and other terrorism, which, though more common in the dark ages, seem somewhat out of place in the 19th century. Justice is administered by three superior courts, which have their seats at Turin, Genoa, Nice, and Olmetto; provincial courts, one in the capital of each province; and a great number of local and inferior jurisdictions. In addition to these a supreme court, called Camera degli, sits at Turin on subjects

court at Genoa, and commercial courts at various places. The revenue, derived to the extent of more than a half from custom and excise duties, and of a third from direct taxation, is about 24,000,000 sterling, and falls short of the expenditure, which exceeds it by nearly 2,000,000. The public debt is estimated at £15,000,000 sterling. Nearly a half of the whole amount has been recently contributed in two large portions—the one, not only for the construction of a system of railways, of which lines from Turin to Genoa, through Alessandria, and from Turin to Nervi, have been (1854) opened, and the other to say the least, very unfortunately, by the late war with Austria. The army amounts, on the war footing to about 140,000, but in peace to only 46,000 men; the navy amounts to about 60 vessels of war of all descriptions, mounting about 900 cannons. Among the vessels there is not a single ship of the line, but there are four frigates and six steam-vessels. The established religion is the Roman Catholic. It is governed by four archbishops and twenty-three bishops, and for ages possessed such an ascendancy that it would not tolerate any other form of religion. Its possessions of Piedmont and Savoy form one of the darkest pages in the history of Popery. In more recent times, owing not to any change in its spirit, but the general progress of public opinion, not only have its more violent outbreaks and aggressions been restrained, but a general toleration has been proclaimed, and the long-persecuted Waldenses, still numbering above 20,000, can not only worship peacefully in their mountain valleys, but own their churches in the very heart of the capital. The enlightened spirit thus manifested has not confined itself to the extension of religious freedom, but taken a distinguished part in the great cause of general education. Besides superior institutes for professional instruction national schools are widely diffused. Besides Turin (the capital) the principal cities and towns are Genoa, *vic.* Alessandria, Chambery, &c.

History.—The country which now forms the Sardinian States was known in ancient times in its S. part by the name of Liguria, and in its N. part by the name of Etruria, and on the W. by the Graia and Cottian Alps by the name of Gallia Cisalpina. Savoy separated from the other parts, and lying beyond the Alps, was considered as belonging to Gallia Narbonensis. To this remote corner of the territory belongs the honour of having established the present monarchy. Much obscurity, however, hangs over the origin of the house of Savoy. Its records cannot be considered authentic before the middle of the 11th century when Humbert, Count of Maurienne, a great vassal of Rudolf III. of Burgundy, appears exercising jurisdiction not only over Maurienne, but various other parts of Savoy the Lower Valais, and Aosta. This jurisdiction was extended to the banks of the Po by Humbert's son Otto, who died in 1080, leaving two sons, who became successively counts of Savoy. The younger Amadeus II. was succeeded by Humbert III. in 1091. Under him the fortunes of his house suffered a temporary eclipse and several great towns including Turin, Aost, and others, threw off their allegiance. His successor Amadeus III. recovered the greater part of what had been lost, but a long series of changes followed, during which the house of Savoy was sometimes brought to the very verge of destruction, and at other times attained to such prosperity as to excite the jealousies or fears of neighbouring states. One of the counts, called Peter, ruled from 1268 to 1366. He added the county of Vaud to his domi nions, and in many ways improved the fortunes of his house. He is not unknown to English history, having, in 1341, before his accession, paid a visit to Henry III. of England, who had married his sister Henry made him Earl of Richmond, and gave him for residence a palace on the banks of the Thames, which he took the name of Savoy house. Among Peter's successors the most distinguished Amadeus V. whose prosperous rule, from 1368 to 1393, procured him the title of Great Aymon, who succeeded

in 1399 to the exclusion of his niece, in virtue of the Salic law then first declared to be in force in Savoy, and in succession Amadeus VI. VII. and VIII. all of whom ruled prosperously. Amadeus VIII., in particular at the termination of his long reign of 46 years, in 1440, left his successor in possession of territories which gave him a distinguished place among the sovereigns of Europe. Being, however, interposed between France and Germany they have too often been made the battle-field on which these great countries met to decide their quarrels. But, notwithstanding this disadvantage, the house of Savoy at the peace of the Pyrenees in 1659 by which the wars of the French and Spanish monarchies were terminated, after they had reigned for nearly 80 years, found itself under Charles Emmanuel II. as great and prosperous as ever. He was succeeded, in 1675 by Victor Amadeus II. during whose reign war between France and Germany again broke out. Amadeus became almost necessarily involved, but played his part so ably, that at the peace of Utrecht, in 1713, he not only added considerably to his continental possessions but obtained possession, and was formally crowned King of Sicily. By a subsequent arrangement he exchanged Sicily for the island of Sardinia, from which he and his successors have since taken the title of king. On his death, in 1780 he was succeeded by Emmanuel III., who became involved in the war of the Spanish succession and saw his territories laid waste by contending armies. The peace of Aix-la-Chapelle opened sealed him by the addition of several important districts and his own enlightened administration added greatly to the other real resources of his kingdom. He was succeeded, in 1773 by his son Victor Amadeus III. who reigned till the French revolution broke out, and was succeeded, in 1796 by his son, Emmanuel IV., who, after seeing his continental dominions overrun by the armies of the French, took refuge in the island of Sardinia in 1799 and three years after abdicated in favour of his brother Victor Emmanuel who remained in Sardinia till 1814, when he again fixed the seat of government at Turin. Shortly after the congress of Vienna added Genoa to his territories. An insurrection led to his abdication in 1821, in favour of his brother, Charles Felix, whose reign of ten years was marked by some important internal improvements. Having left no male issue, a collateral branch succeeded in the person of Charles Albert, who in 1848 promulgated the liberal constitution which the Sardinian States still enjoy. The same year saw him at the head of a league intended to expel the Austrians from Italy. The disastrous results led to his abdication in March, 1849 in favour of his son, and very probably to his death in July thereafter.

SARDIS, a ruined city Asia Minor and esp. Lydia, beautifully situated in a fertile plain, watered by the Pactolus.

THE ACROPOLIS AND CITY OF THE ANCIENT SARDIS.

topia, at the foot of Mount Taurus, now called by the natives Sardinia 50 m N. E. Smyrna. Under Cressus, its last king, from whom it was taken by Cyrus, it was one of the most

epidemic and incursive epidemics of the East. After passing to the Romans it rapidly declined, and during the reign of Titus was almost destroyed by an earthquake. It was, however, immediately rebuilt, and acquired new interest from becoming the seat of one of the Apocryphic churches. This church, though nominally alive, was truly dead, and the message sent to it through John predicted a sudden and fearful destruction. The prediction has been fulfilled and in consequence of the ravages both of earthquakes and war the site of the ancient city is now only marked by heaps of ruins. Of these the most conspicuous are those of the Amphitheatre, situated on a steep rock of sandstone, remarkable for the manner in which it has been rent and distorted by physical convulsions, but they yield an interest to two pillars, which are believed to have belonged to the temple of Cybele, built only 300 years after the temple of Solomon. The only modern representative of Sardia is a miserable village called Sart.

SARDOAL, a tn. and par Portugal prov Beira-Baixa 14 m. S.E. Thomar in a flat and fertile district, in which wheat is extensively grown. It has a Latin school. P. 3300.

SARER, or Sarat, prov Manzanera, 30 m. N.W. Astoria, lat. 39° 50' N. lon. 68° 10' E. It is about 2 m. in extent, and is surrounded by a wall and ditch, both in a state of decay. The town is an equally neglected state the streets are unpaved, and are often impassable in bad weather with mud. The houses, which all communicate together are extremely miserable near them a dirty open space serves as a market-place, where, on certain days, the produce of the adjoining country consisting of sugar, cotton, grain, fruit, meat, fish and vegetables, is exposed to sale. The chief public buildings are a principal mosque, a palace, 4 or 5 madrasas or colleges, several baths, and a lofty tower popularly known by the name of Goolubus-e-Salm-e-Tour. None but the last are in any way remarkable. It is of cylindrical form, built of sun burnt brick coated with mortar, with a conical top and rises to the height of about 100 ft. it is hollow throughout the whole of its height, yet without any means of ascending. There are several ancient tombs of mounds in the vicinity of the city. Pop. estimated at 30,000 to 40,000. (Fraser's *Shores of the Caspian Sea*.)

SARLATA, a tn. Russia, gov and 123 m. S.W. Saratov, on the lower Volga, its mouth in the Volga. It is surrounded by a rampart and a fosse and otherwise defended so as to be effectually secured against the attacks of the wandering tribes of the steppes and is inhabited by a colony of German Moravians or Harnburgers, who have built a town of great beauty, consisting of handsome houses, and regular squares, and well-cleaned streets, often lined with rows of trees. The principal buildings are the church, and, beside it, the boys and girls schools. The manufactures consist of silk, cotton, and linen stuffs, coloured cotton stockings and bonnets. In great request among the Cossacks of the Don, soap, candles, &c. Though the district around it is by no means naturally fertile, it has been completely changed by the hand of industry and is covered with fine fields, meadows and gardens. Pop. 4000.

SAREZZO a vil and com Italy Lombardy prov Brescia, and 2 m. S. by E. Gardone, 1 bank Mella, with three churches, important iron manufactures, and some trade in wood, charcoal and limestone. Pop. 1424.

SARGADELON, a small maritime vil Spain, Galicia, prov and 48 m. N. Lago. An iron-foundry was established here in 1729, by Antonio Barrios, and in it were cast the shot and shells for the armaments of El Ferrol. There is also here a munifactory of fine earthenware, rivaling in quality the best of other countries. About 1000 families are employed in both the above works.

SARGANS, a tn. and par Switzerland, can. and 37 m. S.E.E. St Gall, on a height, the rocky summit of which is crowned by a castle, with a very massive tower. Near the town is a sulphur-bath, with a bathing establishment. The height on which Sargans stands is the water-shed between the Rhine and the Lake of Wallenstadt, and it has been ascertained by measurement that a rise of 1½ ft. would send its waters into the lake, and thus entirely change its course. The similarity of the deposits of gravel on the two sides, seems to justify the belief that it once did so. Pop. 802.

SAR, a vil Hungary, Bihar Banat, co. Fiume, between Duboc and Uj-Harva, 4 m. from Jauris. It has a R. Catholic church. Pop. 1246.

SARINE, a river, Switzerland, see Saane.
SARINENA, a tn. Spain, Aragon, prov and 58 m. S.E. Huesca, on a hill, in a fertile, a grammar-school, and two schools for primary instruction, all endowed; a parish church, once belonging to the suppressed Franciscan convent; a nursery, and three fountains. Pop. (chiefly agricultural), 3871.

SARJOU a river, Hindostan. See Gona.
SARK, or Sinar, a small isl. Zogheh Channel, 6 m. E. Guernsey, lat. 49° 25' 30" N. lon. 27° 40' W. (N.), about 3 m. long, and ½ m. broad at the widest part. In one place it is not more than a few yards broad. Almost cliffs, from 200 ft. to 300 ft. in height, bound it on all parts. Copper, lead, and silver ore have been wrought, but not profitably. The surface of the island, though high, is everywhere intersected by deep valleys, combining much to its picturesque appearance. The inhabitants are mostly at once farmers and fishermen. The soil is fertile, producing apples, from which an excellent cider is made, turnips, parsnips, potatoes, and other vegetables. Stockings, gloves, and Guernsey jackets are manufactured and exported to Bristol.

SARLAD, a market, Hungary, Thichur Thelen, co. Bihar in a sandy but fertile district; with a Protestant church and a trade in agricultural produce. Pop. 3334.

SARKANY several places, Hungary.—1 (or Sarkany) A vil Transylvania, dist. Fogaras, near Vauts, on the Ak, here crossed by a bridge. It has a Protestant and a Greek non-united church. The inhabitants are Germans and Wallachians. Pop. 1493.—2 (Sar), A vil, co. and 26 m. from Odenburg with a parish church. Pop. 1174.—3, (Sark), A vil Thichur Thelen, not far from the former; with a Protestant and a R. Catholic church. Pop. 1434.

SARKOZ, a vil Hungary, co. Szabolcs on the Ujlak 4 m. from Aranyos-Megyes. It has a Protestant and a R. Catholic church, and a trade in wine. Pop. 1248.

SARLAT (anc. Sarlatum) a tn France, dep. Dordogne, 28 m. S.E.E. Périgueux in a basin isolated on all sides by low hills. It consists, for the most part, of narrow streets, lined with very indifferent houses, but has a college, an hospital, and an ancient parish church a court of first resort and commerce, and a spacious seminary. The only articles of manufacture are trade in wool. Pop. 4157.

SARMATA, the FOLKLAND.
SARMATO, a tn. and com. Parma, dist. and 10 m. W. Piacenza, on a fertile district watered by the Po, but subject to inundation. It has an old castle, two primary schools, and a trade in corn, wine, cattle, and fuel. Pop. 2692.

SARMINTO (Mount) a remarkable mountain, Terra del Fungo, S. side of Gabriel Channel; lat. 54° 27' 15" S. lon. 70° 51' 30" W. Its height is 6800 ft. above sea-level, rising from a broad base. When viewed from the N., it appears like the crater of a volcano, but when seen from the W. its volcanic resemblance ceases, and it has never been known to present any indications of activity. It is the most striking elevation in the strait; but, from the state of the climate, and its being clothed with perpetual snow, it is almost always enveloped in condensed vapor.

SARNE, or SARNOW, a tn. Prussia, gov and 54 m. S. Posen, with three R. Catholic churches, and a trade in cattle. Pop. 1444.

SARNEN (Lettin, Sarnen), a tn. Switzerland, cap. can. Unterwalden, on the Aa, as it issues from the Leber of Lucerne, 11 m. S.W. Lucerne. It is agreeably situated at the foot of an eminence called Landsberg, and contains a town, a parish church, a large and handsome edifice; an ancient, occupying the site of the castle of Landsberg; a Capuchin monastery, and a superior school. The principal manufacture is leather. There are also die-works, and a saw-mill. Sarnen makes a considerable figure in the early history of Switzerland. The Austrian half having cruelly put out the eyes of an aged and venerable citizen, and some other deeds of cruelty, a conspiracy was formed, and on New-year's day, 1505, twenty persons having obtained access to the castle, on the pretence of making the garrison drunk, but well provided with concealed arms, gained possession of it without a struggle. All the holdings of the castle have disappeared, but the tower commands a beautiful view, and is the well-known spot on which the officers of the canton have met since 1546, to make their elections. Pop. 9007.

SARNESFIELD, par. Eng. Hereford; 1266 ac. P. 1485.

SARINIA, or **PORT SARINIA**, a tn. Canada West co. Lambton, beautiful situated on the St. Clair, not far from the point where it leaves the Lake Huron. It is a large and thriving place, with Episcopal, Free, Methodist, Baptist, Congregationalist, and E. Catholic churches, grammar and common schools, a large foundry, two tanneries, a saw-mill driven by water, and two flour-mills driven by steam. Having a regular ferry across the river to Port Huron, in the U. States, and being a port of entry, and the last port at which steamers bound to the upper lakes can touch, it already commands a large trade, and promises to become a place of importance. Pop. (1854), 1884.

SARNICO, a tn and com. Italy, Lombardy prov and 14 m. E.S.E. Bergamo, at the S. extremity of Lake Iseo, where it discharges itself by the Oglio, here crossed by a bridge. It has a court of justice, several public offices, and three churches a valuable factory, silk mills, quarries and a trade in silk, timber, and building-stone. Pop. 1768.

SARNO, a tn. Naples, prov. Principato-Citra, 12 m. N N W Salerno, near the source of the river of its name, at the foot of the Apennines. It is tolerably well built, and contains an old castle, belonging to the dukes of Sarro, a handsome cathedral, adorned with some paintings of the first masters, a collegiate church, two monasteries, two nunneries, a seminary, an hospital, paper-mill, and copper-foundry. In the centre of the town are a clay-estate and several sulphurous springs, which are much frequented. A great deal of silk of superior quality is produced in the neighbourhood. Sarro is the son of a bishop, and in its vicinity two celebrated battles have been fought, the one between Narves, the general of Justinian, and Totila, king of the Goths, when the latter was taken prisoner and put to death and the other in which Ferdinand of Aragon defeated John of Anjou. Pop. 12,000.

SARNIHMIM a vi. Tyrol, circle and about 24 m. from Rosen; with a deanery church, and two castles. There is a bathing establishment in the vicinity. Pop. 2734.

SARONIO GULI, or **GULI** of **SOINA**, an extensive bay in the Grecian Archipelago, washing the shores of Attica, on the N and N.E., the Lethæan of Corinth on the W and N.W. and Argolis on the E.W. Its length is about 40 m., and its width, at the entrance between Cape Stylio and Colonus, about 30 m. It contains numerous islands of which the largest are Kolon or Salona, situated near the Attic coast, and famous for the naval victory gained by the Greeks over the Persians; and Egina or Ægina, which is situated near its centre, and gives it one of its names.

SAROVNO a tn. Italy Lombardy prov and 16 m. N N W Milan, on the Lura in the midst of a beautiful and fertile plain, which sometimes suffers from inundation. It has two churches, both handsome, and one of them regarded as among the finest in Lombardy, adorned with beautiful frescoes by Luzzi, and other celebrated masters, a suppressed convent, which numbered among its inmates Lorenzo Ganganelli, afterwards Pope Clement XIV. several superior educational establishments, manufactures of various articles in cotton, and three important weekly markets, chiefly for corn, cattle, flax, and silk. The learned Orientalist, Bartolomeo Catena, and the famous singer, Giustina Pasta, were natives of Sarovno. Pop. 4915.

SAROS, a gulf, Turkey in Europe, Ægean Sea, separated from the Straits of the Dardanelles by the peninsula of Gallipoli. At its entrance it is about 35 m. broad. It extends about 45 m. inland, narrowing gradually.

SAROS, or **SAROS-VAROS**, a co. Hungary, bounded, N by Galice, E. co. Zemplin, S. Abaujvar and W. Zips, area, 1880 geo. sq. m. The Carpathian chain stretches along its N. frontier, and sends out ramifications which extend into the interior, and occasionally ascend to a considerable height. From their sides descend numerous streams, of which the principal are the Tura or Turca, and the Topoly or Topia. In the mountainous districts, oats is the only cereal that thrives, but the lower valleys are fruitful in all kinds of grain. Much hemp and flax are also grown, and there is a good deal of fruit. The forests are extensive, and yield excellent timber. The minerals include iron and salt, and also precious stones, particularly opals, which are said to be the finest in Europe. The inhabitants, chiefly Slavacs and Rumanians, are very indolent. The capital of the co. is Sperka. Pop. 201,200.

SAROS-MART-PATAK, a tn. Hungary. See **PATAK**.

Vol. II

SAROWY, or **SAROWY**, a tn. Hindostan, Ajoor, cap. principality of same name, near an affluent of the Lower, 30 m. N W Odypore. It is advantageously situated on the most frequented road for commerce, between Gujerat and Upper Hindostan, and also forms an important military position, from commanding several strong passes. The village occupies the S W portion of prov. Ajoor, between lat. 24 and 26 N., is bounded, N by the Indian desert, E the Aravalli Mountains, S. prov. Gujerat, and W the Rannas and Samudra. By the wars of the petty chiefs, it had been almost reduced to a desert; but has a naturally fertile soil, is well supplied with water and rears very superior cattle. It has greatly improved since taken under British protection in 1823.

SARPA a river Russia, rises in gov. Astrakhan, lat. 46° N., flows N. forming several small lakes, enters gov. Saratov, passes the town of Sarapa, and a little below joins the bank Volga, after a course of about 250 m.

SARREALBE [anc. *Alba ad Saravena*] a tn. France, dep. Moselle, at the confluence of the Sarre and Albe 40 m. E. S.E. Metz with manufactures of linen, straw hats, and sand-shoes. Pop. 2025.

SARREAT, par. Eng. Herts, 1550 ac. Pop. 611.

SARRE, a river, France, rises in the Vosges, near Sarrebourg dep. Meurthe flows easterly N N W across dep. Meurthe, Bas-Rhin, and Moselle, enters Rhénish Prussia, passes Saarbrücken and Sarrebourg and after a course of about 136 m. joins the bank Moselle 3 m. above Treves.

SARRE CRESENTIN a vi. and com. Italy Piedmont, div. and 10 m. S. Aosta with two churches and an elementary school. Pop. 1116.

SARREAL, or **SARREAL**, a vi. Spain, Catalonia, prov. and 23 m. N. Tarragona, near the Anguera. It has a town-house, small prison, primary school, and a parish church. Near it are quarries of gypsum and alabaster. Pop. (aggr. rural), 2124.

SARREBOURG, a tn. France dep. Meurthe, in a fertile district 1/2 bank Sarre, 40 m. N.E. Nancy, at the entrance to the principal pass of the Vosges. It is an important military depot, and has a large baking establishment, and vast magazines, a court of first resort, and an agricultural society and manufactures of coarse cottons, dress, raws, shag-iron, lamp-black, and chemical products. Pop. 2443.

SARREBREMEN, or **SARREBREMEN** [anc. *Sarac Dodana*] a tn. France dep. Moselle, at the confluence of the Sarre and Moselle, 41 m. E. N. E. Metz. It has a court of first resort, an agricultural society and communal college, an old Capuchin convent, the buildings of which are now occupied by the prefecture, a *palais-de-justice*, and well-constructed prisons, manufactures of felt and earthenware, glass, and velvet, and a card-making trade in coarse, hempen cloth, flax, and timber. It is also the central locality for the manufacture of snuff-boxes of which above a million are annually made in the town and the surrounding villages. Pop. 4418.

SARRELOUIS, a tn. Prussia. See **SARRELOUIS**.

SARRIA a vi. Spain, Catalonia, prov. and 3 m. from Barcelona. It has a handsome parish church in the principal square, and in another square are the townhouse, prison and primary school. In the vicinity are the cemetery, two suppressed convents, a monastery, and a royal palace, where the kings of Aragon and count of Barcelona used to spend the summer. There is but little industry of any kind, the place being chiefly used as a summer resort for the wealthier inhabitants of Barcelona. Pop. 8226.

SARRIANS, a tn. France dep. Vendée, 7 m. from Carpentras. Silk worms are reared on an extensive scale, and there is some trade in silk, hay and seafowl. Pop. 1266.

SARRION, a vi. Spain, Aragon, prov. and 23 m. S.E. Teruel. It is poorly built, has a parish church, a school, and an old convent, which was fortified during the last civil war. Manufactures of linen, and a trade in hemp. Pop. 1607.

SARROVNO a tn. Italy. See **SAROVNO**.

SARRELLIE a vi. and com. lat. Saradina, div. Cagliari, prov. and 12 m. S.W. Nuoro on a hill in a healthy district. Pop. 1600.

SARSDEN, par. Eng. Oxford 1770 ac. Pop. 188.

SARIN A, a tn. Italy, The Romagna, leg. and 24 m. S.E. Forlì, 1 bank Savio. It is the see of a bishop, and has salt-petre-mines in its vicinity.

BARSKOE-SILO, a town in Russia. See *BARSKA* (for).
BARSTEDT, a town in Hanover prov and 9 m. N.W. Hildesheim, with a parish church, and a handsome manor-house. Pop. 1463.

BART, a vil. and com. Belgium, prov and 18 m. S.E. Liège. Weaving and handloom occupy the majority of the inhabitants, and some trade is carried on in grain, cattle, and dux. Pop. 2438.

BART DAMB-AVLEING, a vil and com. Belgium, prov Brabant, on the Thil 13 m. S.E. Brussels. It has a brewery an oil and two flour mills, and a trade in corn and wood. Pop. 1672.

BARTHEANO, or **SANTIAGO**, a town in Tucuman comp. Arzaco, on the side of a hill above the Orco, about 12 m. from Montepidreano. It has two parish churches, two small hospitals, a university, a school, several tanneries, dye-works, and a trade in corn, oil, and wine. Pop. 3694.

BARTENE, a town in Corsica, picturesque situated on a ridge between the valleys of Valmo and Orco, 30 m. S.E. Ajaccio. It rises in the form of an amphitheatre, is surrounded with walls in a ruinous condition, contains a number of well built houses, and has some trade in corn of wax, leather, goat and sheep skins, fowls, &c. Pop. 2648.

BARTHE (Latin, *Sarta*) a river, France, rises near the ancient abbey of La Trappe, in the village of Somme-Barthe, dep. Orne flows first N.W., forming part of the boundary between dep. Orne and dep. Sarthe, to which it gives its name, and passing the town of Alençon, then on reaching the frontier of dep. Mayenne, turns S.E. flows circuitously in that direction till it reaches Le Mans, where it turns S.W. enters dep. Maine-et-Loire, and joins L. bank Mayenne a little above Angers, after a course of 125 m. of which about 74 m. are navigable. Its principal affluents are, on the right, the Vègre and on the left, the Orne, Huisne, and Lohr.

BARTHE, a dep. France, bounded N by Orne, E. Eure-et-Loir and Loire-et-Cher, S. Indre-et-Loire and Maine-et-Loire, and W. Mayenne lat. 47° 35' to 48° 30' N. lon. 0° 50' E. to 0° 28' W. It is a very compact, and, but for a considerable protuberance in the N., is almost of a circular form greatest length, N. to S. 61 m.; greatest breadth, 48 m. area, 2571 sq. m. The surface consists generally of tolerably fertile plains, sloping vineyards extensive forests, and pleasant, well-watered valleys. The Sarthe and Lohr are the only navigable rivers, but numerous minor streams circulate in all directions. The climate is temperate and, though somewhat overcharged with moisture is healthy. Rather more than a half of the whole surface is arable, and is generally laid out in well-fenced fields. The corn raised more than suffices for the home consumption. Hemp also is an important crop and the soil being particularly well adapted for fruit, a considerable portion of it is occupied with orchards, from the produce of which large quantities of cider are made. Stone-fruit, nuts, and chestnuts also abound. The domestic animals are of inferior breeds, with the exception of swine, to which particular attention appears to be paid. Poultry are extensively reared, and disposed of chiefly in the Paris market.

The minerals are of little consequence. Iron is the only metal worked, and that to a very limited extent, but there are good seams of red and yellow ochre, and excellent quarries of sandstone, limestone, siliceous, slate, and marble. A mine of sulphate is partially worked, and fine rock-crystals, fossil amber, and garnets are found. There is also some kaurin. The manufactures consist chiefly of silicoth, and iron raw and dyed, chiefly for the colonial market. The trade includes, besides these articles, iron, marble, chalk, goose-quills, corn, wine, malt, clover and lucerne seed; poultry and pork. For administrative purposes the department is divided into four arrondissements—La Mans (the capital), La Flèche, Mamers, &c. Calais—subdivided into 33 cantons, and 361 communes. Pop. (1852), 479,071.

BARTIRANA, a town in Italy, Piedmont, dep. Novara prov. Casale, near the confluence of the Sesia with the Po. It has a court of justice and three churches. Pop. 2381.

BARTORCH, an M. Norway, W. coast of S. Bergenhus, about 15 m. W. of Bergen, lat. 60° 15' N.; lon. 4° 10' E. It is of very irregular shape, and so deeply indented, especially near its centre, as to be divided into two parts, a N. and a S., only connected by a very narrow isthmus. Its greatest length from N. to S. is about 24 m.

BARUD, a vil. Hungary, Hither Thulia, co. Sarud, 21 m. from Eszék; with a church, and a trade in cattle. Pop. 1803.

BARUM (Ozo), *anc. Sordidum*, an ancient representative through England, co. Wilt, about 14 m. N. Salisbury. It long stood foremost in the list of what were usually termed 'rotten boroughs,' and was finally disfranchised by the Reform Act, but is of very great antiquity, and still possesses much historical interest, having been an important settlement of the early Britons, then a Roman station and lastly the residence of the west Saxon kings, till the heptarchy was merged into one kingdom under Egbert.

BARUN, a dist. Hindoostan presid. Bengal, prov. Bahar, lat. 25° 30' to 27° N.; lon. 84° to 85° 30' E.; bounded N. by Nepal; E. the dist. Tirhoot, W. Gorakhpur; and S. by the rivers Gogra and Ganges, which separate it from the dists. Ghazipur, Shahabad, and Patna. The Ganges river forms portions of both its W. and E. frontiers, and traverses its centre, dividing the dist. into Champaran on the N., and Barun proper on the S. Area, 5118 sq. m. Surface almost wholly level, thickly studded by mango-groves; with intervening cultivated tracts, and well watered during the rainy season. Many marshy jungles border on Nepal, and only about one-third of the Champaran dist. is tilled, producing, however, wheat, barley, oats, rice, maize and European fruits, together with opium, indigo, cotton, and other Indian staples. Barun proper is in the highest state of cultivation, and is one of the most flourishing parts of British India. Wine and sale of soda effluents in abundance on the soil. Cotton cloths and pottery are made, and large quantities of grain, cotton, hemp, tobacco, indigo, &c. are sent into Bengal, with timber of all kinds, from Gorakhpur, Hajipur, and Bahar. The seats of large annual fairs. Principal towns are Chuprah (the capital), Bettiah, and Manjeh. The inhabitants are mostly Hindoos. Pop. 1,700,000.

BARUNGPOOR, an ancient city Hindoostan, prov. Malwah lat. 23° 35' N. lon. 76° 35' E. In 1890 it contained about 2000 houses.

BARVA, a market in Hungary, co. Eisenburg, on the Raab, near the confluence of the Enns, 20 m. to the Ghila with a church, a courthouse, an old castle, several mills; and a trade in sheep and tobacco. Pop. 1167.

BARVIZ, a river, Hungary rises N. of Lake Balaton, flows circuitously S.E.; and after a course of about 80 m., joins the Danube, where, by two branches, it forms the island of Margitta. The upper part of the Barvitz has been converted into a canal, which serves the important purpose of draining the extensive marshes which flank its banks.

BARZANA a town in Italy Piedmont, dist. 68 m. S.E. Geneva, prov. Levens, near the Mayra. It was formerly occupied by fens, which have been partly filled up and converted into gardens, but is still surrounded by massive walls, constructed in the 15th century, and is traversed throughout its whole length by the public road, which forms a spacious, handsome, and well-paved street. Barzana is the see of a bishop, and has a cathedral of three naves, with a simple but majestic facade, covered with white marble and good sculptures, another elegant church, four oratories, a handsome townhouse, an episcopal palace, a missionary college, superior public schools, a hospital, and an old castle. Barzana originally belonged to Yverdon, but was exchanged in the 16th century for Leghorn, which the Genoese then possessed. Pop. 8432.

BARZANELLO a vil and par. Italy Piedmont, dep. Genova, prov. Levante, about 1 m. from Sarzana with a church, and a celebrated castle. Pop. 1014.

BARZEAU, a town and com. France, dep. Morbihan, on the peninsula of Ruis, which forms the S. side of the Bay of Morbihan, 14 m. from Vannes. It has a church, with a lofty tower, some trade in salt, obtained from the surrounding marshes; and indifferent wine, the growth of the dist. In the neighbourhood, near the village of Yvancin is the Grand Mont, or Mont-de-Terrain, the largest tumulus in France. It is of a conical shape, measures 108 ft. in circumference at the base, and is so high as to form an important landmark for sailing vessels. La Roche was born at Barreau. Pop. 7185.

BARZEDAR, a town and par. Portugal, prov. Baixo-Alentejo, 13 m. W. Castello-Branco, on a lofty and rugged steep slope, 1. back Almada. Near it considerable quantities of honey are obtained, and mince-wood is sold. Pop. 2840.

SAR-VAN-GEAT, a small fortified tn. Holland, prov Zeeland, on the Belgian frontier, 18 m N Ghent, with which it communicates by canal. It has two market-places, two churches, and a school; several corn-mills, two breweries, and some trade by the canal. Though its fortifications are still quite complete Sar-van-Geat cannot be considered a fortress, though it could be used as a field-work. Pop. 354.

SARBACH, or **SARACUR**, a vil Baden, circle Middle Rhine, 19 m N.E. Strasbourg; with a parish church. The celebrated Marshal furence while reconnoitring in the vicinity was killed by a cannon-ball. A monument to him in granite marks the spot. Pop. 1870.

SARIK, a lake, Russia, in S. of gov Bessarabia, about 24 m. long, N. to S., by 8 m. broad. It receives the Kagalnik, of which it is properly only an expansion, and communicates with the Black Sea a little N. of the mouth of the Danube.

SARAKATCHAWAN, **SARAKATCHAW** or **KILZOR**, a river, British N. America, rises in two large branches in the Rocky Mountains, the more S. about lat. 49°, the more N. about lat. 52° N. these branches, the one of which flows E.S.E., and the other E.N.E. unite about 450 m. from their sources, and after a course of 300 m. more the Sarakatchawan falls into Lake Winnipeg, from which it issues under the name of Nelson River. Its lower course is other 550 m. so that its whole length exceeds 1000 m. in a straight line and 1600 m. measured along the windings. It gives its name to one of the districts of the territories of the Hudson's Bay Company.

SARNEE, a tn Hindoostan, prov and 88 m. N.N.E. Agra lat. 27° 45' N; lon. 78° 4' E. Its fortifications, partially destroyed by Lord Lake, are now in ruins. The town however, is still extensive and populous.

SARS (Tinea), a vil Hungary on Hores, l. bank Theiss, 4 m. from Alpar. It has a trade in corn and wine. P. 1230.

SARANO, two places, Naples, prov Salerno. —1 A tn. S.W. La Spezia, with a church and eight chapels. —2 A tn, I N.E. Ischia, on a rocky eminence. Pop. 1430.

SARSAI a tn., Isl Sardinia, cap. div of same name, on a gentle declivity above the Turritano, about 9 m. from its mouth at Porto Torres, and 106 m. N.W. Cagliari. It presents a pleasing appearance at a distance, standing amidst vineyards, olive-yards, orchards, gardens, finely planted walks and fertile and well-cultivated fields, and surrounded by walls partly destroyed, flanked with square towers. It is entered by two gates, and is well built. The main street, in particular and many of the houses and shops, have a substantial and showy appearance. It has 24 churches, one of them a large cathedral, with a very elaborate facade several convents and numerous, and an archbishop's palace, another fine palace, belonging to the Duke of Asinara, a university, occupying the buildings of the former Jesuit college, an ecclesiastical seminary, an imposing old citadel now converted into barracks, a public hospital, a public library and several fine fountains. The only manufacture of consequence is that of tobacco, which is here grown in large quantities, and worked up in one of the largest establishments in the island, and the trade, for which Porto Torres, at the mouth of the Turritano, is the harbour, consists chiefly in grain, oil, cheese, and sheep and goat skins. Sarsai is the see of an archbishop, the residence of a governor, and the seat of several important courts and public offices. It began to rise in importance as early as the 7th century, and was for some time governed as an independent republic. It has suffered much from war having been pillaged by the Genoese in 1160, and by the French in 1537. Pop. 52,888. —The **NOV Sarsai**, occupying the N. the headland and more fertile part of the island, consists of four provs.—Sumera (the capital), Alghero, Ossi, and Tempio. Pop. (1848) 147,045.

SARSELLO, a tn Italy Piedmont div and 21 m N.W. N. Genoa, in a low valley. It was once fortified but now only one of the towers of its old castle remains. It has two churches, a superior school, a convent, a theatre, and an hospital. Pop. 4640.

SARSENBERG, a tn. Prussia, Westphalia gov and 17 m. E. Münster l. bank Rhine with a church, a school, manufacture of linen, an oil-works, and a trade in cattle. Pop. 1565.

SARSEHAM a tn. Hindoostan, prov Bahar, 34 m. S. Buxar, lat. 24° 53' N, lon. 85° 56' E. chiefly remarkable

for a magnificent mausoleum, built in the centre of a great reservoir of water, about 1 m. in circumference. The dome and the rest of the building is of fine gray stone. The town is large, is partly built of stone also, and contains other Mahomedan remains besides the mausoleum.

SASSI, **SAR-VAN**, or **SARACUR**, a market tn. Hungary, on Neutra, and 8 m. from Hollas, on the Rhine. It contains a R. Catholic church, a synagogue, and a Pauline closter. The last possesses an image of the Virgin, which even in recent times, 100,000 pilgrims have visited in a single year. The principal manufacture is calico, which is made very extensively. Pop. 2890.

SASSINOLO, a tn. Naples, prov Salerno S. Campobasso; with a church, and three chapels. Pop. 1155.

SASSO, a tn. Naples, prov Basilicata, S.W. W. Potenza, at the foot of several small hills. It contains a church, and two chapels. Pop. 8700.

SASSUOLO a tn Italy, ducky and 10 m. S.S.W. Modena, r. bank Secchia with a fine castle. In the vicinity is Mount Zibio, remarkable for its petroleum-springs, and its frequent eruptions of sulphurous steam, flame, and mud.

SASTAGO a tn Spain, Aragon, prov and 40 m. S.E. Saragossa, r. bank Ebro. It is well built, has three squares, a church, castle, and hospital, oil and flour mills, and a trade in salt, charcoal, and agricultural produce. Pop. 1481.

SATA, one of the mouths of the Indus (which see).

SATADL, or **SATADPOO**, a state, Senegambia, extending chiefly along r. bank Faleme, and between it and the Bagre or Fouta. Gold is found in its soil and in the sands of its rivers from which it is extracted by the natives by washing.

SATALGE, a tn. European Turkey Thessaly, 20 m. S. Larissa, on an acclivity. The river of the same name is an affluent of the Balympria. The famous battle of Pharsalia was fought on the plain immediately adjoining the town. **SATALIAH** a tn and gulf, Asia Minor. See **ASIANAT**. **SATANKOW** a tn. Russia gov Podolia l. bank Podgora, N.W. Kamenez. A great part of the inhabitants are Jews who carry on a considerable trade with Galicia. Pop. 3900.

SATGONG an inconsiderable tn. Hindoostan Bengal on a small creek of the Mooghly and about 4 m. W. the town of that name. In the 16th century it was a large trading city in which European merchants had their factories for procuring the productions of Bengal.

SATHEE, or **SHEE**, a tn. Sweden. See **SATERN**.

SATIMAGALUM a tn. and fortress, Hindoostan prov Madras, dist. and 48 m. N. by E. Coimbatore, lat. 11° 21' N lon 77° 16' E. It is a scattered place, standing on a plain, and contains only about 600 houses. In the town and neighbourhood cotton goods are manufactured from the cotton raised in the surrounding country. There is here a temple of considerable repute dedicated to Vishnu. The fort is extensive, and constructed of cut stone.

SATORAI LYA **UNREX**, or simply **UNREX** a market in Hungary Habor Thule on 5 m. W. S.W. Zemplin on the Roczva. It contains a Protestant, R. Catholic, and Greek church a synagogue, and a Jewish monastery. The district is famous for its wine, usually sold under the name of Tokay. Pop. 7600.

SATPOORA, an extensive range of hills, Hindoostan in the Deccan, between the Nerbudda and Tapti. It extends along from near Surat, where it approaches the N.E. termination of the W. Ghats, to lat. 77° E., and is almost wholly occupied by the Bhilal tribes. They have here romantic cut lines, rising into lofty peaks, the highest being about 2500 ft. above sea-level, and consist of amygdaloid, gneiss, and basalt.

SATPUR, a defile, Buft, or Little Tibet, lat. 38° N; lon. 75° 24' E. It has a height of about 12,000 ft. and leads N. from the elevated table-land of Doctan, into the valley of Iskardoh. The path lies along the base of a steep mountain, and could scarcely be forced, as an enemy, by occupying the mountain side, might effectively bar approach by merely rolling down stones.

SATHANO two towns, Naples—1, Prov Basilicata, dist. and 7 m. S.W. Potenza formerly the see of a bishop. —2, Prov Calabria-Ultra L., S. Catanzaro, on a hill with two churches. Silk-worms are extensively reared in the neighbourhood. Pop. 3200.

BATTARAH, a dist. and m. British India, great Bombay which small partly formed a state tributary to the Anglo-Indian government, and was in the 17th century the dominion of the hand of the Mahabata confederacy. It extends from lat. 15° 45' to 15° 50' N., and lon. 75° 40' to 76° E., and is nearly surrounded by the British districts Ochna, Poonah, and Darwar. On the W it is mostly bounded by the mountain range of the W Ghats, but a portion extends across them to the Indian Ocean, on which it has a coast-line of 30 m., limited E. by the Portuguese territory of Goa. Length, 2 W to E.E., 180 m.; greatest breadth, 100 m. area, 10,525 sq. m. This country belongs to the table-land of the Deccan. Its surface is much broken by heights and ravines, and in the district are numerous isolated and abrupt hills, crowned by fortresses. The Kistna river flowing S.E. intersects its centre the Neraoh and Boemah rivers form nearly all the N., and the Gulpurika the E. boundary. Battarah has been one of the best-managed of the native states of India under its late rajahs. Its several divisions containing from 150 to 300 villages each, were administered by a nobahdar and subdivided into other divisions, with from 5 to 20 villages each under junior officers, through whom the whole civil and judicial system was conducted. The land was assessed on the ryotwary system, varying every year with the quantity of land cultivated and the revenue was always paid in money.—(For. Rep. 1830.) The last rajah abolished suttee or widow-burnings, disclaimed the levy of transit duties, and declared the collapse of the East India Company current in his dominions, established a free hospital, introduced vaccination, founded bungalows or halting-places for travellers, built an aqueduct at Battarah, and formed roads and bridges, two of which later are the landmarks in the Deccan.—(For. Rep. 1848.) In a minute of the Governor of Bombay after the lapse of the district to the British rule it is stated that no great changes would be required there, 'for we have to deal with a system greatly in advance of those which usually exist in native states, and in the practical working of it, particularly in the police, we may find portions which may not be so improving our own.'—(For. Return, March 1851.) The total annual revenue is estimated at £140,000. After Battarah (the capital), the chief towns are Kolapoor, Pundargoor, Metrich, Tampus, Vugaria, and Belapoor. The state of Battarah was founded by Nevajee, the famous Mah raja leader in the wars of Annesborough. By son of his name, in 1749, the leadership of the Mahabata was resigned to an officer of his court named the Pulewa, who transferred the seat of the Mahabata government from Battarah to Poonah. The finding war of 1817-18, finally placed the whole dominion of the Pulewa at the disposal of the British, when the present territory was erected into a sovereignty for the rajah Parthab Singh, who was raised to the throne under British protection in 1819. In 1839 that sovereignty was, however, deposited by the Anglo-Indian government on account of alleged intrigues against its supremacy in India, the real extent of which has been often the subject of much controversy in England, both in and out of Parliament. Parthab Singh retired to Bangalore, in Hindoostan, where he died in 1847. His brother the late rajah, died at Battarah in 1848, without legal descendants, and his adoption of a successor not being ratified by the Anglo-Indian government, Battarah then ceased to exist as a separate state, and was incorporated into the Bombay presidency.—**BATTARAH**, the cap., 60 m. S.E.E. Poonah, consists of a decayed fort at the W extremity of a hill range, steeply raised 800 ft. above an adjacent plain, and a town clustered around the base of the rock. The town was some years ago composed of a long street of tiled huts, and except a few palaces then building for the rajah, it had no edifice worthy of notice. Its vale, within the influence of the sea-breeze, is one of the most pleasing tracts in the Deccan, and about 1 m. E. are European encampments. The fort was taken from the Rajapoor sovereign in 1672, by Nevajee, who made it the seat of his empire.

BATTLEBRIGHT, par Eng. Deccan; 515 sq. Pop. 57. **BATTLEBRIGHT** (Br.) a tn. France, dep. Cher, l. bank Loire, 20 m. N.N.E. Bourges, with manufactures of leather. It depends upon the small port of St. Thibault, to its vicinity, where there is a considerable export of wine and where grows the most of the surrounding district. It formerly possessed a rich ancient abbey. Pop. 1065.

BATURNUM-AM-ARE (Br.), a tn. France, dep. Yvelines, 20 m. S.N.E. Argenne, at the foot of a rocky eminence. It has some manufactures of galena iron. Pop. 118. **BATZING**, a vil. Saxony, circle Eriksen, hall and near Wolkstein; with manufactures of lace, several mills, and a trade in timber. Pop. 1303.

BAUBERHUTTE, or **BAUBERHUTTE**, a river, Hindoostan, issues from the Dhanur Lake, S.E. of Oudepore flows S.E.E. through prov. Gujarat, passing the towns of Ahmednagar and Ahmedabad and after a course of about 200 m., falls into the N. extremity of the Gulf of Cambay.

BAUZEJO (Br.) a vil. Spain, Andalucia, prov. and 37 m. S.E. E. Sevilla. It has a townhouse, granary, two primary schools, a church, and two barnyards, three flour and two oil mills, and two manufactures of coarse earthenware. Pop. (agricultural), 3538.

BAUDRE, a river, France, formed in dep. Lot-et-Cher a little N.E. of Salbris, by the union of two streams called the Great and Little Baudre, flows S.W., passing Romorantin, and joins r. bank Cher after a course of about 89 m.

BAUERHAWENHEIM, a vil. Hesse-Darmstadt, prov. Rheinhessen, circle Rhenan, on the Selbach, 7 m. S.W. Mainz, with a parish church. Pop. 1000.

BAUGUES, a tn. France, dep. Maine-et-Loire, 19 m. S.W. Le Puy. It has a very ancient lofty tower with a curious chimel manufactures of coarse woollens and worsted, and a trade in wool, cheese, and cattle. Pop. 1896.

BAI GUR a large to Hindoostan prov. Malwah, 74 m. E.S.E. Bourges, lat. 23° 48' N. lon 76° 47' E. Little was known of it until it was taken by the British in 1818, when it was found to be a large, flourishing, and opulent city.

BAUJON, a tn. France, dep. Cherbourg-Inférieure, on the Seine, which here begins to be navigable, 35 m. S.E. La Rochelle. It has manufactures of coarse and woollen goods, and a trade in salt, corn, wine, and brandy. Pop. 1698.

BAUL, par. Ind. Down 5272 sq. Pop. 1520.

BAUL, par. Eng. Gloucester 564 sq. Pop. 550.

SAULGE (Br.) a tn. France, dep. Nièvre, 20 m. N.E. Nevers, between two well-wooded hills. It was anciently a place of considerable importance. Pop. 1280.

BAULHEIM (Nimrod), a vil. Hesse-Darmstadt, Rheinhessen circle Almy dist. and near Wirtstadt. It has two parish churches, and a castle. Pop. 1606.

SAULLEU (anc. Solenure) a tn. France, dep. Oise, 30 m. W. Dyon. It is surrounded with walls, but, with exception of the suburbs is poorly built, has a court of commerce, a communal college, an ancient Romanesque church, with beautiful columns and mouldings, manufactures of common cloth, leather and embroidery; and a trade in wine, corn, hemp, wool, wood, and fish. Pop. 2852.

SAULT (anc. Salina), a tn. France, dep. Yvelines, in a valley of the name, on the Mesque 20 m. N.E. Argenne. It has manufactures of serge and a sulphurous spring. P. 1476.

SAULT, or **St. Mary**, a vil. U. States, Michigan 500 m. N. by St. Mary, Detroit, 8 m. St. Mary's Strait, at the falls of St. Maria. It contains a church, a jail, three churches, and two schools. Here also is Fort Brady, a U. States military post, and a storehouse of the American Fur Company. The falls or Sault of the river are nearly rapid, immense quantities of white fish are caught here, and cured for the W. markets. Pop. (1850), 890.

SAULKUREB, a tn. France, dep. Vaucluse, 31 m. S.E. Epinal. It has a cotton-mill, and some trade in cheese. Pop. 1592.

SAULZOR, a vil. France, dep. Nord, 12 m. from Cambray. It has manufactures of cotton, wool, and cotton waste, hosiery, a flax and several oil mills. Pop. 2263.

SAUMURE (anc. Solenure), a tn. France, dep. Maine-et-Loire, picturesquely situated on the Loire, here crossed by a magnificent bridge, 25 m. S.E. E. Angers. It consists of a high and low town, both situated on the l. bank, and a suburb on the r. bank of the river. The high town so-called from occupying a steep acclivity, is irregularly built; the low town has a much better appearance, and is adorned by a fine quay lined with handsome houses. The buildings deserving of notice are the old castle, overlooking the town, and the hill where the tower, now much dilapidated, though still used as an arsenal; the half-ruined church of St. Pierre, in the form of a Latin cross, with a massy tower; the church of

Nôtre Dame de Namilly, the oldest and most curious church of the town, with a nave and apse, which have been supposed to date from the sixth century; the church of **Nôtre Dame des Artilleurs**, surmounted by a magnificent dome, the baths, theatre, and public library. The manufactures consist of linen goods, and works in enamel and glass; there are also salt-petre-refineries and tanneries. The trade is in corn, flour, wheat, wine, hemp, flax, and iron. **Saumur** is the seat of a court of first-resort and commerce, and possesses a communal college, riding-school, and *École de Cavalerie*, in which from 800 to 400 youths are instructed in all the branches suited to their military profession. It early distinguished itself in the names of the Reformation and was placed by Henry IV under the government of the wise and able Protestant leader Duplessis Mornay, under whose fostering care it soon attained great prosperity, but declined after the revocation of the edict of Nantes. One of the greatest exploits of the Vendéens was performed here in 1793, when, headed by Henri de La Roche-Jaquelin, they stormed the heights on which the republicans had entrenched themselves 15,000 strong, and gained possession of the town. About 2 m. from Saumur is a Dolmen or Tumulus consisting of huge blocks of unheaven stone set upright, with others laid across them, and forming one of the largest and most perfect Druidical monuments in France. The learned Madame Ucker was born here. Pop. 10,626.

SAUMUROIS, *see* *dist. France*, which formed part of prov. Anjou, and is now divided between depts. Indre-et-Loire, Maine, and Vienne.

SAUNDBY *see* Eng. Notis; 1878 *see*. Pop. 88.

SAUNDERS, an isl., S. Atlantic lat. 57° 48' S. lon. 26° 44' W. It is apparently about 80 m. in circumference, showing a surface of considerable height, covered with snow.

SAUNDERTON, *see* Eng. Bucks 1890 *see*. P. 880.

SAUNG a large river Annam. *See* DOWNAI.

SAURAT, a vil. France, dep. Ariège, 15 m. from Foix with an ancient church, manufactures of iron, and several saw-mills and distilleries. Pop. 3665.

SAURITSCHE a vil. Austria, Styria, circle and near Marburg, on the Drava. It has a court of justice, a parish church, a castle, a parsonage, and a common school. Pop. (dist.), 1760.

SAUTHORPE, *see* Eng. Lincoln; 1788 *see*. Pop. 193.

SAUTERNES, a vil. France, dep. Gironde, 12 m. from Baza, situated in the midst of rich vineyards, which produce one of the best white wines of all the Bordelais. Pop. 1087.

SAUTHUR, a picturesque situation in Hindostan, 106 m. W. by S. Madras, lat. 13° 57' N. lon. 78° 46' E. The suburb of the Carnatic has a garden here, which is considered one of the best in the country but, like most Eastern gardens, is totally devoid of taste and beauty.

SAUVE, a *see* France, dep. Gard, 19 m. N.W. Mende. It has manufactures of hosiery and silk. The latter are extensively made, and form a considerable article of trade. Near it are the thermal baths of Fonsomge, efficacious particularly in cutaneous affections, and much frequented. Pop. 3820.

SAUVENIERE, a vil. and com. Belgium, prov. and 10 m. N.W. Namur; with a brewery, corn, oil, and other mills, and a trade in agricultural produce. Pop. 1101.

SAUVETERRE, a *see* France, dep. Haute-Garonne, 14 m. S.W. Gaudens. Pop. 3176.

SAUVEUR (St.), a *see* and com. Belgium, prov. Hainaut 19 m. N.E. Tournay. The chief employments are agriculture, spinning flax, and weaving linen. There are also a brewery, distillery, bleachfield, and five flour-mills. Agricultural produce is exported. Pop. 3237.

SAUX, or **SAUTZ**, a river France, rises from the Lake of Remoncourt, 6 m. E. Fossomge dep. Haute-Marne, on the

confines of dep. Meuse; enters that dep., flows N.W., enters dep. Bassin-Marne, and joins 1 bank Ornain, after a course of nearly 80 m.

SAUXILLANGES (Latin, *Colonienses*) a *see* France, dep. Fay-de-Dôme, on the Gironde, 19 m. S.E. Clermont, with manufactures of bombasina, camel, and sayette, sermille and tanneries. Pop. 1485.

SAUZE-DE-LANZAC, a vil. and com. Italy Piedmont, div. Turin, prov. Susa, on the Dora, at the foot of the Varco di Bestidres with a parish church. Pop. 1165.

SAVA, a *see* Naples, prov. Otranto 19 m. E.S.E. Taranto. Pop. 2000.

SAVAGE ISLAND an isl., S. Pacific Ocean lat. 18° 10' S.; lon. 169° 50' W. (n.); about 28 m. in circuit of a round form, and good height. It appears to consist wholly of coral-reefs, all overgrown with woods and bushes. It was discovered in 1774 by Cook, and was so called by him from the ferocious disposition evinced by the natives. It now (1854) contains two churches, two native teachers, and about 1000 inhabitants 300 of whom profess Christianity.

SAVAII, an isl., S. Pacific Ocean; lat. (S. point) 15° 49' S.; lon. 173° 29' W. (n.) It is the largest of the Samoan group being 40 m. long, and 20 m. broad. Its shore is low and the ascent to the centre gradual except where the cones of some extinct volcanoes occur. In the middle of the island a peak rises above 4000 ft. visible at a distance of between 50 m. and 60 m. The interior has never been explored and rarely entered even by natives. It produces spontaneously the cotton, nutmeg, indigo coffee, and sugar plants. The S. side of the island is rocky and iron-bound with a heavy surf breaking on it. The only safe harbour is on the N. point, called the Bay of Matasatu. Supplies of hogs poultry vegetables, wood and water, may be obtained here.

SAVANNA LA MAR—1 A *see* Hayti republic of Santo Domingo, N.E. coast, S. shore of Samana Bay.—2, A small is. Jamaica, Pinedale Bay, S.W. coast.

SAVANNAH, a *see* and port, States Georgia, a bank river of same name, 17 m. above its mouth in the Atlantic on a canal connecting this river with the Ogeechee and on a

railway connecting it with some of the main lines of the interior, and giving it immediate access to the head of the Mississippi, 520 m. S.W. Washington. It stands on a sandy flat about 40 ft. above the water, and used to be considered unhealthy, partly on account of the marshes which bordered the flat at its E. and W. extremities and still more on account of the inundation of the neighbouring district for the cultivation

of rice. The latter evil has, however, in a great measure ceased in consequence of an arrangement with the proprietors of the rice-grounds, who have been induced by a payment of about \$24,000, subscribed by the citizens, to cultivate the dry for the wet mode of cultivation. The town is laid out with great regularity in a series of spacious streets and squares, the former crossing each other at right angles, and generally lined with a double row of trees and the latter, about 20 in number formed by the intersections of the streets, and usually enclosing a space of about two acres, laid out in grass-plots and shady walks, so as to give the whole place, during the spring and summer months, an airy cool, and rural appearance. Up to 1839, a large proportion of the houses were constructed of wood, but in that year a dreadful conflagration having burnt down 463 of these, and destroyed property to the value of about 200,000 sterling, brick has been generally substituted for wood, and many improvements, tending to secure cleanliness, comfort, and health, have been introduced.

The public buildings include 13 or 14 churches, among which the independent Presbyterian church, an elegant structure, of light-coloured granite, erected at a cost of about 200,000, deserves particular notice; a Jewish synagogue, an academy, a courthouse, jail, exchange, several fine banking-houses, an arsenal, U States barracks, a market-house, theatre, female asylum, widows' asylum, hospital, and poor-house. The manufactures are insignificant, but the trade is important, and gives employment to its extent in the large number of warehouses, from three to four stories high, built along the river, so as to be accessible at once from the wharfs below and from the streets behind. The harbour is one of the best on the E coast of the U States. The bar across the mouth of the river has from 15 ft. to 21 ft. of water at ebb-tide vessels drawing 15 ft. or 16 ft. water get up to the Five-Fathom Hole, about 3 m. below the town, and thence drawing only 13 ft. get up to its wharfs. Beyond this the navigation is confined by shoals, boats for 200 m. to Augusta, and by pole-boats for 150 m. further. The means of communication which have been greatly extended by railways, completed or in course of erection. The staple exports of Savanah are lumber, rice, and more especially vast quantities of upland cotton. The exports in 1859 comprised 873,064 bales of cotton - 9,992 casks of rice and 25,508,500 feet of lumber of which Britain received 110,409 bales cotton 7590 casks rice and 4,340,500 ft. lumber. In December 1854 the Confederate forces under General Hardee were defeated Savannah, which was then occupied by the Federal General Sherman, after his remarkable march from At Lanta to the coast. The capture of Savannah was the first death-blow to the Confederate cause, which immediately began to decline rapidly. Pop. (1858) estimated at 25,000.

SAVE, or **SAY**, a river Austria, rises in the E. slope of the Duria or Julian Alps, in circle Lybach, Myria, about 12 m. S.W. Villach flows S.E. through Myria, along the E. frontiers of Styria, and into Croatia, where, about 10 m. E. Putina, it receives its first important tributary, the Kulpa, which joins it on the right. On reaching the E. frontiers of Croatia, it receives its second important tributary the Una, which also joins it on the right. From this point, its course, though very crooked, becomes on the whole E.S.E., and till its junction with L. bank Durnitz at Belgrade, it forms the S. boundary of the Austrian dominions, separating them from Turkish Croatia, Bosnia, and Servia, and receiving from these countries - and, like the other tributaries already mentioned, all on the right - the Vacha, Bosna, and Drin. Its whole course is about 840 m., and, with exception of the first part, which is between narrow and rather steep banks, it flows in an open country, along which it winds with an almost sluggish current, not sufficiently overflowing its banks, and producing fearful devastation. The great length of its navigable course is of vast advantage to the surrounding districts, particularly by enabling them to find an easy market for their agricultural produce. Above the confluence of the Kulpa, it floats barges of 15 tons to 20 tons, and below, vessels of 150 tons to 200 tons.

SAVE, a river, France, rises in dep. Haute-Pyrénées, on the frontiers of Haute-Garonne; flows N.E., and joins L. bank Garonne, after a course of about 70 m.

SAVELANE, a mountain, Persia. See **SAVELAN**.

SAVEN, a river, France, rises in the N. of the town of Lons, 22 m. N.W. Nantes. It is poorly built, has a fine sandy prairie, a court of first resort, and is

agricultural society. The Vendéens sustained a defeat here, by which their force was finally annihilated. Pop. 1150.

SAVENTHEM, a vil. and com. Belgium, prov. Brabant 4 m. N.E. Brussels; with a church; a brewery, paper, oil, and flour mills, and a trade in corn. Pop. 1810.

SAVERDUN, a tn. France, dep. Ardege, L. bank Ardege, 20 m. N. Fets. It was anciently fortified, and, during the war of the Albigenes, successfully stood a siege by Simon de Montfort, who was finally obliged to retire. It is in general well built; and has a well-endowed hospital, saw mills, and silk-works. Pop. 2077.

SAVERNE (German, *Rheine-Kehren* or *Zorren*, now *Zu Zorren*), a tn. France, dep. Bas-Rhin, on the Zorn, 18 m. N.W. Strasbourg. It is a place of great antiquity, and rises to some importance under the Romans. It was afterwards fortified and stood numerous sieges, particularly during the Thirty Years' war when it was repeatedly taken and re-taken. The modern town is irregularly built, and contains no edifice deserving of notice except the old episcopal palace, which has been converted into barracks and a prison, and the parish church, which is surmounted by a very ancient and lofty tower. The manufactures consist of woollen cloth, hosiery, copper and iron ware, leather, bricks, and tiles. The trade is in ironware, tobacco, and wood, which is floated down the Zorn. Pop. 5604.

SAVIANO, a tn. Naples prov. Lavoro, S.W. Nola in a flat and fertile district with three churches. Inhabitants chiefly employed in rearing silk-worms. Pop. 3550.

SAVIGLIANO, a tn. Italy Piedmont, prov. and 8 m. E. Saluzzo pleasantly situated in a fertile plain, at the confluence of the Maesa and Grana, the former watering its W. and the other its E. side. It consists of the town proper and several suburbs, and a well built, the principal street being regular and spacious though those which intersect them are narrow and dark. There are also two squares, one of which, used for the public markets, is lined with porticoes; while the other, of a quadrangular form and considerable extent, is formed by regular and well-constructed houses. The principal buildings are four churches an oratory of great architectural merit, and richly decorated; three monasteries and a seminary a college and several schools, a large hospital or infirmary, a founding hospital, a house of refuge, and several other charitable endowments a handsome theatre and large cavalry barracks. The manufactures consist of woollens, partly fine but chiefly of coarse quality; linen, silk, leather, stained wax, papers, and candles, the principal trade, in addition to the above articles of manufacture, is in cattle. The French defeated the Austrians here in 1796. Pop. 15,546.

SAVIGNANO, -1 A tn. Italy The Romagna, deleg. and 19 m. S.S.E. Forlì. It is a fine country-town and was fortified in 1561. Pop. 5000 - 3 A tn. Naples prov. Capitanata 9 m. W.S.W. Bovino, on a hill. Pop. 1568.

SAVIGNONE, a tn. Italy Piedmont, div. and 12 m. N.E. Geneva. It is an ancient place consisting of steep and ill-paved streets, and an irregular square, and has an old feudal castle, a parish church, and a large structure, originally an hospital but now converted to private use. Pop. 3332.

SAVINDROOG, a hill fort, Mysore See **SAVANASANOOG**.

SAVINIEN (St.) a tn. France, dep. Charente-Inférieure, r. bank Charente, 30 m. S.N.E. La Rochelle with a curious church of the 11th century, the ruins of an extensive monastery and a trade in corn wine, and brandy. Pop. 1516.

SAVOIR (St.) four par. Reg. - 1 Devon, 85 ac. Pop. 2121 - 3 York (St. Richard), 2712 ac. Pop. 2760 - 8 1st Gloucester. Pop. 1087 - 4 1st Jersey. Pop. 2404.

SAVONA a seaport in Italy Piedmont, div. and 24 m. S.W. Genoa, cap. prov. of same name, W. side, Gulf of Genoa, at the foot of a hill which commands it on the E. It is partly surrounded by old walls, and defended by a citadel, but does not possess much strength. It has several good houses, but the majority are indifferent; and the streets, though well-paved, are inconveniently narrow. The objects most deserving of notice are the cathedral, a majestic structure, with fine pictures, base-reliefs, sculpture, and carvings; several other churches, many of them with rich decorations; six convents, two monasteries, an episcopal seminary, two colleges or gymnasies, a large hospital, and various other charitable endowments. At the harbour, which is good, and defended

by a staff, a considerable trade is carried on in milk, wool, and fruit. Savona is the see of a bishop, and the seat of a superior court of law, and several public offices. It was anciently called Sabota or Sabazia, had bishops as early as the 7th century and had a large and flourishing commerce till the 18th century when the Genoese, who had taken it in 1582, expelled it. It was again taken by the Genoese, who, in 1746, gave it to the French, and the present Chablais was born at Savona. Pop. 16,211.

—The prov., area, 304 sq m., is bounded, N by prov. Aosta, N. E. Genoa, S. E. and S. Gulf of that name, S. W. Albenga, and W. Mondovì. It is traversed in a N. E. direction by the Apennines, which have their base on waters on the N. E. and S. E. slopes of the Ligurian Alps, and thence on the N. W. to the bottom of the Po. For 79,248.

SAVOY (Duchy of) [Italian *Savoia*; French *Savoie*; German, *Stoeben*, Latin *Sabaudia*] formerly a *dux* *Carolinus* Swiss, now forming two of the departments of France, lat. 46° 4' to 46° 28' N. lon. 6° 30' to 5° E. bounded N. by Switzerland, from which, on that side it is almost entirely separated by the Lake of Geneva; N. E. Switzerland E. and S. E. Piedmont and S. and W. France, length, 44 to S. 92 m., breadth, 85 m. area, 3597 sq. m. Savoy is one of the most mountainous countries in Europe, the eastern base of the Alps forming the greater part of its territory. The principal point of elevation with the loftiest chain of the Alps, which stretch along its E. and S. frontier, and sending out numerous ramifications in all directions, make its surface almost a continued succession of lofty mountain and valley. It belongs entirely to the basin of the Rhone, which, forming its W. boundary there receives its drainage directly while the drainage of the N. is transmitted to it chiefly by the Lake of Geneva and the Arve, and that of the S. chiefly by the Isère and its tributary Arre. The lakes are not numerous and, with exception of that of Geneva, which is situated with Switzerland, not individually of large extent. The most extensive is Lac Léman, which occupies the N. E. corner of the country. The physical structure of the country the extent of arable ground is necessarily limited, but in ordinary years, with the aid of chestnuts, which form an important part of the food of the lower orders, the grain raised nearly meets the consumption. In favored spots, particularly in the h., in the lower valleys and slopes, the vine is cultivated with success. But the chief riches of the country are in its cattle and dairy produce, a large proportion of the surface yielding nothing but hay or pasture. The timber too, which clothes many of the mountain steps up almost to the limits of vegetation is of great consequence beyond these limits is a still higher range of the Alps, which are the source of the great rivers of the life are all but extinct. The minerals include iron, copper, silver, lead, and lignite, but seldom in such quantities as to make the working of them important. The rock-crystals found are often remarkable for their size and beauty. The main features consist chiefly of coarse woollens, leather and hardware. The trade, so far as derived from native resources, is almost confined to cattle, skins, wool, and dairy produce but there is an important transit trade carried on across the country between France and Italy, chiefly by way of Mount Cenis. By treaty of 24th March, 1860, Savoy was ceded by Sardinia to France, of which it now forms two departments, Savoie, pop. 268,977, area 17,778 sq. m., and Haute Savoie, (Upper Savoy), pop. 106,466, area 5,467 sq. m. The capital is Chambéry. The principal towns are Annecy, Evian, and Thon.

RAVU, Bay of, 10° 45' N, 156° 55' E, Pacific Ocean, 100 miles from the coast of the island of Sumatra, Indonesia. The island of Ravu is 10° 45' N, 156° 55' E. (2) about 10° N, long E. and W; low to seaward, with hills of moderate height in the centre. At each extremity of the island there are low sandy banks with heavy breakers. It is well-watered and fertile, yielding millet, maize, beans, water-melons, sugar-cane, cotton, tobacco, indigo, betel, and cinnamon, with coconuts, tamarind, mangoes, lemons, etc. Ravu-faloes, great sheep herds, swine, dogs, and cats are plentiful there are a few wild boars and deer and a great number of birds and turtles. It divided into five districts, the principal cities, all of which are subject to the Dutch government of Timor. Pop. 30,000.

SAWBRIDGEWORTH, par Eng Herts; 6608 no.
Pop. 2071.

SAWLEY a vil. and par. England, co and 9 m. S.E. Derby, on the Trent and Mersey Navigation, and on the rail-

way to Leicester. It is neatly built, and has a large and venerable church, with an ancient carved oak screen; a chapel of ease, and Baptist, Wesleyan, and Connection Methodist chapels. Many of the inhabitants are employed in frame-work, knitting, and lace-running. Area of par., 1915 ac. P 1934.

SAWSTON, par Eng Cambridge; 1856 no. Pop. 1124
SAWTRY, ALL SAINTS, of St ANDREW, par England.

Huntingdon 5780 (inclusive of St Judith) ac. Pop 978

SAX [*Lahn-Saxerie*] a tn Spain, Valencia, prov and 26 m. N.W. Alicante, r bank Vinalopo, on the side of a lofty precipice crowned by the ruins of an old castle. It has generally steep streets, a parish church, court house, prison, hospital and primary school, manufactures of coarse paper, several distilleries and oil and flour mills. Pop 2186.

SAXAPAHAW, or **HAW**, a river U States, rises in the N of North Carolina, flows SE and unites with the Deep in forming the Cape Fear river after a course of about 80 m.

SAKE-COBURG-GOTHA. 224 CONING

SAXE-MEININGEN HILDBURGHAUSEN [German, Sachsen-Meiningen-Hildburghausen] (see p. 100)

and Eisenach, and twelve smaller rivers, as Ilmenau, Salsungen, Zillbach, Gutsbach, Allmied, Orla, and Thurnau. Weimar Proper is bounded, N. by Prussian Saxony, W. Prussian Saxony and the principality of Schwarzburg-Rudolstadt, S. the principality and S.E. and E. the duchy of Nassau-Altenburg. Neustadt lies to the S.E. of the former, and, though at no great distance, is completely separated from it. Eisenach, situated immediately to the W. is bounded, N. by Prussian Saxony, W. Hesse-Cassel, S. Hesse-Cassel, and E. the duchies of Nassau-Königsberg and Nassau-Colong-Gotha, area of the whole grand duchy 10699 geo. sq. m. The surface is in some parts mountainous, and in others finely undulating, the intervening ridges of the higher grounds forming the sides of wide valleys. It almost wholly belongs to the basins of the Elbe and the Weiser, the former draining Weimar by the Saale, which traverses it, and the Elster-Orla, the and Unstrut, tributaries of the Saale and the latter draining Eisenach by the Weiser, and its tributaries, Held, Havel, Felda, and Ueber. The lakes are individually of small extent, but numerous. The principality of Weimar is the most fertile part of the duchy, and, in good years, raises corn sufficient to satisfy the home consumption, and leave a small surplus for export. Eisenach is the district best adapted for agriculture, but raises considerable quantities of oats and potatoes. In the valley of the Saale much hemp is grown and in some sheltered spots particularly in the neighbourhood of Jena, a few vineyards are seen. The forests are very extensive, and form the principal wealth of the grand duchy. The most valuable stock is sheep, to the fleece of which much attention has been paid. Swine also, are very numerous, and game and fish are alike abundant. The minerals include silver and copper formerly but no longer worked, iron and manganese, still worked to some extent; salt, and potash clay. Manufactures have made most progress in Eisenach, where woollen, cotton, and linen tissues, ribbons, and carpets, &c. are made. In Weimar and Neustadt manufactures are insignificant. In the former the most important articles appear to be books and maps. The principal exports are timber, dried fruit, wool, and grain. For administrative purposes the grand duchy is divided into the two circles of Weimar-Jena-Neustadt, subdivided into 15 bailiwicks, and of Eisenach, subdivided into 10 bailiwicks. The government, as fixed by the charter of 1816, is constitutional. At least nine-tenths of the inhabitants are Lutherans, and distinguished both for industry and intelligence. The revenue in 1853 was \$530,478, and exceeded the expenditure. As the 16th member of the German Confederation, Nassau-Weimar shares the 32th vote in the pleases with the other Nassau duchies. Its contingent of men is 2910. Pop. 361,094.

BAKELBY, two parts. Eng. — 1. Leicestershire, 1890 ac. Pop. 118. — 2. Lincoln, 4270 ac. Pop. (1851) 1137.

BAKKEJØBING (Latin, Scenopole) a tn. Denmark, tel. Lolland, 6 m. E.N.E. Maribo, on a small stream, which, a little below, falls into the narrow and shallow Bakkejølde, where it has a winter-haven of the fourth class, admitting vessels drawing 9 ft. Pop. 900.
BAKLINGHOIM, three parts. Eng. North. — 1. 1498 ac. Pop. 162. — 2. (Northampton), 2111 ac. Pop. 608. — 3. (Thorp) 2111 ac. Pop. 148.
BAKMURDOHAM, a market tn. and par. England, on Norfolk, 16 m. N.E. Ipswich. It has a respectable market-town, an Established church, and a chapel belonging to the Congregationalists, a new structure, erected in 1849, a national and two small day schools, a nursery for young ladies, a Doreas society, and a mechanics institute. Area of par., 1101 ac. Pop. 1180.

BAKONY (Kronosov or) [Latin, *Scenopole*; German, *Stöcken*; French, *Sene*] a kingdom of Central Germany, forming the fourth state in the Germanic Confederation, and bounded, N.W. N. and E. by Prussia, S.E. and S. Saxony, S.W. Bavaria, and W. Nassau, Nassau-Weimar and Nassau-Altenburg; greatest length, N.E. to S.W., 185 m.; greatest breadth, 75 m. perimeter about 736 m., of which about 308 m. bound with Bohemia, 206 m. with Saxony, 173 m. with the Nassau duchies, and only 50 m. with Rhenish; area, 4540 geo. sq. m. It is nearly in the shape of a triangle, the longest side of which, from the

S.E., with the opposite vertex is situated to the N. of the town of Leipzig, and extends from lat. 50° 15' to 51° 30' N. lon. 12° 10' to 15° E. For administrative purposes it is divided into the four circles (*Administrativkreise*) of Dresden, Leipzig, Zwickau, and Bautzen or Rodolstadt, subdivided into bailiwicks. Their area and population are exhibited in the following table —

AREA AND POPULATION OF BAKONY IN 1828 AND 1854.

| Circles. | Area in Geo. Sq. M. | Pop. (1828). | Pop. (1854). |
|----------|---------------------|--------------|--------------|
| Dresden. | 1286 68 | 557,755 | 615,105 |
| Leipzig. | 1019 26 | 441,330 | 555,619 |
| Zwickau. | 1437 08 | 733,507 | 872,446 |
| Bautzen. | 758 94 | 207,444 | 310,360 |
| Total. | 4265 92 | 1,939,032 | 2,353,530 |

The surface though very much broken may be regarded as an inclined plane, which commences in the S. in the Erzgebirge chain, and slopes towards the N. In the more elevated districts, the scenery is wild, and sometimes almost desolate; while on either side of the Elbe, from the Bohemian frontier to Pirna, is a remarkable and exceedingly interesting tract, covered with beautiful mountain formations, which has received the name of the Saxon Switzerland. Where the surface begins to lower the ramifications proceeding from the principal range form the sides of beautiful and fertile valleys, which, as they descend down wide out into plains, well adapted for agriculture, and hence, though in the Ober-wiesenthal, the Fichtelberg attains the height of more than 3700 ft. the mean height above the sea does not exceed 450 ft. On the Prussian frontiers, where it subdues to its lowest point, the height above the sea is only 250 ft. The loftiest summits are generally composed of granite and gneiss and so rich in mineral products, that the ores (*erze*) contained in them have given name to the whole chain. To the E. on the right bank of the Elbe, the Erzgebirge is continued by the Saxongebirge, a branch of which, under the name of the Leisnitzergebirge, or Mountains of Leisniz, covers a considerable portion of the E. of Saxony. They nowhere reach the height of 2500 ft., though more than one summit exceeds 2000 ft. They are composed for the most part of granite, basalt, and sandstone.

With the exception of a very small portion of the E., which sends its waters to the Baltic by tributaries of the Oder and Spree, the whole of Saxony belongs to the basin of the Elbe, which forcing its way in a depression of the chain, where the Erzgebirge is succeeded to terminate and the Saxongebirge to begin, sends Saxony traverses it in a N.W. direction for about 70 m., and quits it near Strehla, after having divided the kingdom into two distinct portions, of which that on the left or W. bank is by far the larger. On the E. bank, accordingly the Elbe has reserves only a number of small torrents and streams scarcely deserving of notice, but on the W. bank it has several important tributaries, which take their rise and have a considerable part of their course within the kingdom, but do not join the Elbe till they have left it. Of these tributaries, the most important are the Mulde, formed by the junction of two main arms called the Zwickauer-Mulde, and the Freyberg Mulde, and the Elster, which likewise divides itself near Leipzig into two arms, one of which unites with the Pleisse and Parthe, while the other takes the name of Luppe. The lakes, particularly in the N. and N.E., are numerous, but individually insignificant.

The climate in the loftier mountain districts, and what is called the *Vogelstein*, is so very cold and bleak, that it has sometimes received the name of the Saxon Siberia, but with this exception, the climate is rather that of that of most countries of Europe under the same latitude. In the valleys of the Elbe and the Mulde, and in the neighbourhood of the town of Leipzig, the air is both pure and pleasant. The only localities which can be considered unfavourable to health, are some marshy tracts on the banks of the Elbe and the Pleisse.

With the exception of the lofty barren tracts already referred to, and others of a kindred nature, though less barren, since they are either covered with forests or mountain pastures, the whole surface of Saxony may be said to be under some kind of culture. One-half of the surface is under the

straight, 60 per cent. is covered with wood, and above 16 per cent. with grassland and meadow. Not a spot capable of being turned to account is allowed to remain waste, and the land of industry is everywhere visible. The soil, however, is not in general of great natural fertility, and hence, though some of the lower grounds are very productive, the total yield of grain falls considerably short of the home consumption. The most important crops cultivated in regular rotation, are rye and oats next to these stands barley and last of all, wheat, for which the greater part of the soil appears not to be well adapted. One crop so universal, that it ought, perhaps, to be regarded as the staple, is potatoes. The chief subsidiary crops are pulse, rape, turnips, oil-seeds, hops, tobacco, flax, castor seed, and other dyestuffs. All the common orchard fruits, particularly apples, pears, and plums, are very abundant. Considerable attention is paid to the culture of the vine, which occupies considerable tracts on the E bank of the Elbe, between the towns of Meissen and Pulsnitz, and is also cultivated with success on the sunny slopes both to the N and the E of Dresden. The grain-husbandry also is not neglected. Many artificial meadows have been formed, and heavy crops of the finest artificial grasses—maize, timothy, clover, and ryegrass—are everywhere seen. Much of the fodder is employed on dairy stock, from which large quantities of butter and cheese of excellent quality are obtained. Large numbers of horned cattle are also fattened, and annually exported, to the number of 7000 or 8000 head, to Poland and Galicia. But the superiority of Saxony is nowhere so apparent as in its sheep, the breed of which, formed by careful crossing by the merino was brought to such perfection, as to create for them an eager demand in all countries where the improvement of the fleece was regarded as an object of importance. Hence the improved British breeds have derived many of their excellences from those of Saxony but as often happens, the scholar has in many parts equalled if not surpassed the master, and hence the superiority of Saxon sheep has become much less apparent in more recent times and the foreign demand has greatly diminished. The only other domestic animals deserving of notice are horses and swine of both of which superior breeds are found. Poultry, particularly geese, are very numerous the rearing of bees, once a very important branch of industry, has greatly declined, but that of silk-worms is still prosecuted with considerable success, particularly in the vicinity of Leipzig, Dresden, Zittau &c. The great number of forests in Saxony naturally secures an abundance of game, and at one time bears and wolves were not uncommon, but the increase of population has so greatly diminished their numbers, that they are considered to be almost exterminated. Others of the larger kinds of game have also become scarce, but the smaller kinds continue to be numerous. The fishing in the lakes and rivers is tolerably productive, though scarcely equal to the consumption. Among the species of fish are sturgeon, salmon, carp, pike, and trout. In some of the streams, particularly the White Elster and its tributaries good ponds are often found.

The minerals of Saxony form, perhaps, the most important source of its wealth, and have long been worked with great success, and a skill of which many other countries in Europe were contented to be only humble imitators. The metals comprehended almost every one of economical value with the exception of quicksilver, which does not seem to be found at all, and gold, which is found only in very small quantities. Silver, found in connection both with copper and lead, is extracted annually, on an average, to the amount of 45,100 oz. The principal localities where it is found are Freiberg, Annaberg, and Schneeberg. The copper and lead ores which yield it are of still greater value. The tin, iron, and cobalt mines are also of great importance, and, though in much smaller quantities, zinc, bismuth, and arsenic are worked to considerable advantage. The fuel necessary for the smelting and refining of these metals also exists in great abundance. Not only are the extensive forests, covering nearly a fourth part of the whole surface of the kingdom, made available for this purpose, but, taken under a system of management, in which science and practical knowledge are alike conspicuous, but numerous streams, both of lignite and coal, are found in various districts, and are worked to a considerable extent. Other minerals of value are alum, copperas, mountain-green, ochre, magnesia, feldspar, potash and porcelain earth. The

Vol. II

quarries furnish in abundance granite, marble, porphyry, basalt, roofing-slate, pavement, sandstone, limestone, and marble; and numerous beautiful crystals and pebbles, including in the former rubies, sapphires, garnets, topazes, &c., and in the latter, jaspers, agates and corals are found both in the Erzgebirge, and in the districts of Leipzig and Meissen. Mineralogical operations are remarkable not only for the magnificent scale on which they are carried on, but also for the consummate ability displayed, and not a few of the most eminent geologists of Europe willingly confer their obligations to the instructions which they received in the mining schools of Saxony.

The manufactures connected with the minerals just referred to, taken in connection with the mining operations themselves, give employment to a very large proportion of the inhabitants; but there are several other branches of manufacture distinguished for the ability and success with which they are carried on, and in two of which the long acknowledged superiority of Saxony to most other countries has only been recently called in question. The branches referred to are those of woollen cloth and porcelain. The excellence of the former was partly owing to the fineness of the wool obtained from the improved breed of sheep and hence, in every country where the Saxon broad-cloths were permitted to enter the market, they commanded higher prices than could be obtained for similar native products. It is said that the greater part of the fine wools of Saxony are now exported in a raw state, and that foreigners possessed of larger capital and superior machinery are able to give the wool-growers better prices than their own manufacturers can afford. The consequence is, that the present woollen manufacturers of Saxony, though still extensive, have lost much of their reputation for superior fineness, and contain a much larger proportion of goods of an inferior description. In regard to porcelain, the fame of the Saxons was well-earned, because in addition to the excellence of the articles produced, they had the merit of inventing, or rather re-inventing the process. So long as they were able to keep the secret to themselves, the only competition to which they could be subjected was that of importation from the distant East, and a most lucrative trade was carried on. The Dresden china became famous over Europe, and many of its finest specimens were thought not unworthy of a place in the most celebrated collections of articles of virtue. The manufacture is now so successfully competed with in other countries, and has in consequence declined so much that it can scarcely now claim to be regarded as one of the great branches of national industry. But where the great body of the people have become thoroughly imbued with the spirit of industry the decline of one branch only makes way for the introduction of another, and hence several tissues previously unimportant have advanced with astonishing rapidity. At the head of these is cotton, which both employs numerous large factories, and is manufactured to a very large extent by domestic looms. The rapid extension of the cotton manufactures may be judged of from the following table, showing the number of spinning-mills and spindles in the country at different periods—

| Years. | Mills. | Fine Spindles. |
|--------|--------|----------------|
| 1824 | 14 | 270,000 |
| 1843 | 114 | 4,410,000 |
| 1848 | 121 | 5,410,000 |
| 1861 | | 6,900,000 |

Other very important tissues are linen, silk, and mixed goods, and in connection with them and the other tissues must be taken the vast number of worsted, flax, and filling mills, which are scattered over the country, and meet the eye at almost every turn. Other manufactures deserving of notice are lace, in which great numbers, both of young and aged females, who might be useful for other labours, find the means of subsistence; hosiery, washcloth, straw-plait, wooden ware including furniture; machinery, chemical products, musical instruments, tobacco, chocolate, and confectionery; paper, types, and books.

The trade, both external and internal, created by all these branches of manufacture, is necessarily very great, at the fairs of Leipzig (about 200) alone, business to above 25,000,000 is done. Its foundation was laid by the enlightened commercial policy which Saxony had the wisdom to pursue, when most

other countries were strangers to it, and its continuance is secured by a careful attention, not only to remove every obstruction to trade, but to afford it new facilities. Among these may be mentioned the introduction of the railway system, which has brought Leipzig and Dresden into immediate connection, not only with the other leading towns of Saxony, but with the great trunk-lines which now traverse the whole, at least, of central Europe, and the still more recent introduction of the electric telegraph system, which has brought Leipzig, Göttingen, and Paderborn. The latter is 24 or more exactly, 24, 108-2, sterling, contains 80 new groves, each of which is divided into 19 plantings.

The government of Saxony as fixed by a constitution granted in 1831 and modified by the laws of March 31, 1849, and May 5, 1851, is a limited monarchy, in which the executive power is lodged solely in the crown, and the legislative power jointly in the crown and two chambers—a first and a second. The first chamber is composed of the princes of the royal family who have attained majority, the possessors of certain specified domains, certain individuals *ex officio*, 15 deputies chosen for life by the larger landed proprietors, and 10 individuals nominated for life by the king. The second chamber is composed of 20 members elected by the large landed proprietors, 25 by the towns, 25 by the peasantry and five by the trades and artisans. For each member of the second chamber a substitute is chosen to act in the case of his temporary absence or incapacity, or during the subsisting diet, in the event of his death. Every third year a certain proportion of the members of the second chamber retire, but, in supplying their places, the retiring members may again be elected. Justice is administered by three classes of courts, or courts of primary, secondary and tertiary resort (*erste, zweite, und dritte Instanz*). The first includes all the inferior courts of the kingdom, as *Justizämter*, *Landgerichte*, *Land- und gemeindefürsorgegerichte*, the second consists of the four appellate courts (*Appellationsgerichte*) which hold their sittings at Dresden, Bautzen, Leipzig and Zwickau, and have each jurisdiction within the four circles of same name, the third is confined to the supreme court of Dresden (*Rechtsoberschiedsgericht*), whose jurisdiction includes all kinds of cases, and extends over the whole kingdom. In regard to religion, and verbal toleration is guaranteed, but the only religious bodies specially recognized by the state are the Lutherans (*Evangelisch-Protestantische Cultus*) who form almost the entire of the whole population, and have 25 dioceses (*episcopus*) 379 parishes, and 1199 churches. The Calvinists (*Reformirter Cultus*) who have only two parish churches and four ministrations; and the Roman Catholics, who are under an apostolic vicar have 14 parishes and 29 churches, and possess more influence than would naturally belong to them, by causing the royal family among their adherents. At the head of the educational establishments of the kingdom is the university of Leipzig. Next to it, in order, are seven gymnasia, situated in the principal towns 11 normal schools and a considerable number of upper, town, and grammar schools. For elementary education one school at least is opened in every parish, and all the children between six and fourteen are understood to be in attendance, in 1849, of 315,135 children between the ages of six and fourteen, which the king then contained, 311,454 were actually attending school. By this means, Saxony has become one of the best educated countries in Europe. The revenue in 1851-2 was £1,249,258 raised from the rent of land and other crown-lands, and by direct and indirect taxation, in 1850-51 it was £1,683,740. The expenditures in 1850-51 amounted to £1,404,780, and in 1851-52 to £2,048,847. The amount of the debt in 1852 was £6,457,711; in 1854 £10,036,827. The army is raised chiefly by conscription; all male citizens, with a few specified exceptions, being bound on attaining their 20th year, to serve for six years in the army, and three years in the reserve. The effective force amounts to 25,950 men. After the defeat of Austria by Prussia in 1866 Saxony was permitted to retain her independence, but had to place her army under the command of Prussia.

Saxony owes its name to the most ancient and distinguished of the nations of Germany. Not contented with their territories, though they reached from the Elbe to the Rhine, they penetrated far into France, and fitting out powerful naval armaments, ultimately made themselves masters of the far

West portion of Great Britain. The inhabitants of Saxony are said still to bear a remarkable resemblance, in person and manners, to those of our own island. It is impossible, however, to trace back the history of the existing kingdom of Saxony to a very remote period, though the reigning family claim descent from the celebrated Wittekind, who was vanquished by Charlemagne. The earliest existing records connected with the present kingdom belong to the 10th century, when Henry I., Margrave of Meissen, made considerable addition to his territories, which from that time came to be distinguished by the common name of Saxony. In 1433 Saxony became an electorate, in the person of Frederick the Brave, by whom the university of Leipzig was founded. His successor had two sons, Ernest and Albert, who shared the electorate between them, and became the heads of two separate branches, of which the Albertine is represented by the king of Saxony. Its history now becomes extremely interesting, being in fact that of the Reformation, which here had its cradle, and successfully passed through the first years of a precarious existence, preparatory to its complete development and the noble triumph which it continued to achieve, all its way was acknowledged by half of the population of Europe, and by far more than the half of its intellect and virtue. The more recent history of Saxony furnishes few incidents deserving of particular notice. The great body of the people have never forgotten the benefits which the Reformation conferred on them, and clinging to it with strong attachment, have been rewarded by a general diffusion of intelligence, and a great increase of commercial prosperity. Unhappily, however, they have at times been neither wisely nor kindly governed, and the blunders committed during the war of Liberation have cost them a large portion of their territory. When almost every other power in Germany had thrown off the tyrannical yoke of Napoleon, the king of Saxony continued to give him a sordid adherence—calculating, perhaps, that some sudden turn in his favour might again place his master in the ascendant, and dispose him, not only to confirm his kingly title, but still further extend his territories, so as to make them more worthy of the name of kingdom. The crooked policy did not succeed, and though at last the Saxons were turned against Napoleon, it was only on the field of battle, in circumstances which gave the act all the appearance, and not a little of the reality of treachery. Such an act could not be honourably rewarded, and hence, in the new arrangements carried into effect by the Congress of Vienna, though Saxony was permitted to continue a kingdom, it was with such a curtailment of territory as deprived it of one stroke of nearly 1,000,000 of inhabitants. Still, even within its present limits, it holds an important station among the German states and possesses almost inexhaustible sources of prosperity, both in its natural resources, and in the industry and intelligence of its people.

SAXONY (Prussia), a prov Prussian monarchy of very irregular shape, bounded, W by Hanover, Brunswick, and Hesse-Cassel, S. the Saxon duchies and kingdom of Saxony and E. and N.E. prov Brandenburg. It has also several isolated districts, and includes Anhalt Dessau and Schwarzburg. It consists of the three gov., Magdeburg, Merseburg, and Erfurt, which have a united area of 7869 sq. m.; and owes its name to its having originally belonged to Saxony from which the far greater part of it was dismembered, and given to Prussia, by the Congress of Vienna. Pop. 1,781,830.

SAXTEAD, par Eng. Suffolk 1702 ac. Pop. 441.

SAXTHORPE, par Eng. Norfolk, 7113 ac. Pop. 856.

SAXTON, par Eng. York (W Riding) 4623 ac. P. 489.

SAYN, a vil. Prussia, gov and S. m. N. Gohls, at the confluence of the Bieleke and Saynbach with a fine castle, a blast-furnace, and other iron-works. Pop. 1130.

SAYPAN, or **SERWAN,** the largest of the Marston Is., 20 m. long, N to S, lat. 16° 20' N; lon. 145° 50' E (N. E.) It is distinguished by a lofty peak; 6000 ft. high; is fertile and wooded, abounds with game, lacert, and wild birds; and has also some cattle.

SAXAWA, a river, America, rises in Nebraska, near the frontiers of Nebraska, flows E. through Nebraska, and joins 1 bank Missouri, about 15 m. above Prague; total course, about 180 m. No part of it is navigable; but from Leitch it is much used for floating timber.

SCAFATI a. tn. Naples, prov. Principato-Citra, 14 m. N.W. Salerno, a bank *terreno*. Its site is unhealthy. P. 2390.

SCAFELLA, or **SCAV FELLA**, a mountain, England, in S. of co. Cumberland, near the borders of Westmoreland, consists of two principal summits, separated from each other by a deep chasm, and differing only 66 ft. in height, the one being 3166 ft., and the other 3100 ft. It has a nucleus of granite, overlain by slate, but its summit is composed of trap-porphyrus *Borvorvalla*, famous for its graphites, is immediately E. of it. **SCALA**, two tns. Naples—1, Prov. Calabria-Citra, 16 m. S.E. Roma, on a mountain, near 1 bank *Fiumicino* with a collegiate church. Pop. 1800.—2 Prov. Principato-Citra, 8 m. W. Salerno, at the foot of a mountain, near the Gulf of Salerno, with a cathedral and seven parish churches, two universities, and an hospital. Near it are lead mines. P. 1700.

SCALA NUOVA [*sic. Neopolis*] a seaport in Asiatic Turkey, at the head of the gulf of same name, 40 m. S. Smyrna, lat. 37° 19' 50" N., lon. 28° 34' E. (n.) It is built on a steep and rounded hill which overhangs the sea, and from N. and W. Though highly picturesque in appearance, its houses are poor and wretched. Part of the town is enclosed by a strong and massive wall. The Gulf of Scala Nuova, the S. side of which is formed by the island Samos, is about 45 m. long, and 20 m. to 35 m. broad.

SCALAPLANO, a vil. Sardina. See **SCALAPLANO**.

SCALEY, par. Eng. York (N. Riding), 11 985 ac. Pop. 1829.

SCALDAROLE a vil. and com. Italy Piedmont, div. Novara, prov. Lomellina in a fertile plain. It has a church. Pop. 1049.

SCALDWELL par. Eng. Northampton, 1060 ac. P. 898. **SCALDA**, a tn. Naples, prov. Calabria-Citra, 39 m. N.W. Cosenza, on a hill, near W. shore of Gulf Policastro. It contains three churches and a convent. Pop. 2080.

SCALEBY, par. Eng. Cumberland, 3100 ac. P. 598. **SCALFORD** par. Eng. Leicester 2520 ac. Pop. 655.

SCALLOWAY, a vil. Scotland Shetland isle. W. side of Mainland, 6 m. S. by W. Lerwick. It is a very ancient place, and was once the capital of Shetland. It contains a number of good houses, a parish church, independent chapel and a school, and has recently acquired some importance from the herring-fishery. A little E. of the village is the ancient castle of Scalloway, overlooking an excellent harbour called Scalloway-Voe.

SCALPA, two small isls. Scotland, co. Inverness.—1, One of the Inner Hebrides, off S.E. coast, Skye, and between it and the mainland, lat. (N. point) 57° 30' N. lon. 6° 5' W. of an irregular oval shape, and about 8 m. by 2 m. in extent. It consists of a single mountain, with an uneven summit and rounded outlines.—2, One of the Outer Hebrides, off N.E. coast, Harris, lat. (S.E. point) 57° 50' N. lon. 6° 35' W. about 8 m. long and 1 m. broad. It is low, but is conspicuous from its lighthouse.

SCALPA FLOW, a beautiful bay Scotland, to the N. of the Firth of Forth about 50 m. in arc, formed by 13 different islands of the Orkney group, containing numerous lagoons and safe roadsteads, with outlets to the firth, the North Sea, and the Atlantic Ocean. The bay takes its name from the village of Scalpa, situated on its shores, about 1½ m. S. Kirkwall.

SCAMANDER, or **KAMISKU**, a river Asiatic Turkey, said to have had its source not far from the site of ancient Troy, and the scene of many exploits celebrated in the *Iliad*. It has now either altogether disappeared or become so very insignificant that its identity is a subject of dispute. It joined the Simois, which is supposed to be the modern Menderes-Su.

SCAMLEBY, par. Eng. Lincoln 2150 ac. P. 582. **SCAMPTON**, par. Eng. Lincoln 2147 ac. Pop. 228.

SCANDEROUN, seaport, Syria. See **ALEXANDRIETTA**.

SCANDIANO a tn. Italy, duchy and 12 m. W. S.W. Modena, with a castle. Aristotle is supposed to have been born here.

SCANDINAVIA, the ancient name of Norway and Sweden (which see).

SCANIA, an ancient Swedish prov. now forming the Malmö and the Kristianstad.

SCANNIO a tn. Naples, prov. Abruzzo-Ulteriore II., 10 m. S. Sulmona, in an unhealthy site. It contains two convents. P. 2060.

SCANBARO, a vil. and com. Thessaly 11 m. S.E.R. Giannitsa, with a church, and a trade in potatoes, charcoal, and timber. Pop. 1688.

SCANZANO, a vil. Naples, prov. Naples near Castel-Mare. It consists of three separate hamlets, and contains three churches, and a Dominican convent. Pop. 2000.

SCARBA an isl. W. coast, Scotland, co. Argyll, N. Isl. Jura, from which it is separated by the Gulf of Garryvreckan. It is nearly of a circular form with a diameter of 5 m.

SCARBOROUGH, a town and par. bor., market tn., and seaport, England, co. York (N. Riding). The town is beautifully situated on the declivity of a high steep rock, in the recess of a fine open bay on the North Sea, 89 m. N.E. York, with which it is connected by railway. It consists of numerous streets, lighted with gas, rising in successive tiers from the shore in the form of an amphitheatre, and contains several elegant terraces, crescents, and isolated mansions. It has a townhall, custom-house, jail assembly-room and theatre, several Established churches, and places of worship for Independents, Methodists, Baptists, Presbyts., P. Catholics, &c. a grammar, Lanesian national and various other schools several hospitals, and a sea-bathing infirmary for poor invalids, supported by subscription. A museum of geology and natural history a mechanics institute, two public libraries, and a philosophical society. Scarborough is much frequented for sea-bathing and for its mineral waters, which have long been in repute. These last are obtained from springs on the sea-shore under a cliff, and are approached by a bridge resting on piers 75 ft. high and leading across a chasm 400 ft. wide. They consist of carbonate and sulphate of lime, magnesia, and oxide of iron, and are esteemed efficacious in stomach complaints. Scarborough harbour is the only port of any consequence on the E. coast between the Humber and Whitby, and is used as a place of shelter from the E. gales which prevail on this coast though confined at the entrance, it is easy of access and safe and commodious within. The bay is protected on the N.E. by a high promontory, on which the castle stands. The port to which the privilege of bonding was granted in 1841 is a member of that of Hull. It carries on a large and foreign trade, principally with France, Holland, and the Baltic, and a considerable trade in corn, butter, bacon, and salt-fish, with Newcastle, Sunderland, and other places on the coast. Ship-building, rope and sailcloth making are carried on but to a much less extent than formerly. The fishery, once a source of great profit to the town, has also declined, although there still exists here an establishment for curing herring. On the summit of the promontory on the N.E. side of the bay, 300 ft. above sea-level, are the ruins of the celebrated castle of Scarborough. The borough sends two members to Parliament. Pop. 12 915.

SCARBOROUGH or **LOS BARRIOS JANDRES**, a group of isls. N. Pacific, W. of the Marshall Archipelago, lat. 21° 40' N.; lon. 151° 55' E. They are of small area, and so small that some doubt is entertained as to their identity.

SCARLIF par. Eng. Derby 3674 ac. Pop. 572. **SCARDONA** or **SCARDIN**, a tn. Austria, Dalmatia, circle and 30 m. S.E. Zara, a bank Kerka, in a situation rendered unhealthy by morasses. It consists of little more than a single street, but is well built, is the seat of a bishop, and the seat of several public offices, and has a cathedral and the ruins of a Turkish castle overhanging the town. The harbour admits only small vessels, but some trade is carried on, chiefly with Turkey. Scardona was a place of considerable importance under the Romans. In its vicinity the Kerka furnishes some fine cascades. Pop. 1200.

SCARENA, a tn. France, dep. Alpes Maritimes, 10 m. N.E. Nice, on the Pagnone with a court of justice, a church, several cottages, an hospital and two schools. Pop. 1568.

SCHNAPING, the most northerly and also one of the smallest of the cantons of Switzerland. It is very irregular in shape, and properly consists of three parts; total area, 110 sq m, the largest in the N., surrounded by the duchy of Baden on all sides, except a small portion of its

S. frontier which is washed by the Rhine and communicates by a bridge across it with com Zürich—a middle portion S.E. of the former encompassed on the N. by a head of the Rhine, and forming an irregular oval almost surrounded by Zürich—and the third or E. portion surrounded by the first, by the duchy of Baden, excepting towards the S. where it is washed by the Rhine, and communicates by a bridge with com Thurgau. The surface is very much broken, being traversed throughout by a series of ridges which ramify from the Jura, and in which the *limonous* formation to which that chain gives its name is largely developed. The most important of these ridges belong to the Raronen. They have their general direction from S.W. to N.E., are steep on the W. but on the E. slope gradually down by terraces between which are several long valleys and ravines. These valleys bend round and form a *saucer*, which has the town of Schaffhausen for its centre. They are almost all narrow, and in no part of the canton ever become as wide or flat as to form an extensive plain. The only river is the Rhine, but streams of the purest water circulate over the whole country and every village can boast of its sparkling rivulet. The climate is temperate and generally healthy. The minerals are not of much economical importance. Iron is found in considerable abundance, the well-known seams of the Jura which contain it being continued into this canton. At one spot a little coal is met, and on many parts of the Raronen the *limonous* is changed. The only other minerals deserving of notice are gypsum and alabaster and a blue and red sandstone-pavement, which furnishes good grinding-stones. The soil differs much in different places, but is generally fertile. In the neighbourhood of the Rhine it consists of an alluvial clay resting on a gravelly bottom. In other parts it is formed by a mixture of clay, marl gypsum and ferruginous matter. In some more favoured districts it is composed of black vegetable mould intermixed with a reddish clay or loam which is very productive. On the higher grounds the soil is generally of a chalky nature. All the ordinary cereals, together with hemp and flax are raised in abundance. Fruit also of excellent quality is extensively raised, and a great number of sunny slopes are devoted to the culture of the vine. The wine, both red and white, is of fair quality and some of it bears a high name. The principal manufacture is leather. This industry, at one time very important has very much declined. The inhabitants are generally Protestants well educated, and though long considered as Swiss rather than as Germans generally possess the qualities of industry, docility and courage, for which their countrymen have so long been honourably distinguished. For political and administrative purposes the canton is divided into five larger and 34 minor districts. The government is democratic, consisting of a grand council or legislative body of 74 members chosen by the male inhabitants not under legal incapacity and the petty or executive council composed of 24 members of the grand council and presided over by a burg master who is elected annually. Pop (1850) 3778.

SCHNAPING a vil in Switzerland, cap. above com, finely situated on a seahill surrounded by little hills, a road Rhine, here crossed by a long wooden bridge, 34 m S. Zürich. It is enclosed by walls with turreted gateways and is remarkable for the antique architecture of its houses many of which have fronts and projecting oriel-windows decorated with carvings and stucco-work and were once generally covered with fresco-paintings, though of these few now remain. The streets however are narrow and winding, and the town as a whole is not well built. The principal edifice are the feudal castle of Unnet or Mänet, on a height commanding the town, and still capable of being used for purposes of defence, flanked with towers, said to be of Roman construction, with walls 15 ft thick, and provided with bullet-proof casemates, the parish or St. John's church a vast building with a lofty tower, situated nearly in the centre of the town the minster or cathedral in the form of a cross, and in the Romanesque style with a fine tower of great height, a large and richly toned bell 15 ft in circumference and 13 curious stone statues, which bear the names of the twelve apostles, Jesus included and the townhouse, built in 1412, and containing some fine wood-carving in its council chamber. Its manufactures, none of much importance, consist chiefly of cotton and silk goods, steel and leather, but its situation on

the line of traffic between Switzerland and Germany gives it an important transit trade. It has several provincial courts and offices, a college or gymnasium, with nine professors, and a good library. The environs of the town are beautiful, and afford many fine promenades. About 8 m. below it are the

factures of white chalk, and some transit trade.—3 A mountain pass, known anciently under the name of Porta-Glandia. It follows the valley of the Isar and leads from the Tyrol into Bavaria. The Tyrolans here distinguished themselves in their struggles against the French in 1809.

SCHAFFHAUSEN
From Front's *Monaco in France*, and Italy

celebrated falls which bear its name and by which the whole volume of water in the Rhine, which is here nearly 500 ft. broad, is precipitated over a height of more than 70 ft. in three separate sheets, formed by two isolated pillars of rock. Schaffhausen is the birthplace of the historian Jolannes von Müller. Pop. 7710.

SCHAIEN, a market tn. Holland prov. N. Holland 29 m. N. by W. Amsterdam. It has a townhouse, two churches, two orphan hospitals, two schools and several important textile and sheep farms. Pop. 13,400.

Jutland, from which it is separated by the *Stodborger* or *Kau*, *Sass* the *Kolding* furd, and a short tract of land lying between these waters E. the *Little Belt* and the *Baltic* S. Holsten from which it is separated by the *Eider* and the *Schleswiger* *Holsten* canal and W. the *North Sea* or *German Ocean* *Sass* average length 42 m. average breadth 46 m. area, including the adjacent islands 2100 sq. m. Schleswig being only the N. portion of the peninsula, which is still sometimes comprehended under the general name of Jutland and was known in ancient times as *Chersonesus* *Danica* naturally bears a considerable resemblance to the N. portion or prov. N. Jutland of which it may be regarded as the continuation. Hence the same physical features which characterize the latter province are repeated in Schleswig but in a somewhat modified form. Lakes N. Jutland it has its central ridge stretching N. to S. and presenting a considerable expanse of dreary heath, its W. coast of sandy flats with a long line of shoals and quicksands where vessels at no time sail with safety and in times of greater danger find no harbor in which they can take refuge; and its E. coast where everything assumes a more favourable form, where the coast is scooped out into five natural harbours, where the eye is constantly lighted by scenes of rural beauty and the labours of the husbandman obtain an easy and ample reward. Where there is a difference in the physical features of the two provinces, it is almost invariably in favour of Schleswig. The shifting sand which makes many parts of the northern province a mere desert are here unknown, the land of the central morland is greatly circumscribed, and those of the rich meadow flats greatly extended. In Schleswig, though this can scarcely be considered an advantage the general slope to the W. is much more decided than in Jutland and hence all the important streams, without a single exception flow in that direction. The chief of these in addition to the frontier rivers already mentioned, are the *Rips* or *Ripen* *Hvid* and *Trenne*. In the lower part of their course, their volume is so much increased and their banks become so low that, particularly in winter and spring inundations are not uncommon, and the artificial aid of dykes and sluices becomes necessary as a protection against the most serious disasters. Lakes, though few in comparison with those of the N. Division of the peninsula, are numerous, but generally of limited extent. The two most important are the *Mitten* sea and the *Ootogogogog*. The W. side and centre of the duchy are very poorly wooded. Accordingly the chief dependence of the inhabitants for fuel is on their bogs, which, in consequence, notwithstanding their uninviting appearance, often prove the most profitable portion of the surface. On the E. side of the duchy wood is found in every quarter and in some parts, particularly along the fords of *Haderlevon*, *Apender*, and *Pienburg*, considerable forests occur. The inhabitants of the duchy are a much more mixed race than those of N. Jutland. Over about two thirds of the area

Danish is the vernacular tongue over the remaining third German is chiefly spoken. Along with Holstein, Schleswig rose against Denmark in 1848 but submitted again in 1850. With the death of King Frederick VII. of Denmark (16th November 1863) the male line of the succession to Schleswig ceased. His successor Christian IX. refusing to comply with the demands of the Germanic diet, federal execution was decreed and the combined armies of Austria and Prussia entered the Duchies and vanquished the Danes after a bloody contest. By the preliminary of peace signed 1st August, 1864 the Duchies were separated from Denmark. In 1866 they were incorporated into Prussia. (See DENMARK) Pop. (1890) 409,907.

SCHLESWIG (Danish *Slesvig*) a tn and seaport, Prussia, cap. above duchy W and end of the Schlei here crossed by a bridge, 89 m. N. W Hamburg. It is irregularly built of brick, but is a neat clean town, strongly resembling some of those in Holland. It is divided into three portions—the Altstadt or Old town the Lollhus and the Fredericksberg. The first is the N. portion and is connected with a small holm or islet, mostly occupied by sailors, the second is in the center, and the third has immediately below, in connection with a small suburb called Bastorf. The market-place, the only public square, is in the Altstadt the principal street, exceeding 1/2 m. in length is in the Lollhus. The principal edifices are three churches, one of them a cathedral of the 12th century, a fine Gothic pile with an altar-piece beautifully carved in wood. The old castle of Gottorp on a little island at the N. end of Fredericksberg the residence of the stadtholder of the duchy (an office now vacant) and the seat of the Schleswig-Holstein government, the lunatic asylum the deaf and dumb institution, and several benevolent establishments of which the most important bears the name of the Gray Cloister. Immediately N. of the town is the convent of St. Johanna, for noble females and a little S. are the remains of a famous wall called *Dannewerke*, built by the pagan kings of Denmark to protect the duchy from the incursions of the N. Jutlanders. The harbour is very shallow admitting only small vessels and neither trade nor manufactures are of any importance. Schleswig is the oldest town in the duchy, dating from the 9th century. For nearly six centuries it was the handsomest, largest, and most important commercial city in the kingdom. In the 12th and 13th centuries it was repeatedly pillaged and devastated and in the middle of the 14th century, it suffered much both from hostile violence and fire. Its greatest disaster was the sitting up of the mouth of the Schlei, in the beginning of the 15th century. This in connection with some other circumstances particularly the rivalry of the Holsteiners, deprived it of its commercial pre-eminence, and has gradually reduced it to comparative insignificance. Pop. (1890) 12,197.

SCHLETTAU a tn, a Saxony circle and 22 m. S. E. Weickau. It has a church several mines, and flour and spinning mills. Pop. 1638.

SCHLEIBINGEN a tn, Prussia, gov and 35 m. W. S. W. Erfurt, at the confluence of the Elbe and Nahe with the Schleihe. It stands partly on a height and partly on low ground is surrounded by walls with two gates, contains an old castle, which has recently been repaired. Two Protestant churches a gymnasium hospital and posthouse as the seat of several courts and public offices, and has manufactures of woollen cloth and hosiery a white-lin factory, a paper, copper and numerous saw and other mills, and an extensive trade in wood. Pop. 8261.

SCHLEIBEN a tn, Prussia, gov Merseburg on the Kramnitz and Schleienbach 20 m. E. N. E. Torgau with a church and a posthouse. Pop. 1758.

SCHLEINGEN, or **SCHLEINGEN** a market in Baden, circle Upper Rhine, about 6 m. from Mülheim with a church a paper-mill, and a trade in wine. Pop. 1121.

SCHLEIBACH a vil, Württemberg circle Danube 6 m. W. S. W. Goppingen, with a Protestant church. P. 1781.

SCHLEIBACH, or **MAXIMILIAN** (Latin, *Aula Beatae Virginis*), a vil Upper Austria, circle Traun, in the valley of Krems, 1 bank Danube, about 17 m. S. W. Steyer with a church, Cistercian monastery, founded in 1371 as a sumery, and an hospital. Pop. 1436.

SCHLEIBSTADT a vil, Baden, circle Lower Rhine, near Bielefeld, with a church. Pop. 1020.

SCHLITZ a tn, Hesse-Darmstadt Oberhessen, on the Schlie 19 m. N. W. Fulda. It consists of the town proper occupying several heights, and the suburbs beneath contains two churches, and has manufactures of linen and leather, a paper, and some other mills. Pop. 8317.

SCHLOCHAU a tn, Prussia, gov and 66 m. W. Meissen with a church and a synagogue manufactures of woollen cloth, and a trade in corn. Pop. 1755.

SCHLOTTEN, a tn, Prussia, gov and 70 m. W. S. W. Marienwerder with a Protestant and a R. Catholic church, a paper-mill and a trade in cattle. Pop. 1934.

SCHLOSS-APPACH a market in Saxony-Wesmar 19 m. W. V. W. Weimar on the Vippach. It is surrounded partly by the river and partly by walls contains a church, and a palace belonging to the duke, and has several mills 1171. **SCHLOTHEIM**, a market in princip. Schwarzburg-Rudolstadt, on the Rottur, 10 m. S. W. Souderhausen with a church. Pop. 1297.

SCHLUCH a lake, Baden circle Upper Rhine, 5 m. N. W. St. Blasien, about 1 m. long N. W. to S. E., by no more than 1 m. broad. It stretches itself into the Rhine by the Schwarzbach an affluent of the Wutich. It abounds in fish particularly pike of large size. On its N. bank is the village of Schluchsee. Pop. 178.

SCHLUCHTEN a tn, Hesse-Cassel prov. Hanau on the Kinzig 12 m. S. S. W. Ulm with a court of law normal school and hospital manufactures of linen, and several breweries and distilleries. Pop. 3220.

SCHLUCKENAU, **SCHLUCKENAU** or **STERNOW** a tn, Bohemia, circle and 37 m. N. N. E. Leutmeritz on the Silberbach. It contains a parish church an hospital and a castle, surrounded by lofty lime-trees and a large orchard and has considerable manufactures of linen. It suffered much during the Thirty Years war. Pop. 3108.

SCHLUCKENBURG a tn, Prussia gov and 36 m. S. E. Potsdam, at the point where the Neve issues from Lake Ladoga, and partly on an elliptical island of same name on which stands the fortress of Schluckenburg often used as a state prison. It is built chiefly of wood contains several Greek churches, and has manufactures of cloths and calico, and a considerable trade, chiefly transit, with St. Petersburg. Pop. 1843, 2824.

SCHMALKAIDEN, a tn, Hesse-Cassel, prov and 34 m. E. N. E. Fulda, in a valley at the confluence of the Saale with the Schmalkaid. It consists of the town proper enclosed by a double wall and ditch and of three suburbs. It is an antiquated town of a peculiar and picturesque appearance, with dark narrow streets, and with houses built mostly of wood or framed with it. It contains two churches, one of them a handsome Gothic structure a school, a hospital, a gymnasium industrial and other schools, and has important manufactures of iron and steel particularly gimlets and awls in the making of which the most of the inhabitants are employed. Indeed, the whole valley in which the town stands may be regarded as one great smithy, the raw materials of which are supplied by extensive iron mines in the vicinity. Below the town are extensive salt-works. Schmalzkaiden is famous for the Protestant league which bears its name, and was signed in 1531. The house in which it was signed is now the throne hall and in another building called the *Stammes-baum*, the articles were drawn up by Luther Melancthon and others. Pop. 5478.

SCHMIDDEBERG several places, Prussia a particular - 1 A tn prov Silesia, gov and 29 m. S. S. W. Legnitz, on the Yaul, at the foot of the Kamenberg. It consists principally of two very long streets, is the seat of a provincial and town court contains a Protestant and a R. Catholic church and has manufactures of woollen cotton and silk fabrics and a trade in cattle. In the neighbourhood are blast-furnaces and other extensive iron works, and at a short distance is the Friesenau a group of rocks 2858 ft. above the sea and commanding a magnificent view. Pop. 3520. - 2, A tn., prov Saxony, gov and 40 m. N. E. Merseburg, in a wooded district between the Elbe and Mulde. It contains a church and school and has manufactures of woollen and linen cloth, and a trade in cattle. Pop. 1840.

SCHMIEDBERG, a vil Bohemia, circle and W. N. W. Reas, on the Pfla, with a church, a school, an iron-works, and a wire-mill. Pop. 2712.

(lat. separated from Frey's I. by Furness Bay by George's Strait, it is about 64 m. long, by 4 m. broad—2, for *Myosotis* or *Myosotis* An. lat. Indian Archipelago, off the Bay of Goolvink, 3° 30' S. coast Java about lat. 1° 15' lon. 126° E. Though represented in maps as one

Island. It is really consists of three islands—Bosch the most W. Myore the most N., and Blak the most E., separated by narrow straits said to be navigable on account of rocks and reefs. Blak is middling high, but Bosch is very high and steep. Myore is very low, on its N.E. side is an extensive reef, and on its E. point a village.

SCHOUWEN, often called the **LAND VAN STREKKEN**, an old Holland, prov. Zealand, between isla. Overstaken and Daveland, bounded W. by the North Sea, and separated on the E. from Daveland by the Dijkwater 14 m. long E. to W. by 4 m. to 7 m. broad. It is fertile, yielding grain, oil-seeds, meadow, fax and possessing excellent meadow-lands. On the N. side of the island, immense flocks of one-foot broad and their eggs are brought in thousands to the market of Eertrike. Besides Eertrike, it contains the towns of Schouwenhaven. Pop. (agricultural) 15,000.

SCHRAMBERG, a vil. Württemberg, circle Schwarzwald, in a deep valley 7 bank Schiltach, 11 m. N.W. Rottweil. It contains a church, and a castle and has manufactures of straw-hat, clothy paper, and earthenware, a smelting-furnace and other iron-works. Pop. 1849

SCHRAATLBERG a vil. Lower Austria, in a vine-district, 40 m. N.E. Vienna. It contains a handsome church, with fine spire. Pop. 1946

SCHRECKHORN [Peak of Terror] a mountain, Switzerland, cm. and about 40 m. S.E. Bern. It rises to the height of 19,386 ft., and is separated from other mountains of similar heights by alpine valleys filled with glaciers.

SCHREIBERDORF [Moravian, Slavonic] a vil. Austria, Moravia, circle Olmütz, 7 m. from Eisenberg, with a church. Pop. 1923.

SCHREIBERDORF (Osser Mitzel and Niederer) a vil. Prussia, prov. Rhine, gov. Liège, circle and near Lützen with a church, tile-works, tannery, and two mills. P. 1481

SCHREIBERHAU a vil. Prussia, prov. Silesia, gov. and 36 m. S.W. Liegnitz, on a mountain slope near L. bank Zeckau. It consists of a number of separate hamlets, contains a Protestant and a R. Catholic church and has an extensive vitrol-work and three blast-furnaces. Pop. 2740

SCHRIEK, a vil. and com. Belgium, prov. and 19 m. S.E. Antwerp, on the Rhen. It has a brewery a flour-mill and a trade in agricultural produce. Pop. 1858

SCHRIEHEIM a market in Baden, circle. Lower Rhine, on the Kahrhach, at the foot of the Oldwald 9 m. E. Mannheim. It contains three churches, and has a tannery, an extensive paper mill, and several other mills. At a short distance is the castle of Strahlenburg and in the vicinity Roman antiquities have been discovered particularly the remains of baths. Pop. 2949

SCHRIEM or **SCHRIEM**, a m. Prussia, gov. and 52 m. S.E. Posen, on an island of the Wartha. It has several courts and public offices, five churches, a synagogue, a Franciscan monastery and a tannery manufactures of linen, a distillery and a trade in cattle. Pop. 3665

SCHROENHAU, a m. Upper Bavaria, on the Danube, 27 m. N.E. Augsburg. It consists of the town, proper, surrounded by walls, and a suburb has a court of justice, three churches, a castle, two hospitals, manufactures of brassware, salt-petre and potash works, oil, paper, bark, and flour mills and a trade in corn and cattle. Pop. 1605

SCHRODA, or **SCHRODA**, a m. Prussia, gov. and 19 m. S.E. Posen. It contains a parish church, a synagogue, and a Dominican monastery, and has several courts and public offices. Pop. 2219

SCHTCHIGHT a m. Russia, gov. and 27 m. E.N.E. Korsch, on a river of the same name. It contains a church and has some trade. Pop. (1849) 3168

SCHUBIN or **SCHUBIN**, a m. Prussia, prov. Posen gov. and 15 m. S.W. Bromberg, on the Gornawa. It has several courts and public offices, a Protestant and two R. Catholic churches, a synagogue and a castle. Pop. 2648.

SCHUJA, a m. Russia, gov. and 70 m. E.N.E. Vladimir, on the Tsen. It contains three churches, and has manufactures of linen calico and particularly soap, which is in great demand throughout the country. Pop. (1849) 8408.

SCHULS or **SCHULS**, a vil. and par. Switzerland, cant. Grisons in the Upper Engadine valley, L. bank Inn, here crossed by a bridge, 37 m. E.S.E. Coire. It contains a handsome church on a lofty tongue of land formed by the river

There are mineral-springs here at an elevation of 4000 ft. above the sea. The Bible was first printed in Kossman at Schuls in 1476. Pop. 893.

SCHUMBURG, or **SCHUMBERG**, a vil. Bohemia, circle Bagnitz, about 17 m. from Balaubitz. It has a church, a school, and three mills. Pop. 1048.

SCHÜPFHEIM, or **SCHUPFEN**, a vil. and par. Switzerland cm. and 15 m. S.W. Lucerne on the Rhine, here crossed by a covered bridge, and at the foot of the Hölzliberg. It contains a handsome modern church, a Capuchin monastery, placed on a height, and commanding a splendid view; and still higher, the church of the Holy Cross to which pilgrimages are made. An old tower, called Heimalohr, is used partly for preserving the archives of the district, and partly as a prison. Schöpfheim has a much-frequented annual fair.

SCHUSCHI, a m. Transcaucasian Russia, cap. Khanate of same name, sometimes also called Karamagh 180 m. S.E. Tiflis. It is advantageously situated on a steep and lofty height, between two streams, and strongly fortified and has an Armenian village at its foot. It contains a castle, in which the Khan resides, and to which the only approach is by a narrow path, scarcely admitting two riders abreast.

SCHUSSEN a river Germany, rises in S. of Wilttemberg near Schmusried, flows S. past Ravensburg, and falls into Lake Constance after a course of about 40 m.

SCHÜTT or **CHALOKON**, two isla. Hungary, called the Great and Little Schütt, formed by two branches of the Danube, and its mean stream which flows between them. The former as its name implies the larger of the two is situated on the N. bank, and extends from the town of Pressburg to that of Komorn, is about 56 m. long by 15 m. broad and belongs entirely to the Pressburg, the latter on the S. bank, is 25 m. long, by 8 m. broad and belongs partly to the Reich and partly to the Komorn. They are low and subject to occasional inundations, but remarkably fertile, and well cultivated producing abundance of grain, and containing numerous gardens cultivated for their fruit.

SCHÜTTENHOFEN or **SCHUMEN** [Latin, Suttio], a m. Bohemia, circle Prahin, on the Wotawa, 14 m. S.E. Klattau. It contains two churches, a Capuchin monastery, and a poorhouse and has manufactures of woollen cloth and hosiery. Pop. 1684

SCHÜTTEWALD a vil. Baden circle Middle Rhine 3 m. from Offenberg, near the Schöbich, with a church. Pop. 1165.

SCHÜTTORF a m. Hanover gov. Osnabrück, 8 m. N.E. Benthelm on the Yeche. It has manufactures of parchment, tile-works and four mills. Pop. 1453

SCHÜTZEN (Gross) a market in Hungary on and 20 m. from Pressburg, on the Nedava, near its confluence with the March, over which there is here a ferry. It has a church, tile-works, manufactures of cutlery and earthenware, a flour and a saw mill. Pop. 2909.

SCHUYLKILL, river U. States, Pennsylvania, rises on the N. side of the Blue Mountains, flows S.E., after a course of about 140 m., enters the Delaware, 7 m. below Philadelphia. It receives several tributaries of which Tulphocken Creek and Forkman Creek are the most important. It is navigable for vessels of 300 tons or 400 tons to Philadelphia, and by means of canals it has been rendered navigable to Port-Carhon. It is also connected with the Susquehanna by a canal.

SCHUYLKILL-HAVEN a vil., U. States, Pennsylvania 69 m. N.W. Philadelphia, with which it is connected by railway and near the Schuykill River. Pop. 2061

SCHWADORF or **SCHWADEN**, a vil. Lower Austria, L. bank Pisch, 15 m. S.E. Vienna. It contains a church and handsome chateau, and has an extensive cotton-mill. Pop. 1690.

SCHWAAN, a m. Mecklenburg-Schwerin, circle Wenden 1. bank Warnow, 11 m. S. Rostock. It is walled; has three gates, a church, manufactures of tallow and wax candles, leather, and soap, and several mills. Pop. 2930.

SCHWABACH, a m. Bavaria, Middle Franconia, on a stream of same name, and on the Bavarian railway, 10 m. S.W. Nürnberg. It is surrounded by walls, with four gates; is well built; contains a R. Catholic and two Protestant churches, a synagogue, a lunatic asylum, house of correction, a Latin, agricultural, and industrial school; and

has numerous needle-factories, manufacturers of wax cloth, sewing-machines, and millinery, andy, paper, playing-cards, Jew's lamps, and articles in gold, silver and wire, several mills, and numerous breweries. Schwabach early took part in the Reformation, and articles, which may be regarded as the first Lutheran creed, were drawn up in it in 1529, and bear its name. On the revocation of the edict of Nantes numerous French emigrants found an asylum here and to them the town is indebted for the chief sources of its prosperity. A well-known type, much used in old German printing, takes its name of Schwabach from the town. Pop. 5061.

SCHWABEN See SWABIA.

SCHWABENITZ, a market in Austria, Moravia, circle Brün, about 5 m. from Wladkau; with a church, a hospital, and two mills. Pop. 1848.

SCHWABMÜNCHEN, a market in Bavaria, Swabia, 18 m. S W Augsburg, on the Binkelt, here crossed by a bridge. It contains a E. Catholic church, chapel, and hospital, and has manufactures of woollen and cotton goods, and a trade in soap. Pop. of town, 2428.

SCHWABACH, a small town and market in Lower Austria, on a river of same name, 7 S.E. Vienna. It was built, contains a good market place, handsome church, and an obelisk, erected in honour of the Emperor Leopold I., and John Sobieski, king of Poland, who delivered Vienna from the Turks in 1683, and has an oil and a cotton mill, and several extensive breweries. Pop. 2290.

SCHWADERBACH, a vil. Bohemia, circle Elbogen, is a very mountainous district, about 20 m. from Zvoda. It is a large straggling place, and has a school manufactures of cotton, a mill, and a copper-mine. Pop. 3078.

SCHWAIEREN, a in Wittenberg circle Neckar, dist. and 27 m. N by W Stuttgart. It stands at the foot of the Heuchelberg, and contains a castle. Pop. 1901.

SCHWAIHILM, a vil. Wittenberg circle Neckar near Waidlingen; with a church. Pop. 1488.

SCHWALBACH, or LARSEN-SCHWALBACH a watering place, Nassau pleasantly situated between hills, 15 m. S.E. Nassau. It is a long straggling place, with a complete bathing establishment, and though said to have been known to the Romans, and to have been for nearly three centuries the most frequented watering-place of Germany, was scarcely visited by any English till the publication of Head's *Bäder*. Many thousands of them now make it their summer-residence.

SCHWALM, a river Germany rises in the Vogelsberg Mountains in the S.E. of Hesse-Darmstadt, flows N.W. past Elfeld, enters Hesse-Cassel then N.N.E. and joins the Eder below Fritzlar after a course of about 60 m.

SCHWANDEN a vil. and par. Switzerland, cant. and 8 m. S. Glarus at the confluence of the Sarnt with the Linth, which is here crossed by a covered bridge. It contains a great number of well-built houses, and a handsome church and on a height, at a short distance below, are the ruins of the castle of Benzingen, the residence of the old lords of Schwanden. The inhabitants early distinguished themselves in the cause of the Reformation. Pop. 2810.

SCHWANDORF a in Bavaria, Upper Palatinate, on the Nah, here crossed by a bridge, 14 m. S.E. Amberg. It has three churches, an hospital, and several mills. P. 1769.

SCHWANLBOCK, a walled in Prussian Saxony gov. and 29 m. S W Magdeburg on the Lumbach with two churches, an hospital, tile-works, gypsum kilns, and several mills. Pop. 2005.

SCHWANNENSTADT a in. Upper Austria circle Hausruck, 1 bank Agger, 80 m. S.W. Linz with a church, school, machine-factory and three mills. Pop. 1500.

SCHWARME, a vil. Hanover Unterhoya, hall and near Waten with a church. Pop. 1000.

SCHWARTAU a in Germany, duchy Oldenburg at the confluence of the Schwartau with the Trave, 4 m. N. L. bank. Pop. 1669.

SCHWARZA or SCHWARZ, three rivers—1, Germany rises in the S. extremity of Schwarzwald Rindelsdorf, flows N.E., passing near Blankenburg, and after a course of about 55 m., joins 1 bank Saale about 5 m. S. Rudolstadt.—2, rises among the mountains in the S. of Lower Austria, and describing nearly a semicircle, in a direction N.W. to E., and passing round the W foot of the Seibenberg joins 1 bank Elbe, after a course of nearly 60 m.—3 rises on the N.W. frontier

of Moravia, in the N. of circle Igau, flows S.E. past Ratibitz, Bettau, and Seelowitz, and joins or is joined by the Igau, a little above their common junction with the Thaya, after a course of nearly 80 m. Its chief affluents are the Stawra and Litawa, which both join it on the left.

SCHWARZA, a market vil. Prussia, gov. and 28 m. S.W. Eshurt, on a small river of same name, affluent of the Werra. It contains a Protestant church, a synagogue, and castle and has manufactures of linen and fashion. P. 1401.

SCHWARZACH—1 a vil. Baden circle Middle Rhine, 4 m. N.W. Bchl, with a church. Pop. 1375.—2 a river, Bavaria, which descends from the W side of the Bismarckwald, flows W past Reitz and Seiburg; and a little below the latter, joins 1 bank Nah, after a course of about 50 m.

SCHWARZACH a vil. Upper Austria, circle Seiburg 5 m. from St. Johann. It is memorable as the spot where the Protestant peasantry subjected to the bigotted and tyrannical sway of the Archbishop of Salza, met and bound themselves by solemn oath never to desert their principles. They were ultimately in 1781 to the number of 80,000 driven by persecution from their homes, carrying with them, by just retribution almost all the industry and prosperity of the country which still feels the loss.

SCHWARZAU, a vil. Lower Austria, circle Manhartsberg 18 m. S.W. Krumm. It contains one of the finest and most extensive glass-works in the country.

SCHWARZBACH, a vil. Bohemia, circle and about 28 m. from Budweis with a church. About 1 m. W. is a celebrated mine of graphite, which is worked to some extent, and exported to Great Britain and other countries.

SCHWALZBURG, two independent principalities, Germany—

1 **SCHWABENBURG-RUDOLSTADT**, forming the 36th state of the Germanic Confederation, consists of several isolated portions, situated between the territories of Prussian Saxony the Saxon duchies and the principality of Reuss. It lies on the N. side of the Thuringian Forest, and has an area of 249 sq. m. The surface is rugged, and the soil by no means fertile, for although it is generally cultivated with the greatest care the corn produced falls far short of the annual consumption. Perhaps the most important crop is flax, the culture of which is almost universal. A great part of the land is devoted to pasture, and great numbers of cattle are reared. The minerals include lead, iron, and salt, all of which are worked to a considerable extent. The principal manufactures are woollen stuffs ironware, glass, and porcelain. The chief export, in addition to the minerals and manufactures is wood. The inhabitants are almost all Lutherans. The government is a monarchy, in which the power of the sovereign is limited by that of the states or *Gemeinrecht-collegium*. As a member of the Germanic Confederation, Schwarzburg-Rudolstadt has a vote in the plenum and shares the 15th vote in the minor or representative council with Schwarzburg-Sonderhausen and the three Anhalt duchies of Bernburg, Dessau, and Köthen. Its contingent of men to the Confederation is 580. For administrative purposes it is divided into the upper lordship of Rudolstadt, and the lower lordship of Friesenhausen, and subdivided into ten *bellivicks*—Rudolstadt (the capital), Blankenburg, Paulissen, Im Königsee, Oberweissenbach, Lautenberg, Friesenhausen, Sondershausen, and Stadt-Schlotheim. Pop. 69,660.

2 **SCHWABENBURG-SCHNEIDERHAUSEN**, forming the 25th state of the Germanic Confederation lies, like the former principality on the N. side of the Thuringian Forest, between the territories of Prussian Saxony and the Saxon duchies, and consists of several distinct portions, area, 247 sq. m. It is more fertile than Schwarzburg-Rudolstadt, producing corn, which after supplying the home consumption, leaves a small surplus for export. One of the principal sources of revenue is derived from the forests, which furnish excellent timber. Flax also is extensively cultivated, and great numbers of cattle, sheep, and swine are reared. The minerals include iron, alum, cobalt and copper. The first supplies several smelting-furnaces and forges, and from the two last metal and vitriol are made. After these, the only manufacture of any importance is porcelain. The principal exports are corn, wool, wood, ironware, iron, alum, vitriol, lamplights, roots, and fat cattle. The powers of the sovereign are extensive, but checked by the concurrence of a *Gemeinrecht-*

collations. As a member of the Germanic Confederation Schwarzenburg-Sonderhausen has vote in the plenary, and shares the 15th vote of the minor council, as mentioned above in the case of Schwarburg-Rudolstadt. Its contingent to the confederation is 451 men. For administrative purposes it is divided into the upper lordship of Arnstadt, and the lower lordship of Sonderhausen and subdivided into seven bailiwicks—Sonderhausen (the capital), Klagen, Schönbach, Ebeleben, Kohn, Arnstadt, and Gehren. The municipalities are almost all Lutheran. Pop. 60,002

SCHWARZENBACH [AN DER SAALA] a tn. Bavaria. Upper Franconia, dist. and 68 m. N. Hahnen on the Saale, here crossed by a handsome bridge. It contains a parish church and castle, and has manufactures of cloth, and flax and cotton spinning-mills. Pop. 1860

SCHWARZENBEK, a vil. Denmark, duchy Lauenburg, cap. hall, 18 m. E. Hamburg, with a station on the railway to Berlin. Pop. 700

SCHWARZENBERG a tn. Saxony circle Zwickau, 53 m. S.W. Dresden, on the Schwarzwasser with several courts and public offices, two churches and a castle, manufactures of gloves, a wire-work, tin, saw and other mills and a patch oven. Pop. 3100

SCHWARZENBECK, a vil. and par. Switzerland cant. and 17 m. S.E. Bern. It lies in a high and somewhat wild country near the extremity of the Emmenthal and is chiefly composed of poor wooden huts. It has, however, a picturesque situated church. The rearing of cattle is the chief employment. Pop. 2864

SCHWARZENFELD a vil. Bavaria. Upper Palatinat, dist. and near Regensburg with two churches manufactures of looking-glasses and iron mills. Pop. 1010

SCHWARZENFELDE a tn. Bohemia, circle Kautz, 20 m. S.E. Prague. It contains a castle, townhouse, demerit church, school and hospital and has a post and a tele. work. Pop. 2926

SCHWARZWALD or **BLACK FOREST** [Latin, *Silva Nigra*],—1. A mountain range in S.W. of Germany. It commences near the S. of Baden and stretches through it and part of the kingdom of Württemberg in a N.N.E. direction, nearly parallel to the course of the Rhine and the chain of the Vosges, till it approaches the town of Rorschach and becomes identical with the Jura. Its greatest height is about 1500 m. and its greatest breadth 45 m. It probably takes its name from the dark forests of pine which crown its ridges or cliffs its sides. Its summits are for the most part slightly rounded but the highest of them are truncated or peaked. They attain their greatest height in the S. where the culminating point the Feldberg is 4800 ft. The Belchenberg in the same locality is only about 50 ft. lower. Towards the N. the chain subsides so rapidly, that some geographers conceive it to terminate near Neuenburg and Pfaffenheim, and give no name to the hills which continue as far as Heidelberg. With more propriety however the S. portion is designated the Higher and the N. portion the Lower Schwarzwald. The W. slope is the more abrupt, and furnishes the grandest features of the scenery for which the right valley of the Rhine is here so celebrated. This valley, however is so narrow that no rivers of any consequence take their rise in it. The E. slope, which is much more gradual, gives rise to the Neckar, and is still more distinguished by furnishing the source of the Danube. The highest summits of the Schwarzwald are covered with snow at all times, except during the hottest summer-months and hence it is only during these that they have any appearance of verdure. The rocky summits commences immediately below, and is occupied chiefly by pine. At the same elevation oaks are never seen. The mountains belong to three formations. In the S.W. the rocks are composed of granite and gneiss. Porphyry overlies the granite, but is confined within much narrower limits, though the loftiest peaks are sometimes formed of it. Some considerable heights in the N. and E. consist of red sandstone, which stretches in inclined beds from the Rhine, between Lautenbach and Waldshut, to the banks of the Main. The older rocks are rich in minerals, including silver, copper, iron, lead and copper.—2. A tn. Württemberg, east of the four into which that kingdom is divided. Part of it is surrounded by the territory of Baden, and part by Heilbronn. Area, 1957 geo. sq. m. Pop. (1892) 443,972

SCHWARZWASSER—1. A river, Germany, rises in the Rhenish Mountains, on the frontier between Bohemia, near Göttingen, flows W. N. W., entering Sagan at Georgenthal, then proceeds easterly N. N. W. passing near Schwarzenburg, and joins the Mulde of Zwicken on the right, after a course of about 26 m.—2. (or *Caracasodol*) A river, France, issues from Lake Widyne, prov. V. Puy-de-Dôme, flows very circuitously, first S.E., then E., then S.E. and joins a bank Vistula at Schwet. total course about 80 m

SCHWARZWASSER, two places, Austrian Bohemia.—1. [Fohst, Strass] A tn. circle and 16 m. N. N. E. Tachau, bank Vistula, near the Russian frontier. It consists of narrow streets, and contains a castle. Pop. 1200.—3. A vil. circle Troppau, hall. Friedberg, with a church. Pop. 1294

SCHWATZ [Latin, *Succowen*], a market. Austria, Tyrol, circle Unterinntal, r. bank has 16 m. E. N. E. Innsbruck. It is a poor place, but contains a handsome parish church, with good paintings, a Franciscan monastery, casino, and hospital, and has manufactures of various articles in iron and wire, hosiery, tobacco, and earthenware. There are valuable mines of silver, iron, and copper in the neighbourhood. Pop. 2518

SCHWÄDELKE, a tn. Hungary, co. Zepa, on the Kistice, among the Carpathians, 4 m. from Schmidskuta. It has a Protestant and a R. Catholic church, a normal school and copper-mines. Pop. 2469

SCHWIDT a tn. Prussia, gov. Potsdam. l. bank Oder 24 m. S.W. Steinf. It consists of the town proper and three suburbs has well built houses, spacious streets partially lined with chestnut-trees, and a large market-place; contains a castle, originally the residence of a branch of the margraves of Brandenburg, two Protestant parish churches, a French Reformed church in which one of the margraves and his margravine are buried; a synagogue, theatre, and hospital and has manufactures of woolen and linen cloth, tobacco starch and gunpowder, breweries, distilleries, and a trade in cattle. A considerable number of the inhabitants are descendants of French emigrants expelled from their homes by the revocation of the edict of Nantes. Pop. (1846) 7024

SCHWEGENHEIM a vil. Bavaria, Palatinat, cant. and near Gerolstein with a church. Pop. 1845

SCHWENKEL, a vil. Elsenach, Prussia, circle, 7 m. N. N. E. Treves, l. bank Moselle, river which there is here a ferry. It contains a church, and has several mills, and a trade in cattle. Pop. 1465

SCHWENKEL, a tn. Prussia, prov. Silesia, gov. and 29 m. S.W. Breslau, on the railway to Freiburg, cap. circle, on a height above l. bank Weistritz. It consists of the town proper and six suburbs as a place of considerable strength, being both surrounded by walls with six gates, and defended by a fort, and is well built, having good houses, two spacious squares, and wide well-furnished streets. It contains a Protestant church, a garrison church, and two R. Catholic churches, an Ursuline nunnery, a gymnasium, theatre, barracks, arsenal, hospital, and house of correction; is the seat of a superior court of law and several public offices, and has manufactures of woollen and linen cloth, hosiery and ribbons, starch-works, vinegar-works, dye-works, tanneries, breweries, and numerous mills and distilleries. Schwendelitz was the residence of the first Piazetta, was walled in 1225, additionally fortified in 1356, and repeatedly besieged during the Thirty Years war. It was made a regular fortress by Frederick II., in 1747 and afterwards stood several sieges, in the last of which, in 1810, after being beleaguered for 86 days, it was taken, and its citadel-works demolished. Pop. (1846) 19,555

SCHWEINA a tn. Saxony-Meiningen, on a small stream of same name, affluent of the Werra, 27 m. N. Meiningen with an orphan asylum and hospital, two paper and four other mills. Pop. 1500

SCHWEINAU a vil. Bavaria circle Middle Franconia, about 2 m. S.W. Nürnberg; with manufactures of gold-thread, boxes, toys, and other Nürnberg wares. Pop. 1974

SCHWEINARTE (Klaus) and Giesse, two municipalities in the Lower Austria, on the Moravian frontier, near Kitzbühel, with a church and a castle. Pop. 3008

SCHWEINFURT [anc. *Frangepa Succowen*], a tn. Bavaria, Lower Franconia, r. bank Main, which here forms an island each side of which communicates with the opposite

bank by a bridge, 34 m. N N E. Wirmberg. It is surrounded by an old wall with four gates in the east of several courts and public offices contains a R. Catholic and two Protestant churches a handsome townhouse, a gymnasium, founded by Gustavus Adolphus; Latin, agricultural, industrial, and other schools a burgher hospital, poorhouse, orphan hospital and infirmary, and has manufactures of starch and vinegar linen and woollen goods, hosiery, ribbons, matches white-lead, alchemy and hardware, a sugar-refinery, salt-petre and potash works, dye-works, tile-works, tobacco-factories, distilleries numerous mills, and a considerable trade, both general and transit, favoured by the river, which is here navigable. Schweinfurt is of great antiquity, and was long a free imperial city. It is the native place of the physician Sinapius, the historian Hundeshuh, and the poet Blücker. Pop. 7347.

SCHWEINHEIM a vil. Bavaria, Lower Franconia, 8 m. S S E. Aschaffenburg with a church. Pop. 1680.

SCHWEINLITZ, a Prussian factory gov. and 8 m. N E. Merseburg, on the Black Elster, with a church, a castle a fishery and some trade in wine. Pop. 1213.

SCHWEINLITZ, SWABIA, or THAUER SWABIA, a market in Bohemia, circle and 19 m. S E. Budweis. It contains two churches, a chapel, townhouse, and hospital, and has manufactures of cloth, and a weekly market as which on an average, 500 head of cattle are sold. Pop. 2381.

SCHWEINWART-Obere, or SCHWEINWART a market in Lower Austria, 20 m. N E. Vienna, r. bank Wiedenbach, in a wine district, with a castle and a church. Pop. 1329.

SCHWELKE, a Prussian Westphalia, gov. and 32 m. W W W. Arnberg, on the Selwin. It has a court of law, three churches and a superior burgher school manufactures of woollen, cotton, and linen goods ribbons, bed ticking, iron, steel and metal wares a red leather factory, dye-works bleaching, a general trade, and trade in cattle. Pop. 4191.

SCHWENNINGEN, a Württemberg circle Schwabwald, on the frontiers of Baden 10 m. W W W. Tuttlingen. Many of the inhabitants are employed in making the wooden caskets for which the district has long been famous. Pop. 3771.

SCHWENNINGEN, a river, Denmark duchy Holstein. It proceeds from the outlet of Lake Little Pilsa N. W. forms one considerable expansion, communicates with another at Preuss, and falls into the E. side of the Kiel-ford forming at its mouth a winter-haven of the fourth class, which admits vessels drawing 5 ft. total course, 33 m.

SCHWERIN the cap. of Mecklenburg Schwerin W. shore, lake of same name, 60 m. E. Hamburg. It is pleasantly situated is surrounded by a ditch, and a wall with seven gates, and is well built, containing four public squares, and a great number of well-paved and well-lighted streets. It consists of the old town and suburbs, the new town or Schloß, and the Fährstadt, and contains four churches of which the cathedral a colonial structure in the old Gothic style, has an excellent organ, a synagogue, a castle, three palaces, government offices, a townhouse, merchants hall, bank, theatre, gymnasium industrial veterinary military, and other schools, and numerous charitable establishments and endowments. The manufactures consist of woollen and linen cloth leather and earthen ware, sugar and brandy and there are numerous mills. Pop. 17,335. The lake formed by an expansion of the Elbe, is about 15 m. long N to S, and 1 m. to 2 m. broad of very irregular shape, and divided into two distinct portions by a peninsula which projects from its E. shore. It discharges itself at its N. W. end by a river which flows N. to Wismar, and falls into a bay of the Baltic opposite to the island of Poel.

SCHWERIN or SCHWERN a Prussian, gov. and 60 m. N W W. Posen, at the confluence of the Odra with the Warthe, here crossed by a bridge. It consists of the town proper and a suburb contains a parish church and synagogue, and has manufactures of woollen cloth, a tile-works, and several sawmills. Pop. 5444.

SCHWENZ or SCHWENZKE, a Prussian, gov. and 7 m. E. Posen, on a lake of same name with two R. Catholic churches and a synagogue, manufactures of woollen and linen cloth, and several sawmills. Pop. 2381.

SCHWETZ, a Prussian, Westphalia gov. and 21 m. W W W. Arnberg, on the Ruhr. It contains a Protestant and a R. Catholic church, and has manufactures of woollen cloth, and a trade in cattle. Pop. 5174.

SCHWETZ, or SWETSCA a Prussian, gov. and 80 m. S W. Marienwerder, cap. circle, l. bank Vistula, near the confluence of the Schwarzwasser with several courts and public offices two churches, a Franciscan monastery, and two hospitals, and a trade in cattle. Pop. 2004.

SCHWETZINGEN a Prussian circle Lower Rhine, in a fertile district on the Leimbach 9 m. S. E. Mannheim. It contains three churches, and a palace of the grand duke, with the garden and water-works. Pop. 2608.

SCHWETZKAU, or SWETSCA a Prussian, gov. and 41 m. S S W. Posen, with a R. Catholic church and manufactures of linen. Pop. 1027.

SCHWIEBENDINGEN a Württemberg circle Neckar, on the Glens, 9 m. N W W. Stuttgart with a church and a royal castle. Pop. 1244.

SCHWIEBUS, a Prussian, prov. Brandenburg gov. and 41 m. E. S. E. Frankfurt, on the Selweasser, with a castle two churches manufactures of woollen cloth, a brewery and a trade in horses. Pop. 4738.

SCHWIELACH, or SCHWELACH a lake, Prussia, prov. Brandenburg, about 13 m. N E. Lubben greatest length, N. to S, 9 m., greatest breadth 3 m. It receives several small streams, but is chiefly formed by an expansion of the Spre, which enters it on the N. W., and quits it on the N.

SCHWILAU or SWILAU a Prussian circle and 6 m. N. Kistau in the valley of the Angel, which is here crossed by a handsome bridge of six arches. It contains a parish church and a synagogue, and has manufactures of woollen cloth. At a short distance S. E. stands the old castle of Schwibach, now almost a ruin. Pop. 1419.

SCHWYZ, a central cant. Switzerland, from which the whole country is supposed to derive its name, bounded, N. by base Zürich and St. Gall, from which it is partly separated by Lake Zürich W. Zag and Luzern S. Lake Luzern, separating it from Unterwalden and Uri and E. Glarus greatest length E. to W. 26 m., greatest breadth, 21 m., area 256 sq. m. It belongs to the so-called mountain cantons being traversed in all directions by lofty chains and minor ramifications. Near the centre is the Mythen, 6315 ft. above sea level in the W. the Big 5905 ft. in the N. the Rothenberg 1095 ft. and the Rhone, 4026 ft., in the S. E. the Pannet, 3310 ft., and in the S. the Lützelberg 7412 ft. The whole canton belongs to the basin of the Rhine more than two-thirds of the surface being drained by the Aar and the Lake of Zürich a third by the Lake of Luzern, chiefly by means of the Mouta, and the remainder forming only an unimportant portion by the Lake of Zug. Valleys of considerable extent are interposed between the mountain chains but generally at such a height as makes their culture by the plough impracticable and hence the chief source of wealth is in the pastures, on which vast numbers of the finest cattle which Switzerland produces are grazed. In several places apples and pears are successfully raised, the cherry also thrives well, but not unfrequently suffers from sudden returns of frosts. In the lowest grounds the culture of the vine has been attempted, and wine of tolerable quality is produced on the S. shores of the Lake of Zürich. The canton is very poor in minerals. The washing of the sands for gold, once carried on to some extent, has ceased to be profitable, and iron, though found of good quality, the iron strata so much troubled and broken up that the working of it does not promise ever to become an object of economical importance. Neither trade nor manufactures can be said to have any existence, unless we include in the former cattle and dairy produce, to which reference has already been made. Schwyz being the most important of the cantons which first threw off the yoke of Austria, has had the honour of giving the name to the whole confederation. Its present government is an extreme democracy, the whole power, legislative and executive, being not only virtually but actually lodged in the male population of legal age, who assemble by holding a general assembly every two years, and appointing to all public offices of any importance. The great body of the inhabitants are R. Catholics. Pop. 40,650.

SCHWYZ, a Prussian, cap. above canton, picturesque situated at the foot of a double-peaked mountain, 16 m. E. Luzern. It consists of two principal streets, in which the houses are generally good, and seven minor streets, to which they are very indifferent. The principal buildings are the parish church, a handsome edifice, finished in 1774,

towering above all the other houses of the town, so as to form a most conspicuous object, and adorned within with a row of Ionian and Corinthian pillars, and several fine marbles, adjoining the church a small Gothic chapel, called Kerkir, built when the pope had, by a ban of excommunication, denied access to the church, and in such haste, that the half of it is said to have been finished in three days. The Dominicans convent, a spacious but old and shabby building, the Capuchin convent, in the church of which is a fine altar-piece the south-east, the convent, in which banners taken at Mort-garten, and others borne at several of the most celebrated Swiss battles, are shown and the Archiv or record-office Schwyz, inhabited almost entirely by R. Catholics, contains a Jesuit college, a monastery and a nunnery. Pop. 5225.

SCHYL, a river Europe, rises near the S. frontier of Transylvania flows E. by E. across the W part of Walachia, passing near Argejova, and falls into the Danube, 50 m. E. by S. Within opposite to Rahova, total course, about 150 m. In chief effluents are the Motron on the right, and the Salorta on the left.

SLIACIA [anc. *Therma Solimanica*] a tn. and seaport, Sindy, prov. and 80 m. W. N. W. Gurguts. It stands on the slope of a hill whose base touches the shore and presents a good appearance from the sea, being surrounded by walls flanked with bastions, and defended by a citadel in general, however it is poorly built, and has a very wretched look. It contains several churches and convents, a college, two hospitals, an orphan asylum, and most-degraded. Its harbour is small but large vessels anchor about 1 m. off in deep water with a good bottom and export great quantities of trade. Owing to the want of shelter almost the whole of the trade is carried on in summer. There is also some export of oil, soda, honey milled hardens and anachoris, refined nitre, and earthware. The thermal springs, to which Scouza owes its ancient name, are to the E. a little beyond the walls, and the vapour-baths, on the summit of the isolated mountain of Cologero, continue, as in ancient times, to be much resorted to. In 1821 a volcanic island was formed in the sea, about 20 m S. E. of the town. Agathocles tyrant of Syracuse was a native of Scouza. Pop. 12 000.

SCICLI a m. Sindy prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCIEZ (HAVANES) FILLY a vil. and com. France dep. Haute Savoie, prov. (Chablais) 3 m. W. S. W. Thyon, with an old castle, and manufactures of tobacco-pipes. Pop. 1865.

SCIGLIANO [anc. *Ayllaenus*] a tn. Naples, prov. Calabria-Citer., 10 m. S. Cosenza, on a height near r. bank Savuto. It is divided into seven different quarters and contains two colleges and seven parish churches, two convents, an hospital, and several almshouses. The district around is very fertile, and raises much corn, wine, silk &c. P. 10,000.

SCILLY ISLANDS, a group belonging to England, co. Cornwall at the entrance to the English Channel, about 30 m. W. by S. the Land's End. lat. (light-house on St. Agnes) 49° 55' 36" N. lon. 6° 20' 45" W. (a). They rise abruptly from a deep sea, form a compact group, about 30 m. in circumference, and are said to amount altogether to about 140 m. square, but these are only data of any importance, the remainder being mere rocks and islets. The six allied to the St. Mary's St. Agnes, St. Martin, Treason, Bryer or Brucles, and Sampson. With little exception, the whole of the islands consist of granite, which however varies in its formation and is of the most valuable description. The government is chiefly managed by 12 of the principal inhabitants, who con-sults what is termed a Court of Twelve, in which a military officer presides. Pop. 2627.

SCINDIE, SINDIE, or SINDH (from *Sindhu* a collection of waters), an extensive territory of British India, included in the presidency of Bombay comprising the lower course and delta of the Indus, and situated between lat. 25° 33' and 29° 50' N. and between lon. 68° 35' and 71° 18' E., bounded W. and N. W. by Baluchistan and Afghanistan, N. the Punjab E. the Indian desert and Rappootana, and S. the Runj of Cutch and the Indian Ocean, length N. to S. about 330 miles breadth very variable and uncertain; area, estimated at 52 120 sq. m.

Its sea-coast stretches in a direction generally W. N. W. from the Roror or E. mouth of the Indus to Cape Monze, a distance of 150 m. except at the W. extremity it is very

low being composed of mud-banks deposited from the rivers of the delta, or of low hills of sand blown in from the beach, the whole shore being a dreary swamp, destitute of trees or shrubs, and submerged at spring-tides. For several miles inland, also, the delta is frequently overflowed by the tide, and covered with water during the summer-months. In the dry season, the soft clay-soil, which is strongly impregnated with nitre, bears an abundant crop of gigantic grass, with furs, mimosas, and cast, and affords pasture to numerous herds of buffaloes. The alluvial tract further N., which skirts the Indus from 1 m. to 10 m. on either side, is, like the delta, intersected with canals and water-courses, but very superior to it in appearance, soil, and cultivation—possessing, indeed, a fertility exceeded by that of no tract of country anywhere known. E. stretches a region mostly alluvial, but which, from its having been deserted by the river has become a desert of undrained clay. It is chiefly level, but traversed by two low ranges of tertiary limestone and flinty chalk, and in some parts covered with shifting sand-hills, affording pasturage throughout its extent for camels, buffaloes, oxen, sheep, and other herbivorous animals. W.

of the Indus, the Hale or Braham Mountains approach the river at Schwan, and come close to the sea at Cape Monze; and between the former place and Kurushah, on the N. W. mouth of the Indus, is a mass of hills, the highest of which reach an elevation of about 1800 ft., terminating abruptly on the W. bank of the stream. W. Schwan, lat. 28° 21' N., which is considered to mark the division between *Sindh* or *Lower*, and *Lar* or *Upper Sindh*, the country improves in its aspect, but with regard to *Sindh*, as a whole, Capt. Pottinger well observes—"In general appearance it is that of a jungle wilderness and spontaneous vegetation takes the place of cultivation. Proceeding from E. to W. a few *Bambusa* and sand ranges are the only heights met with till the valley of the Indus terminates in the mountains of Baluchistan. Iron abundance in the limestone-formation, alum and sulphur in the western hills and numerous fossil shells have been discovered, with some curious forms of petrified timber.

Climate and Diseases.—The climate is remarkably dry and sultry the country is seldom visited by rain, and is not refreshed by the waters of the monsoons, which, though they approach, do not quite reach this territory. The mean temperature of summer at Sukkur, is about 102.4° F., and even the waters of the Indus at that season attain a warmth of 92°, farther N. it is supposed to be even hotter and the Afghans have a proverb which says—"The sun of Sindh will turn a white man black, and roast an egg whilst, indeed, is no exaggeration as the latter fact has been proved by experiment. In the upper districts frost is not unknown, and the heat often varies in the 24 hours from 40° to 84° F. The hot season lasts from March to September, the cold from October to March and the changes from the one to the other are so rapid, that spring and autumn are not experienced. The exhalations, caused by the evaporation during summer from the stagnant waters, and rank decayed vegetation, are extremely injurious to health, and the winds sweep from the surface smothering clouds of dust, impregnated with salt and nitre besides which, the unwholesomeness of the sea water the wells produces fatal disorders of the bowels, liver, and other organs. The chief diseases, which prevail most in autumn, are influenza, fever, ague, and spasmodic cholera.

Vegetation and Agriculture.—The husbandry of the Sindhians is of the rudest kind, their implements are very few, and of simple construction, for a plough, a rough heavy pole slightly pointed with iron, and drawn by a camel or two bullocks a rough beam of heavy wood for a harrow, a primitive kind of hoe or grubber, and an equally clumsy wooden rake these, with a cart and a few bullocks, are all the implements known to the Sindhian farmer. The N. districts not visited by the Indus, are artificially irrigated either by the Persian wheel, worked by a camel or by simply opening drains and canals leading to lowlands. These canals, indeed, give a name to the land connected therewith, and, as is common in some E. countries, the whole system of revenue, collection, and assessment, with respect to the land-crops under tillage, is regulated by the facilities for irrigation possessed by the soil in particular localities. The grain is trodden from the husk by bullocks, on a mud thrashing-floor, and after the government-collector has taken the tax in kind, the remainder is

namely covered with mats, protected by a clay-coating in the open air, or wined in jars of sun-burnt clay within doors. Under proper cultivation, the alluvial districts would become very productive, but large tracts have been kept in a state of nature by the Amers, so long its rulers, either to form hunting-preserves or to avoid striding the complexity of the surrounding tribes. In those parts that are under tillage, the land yields, not only annually, the *gryllus* crop consisting of wheat, barley, millet, sesamum and other oil seeds, hemp, opium, and tobacco; the autumn-crop of rice, maize, cotton, sugar, and indigo. Rice, wheat, and maize form the principal staples, being both extensively used for food, and exported. Pulses, with pumpkins and other succulent plants are raised in either season. The date, mango plantain, pomogranate, lime, citron, bananaid fig mulberry, pistachio, melon grape, &c., are amongst the principal fruits. Date-palms are planted in considerable numbers the produce being employed both for food and distillation. Floriculture also merits with attention. The shores of the delta and Lower Indus are overgrown with mango and bazarak trees, both of which supply fuel for cattle materials for the manufacture of mats and baskets, and wood for carpentry and fuel. The caper-tree and some others, furnish good timber for building, bantul and peepul trees are numerous. In moist situations gigantic grasses abound and rise to the height of 15 ft. or 18 ft., furnishing materials for thatch, ropes, &c.

Animals.—The native animals of Scindia include the tiger, panther, hyena, jackal, wolf, fox, antelope and other kinds of deer, wild ass, wild hog, &c. Porcupines, hares, and other game, are common in the open and uncultivated districts, and in the salt-marshes are bred vast herds of buffaloes. The camels of the one-humped species, are strong, hardy and valuable, both as beasts of burden and as furnishing a rich milk, and hair for shawls and cloths, the buffaloes are prized for their hides, flesh, and milk, of which last *ghos* is made, which is an important article of traffic in Indian commerce. The horse, lion, camel, and porcupine, are well known, active, and capable, like the camels, of enduring great fatigue and long privations. Sheep and goats are numerous in Upper Scindia. Birds are in great variety they comprise the eagle, vulture and different species of hawks, flamingoes and peacocks of large size, and in great numbers, in the delta, water fowl in great plenty the jungle-fowl, partridge, quail, and several kinds of parrots. Porcupines and alligators are met with in the Indus and its tributaries. Fish form a chief part of the food of the hunter classes of people, and the taking of these affords employment to many persons. Venomous snakes, scorpions, and centipedes are common, and the pools are capable of supplying great numbers of leeches.

People, Customs and Language.—The Scindians a mixed race of Juns and Belooches, are partly of the Hindus and partly of the Mahometan faith. They are described as well made, and handsome; tall, inclined to corpulence, and of dark complexion, and the women are particularly noticeable in the East for their beauty. Respecting the character of the Scindians most authorities agree that they are distinguished by gross ignorance, bigotry, deceit, mendacity, and avarice. Their warriors (exclusively Belooches by birth or descent) are given to be swaggering, boastful, not over brave, and are renowned for predatory habits. The country swarms, also with an idle race of men, alternately soldiers, beggars, and thieves ready for service under any leader and there are, besides, vast numbers of *fabers*, lazy, worthless mendicants, who under the pretences of religious belief on contributions exacted from the other inhabitants. The dress of the male Scindians consists of a loose shirt, a pair of Turkish trousers, both usually of blue cotton, a scarf round the waist and a gilded cotton-cap, embroidered with silk or gold but the men of rank wear instead of the latter, turbans of enormous size, 30 to 50 inches in diameter. The women dress like the men, with exception of the cap, for which they substitute a long, loose cloth thrown over the head, and occasionally drawn over the face. The filth of both sexes is excessive. Indeed, says Capt. Postles, it is impossible to conceive anything so filthy as the interior of a Scindian town. Every Scindian makes a common cover of the front of his dwelling; the narrow passage is blocked up with dungheaps, in which reside lazy English dogs and flies are so plentiful, that in the shops it is utterly impossible to discern a particle of what is

exposed for sale. Add to this, crowded streets of very filthy people, an intolerable stench, and a sun that would roast an egg and some faint idea may be formed of a Scindian town. The language is a branch of the Sanskrit, little differing in spelling from the pure Hindi of Upper India, though more regular and complete in the inflections of its nouns and verbs. It has a character peculiar amongst its cognate dialects, in being written from left to right. Belooches is also much spoken, especially in the districts W. of the Indus and Persian may be considered as the language of the higher orders.

Manufacturing Industry.—Manufactures are carried on at Hyderabad, Shikarpore and some other towns but the products are chiefly consumed within the limits of the country. The natives are very ingenious as weavers, turners, and artificers, and are specially noted for their skill in the production of woollen lacquer-work, famed throughout India. The leading textile fabrics are coarse silk, cotton or mixed cloths, a species of the latter called *komper* is highly valued in all the courts of India. The coarse silk goods are woven from silk imported from China and Persia, and coloured with indigo, saffron, kermes, madder, &c. they are mostly used for saris and turbans. The manufacture of the many-coloured Scindian caps forms also an important branch of industry, and much taste is often displayed in their dyeing and arrangement of colours. The Scindians are likewise renowned for the preparation of very soft and durable leather, tanned chiefly with banhal bark. It forms an important article of the export trade, and furnishes the material for a pretty extensive manufacture of shoes, sword belts, and water-bags. Ipper also, is made to some extent, and of fair quality, at Shikarpore and Kores. Earthenware is made in all, and gunpowder in most of the towns the pottery of Halia is remarkable for its tasteful shape, and good bright colours. Swords, spears, and dummies and inefficient firearms were under the Amers, made at Hyderabad but this branch of industry is now on the decline.

Trade and Commerce.—Before its submission to British rule in 1844 Scindia had but little trade. Even yet its trade is insignificant. Its imports consist chiefly of British piece-goods, valises and woollens, sugar, groceries, and spices mostly from Bombay, cotton and silk fabrics from Narwar, Gujara, and Multan raw silks, drags, and dyestuffs dried fruits, gold and gold thread precious stones, and horses from Khorassan, Cabool and Bokhara and of Ivory and wood from the Malabar coast. Its exports, principally its own productions, comprise rice and other grains, ghee, opium indigo potash, saffron, dried fish, shark fins, and Indian seaweed from its ports in the delta with cotton, silk and other fabrics, indigo metals, sugar and spices to Khorassan and the Punjab. The transit trade between it and Khorassan and Cabool is active, and earned on principally by Lehanna Hindons, through the Bolan Pass from Karsulce and Shikarpore.

Weights and Measures.—The weights and measures in use are based on the Hindoo, equal to 843 lbs. English and subdivided into *bachs* and *toynes* of uncertain and varying value, it serves both for liquids and dry articles. Land is measured by the *cubit*, *gundia* and *juris*, 5 cubits making a *gundia*, and 20 *gundias* a *juris* = 150 ft. a square *juris* being equal to 22,500 sq. ft. The money in circulation comprises the *khuldar* or *2* India Company's rupee = 2s and the *hasam* rupee, worth about half that of the Company.

Dynasties.—Scindia is at present divided into three collections—Hyderabad (the capital) Karsulce (the chief port), and Khympore. Besides these places, the principal towns are Shikarpore; its leading marts, Halia, Larhiana, and Tattal.

History.—Scindia was governed by Hindoo rajahs at the time of its invasion by Alexander the Great but subsequently, after many changes, it became an independent state. It was finally subdued by the Emperor Akbar in 1560, since which period it has always been either nominally or really tributary. In 1739 it fell under the power of Nadir-Shah but on his death it reverted to the imperial sway of Delhi. It was, in 1766, presented by the Mogul court as a dowry to Nizam Shah Durrani, king of Oobol, to which country it was (from its late annexation to British India) deemed subordinate. The country however was, during the whole of the last and the early part of the present century, a scene of

almost rampant civil dissension, caused by disputes between the two leading tribes of Baluchistan, which led at last to the elevation of the Talpūr dynasty of the Amerris. The government under these Amerris was a wholly unbridled military despotism, upheld by a feudal soldiery, supported by their respective chieftains, and estimated to have annihilated the British influence in the whole of Baluchistan and the Punjab. The hostility displayed by the Amerris of Seinde against the British during and after our operations against the Afghans led ultimately to its invasion by British troops, and final conquest by Sir C. Napier's victory at Meeanee, Feb. 17, 1843. Sir C. Napier was appointed the first governor, and it is interesting to note that the British Government has recently estimated it at £1,774,000.—(*Times*, *Summary of India*).

India, nearly in the centre of Hindustan Proper, which until lately was nominally independent but is now subsidiary to the British. It stretches very irregularly between lat. 21° and 26° 40' N., and lon. 78° 40' and 77° E., surrounded on the N and E by the territories of the new British presidency of Lahore, and of the Benares and Rohilcote and Bhawalpur States by the Nagm's Domains, Dhar Dewar, Indore (Holkars) &c. &c. and on the S by the Maratha dominions, the Maratha (or Gancawar), W. and N. by Banarra, Paragana, N. by Oleypoor Kotah and other Rajput states, Length N. to S. W. about 420 m. Area, 34,119 sq. m. Surface mostly undulating, with a general slope to the N. where it comprises a part of the great plain of the river Jamma. In the S. portions of it are traversed by the Vindhyan and Nainputra mountains. The Chambal bounds it on the S. W. other rivers and the small Aravalli, Dunsin, &c., tributaries to the Jamma, with their affluent, the Ghaghara, form the N. boundary of the North India and the Vindhya flow W. The soil is generally of high fertility, the villages are numerous, and the opium-poppy is an object of culture. The opium raised (as elsewhere in Malwah, in which province the greater part of the state is included), is delivered by treaty at a certain price to the British authorities, by whom it is exported from the ports of the Bombay presidency (See INDIA) to the various countries of the Oldenagins plants the sugar-cane, barley and wheat and the dry crops of the country. The rice-beds are raised the cotton is of short staple, and exported like the opium from Beroach &c. the tobacco of Bilas and Kachhwar is highly raised throughout Western India. The population are mostly Marathas, but include also Bheels, Miras, and Cooles, numerous Brahmins, a few Rajpoots, and a peculiar sect of Mahomedans called *Soras*, who are supposed to be of Jewish origin. At Beroach in the E. is the chief city, the chief trading towns being generally in the mountainous, gold, thread, glass, and paper are made. Other chief places are Gwalior (the cap.) Oojain, Mandsoor, Hindin and Chundoor. This state was founded after the successes obtained by the Marathas over the Mogul forces in 1726, by Scinde, a chief who raised himself from obscurity into prominence by his own merits. In 1761 Madajee Scinde negotiated a peace between the British and the Marathas, and about the same period he introduced European discipline and arms into his army, and he was afterwards successful in the person of the English emperor in whose name he subsequently acted, and was the most powerful member of the Maratha confederacy. His successor Dowlat Ali Scinde, in conjunction with the rajah of Berar advanced with hostile forces towards Poona; in 1803 but his troops were defeated by those under the Duke of Wellington at Assaye and again at the battles of Delhi and Laswaree by those of Lord Lake, and in consequence, all his territories N. of the Jamma, and the whole of the Maratha empire, were negotiated to the King of England &c. were ceded to the British, and he ceased to exercise control over the person of the Great Mogul. In 1816, Scinde sold Ajmer, Indragaur, and other places to the British, in exchange for sums of equal value. Few changes of importance in the foreign relations of the state occurred from that period till 1849 when soon after the accession of an infant emulship, a turbulent army conspired to assassinate the emul. Nearly 50,000 men were collected at the capital, and the British Government sent a force to counter with hostilities. In 1849, after the battle of Mankajur, the British troops were victorious, a new rajah was appointed to act in accordance with the advice

of the British resident during the maharajah's minority, and the state, which had previously been nominally independent, was constituted subsidiary to the Anglo-Indian government. A debt of Rs 98 lakhs of rupees (£280,000) due to the latter, was to be paid by the revenue of districts, yielding £76,500 annually and placed under the civil administration of British officers. Other districts in the E., S. and W., also placed under British control, were to contribute towards the cost (£180,000) annually were suggested for the maintenance of an Anglo-Indian force of seven battalions of infantry, two regiments of cavalry, and four batteries of artillery. Any other troops maintained by the maharajah were limited to 5000 man. The British resident at Gwalior is also the agent for the Government of India in all matters relating to the Gurkha territories. R 2956, 613 — [Muzumdar, *Vijaya* Jan. 1906. Troops, Survey of India.]

BOIO or *Scio* (see *Chios*, *Turkish Sals Anadol*) an island Asiatic Turkey in the Aegean Sea separated from the coast of Anatolia by a channel not more than 7 m. wide where narrowest, and about 63 m. W Smyrna. It is of a somewhat quadrangular form 82 m. long N to S., with a mean breadth of about 12 m. area, 296 sq. km. The surface is generally covered with limestone ridges, separated from each other by verdant and fertile valleys, and presents much scenery of a very beautiful description. There are no perennial streams, but an abundant supply of water both for domestic and agricultural purposes, is obtained from numerous large wells. In this and other respects the island resembles the Cyclades group are raised. The principal products are wine, cotton silk and more especially mastic, which may be considered as the staple of the island. The quantity of cereals is very limited. The metals is chiefly in dried fruit, preserves, oil, and sale. 1. top. of whom a large portion are Turks, about 52 000 —. The capital, of the same name, near the middle of the E. coast, consists of houses built for the most part of heavy stone or brick and generally with terraced roofs; is defended by a castle has manufactures of velvet and some lighter fabrics and at its harbour which is formed by two moles, and provided with two lighthouses, which its difficulty of access renders extremely important. Pop. 14,500.—Before the end of Greek independence, Scio was peopled almost entirely by Greeks who enjoyed greater privileges than were usually conferred on their countrymen, and were generally in comfortable circumstances. Their number at the time has been estimated at 130,000. The part which they took in the war appears to have exasperated the Turks beyond measure, and provoked them to retaliate by fearful atrocities. Having made themselves masters of the island in 1822, they are said to have put 40 000 persons to the sword, either under circumstances of horrid cruelty, or to have reduced the population to 15,000. Scio continues to be a place of considerable importance, and its devastation in the rock is given as an example where the sea is fabled to have taught. Notwithstanding its ancient celebrity it possesses few antiquities.

SCIORTLO a tn Seely prov and 14 mi. N W Byrnes. Pop 6000.

SCIOTO, a river U States, Ohio. It flows S. past Columbus about 200 m., and joins the Ohio at Alexandria. It is navigable for large keel-boats 180 m. and for rafts almost to its source.

SCISCIANO, a vit Naples, prov Lavoro, W S W Nola,
in a plain; with six churches Pop. 1100.

MATUPUA FE. — S. A vil and township, U. States. See *Matupua*, 29 m. — S. K. Boston, on Mamalahe Bay; with a number of churches and schools. Its harbour, at the mouth of North River, is small and difficult of access, but convenient. On the river many fine ships are built. It has some shipping and fishing trade, and manufactures of leather, boots, and shoes, hats, &c. *Pop.* 2,142. — S. A vil and township, Ethiope Island, 19 m. — W. Providence, on the Paravietz with three churches, a seminary, and extensive cotton and woollen manufactures. *Pop.* 1,683

SCLAUVONIA [German, *Slowenien*], a territory or part of the Austrian Empire, formerly incorporated with Hungary, but now forming part of the kingdom of Croatia and Slavonia, bounded N by Hungary, E the Banat of Hungary, S Turkey, and W Croatia. Area, 5749 sq. m. It is of a very irregular and straggling form, stretching W to E. for 180 m. while its average breadth does not exceed 40 m. Its natural boundaries, however, are admirably defined by mighty rivers—the Drave on the N and the Sava on the S, and their junction with the Danube on the E. A branch of the Carian Alps, entering Slavonia from Croatia on the W, traverses it throughout its whole length, forming the water-shed between the Drave on the N and the Sava on the S. sending down numerous small streams into each, and terminating somewhat abruptly on reaching the banks of the Danube. These mountains, which are almost entirely composed of limestones, intersected occasionally by serpentine and porphyry are neither very lofty nor rugged, though they frequently terminate in sharp-pointed peaks. They are generally covered up to their summits with magnificent wood. Mount Papuk, in the upper part of the Poage is the culminating point of the chain and is not more than 2700 ft. above the level of the Danube. On either side the mountains slope down rapidly and give place to a succession of low hills and valleys, presenting a beautifully undulating surface, clothed with verdure or covered with orchards, and then of plains which extend without interruption to the banks of the river, in some parts inundated twice and thrice a year. The tracts thus exposed form belts along the Sava and the Drave of several miles in width and being covered with verdure, form meadows on which large herds of horses, cattle, and swine are reared. The soil is almost throughout of remarkable fertility. Grain, fruit, flax, hemp, tobacco, liquors and madder are extensively raised. The minerals understood to be important, are worked only to a very limited extent. They include several mines of copper and argentiferous lead, abundances of iron and exhaustless supplies of beautiful marble. Slavonia has hitherto owed much more to the bounty of nature than to the industry of its inhabitants, who are generally very ignorant, and if not indolent, restless, and of unsocial habits. This is owing in a great measure to the peculiar circumstances in which they are placed, the far greater part of their country and particularly the whole of it along the Sava, belonging to the Austrian military frontier, where every man capable of bearing arms is a soldier and the ordinary arts of life are of secondary importance. There are no manufactures deserving of the name, but the transit trade along the navigable rivers within which the country lies enclosed is considerable. The principal exports are fat cattle and swine, oxen, chiefly wheat and rye, hides and skins, including those of foxes, wolves, and bears, tobacco, madder, liquors, caviar, honey and wax. The principal imports are iron, salt, and oil. Slavonia is the only country which has preserved the name of the great Slavonian stock. The inhabitants call their country *Slavonaka* and themselves *Slavonaks*, and speak the so-called *Illyrian* tongue, which under a great variety of dialects prevails in many countries of Hungary in the E and N. parts of Croatia, in Dalmatia, Servia, Bosnia and Herzegovina. For administrative purposes Slavonia is divided into civil and military Slavonia—the former on the N subdivided into the three counties of Poega, Verocsa, and Syryna and the latter on the S E and N. E. subdivided into the two regimental districts (*Regimentsbezirke*) of Brod and I. curwarden and the battalion districts (*Battalionsbezirke*) Camladia. P. 335,000.

SCLAUVONIA a vil and com. Belgium, prov and 10 m. E. Namur on the Meuse. It has manufactures of crucibles, glass, pipes, earthenware, and tobacco, a distillery and limekilns. Pop. 1492.

SCOGGIO-GRANDI an is. Ambr. in the Adriatic, belonging to the Friulian group, off S.W. coast of Istria, about 5 m. S.W. Dignano. It is of very irregular shape, about 4 m. long, by 1 m. broad and has on its E. coast the village of Brioni, which gives its name to the whole group.

SCOLE, or Osmundston, par. Eng. Norfolk 821 ac. Pop. 382.

SCOMHIE a river European Turkey, Albania, rises on the border of Macedonia, whence it flows N.W. and W. passes E. to the sea and enters the Adriatic, 15 m. S. Durazzo. total course, about 125 m.

SCONE, a vil and par. Scotland, co. and 3 m. N.E. Perth, 1 bank Tay, with Established Free and U. Presbyterian churches. The village of New Scone consists of neatly built houses, and contains 1489 inhabitants, chiefly engaged in handloom weaving. Of Old Scone, the principal remains are a market-cross. Its ancient abbey in which the kings of Scotland were wont to be crowned on the stone of destiny now in Westminster Abbey, is only represented by inconsiderable ruins, and on the site of its ancient palace now stands the elegant modern mansion of the Earl of Mansfield. Area of par., 7000 ac. Pop. 2381.

SCOOTIE par. Scot. Fife. Pop. 8115.

SCOFIA a vil in Turkey in Europe, in S.W. of Bosnia 18 m. S.W. Travnik, on a steep height above a bank Vrbas. It is defended by a strong castle. Pop. about 1800.

SCOPWICK par. Eng. Lincoln 8190 ac. Pop. 419.

SCORBOROUGH par. Eng. York (b. Riding) 1329 ac. Pop. 90.

SCORFF a river, France, rises in N. of dep. Morbihan flows S., and falls into Lorient harbour, total course, 40 m.

SCORRANO a vil in Naples, prov. Otranto E.N.E. Gai. It stands on a hill, and has two convents. P. 1200.

SCOTHPRN par. Eng. Lincoln 2500 ac. Pop. 572.

SCOTLAND and *Scotlond*, French, *Scotia* German *Schottland*, the N. division of the island of Great Britain between lat. 54° 38' and 58° 40' 30" N. and lon. 1° 41' and 6° 30' W. It is separated from England on the S.E. by the Tweed S.W. by the Solway Firth and S. partly by the Cheviot Hills and partly by an indefinite moorland tract, known anciently by the name of the Debatable Land and bounded E. by the North Sea, and N. and W. by the Atlantic Ocean. The greatest length from N. to S. is 287 m. The breadth varies considerably. Measured from N. to S. between Kiln Head and the Mull of Kintyre, it is 317 m., and on the parallel of 56° 51', and 56° respectively 130 m. 125 m. and 43 m. Between Alloa on the Forth and Dumfries on the Clyde the width is diminished to 33 m. and farther N. where a kind of peninsula is formed by the Dornoch Firth on the E. and Loch Broom on the N., it does not exceed 24 m. These measurements apply only to the mainland and therefore when the true area is to be ascertained it is necessary to add the numerous islands which singly or in groups lie between and form one of their peculiar features. On the E. coast these islands are so few and small as not to require special notice but on the N. are the two large groups of the Orkneys and Shetlands of magnitude sufficient to form a separate county while on the W. a series of groups known by the names of the Hebrides and Western Isles, stretch almost uninterruptedly from N. to S., at a short distance from the coast, and though not formed into separate counties, form no insignificant portion of the whole area of the country. The largest of them are Lewis and Harris, N. L. In. S. Uist, Skye, Mull, Jura, and Islay. In the S.W. the islands of Arran and Bute have been deemed of sufficient importance to be formed into a separate county under the name of the latter. The name, area, and population of the different counties or shires, are exhibited in the following table. (See next page).

Coasts, Roadsteads, and Harbours.—Scotland in its general appearance contrasts strikingly with that of England, possessing few of the long open valleys and wide undulating plains for which the latter is distinguished. The coast-line, with the exception of a portion in the N.E., chiefly along the Moray Firth and another portion in the S.W. chiefly along the Solway Firth, where low and sandy beaches have been formed, presents an almost uninterrupted succession of deep indentations and bold rocky cliffs and headlands, and stretches out so much when its different windings are followed, as to have an aggregate length of at least 2500 m. Of these, the far larger part are traced on the W. coast, on which the waves of the Atlantic, breaking with tremendous force, have scooped out wide gulfs, and penetrated far inland, forming arms of the sea to which the name of lochs has been given perhaps improperly because they are apt to be confounded with inland lakes, to which in Scotland the same name of lochs is constantly applied. Of these sea-lochs which are entirely confined to the W. coast, the largest are Loch Lomond between the shires of Argyre and Dumbarton; Loch Fyne wholly, and Loch Lunan chiefly in Argyreshire, the former celebrated for its

other hand, on the Ayrshire coast, are the magnificent harbours of Troon and Ardrossan. Still farther in, Greenock, with its excellent harbour capable of accommodating the largest vessels, appears; and at last, after a long interval, when the firth has contracted to a river, and the river to a narrow channel a whole forest of shipping comes suddenly into view and discloses one of the greatest ports of the British Empire. In a locality where nothing short of consummate skill and undomesticated perseverance could have formed or even continued to maintain it. From this busy sketch of the coasts, roadsides, and harbours of Scotland, our attention is naturally turned to its interior, which for convenience of description has been divided into three distinct regions—a southern, a central, and a northern.

Southern Region.—The S. region commencing on the firth of Forth, stretches across the island, and then N. to the Lanarkshire and the Pentland Hills, so as to include the whole counties of Wigton, Kirkcubright, Dumfries, Roxburgh, Berwick, Selkirk, and Peebles, small parts of the East and Mid Lothians, and large parts of the S. of Lanarkshire and the S. of Ayrshire. Thus defined it is essentially a mountainous region, presenting both in isolated masses and continuous ranges a great number of summits which are more than 2000 ft. above the sea. The more conspicuous of these are situated near its centre where Queensberry Hill the Lowther Hills, and Dundee, attain respective heights of 2259 ft., 2896 ft., 2836 ft., and 2790 ft. The most remarkable of the isolated hills are Culmadruff 2598 ft., and Criffel 1930 ft., the one in the W. and the other in the E. of Kirkcubrightshire and Tinto, 2806 ft. in Lanarkshire. The most of the mountains have flat or rounded summits and slopes gradually without breaking into precipices. They are thus deficient in some of the grander features of mountain scenery but are in general clad with a richer verdure, and give origin to a great number of beautiful pastoral valleys.

These usually borrow their names from the streams which flow through them, and form the dales of Niddale, Annandale, Teviotdale, and others, well known in border minstrelsy. In many parts, however, the S. region loses its mountainous character and spreads out into undulating and even level plains, celebrated both for their fertility and the skill displayed in cultivating them. The most extensive and celebrated of these is the Merse in Berwickshire, but they occur also in Roxburghshire, in the lower districts of Dumfriesshire, and in several parts of Wigtonshire. At least three-fourths of the surface of this region belongs in geological structure, to the Silurian system, and is composed of grey wacks and coarse slate. In this formation the valuable limestone which have so long been worked at Lead Hills and Waulkmoor, on the borders of Dumfriesshire and Lanarkshire, are situated. Eruptive rocks are found chiefly among the Cheviots, which are composed almost throughout of porphyry and three large outcrops of granite are seen in Kirkcubrightshire—one in the N.W. near Loch Doon on the borders of Ayrshire; another near the centre of the county the third and largest in the S.E. where it commences on the Solway Firth, the River Water, and stretches N.E., carrying the Criffel mass to its centre. Rocks belonging to the lower parts of the secondary formation occur chiefly in the S. of Dumfriesshire and in parts of Roxburghshire and Berwickshire. They are composed mostly of old red sandstone, but occasionally rise higher in the series and become truly carboniferous. Coal accordingly is worked in a limited coal-field near Greenock, in the E. of Dumfriesshire and in the N.W. of the same county both limestones and coal, the latter remarkable for the thickness of its main seam, are worked to some extent.

Central Region.—The central region commencing where the S. terminates, extends N. to the foot of the Grampians, and then has its boundary nearly defined by a straight line drawn in a N.E. direction from the mouth of the Clyde to Stonehaven on the E. coast. Though the least of the three regions, comprising not more than a sixth of the whole surface, it is by far the wealthiest, and contains probably three-fifths of the population. This superiority it owes partly to the fertility of its soil, and more to its natural resources. It includes on the S. of the Forth and Clyde nearly the whole of the Lothians, the greatest parts of Lanarkshire and Ayrshire, and the whole of Renfrew and on the N. of them the more

level parts of Dumbarrow, Stirling, and Perth, the whole of Clackmannan, Kinross, and Fife, the greater part of Forfar, and rather more than the half of Kincardine. It thus contains the lower parts of the basins of the Clyde, Forth, and Tay, including the rich alluvial flats which line the banks of these rivers as well as the finely undulating slopes and straths which gradually rise from them and in its cities towns and numerous villages, its country seats and unenclosed grounds, its orchards, gardens, and cultivated fields, procures itself to be one of the most distinguished abodes of industry, commerce, and agriculture. Though, considered as a whole, it is much less elevated than the general surface of Scotland, it has none of the monotonousness to flat countries. With the exception of what are called oaze-lands, the diversities of hill and dale are never wanting, and several of the continuous ridges which stretch across its surface attain heights which in most other countries would be considered sufficient to entitle them to the name of mountains. The most conspicuous of these ridges are the Kilsyth and Campsie hills, which, commencing in Dumbarrow, stretch E.N.E. towards the town of Stirling the Ochil Hills, which, commencing to the N.E. of the same town, stretch between the lower part of Perth and Clackmannan and Kinross into Fife, and the Sidlaw Hills, which, commencing in the E. of Perthshire, pursue a direction nearly parallel to the two former ridges across the S. of Forfarshire. The eruptive rocks of the central region are found chiefly in the three ridges of hills just mentioned, but are also found widely diffused over its surface, in the forms of veins and patches. They are entirely composed of varieties of porphyry and trap. All the sedimentary rocks are of secondary formation. The old red sandstone situated at the bottom of the series is most largely developed in the N. part of the region and stretches continuously from Dunbarrow to Stonehaven in a broad belt, which widens out as it proceeds E. and finally covers the greater part both of Forfar and Kincardine. Almost the whole of the celebrated valley of Strathmore thus belongs to it. The same formation occurs to a less extent on the S. frontiers of this region in the S. of Haddington and Midlothian and in detached portions of Lanark and Ayr. The remainder of the surface belongs decidedly to the carboniferous system containing all its usually accompanying rocks in regular series, from the mountain limestones upwards to the new red sandstone or Permian system. The part of the secondary formation higher in the series, and developed to a remarkable extent in England is here altogether wanting. Coal and ironstone, both in the greatest abundance and of the best quality form a number of separate fields, which extend with little interruption from the E. to the W. coast and are all included within the space bounded by two nearly parallel lines, the one drawn from the mouth of the Tay through Stirling to the side of Arran, and the other from the town of Dunbar in E. Lothian, to that of Orkney on the coast of Ayrshire. The whole area thus defined cannot be less than 1500 sq. m. but when allowances is made for the large space occupied by igneous rocks, where the coal, if it ever existed, has been burnt up or otherwise destroyed, and the much larger space lying between the different coal-basins, after their seams have cropped out, probably a half will require to be deducted from the above area.

Northern Region.—The N. region, consisting of the whole of the island situated N. and W. of the line which we have supposed to be drawn from the mouth of the Clyde to Stonehaven, is by far the largest of the three and is remarkable for the number and elevation of the mountain ranges by which it is traversed. Immediately to the N. of the valley of Strathmore the Grampians rise in majesty, and present an apparently impregnable barrier. Behind this barrier the ancient Caledonian rock refuge, and defied the Roman legions. The Grampians form not so much a chain, as a system of mountains, in which the loftiest summits are so irregularly grouped that it seems almost impossible to fix on any particular range as the principal axis. Assuming that it commences on the N.E. coast of Kincardine it stretches in a W.S.W. direction first across that county and then forms the boundary between Aberdeen on the N. and Forfar and Perth on the S. On reaching the S.W. extremity of Aberdeen it is joined by another range coming from the N.E., and commencing it with a remarkable cluster of summits occupying a kind of isolated corner common to the counties of Aberdeen, Banff, and in

volcanic. On being joined by this range the principal chain follows its direction, and stretches E. W. between Forth and Inverness, all it again reaches a point common to these counties, and that of Argyle. Before reaching this point the Grampians widen out both on the N. and S. sending branches in the former direction into Inverness, and in the latter over the whole breadth of Perthshire, and even beyond it into Strathgairn, where they appear to find an appropriate termination in Benlonead. A middle branch, which from following the original direction, is perhaps entitled to be considered as the principal chain, enters Argyshire, and is continued between Loch Awe and Edra towards the coast. From here it runs easterly to be terminated, as its ramifications obviously extend into the adjacent islands of Mull on the right, and Jura and Lays on the left. Some hold Muthapay to be the N. limit of the Grampians, and of course consider the Moagh Lea Mountains, which rise immediately beyond the strath, and are parallel to it, as a distinct chain. A better arrangement considers the Moagh Lea as only one of the parallel terraces of the Grampians and finds a much better boundary in the valley of Glenmore and its remarkable chain of lakes. The Grampians, compressed within these limits, is the loftiest mountain chain in Great Britain and contains a number of summits exceeding 4000 ft. The culminating point long supposed to be Ben Nevis 4370 ft., in the W. of Inverness-shire is now claimed by Ben Macduin, said to be 4290 ft. It forms one of the remarkable cluster of mountains already referred to as meeting on the borders of Aberdeen, Banff, and Inverness. The others connected with it are the celebrated Cairngorm, Cairnval, and Ben Avon respectively 4695 ft. 4220 ft., and 3967 ft. To these may be added Ben Graham in the Argyleshire 3570 ft. Benmore, Strathgairn 3195 ft., Ben Muir, Ben Larn, Schellallier, Benavoulch, Partick, respectively 3919 ft. 3945 ft. 3513 ft. 3180 ft. 3551 ft. and Benmore on the N. frontier of Forfar 3377 ft. The Grampians in general have a very sterile and desolate aspect. The grass or heath which usually covers their lower declivities often disappears in the ascent, and long before the loftiest summits are reached vegetation appears to be all but extinct. Many of the mountains have a rounded form, but others of them terminate in fantastic peaks, and have their sides clothed by ravines, the sides of which present precipitous pendulous of every kind and size. One of these on Ben Macduin has a height of 1000 ft., and another on Ben Nevis a height of 1500 ft. On the N. and W. shores of the lakes of Glenmore another series of mountain chains begin to rise, and are continued with little interruption to the N. coast across the counties of Inverness, Ross and Sutherland, their general level is much lower than that of the Grampians and their loftiest summits, rising generally from an elevated table-land, lose considerably in their apparent height, and hence often fail to furnish specimens of the grand and sublime similar to those for which the Grampians are celebrated. Many however who have visited them affirm that they are less admired merely because they are less known. The more remarkable of the summits are Ben Wyvis, Ben-achair 3730 ft. Ben Dearg, Ben More, and Ben Clibric, Sutherland, respectively 3551 ft. 3231 ft. and 3165 ft. and Morven Colindene, 2334 ft. The last-mentioned falls considerably short of the others, and calls attention to the fact that the county in which it is situated has not much of an alpine character and slopes gradually from the E. frontier of Sutherland, till it presents the appearance of an undulating plain sometimes fertile, but for the most part covered with stunted heath. The same lowering of the surface towards the E. coast is exhibited also on the E. of Sutherland, and still more along the shores of the Moray Firth and of Aberdeen, making these districts, though locally within the Highlands, truly part of the Lowlands of Scotland. The geological structure of the N. region is distinguished from the other two chiefly by the extent to which granite and the crystalline schists are developed within it. Chlorite and mica-schists form the whole of the E. frontier of this region, forming a very narrow belt in Ross-shire and the N. of Telfer, but widening out on the N. of Perthshire, and finally entering the larger part of Argyshire. Gneiss is developed on a still larger scale, covering considerable parts of Aberdeen, Elgin, and Nairn and nearly the whole of Inverness, Ross, and Sutherland. The largest development of granite is in Aber-

deen, where it intermingles strongly with the gneiss, and nearly chases the country with it. Patches of granite are also diffused over many other quarters. Trap is not often seen on the mainland, but the large islands of Skye and Mull are almost wholly composed of it. The only part of the secondary formation covering considerable tracts is the old red sandstone, which extends over nine-tenths of Caithness, and is confined S. by a belt along the coast. This belt is narrow on the E. coast of Sutherland but widens out greatly on reaching the Dornoch Firth, between which and the Moray Firth as far E. as Banff it not only runs the above, but penetrates to some distance inland. The old red sandstone also occupies almost the whole group of the Orkneys, and appears in several large patches on the W. coast of Sutherland and Ross, more especially the latter in the vicinity of Loch Broom, and S. along the coast as far as Loch Carron. Above the old red sandstone a large gap occurs in the secondary formation and the carboniferous system appears to be altogether wanting except at Brora, in Sutherland where a small unimportant coal-field has been worked. In the same vicinity a belt of lias and coals extends along the coast from Helmsdale to Gairloch.

Rivers and Lakes.—In proportion to the extent of the country, there are both numerous and of great magnitude, but in consequence of the configuration of the surface are not very equally diffused over it, the W. part containing almost all the lakes and the E. with a single exception, all the more important rivers. Beginning with the latter and proceeding from the S.E. extremity N. the first large river which presents itself is the Tweed, which, from rising in Scotland, and drawing its chief supplies from it, is usually considered a Scotch river, though though it flows across more than half of the course is shared by England. Its basin comprehends the whole counties of Peebles and Selkirk, a small part of Midlothian the whole of Berwickshire, nearly the whole of East Lothian, and a small part of the English county of Northumberland, and has an area of about 1670 sq. m. It wants the wide estuary which is common in Scotch rivers, and in consequence of this as well as the shallowness of its mouth, and the rapidity of its current, is of little navigable importance. It is celebrated, however, for its salmon-fisheries, its length, including numerous windings, exceeds 100 m. It rises near the E. end of the Firth, where it is called Benlonead and possesses comparatively little importance till it reaches Stirling where it commences the beautiful windings for which it is celebrated, and begins to be navigable, at first only for small sloops favoured by the tide, but at Alloa, and thenceforth to its mouth, for vessels of the largest class. Its chief navigable importance, however is due to its magnificent estuary on which Leith and Granton, the two ports of the capital are situated and the communication opened up with the W. by means of the Forth and Clyde canal in length including windings, if conceived to terminate at Kinross, is about 100 m. but when its estuary is added is increased to at least 140 m. Its basin includes, on its N. bank a part of the S.W. and S. of Perthshire, the whole of Clackmannan and Kinross, and the far larger part of Fifehire and on its S. bank a long narrow belt of the W. and the whole of the E. of Strathgairn, and the whole of the three Lothians with the exception of two small corners of Edinburgh and Haddington belonging to the basin of the Tweed. The area of the upper part of the Forth basin, terminating at Kinross, is only 645 sq. m., but adding to it the basin of the firth, the whole area cannot be less than 1400 sq. m. The Forth owing not so much to the depth and width of its channel, as to the rapidity of its current, and the supplies which it is constantly receiving from closely mountainous regions and melting snows, surpasses all the rivers of Great Britain in respect of the quantity of water which it discharges into the sea. It has its source in the W. extremity of Perthshire, and pursues a very tortuous course S. E. till it reaches Perth where it becomes navigable, with the favour of the tide, for vessels of 100 tons, and begins to lose the flesh of its name. Owing partly to the sands which accumulate in its bed, and from their shifting nature grows to become the difficulties of navigation, its navigable importance is almost confined to Dundee, where, notwithstanding all that has been done in providing piers and locks, large vessels must still anchor in the channel. Its salmon-fisheries are the most valuable in Great Britain. Its

Irish and Ayr, the lower parts of the middle and western districts of Fife, Perthshire, and the Garioch of Garioch, in Perthshire, and the valley of Strathmore contained from the E. of Perthshire and across Fife to the Mearns, and in the N. region, though on a more limited scale, in parts of the E. of Perthshire, and the lowlands which line the shores of the Moray Firth, including parts of Cromarty, Nairn, Moray, Banff, and Aberdeen. In all these quarters the art of farming may be seen to its highest perfection as in any other portion of the globe. The dairy husbandry in general merits less praise, but has made considerable progress in Lanarkshire and Ayrshire. For other particulars relating to agriculture, see *BURROWS*.

Manufactures.—While generally referring to the article *BURROWS* for details concerning mineral marine, and industrial products, we may add that the principal branches of manufactures are cotton, which have their central locality at Glasgow and Paisley, linen at Dundee and Dumfries, woollens at Kilmarnock, Galloway, Striving, and various places at the foot of the Ochil and mon, which, besides comprising numerous smelting-works in almost every great Scottish coal-field has recently begun to be employed on a very extensive scale in ship-building, particularly on the Clyde.

Government.—In regard to general government, Scotland stands on the same footing as England and Ireland but in the Articles of Union express stipulation, declared to be essential conditions of the union itself, were made in regard to law and law-courts, and the form of church-governance.

Law and Law-courts.—The law of Scotland strongly resembles, and is in a great measure borrowed from that of England, in regard to those branches which have either been created or greatly extended by the progress of modern civilization. Hence, trial by jury in civil causes and many of the most important parts of mercantile and maritime law though differing much in form are substantially English. The strong inclination of the legislature to extend this uniformity has been manifested in many recent enactments, and more especially in those relating to the law of trial. In regard, however, to crimes, and what are called heritable rights, relating chiefly to lands, houses, and things which may be considered accessory thereto, the Scotch and English codes continue essentially different. In regard to crimes, the penalties have almost, as a matter of course, been nearly assimilated, but the forms of procedure exhibit striking contrasts, and while unanimity is still required in English juries, those of Scotland decide by a simple majority—a mode perhaps more rational, but certainly far less favorable to the accused. In regard to heritable rights, the feudal law with its numerous and perplexing formalities long possessed, and though considerably modified by recent changes, still retains a greater ascendancy in Scotland than in England. If in regard to these rights, Scotland has any title to boast of superiority it is chiefly as her admirable system of records, by which all hereditary affecting land can be accurately ascertained, so as to make either the purchase of land or the lending of money upon it as secure as any other kind of investment. The Court of Session is the supreme civil court of Scotland, but wants one of the essential characteristics of supreme strictly so called, inasmuch as its decisions may be carried by appeal to the House of Lords. In the Articles of Union the integrity of that court was stipulated, and while the growing wants of the country made it necessary that some modification should take place, legislators were greatly puzzled how to proceed without running counter to the stipulation. The judges, 15 in number, sit in one court, called the Inner House, whenever a final judgment was to be given and of course, each case was pronounced to be studied by the whole 15. It was justly deemed preposterous that so many minds should be thus employed, and, by a happy device, without changing the name of the court, or even supposing that of the Inner House, a kind of third-class division was made, by which a certain number of the judges were removed to the Outer House, to sit there as permanent Lords Ordinary and the remainder, forming the Inner House, were arranged in two divisions, each to sit separately and decide finally on all cases brought before it before review. The success of this expedient has led to other important changes. The number of the whole judges has been reduced to 15 and in discussing other expedients changes which are still proposed, the legislature is evidently

prepared to adopt or reject them on their own merits, without reference to the Articles of Union. The Court of Justiciary, or criminal court, though composed only of judges of the Court of Session, is supreme in the highest sense, since its decisions in criminal cases are not subject to any review. The principal subordinate judicial bodies are Sheriff courts, established in each county or stewartry. Sheriff's authorities, or judges ordinary, sit on more holding separate courts in different districts, besides, in the first instance, subject to the review of the principal sheriff or sheriff-depute, whose decisions, though final within the limits of his jurisdiction, are reviewable by the Court of Session, with the exception of classes of cases provided for by special statutes. The most important of these classes are those which come before the Small-debt Court. In it the sum sued for must not exceed £12; and the sheriff's decision is final. Besides the sheriff, each county or district of a county has its Justice of Peace Courts, in which judges, not stipendiary, decide on principles of equity in minor crimes and small debts, and in every town of any importance are Burgh, Dean of Guild, and Police Courts with limited jurisdictions.

Religion.—The Church of Scotland, as guaranteed by the Articles of Union, in its doctrine, government, and discipline, is the church established by law. Its form is Presbyterian and its doctrine Calvinistic. All its ministers hold the same ecclesiastical status of presbyter, and are on a footing of perfect equality. The whole country is parcelled out into 1010 parishes, in each of which there is at least one presbyter or parochial minister, who, in conducting the affairs of the parish is assisted by a body of laymen called elders. The elders, presided over by the minister as permanent moderator form the Kirk-session, which is the lowest court of the church, and decides, in the first instance, on matters of discipline, and various other parochial matters, chiefly of an ecclesiastical nature. Its decisions are subject to the review of the court next in order, which is the presbytery and is composed of all the ministers, and an elder from each of the parishes within its bounds. The next higher court is the synod, composed of a certain number of presbyteries, being usually all those contained in one county. The synod reviews the decisions of presbyteries both in cases which have originated in them, or been brought before them from Kirk-sessions. The highest, or supreme ecclesiastical court, is the General Assembly. Its constitution is very peculiar. A lord high commissioner sits in it as representative of the sovereign, but does not take part in its deliberations. The presbyter or moderator is chosen annually by each assembly. The members consist of representative ministers and elders. The ministers are chosen only by presbyteries, each presbytery choosing one or more, according to its numbers; the elders are chosen chiefly by presbyteries, but each of the old 45 royal burghs may, and most of them do, send an elder. The General Assembly sits in two capacities—a judicial and a legislative. In the former it decides all cases that come before it by review and in the latter it makes laws for its own internal government. The extent of its powers in this respect were never well defined, and, a few years ago, became the subject of very earnest discussion which first brought the church and the seigniorial civil court into collision and in 1848, issued in the disruption of the church itself, no fewer than 474 ministers voluntarily severing their connection with it under protest, and ascribing all their livings anew than submit to what they regarded as a series of direct encroachments on their spiritual independence.

Prior to this disruption, the Established church was nominally adhered to by a majority of the population, but has, in consequence of it, been reduced to a decided minority. The protesting ministers and their adherents formed themselves into the Free church, which has advanced with such wonderful rapidity that it already (1855) numbers 750 congregations; and within the short period of 10 years, has extensively extended on the building of churches, colleges, schools, and houses, the maintenance of ministers and schoolmasters, and other ecclesiastical and educational purposes, the sum of not less than £3,918,489. The next greatest religious body not in connection with the Established church, is the United Presbyterian church, composed of the union of three bodies formerly known under the names of Burghs, Anti-Burghs, and the Relief and numbering 546 congregations. Both the Free and the

1) Presbyterian churches, and several minor bodies, agree with the Establishment in adopting the Presbyterian form of government, and adhering to the *Confession of Faith*, and differ with it chiefly in regard to the appointment of ministers—the Establishment submitting to patronage under a form somewhat modified by recent enactment, and the others totally rejecting it. The U Presbyterian church is, moreover, understood to be generally in favour of what is called the Voluntary, and opposed to what is called the Establishment principle, the Free church, on the contrary approves the latter principle, provided it is practically carried into effect in such a way as to be compatible at once with purity of doctrine and spiritual independence. Do these three bodies belong to least four-fifths of the whole population, but in addition to them are Reformed Presbyterians, English and Scotch Episcopians, Independents, Baptists, Methodists and R. Catholics.

Education.—When Scotland was first emancipated from the bondage of Popery, Knox and his fellow reformers, in a spirit of the most excellent philanthropy proposed a distribution of the church-funds, which would have provided effectually for the education of all classes; and though baffled by the selfishness of those who had seized upon the funds and were determined not to surrender them, proceeded resolutely with their plan, and did what in their lay to establish an endowed school in every Scotch parish. The foundation having thus been laid, the work was never abandoned, and the parochial school system proved so effectual that Scotchmen, wherever they went, distinguished themselves by shrewdness, intelligence, industry, and honesty and in regard at least to the lower and middle classes were generally admitted to be the best educated people in Europe. The means of education, however were unfortunately allowed to remain almost stationary while population was advancing with remarkable rapidity, and hence, though the parochial system continued to be tolerably effective in rural parishes it became almost powerless in large towns, and Scotland began to descend rapidly from her foremost place among situated nations, to a much lower grade. In the general attention which popular education has attracted, Scotland has not been overlooked, and a happy rivalry has been excited among the different religious bodies, urging them to strenuous exertion in erecting schools by means of voluntary subscriptions, supplemented by parliamentary grants. It were vain to assert that the exigencies of the case have been already met; but there is every reason to think that the evil instead of continuing to make head, has received an important check and good ground therefore to hope that it will ultimately be extinguished.

People.—As far as can be gathered from the very imperfect records of early times, Scotland was originally peopled by Celts, who spread themselves over the whole country, and had such a numerical ascendancy in it, that even after they ceased to be the dominant race of the Lowlands, both natural and artificial objects mountains and valleys, rivers and lakes as well as towns, villages, and hamlets, retained the Celtic names which they had given them. The Teutonic tribes, which had landed on the English coast, naturally spread themselves N., and, aided by new arrivals of their countrymen, drove the Celts before them into the Highlands, and made themselves masters of all the low country. The resemblance between the Scotch and the English language, a resemblance almost as close as is usually found between the spoken dialects of a common tongue, proves the common origin of the people who speak them. It is not probable, however, that the Celts were driven out by one sudden onset. Had this been the case, they could not have left so many memorials of their existence behind them, both in the objects already referred to, and in the language of their conquerors. But if their expulsion was gradual, a considerable commingling of races must have taken place, and the Scotchman though Saxon in the main, must be presumed to have an infusion of Celtic blood in his veins. To this, doubtless, must in some measure be ascribed the peculiar qualities by which the Scotch and English are still distinguished. In both, there is the manly love of kindred and country, the same indomitable courage and perseverance, which in pursuing any desired object, will either find a way or make one—but in the Scotch, there is less bluntness, downright honesty, less love of fair play, less warmth

of heart. His shrewdness is apt to degenerate into cunning, and his cold calculations into mere selfishness. On the other hand he is far less dependent on mere bodily gratification, and will not grumble at any measure of discomfort which it may be necessary to endure, when the attainment of the object at which he aims promises to compensate for it. Many fine examples of this quality may be found in the history of Scottish individuals who, from a lowly station have gradually raised themselves to eminence in any of the great walks of life. In regard to intellectual qualities, there are few branches of literature, science or art in which Scotchmen do not hold an honourable place. In works of imagination and poetry their only great names are Burns, Campbell and Beattie, and in mere oratory they have not much to boast of, after Jeffrey and Chalmers, but they are unsurpassed as historians and unequalled as metaphysicians. Their medical schools were long the most celebrated in Europe, and their inventive powers are sufficiently vouched for by the genius of a Watt. They have sometimes been upbraided, not without cause, with a want of solid learning and a contrast very much to their disadvantage has been drawn between their theologians and those of England. Admitting the superiority of the latter a simple examination of the cause would show that it is truly to be ascribed to the former. Every Scottish clergyman has his cure of souls, and if he is faithful to his office, cannot find much leisure, even for those literary pursuits more immediately connected with his own profession. His task is to raise a more durable and valuable monument in a well-instructed, moral and religious community and who that knows anything of Scotland can doubt that this task is in general admirably performed. In what part of the world is life and property more secure, where is government under less apprehension of popular outrage and where is the virtuous feeling of independence which will patiently submit to the greatest privation sooner than become a recipient of pariahdom? The last feeling unfortunately is somewhat on the wane. As human nature is constituted a compulsory provision for the poor rendered necessary partly by the rapid increase of a manufacturing population, and partly by the influx of strangers to whom from infamy beggary has been a common vocation necessarily makes sad havoc with the better feelings of the poor, but pauperism though more visibly manifested than before the enactment of the recent poor law is still confined within very manageable limits, and does not threaten ever to become the atrocious evil which at one time, in England threatened the good order and even the very existence of civil society.

History.—The early history of Scotland is full of fable, and even where deemed authentic, possesses little interest till about the end of the 9th century, when we find the Norwegians, who had previously taken possession of the Orkney and Western Isles endeavouring to establish themselves on the mainland, and overcoming the greater part of Galloway, Strathclyde, Ross, and Moray. The Scottish chieftains united to oppose their further progress but were unsuccessful and the Norwegians and Sigurd held almost uncontrolled dominion over the N. and W. of Scotland as far as the Firth of Clyde. A new combination of chieftains, headed by Malcolm, the Mormor or lord of Moray had better success, and in 933 the Norwegians were expelled from the mainland. Malcolm now laid claim to the Scottish crown and having defeated and slain the actual possessor Kenneth IV. succeeded Malcolm or Gram, began to reign under the title of Malcolm II. He must have been both a talented and a successful prince, as he was able in those turbulent times to retain the sovereignty for 26 years, till his death in 1023. His throne had been chiefly upheld by the Celts, for the Scotch continued attached to the race of Kenneth IV. and now succeeded in giving the crown to his son Malcolm Kenneth who assumed the title of Malcolm III. After a short reign of four years, he was succeeded in 1058 by his grandson Duncan, whose life and reign furnish the legends on which Shakespeare has founded his immortal tragedy of Macbeth. History, however does not confirm the legends, but, on the contrary, states that in 1040 Macbeth, Mormor of Moray at the head of his Celts, met Duncan at Elgin, and having slain him in flight, became in consequence king of Scotland. He had reigned several years, when Malcolm, son of Duncan, who had taken refuge at the English court, returned to Scotland with an English force, headed by

Beward, earl of Northumberland, and driving Macbeth beyond the Forth, became king of the whole of Scotland to the S. of it, under the title of Malcolm, surnamed Canmore, or Great King. In a second battle, which took place at Lumphanan, in Aberdeenshire, 1058, Macbeth was defeated and slain, and Malcolm Canmore became undisputed sovereign of the whole of the mainland of Scotland, with the exception of a portion in the N., which the Norwegians, who had been allies of Macbeth, managed to retain. The reign of Malcolm Canmore was long and prosperous. His great natural talents had been improved by his education at the court of Edward the Confessor and his court, which was crowded by Saxon nobles from the S. whom the Norman conquest had driven into exile, was much more refined than that of any of his predecessors. On his death in 1093, the succession was disputed by Duncan the son, and Donald Bane, the brother of Malcolm, the great body of the Saxons supporting the former and that of the Gaels, together with the Norwegians, the latter. Duncan lost his life in the struggle, but Donald Bane's success was short-lived, and Edgar a brother of Duncan, aided by the English, drove him from the throne. Edgar reigned 10 years, and was succeeded by two brothers, first by Alexander I. in 1107, and then by David I. in 1123. The latter reigned vigorously for 46 years, and was succeeded by his grandson Malcolm, surnamed the Maiden, then only in his 11th year. During the four last reigns, beginning with that of Edgar, the general institutions of the country underwent important changes, and were in a great measure assimilated to those of the Anglo-Saxons in England. Norman institutions appear to have been first introduced under Alexander I. The succeeding reigns of William, surnamed the Lion, in 1166, Alexander II in 1214 and Alexander III in 1249, are not remarkable for great national events, but in 1290 the death of Margaret, surnamed the Maiden of Norway who had succeeded her grandfather Alexander III, in 1286, having extinguished the direct line of the Scottish kings, led to a competition for the throne, from which important consequences followed. The competitors were John Balliol and Robert Bruce, both claiming through descent in the female line from David, earl of Huntingdon, by a younger brother of William the Lion, the former as great-grandson by an elder and the latter as great-grand-son by a younger daughter. Both were supported by powerful parties and had prepared to decide their claims by an appeal to arms, when Edward I. of England, whose ambitious designs against the independence of Scotland had long been unavailing, managed to have himself appointed umpire. His only object was to find a tool, and deeming Balliol the more subservient of the two, decided in his favour but on the express condition that he should hold the Scottish crown under the English sovereign as his vassal lord. The independence of Scotland was thus formally harrowed away. The nation felt indignant, and for a time murmured in silence, but the perversity of Balliol and the tyrannical proceedings of Edward conspired in bringing matters to a crisis. The patriotic Wallace appeared and commenced the glorious struggle, and though many reverses were sustained, the cause of freedom continued to gain strength. Robert Bruce was at last able to meet the English armies in the field, and achieved the independence of his crown and kingdom in 1314, by the great victory of Bannockburn. His reign, the most glorious in Scottish annals, terminated in 1329 when he was succeeded by his son, David II., who neither possessed the talents nor enjoyed the good fortune of his father. He died without issue in 1371, and the dynasty of the Stuarts commenced in the person of Robert Stuart, surnamed Black Ewe, a grandson by a daughter of Robert Bruce. He was succeeded in 1390 by his son Robert III and Robert III. in 1406 by his son James I. From the commencement of the Stuart dynasty the greater part of the kingdom had been assembled in the hands of a few powerful families, who ruled in their own districts like sovereign princes, and were able, especially when they leagueed together to overawe the crown. James I. an able and accomplished sovereign, both felt the evil and pursued the true remedy. The great object was to find a middle class, on which the crown could fall back when the nobles proved rebellious. James accordingly created a great number of burghs with important privileges, and was assiduously proceeding with reforms which must ultimately have brought society to a

better state, when he was basely assassinated. He was succeeded in regular descent by four other sovereigns of the same name, who all suffered more or less from the turbulence of the nobles, and shared in the misfortunes which seemed to have marked their family as a devoted race. James II. perished by the burning of a castle at the siege of Rosburgh castle. James III. while fleeing from his pursuers was overthrown and murdered in a hovel; James IV. perished on the fatal field of Flodden, among such heaps of slaughter that his body was never recognized and James V. might almost have envied him for though he had literary tastes and accomplishments which would have distinguished him in any rank of life, and had reigned not unsuccessfully, disasters at last overtook him, and he retired to his palace of Falkland only to die of a broken heart. The misfortune of his family survived him, and were all accumulated in the most cruel and ignominious form on the head of his unfortunate daughter Mary. During her father's reign the Reformation had begun to take deep root in the country, and when she arrived to assume the sceptre, had acquired a force which could no longer be withstood. Unhappily the prejudices of her early education threw her into the hands of blind, bigoted, and crafty priests, and there were things in her own conduct which not only awoke the suspicions, but alienated the affections of her best subjects. Her whole life was a tragedy, and on reading its details it is impossible to wonder they have provoked so much keen and sincere denunciation. Mary having fled to England, and claimed the protection of her cousin Elizabeth, was imprisoned, and ultimately consigned to the scaffold in 1567, by the English queen, and was succeeded by her son, James VI. probably the least meritorious of all the Stuarts, and yet, by a strange concurrence of circumstances, he not only gained his mother's crown, but that also of the kingdoms which he deprived her of. From the accession of James VI. to the English throne in 1603, the annals of the two kingdoms become almost identical, though they both retained their independence and continued to be ruled by separate titles till the Act of Union in 1707. The intervening period is remarkable chiefly for the cruel persecutions perpetrated by James VI. and the succeeding Stuarts, in their insane attempts to force Episcopacy on Scotland, and the fearful retribution which it brought upon them. Since the Union the most remarkable events are the two rebellions of 1715 and 1745, which vainly endeavoured to bring back the Stuarts, and could not have succeeded without striking a fatal blow at the national prosperity.

SCOTSWOOD a vil. England, on Northumberland, on the Tyne, here crossed by a magnificent suspension-bridge, about 8 m. W Newcastle. It has a chapel of ease, a Wesleyan chapel, fine scene of scenery, with great quantities of firebricks, gas-retorts, crucibles, &c. are made lamp-black works, a coal-tar manufactory, and two extensive paper-mills. SCURCULA, **SCURCULLA**, or **SCURCULLA** is a Naples prov. Abbruzzo-Ultra II, 5 m. N W Aversa, near 1 bank Isola with five churches, a royal abbey two convents, and an almshouse. Pop. 1970

SCURCULLA, par Irel. Month. 3690 sq. P. 802
SCUTHRI — 1 (see *Charybdis*, Tachia, Tachia) A town in Asiatic Turkey, on the Bosphorus, opposite Constantinople, of which it is sometimes considered a suburb. It is built on several hills, and contains numerous mosques, fine bazars and bathes, and many taverns or kitchens for the poor mostly endowed by royal persons. It has also a palace and gardens belonging to the sultan, large grain-warehouses, manu factories of silk and cotton fabrics and the most extensive and beautiful burying-grounds in or around the capital of the Ottoman empire. Pop. 80,000 — 2 A town in European Turkey, Albania, at the S extremity of lake of same name. It is fortified, and has two castles, a large bazaar several mosques, and Greek and R. Catholic churches. Some ship-building yards, and manufactories of cotton goods and firearms. It exports wool wares, hides, skins, tobacco, and dried fish to Trieste, Venice, and Avignon; and imports colonial produce, silk fabrics, and other manufactured goods for sale at the large fairs of Turkey. The fishery on the lake constitutes another branch of industry. Pop. estimated at 40,000
THE LAKES (or *Estes*, and *Lobos*) on the frontiers of Montenegro, is about 16 m. long N N W to S S E and 6 m. wide. It contains several small islands receives several streams, the largest of which is the Moraca, which joins it on the N W, and discharges itself by the Bojana into the N side of the Gulf of Drino, in the Adriatic

SCYLLA — 1 A celebrated promontory Naples prov. Calabria-Ultra, on the Strait of Messina lat. 38° 14' N lon. 16° 45' E (p). It is a bold rocky headland about 300 ft. high, and has the deeply excavated bay by the action of the waves. Standing in the narrowest part of the strait, and opposite to the rocks and shoals of Charybdis, where strong currents meet and make wild uproar the navigation of it appeared so formidable to early navigators, as to have furnished ample materials for fable (Gunpowder has been employed in removing some of the more formidable rocks and the action of the water may in course of time have somewhat widened the channel) Owing, probably in some measure, to these causes, modern navigators did it comparatively easy to avoid Scylla without falling into Charybdis — 2 (Scylla, or Scylla) A town, built partly on the shore and partly on the steep adjacent cliffs of the above promontory. It is defended by a fort, which, from its position, forms an important military station; contains two churches, and a convent and carries on a considerable trade, and an active fishery. It suffered dreadfully from the great earthquake of 1783. A great portion of the inhabitants had rushed down to the beach for greater safety when, by the fall of an adjoining cliff, a huge wave was driven in and swept away 3475 persons. Pop. 4500

SCYLLA, or *Scylla*, two islands, Aegean Sea. See *Islands*.
SEA HORSE ISLANDS, a group of low sandy isles, lying at some distance from the mainland of Russian America in Behring's Sea. The outermost point of the chain formed by them is Point Franklin, about lat. 71° N and lon. 166° W. The surface of the beach at this cape, consisting of fine sand, was found on digging a few inches, to be mixed with coal.
SEA VIEW one of the highest mountains of New R. Wales, between the Macquarie and the New England district is 6000 ft. in height.

SEABOROUGH, par Eng. Somerset, 661 ac. s. 1 104
SEACOMBE, a vill and township, England, co. Chester, on the Mersey, within 1 m. of Liverpool, to which a steamboat is constantly plying. It has a great number of elegant residences and pleasant houses facing the Mersey a handsome church, with a tower terminating in a spire a Wesleyan chapel, a dispensary, an infant-school, extensive copper and patent metal mills, smelt-works, and a foundry. Pop. 3044
SEACROFT, a vill and township, England, co. York (W Riding), 4 m. E N E Leeds; with a district church, and a Wesleyan chapel. During the Heptarchy a battle was fought here on Win Moore, the Royalists also have defeated the Parliamentarians. Pop. 1693

SEAFORD, a market town, Cinque-port, and par., on Sussex, on the English Channel, 11 m. S E. Lewes. It is a very

ancient place, supposed to occupy the site of the Roman *Ulcitra Andertia*, and was of considerable importance till its prosperity was destroyed partly by invasions of the French, and still more seriously by encroachments of the sea, and a change in the course of the Ouse, which once formed the harbor of Seaford, but now falls into the sea at Newhaven, 5 m. W. It has an ancient church a townhall jail, and a school. Till disfranchised by the Reform act, it returned two members to Parliament. Area of par. 2535 ac. P. 977

SEBASTIANSBERG, or *SEBASTEN*, a mining in Bohemia, circle and 18 m. N W Eas, on a ridge of the Erzgebirge, with a church, townhouse, some manufactories of cloth, several mills, and a considerable trade in silver. Pop. 1668

SEBASTOPOL, a seaport in Russia. See *SEBASTOPOL*

SEBEN or *SEBEN* a walled town Hungary co. Barcs, on the Tisza, 10 m. N W Eperies, with a Lutheran church a Plarist college, a normal-school a paper-mill, and a trade in flax and wool. Pop. 3200

SEBENICO a town Austria, Dalmatia, circle and 42 m. S S E Zara, on a creek of the Adriatic a little below the

mouth of the Karu. It rises on the side of a ridge, in the form of an amphitheatre, crowned by the fort of St. Anne, now partly in ruins; and defended by two other forts on an adjoining height. The most noteworthy object in the cathedral, rendered conspicuous by its lofty dome, with a truly grand interior, remarkable especially for the bold arches, springing from light and airy Gothic-Baroque columns and supporting a semi-cylindrical roof of flat flagstones, the arrangement of which is regarded as a masterpiece of technical ingenuity. The only other objects deserving of notice are the Loggia or old Venetian townhouse, now converted into a casino, and an excellent harbour defended by a fort which is regarded as Samanah's masterpiece. The trade is chiefly in an excellent wine, grown in the district. The Karu, in the vicinity forms a beautiful cascade, 800 ft. wide, by 50 ft. high. The celebrated painter Andrea Schiavoni, of the Venetian school, and the philologist Tommaso, were natives of Sebenico. Pop. about 6000.

SEBENGHAN, par. Krg. Cumberland; 5890 sq. P. 855. **SEBES**, several places, Hungary particularly:—1 *Ides* and *Fides*, two nearly-contiguous riv. Hither Thau, co. Neutro, about 4 m. from Eperes. They have a parish church, a Franciscan monastery, fine old castle with gardens, manufactures of earthenware, and a trade in wood. P. 1844. —2, *Berod*, A. riv. Thither Thau, co. and 35 m. from Arad, on the Balas, with two churches, and a trade in earthenware, fruit, and timber. Pop. 1042.

SEBNITZ, two places, Germany:—1 A. tn. Saxony circle and 35 m. F. R.E. Dresden, in a deep valley with several public offices, manufactures of linen and silk goods, woollen hosiery, and shawl and paper mills. Pop. 3594. —2, A. tn. Prussia, prov. Silesia, gov. and 14 m. N.W. Liegnitz, with a church, the works, and several mills. P. 1122.

SEBONCOURT, A. tn. France, dep. Aube, 28 m. N.E. Laon, with manufactures of shawls and other stuffs, in the style of cashmere. Pop. 2007.

SEBODU or **MAHMOUD**, a river Morocco, which descends from a ramification of the Great Atlas in Fez, flows first N.W., then W. and after a course of about 160 m. falls into the Atlantic, a little N. of the town of Mahmor.

SEBUETIE, or **SEKASTA**, *See* SAMARIA. **SECA** (LA), a riv. Spain, Leon prov. and 16 m. S.W. Valladolid. It has a substantial and elegant townhouse, a handsome grange built of brick, and provided with colonnades on the ground-floor which serve as a promenade in wet weather. Two public endowed primary schools, an hospital, a parish and a Franciscan church. Agriculture and preparing chocolate are the main employments. Pop. 8164.

SECLIA, a river, Italy rises in N. slope Apennines, in N. of study Modena, flows N.E. through the centre of that duchy and joins bank Po 12 m. S.E. Mantua, total course about 50 m. It becomes navigable at Porto-Sauro, near Modena.

SECHSHAUS, or **SECHSHAUDEL**, a vil. Lower Austria, near Vienna, of which it is almost a suburb. It is a busy manufacturing place, and has an important leather dye-work. Pop. 2530.

SECHUN, or **SECHUN**, an inland prov. China, and the largest in the empire, bounded N. by Szechuan and Kansu, E. by Hooan and Hoopa, S. by Koshoo and Yunnan W. Tibet lat. 25° 37' to 30° N. lon. 100° 35' to 110° 25' E., area, 166,500 sq. m. With the exception of a plain of considerable extent around Ching-to-fu, the provincial capital the whole of this extensive territory may be described as rugged and full of defiles. The Yang-tze-kiang, the largest river in China, traverses the S.E. part of the province by a crooked channel, in a N.E. course, receiving some of its largest tributaries, of which the chief are the Yeh-tung in the W. the Ma-kiang in the centre, and the Kia-ling near Hoopa. The first, though about 500 m. long, is of very little service to navigation, but the Ma-kiang affords passage to boats up to Ching-to-fu; while a wide region as drained by the Kia-ling, which extends its branches over all the E. part of Szechuan and into the adjoining provinces. The province is well watered, and produces grain, silk, tea, horses, mules, swine, rabbits, and sheep; but its trade is far from being proportionate to its capabilities. The people are of a mixed race, and so imperfectly kept under subjection, that insurrection often occur. Pop. 21,435,578.

SECHURA, a tn. and bay, Peru, between Punta Lobos and Punta Fierro, about lat. 5° 35' 35" S., lon. 80° 40' W. The town stands at the head of the bay, 1 m. bank of Piura. It consists of one-house but has a church built of stone, with two high steeples. The inhabitants are all Indians, who carry on a considerable trade in salt, which they take to Piura on balsas, and sell to the shipping. The bay is 55 m. in width at the entrance, and stretches 10 m. inland; S. from the town is the desert of Sechura, a frightful waste of sand, extending 90 m. The extent and uniform aspect of this dreary region, together with the continual motion of the sand which quickly effaces all traces often bewilders the most experienced guides.

SECKENBEIJM, a vil. Baden, circle Lower Rhine, 6 m. N. Schwetzingen, on the Neckar with a church. P. 1040. **SECKINGTON**, par. Eng. Warwick, 805 ac. P. 128. **SECLIN** [*anc. Seclunum*] a tn. France, dep. Nord, 5 m. S. Lille. It contains a large and well-endowed hospital and has oil works, cotton and flax mills, salt and saltpetre refineries, and breweries. Pop. 2573.

SECONDIGLIANO, a tn. Naples, prov. and hard by Naples, in a plain. It contains a handsome church, and rears great numbers of swine for the Naples market. Pop. 5000.

SECHINDO (SAR),—1 A. tn. Italy, Piedmont, 4½ m. and 30 m. S.W. Turin, on a hill near 1 bank Chiavagna. It has a handsome church, a courthouse, a palace with fine gardens an elementary school and a charitable endowment. Pop. 2050. —2 A. tn. and com. daisy and 11 m. N.W. Parma, in a low plain, subject to inundation. It has a handsome and richly decorated church, a castle, theatre, primary school and hospital and a trade in corn, wine, rice, hemp, cattle, and salt provisions. Pop. 4758.

SECUNDERABAD, a tn. Hindostan, and the headquarters of the British subsidiary force in the Nizam's dominions, in a tract covered with granite and detached heights 6 m. N. Hyderabad; lat. 17° 26' N. lon. 77° 22' E. The cantonments extend from E. to W. for nearly 3 m. the dwellings of the officers with their gardens, being ranged on either side of a winding main street, from which many other thoroughfares pass. The native town on the S. side contains about 5000 houses of one or two stories, built of mud and tiled. At the E. extremity are the European infant barracks and hospital, and St. John's church, at the W. end are the horse-artillery and on the N. the foot-artillery barracks. The lines of four native regiments are on the S. and bordering the town on the S.W. is a large tank or lake, the embankment along which forms a favourite public promenade. The mean temperature of the year is 81½° Fahr., the daily range is very great in winter (from 20° to 30°) a peculiarity at this station is that the wet and cool seasons are the most unhealthy to Europeans and Hindostanis is very inferior in salubrity to Beluram, a station 6 m. distant N.E. The barracks and other military structures, parade-grounds, &c., are good; and the bazaars are well supplied with all kinds of merchandise. Here are European subscription-rooms, public libraries, firms and racket courts, a race-ground, and a meadow lodge. The country adjacent is thickly interspersed with rice-fields, date and mango groves, gardens, villages, and ruins of tombs and mosques. Pop. native town by last census, 24,257; exclusive of about 10,500 troops and officers.—(*Rep. on the N. dist. of the Madras Presid.*, *Four Rep. Gov. Sec.*, &c.)

SECUNDA, several places, Hindostan:—1 A. tn. prov. and 7 m. N. Agra. It was formerly a magnificent city an immediate dependency, or probably suburb of Agra, but is now a collection of ruins, consisting of noble gateways, a ruined palace, &c. The only entire structure is the magnificent mausoleum of the Emperor Akbar, a vast pyramidal pile of arched galleries, rising tier above tier, flanked at intervals with square pavilions and covered with elaborate marble-reliefs, varied in colour and fashioned in design.—2, A. tn., prov. and 45 m. N.E. Agra.—3, A. vil., prov. and 80 m. E.E. Delhi, in a wilderness of jungle, which here covers a large tract of the desert. It is surrounded by walls.

SEDAN [*anc. Sedunum*], a tn. France, dep. Ardennes, 3 bank Meuse on the frontiers of Luxembourg, 10 m. S.E. Metz. It is fortified by stone and walls, and otherwise fortified, so as to rank as a fortress of the third class. It is well built; the streets are generally wide, and the houses are substantially built of stone, and roofed with slate. The

joining the capital of the whole Danish dominions, Fredericksborg, Helsing, Sorde, and Frederiks. This division comprehends not merely detached pieces, but a number of small islands which line its course. Of these the principal are Moen, Amager, and Saltholm. Pop. (1847) 498,400.

SEELENTER-SEE, a lake, Denmark, in the N.E. of the Holstein straits, about 14 m. in length, 6 m. in width, at some places, 40 fathoms. It is well supplied with fish.

SEKLOW a ta. Prussia, gov and 16 m. N.N.E. Frank fort, with two churches, and a trade in cattle and horses. Pop. 1915.

SEKONA, a river of S. Hindostan rises in a ramification of the W. Ghats, about 90 m. W. N. V. Ahmednagar flows N.E. past that town; and after a course of about 700 m., joins the bank of the river, nearly doubling its volume.

SEKONE, or **SEKONA**, a river, Ashantee. It comes from a great distance inland, and pours out a considerable volume of water through an opening 200 yards wide, but as full of large stones and rocks, that canoes cannot venture out except in the most tranquil state of the surf. Its mouth is close by the Dutch settlement of Axim lat. 4° 52' 18" N. lon. 2° 14' 42" E. (s.)

SEKONGA, a river, S. Hindostan, on the left bank of the S. E. of the delta of the Ganges, where the Anas flows from it, 8 m. S.E. Agra. It is well built, and has a church with a tower. Inhabitants chiefly employed in spinning and weaving cotton. Pop. 1435.

SEKODUNA a ta. Hindostan prov and 47 m. N. V. E. Delhi lat. 29° 12' N. lon. 77° 31' E. esp. of a small principality. It is a populous and thriving place. Near it is an extensive mud fort, containing the Begum's arsenal.

SEKON (anc. *Agrovia*), a ta. France dep. Orne, 14 m. N. Alençon, on the Sarthe, a handsome cathedral, in early pointed Gothic, and manufacture of clocked tresses. P. 3163.

SEKON a ta. Brunswick, on the Scheldt 33 m. S.W. Brunswick, with two churches, a castle, a Jewish educational establishment, an hospital and several mills. Pop. 2749.

SEKAMOW or **SEKAMOW** a ta. Hindostan prov Malabar near the Little Sind, 120 m. S.E. Ooty, containing about 2000 houses.

SEETHING, par Eng. Norfolk 1630 ac. Pop. 451.

SEVILGENA a vil. and com. Belgium, prov E. Fland. near the Scheldt, 4 m. S. Ghent, with manufacture of coarse huckwax, and two windmills. Pop. 1459.

SEVIAN, a ta. in the N.W. of Hindostan, prov and 50 m. S.W. Jodhpore. It consists of the town and a fort, built on a precipitous rock in a valley surrounded by hills. The works of the latter are in bad repair though it is considered a place of importance, and generally garrisoned.

SEVIA, a ta. France, dep. Savoy, prov Tarentaise on the Isère, at the foot of Little St. Bernard, 16 m. N. L. Montan. Pop. about 1591.

SEVAN, **SEVAN**, or **BOOVAN** the most E. portion of Tibet, bordering on the Chinese provs. of Szechuan and Kansu, and extending from lat. 28° to 30° N. bordering on the Koko-Nor (the salt lake) and the Yangtze, and the tributary the Yangtze. In some parts it is mountainous, but along the banks of the streams are fertile plains, yielding wheat, peas, rye, hemp, &c. The horses are good, and excellent mules are exported. The yak is found in great perfection, the camel is seen in the N. and sheep are numerous, and have enormous tails. The mountains are rich in metals, and some iron, copper, silver, and gold are obtained from the same. Sevan is inhabited by two races, a Tibetan and a Tartar the former, and least numerous, inhabiting fixed dwellings, chiefly in the central and S. parts, and the latter nomadic, living on meat often raw, and dressed in sheepskin, or woollen manufactured by the females. The men forge arms of good temper, and form graceful helmets.—(Gutslaff, in Jour. Roy. Soc. Sec., 1850.)

SEVICIA or **SERVICIA**, a ta. Algarves Seville, 836 m. N.W. Algarves, with a mosque. Pop. about 1800.

SEVIERIN a vil. Hungary, Banat, co. Temesvar, on the Terna, 8 m. from Neudorf. It has two Greek churches, and several mills. Pop. 1686.

SEVAMET, or **SEVAM**, a state, Malay peninsula, about lat. 2° N. lon. 102° E. lying S. of the Malacca territory, from which it is divided towards the coast by the Cantan river. It is thinly inhabited, and utterly imperious by

the misgovernment and apathy of the feudal sovereign, the sultan of Johore. Under this sultan, thriving rice-grounds have degenerated into barren marshes and extensive forests, inhabited by wild elephants, overwooded a soil naturally rich and prolific. The produce of the country consists of a little rice, sugar, ivory, ebony, gold-dust, tin, wax, salt, wood, gum, benzoin camphor, resins, &c.

SEGENBERG, a ta. Denmark, duchy Holstein, cap. hall, between the Trave, which is here crossed by a large bridge, and the Mecklenburger-See, 26 m. N.N.E. Hamburg. It is a pretty little town; and has a very ancient Gothic church, several benevolent and industrial establishments, and as an important normal seminary. Near it is the Gypsberg, an imposing mass of limestone-rock 700 ft. high, whence a magnificent view, embracing Hamburg and Lübeck is obtained, it is hollowed out beneath by extensive quarries of gypsum to a depth of at least 200 ft. Pop. 2600. — The Sallwisch, forming part of the central ridge of the duchy and still in many parts covered with heath, has an area of 186 sq. m. divided into five parishes. Pop. 15,800.

SEGEDIN a ta. Hungary. See **SEBENDIN**.

SEGELER a vil. and com. Belgium, prov E. Fland. 144 m. S. Ghent. Inhabitants engaged in weaving and lace-making. Pop. 2575.

SEGIANO, a vil. and par. Tuscany 4 m. N. Castel del Piano with a beautiful church and two chapels. P. 1668.

SEGNA a ta. Austrian Croatia. See **SENA**.

SEKNE, a pass in the Alps, Switzerland, leading from Glen Glarus into the Grisons, and forming the best route from Glarus to Loire. It ascends 8 E. a minor valley behind the village of Elm, and attains a height of 7600 ft. above sea-level.

SENGI (anc. *Sagwa*) a ta. Italy deleg and 17 m. W. N. W. Grosseto on a mountain of same name. It is the seat of a bishop, and contains a handsome cathedral. The location of the organ has been claimed for Sengi. Pop. 3465.

SEGO a large ta. W. Africa, Bambarra, 1 bank Niger lat. 13° 5' N. lon. 5° W. The houses are built of clay, of a square form with flat roofs. Some of them have two stories, and many of them are white-washed. Besides these build ings, Moorish mosques are seen in every quarter. This town has been for many centuries a stronghold for the Mahometan faith. Mungo Park, speaking of Segou, says:—The view of this extensive city, the numerous canoes upon the river, the crowded population, and the cultivated state of the surrounding country formed altogether a prospect of civilization and magnificence which I little expected to find in the bosom of Africa. Pop. when visited by Park, 30,000.

SEGO, or **SUCORON**, a lake, Russia, in N.W. of gov Orenb., 30 m. long N.W. to S.E., by 24 m. broad. It discharges itself into Lake Viga, about 22 m. N.E.

SEIGOMBRE (anc. *Segobriga* *Edetanovum*), an episcopal city Spain Valencia, prov Castellon de la Plana, 39 m. N. W. Valencia, picturesquely situated on the skirt of two hills one of them sloping rapidly down to the Palencia, surrounded by gardens, and with its ancient walls still in tolerable preservation. On the summit of the hill on the N. which commands the town are remains of an ancient fort. The houses in the modern portion of the town are spacious, and often elegant in their architecture, and the streets straight, broad, and clean; while in the old town the streets are steep, crooked, and rather narrow. It has a spacious courthouse, two prisons, a small theatre, a promenade, an episcopal palace, a large and handsome hospital, built from the ancient walls and cante, and containing a number of halls a formidable hospital, several public and private schools, a handsome academy, six hospitals, four universities, and a number. Numerous public and private fountains, deriving their waters from the petrifying spring of La Rapadura, near the Geronimo convent, which gushes at once a river from the rock, afford an ample supply of excellent water to the inhabitants, who, notwithstanding its peculiar property, do not suffer from calcareous complaints. It has manufactures of earthenware, starch, brandy, paper, plain flannel, cotton thread, twist, and tapers, varnish, gypsum, hair-sewer, and flour and oil mills. Reports were taken from the Moors by Don Juan in 1545 and in 1818 it was sacked by Sadek, although it was not destroyed. Pop. 6000.

SEGOUM, or **SEGO**, the most E. of the Andaman Islands, Mentan Archipelago, to the W. of Amboina lat.

50° 24' N. Lon. 17° 16' W. It is about 19 m. in diameter, and is interrupted by a chain of mountains divided into three masses. From the central mass smoke at times issues. In the N.E. the mountains rise almost perpendicularly from the water. In other parts hot springs and vapour orifices are frequent.

SEGOVIA a prov. Spain, Old Castile; bounded N. by provs. Valladolid and Burgos, E. Soria and Guadalajara, S. Madrid and W. Avila, area, 1545 sq. m. Its climate is in general cold, and the wind dry and piercing, the snow remaining on the mountain-tops throughout the greater part of the year. Its surface is much varied, consisting of fertile and extensive plains and ranges of high hills including Potosí, 8828 ft. above sea-level, and Pan-de-Azúcar (Sugar-loaf), 7900 ft. The centre of the province, as well as the W and a portion of the N., are comparatively level. All the rivers of Segovia, the Balsa, Duraton, (aga, Piron, Eresma, &c. have their origin within its boundaries, taking their rise in the lofty mountain chain which divides the two Castiles, and all discharge their waters into the affluents of the Duero. The pine-forests are a considerable source of wealth; but Segovia is for the most part an agricultural district, producing good wheat in abundance, rye, barley, the fruit of the carob-tree, and pease (*garbanos*) both of excellent quality, some wine, flax hemp, and madder as well as pasture for sheep, horses, mules, and horned cattle. Mines have been wrought in different parts, but not successfully. There are veins of rock-crystal quarries with grains of gold, and black and grey marbles; and also quarries of limestone, chalk, and granite. Besides agriculture, sheep-shearing and wool washing many of the inhabitants are employed in sawing timber and in making furniture for domestic use. Great quantities of cloths were formerly made, but this branch of industry has greatly declined and the other manufactures consist of crystal paper leather and earthenware. Pop. 155,000.

SEGOVIA a city Spain, Old Castile, esp. above prov. 46 m. N. W. Madrid, on a rock 800 paces in height, and 4000 paces in circumference at the top, and washed by the Eresma and the Clamores. This strong town is enclosed by walls, with round towers, built by Alonso VI., and has an Alcazar the great keep of which is studded with angular turrets. It is entered by five gates besides several smaller entrances. The streets are very narrow tortuous and ill paved, and the houses, many of which were once inhabited by noblemen, have a quaint, old-fashioned appearance. Its most remarkable edifice is the Roman aqueduct, which is indeed the most important remnant of Roman architecture in Spain. As the

85 arches. It remained in ruins till 1488, when Isabella employed Juan Roacondo a monk belonging to the order, who reconstructed in admirable style, what had been demolished. The aqueduct commences with single arches, which rise higher as the dip of the ground deepens, until they become double, those of the upper tier being uniform in height. This noble work is constructed of granite, without cement or mortar and, like other similar erections of the Romans, unites simplicity proportion, solidity and utility and its grandeur is rather the result of those qualities than the intention of the architect. On the Eresma above the Casa-de-Moneda or mint, where all the national coinage was formerly struck, as the river afforded water-power and the adjoining Alcazar was the treasury in 1720 the gold and silver coinage was transferred to Madrid, and now nothing is struck here but copper. The other principal buildings are the cathedral, one of the finest in Spain, consisting of three naves, numerous other churches, and suppressed convents, an episcopal palace a school of artillery in which brass cannon are cast, and fireworks and projectiles manufactured, an institute for the higher branches of education with a library attached a theological school with various other educational establishments, an academy of the fine arts, a picture-gallery which does not, however, contain any first-rate works a founding hospital, and numerous other charitable institutions a theatre, and a strong prison. The former prosperity of Segovia depended on its staple, wool, and its cloth manufactures, with which it supplied the principal markets in Europe; but this, and indeed almost every other branch of industry is reduced almost to a nullity there being only three taxmasts, thimble and a very limited manufacture of paper silver-work &c. This wretched city has never recovered the fatal day of June 7, 1808, when the invaders first entered it under General Freix, who sacked it, although no resistance was made. The first notice of Segovia dates from 98 B.C. During the Moorish ascendancy it was a seat of government and subsequently some of the monarchs of Castile resided here. In 1474 Isabella proceeded in state from the Alcazar, and was proclaimed Queen of Castile and Charles I. of England was hospitably entertained in it by the governor in 1528. In the same building, which Philip V. converted into a state prison, he confined the Dutch earl of Ripperda, who had risen from nothing to be premier. Pop. once about 300,000 now reduced to 6635.

SEGHE a tn. France, dep. Maine-et-Loire, on the Oudon 20 m. N. W. Angers. It has a remarkable parish church, in the Romanesque style and numerous farms. Pop. 1743.

SEGRE (see above) a river Spain rises in France dep. Pyrénées-Orientales, on the summit of Mount Minutillas flows N. W. past Lerida, receives the Balra, Noguer-Pallaresa, the Ebro, Noguera-Bilargosa, the Sol, the Cinca, and falls into the Ebro at Mequinenza, 58 m. W. Tarragona; total course, 180 m.

SEGUNDO a river Is. Plata rises in the sierras of Cordoba, 27 m. W. S. W. the town of that name, flows E., and after a course of about 180 m. is lost in a marshy lake, 90 m. W. Santa Fé.

SEGLA, two vls. Spain—, Prov. Tumul and 42 m. S. Saragossa. Haaps of ruins, in every direction, attest the havoc produced in this village by civil war. It was founded by Calixtus, who used every exertion to retain it as a stronghold of the Caroling troops. After a severe campaign, however, it surrendered to Espartaco, Feb. 1840. About 2 m. from the village are the mineral baths of Segura, once much frequented; but they also were involved in one common destruction with the town. The process of rebuilding is now going on. Pop. before the war, about 2000. Present pop. 497.—4 Prov. Guipuzcoa, 11 m. S. W. Tolosa. It is greatly decayed, is of great antiquity and is well surrounded with walls; has a church, prison, three magnificent palaces, two primary schools, a good hospital, two parish churches a convent, and five hermitages; also an iron-works, several forges, and a nail-manufacture. Pop. 972.

THE TOWN AND AQUEDUCT OF SEGOVIA.—From Chapoy's *L'Espagne*.

steep-banked streams below are difficult of access, and their waters not very wholesome, the pure current of the Rio Pisu was thus brought from the Sierra de Guadalupe, distant 10 m. or 11 m. The aqueduct begins near the monastery of St. Gabriel, and has an entire length of 2321 ft. The number of arches is 170, some of which are 102 ft. in height. This aqueduct was respected by the Galla, but broken down in 1071 by the Moors of Toledo who sacked Segovia, and destroyed

common destruction with the town. The process of rebuilding is now going on. Pop. before the war, about 2000. Present pop. 497.—4 Prov. Guipuzcoa, 11 m. S. W. Tolosa. It is greatly decayed, is of great antiquity and is well surrounded with walls; has a church, prison, three magnificent palaces, two primary schools, a good hospital, two parish churches a convent, and five hermitages; also an iron-works, several forges, and a nail-manufacture. Pop. 972.

SEGUERA, a stream, Spain, Andalusia, stretching S.W. to N.E. through provs. Alhacete, Granada, and Jaen, for about 60 m., joining the *lujar* of Almorat. It gives rise to the river of same name.—The river, rises in prov. Jaen, 15 m. from Segura-de-la-Sierra; and traverses provs. Murcia and Alhacete in its very sinuous course, first N., then N.E., then E., then S.E. and at length E., receiving the tributary waters of the Taybilla, Mundo, Madera, Montella, Golpar, Mala, and Guadalquivir and enters the Mediterranean Sea at Guardamar 17 m. S.E. of Alhacete. Total course, about 180 m.

SEGUERA DE LA SIERRA, a tn. Spain, Andalusia, prov. and 60 m. N.E. Jaen, near the sources of the Segura and Guadalquivir on the W. skirt of a high hill whose summit is crowned with a strong and ancient fort. The houses are small, and ill-built; and the streets, from the position of the town, are inconvenient, the only level portion being a square, in which there is a magnificent fountain. It has a townhouse and prison, two primary schools and a parish church. Agriculture and rearing cattle, woolen and linen weaving, fur tanning, and oil mills, employ the people. In 1810 it was almost entirely burned by the French. Pop. 2471.

SEGUERA DE LIZO, a tn. Spain, Estramadura, prov. and 51 m. S.E.E. Badajoz, on an eminence, skirted by two extensive valleys. It has a fine old castle, in good preservation, which belonged to the Infante Don Carlos a townhouse, prison, two schools, a manory a church and manufactures coarse woollens three oil and four flour mills. Pop. 2700.

SEGUND (also and FALCO), two contiguous vils. Hungary, co. Buzsach about 9 m. from Ilkarc-Barany with a Protestant church, a Franciscan monastery and a trade in corn, wine, and cattle. Pop. 1599.

SEHARUNPOOR, British India. See SAMARUNPOOR.

SEHWAN, a tn. Sindh, r bank Arrol, and near its junction with the Indus, 80 m. N.W. Hyderabad lat. 26° 21' N. lon. 67° 55' E. on a rising ground at the verge of a swamp. It is surrounded by many ruined mosques and tombs. The houses are built of mud, often several stories high and arched, superior to those usually to be seen in the towns of Sindh, but the basar long crooked and narrow is ill supplied with goods and has little trade. The manufactures are inconsiderable consisting of caps, shoes, and petty cotton articles. Sehwani derives its celebrity and sanctity from possessing the tomb of a holy saint of Ahirwan, called Hal Shah Bah, who was interred here about 600 years ago. The shrine, which is a place of pilgrimage from afar to Hindoo and Musselman stands in the centre of the town, and rests under a lofty dome at one end of a quadrangular building, handsomely ornamented. But the most singular building at Sehwani is the ruined castle, overlooking the town, consisting of a mound of earth of oval shape, 60 ft. high 750 ft. broad, and 1200 ft. long and surrounded by a brick wall. Pop. estimated at 2000. Pop. 1599.

SEHIA (a vil. Naples, prov. Naples, at the foot of a mountain with a church and a chapel. It is famous for its oil, fruit, and wine. Pop. 1520.

SEIBUS (anc. *Selous*) a river Algeria, rises S.E. of Constantine, flows N.E., and falls into the Gulf of Bone a little E. of the town of that name. Total course, about 100 m.

SEIDAU, a vil. Saxony circle and 1 m. W. Hainzen. Pop. 2008.

SEIDENBERG a tn. Prussia, Silesia, gov. and 47 m. W. W. Liegnitz, r bank Katzbach, which separates it from Bohemia with a church on locality, and manufactures of woollens and linen cloth and earthenware. Pop. 1804.

SEIFEN, or HEMMERSHEIM, a vil. Bohemia, circle and about 35 m. N.E. Budweis, with two churches, a castle, school, and posthouse, two paper and several other mills, a bleachfield, dye-work, tile-work, linens, and some trade in linen. Pop. 1850.

SEIFERDORF —1, (or *Selendorf*) A vil. Bohemia, circle Buzian with a parish church and school. Pop. 1636 —2, A vil. Prussia Silesia gov. Liegnitz, circle Buzian with two churches, blacksmiths, a saw, oil, and other mills. Pop. 1182.

SEIFENNERDORF a tn. Saxony circle and 19 m. S.E. Bautzen with a church, three schools, several blacksmiths saw and other mills, and extensive dealings in yarn and flax. Pop. 6677.

SEIGHTFORD par Eng Suffol 4481 ac. Pop. 651

SEIHOUN a river Asiatic Turkey. See SYRICH.

SEIL, an isl. Scotland, co. Argyll, east of the inner Hebrides, off the coast of Lorn and between it and the well known slate island, Raasay; about 8 m. long, and 2 m. broad is in general flat, although not without some elevations.

SEILAND, an isl., N coast, Norway; lat. 70° 30' N lon. 35° 30' E. separated from the mainland by a narrow strait, and from the island of Sørø by the second of that name greatest length, N N E. to S.S.W., 83 m.; average breadth, 9 m. The coast is bold and rugged, and the interior rises into mountains covered with snow and ice and nearly 4000 ft. in height. It has few inhabitants.

SEILLANS, a tn. France, dep. Var, 14 m. from Draguignan with manufactures of cotton tissues, a cotton-mill, glass-works, and a dye-work of Turkey red. Pop. 1048.

SEILLE, three rivers, France:—1 Elbe in Mount La Roche near Beaune, dep. Jura flows S.S.W. enters dep. Saône, and joins l. bank Saône a little below Tournay total course, about 50 m.—2, (*Grenelle*), issues from Lake Lendre near Dijon, in N. of dep. Meurthe flows W. then straightly N.W. into dep. Moselle, and joins the Moselle at Metz, total course, about 25 m. It is joined at a small with the Sarre.—3, (*Pette*), rises in S. of dep. Moselle, about 2 m. from Mœrsch flows S.W. and joins l. bank Grande-Saône total course, about 30 m.

SEILLÈS, a vil. com. Belgium prov. and 23 m. S.W. Lège, on the Meuse; with manufactures of pipes, a distillery an oil and two flour mills numerous lineries, and quarries both of building-stone and limestone. Pop. 1129.

SEIM or Fess a river Russia, formed by the junction of several small streams in gov. Koursk, to the S. of Thin flows circuitously W., enters gov. Chernigov and after a course of about 200 m. joins l. bank Dneps, 5 m. N.E. Sennitsa. Its principal affluents are the Kara and Strava. The navigation of the Seim is greatly obstructed by the number of mudbars upon it. It abounds with fish.

SEINE (La) (anc. *Sigona*) a river, France rises about 20 m. N.W. Dijon flows N.W. through dep. Côte-d'Or and Aube, passing Châtillon and Troyes. After receiving the Aube, it proceeds almost due W. passing Nogent, and entering dep. Seine at Marne, where it receives first the Seine from Montbrun, and shortly after, the Loire, and the Loing canal, all on the left. Here its course becomes N.W., and it proceeds through dep. Seine-et-Marne, joining Marne dep. Seine-et-Oise, passing Corbeil and dep. Seine, in which last, shortly before entering Paris, it receives the Marne on the right. Traversing Paris, it shortly after commences a long series of remarkable windings, receives the Oise on the right, traverses dep. Seine et Oise, passing Mantel enters and traverses dep. Eure, passing Les Andelys and receiving the Eure enters dep. Seine-inférieure, where it traverses Rouen and surrounding its series of windings across the R. part of that department, forms a long and wide embouchure, and finally joins the English Channel near Le Havre. Its direct course is 270 m. its indirect course, about 500 m. Of the latter 280 m., commencing at Méry below Troyes, in dep. Aube, are navigable but only by barges which require to be tracked against the current, if not moved by steam. The navigation properly commences at Rouen, from which, to the port of Havre, the river is usually distinguished by the name of the *Seine-Maritime*, and thence vessels of from 250 to 300 tons. Its embouchure is much unobscured by mudbanks. So French river is better supplied with fish. It issues of the manory, though in particular parts it is surpassed by the Loire, Saône, and Garonne, yet, taken as a whole, with the hills and valleys, forests and meadows, superb mountains, numerous villages, populous towns, and famous cities which line its banks, it is the finest river in France.

SEINE, a dep. France, completely inclosed by dep. Seine-et-Oise, and at once the smallest and most populous of the French départements. The latter property it owes to its possession of the metropolitan. It is of a compact and nearly elliptical form, length, N. to S., 18 m. breadth, 15 m. area, 185 sq. m. The soil is generally flat, but somewhat undulating, and occasionally diversified by low hills, the most elevated of which is Montmartre, only 345 ft. above sea-level. The soil, with exception of a few spots, is naturally fertile, and its fertility has been greatly increased by the rich manures obtained from Paris, and the strong inducement to apply them

directly from the vicinity of obtaining large remunerating returns. About two-thirds of the whole surface are arable, and only a comparatively few acres can be regarded as absolutely waste. In the total commune nearest the capital, the greater part of the ground is employed in raising vegetables and fruit. There are also fine meadows, chiefly along the banks of the Seine and Seine, which are allotted to the feeding of cows for the purpose of supplying the capital with milk and dairy produce. At a greater distance all the ordinary cereals are grown in abundance, and some wine and older are made. There are the quarries, both of building-stones and gypsum; the latter indeed, obtained from Montmartre in such abundance, and of such excellent quality, that it is less known in commerce by its proper name than by that of *plaster of Paris*. The manufactures necessarily embrace a vast variety of articles requisite to meet the demands of a populous and luxurious capital. (See PARIS). The department is divided into three arrondissements—Paris, St. Denis, and Senlis, subdivided into 30 cantons, and 51 communes. Pop. (1856) 1,422,065.

SEINE-ET-MARNE, a dep. France, bounded, N by depts Oise and Aisne, E. Marne and Aube, S. Yonne and Loiret, and W Seine-et-Oise, greatest length, N to S. 65 m. average breadth, 40 m. area, 2154 sq m. The surface consists of extensive plains occasionally diversified and broken by gentle hills. Beautiful and extensive forests cover the largest of which is that of Fontainebleau. Many of the slopes are covered with vineyards, but the wine produced is of very indifferent quality. About two-thirds of the surface are arable, and mostly devoted to the culture of the ordinary cereals, of which the quantity raised far more than suffices for the home consumption. Hemp is also grown to a considerable extent and in some districts pease and beans, marrow, potatoes, carrots and beet-root are grown on a large scale. In the part of the department nearest the capital a considerable extent of ground is occupied with villas and gardens. There are few natural pastures, but large artificial meadows have been formed in every quarter, and supply food to vast numbers of cattle and sheep, the latter yielding large quantities of excellent wool. Building-stones, pavement, and millstones alabaster gypsum and potter-clay are extensively worked. The principal manufactures are linen and cotton prints, iron and steel ware, wax, candles, leather, paper pottery and glass. The trade is important in corn, flour, fruit, cheese, eggs, wool, hemp, cattle, leather, wood, and charcoal. The department is divided into five arrondissements—Meaux (the capital), Commeny, Fontainebleau, Meaux, and Provins subdivided into 39 cantons, and 527 communes. Pop. (1856), 840,076.

SEINE-ET-MARNE, a dep. France, bounded, N by depts Oise, E. Seine-et-Marne, S. Loire, S.W. Eure-et-Loir, and N.W. Eure, greatest length, N to S. 60 m. average breadth, 45 m. area, 3141 sq m. The surface is finely diversified and in many parts is much broken by hills, which, however, do not attain any great elevation. Nothing can be more pleasing than its general aspect, presenting everywhere a succession of cultivated fields, and interspersed with magnificent forests, noble parks, smiling villages, splendid châteaux, and innumerable villas. The department belongs entirely to the basin of the Seine, which traverses it in a very winding course, R.E. to N.W., draining the greater part of it directly. The only other river deserving of notice is its tributary the Oise. The soil is, for the most part, fertile in all kinds of corn and fruit and is under good agricultural management. The banks of the rivers are covered with fine meadows and pastures. The grain raised leaves a surplus after satisfying the home consumption. About two-thirds of the surface are arable, but a small portion of it is appropriated by walled parks and other inclosures. More than one-eighth is under wood, the greater part of which grows in the extensive forests of St. Germain, Rambouillet, Versailles, Dourdan, Senart, &c. Gardens are cultivated extensively, to supply the wants of the metropolis, and all the ordinary, and even many of the finer fruits, as figs, apricots, and peaches, are successfully raised in the open air. The cows are generally of good breed, and the sheep yield much excellent wool. Poultry are reared on a large scale, game abounds, and fish are plentiful. The only mode of its importance is not, but there are few quarries of gypsum, building-stones, mill-stones, and pavement, and extensive beds of porcelain and potter-clay.

Vol. II.

Manufactures of cotton and linen prints, hosiery, firearms, porcelain, paper, cordage, and chemical products, &c., are carried on. The principal trade is connected with the supply of the metropolis, and consists in corn, wine, fruit, vegetables, hay, cattle, swine, poultry, &c. The department is divided into six arrondissements—Versailles (the capital), Meaux, Fontainebleau, Rambouillet, Etampes, and Corbeil; subdivided into 50 cantons, and 583 communes. Pop. (1856), 471,883.

SEISTAN, a dep. France, bounded, N and W by the English Channel, S. the embouchure of the Scheldt and dep. Eure, and E. Oise and Somme, greatest length, E to W, 66 m. average breadth, 57 m. area, 3296 sq m. The coastline measures about 75 m. and no less than 18 harbours are counted in it but the only one of importance is that of Le Havre. A considerable part of the coast consists of bold chalky cliffs, varying in height from 150 ft. to 750 ft., and presenting a very striking appearance when approached from the sea. The department, taken as a whole is not remarkable for its fertility. Considerable tracts along the coast are covered with sand or occupied by swamps, and many parts of the interior are so intermixed and broken by hills as to be much better adapted for pasture than for the plough. Accordingly there are few departments of France in which the rearing of cattle and management of the dairy are better understood. In the S. of the department a considerable extent of the surface is occupied by forests. The principal river is the Seine, which winds along the S. in a very sinuous course, and drains a considerable part of the surface, but there are numerous other streams, of which only the Lozère and the Breule are navigable, which proceed directly to the coast, and drain the N and W. The climate varies much in different localities. Along the sea-coast, and in many of the valleys, it is in general cold and moist, and the winters are usually long and rainy. The swampy districts along the shores, and particularly the lower banks of the Seine, are unhealthy and fever and ague are very prevalent. Cereals, and especially more than one-half of the surface is sown, and one-third is under wood. A good deal of hemp and flax is grown. Orchards also are very general and much excellent fruit is made. A great part of the land is farmed by the owners under the name of *cultivateurs-proprietaires*. Both they and the farmers who cultivate the lands of others are generally in good circumstances. Iron is found in small quantity and there are some indications of coal, but the only valuable mineral returns are obtained from the quarries of marble, building-stone and pavement. There is also good potter-clay. Manufactures have made considerable progress, and are actively and successfully carried on in almost every district of the department. Among others may be mentioned the cotton and linen fabrics of Rouen, the numerous tanneries, cotton-mills, sugar-refineries, and tanneries of Le Havre, the woollen, serge, and blends of Nonchêville and the lace and delicate gold, bone and ivory articles of Dieppe. There are also numerous glass-works, dye-works, potteries, and chemical works. The fishing, particularly of herring and mackerel, is actively carried on, and the trade is very extensive. The department is divided into five arrondissements—Rouen (the capital), Dieppe, Havre, Neuchâtel, and Yvetot; subdivided into 50 cantons, and 769 communes. Pop. (1856), 728,039.

SEISTAN, par. Ind. King's co., 5625 sq. ft. 1500.

SEISTAN a prov. Afghanistan bordering on the Persian province Yezd lat. 30° 30' to 32° N, lon 61 to 63° 30' E. about 100 m. long, N to S, and 80 m. broad, E to W. area, about 5000 sq m. The whole territory consists of a basin or plain, having on every side higher grounds, and rising in its most depressed part the waters of a system of drainage extending over above 100,000 sq m. The S part of this plain is all but an utter desert, and on the N it is little better. In a few places the soil is impregnated with salt. Nearly in the centre of the territory lies the great swamp or Lake Hamoon or Zorrah the recipient of several rivers, the largest of which is the Helmand. Of the climate of Seistan not much is known but it is ascertained to be unhealthy. A steady wind blows during the six hot months of the year from N to S. so laden with saline dust that every fifth person suffers from diseases of the eyes. The soil of the S. desert is for the most part sandy, that of the N is a hard, compact, light-coloured clay, both unfertile. In the few valuable spots that occur wheat, rice, and some coarse

grapes, cotton, tobacco, water-melon, pomegranates, bananas, and melonberry trees are produced. There are few horses but camels, sheep, goats, swine, asses, and cattle are more numerous, and constitute the chief wealth of the inhabitants. The wild animals include leopards, wolves, otters, jackals, hyenas, foxes, porcupines, hedgehogs, musquitos, and rats. Wild dogs lurk in the marshes in great numbers, and are said to destroy one-half of the crops. The majority of the inhabitants are Tajiks, but there are also various other tribes. Massive embankments and numerous ruins, the latter widely dispersed over the country afford evidence of Seleucia having been formerly much more densely peopled, and generally in a much more advanced state than it is now. The language used is broken Persian, and the country appears to be divided among a number of petty chiefs, who acknowledge the supremacy of the ruler of Herat.

SEITENDORF several places, Prussia, particularly—
1 A vil. prov. Rhine, gov. Breslau, curia and near Waldenburg; with a church, a castle, an infirmary, and several mills. Pop. 1060.—2, (Mittel, Nieder and Ober) A vil., gov. Liegnitz, circle Schleissen; with two churches, a castle, limekilns, and three mills. Pop. 934.

SEITENDORF or **SERTSENDORF** a tn. Saxony, circle and 27 m. S.E. Meissen, with a church and manufactures of linen and wool. Pop. 2567.

SEITZ, or **SEITZ-SCHL**, a vil. Austria, Styria, circle and about 30 m. from GMI. It has a castle, and a celebrated Carthusian abbey, one of the oldest in Germany. Pop. 2460.
SEL, a vil. France, dep. Arras, l. bank Saut, 23 m. S.W. Foz. It contains the ruins of an old castle, and has several fine quarries of marble. Pop. 1689.

SEL, one of the Cape Verde Islands. See SAL.
SELANGOR, a vil. and com. l. of Serdang, div and 5 m. N.E. Ulu-Pang, in an unhealthy district. It has some trade in the rice which is grown in the vicinity. Pop. 2287.

SELATYN par. Eng. Selcey, 6558 ac. Pop. 1071.

SELAYA, a tn. Spain, prov. Santander, in a valley near Villacarrago. It has a handsome palace, a church, court-house, primary school and a trade in agricultural produce. Pop. about 1000.

SELJA, a tn. Bavaria, Upper Franconia, and on a small stream of same name, 26 m. E.N.E. Bamberg, with a castle, manufactures of cotton and woollen cloth cutlery and earthenware, cotton and several other mills. Pop. 3384.

SELITZ, a market tn. Bavaria circle Upper Franconia, dist. and 2 m. S.E. Kall, with a church, two castles, one of them in ruins and manufactures of woollen and cotton goods. Pop. 1160.

SELBOE—1, An isl. W coast, Norway prov. Bergenhus, lat. 60° N., and lon. 3° 15' E., about 5 m. long, by 3 m. broad. A. side ford of same name.—3 A vil. and par. Norway, prov. and 27 m. S.E. Trondheim, on the Vaa, near its mouth in the Lake of Selboe. There are copper-mines in the vicinity. Pop. 8200.—The lake, which receives the Naa, and discharges itself by the Vaa into the Trondheim-fjord at the mouth of Trondheim, is a large, irregular and picturesque expanse, about 16 m. long, by 5 m. broad.

SELBOERNE, a par. Eng. Hants; 8506 ac. Pop. 1114.

SELBY, a market tn. and par. England, co. York (W. Riding). The town is 14 m. S. E. by York, with which and with Leeds and Hull it is connected by railway, on the Ouse, here navigable for vessels of 200 tons, and crossed by an excellent wooden bridge, which opens to allow shipping to pass. It consists of four principal streets, diverging from a central market-place adorned with an ancient Gothic cross, and several small streets, paved, and lighted with gas houses well but irregularly built. It has a magnificent parish church, in different styles, which was formed part of an abbey of Benedictine monks, founded in 1068 by William the Conqueror, and places of worship for Independents, Wesleyans and Primitive Methodists, Unitarians, Friends, and E. Catholics, a plain townhall and lecture-room, a custom-house, a mechanics institute, two libraries, and several schools. A building-yard, and flax, shoe thread, oil, mustard, and chisels, and a ropewalk, three foundries, and two saw-yards; and a trade in agricultural produce and the articles of manufacture. The tithes of the abbey, in which the monks stored their grain, still survive. Henry I was born at Selby. Pop. 5109. Area of par., 3180 sq. Pop. 5540.

SELJE (anc. **Silarg**), a river, Naples, about 10 m. S. of Naples, S. frontiers of prov. Principato Ultra, flows S. through Principato-Ultra, and it receives the Calore or Rapido, then turns W.S.W. and after receiving the Calore or Rapido, falls into the sea, about 18 m. S.E. Salerno; total course, 45 m.

SELENGEN (anc. **Selenia** or **Selenia**) a tn. Asiatic Turkey, prov. Ispah, r. bank Ghazik, about 10 m. above its mouth in the N.E. of the Levant, 55 m. S.W. Taurus. The ruins of the ancient town are still seen covering a large area, but the modern town, though the residence of an ag. dependent on the governor of Cyprus, is a wretched place, composed chiefly of earthen and wooden huts.

SELENGA, a river Central Asia, formed in Mongolia by the junction of several head-streams, which unite about lat. 48° 30' N., lon. 103° E., whence it flows N.W. about 100 m., or to lat. 50° N., where it is joined by various considerable tributaries, thence it proceeds N. and N.E. to Uldink in Siberia, gov. Irkutsk, when it suddenly bends to the N.W., and falls into Lake Baikal, S.E. side, after a course of probably 800 m.

SELENGHINSK, a tn. Asiatic Russia, gov. and 181 m. S.E. Irkutsk, on the Selenga, near the S.E. of Lake Gussone, in a bleak and arid district. It is poorly built, though it ranks as one of the best towns in Siberia, is surrounded by fortifications, and has three churches, some general trade with Kichin, and a trade in salt obtained from springs in the neighbourhood. Pop. 2579.

SELENA (Cora) a promontory, N.E. coast, Asia, Gulf of Anadir lat. 62° 43' 30" N.; lon. 177° 40' 48" E.

SELENNAK, a river Siberia, rises in gov. Yakutsk; lat. 62° N., flows S.W. and joins l. bank Indigirka, after a course of about 130 m.

SELHAM par. Eng. Sussex, 1045 ac. Pop. 120.

SELIGENSTADT a tn. Germany, Hesse-Darmstadt, 16 m. S.E. Frankfurt; with a church, an old abbey, manufactures of woollen and linen, and several tanneries. West it is an old imperial palace called Chateau Royal. Pop. 2684.

SELIGENTHAL, a vil. Hesse-Cassel, prov. Fulda, 4 m. N.W. Schmalkalden with manufactures of wire, and four mills. Pop. 1163.

SELIGHER, a lake, Russia, N.W. of gov. Tver, about 35 m. long, N to S. 10 m. broad and in some places 16 fathoms deep. It is very irregular in shape, and so deeply indented as to have the appearance of several lakes communicating by narrow channels. It discharges itself into the Volga. It is well supplied with fish. The town of Ostchakov stands on a peninsula at its S.E. extremity.

SELIMNO, or **SELAMNI**, a tn. Turkey in Europe at 8 feet of the Balkan, on a small affluent of the Toodja, 70 m. N. by W. Adrianople. It is walled, and has three mosques, baths, and manufactures of firearms, woollen stuffs, oil, essence of roses, and one of the largest fairs in Turkey, attended by merchants from Russia, Germany &c. Pop. 30,000.

SELKIRK, or **SARACENSUS** an island on Scotland, bounded N. by Midlothian, E. by Roxburgh, S. by Dundee, and W. by Perth. Area, 149,890 ac. of which but a small portion is arable. It is generally high, the hills being for the most part ridge-shaped, and rounded on the tops. They vary in height from a few hundred ft. to 2000 ft., and are smooth and green to their summits. The mountains appear to have been originally one large, high bed of greywacke and clay slate, now cut and subdivided by streams. On the W. side of the county, extensive strata of porphyry are found alternating with slate and granite. What is raised to some extent in the lower districts, and oats, barley, horsey, and clover-hay are cultivated in regular rotation; but the quantity of land under tillage is comparatively small, the dryness of the climate and other circumstances rendering the country altogether more appropriate for pasturage. The Cheviots are now the prevailing breed of sheep, having nearly superseded the black-faced, which are confined to exposed mossy lands. The cattle are chiefly of the Forthwater breed. A considerable number of Highland cattle are also grazed on the hills. Principal rivers—the Tweed, and its tributaries Yarrow and Ettrick. A considerable number of the inhabitants are engaged in various branches of woollen manufactures, which have their chief seat in Selkirk, principal of the county, and in Galashiels. Selkirkshire returns one member to Parliament. Pop. 9809.

SELKIRK, an-see, royal burgh and market in Scotland, cap. of Selkirk, 13 m. S.W. Edinburgh. It is well built, and contains some good streets, and many respectable and substantial houses. It is lighted with gas, and amply supplied with water, has a neat, plain Established church, Free and U. Presbyterian churches, and several excellent and well-conducted schools; a public subscription library; a mechanics institute, and a newsroom. Woollen manufactures are carried on here to a considerable extent, and also tanning and stocking-weaving. In former times Selkirk was celebrated for the manufacture of thorn or single-toed shoes. Hence the 'Sons of Selkirk.' Area of par., 4847 ac. P (1851), 8314.

SELLEA, -1, A. to. and com. Spain, Valencia, prov. and 19 m. N.N.E. Alicante, on the side of a hill. It consists of regularly built houses, arranged in steep, narrow, winding and ill-paved streets. It has a large and spacious public square, containing the courthouse, a parish church, and two primary schools; manufactures of linen cloth, and some trade in wool and oil. Pop. 1670-5. A river which descends from a branch of the Cantabrian Mountains, prov. Oviedo flows first N. than E., then N.E., and after a course of about 86 m., falls into the Bay of Biscay forming the bay and port of Ribadesella.

SELLACK, par Eng Hereford, 1540 ac. Pop. 826. **SELLE**, or **SELLE**, a river France, rises to S.W. of dep. Canal, flows W.S.W. into dep. Lot, past Figeac and Cahuzac, and a little below the latter joins r. bank Lot, total course, 60 m.

SELLES, or **SELLES-CHER**, a tn. France, dep. Loire-Cher, on the Cher, here crossed by a fine bridge, 25 m. S.E. Blois. It contains a handsome parish church and a magnificent chateau, built by Philip of Bethune, brother of the celebrated Bely and has manufactures of woollens, and a trade in corn, wine, and hay. Pop. 2038.

SELLING, par Eng Kent, 2403 ac. Pop. 667.

SELLING, par Eng Kent, 2085 ac. Pop. 530.

SELLNITZ, or **SELNITZ**, a vil. Bohemia, circle Leitmeritz, l. bank Elbe, 6 m. from Bütz with a church and several mills. Pop. 1898.

SELLYE, a market tn. Hungary Thither Danube, on. Szeged, 9 m. from Szeged, on the Drave with two churches. It suffers much from inundation. Pop. 1043.

SELLEVE, a market tn. Hungary, on. and 14 m. S.W. Munkacs, r. bank Wag, with a castle, hospital, school, and extensive silk-works. Pop. 2173.

SELMA, a vil., U. States Alabama, 45 m. W. Mont gomery, r. bank river Alabama, on the Alabama and Tennessee, and Alabama and Mississippi railroads. It has manufactures of iron, including steam-engines &c. and ships a large quantity of cotton annually. Pop. 1900.

SEL MASI, a tn. Persia, prov. Azerbajan within 15 m. of N.W. coast of Lake Urmia. It contains about 1500 families, of whom 2000 are Christian.

SELMESTO, par Eng Sussex, 1590 ac. Pop. 960.

SELOIGNES, a vil. and com. Belgium, prov. Hainaut, on the Namur and Oise, near the frontiers of France, 26 m. S.E. Mons. It has manufactures of iron a foundry two breweries, and a trade in wood. Pop. 1014.

SELSEY, a maritime vil. and par. England, on Sussex, near the extremity of a somewhat remarkable headland, called Selsey Hill lat 50° 48' 48" N., lon. 0° 46' 30" W. It consists principally of one street of neatly built houses, with a handsome church, and a place of worship for Methodists; an extensive fishery is carried on here for prawns, lobsters, crabs, oysters, and cod. Area of par., 4814 ac. Pop. 384.

SELSTON, par Eng North, 3880 ac. Pop. 2101.

SELTSCHAN, or **SELTSCHART**, a tn. Bohemia, circle Hohenau, on the Odette, with a deanery church. P. 1988.

SELTZ (anc. *Selatos*), a tn. France, dep. Bas-Rhin, l. bank Rhine, 29 m. N.E. Strasbourg. It has a handsome Gothic church, a cotton-mill, oil-works, and some trade in hemp and flax. Pop. 2107.

SELUNE, a river, France, rises in S.W. frontiers of dep. Orne, flows W.W. across the S. of dep. Manche, and after a course of 50 m., of which 9 m. when favoured by the tide are navigable, falls into Bay of Mont St. Michel, where it forms a spacious estuary with the Lee.

SELVA, several places, Spain, particularly, -1 A tn. Catalonia, prov. and 10 m. N.W. Tarragona. It has well-

formed and paved streets, two churches, a primary school, two convents, considerable manufactures of serges, velvets, a distillery, and several oil-mills. Pop. 3671-5. (See *Mor*). A suspect in Catalonia, prov. and about 24 m. from Girona, on the Mediterranean; with a church, a primary school and a harbour at which some import and export trade is carried on. Pop. 758 -5, A. to. near the centre of Isl. Mallorca, 18 m. N.E. Palma. It is well built and has a church a primary school, and a trade in wine, oil, fruit, and cattle. Pop. 3913.

SELVE an Isl. Austria, in the Adriatic, off the coast of Dalmatia, S.E. of Isl. Onaco. It is of very irregular shape, and about 4 m. long. It forms a single parish, and has a village of same name, to which the greater part of the inhabitants reside. They are chiefly employed in fishing. Pop. 1835.

SELVI a tn. European Turkey prov. Bulgaria, on the Rana, 90 m. W. by S. Shumen. Pop. 2500.

SELWORTHY, par Eng Somerset, 2219 ac. P. 489.

SEM, a river Russia. See *Sema*.

SEMMAO or **SEMMAO** a small insular Isl. Indian Archipelago, off S.W. extremity of Timor, near Cooping Bay lat (S. point) 10° 20' S. lon. 123° 51' E. about 26 m. long by 10 m. broad moderately elevated and separated from Timor by a narrow strait. The principal articles of trade are wax, sandal wood, and edible birds' nests.

SEMD a vil. Hesse-Darmstadt, prov. Starkenburg, circle Dieburg near Unstadt. Pop. 1164.

SEMEDRIA a fortified tn. Turkey in Europe, cap. of Servia, r. bank Danube, at the junction of the Jemna, 24 m. N.E. Belgrade. It is the residence of a bishop. It was taken by the Turks in 1485, and re-taken several times by the Hungarians and Turks, ultimately remaining in the hands of the latter. Pop. about 12 000.

SEMEAOOD or **SEMAOUD**, a tn. Egypt, l. bank Damietta branch of the Nile, 45 m. S.W. Damietta. It is a place of some extent, with the usual houses of the lower series of Egypt, and is famous for its pottery, which is sent to Cairo. Here are the mounds of Sebennytis, the city of Senn, the Egyptian Hercules.

SEMELOVO a tn. Russia, gov. and 56 m. N.N. Nijni-Novgorod with a church, manufactures of various articles in wood, and some general trade. Pop. 1000.

SEMER, par Eng Suffolk, 1248 ac. Pop. 568.

SEMDIL, a tn. and par. Portugal prov. Douro, 8 m. from Colmeira on the slope of a mountain of the same name, the crest of which is occupied by the sanctuary of Senhora da Serra, a noted place of pilgrimage for many countries. In the town is a celebrated convent of Benedictine friars. Pop. 2030.

SEMILJ *SEMILO*, or *SEMILOVO*, a tn. Bohemia circle and 28 m. N.1. Budejov, on the river here crossed by a wooden bridge. It contains a castle church chapel and school and has manufactures of fine paper, and a distillery. P. 1715.

SEMINARA, a tn. Naples, prov. Calabria Ultra, 1 1/2 m. S.E. Palmi. It has three churches. Pop. 4280.

SEMPATLATINSK or **SEMPATLATINSK**, a tn. and fort, Siberia, gov. and 400 m. S.E.E. Omsk, r. bank Irtysh. It forms part of the military line which has been formed on that river, and owing to its mercantile has changed its site four times since it was first erected in 1718. The inhabitants carry on a considerable trade with the Kirghiz and the Khazars of Tashkent and Kashgar. Pop. 1840. 7668.

SEMSPOCHNOI, or *ISLAND OF THE BERRY MOUNTAINS*, belonging to the Alutian Archipelago, and to the group known by the name of the Kriel or Isl. Islands, about lat. 51° 59' N. and lon. 179° 45' 57" W. It is of a circular form, about 80 m. in circuit, and has a mountainous surface, with summits 3001 ft. in height, on which in summer the snow lies in bands. One of the mountains emits smoke. The aspect of the S. and E. sides is wild and desolate, that of the N. and W. is more pleasing, presenting several good spots. The channel between this island and Geyland, about 40 m. broad, and not subject to ebb-raises, is the best for crossing the Alutian chain.

SEMEN (Jen), a vil. Hungary, Thither Thales, co. Zala, in a fertile district, about 9 m. from Kiblatygy; with a Protestant church. Pop. 1615.

SEMLEY, par Eng Wilt 2945 ac. Pop. 693.

SEMLANKA, a tn. Russia, gov. and 26 m. S.W. Yekaterin, on the Semanka, with some trade. P. 1861, 3698.

SEMLIN, or **Semlan** [Sempan, Semang], a frontier to Hungary, Syria, regional dist. Potomac, almost opposite Belgrade at the confluence of the Save with the Danube. It stands on a tongue of land formed by the two rivers, is well fortified, but surrounded by a steppeland, and quarters of the lower town and a suburb called Franzosch. The former contains some good houses, and has some of its principal streets paved with rough stones, but the town as a whole has a very mean appearance, and even in its better part looks empty and melancholy. The quarter nearest the Danube, built on the slope of a hill, called Sloboda, from having been strictly inhabited by gipsies, is a more handsome of much less, shaded with roads and built along lanes, which from the deep runs made in them by torrents of rain, are rather ditches than streets. The Sloboda is crowned with the ruins of the castle of John Hunyadi, to whom Christendom was mainly indebted on the 15th century for its deliverance from the Turks. The inhabitants carry on an important transit trade, receiving from Turkey chiefly cotton, linen-yarn, saffron, honey, lamb-skins, and tobacco pipes; and sending out in cloths of different kind, porcelain glass, &c. Near it is the quarantaine station of Constantinople, the most important caravan on the Turkish frontier. Pop. 10,500.

SEMOY, or **Semoi** [Lau, Semow], a river rises in Belgium, near Luxembourg, near Arlon, proceeds E. through the B. of prov. Ardennes, and passes Chimy and Bouillon enters prov. Namur and proceeds into the French territory and joins r. bank Meuse, after a course of about 110 m., of which about 46 m. are navigable.

SEMPACH, a tn. and par. Switzerland, can. and 8 m. N.W. Luzern, E. shore of Lake Sempach. It is well fortified with towers in a very ruinous condition, and is poorly built. Its only claim to notice is derived from being the scene of the second great battle which the Swiss gained over the Austrian oppressors, who left on the field 6000 soldiers, including their leader Duke Leopold, and more than 2000 common soldiers, though the whole force opposed to them did not exceed 1400. Pop. 1007.—The **LAKE**, 1530 ft. above sea-level, and 160 ft. above that of the Lake of Luzern is about 6 m. long, by 2 m. broad and is embosomed by hills, and well supplied with fish.

SEMPERINGHAM par. Eng. Lincoln 3480 n. Pop. 565.

SEMPST a vil. and com. Belgium, prov. Brabant, on the Sene and the Brussels and Antwerp railway 11 m. N.E. Brussels, with a brewery two mills, and a trade in corn, cattle, and flax. Pop. 2594.

SEMPTE, or **SEMPTE** a market in Hungary Hither Danube, co. and 16 m. N. Neutra, on the Yang with a church, a strong castle, which figures in the Turkish wars and a trade in corn and wine. Pop. 1157.

SEMUH, or **SEMUH ADONIS** [sic. Siemurwa] a tn. France, dep. Cote-d'Or, on a rock of granite, hatched on three sides by the Ammonon, here crossed by two bridges, 37 m. N.W. Dijon. It is in general well built has a handsome Gothic church, a court of first resort, a public library, communal college, and agricultural school, manufacture of coarse woollen cloth, serge, and drapery, several breweries, wine, oil, cork, and flax, and a trade in corn, wine, honey, hemp, wool, horses, and cattle. Pop. 4057.

SENA, or **SENERA** a tn. E. coast, Africa, about lat. 17° 50' S.; lon. 25° 55' E.; in the Portuguese territory of Mozambique (p. 240).

SENGO a vil. and com. Italy Lombardy prov. and 10 m. N.W. Milan with a church, and a summer residence of the archbishops of Milan. Pop. 2004.

SENI, par. Eng. Surrey, 1502 ac. Pop. 1555.

SENIMMOHET, a tn. France, Westphalia, gov. and 15 m. S.E. Münster. It is well built; has six churches and schools, and a trade in cattle. Pop. 1468.

SENDE, a river, France, rises in S.W. of dep. Cher, enters Loire, flows N.W., and falls into the Atlantic, opposite the S.E. extremity of Isle of Oleron; total course, 50 m., of which about 16 m. are navigable.

SENECA, a vil. and township, Canada West, dist. Niagara, on the One or Grand River, here crossed by a bridge, about 65 m. S.W. Toronto. The township contains the two distinct villages of Seneca and Chateaufort. The latter, the more important of the two, situated 1 m. above the others, has

an Episcopal and a Free church, two common and two private schools, a library, and several mills and flour mills. The former has also several large mills, a carding-machine, and a cloth-factory. Pop. township (1855), 3696.

SENECA, a lake, U. States, New York, 168 m. W. Albany, 40 m. long, N. to S., by 3 m. to 4 m. broad; 436 ft. above sea-level; and in some parts 560 ft. deep. Senecas ply on it. It empties itself at its N.E. angle by the river Seneca, which, flowing N. and E., receives the waters of Lake Cayuga, Oneida, Oswego, Seneca, Ontario, Onondaga, and Okauchee, then turns N.W. and joins the Oswego river, after a course of 60 m. At the village of Seneca Falls and Watkins, there are 2½ hrs. affording excellent water-power.

SENECA FALLS, a vil., U. States, New York, 138 m. W. by N. Albany on the Seneca, with manufacture of cotton goods, iron, and paper; a heat-building yard and numerous flour and saw mills. Near it gypsum abounds. Pop. 2045.

SENEFFE a tn. and com. Belgium, prov. Hainaut, 17 m. E.N.E. Mons with a large church, two schools, a glass-bottle manufactory, a distillery, brewery salt-refinery tannery and hat-factory. Pop. 3865.

SENEGAL, a large river, W. Africa. See **SENEGAMBIA**. **SENEGALIA**, a French colonial dependency, W. Africa, Senegambia, consisting of the island and town of St. Louis, at the mouth of the Senegal, and several forts along the banks of that river comprising also the island of Gorée, Abulda on the bank of the Gambie, and the other stations S. of Cape Verd. The exports consist chiefly of gum, hides, wax, ivory, cabinet-woods, and gold-dust. Imports—mannu factured goods, wines, spirits and provisions. Senegal is governed by a superior naval officer who resides at St. Louis, the seat of the chief judicial court. A lieutenant-governor is stationed at Gorée. The French first settled here in 1687. It was taken by the English in 1758, recaptured by the French in 1779 and subsequently held by the English till the peace of 1814. Pop. (1849), 14,676.

SENEGALIA, a tn. Papal States. See **SENEGAMBIA**. **SENEGAMBIA** [French, *Senegambie*], an extensive region of W. Africa, lying between the rivers Senegal and Gambie. Such at least would be its extension if the application of the name were determined by its derivation. But the name Senegambia has been brought into use chiefly by French writers, who affecting to have extensive national claims to territory in W. Africa, have gone on enlarging continually the application of the name, which is more properly given to their own settlements, and understand by Senegambia, the whole country from the Senegal S. to Sierra Leone, Cape St. Ann, or even to Cape Palmas. Such nomenclature, however founded neither on physical features nor on political divisions, serves no useful purpose. Convenience suggests that the name Senegambia should be confined rather to the region around the Gambie, and embraced by the Senegal on the N. and E., and by the sea on the W. as far S. as the 10th parallel of latitude, where the sources of the Senegal approach nearest to the sea. About this line begins the country dependent on, or allied with the British colony of Sierra Leone; S. of which again is the independent state of Liberia, neither of which can be combined, on any sound principles of grouping, with the countries farther N.

Boundaries.—The source of the Badag or Black River, which is considered as the main branch of the Senegal, is situated in lat. 16° 18' N. lon. 11° W.; or about 140 m. in a direct line from the sea-coast. Thence the river flows some distance E., turns N.E. and N., and at last, after running W. some hundreds of miles in a very winding course, it descends to the sea in a S.W. direction; the length of the stream, measured along all its windings, extending probably 1000 m. It thus partly describes a very wide, open curve through which flows the Gambie, then from S. to N., and then to the W., in a tortuous course like the Senegal, but with narrower banks, though with a more copious stream. S. of the Gambie again are the rivers Comouma, Juba, or Joffa, the Rio Grande, Rio Nunez, and Fouta, though this last may be considered as belonging to, or forming the natural boundary of Sierra Leone. The region thus marked out, E. and W. of the Senegal, has a length from N. to S. of about 400 m., with an average width of 250 m., but to the upper course of the Badag is known only at a few points, and to

the position assigned to it depends entirely on estimates of an important character, the E. limit of Senigambia is so far uncertain.

Senigambia Valley, &c.—The physical features of a country so imperfectly explored as Senigambia, cannot be described with any accuracy of detail. The observations at once certain and interesting, relating to its nature and conformation, lie within a narrow compass. The W or maritime portion of the country is a low flat, and to a great extent, swampy plain, nearly 150 m. wide, under the 10th parallel, and increasing N towards the Senegal to a width of 300 m. E. of this is a hilly or mountainous country in which the principal valleys seem all to run from S. to N. The statements made respecting the height of these mountains are always vague, and often rest merely on hearsay. The mountain of Moutana, lat. 11° 4' N., is reported to be covered with snow in winter, and M. Hocquard, a recent traveller (1851), undoubtedly meant to convey his belief of its great height, when he remarked that he found on it in June no snow but abundance of magnetic iron-ore. The same traveller seems to have believed that Timbo, the capital of Fouta-Jallon, stands at a great elevation. But this opinion receives no confirmation from the accounts given of the fall of the Bourne, Koulou, and other rivers near Sierra Leone, which descend with a moderate course from the heights of Fouta-Jallon. Besides Major Leing, in estimating the height of Mount Loma, the source of the Fouta, at 1800 ft. seems to render it improbable that the rivers flowing W with a comparatively short course, should spring from a much greater height. From Fala, whence he saw Mount Loma, he could also survey the mountains of Fouta-Jallon, and he does not appear to have been struck by, nor even to have suspected, their superior elevation. It is natural to suppose that the inhabitants of an elevated region liable to winter snow would, under the tropics, differ totally in habits and constitution from the people dwelling in the plains. But it does not appear that in Senigambia nature marks out the definite limits of race, or offers any impediment whatever to occasional migration from the hills to the plain and back again. The plateaus of Fouta-Jallon, Jallon-kéou, Kouka-in, and Bambaré, may therefore be assumed with probability to have a moderate general average of 1800 ft. or 1600 ft., while the summits of the mountain-chains which are not numerous stretch perhaps at the utmost an absolute height of 6000 ft.

Rivers.—The Senegal, the mouth of which is in lat. 16° 48' N. but which in its course through Fouta-Toro, at various a degree farther N, has its chief sources (those of the Baïng) in lat. 10° 10' N., while the sources of the other rivers E. of the Senegal on the coast, are situated N. of that parallel. The Baïng runs at first E. then N. by Timbo, and afterwards N.E. and N.W. From the opposite or W. side of the mountain in which it rises, springs also the Toudi or Falamé, the second great branch of the Senegal, which runs N. in a more direct course till it joins the Baïng in Galam. The latter receives on its E. side the Kallou or Dangerous River and the Ba-Wallima or Red River, both large streams. The Senegal is navigable up to the estuaries of Falamé in Kasso, about 700 m. from its mouth. Above those falls it again assumes the appearance of a great river, but its capabilities are not precisely known. The Senegal is much washed in the lower part of its course by the numerous torrents or *littles* which every where descend through the adjacent plains and its mouth is frequently barred, so as to be at most seasons accessible only for small vessels. The Gambia (lat. 13° 30' N.) is reported to have its sources in the mountains of Badé, in lat. 11° 30' N.; on 11° 15' W. It flows at first towards the interior, like the Baïng, but winds round quickly, and within 80 m. of its terminus flows W to the sea. It appears, in its lower course, a greater river than the Senegal, and is navigable 800 m. up for vessels drawing two fathoms. The falls at Senigambia may be assumed during the floods, and the Gambia has in fact been navigated in boats to a distance of 800 m. from its mouth, and thence from the wilderness and depopulation of adjacent country its further exploration promised little advantage. The same mountains which give rise to the Dina or Gambia, also send forth to the W the river Ombou or Badi, which is supposed by some to form the Rio Grande, in lat. 11° 20' N., though the native accounts seem to identify it rather with the Jola or Jinhé, a few miles N. of the Rio Grande. These two rivers, however, are usually considered

by seamen as only deep inlets or arms of the sea, and as owing but little of their magnitude to fresh-water supplies. The river Ombou, which flows between the Gambia and the Jola, an altogether a river of the plains, and highly characteristic of this region, being fed wholly from maritime inundated plains, or by the outpourings of the neighbouring rivers. It may be assumed in large boats 120 m. In general, it may be observed, that in Senigambia below the hills, where the rivers flow from E. to W., the country is perfectly level, and during the floods all the rivers collecting their channels flow over the plains, and become conjoined one with the other by means of canals or *marigots*, some of which remain still navigable when the floods have subsided, and thus facilitate to the natives communication across the country. These *marigots* are so numerous, that Senigambia, towards the sea, may be compared to a chain of plains separated by narrow channels.

Geology.—As the highland or E. portion of Senigambia has been visited at only a few points, its geological constitution is known but imperfectly. Yet it seems certain that granite in its various forms constitutes the base of the mountain-chains, and shows itself in all the small hills overlooking the banks of the Senegal, from Galam up to Bambaré, while farther E. volcanic rocks frequently break through and cover the granite, the hills tops being often crowned with basalt, and the loftier mountains owing their superior elevation to the mass of trachyte accumulated upon them. The valleys of the primitive rock seem to strike generally S.E. to N.N.W. The direction of the volcanic bands has not yet been clearly pointed out. In obvious connection with these is the iron-stone or ferrous rock, profusely strewn over the hills in Fouta-Jallon, and neighbouring districts. Lower down than the iron on the outer edge apparently of the volcanic influence, imbedded in a loose friable earth, lies the gold gran, for which in early times Guinea was so famous. Bambaré, towards the N. between the Falamé and Baïng and Badi in the E. slope, are the districts most famed for their gold-mines. The level plains towards the coast are formed, as might be expected, from the detritus of the hills, mixed with sand.

Vegetation.—The vegetation of Senigambia is known accurately only on the coast. On the Lower Senegal, the soil so far as the inundation reaches, teems with abundance. Beyond that line extends a dry sandy desert in which the acacia, acacia, and various thorny plants of the Sahra overpread the plains, and this desert aspect narrowing as it goes E. reaches nearly to the Gambia. Farther E. and wherever the coast, broken into islands is intersected by numerous *marigots*, the mangrove and palm occupy the shores. Behind them may be seen the gigantic baobab (*Adansonia*) and baobab (*Adansonia*) the African oak, and other large timber. On the dense forest of great trees commences at some distance from the coast at the foot of the hills. It is above the limits of these forests apparently that the shea or butter-tree is first met with. This, with the *café-palm*, characterizes the hilly regions. Farther E., perhaps beyond the limits here assigned to Senigambia, the *cam-wood* makes its appearance. The cultivation of the soil, throughout the whole region, varies much more from the civilization of the people than the gradations of climate. Fertile tracts well situated, often lie as wilderness, while less favoured spots yield abundantly Rice, maize, and other grain, with bananas, melons, and yams are cultivated equally on the hills and plains. Trees may be found, particularly round the villages of the *Mahommedans* Mandingoes, exhibiting a state of cultivation which would be thought admirable even in Europe. The orange, citron, and other fruits introduced by the Portuguese in the 15th or 16th century, are now extensively cultivated in the hills. In some parts of Fouta-Jallon the oranges are not eaten by the natives, but reserved wholly for strangers.

Anthropology.—As Senigambia is a region arbitrarily marked out by geographers but by a physical line, it presents no unity nor systematic arrangement of population. There exists little or no relation between its limits and those of the various nations which, wholly or in part, lie within it. These nations are of many races, which do not always admit of being accurately discriminated. We find, separately or mixed together, *Yolofs*, *Serres*, *Foulas*, *Mandingoes* under many denominations, *Falops*, *Tyals*, and *Hamars*. Each of these

Climate.—Though the limit of the tropical rains is marked in maps in lat. 17° 46' N., yet in truth, about the Nile those rains can hardly be said to reach beyond the 16th parallel. At Khartoum, in lat. 15° 37' N. rain falls only every second or third year and droughts of long continuance are not infrequent. Even higher up where the rain never wholly fails, it is still but scanty. But on the marshy plain of Sennar three or four heavy showers, such as fall only within the tropics are enough for the durra. The rains seem to be occasioned by E. winds, though winds from some S. point prevail during the wet season which ordinarily begins in July and continues for two months. The Nile swells fitfully in May, begins to rise steadily in June and attains its greatest height early in September. Immediately before and at times during the rains, the heat is insupportable; the thermometer in a tent rising to 119° F. while the humid air resembles a steam-bath. Then come the deadly fevers and dysentery which are most fatal on the argillaceous plain. Sandy spots near the river and places on the verge of the rains as Khartoum are thought to be comparatively exempt from disease but in truth there is no safety in the neighbourhood of Sennar. The *ferret*, or guinea-worm another plague which comes with the rains, is as attributed to the loss of manure is most frequent at Sennar. The plague of Egypt never penetrates into Nubia but in the latter country the small pox is equally destructive. In winter the thermometer often falls to 60° and the atmosphere is so free from humidity that meat will dry without decomposition.

Zoology.—The horse and camel all suffer severely from the rainy season in Sennar. The cattle are small and ill-conditioned the sheep tall and without wool. The dog of the country appears to be a degenerate pyrenean and is of very sub. cat. to hydrophobia. The wild animals are not many. The elephant and rhinoceros, the giraffe, zebra and antelope, keep to the woody ta savanna of the Abyssinian frontier or to the forests of the north and rarely approach the inhabited banks of the river. The hippopotamus, however and crocodile, are very numerous as well as the large sand lizard which is often mistaken for a crocodile. The *warufu* (weaver) enters the villages by night and devours the dead. The *amdena* (a heron) sits on the roof of every house. Apes and green parrots give life to the woods, and wherever rocks rise above the plain, they are pecked by *halcyons*. The *cynophylax*, the ape derived by the ancient Egyptians, is still found, though not frequent in the woods of Sennar. Here also dwells the *shu*, which migrates in summer. The same woods are visited in April by a small linnæan like bird (*Zenaidura*) which comes in immenses clouds darkening the air like locusts. They are caught in nets and sold 100 for a penny. The *werret* or fly that attacks cattle does not come nearer than within two days' journey of Sennar, *macquies*, however, are troublesome. The pastoral tribes of Sennar move N. with their herds in May and return in September.

Inhabitants.—The population of Sennar is of a very mixed character and as yet no traveller has succeeded in the attempt to point out distinctly the aboriginal race. According to Cailliaud there are six classes commonly and readily distinguished.—1. The Amari (yellow) of manifestly Arab origin. 2. Hamar (black) natives one remove from the preceding. 3. Arak (blue) darker than the Hamar and including the people called Fange 4. the Akhlar (green) and 5. Elkak (black) both very dark and little removed from, 6. the Sudan (black) or Nubian, unmixt negro slaves recently imported. In this enumeration, the existence of a once dominant white race distinct from the Arabs, seems to be wholly lost sight of and yet it cannot be thought doubtful for the continuance of a separate independent state, under one name or another from the earliest ages supposes a stable united nationality which could not have been maintained merely with such fluctuating and foreign elements as nomadic or servile tribes. The descendants of the ancient masters of the land are now probably to be found among the darker and degraded classes, their mixture with the negro and slave population being hastened by subjugation and oppression. The pastoral tribes of the island are the *Arak* and *Maram* (perhaps *Kharwal*). On the S. bank of the Nile are the *Jalibi*, the *Kawwal* (between the Red and Blue) the *Refes* and *Dobana*.

Character.—It is better classes in Sennar have generally handsome features and well proportioned statue-like figures.

Their dark-brown complexions and rather thick lips, alone betray some distant consanguinity with the negroes. Graceful and dignified in carriage while prompt their bodily vigour is soon undermined by the climate and bad habits. The men grow decrepit rapidly in declining years, and the women on whom devolves all the drudgery of domestic life, become frightfully ugly almost as soon as the first bloom of youth has passed away. The *ferrie* or toga generally worn, admits of being gracefully folded in a variety of ways. The elaborately frizzled hair and the elegantly made sandals of the people of Sennar exactly represent the fashion of ancient Egypt, as painted on the tombs. The houses of Sennar at the present day are built of sun-dried bricks, and roofed with *hads* (a grass) durra-straw or reeds the material used varying with position in respect of the rains. Formerly there were many houses of two stories in Sennar but few of them now remain, still however in amplest of scale in the skilful construction of the doorways and in many other particulars, the architecture of Sennar is much superior to that of the surrounding countries. Scattered among these rectangular houses and far more numerous, are the clay and straw built huts of the black population of the various shapes and denominations belonging to the different races. The actual condition of Sennar while it subsisted as an independent state, was singular. Slavery as well as *durra*, seems attached to the soil. Every man of any condition was an abject slave—the slave either of a private master or of a despotic king. Nor did this despot himself enjoy the security of freedom but was always liable, in case of popular discontent, to arbitrary condemnation and though only intrigue or popular tumult could bring about his death, yet he always had the royal executioner at his side as an officer of his household. Of the 11 kings of the Fange who reigned in Sennar from 1604 till the Turkish invasion in 1822, 14 died in the scene of nature, 15 were formally executed, one perished in a popular commotion, and the last was killed by the Turks. More than half of the population of Sennar are negro slaves. The wants of life here are but few and these are supplied almost wholly by slave-labour. The work of the fields is all done by slaves. In the best days of Sennar the soldiers were all negro slaves—either Nubian from Kordofan or from the S. or else Galla (who seem to be a military caste) from Darfur. The upper classes of Sennar led a life of utter indolence and idle dissipation. All classes were intoxicated and drunk, either wine being obtained from *durra* or brandy distilled from it. In their food also they show varied appetites and tastes. They eat with little scruple whatever offers up through Mahomedans, do they refuse pork or the entrails of camels, sheep or cattle. But their favourite dish is liver which, as well as other intestines, they devour raw seasoned with gall, or with an acid sauce made from the lees of *abes*. Yet though dissolute and idle, they do not want for ingenuity and have a large share of traditional art. They can amputate and perform some other more difficult surgical operations. They practice inoculation with the small pox, but esteem it lightly. Their own wants they can supply perfectly, and are sufficiently skilful as weavers goldsmiths, curriers, potters, &c. In short, Sennar is in Ethiopia as eminent for superior workmanship, as London and Paris are in Europe. The property of land is here absolute and not resumable by the sovereign as is generally the case throughout Africa. Though the state obeyed one sovereign, it admitted many systems of law, and still at the present day the great number and variety of local jurisdictions, laws, and usages prove the original mixture of the population. The people of Sennar though subdued by the Mahomedans, can hardly be said to have been converted by them. They have indeed forgotten Christianity, but while professing the faith of the Koran, they observe hardly any of its precepts. They rear and eat pork, they neither wash nor pray and most of their villages are without mosques.

History.—The popular traditions of Sennar represent that country as the original seat of the *Macrobi*, whom Herodotus mentions as the most remote of the Ethiopians, and as a people whose gold provided the supplies of Cambyses. The same historians also speak elsewhere of the *Autochthones* (gold-grants) or Egyptian soldiers who, deserting Persimmones marched S. and settled in Ethiopia above Meritis. These immigrants were evidently the *Scridae* or *Scridae* (Jumi

gains in the language of the country) of later writers, and a careful comparison of the original testimonies will prove that the island of Senaar was the country occupied by the Egyptians. The Table of the Sun described by Herodotus as a Manichaean singularity was in fact a festival of ancient Egypt which had grown obsolete in his day. The Egyptian settlement seems to have risen superior to Merb and to its influence may be traced those imitations of ancient Egyptian art, all of comparatively recent date, which are now scattered over the plains of the latter country. As Christianity spread up the Nile carried by Egyptians or Jacobite priests, it was received by the descendants of the Egyptians and in the 10th century the most flourishing state in Ethiopia was the Christian kingdom of Alwa, on the Blue River with Soba for its capital. The ruins of Soba may be now recognized about 16 m above Khartoum, on both sides of the river, but chiefly on the r bank, and among them have been found, besides fragments of sculpture, some inscriptions also, in an unknown language, but in Greek, or rather Coptic, characters.

The Plague.—It was about the middle probably of the 15th century that the Fung (Fung, Fenneh, or Fumaye) advancing from the S. interior of the island, made themselves masters of the Blue River. The Fung king Ousman ben Abdoulay, having embraced Islam (1504) is now recorded as the first of the dynasty, his four predecessors having emigrated from the last. Their capital at first was Dohin, which still exists (n about lat 14° on the l bank of the Blue River), nor can we state precisely when Sennar was founded. From these accounts it may perhaps be inferred, that when the Mahometans first got the better of the Christian population the Jahlun Arabs profiting by the revolution usurped the supreme power but that the national party relying its forces in the A. returned after a little time, and under the name of Fungo (commandants?) re-occupied the country. As to Bracco's story of the descent of the Shilluks down the White River it may be easily shown to be on many accounts inadmissible.

The Turks in Sennar have fixed their head-quarters on the tongue of land between the mouth of the two great rivers where they have built Khartoum (which see). The force maintained by the Turks and stationed chiefly at Khartoum and at Omdin in Kordofan consists of 4000 infantry and 1200 cavalry. Their rapacity and oppression have extinguished native industry. The people have emigrated in great numbers, and the banks of the Blue River once so populous, now exhibit every where proofs of ruin and desolation.

Towns.—The town of Sennar (lat 13 34 N lon 38 40 E) which, from the descriptions of 1600 (1608) Bruce (1773) and of Calland (1823) would appear to have been comparatively large and well built now lies for the most part reduced to ruins. Its population has fallen from 30 000 to perhaps less than 4000. The king's palace of well burnt brick, has nearly all fallen to the ground and has contributed materials for the erection of the Turkish governor's house.

The situation of Sennar, in the midst of a vast monotonous plain which represents successively a parched desert, a quagmire, and a field of dunes is dreary in the extreme. The only agreeable object near the place is the grove of tamarces already mentioned. There is also a well built mosque in the town. The villages on the Nile below Sennar are still numerous, though generally of mean construction. The most important of them are Dohin the ancient capital about 24 m below Sennar and Medjun (14 25°) now nearly as large as Sennar, Mansourah 30 m lower down the chief market and place of trade on the river and Kalamo where some manufactures have been established under the protection of the Egyptian government.—(1) *Onset's Journey to Abyssinia* (Letters, Edinb., tom ii.) Bruce's *Travels*, Calland, *Voy à Méroé*, Brocchi's *Observations nell' Egitto, Nubia, &c.*, Lepsius, *Ursprung des Nils*, &c.)

SERRENKEM or FORMOSA, a town Brazil. See Formosa.

SERRES, a town Turkey in Pirepo, 35 m. N. B. Salonica, on a ridge overlooking a large and fertile plain of same name, about 20 m from the Gulf of Thessalia. It is surrounded by battlemented walls, flanked with towers, and inclosing a much larger space than is actually occupied with houses is well built is the residence of a pasha and the see of a Greek archbishop and has 10 mosques several Greek churches, public baths and spacious basars, considerable manufactures of linen and cotton goods and an important trade is usually in the cotton and tobacco of Macedonia for which it is the greatemporium and in corn and fruit. Pop about 25,000.

SERRETH or **SERRETH** a town Austrian Galicia circle Bukowina, r bank Nerth, 25 m S E E Czernowitz. It is a very notable place, r habited chiefly by Melchians, Germans, and Jews and has three Greek churches and a synagogue. Pop 4000.

SERRETH (Latin, *Averat*), river, Europe, rises in a branch of the Carpathians, on the E. frontiers of Austrian Galicia flows first N and then S E through Bukowina passing the town of its own name, enters Moldavia flows S parallel to the Pruth forms part of the boundary between Moldavia and Walachia, and after a course of about 800 m joins r bank Danube between Brailow and Galatz. Its principal affluents are, on the right, the Suceava, Moldava, Blaritz, Trotz, Iama, with its affluent the Milkov the Rumnik and the Basco and on the left the Bihor and Sogorilus.

SERGAJESKI, a town Russia, gov and 79 m S E Nijni Novgorod, on a small affluent of the Volga. It contains two women churches, besides the usual manufactures and general trade. Pop (1849), 9335.

SERGIENSK a town Russia gov and 219 m N W Oran burg r bank Solt, near its confluence with the Bourgot it stands on a lofty height in a district abounding with thermal sulphur springs. Pop (1849) 145.

SERGINSKOI (Russian) a town Russia gov Perm, on the Sere, P Krasno-Oudinsk. It has iron works, which have no difficulty in obtaining abundant supplies of ore, but cannot be carried to a great extent from want of fuel. Pop 2000.

SERGEIPE, or **SANCTI-PETRI**, a maritime prov Brazil lat. 10° 20' to 11° 32' S., bounded N by provs. Alagoas and Pernambuco, from which it is separated by the São Francisco E. the Atlantic and S. and W Bahia area, 40,484 sq m. The coast-line, which stretches about 110 m. is low and sandy, but is occasionally broken by low hills covered with wood. At a considerable distance inland the ground rises into mountains, which traverse the prov E to W. The only rivers of any consequence, besides the São Francisco are the Yaxa-Barris, the Sergipe, and Columbia. In the N W there are various lakes, which communicate with the São Francisco, abound in fish, and are frequented by immense flocks of water-fowl. The province is subject to long and severe droughts, by which many districts are so completely parched that the animals die of thirst. As a whole it is by no means fertile. The leading crops are cotton, sugar-cane, maize, tobacco, millet, rice, and flax and many weeds, horses, and cattle are reared. The woods are of comparatively small extent, but furnish good lumber and dye woods. The pop-

osaurus and quinine are of the best quality. The higher grounds seem well adapted for coffee, but the cultivation of it is neglected. The minerals do not include any of the precious metals, and seem confined to rock-crystals, limestone, and saltpetre. For administrative purposes Sergipe is divided into five comarcas—Estancia, Laranjeira, Santo-Amaro, São-Christovão and Villanova-de-Santo-Antônio; and divided into 17 districts. It sends two deputies to the general legislative assembly, and appoints one senator. The provincial assembly consisting of 90 members, holds its sittings in São-Christovão. Pop. 175,000.

SERGEIPE, a river Brazil rises in the Serra Tabanga, prov Sergipe flows E. between the ridges in a direction parallel to that of the Cotiduba, enters the low grounds, and joins l bank Irapurim or Yaxa-Barris about 8 m. from its mouth. Its chief affluent is the Paranoapanga, which joins it close to the town of São-Christovão. Up to this point the Sergipe is navigable by sloops. Canoes go up as far as the Serra.

SERGIPE (see Rev in Brazil. See **SANCTI-PETRI**, São-Christovão). **SERIAL** P a vil and com Italy Lombardy prov and about 1 m E Bergamo; on the S. r. have crossed by a bridge with several auxiliary churches, and a trade in corn and silk. Pop. 2194.

SERLUD, a river Brazil rises in the Serra do-Cariri prov Pernambuco, enters prov Rio-Grande do-Norte proceeds N W, passes the town of Villanova-de-Principe, to which it is navigable by barges and 30 m. below joins r bank Piranhas after a course of 120 m.

SERLUCAN, a town France dep Hérault, 6 m from Béziers, with several branch-churches. Pop. 3073.

SERLINA a vil and com Italy Lombardy prov Bergamo, about 10 m N Zegio with a church and manufacture of ironware, and particularly of common ironware which have an extensive sale in many parts of Italy. Many of the fields are employed in growing fine woad. Pop 116.

SERINAUILL, **SERINAUILL** or **CANTIERE**, the cap of Cashmere, chiefly on r bank but partly also on l bank Jialum, here crossed by seven bridges upwards of 5000 ft above sea-level lat. 34° 15' N lon 74° 41' E. It extends

SBRINAGUR.—From the Rev O. E. Harbridge's Recollections of India.

about 4 m. along the river which with its windings and the numerous vessels plying upon it, has a very picturesque appearance, is surrounded by walls and ramparts of no great strength, and defended by an ill constructed fort, situated on a height so commanding that it might easily be made impregnable, and occupies for the most part of a mere labyrinth of narrow dirty lanes and very rudimentary houses of unhewn bricks and timber generally of two or three stories, but often dilapidated and almost ruinous. Some detached houses of a better class, surrounded by a wall and gardens communicate by a canal with a beautiful lake, immediately E. of the town. Few of the public buildings deserve much notice. One of the oldest is a tomb of an octagonal form built of brick, with walls from 7 ft. to 8 ft. thick and surrounded by a stone wall of great beauty but remarkable for strength and solidity. A

more celebrated edifice is the Jama Masjid or great mosque, of such extraordinary dimensions, that the natives represent it as capable of containing 60,000 persons. It is built of stone below and brick above, is surrounded and partly supported by massive wooden pillars, and terminates in a rude dome and spire, also wooden. Another mosque, entirely of timber is in a very singular style of architecture, somewhat resembling the Chinese. Serinagar was once celebrated for manufactures of shawls, paper, leather, firearms and attar of roses. These and all the other sources of prosperity were destroyed during the domination of the Sikhs, but in consequence of its overthrow may be expected to revive. The population was estimated in the early part of the present century by Elphinstone, at 150,000 to 200,000, by Misrover (1838) at 240,000 and by Von Hügel (1845) at not more than 40,000. This great decrease has been caused by war, pestilence, and oppression.

SERINAGUR, a town. N Hindoostan former cap. prov Central 38 m. E. N. K. Hurdwar lat 30° 11' N. lon. 78° 44' E. in the centre of a valley. It was formerly of much greater extent than it now is, having been encroached upon by the river Alaknanda, besides being reduced by earthquakes. It has long been in a ruinous condition.

SERINAGAPATTAM, a celebrated town and fortress, Hinduistan, presid. Madras, prov. Mysore, of which it was at one time the cap. 245 m. W. by R. Madras lat. 12° 27' N. lon. 76° 44' E. on an island formed by two branches of the Cavery about 4 m. long and 1/4 m. broad—the town occupying about a mile at the E. end of it. It is generally ill built, and the streets narrow, crooked and dirty, but the principal bazaar is straight and spacious and there is a good road under the ramparts encircling the city. The houses are whitewashed externally, have tiled roofs, and generally a low second story. The palace formerly extensive is now in a ruinous condition. The most striking of the other public buildings are the great mosque and the pagoda of Sri Ranga, the arsenal and the cannon-foundry. In the centre of the island, on an eminence stands what may be considered a suburb of Seringapatam, although a separate town. It is called Shroton Channarayana and is large and well built, having wide streets lined with trees, and intersecting each other at right angles. In a garden adjoining it is the mansion of Hyder himself, his wife, and Tippoo Sultan. The fortress occupies the W. extremity of the island and is a very extensive mass of building judiciously constructed. It was the work of Tippoo Sultan, assisted by French engineers, and was three times besieged by the British first in 1791 and afterwards in 1792 and 1799. On the last occasion the fortress was carried by assault; Tippoo himself being slain while fighting desperately together with 8000 men.

SERINGATIAM an island, Hinduistan prov. Carnate, opposite to the town of Trincomopoly where it is formed by two branches of the Cavery. At the W. extremity of the island, and at a short distance from the bank of the Cavery, is a celebrated pagoda, composed of seven square inclosures, with walls 95 ft. high and 4 ft. thick. Each inclosure has four gates facing the cardinal points, and is crowned by lofty towers, and the whole space enclosed by the outward wall is about 4 m. in extent. Within this area, besides the temple itself, a vast pile with a gilded gaudy cupola, are several regular and handsome streets, containing choultries, small temples, shops, and dwellings of the Brahmans. Europeans are not permitted to penetrate beyond the fourth inclosure, but the arch of the great choultry which they are allowed to ascend commands a good view of the whole. A boat half-a-mile from Seringati, and nearer the Cavery, is another pagoda of less extent, but considerable splendour. The whole island is well wooded and carefully cultivated, and the Brahmans derive their chief revenue from the offerings of immense numbers of pilgrims.

SERINO a town Naples, prov. Principato-Ultimo, 6 m. S. E. Avellino, on the S. Sabote. It consists of a number of distinct villages and has several churches, an abbey, monastery, military hospital, and manufactures of articles of ironware. Near it are the ruins of the ancient Sabote. Pop. 5000.

SERINO a river Italy Lombardy, issues from two lakes in the N. of prov. Bergamo; flows S. passing a little to the E. of the town of Bergamo, passes Crema, and about 8 m. below joins 1 bank Adde, after a course of about 70 m.

SERK, one of the Channel Islands. See BARR.

SERLE, a coral isl., S. Pacific Ocean, the highest in the low Archipelago lat. [S.E. point] 18° 21' S. lon. 157° 5' W. [is.] about 7 1/2 m. long, and 5 1/2 m. broad. The lagoon which it incloses is very narrow, and apparently shallow with several islands in the middle, but is without the smallest opening. There are some clumps of trees on the island. Inhabitants few.

SERMAATTA the largest of the Serway Islands, Indian Archipelago, off E. end, Minor lat. (E. end) 8° 22' S. lon. 129° 57' E. It is about 6 m. long, by 8 m. broad, lofty, mountainous, and precipitous towards the sea, and has only a few inhabitants, who cultivate roots and a little rice.

SERMAIDE a town and com. Italy prov. Roma lat. 42° 15' N. lon. 12° 15' E. with a court of justice several public offices, two churches, manufactures of leather, dye works and numerous mills. Pop. 5390.

SERMIONE or **SANONZA** a vil. Italy, Lombardy, prov. and 20 m. E. N. E. Brescia, on a peninsula which juts out into Lake Garda. It has a church, and near it are the remains of a villa, which belonged to the poet Catullus. Pop. 788.

SERNACILE two places, Portugal —1, (the *Aldea*), A. in par. prov. Douro, 3 m. from Coimbra. Pop. 1800. 2, (the *San-João*) A. in par. prov. Beira Baixa, about 60 m. from Lamea. Pop. 1615.

SERON, two places, Spain —1 A. in Andalusia, prov. and 20 m. N. Almarin. It has two squares, each provided with a public fountain, a courthouse and prison, a granary, a primary school, several hermitages and a parish church. The neighbourhood abounds with iron, lead, and copper, and in numerous places there are indications of ancient works for smelting these ores, at present there is only one iron-works, and one of lead. In 1546 a vein of nitre was discovered at the suburb of Angosto, and three works have been since erected there. There are also quarries of white marble, and of gypsum and lithographic stones, which bear a comparison with those of Munich, Lyons, and Bergamo, and blankets in considerable quantity, and earthenware are manufactured and there are one oil and 23 flour mills. Pop. 5461.—2, A vil. Old Castile prov. and 34 m. S. P. Burgos with a townhouse, primary school, and church. Pop. 900.

SERONGE a town Hinduistan, Ceilona a dominion, 142 m. S. Galle lat. 24° 5' N. lon. 77° 41' E. It is large and open, and has a town which appears to have enjoyed a prosperity formerly than now. The houses are built of stone, on an elevation of 4 ft. above the street. A large caravansary still remains having a double row of pillars, and walled all round.

SEROSKLERKE a vil. Holland, prov. Zealand, lat. Walcheren 5 m. N. Middelburg with a church. Pop. (agricultural), 892.

SEROS, a vil. Spain, Catalonia, prov. and 16 m. S. Leyrida, r. bank Segre. It has two squares, a courthouse, an eminent palace of the dukes of Medin Celi; a portion of which is used as a prison, a primary school, and a church. Manufactures of flax and hemp stuffs, and a flour and three oil mills. P. 2230.

SEROWITZ, or **SEROWITZ**, a market in Bohemia, circle and 25 m. S. E. E. of the town of an old ruinous castle, a church and hospital a saw and a worsted mill. Pop. 1612.

SERPA, a town Brazil, prov. Para on an isl. near 1 bank Amazon 240 m. S. W. Santarem. It was founded by a colony of converted Indians, transported, in consequence of attacks by their savage neighbours, first to the banks of the Amazon, and then to the island where they now live at peace with all their neighbours, collecting cacao, sarsaparilla, and cloves, and cultivating some cotton, coffee, and tobacco.

SERPA a town Portugal prov. Alentejo, 16 m. S. E. Beja, about 2 m. from 1 bank Guadiana. It is walled, has five gates, is tolerably well built, contains an elegant chateau, with fine gardens, two churches Latin school and hospitals and carries on a considerable trade, chiefly contraband, with Spain. Pop. 4600.

SERPENT, a river British America, formed by a chain of lakes considerably N. of Lake Huron, flows W. & W. for many miles, and falls into the N. channel of Lake Huron, about 80 m. W. of the Hudson Bay Company's settlement of La Cloche.

SERPENT ISLAND, or **ANNA** a small isl. Black Sea, about 80 m. S. E. the N. mouth of the Danube lat. 45° 15' 30" N. lon. 30° 14' 15" E. (n.)

SERPENTARIA (ant. *Serpentes Isernia*), a small group of islets, off S.E. coast, Isl. Sardinia. The largest, supposed to be the ancient *Colloides*, about 2 m. long, by nearly 1 m. broad, is a flat mass of granite, with steep sides. On the highest part it is a tower now used as a prison.

SERPENTIN or **SARAT-M-Hin**, a river, Asiatic Turkey, which branches off from the Tigris in the lower part of its course, at Kootal Hamarah, flows S. for about 100 m., and joins 1 bank Euphrates, by several mouths, near Arja, about 50 m. above Karna.

SERPHO an Isl. Greek Archipelago, one of the Cyclades, 70 m. S.E. Athens, lat. 37° 16' N., lon. 24° 30' E. It is nearly of a circular shape 7 m. diameter, and 30 m. circumference. It has a mountainous surface, and is so extremely rugged and steep, as to be unfit for culture, its products being principally confined to saffron and hay; but it possesses valuable veins of magnetic iron. It has two villages, one of the same name, with a tolerable port. Pop. about 1000.

SERPINS, a tn. and par. Portugal, prov. Douro, about 10 m. E. Coimbra. Pop. 1114.

SERPLCHOW a tn. in Russia, gov. and 57 m. S.W. Moscow. It consists of three distinct parts, one of which, called the Fort, is seated on a height surrounded by dilapidated walls. It contains 18 churches or chapels, and a quarantine establishment and has manufactures of sailcloth and leather, especially the latter, tile-works, paper-mills, a trade in corn, cattle, hemp, linen, tallow wax, and lumber and two important annual fairs. Pop. (1850) 32,190.

SERRA, several places, Naples particularly. — 1 (*Crociolo*) A tn. prov. Capriata, N.W. San Severo, on a hill between the Fartore and Esomone. It has eight churches, two convents an hospital, and an almshouse. Pop. 4000. — 2 (*St. Stefano del Bosco*) A tn. prov. Calabria-Ultra 1) 11 m. S.E. Monteleone, near 1 bank Anulone with two churches, a Carthusian monastery, and two saw mills. About 1 m. S.W. is the strong castle of Stefano-del-Bosco. Pop. 3000. — 3, (*Monacene*) A tn. prov. Abruzzo-Citra, S.W. Chieti on a lofty height near 1 bank Alento with two churches and an hospital.

SERRA a vil. and com. Italy Lombardy div. Guncio, near the top of Mount Giovi above 1 bank Bico. It is poorly built, but has a finely-situated church. Pop. 2239.

SERRADILLA (La) a tn. Spain Estramadura, prov. and N Coeres, with a townhouse, prison two primary schools, a palace, formerly belonging to the nuns a church, and a convent of Augustine nuns. Near it are several hermitages. There are manufactures of linen, an oil and eight flour mills. Pop. 2565.

SERRAMANNU, a vil. and com., Isl. Sardinia, div. and 16 m. N.W. Cagliari, 1 bank Manna, on the plain of Ippia, which, though fertile, is very unhealthy. It has a trade in corn. Pop. 1832.

SERRANOS, a vil. and par. Brazil prov. Minas-Geraes on the road from Rio-de-Janeiro to São-João-del-Rei, with a church, built of stone, and a paragon.

SERRASTRETA A tn. Naples, prov. Calabria-Ultra II, 6 m. N.E. Anastro at the extremity of a valley, r. bank Lemato. It has seven churches, and quarries of a stone which resembles marble. Pop. 3200.

SERRAVAL, a vil. and com. France, dep. Savois prov. Genevois, 6 m. S. Thonay with a church a trade in timber, and a gypsum quarry. Pop. 1732.

SERRAVALLE, two places, kingd. of Italy. — 1 A tn. gov. Venice, prov. and 24 m. N. Treviso, on the Meschio. It contains an extensive market place a cathedral and several other churches, two nunneries, an educational establishment, and an hospital, and has manufactures of woollens, silks and paper, and a trade in wine, corn, and honey. Pop. 5340. — 2, A vil. and com. gov. Milan, prov. and 3 m. N.W. Desio, 1 bank Po, with two churches and three chapels. P. 1897.

SERRAVALLE a tn. Italy Piedmont, div. and 32 m. N.W. Genoa, 1 bank Scrivia, has crossed by an ancient and handsome bridge of arches. Its former walls were demolished recently, many of the buildings have been much improved, and the town has assumed a modern appearance. In its centre is a square, in which the parish church stands; and on a neighbouring height there is a Capuchin convent. Pop. 2224.

SERRAVALLE a tn. Emilia, and com. Italy Piedmont div. Turin, prov. and 14 m. E. N.E. Biella, r. Bank Sesia. It has a handsome church. Pop. 1023.

SERRE, a river France, rises in N.W. of dep. Ardennes flows W.S.W. enters dep. Aisne, and joins 1 bank Oise, a little below Le Fère total course, about 40 m.

SERRE (La), a tn. Naples, prov. Principato-Citra, S.E.E. Campagna, near r. bank Calore. Pop. 2460.

SERREJOY, a tn. Spain Estramadura, prov. and 33 m. N.E. Coeres, on a rugged height above r. bank Tago; with a church, a concourse, endowed school, several oil and flour mills, and a trade in oil and wheat. Pop. 1095.

SERREHAGLER or **SERREAGUER**, a tn. Hindoostan prov. Gundwana, 180 m. N.N.E. Nagpore. The Nagpore rajah's troops were defeated here in 1818.

SERREYRE, a vil. and com., Isl. Sardinia div. and 17 m. N.W. Cagliari. Pop. 1515.

SERRIY, a tn. Russian Poland, on the Peers, which issues from Lake Dnieper, and falls into the Niemen 40 m. N. Grodno. It has a Protestant and a B. Catholic church and a synagogue. Many of the inhabitants are Germans. Pop. 1694.

SERRIERES — 1 A tn. France dep. Ardèche, r. bank Rhone, 41 m. N. Privas with a considerable trade in timber. Pop. 2038. — 2 A vil. and com. Sardegnan States prov. Savoy Proper 15 m. W. Annecy. Pop. 1118.

SERRITO or **SAGUINHO** a tn. Brazil prov. São-Pedro-Rio-Grande, 76 m. S.W. Rio-Grande with a church and a trade in cattle. Pop. (dist.) 3000.

SERRO or **VILA DO FORTU** a tn. Brazil prov. Minas Geraes situated partly on the E. acclivity and partly on the summit of a hill nearly 3000 ft. above sea-level 140 m. N.W. Ouro-Fruto. It is built in the form of an amphitheatre; the principal streets, which are ill paved extending horizontally along the hill from S. to W. and crossed by a few minor streets which are short and steep. The houses being almost all white-washed, and provided with a garden behind, have a pleasing appearance when seen from a distance but they are in general poorly built. There are five churches none of them of much architectural merit and an old school-house, outside the town, which has been converted into an hospital. The soil of the district is fertile, and produces a great deal of cotton, sugar and millet. Gold of fine quality, and precious stones, including diamonds, are found within it. A great fall of meteoric stones, preceded by a loud noise, took place here in 1845 and broke almost all the tiling of the houses. The shower lasted about a quarter of an hour and some of the stones weighed from two to three pounds. Pop. (tn) 4000, (dist.) 28 678.

SERET or **ISARD** a tn. Asiatic Turkey, pass and 30 m. P. Dardanel in the midst of a large mudflung plain, with out a single tree. It is about 2½ m. in extent, inclosed by a wall of stone and lime, with round and square bastions, but destroyed in many places, and without any ditch. A great part of the space inside the wall has no buildings, and the city is said not to contain more than 1000 houses of Kurds, Armenians, and Christians. There are three large mosques and several small ones. Two churches five baths, and one casa vanary. In the vicinity of the town melons, cucumbers, &c. are extensively cultivated. Pop. about 5000.

SERVAN (St.) a resort, France. See MALO (St.)

SERVAIA (Selavone *Servia*, German, *Serben*, French *Serbes*), a principality Turkey in Europe, forming anciently a part of Moesia, lat. 43° to 45° N. lon. 19° 20' to 22° 50' E. bounded N.W. by the Save, separating it from Austria and N.E. the Danube separating it in the former direction from the Banat of Hungary and in the latter from Walachia, P. Bulgaria S. Mounts Argemaro or Rernan, and Ghubotic, forming a continuation of the Balkan, and separating it from Macedonia, S.W. Albania and W. Bosnia, from which it is separated towards the S.W. by the Ibar, and towards the N.W. by the Drav greatest length, S.E. to N.W. 340 m., breadth, in the S. about 95 m. and in the N. about 160 m. area, roughly estimated at 20,000 sq. m. The surface has a general slope towards the N., but is on the whole very mountainous, being traversed by ramifications of three great mountain-chains—those of the Carpathians in the N.E., of the Balkan in the E. and S., and of the Dniepr Alps in the W. The summits are often below 2000 ft., and seldom exceed 3000 ft. except on the frontiers,

where a height exceeding 4000 ft. is attained. Many narrow and several wide valleys stretch back from the mountain ranges, and in the flatter parts of the principality particularly near the centre along the banks of the Morava, and in the N. along the banks of the Save and Danube some considerable plains occur. In the S. the prevailing rocks are composed of gneiss and micaceous and chlorite schists, with occasional outcrops and interstratification of granite, diorite, porphyry and serpentine. The cratonic system is very largely developed both in the E. and W. and comprises the larger part of the surface. Tertiary and alluvial formations occur partly in the S., and more extensively both in the centre, on the banks of the Morava and in the N.W. on those of the Save. The minerals include argentiferous copper lead, and iron. The first occurs particularly in the N.E. and was long extensively worked at Maidanpek, where it at one time employed 25 furnaces; the second occurs also chiefly in the N.E., at Tunda and Lonka, where are seen many ancient mines of galena worked in veins between the schists and mica-schist, and it has also been partially worked in the W. and S.W. Iron is pretty generally diffused but is not often workable. In ancient times silver was worked in the N.E. at Kotohamb and there are still some gold-washings on the banks of the Timok and Pek. The climate of Servia is somewhat rigorous in the more mountainous parts, and very mild in the valleys and plains, especially those open to the S., and sheltered by hills in the N. In spring the trees put on their leaves from the 15th to the 30th April. The winter temperature ranges from 6° to 14° Fahr., and in extraordinary seasons has sunk to -2 and -6° Fahr. Changes of temperature are both frequent and great. The vegetation is vigorous both in the mountainous districts and in the lower grounds the former being generally covered with forests of excellent timber trees among which, where the elevation is not very great the walnut is conspicuous and the latter being generally covered with a fertile soil, well adapted for the ordinary and several of the finer fruits for the vine for cotton in the warmest spots, and for tobacco, rose maise, hemp, flax and the common cereals in almost every quarter. The whole surface belongs to the basin of the Danube which receives the drainage partly directly and partly by the frontier rivers Save, suggested by the Drin and the Timok, but most of all by the Morava, which, besides flowing in a main stream from the centre of the principality to the Danube, receives two large branches under the names of the F and W Morava, and is fed by numerous affluents in the whole line of its course. Many of these streams might be turned to valuable account both for agricultural and manufacturing purposes, but almost every branch of industry is in a backward state. Trade, which has the assistance of great navigable rivers ought to be extensive but the advantages offered by nature are too often frustrated by myriads of rapids and logs, and as yet the most important article of export as regulations which grow up in vast numbers, almost without care or expense, on the coast of the forest. Servia while acknowledging the supremacy of the Porte, and paying it an annual tribute of £200,000, is governed by its own prince, and virtually independent. In form the government is a hereditary monarchy in which the prince or *kaiser*, sets in connection with a senate or *oblastov*. For administrative purposes it is divided into 19 districts or *kajaks*, subdivided into lordships or *kraschins*, and communes or *areoses*. The inhabitants consist almost entirely of Serbs who are of Slavonic extraction, speak what is considered the softest of all the Slavonic dialects, have good physical forms, somewhat stouter but less elegant than those of the Greeks are less remarkable for intellect than for firmness, courage, benevolence, and generosity, and are in general ardently attached to the Greek church, which has three archbishops and numerous convents within the principality. Belgrade is nominally the capital, but the prince and leading authorities reside and hold their courts in Krashovatz or Krashovatz, otherwise called Aladjahlija; other principal towns are Bimendria, Nova, and Pristina.

Austria had gained possession of the N. part of Servia by the peace of Passarowitz in 1718, but the whole returned to Turkey by the peace of Belgrade in 1739. In 1801, the severity and various abuses of the Turkish governors caused an insurrection headed by George Petrovitch, better known as Kara or Terny George, Black George. Aided by Russia,

he obtained important concessions, and Servia was placed under its own internal management, and a Russian protectorate in 1806. In 1808 George was formally recognized by both the Porte and Russia as *izam* or prince, and the synod or assembly of the states, removed from Semendria to Belgrade, drew up a new constitution. In the war which broke out between Turkey and Russia in 1809 George and his Servians strenuously supported the latter, but met with a rather ungrateful return. Napoleon's invasion in 1813 naturally made Russia desirous to be able to meet it with her whole force, and she therefore listened to emoldo peace with Turkey on terms in which the interests of her Servian ally were rather unscrupulously sacrificed. The Turks were to treat the Servians mildly and proclaim a general amnesty; but the Servian fortresses erected during the war were to be dismantled, and the others given up. The Servians, greatly irritated, endeavoured by negotiation to obtain some modifications of the treaty and in 1813 when this failed, resumed the war. The Turks proved victorious, but used their victory with a barbarism which provoked a new insurrection, headed by Milosh Obrenovitch, who, by a treaty in Dec 1815, secured a kind of independence for Servia, only modified by a Turkish supremacy. Milosh governed the country with considerable vigour, not unmixt with severity, and in 1827 was declared by a general assembly hereditary prince. He also caused a new constitution to be drawn up, but in 1835 when it was attempted to give practical effect to it Austria, Russia, and Turkey all united in opposing it, on the ground of its liberality and succeeded in substituting for the popular a strong aristocratic element. The senate in which this element was embodied proved too strong even for Milosh who had incurred its displeasure. He was accordingly obliged to abdicate in 1839, and was succeeded by his son Milan, who dying a few days after made way for his brother Michael. In consequence of a new insurrection, which he endeavoured in vain to suppress, he was obliged to flee, and an assembly of the people in 1842 conferred the sovereignty on Alexander Petrovitch a grandson of the Black George mentioned above. He took the name of Alexander Georgevitch, and though he had many intrigues both foreign and domestic to contend against, more especially on the part of Russia, who found him a less obsequious tool than Milosh and his descendants he has (1854) managed to maintain his position, and distinguish himself by a prudent and enlightened administration. Pop. estimated at about 900,000.

SERVIAN a. vi. France dep. Herault, 7 m. from Beziers with an ancient castle, and a brandy distillery 1 1833.

SERVATTY, or SERVATTY LAKATA, a chain of hills. S. Ponds between the N.E. extremity of Timor and the S.W. end of Timor-Laut, they lie nearly in a straight line, on the parallel of 8° 20' S., and between lon. 127° 50' and 129° 0' E. and are five in number, namely, Leticee or Leti, Moa, Lakor Suan, and Sertanata (which see).

SHASHEKE a. to S. Africa, on river of its name, lat 17° 26' S., lon 26° 50' E. At the town the river flows S. by E. and has a breadth of 400 yds. to 500 yds. It overflows its banks annually, inundating the country to the extent of at least 15 m. from its usual channel. Above the town are a series of rapids and about 80 m. below there is said to be a waterfall. The natives are reported to have ascended the river for 400 m. above the town. (Livingston and Oswell's *Journey* in 1851, in *Four Voy. Voy. Voy.*)

SIBIA a river Italy which descends from the S. side of Mount Rosa in the Pennine Alps flows first S.E. to Varallo then N.E., passing near Verocelli and joins the bank Po by two branches about 5 m. below Casale total course nearly 100 m. A canal leaving the Poiss near Verocelli, and terminating at Ivrea, connects it with the Dora-Baltea. It is subject to frequent inundations.

SLESKAIE, or SLESKAIE, in Russia, Gulf of Finland about 50 m. W. Cronstadt. It consists chiefly of a limestone hill, partially covered with soil, but has good roads, where vessels of war can anchor in safety a large quarantine establishment, and a lighthouse erected on its N.W. extremity.

SLESKINA, par. Iral. Waterford, 16,983 ac. P. 2682.

SERMA, a. to Spain, prov. Navarra, on the side of a hill, 39 m. S.W. Pamplona, with a handsome church with a lofty tower, a primary school, manufactures of articles in capricio, and several oil-mills. Pop. 1090.

SESSA a tn Naples prov Lavoura, 17 m E Gaeta. Is a poorly built, but is the see of a bishop. has a handsome cathedral, five parish churches, several convents, a seminary, hospital, orphan asylum, and several other beneficent establishments, and a very important weekly market. It was founded by the Anconit-Aureanus, and afterwards became a flourishing Roman colony, under the name of Sessus-Aureanus. Numerous Roman remains still exist in the town. P 4000
SESSAT, par Eng York (N Riding); 6866 ac. 1 478
SESTINO (Latin, Sestinus) a vil and com. Tuscan prov Arezzo, between the Foglia and the Semino, each of which is here crossed by a bridge, 51 m. E. Florence. It contains a church, a school, and a very ancient castle, and has a trade in chestnuts and wood. Pop. 2374.

SESTO a vil and par Tuscan comp. and 6 m. N W Florence with a church, a school and a trade in corn, wine and oil. Pop. 8706.

SESTO several places, Italy Lombardy gov Milan particularly — 1 A vil and par prov and 6 m W Cremona, with a castle and a church. The district is famous for its fax. Pop. 3062 — 2 (Calende) A vil and com Milan, on S extremity of Lake Maggiore where the Ticino issues from it. It has two churches, manufactures of linen and glass, a weekly market, a small harbour, and a considerable trade. The situation is unhealthy. Pop. 2217 — 3, (de Monca or San-Giuseppe) A vil and com prov and 6 m. N N E Milan on the Lambro, and on the railway to Monza. It contains two churches. Pop. 8179

SESTIA a river Russia, gov Tver, an affluent of the Dniepr total course, 60 m. A canal between it and the latter, is intended to connect the Volga and Moskva.

SESTRABLIK a market to Russia, gov and N W St. Petersburg on the Gulf of Finland. It has extensive iron and other government works, at which anchors, firearms, and various articles in iron copper and brass are extensively made.

SESTRI two places Italy, Piedmont, div Genoa — 1 (de Levante) A seaport in, prov (Lavoura) on the gulf and 28 m. E.S.S. city of Genoa. It is beautifully situated on a peninsula, defended by two castles, which occupy its highest summits, and by two batteries almost on a level with the water. The N side of the peninsula forms a small and not very secure harbour, overlooked on one side by the ruins of an ancient castle and the other by a Capuchin convent. The principal edifices are eight parish churches, one of them large and handsome an old convent, new used as a school and an hospital. The coasting trade is considerable, and there are quarries of marble. Pop. 4846 — 2, (de Ponente) A seaport, tn, on the Gulf of Genoa, near the mouth of the Chiavari, 6 m. N W W Genoa, on a terrace, among gardens, which both rise behind it and slope down to the shore. It has five churches, two convents, and two handsome villas. Pop. 7377

SESTU, a vil and com. Ist. Sardina, div and 6 m N Cagliari on a fertile but unhealthy plain. 1 op 1181

SEICHELY, par Eng. Norfolk 780 ac Pop 96

SETE-LAGOA a collection of lakes, Brazil, and so called from their number—seven They are situated on the N top of the Serra-da-Melguedra, prov Mato-Grosso in lat. 18° S, and are of considerable depth, and are the sources of the Paraguay

SETEVIL DE LAS-ROSAZAS, a tn Spain, Andalucia, prov and 71 m. S. N E Cadix, on the Guadalete, here called the Guadaleporen, and crossed by two bridges. It has a church, co-cathedral, and primary school several oil and four mills, and a trade in agricultural produce. Pop. 1871

SETIF (anc Settipa) a tn. Algeria, prov and 69 m E N E. Constantine, on elevated ground, in the midst of beautiful and highly cultivated plains, with a military chapel, several brick and tile works, and two corn mills. Pop., exclusive of the garrison 500

SETIGNANO a vil and par Tuscan 4 m. from Florence, with a large and handsome church. 1 op 1509

SETSKA a tn Bohemia circle and 11 m E W Chrudin, with a castle, a very ancient church and school, and many factories of muslin and cotton. Pop. 1085

SETTA, a tn, W Africa, Delahomy, about 80 m N N E. Albany. It is surrounded by a clay wall, about 7 ft. high and 3 ft. thick and has manufactures of earthenware. The soil of the surrounding district is a rich clay loam and various kinds of corn are grown in abundance, ginger is also cultivated. Pop. about 9000

SETTALA (anc Setipora) a tn and com. Italy, Lombardy prov and 9 m E Milan, in a large and fertile plain, between the Adda and the Lambro. It has a church, and the remains of an old castle. Pop. 1184

SETTEFRAIA a tn Naples, prov Lavoura, 13 m E S E. Sora, on a hill. It consists of two villages, situated close to each other and containing four churches. Pop. 3100.

SETTEVELA, a vil and com France, dep Haute-Savoie not far from Faverges. It has iron works, supplied from mines in the vicinity and manufactures of agricultural implements. Pop. 1040

SETTIMO a vil and com Italy Lombardy prov and 6 m N W Milan with a church. Pop. 1852

SETTIMO (PIRELLA-SAN-GIULIANO), a vil and par Tuscan, about 6 m W Florence, in the centre of a beautiful plain near I bank Arno. It has a large, and ancient church, and manufactures of refined wax. 1 op 1860

SETTIMO-PONINSE, a vil and com Italy Piedmont, div and 6 m N W Turin on the Bagnal near I bank I. o. It is an ancient but well built place, and has a church and a public school. Pop. 3115

SETTIMO TORINESE, a tn Italy Piedmont div Turin, prov and 6 m N by W Ivrea, on a hill near I. bank Dora Baltea. It has a court of justice a number of handsome houses lining the public road and five churches. Pop. 1651

SETTIMO a vil and com. Ist. Sardina, div and 6 m N E Cagliari on an unhealthy plain. Pop. 1840

SETTIAGIANO, a tn. Naples, prov Calabria-Ultra II, 5 m W Calabrese on a little hill. The chief employment is the rearing of silk worms.

SETTLE a market in England and 49 m. W by N York, on the Ribbles at the foot of a limestone-precipice which rises immediately behind it to the height of 200 ft. and on the railway from Leeds to Lancaster. It consists of one principal and several minor streets substantially built, but not well kept and has a district church in the later English style a handsome townhall with north-west, assembly rooms subscription-library and newspaper attached. Friends Primitive and Wesleyan Methodist chapels, a dissenting and mathematical academy, a national school, several large cotton-factories, a ropery and paper-mill, a weekly market, and several important cattle-fairs. Pop. (1851) 1978

SETTRINGTON, par Eng York (E Riding), 5540 ac. Pop. 825

SETTUBAL a tn and seaport, Portugal prov Alemago, near r bank Sado which here falls into a bay of same name and forms a capacious harbour, 20 m. S.E. Lisbon. It stands in a fine valley is surrounded with walls partly in a ruinous state, and of no use for defense, as they are completely commanded by adjoining heights. On some of these, however, a castle and two forts, constituting the real strength of the place, have been erected. The houses in general are well built, but the streets are narrow crooked and ill cleaned. The principal buildings are four churches, two superior schools for classics and science, and two hospitals. The harbour though large is difficult of access being much encumbered by sandbanks, but the trade is very considerable, and gives the town in respect of commercial importance, the first place after Lisbon and Oporto. The principal exports are cork, wine, oranges, citrons and alkali; the last most extensive. Settubal is a place of very great antiquity, some Portuguese authors gravely ascribing its foundation to Tubal the fifth in descent from Noah. It suffered very much from the great earthquake in 1755. There are a number of ancient remains in its neighbourhood. Pop. 15,201

SETZDORF a vil Austrian Silesia, circle Troppan about 25 m from Zukmantel with manufactures of potash, several bleachfields, a saw and other mills, and numerous limekilns. Pop. 1510.

SETZINGEN a vil. Hanover prov Hildesheim, bail and near Understadt, with a church and a market. P 1800.

SEURR (anc Seurragum), a tn France, dep. Otd-d'Or in a magnificent plain, I bank Saône, here navigable, 24 m S Dijon. It has a handsome townhouse, an ancient church and a chateau, surrounded by a park which furnishes an excellent promenade, manufactures of shawls building-docks, at which numerous barges are constructed, tanneries, oil-works, and mills, and a considerable trade in corn, hay wood, charcoal, and common wine. Pop. 3867

SEVAN a lake, Russian Armenia. See **GEORGIEN**.
SEVANIA, a lake, Russian Armenia. See **GEORGIEN**.
SEVASTOPOL, or **SEVASTOPOL**, the great naval station of Russia in the Black Sea, gov. Taurida, near S.W. extremity (rises 190 m S.E. Odessa, 540 m N.E. Constantinople); lat. (church) 44° 31' 54" N lon. 33° 29' 30" E. (a.) It occupies part of a considerable peninsula, E side of the excellent roadstead of same name, rising from the shore in the form of an amphitheatre, and consisting of a number of tolerably well built streets, which either stretch S. in parallel rows, climbing a steep acclivity or transversely E. to W. The principal street, situated along the harbour which is immediately E. of the town, is lined with houses of two stories many of the others, though only of one story being white-washed have a clean and cheerful appearance. The principal buildings, not naval, are two churches, the one handsome, and the other in the forest, from having been erected by Vladimir the first Christian czar, out of the remains of the ancient cities of **Chersonesus**. The roadstead and harbour and the extensive establishments connected with them are by far the most important features of Sevastopol. The roadstead entered from the W. stretches E. for about 3½ m., forming a deep hollow between lofty limestone ridges, which completely shelter it both on the N. and S., from which the prevailing winds blow. Its breadth at the entrance is about 1500 yards, immediately widening out to about 1 m. and again diminishing till not more than 600 or 700 yards at its head. The average depth at the entrance and for some distance within, is 10 fathoms, but afterwards shallows E. to not more than 4 fathoms. The harbour proper is a creek, which opens from the roadstead,

and stretches S. along the E. side of the town. It is above 1½ m. long and at its entrance, 400 yards wide. In addition to its natural advantages, it has had all the improvements which art and unbounded expenditure could give to make it complete. The admiralty arsenal and public offices, are on the W. the hospitals, barracks and magazines, mostly on the E. side of the harbour. Toward the land side, no defences appear to have been thought necessary but both the roadstead and harbour are protected by three batteries of the most formidable description. Two of these, called **Constantine** and **Alexander**, defend the entrance of the roadstead, one being situated on each side of it; the third, called **Nicholas**, is situated in the haven itself, fronting the town. These batteries, which, according to some are of the most perfect, and according to others, of very indifferent construction, could bring 1400 guns to bear upon any fleet attempting to force a passage. The dry docks of **Sevastopol**, and its fine chaises, tempered in summer by cooling breezes and in winter by sheltering hills make it extremely healthy. Its greatest disadvantage as a naval station is the abundance of the sea-worm *Teredos* murex. Up to 1780, when the first stone of the new fortress and arsenal was laid, **Sevastopol** was a mere Tartar village named **Akhmar**. Pop. 40,500. (See Supplement.)

SEVELLAN, or **SEVILLAN**, a lofty mountain, Ferde, prov. Amerígas, 70 m. E. Tabasco, lat. 38° 15' N; lon. 47° 57' E. estimated at nearly 18,000 ft., and apparently an extinct volcano, though no remains of a crater are now visible. The rocks close by are decidedly volcanic, and extensive beds of lava are to be seen on the S. side. The mountain terminates in four distinct peaks or summits, to closely resembling each other as easily to be mistaken at some distance. All round the base are hot springs, but not of a higher temperature than 104°.

SEVEN BROTHERS, or **SEVEN-FRAMES**, a group of seven islets, off N. coast, Hayti, N.W. Monte Christi. They are low and covered with mangroves; one of them, called **Monte Grande**, is distinguished by having high trees upon it.

SEVEN ISLANDS, various island groups—1 Indian Archipelago off N.W. coast, Celebes, about lat. 0° 38' N lon. 118° 40' E. (a.); they are flat, low and woody, not easily distinguished unless when near them, except the outermost, called **North Warbur**—2, (Tapos), Indian Archipelago, off S.E. coast, Sumatra, between Banks and Langens, the most N.W., m. lat. 1° 8' S, lon. 105° 24' E.—3, Caroline's Archipelago about lat. 5° 45' N lon. 157° 30' E. (a.)—4, France. W. coast, dep. Finistère lat. 48° 58' 48" N lon. 8° 29' 15" W (a.)—5, British V. America, Gulf of St. Lawrence, lat. 50° 5' N, lon. 68° 18' W (a.)—6, Lapland N. coast lat. 65° 45' N; lon. 87° 30' E. (a.)

SEVENFOLDEN or **SEVENFOLDEN** a vil and com. Belgium, prov. F. Flanders, 8 m. S.W. Ghent, with manufactures of linen, woollen and cotton, starch, candles, tobacco, &c. a brewery, and several flour-mills. Pop. 3178.

SEVENHAMPTON, a par Eng Gloucester 2800 a. P. 558.
SEVENOAKS, a market tn. and par England, co. Kent, 21 m. S.E. London. The town lies on an eminence is tolerably well built, and lighted with gas, has a head and some spacious church with a lofty square tower two chapels one Wesleyan and two Baptist places of worship, an endowed grammar-school founded in 1418 a second endowed and several other schools a large range of almshouses and an old market-house. Pop. 1860. Area of par 8000 a. 1 of 4578.

SEVER HIMAL, or **SEVUS HIMAL** a m. Andalus Turkey, pass Anatolia, on a rocky slope over looking an extensive plain 70 m. S.W. E. Kutaya. It is defended by a castle perched on a rock, and has a small but very ancient Armenian church. From the fragments of marble columns and cornices seen in its vicinity, it is supposed to occupy the site of the ancient **Arachia** or **Arachia**.

SEVER (Sw), a tn. France, dep. Landes, 1 bank Adour, 40 m. S.W. Bayonne. It is well built, has a court of first resort, a beautiful church which formerly belonged to a celebrated abbey a courthouse, a communal college, hospital, manufactures of glassware, oil-works, tanneries, and a trade in corn, wine, brandy, lithographic and other stones. P. 2187.

SEVERAL, or **SEVERAL-LE-CHAPEL**, a poorly-built tn. France, dep. Aveyron, on the side of a steep conical hill crowned with the ruins of an ancient castle, 37 m. E. Rodez. The castle long remained in the possession of the Albigeois and was one of their most important strongholds. Coal is worked in the neighborhood. Pop. 1068.

SEVERINA (Rusa) a tn. Naples, prov. Calabria-Ultra II, 15 m. W.N.W. Cotroneo, on a steep rock near r. Bank Neto. It is defended by a strong castle, is the see of an archbishop, and has a cathedral and a seminary. Pop. 1000.

SEVERINO (San) two tns Italy—1, a tn. Italy, deleg. and 14 m. W.S.W. Macerata, r. bank Potenza, the see of a bishop, with seven monasteries and three nunneries. Pop. 1880.—2, A tn. Naples, prov. Basilicata E.S.E. Lago Negro, with a church and two chapels. Pop. 2200.

SEVERN after the Thames, the largest and most important river in England, formed by the union of two small streams, the Havren and Clevedon, which descend from the W side of Mount Pininfone, and unite at Llandiloe, in the S of Montgomeryshire. Flows N.E. through the S part of that county, past the towns of Newton and Welshpool to the W borders of Shropshire and then E to Shrewsbury, which it nearly enters. From Shrewsbury a little below which it receives the Tern on the left, it flows directly S.E. through Coalbrookdale, past Bridgnorth to the N.W. frontiers of Worcestershire, which it enters at Bewdley, and then proceeds nearly due S through that county, passing the town of Worcester, and receiving the Teme on the right a little below it. At Tewkesbury on the borders of Gloucestershire where the Upper Avon joins it on the left, it begins to flow S.W., passes the town of Gloucester, makes several remarkable windings, begins to become a great tidal river, and after forming a broad estuary, in which it receives the Wyre, a little below Chepstow on the right, and the Lower Avon, about 8 m. below Bristol on the left, falls into the Bristol Channel. Its whole length is about 210 m., and its basin has an area of 8580 sq m. It begins to be navigable at Welshpool, about 178 m. above its mouth, and 235 ft. above sea-level. Vessels of 80 tons can ascend to Coalbrookdale of 60 tons to Bewdley bridge, of 80 tons to Worcester and of 110 tons to Gloucester. Below the last its navigation was much impeded by shoals and windings. But the inconvenience has been removed and a great additional advantage gained by the construction of a canal from Gloucester to Berkeley pier from 70 ft. to 90 ft. wide, and 15 ft. to 18 ft. deep and fit, consequently for vessels of 850 tons. The other canals are the Thames and Severn, with a Stroudwater branch bringing these great rivers into direct communication. The Gloucester and Ludbury, the Worcester and Birmingham, the Staffordshire and Worcestershire, opening into the Birmingham and Liverpool junction, the Birmingham, and the Shrewsbury. The traffic of the Severn, which has always been important, has in recent times been greatly developed by railroads, which have enabled it to command a large share of the commerce of Birmingham and other large towns in Warwickshire, Staffordshire, &c. The fish of the Severn include numerous varieties, but the fisheries are not of much importance. Salmon, once abundant, have become scarce. In the commencement of its course the valley of the Severn is narrow, but below Llandiloe it gradually widens out, forming a wide celebrated for their beauty and fertility. Below Gloucester the banks become so low, that destructive inundations have not infrequently occurred. These have been partly caused by one of the most remarkable features of the river its bore, which brings in the tidal wave with a loud noise, and a head of 4 ft. or 5 ft. Another very remarkable feature, closely connected with the former is the height of the tides, which at the mouth of the Avon sometimes exceed 43 ft., and at Chepstow attain even 60 ft.

SEVERN, several rivers, N. America.—1. U. States, Maryland, on an affluent of the Chesapeake, a little below Annapolis.—2. U. States Virginia, falls into Chesapeake Bay lat. 37° 28' N. lon. 76° 37' W.—3. British N. America, falls into Hudson's Bay; lat. 56° N. lon. 88° W.—4. Upper Canada, runs from Lake Huron to Lake Huron.

SEVERN-STONE, par. Eng. Worcester, 8989 ac. Pop. 728.

SEVERNDROOG.—1. A small rocky isl. Indian Ocean on the Cochin coast, Hindoestan lat. 70° 46' N.; lon. 78° 18' E. Being considered healthy, it has been selected as the site of a convalescent hospital for the European garrison of Bombay. It was formerly the stronghold of a celebrated Mahatta pirate, and was captured by the British in 1768.—2. A strong hill-fort in the Mysore territory 90 m. W. by S. Bangalore, lat. 12° 55' N. lon. 77° 30' E. The base of the rock on which it stands is 5 m. or 10 m. in circumference. From this base a prodigious mass of granite rises perpendicularly to an immense height, and nearly precipitous on

which are the fortifications. This stupendous fort, however, is no less notorious for its pestilential atmosphere than for its great size and strength.

SEVERNOL DOWRY, a river, Russia. See DOWRY.
SEVERO (San) a m. Naples, prov. Capitanata, 89 m. E. N. E. Campobasso. It is a large and tolerably well built town, and contains a cathedral, three parish churches, four monasteries, a summary seminary, and hospital. In 1663 Robert Guiscard gained a signal victory here over Pope St. Leo, who was taken prisoner. Pop. 16,640.

SEVISO a vill. and com. Italy Lombardy prov. Milan on a torrent of same name. It has a parish church and a diocesan seminary. Pop. 1689.

SEVILLA [Spanish, *Sevilla*] a prov. Spain, Andalusia which, together with those of Cadix and Huelva, constitute what was once the kingdom of Seville. It is bounded N. by prov. Badajoz, E. Cordova S. Malaga and Cadix, and W. the Atlantic Ocean and Huelva areas, 5800 sq m. In summer the climate is excessively warm, the thermometer ranging from 69° to 100° in the shade and in winter the cold very rarely descends to the freezing point even in the morning and at mid day it is in general not lower than 45 to 60°, so that frost and snow are almost unknown. The greater part of this province consists of plains of great fertility which produce all kinds of cereals, seeds, vegetables, oranges and other fruits, wine, oil, liquorice wood, tobacco, hemp and flax, but it has also hills of considerable elevation, the highest peaks of the Sierra Morena being within its limits, as well as the Sierra de Baza. Considerable numbers of sheep, whose wool is much esteemed, goats, swine, and horned cattle are also reared, but above all horses. The province is divided into two nearly equal portions by the Guadalquivir, and it is besides watered by the Genil, Corbones, Guadaira, and other streams. Among its mineral treasures are iron, silver, lead, and copper and coal is found in the Sierra Morena, limestone in that of Baza, and plastic clay in the basin of the Guadalquivir. As this is essentially an agricultural province and the inhabitants in general obtain readily the necessaries of life, and even some of its luxuries, a manufacturing industry has not hitherto flourished here, being confined chiefly, with exception of the silk factories of its capital, to coarse woollens, ordinary linens, paper, earthenware, cast iron, soap, extract of liquorice, leather and brandy as well as oil and flour mills in considerable number. The chief articles of export are wheat, barley oil, olives, wool, oranges, liquorice wood, soap, and copper. Education is here in a state of abundant neglect, the number attending the primary schools being only 1 in 29. Pop. 430,000.

SEVILLE [Spanish *Sevilla*, Italian *Sevilla*, the *Hispania* of the Romans] a city Spain, cap. above prov. and once

PLAZA DE LA CONSTITUCION SEVILLE.—From Chapel, J. Rogers.

cap. of Spain the chief city in Andalusia, and the see of an archbishop, 242 m. S.W. Madrid, and 63 m. N. N. E. Cadix, 1. bank Guadalquivir, which flows along the arc of its irregular circumference. The city proper is about 5 m. round, but if the suburbs are included the circumference is more

than 10 m. The former is included in Moorish walls, which towards the side of Cordova are the most perfect in Spain, and they have 166 towers and 15 gates. The winter here being very wet, the lower part of the town is often flooded by the river but the streets are provided with *malacanas* a sort of hatches which are then shut down and keep out the water. The houses are in general three stories and elegantly and substantially built of baked brick, with thick walls and good interval arrangement. The long economy of the Moors in this part of Spain, is in great measure the reason why the squares are small, and many of the streets narrow and crooked. Wider streets, however, are gradually taking the place of these, and in some quarters, there are many that are both long and broad. Most of them are paved with pebbles, and a few with flags, a yard broad. The two parallel streets de-la-Sierpe and Francos are the broad and the gentle streets of Seville, and that of Genoa the Paternoster Row in the heart of the city is the great square. Plaza-de-la-Constitution—this forum, the place of gossip and of executions. It is a very Moorish and picturesque with its balconies and its arched, under which are the jewellers' shops; and it contains a fountain, perhaps the best in the city. Altogether Seville contains about 80 public fountains, rather scantily supplied with water but there are besides, numberless others in public institutions, unpressed or existing courtyards, and private houses, and all are supplied from two sources, the Calles-de-Carmos, a Moorish aqueduct of 410 arches, constructed in 1172 and the Puente-del-Arco, about 1 m. E. from the city to which it is brought in a subterranean conduit in the street de la Luna was accidentally discovered a subterranean Roman aqueduct, which still flows full of fresh water. The following comprises the most interesting and important of the public edifices and institutions.

Religious Establishments. Seville always abounded in temples, first those erected to the heathen deities by the Romans, traces of some of which still remain. Then the Christian churches, which continued during the Moorish ascendancy, when beside them rose not only the temples of Islamism, but Jewish synagogues. After the re-conquest these were converted into St. Catherine's church. Other religious establishments were also multiplied to such an extent that, at no very distant date there were 78 monastic institutions, while at the same time, the whole city did not contain more than one free school. The cathedral a solemn and grandiose fabric, is the largest and finest in Spain. It occupies the site of the successive temples of Astaria, Salambo, and Melchior. The original mosque, on whose exact quadrilateral form, 398 ft. E. to W. by 291 ft. N. to S., it is built was pulled down at the beginning of the 16th century and the cathedral which rose in its stead was completed in 1619. Outside, as well as internally it is a museum of fine art, in spite of repeated spoliations—Campana, Murillo, Vargas, the Herreras, and other painters of the Seville school and Montañez, Loloan Delgado and other eminent sculptors, having contributed to adorn this gorgeous structure. It consists of five naves the two at the sides raised off for chapels, the centre nave is magnificent, and of amazing height, being 145 ft. at the transept-arch. Altogether there are 93 windows in the building, of which the painted ones are among the finest in the kingdom. At the west end of the centre aisle lies buried Ferdinand son of Columbus. One of the most remarkable objects in Seville is the Giralda (from girar, to turn) or great Moorish tower attached to the cathedral, from which the masons announced the faithful to prayers. This lofty minaret in Europe, was built in 1196 by command of Abu Yusuf Yacub. The original tower was only 250 ft. high the additional 100 being the rich filigree belfry was added, in 1609, by Fernando Ruiz, and is elegant beyond description. On grand festivals it is lighted up at night, and then seems to hang like a brilliant chandelier from the dark vault of heaven; the pinnacle is crowned with El Giralda, a female bronze figure of Faith holding the scales of justice or balance of Constantine. Although it is 14 ft. high and weighs 2800 lb. it rests with the slightest breeze. Below the Giralda is the Patio-de-los-Naranjos, court of orange-trees, with the original fountain at which the Moors once performed his ablutions. Of the 140 churches which existed in Seville before the French invasion, a considerable number were destroyed or converted into magazines during Seville's short fall. Among

the most interesting that survive, are the San Lorenzo, containing some fine works by Montañez; San Clemente, with splendid roof and a picturesque high-church, by Montañez; the magnificent church of San Pablo. San Pedro, with its Moorish tower San Juan-de-la-Palma formerly a mosque; San Isidro, which, among other fine pictures contains El Triunfo, the

LA GIRAlda SEVILLE.—From Eugene Aristeide's 'Monuments.'

master-piece of Boule's. Sta Maria-Blanca, a synagogue prior to 1391. San Salvador a collegiate church; San Vicente, founded in 800 &c. Of the numerous convents, some have been demolished and others converted into barracks, manufactories hospitals, warehouses, theatres &c. about 20, however are still occupied, each by a small number of nuns, and a few of them possess some valuable paintings and sculptures.

Educational Establishments. **Museums, &c.**—The Jesuits having been expelled from their convent, built in 1660-74 by Charles III in 1767 it was assigned to the university. The university contains fine pictures and sculptures, and there have been recently added to it museums of chemistry, physics, mineralogy and zoology and a botanical garden, within the last few years also the library has been increased from 13,000 to 55,000 vols. The aggregate number of students who matriculated in 1847-8 in philosophy jurisprudence, theology and medicine, was 1184. There are besides, several colleges, various free schools, a normal school 128 private schools, several seminaries or colleges for girls, one of them for young ladies of noble birth. an academy of mathematics, a medical college, academies of commerce, of medicine and surgery, of the fine arts, of jurisprudence and legislation. Beside the university library, there is the Columbian library, attached to the cathedral, and founded by Fernando, son of Christopher Columbus consisting of 20,000 vols, the most valuable collection of books in Seville, and one of the best in Spain in addition to the numerous works of art distributed among the public institutions, especially the cathedral, the university, and the Caridad, a national museum has been formed, into which have been gathered the pictorial treasures of the suppressed convents, as well as some pictures from other towns in the province. It contains specimens of all the different schools, but us, of course, richest in the masters of the great school of Seville. There are two theatres, and a handsome Plaza-de-Toros or bull-ring, outside the walls—the latter affording accommodation for 12,000 to 14,000 spectators. Bull-fights are the favourite amusement of the city, which furnishes the best masters of the art, as Andalusia supplies the

best animals, and the city is likewise well supplied with provisions.

Charitable Institutions.—Seville has always been famous for its benevolent institutions; in 1588 it contained 78 hospitals, but the number was much reduced afterwards, on account of their vicious administration, and other causes. Among those that survive are the Hospital-de-la-Sangre, founded in 1546, a magnificent edifice, the grand facade of which, combining the Doric style below with the Ionic above, is 200 yards in extent. Originally destined for women, it is now occupied by the sick poor of both sexes, with a division for the insane, in 1848 there were admitted 9482 patients, and the daily average of inmates is 280 to 300; the Hospital de-San-Hernando, a Gothic structure, founded in 1483 and intended chiefly for the cure of wounded persons; the Hospital-de-Senor-San-José, or foundling hospital founded in 1568; the number of children admitted yearly is about 680, and half that number die annually; the Hospital-de-la-Casa founded in the 17th century by Don Miguel Manera in its elegant church are some of the finest creations of Marillo and Yaldes and in the courts are two exquisite marble-groups, representing Mary and Charles surrounded with children an asylum for aged priests, and a house of refuge, besides various other benevolent institutions.

Military Establishments.—The cannon-foundry whose facade is adorned with a majestic portico, was founded in 1555. This establishment is unique in Spain, and was formerly one of the best in Europe. Indeed, it is said that the bronze guns made here are not surpassed anywhere. There is also a manufactory of salpêtre and of muskets, another of fireworks an arsenal and an armoury several barracks, and a military hospital.

Prisons.—Until recently this city was wretchedly provided with prisons, but now it can boast of one which is perhaps the best in Spain, in the suppressed convent Del Pópulo. In 1849 it afforded ample accommodation to 683 prisoners, and the daily average number is 240. There is also a house of correction for young parsons and a national prison for galley-slaves called *Francés-Poniente*, established in 1838 in the Augustine convent outside the city containing about 1,000 prisoners sentenced by the different tribunals in the Peninsula, as well as those of the Havanas and Mayagüez. It is well managed, and altogether a model of establishments of this nature. Some of the prisoners are employed on the fortifications of Cadix and the Trocadero, the mines of Pedroso, and the highroads, and others in various trades and manufactures within the buildings.

Class Societies &c.—The *Ceano* is a club, the members of which belong to the elite of the city. There is also a military academy, philharmonic society, society of equitation, tribunal of commerce, board of commerce, college of advocates, academy of *bellas-lettres*, two societies for the advancement of agriculture and the industrial arts, insurance companies, &c. The following buildings also are deserving of particular notice.—The *Casa Lonja* or exchange, built by Philip II. at the suggestion of the Archbishop of Seville, to prevent the desecration of the cathedral, which was used by marauding men as a place of rendezvous. In the upper floor are the *Archives of the Indies*, that is, of S. America, which were collected here by Charles IV. in 1764, from Simancas and other archives scattered through Spain. The *Lonja* was scarcely begun before real commerce departed. The *Casa-Capitular* or town-house, a fine specimen of plateresque architecture, but unfinished and unequal. The *Matadero* or abattoir, a fine building of the kind, paved with large Algeciras flags and kept very clean. The *Al-houliga* or public granary a sumptuous edifice, built by the Moors, with a large court, on the right side of which are ranges of piazzas, where the traffic in grain is carried on. The custom-house, built in 1792 with both facades of the Composite order. The *Aduana-de-Angulos* or warehouse, where is stored the produce of the government quicksilver-mine at Almadén, as well as those wrought by private enterprise. The *Casa-de-Monedas* or mint where coining, however has ceased, the machinery having been transferred to Madrid. The *Andén* or high court of Seville of which the statistical tables for 1844 give 4094 trials in a jurisdiction over 1,140,980 souls, or about one to 279. The archiepiscopal palace, commenced in 1664, whose facade

forms an angle nearly opposite the Giralda. Many of the paintings and sculptures in the interior were carried off by Boult, who resided in this palace during the French occupation of Seville. The Alcazar, built in the 10th and 11th centuries for Abderrahman and restored in 1864 by Don Pedro, with the aid of Moorish workmen; it occupies the site where stood the palace of the Roman prætor. Here Charles V. was married to Isabella of Portugal; and here Philip V. resided in marital seclusion for two years, amusing himself with fishing in the pond. The gardens, which were laid out by Charles, are perhaps the finest gardens in Europe.

The most remarkable public monument is the Tower of Gold 1 bank of the Guadalquivir a beautiful solid structure attributed by some to the Romans, and by others to the Moors. The object for which it was erected is unknown, but it figures much in the history of Pedro I. of Castile. Here his treasures were placed under the custody of Samuel Levi, a Jew who died in consequence of the tortures to which he was put by Pedro's brothers. In order that he might disclose where the hoard was concealed.

There is a small and insignificant quay and a dock-yard where the first steam boats were built in Spain. A rude bridge of boats across the Guadalquivir. An iron bridge on the plan of the Pont-de-Carrousel at Paris, was commenced in 1845. There are few fountains but a great number of Moorish antiquities. Outside the walls is a square platform which marks the site of the Quemadero or burning place of the Inquisition. Seville contains 28 parishes and 10 suburbs one of the latter the *Triana*, on the opposite bank of the river is the abode of gyneys and smugglers. In the Jews quarter a labyrinth of lanes, stands the house of Marillo, who was a native of Seville.

Manufactures.—The *Fabrica-de-Tabacos* where the tobacco is made into snuff and cigars, covers a quadrangle of 162 ft. by 524 ft. and has 28 internal courts. A most surrounds it in order to prevent vapours from being smugged out. In 1849 4,542 portons nine-tenths of them women were employed in this establishment and in 1847 the produce in cigars and snuff amounted to 2,786,445 lbs. A good workman can make a day from 10 to 14 bundles of 50 cigars each. There are also manufactures of earthenware, crystal, machinery, extract of liquors, leather, soap, cotton-thread worsted linen and silk fabrics. The different trades dwell in streets appropriated to themselves. The circumference of Seville being situated about 70 m. from the mouth of the river, which it is difficult for vessels above 200 tons burden to ascend, as well as its proximity to Cadix, are unfavourable to the extension of commerce. Accordingly the great majority of vessels trading here are eastern except in the months of October, November and December when oranges are shipped for Britain, France and Belgium. On the average of the years 1844 and 1845, 1896 vessels of 69,089 tons entered the port, and 1,194 of 62,469 cleared out. The imports consist chiefly of yarn wrought and cast iron, plate, fine ironmongery, delft, fine cloths and linens, some silk-stuffs, cotton mixtures, drings, &c., steel, crystal, dried cod, building-timber, Flanders cheese and butter, &c. and the principal articles of export are quicksilver, lead, copper, olive-oil, wool, oranges, liquorice root, and occasionally grain. **History.**—Seville was called *Hispalis* by the Romans, who settled there, and *Hispalis* by the Moors, of which the Moors made *Ishbilla*, whence *Sevilla*, Seville. It was captured a.c. 45 by Julius Cæsar who made it his capital and gave it the title of *Romula*, or Little Rome. Seville was the capital of the Goths until the 6th century when Leovigild removed to Toledo, as being more central. It surrendered to the Moors at once, after the defeat of Don Rodrigo on the Gualdote, and it continued its allegiance to the caliph of Damascus until 756 when Abderrahman established at Cordova the western caliphate of the Best Caliphal family to which Seville remained subject until 1081, when that dynasty was overthrown, and with it the real domain of the Moor. Seville surrendered to Ferdinand of Leon and Castile, on November 23 1248, and he divided the houses and lands among his soldiers. It continued to be the capital of Spain until Charles V. removed the court to Valladolid. The discovery, however, of the New World raised Seville to more than its former splendour; it became the mart of the golden colonies and the residence of princely foreign merchants

But the French invasion, and the subsequent loss of the Trans-Andalusian possessions, have again greatly injured its prosperity. It surrendered in 1810 to Soult, who executed great cruelties and extortion. Torrens estimates the French plunder at £8,000,000 sterling. In 1815 he was forced by the British to evacuate. In 1845 it was besieged by Espartaco for some days, when it capitulated. Pop. 169,468.

SEYNE par Eng. hms 553 m. Pop. 104.
SEYNE (La), two rivers, France, which give name to dep. Deux-Sèvres. The one, called *Seyne-Nantaise*, rises about 4 m. N. Seconduy, dep. Deux-Sèvres, proceeds N.W. through this dep., enters dep. Loire-Inférieure, and joins L. bank Loire at Nantes; the other, called *Seyne-Nantaise*, rises in the S.E. of dep. Deux-Sèvres, near Chassay takes a circuitous course, on the whole W., passes St. Maxent and Niort, and after forming the boundary between Vendée and Charente-Inférieure, falls a little below Marais into the Pertuis-de-Breton, in the Bay of Biscay, about 9 m. N. of La Rochelle. The course of the *Seyne-Nantaise* is about 80 m. of which 12 m. beginning at Marais, when favoured by the tide, are navigable; that of the *Seyne-Nantaise* is about 90 m. and it is not only itself navigable for an extensive range of boats and small craft, but the numerous banks and mud flats which it surrounds make the navigation difficult, but render two navigable tributaries—the Antae and Vendée, both on the right.

SEYRES (anc. *Vitis Sereus*), a tn. France, dep. Saône-et-Oise, 5 m. N.W. Verailles, L. bank Seine, here crossed by a handsome bridge. It is chiefly remarkable for the manufacture of china, which bears its name, and in which the art in all that relates to fineness of ware and elegance of shape and beauty of design, is carried to the utmost perfection. The building in which the manufacture is carried on is a huge regular pile of building without any decoration, but contains a complete and curious porcelain museum, in which specimens of the ware of all countries and periods are regularly arranged and exhibited. *Seyres* has also important manufactures of colour enamel and glass, both plain and painted. In the vicinity are vast subterranean cellars or caverns, in which the wine kept is said to acquire a very superior quality. Pop. 4,681.

SEYRES (L'An), a dep. France, bounded N. by Maine et Loire, E. by Vendée, S.E. Charente, S. and S.W. Charente-Inférieure and Vendée, greatest length N. to S., 68 m. average breadth 20 m., area 2,817 sq. m. This dep. is traversed E. to W. by a chain of hills, forming a continuation of the Cevennes, which divides it into two principal basins, the one sloping S.W. and drained by the *Seyre-Nantaise*, and the other sloping N.E. and drained chiefly by the Thouet, which is a tributary of the Loire. The chain proceeds almost in a straight line till it reaches the centre of the department, when it widens out, and on approaching the N. occupies nearly the whole surface, forming an extensive plateau, much broken by hills and ravines, down which almost innumerable streams descend. The principal rivers are the *Seyre-Nantaise* and *Mignon*, both navigable the Thouet, Argonne, Dive, Antae and Boutonne, and there are no fewer than seven navigable canals. There are no proper lakes. About two-thirds of the whole surface are arable, and the soil is generally fertile. All kinds of cereal and leguminous crops are grown in abundance also hops, and a little hemp. Apples, pears, and stone fruit are plentiful. A considerable extent of surface is occupied by the culture of the vine, but the wine produced is generally of second-rate quality. The forests, consisting chiefly of hard-wood cover about 90,000 ac. The mineral wealth from a H.E. coal, and there are good quarries of limestone, building stone, millstones, and pavement. Beautiful rock-crystals are frequently found. The principal manufactures are linen and cotton goods, serge, flannel, woollen hosiery gloves, chamois-leather hats, cutlery knives, paper bone-combs, turnery and confectionery. The trade is in corn, clover and lucerne seed, mustard wine, brandy, stables, horses, fat and lean cattle, &c. The department is divided into four arrondissements—Niort (the capital), Bremaise, Melle, and Parthenay, subdivided into 31 cantons, and 513 communes. (Pop. 166,542) 225,515.

SEWAN, a tn. Hindustan, prov. Behar, 66 m. N. Patna lat. 21° 9' N. lon. 75° 58' E. In this vicinity an inferior sort of crockery is made from a species of black petrous-marl.
SEWAN a lake Russian Armenia. See **GRUYER**.
SEWESTAN a prov. of S.E. Afghanistan lat. 29° 30' to 30° 30' N. lon. 67° 20' to 68° 45' E. It appears to be

a flat dry plain of hardened clay, its natural defects being, in some places, corrected by streams from the hills. It is crossed, throughout its whole extent E. to W. by the route from Dara Ghuma Khan to Kandahar. The climate is extremely hot; Suway or Seboe, one of the few towns, being proportionally compared, on this account, to the infernal regions.
SEXIERUM a vil. Holland, prov. Friesland, W. from Leeuwarden, with a church and school. Pop. (agr. cult.) 924.

SEYBO, a tn. Isl. Hayti, republic and 53 m. E. Santo Domingo, on a small river.
SEYBUSH, or **SEYBUSH**, a tn. Austria, Galicia, on the Sola, 41 m. S.W. Cracow. It is miserably built, and the houses are very much huddled together. It has manufactures of woollen and linen cloth, and an important annual fair mostly for yarn and cattle. Pop. 2,952.

SEYCHELLES, an extensive group of Isl. Indian Ocean; lat. 3° 40' to 5° 30' S., lon. 55° 15' to 58° 0' E. They are 80 in number, but little more than the half deserve the name of islands, the remainder being mere rocks. The principal island is called *Mahé* (which see). This archipelago vests on an extensive bank of sand and coral which entirely surrounds it. All the islands, except two of coral, situated at the edge of the soundings, are of granite, huge blocks of which, generally piled up, as it were, in a confused mass, form their peaks, seldom cultivated, but always covered with verdure. The harbours among the Seychelles are numerous, and as they are never visited by tornadoes, they may be considered as perfectly safe at all times. The climate is warm, but equable and salubrious mean temperature, 70° to 72°. Not liable to abrupt changes of atmosphere, the Seychelles are exempt from those diseases so common to other tropical regions. The principal productions of these islands are cotton, coffee, cocon, sugar, tobacco, maize, rice, and fruits and vegetables of every species found within the tropics. The timber is much esteemed for ship-building and fine woods for cabinet purposes are also abundant. Bullocks, fowls, turkeys, and guinea-fowls are abundant. The manners and customs prevailing amongst the proprietors and better classes in these islands are essentially French. They are R. Catholics in name, but in reality profess no religion. Cards, billiards, and dancing are their amusements; of the former the men are passionately fond, and the women are devoted to the latter. They are indolent, ignorant, and avaricious, their charges being invariably exorbitant.

The Seychelles were first partially explored by M. Lemaire Picault in 1748 about which time a few settlers of French origin established themselves on the largest island, *Mahé*, with the view of taking cattle. To these, several families from Bourbon and Mauritius were soon added. In 1794 the British took possession of the islands, and as the peace of 1814, they became a dependency of Mauritius. Pop. 9,663.

SEYDIA, a tn. Prussia, Saxony, gov. Merseburg, in the midst of a forest; with a church manufactures of linen several mills, and a trade in wool. Pop. 1,089.

SEYDORF a vil. Prussia, Silesia, gov. Liegnitz, circle and near Hirschberg with two churches and two mills. Pop. 1,098.

SEYLER ISLES, a cluster of small isls., 28 m. off W. coast, Malay Peninsula lat. 6° 41' N.; lon. 97° 38' E. (2). The largest is about 5 m. long, by 1 m. broad. A variety of fruits, vegetables, and roots grow here spontaneously.

SEYKOU a vil. and township, U. States, Connecticut, on the Naugatuck river and railway 25 m. S.W. Hartford. It has four churches and a bank manufactures of cars, tools, and paper; a power-loom silk-factory, and one of the largest copper-rolling mills in the U. States. It owes its prosperity chiefly to the great water power furnished by the river. Pop. 1,877.

SEYNE (anc. *Seduna*), a tn. France, dep. Basses-Alpes, 20 m. N. Digne, enclosed by ramparts, and defended by a citadel which, however is not strong, being commanded by the surrounding heights. It has manufactures of linen, and a trade in horses, fat and lean cattle, &c. Pop. 1,184.

SEYNE (La) (anc. *Seyne*), a seaport tn. France, dep. Var 4 m. S.W. Toulon. It is agreeably situated, and generally well built has a small harbour which is much frequented by the neighbouring coasters builds coarse vessels, and has a considerable trade in fish. Pop. 4,582.

SEYNY, a *tu*, Russian Poland, 84 m. N.W. Grodno, with a Dominican cloister, the cathedral of which is in such ruins as annually to attract above 10,000 peasants. P 516.

SEYSEL, a *tu*, partly in France, and partly in the Sardeinian States, on both sides of the Rhone, which here becomes navigable, and is crossed by a stone bridge. The part on the Sardeinian side is in div. Savoy prov. Geneva and has a seam of red ochre, which is largely worked and exported. Pop. 1817.—The French part is in dep. Ain, 15 m. N.N.E. Belley, and has a considerable trade in wine and salt.

SEZANNE (*se. Sazanow*), a *tu*, France dep. Marne 25 m. S.W. Chalons. It has an ancient parish church, manufactures of coarse woollen cloth, serge, leather, earthenware, wax-candles, vinegar and brandy; and a trade in honey and wax. Pop. 4468.

SEZEMMELZ, or Cossens, a market in Bohemia, 40 m. and 9 m. N.N.E. Chlum, with a church, townhouse, school, and several saw and other mills. Pop. 1652.

SEZINCOOTE, *par Eng* Gloucester, 1418 ac. Pop. 111. **SEZUNJAB, or BESKAN**, a small isl. Russia, in the Gulf of Finland, about 50 m. W. Cronstadt. It consists chiefly of a limestone ridge on which the Russian government has established a quarantine for vessels coming from the Mediterranean. A lighthouse has also been erected upon it.

SEZZA or Sizza [*anc. Seta or Setina*], a *tu* Italy 18 m. S.W. Frosinone, on a height near the Pontine Marshes, and consequently unhealthy. It is the see of a bishop, but is an ill built place. Near it are remains of a temple of Neptune. The wine of the district once celebrated, is now indifferent, but it still boasts of its fruit, particularly figs. The site also is common. Pop. 6900.

SEZZE, a *tu*, Italy Piedmont div. and 9 m. S.W. Alessandria; with a court of justice and a church. P 2585.

SEZITLA, or SEZITLA, a ruined city Africa, about 180 m. S.W. Tunis. It stood on a vast plain, surrounded by lofty mountains, and appears to have been a place of consequence. Its streets, which can still be traced covered an area of about 5 m. in circuit, and among the ruins stand a large temple and a palace adorned with columns and pilasters of the Corinthian order.

SEAZ, or SEAZU, a seaport in Tunis on the Gulf of Gabes, lat. 34° 44' N. lon. 10° 40' E. (n.) Its walls, which rise immediately from the sea, include 3200 large and 2400 smaller buildings. The streets are good, but filthy sometimes paved, and the houses, which present a fine appearance, are kept in excellent repair. It has several mosques, of which one is of considerable size. None but natives being permitted to reside in the town, all others must erect their dwellings outside including about 200 Jewish families, consisting of about 2000 persons, who reside in a suburb of their own, separated from the other parts of the town by a wall and gate. SEAZ has extensive markets, where mixed productions and European manufactures are sold; they are particularly frequented by caravans from Ghadames. Near the town a series of beautiful gardens commences in the form of a crescent, the longest diameter of which measures 12 m.

SEBASTIZ, a tu, European Turkey, Servia; on the Save, 44 m. W. Belgrade. It contains several hamlets.

SEBBINGTON, *par Eng* Bucks 2188 ac. P 897.

SEBECSTON, par Eng Lancaster 2665 ac. Pop. 468.

SEBADOPORE, a *tu*, Sicily, 25 m. S.W. Larihana lat. 37° 44' N. lon. 68° E., in a barren tract, nearly destitute of population.

SHADINGFIELD *par Eng* Suffolk 1369 ac. P 214.

SHADOXHURST, *par Eng* Kent 1082 ac. P 185.

SHADRINK, a tu, Russia, gov. Perm, 1 bank feet, 220 m. S.W. Tobolsk. It is surrounded by palisades, defended by a wooden fort, and has a church, manufactures of leather and soap and some general trade. Pop. 1800.

SHADWILL, a suburb and *par* 13 m. E. by S. London, 1 bank Thames. It consists of Upper and Lower Shadwell the latter along the banks of the river, and occupied chiefly by ship-chandlers, provision-merchants, mast, sail, and rope makers, and other persons connected with the shipping-interest, and has a handsome modern parish church, places of worship for Independents, and Primitive and Wesleyan Methodists, a large parochial school, now conducted on the national system, almshouses, &c. Pop. 11 763.

SHAPTESBURY a town and parl. bor. and market in England, so. Dorset, on the point of a high hill, commanding extensive views, 28 m. N.W. Dorchester. It consists for the most part of four principal streets, very irregular, and not well kept, houses of stone and brick, indifferently built. The town is lighted with gas, but is poorly supplied with water. There are four churches, and meeting-houses for Wesleyans, Independents, and the Society of Friends a townhall, a blue-coat and two national schools, an hospital some almshouses, and several other minor charities. There are no manufactures here but that of shirt-buttons, which has greatly declined of late years. The produce of the town depends principally on the weekly market, which is well attended. It sends a member to Parliament 1 op. (mun. bor.) 2503 (parl. bor.) 9404.

SHAH BANDEL, a tu Persia, prov. Kerman, on the Minus 14 m. from its mouth in the Persian Gulf. It has a custom-house. About 1 m. from the town is the fort of Minus, on elevated ground 1 bank of the river. The adjoining country yields large crops of wheat, fruits and vegetables.

SHAH BUKHAR, a tu Seinde, the delta of the Indus, but now deserted by the channel of the stream; lat. 24° 19' N., lon. 67° 46' E.

SHAHABAD a dist. Hindoostan, presid. Bengal, lat. 24° 38' to 25° 43' N. lon. 88° 10' to 84° 50' E. bounded N. by the Ganges, which separates it from Dacca. Ghazipur and Serun, E. and S. by the river Tone, which divides it from Patna, Behar and Palamow and W. by the Ganges, passing it from Mirzapoor and Benares, length N. & S. 117 m., greatest breadth 52 m. area, 5270 sq. m. Its N. portion is plain but nowhere a dead level, in the S. are rugged hills, rising into a table land, and broken by passes easy of defence. The soil is generally fertile especially near the Ganges. At least half of the surface is under culture, producing rice sugar cane, wheat, barley oats, indigo hemp, tobacco fruits, &c. in some parts soda effluences on the earth. Sandstone used for building, millstones, slate limestone, alum, iron pyrites, and potash clay are plentiful, and near the river Koyel is a diamond-mine. Soap, paper, cotton cloths, silk, and various are made, and the exports comprise jewellery, household utensils, timber, cattle, indigo, some of the foregoing products, and raw silk, cloths &c. sent S. into the Mahratta country. The district is noted for good roads, but also for depredations. Principal towns—Arrah (the cap.), Buxar and Bassemur. Pop. chiefly Hindoos, 1,600,000.—(*Bengal and Agria Gaz., Trigon. Sur. of India*).

SHAHABAD, a decayed *tu*, Cashmere 6500 ft. above sea-level, in a lung narrow valley bounded N. & E. by a ridge of green hills several miles in length. It was formerly a favourite residence of the Mogul emperors, but is now ruinous and neglected although it has still a bazaar and a few shops, at which provisions, coarse cloth, and very fine honey are sold. The valley in which it is situated lies in some places a width not exceeding 1000 yards, and is said to be very rich in iron and copper. The neighbourhood is celebrated for its fruits, especially apples and for its wheat, considered the finest in Cashmere.

SHAHJAHANPORE, a dist. and *tu*, Hindoostan, the district forming a part of Moulteed Bengal presidency lat. 27° 30' to 29° N., lon. 78° to 80° 40' E.; bounded, E. by Onit, N. and W. by the dists. Bardly and Bandan, and S. that of Farrukhabad. Area, 9488 sq. m. It is a level plain, watered by the Dooh-Gurra and Ramganga, rivers flowing S. to the Ganges, which forms its S. limit. About four-fifths of its surface are cultivated, or capable of culture.—The towns, lat. 27° 52' N., lon. 79° 48' E., 50 m. E. Bareilly, has a castle, and several mosques. Pop. about 50,000.

SHAHNOOR, a decayed *tu*, Hindoostan, prov. Bagpore 40 m. S.E. Darwar, lat. 14° 58' N., lon. 76° 28' E. It is enclosed by a wall and ditch. No buildings of any note now remain except the palace, and these are in ruins.

SHAHZADABAD a large *tu*, Hindoostan, presid. Bengal, prov. and about 84 m. N.W. Allahabad, with a spacious area, for the accommodation of travellers.

SHAKAPORE a *tu*, Seinde, on the great route from Cutch to Hyderabad, lat. 24° 34' N., lon. 68° 26' E. About 1 m. N.E. the town are the ruins of a large city, built of excellent burnt brick, and still in such a state of preservation that the walls and bastions are plainly discernible.

SHAKOK an old China. See CHIENTUNG.

SHAMACHI SHANAGHI, or SCHENACKI, a gov and tn, Transcaucasian Russia. The GOVERNMENT is one of the three into which Transcaucasian Russia is now divided. It lies in the S.E., bordering on the Caspian, and comprehends the independent lordships of Shavran, Baku, Talysh, Karabagh, and Schokh. Area, 16,896-52 sq. m.—The river named New Shamachi is cap. of the government. It lies on the Aketi, 210 m. E.S.E. Tiflis and was once a large and flourishing place, but suffered so much in the wars between the Russians and Persians, that it was almost deserted. It has again begun to recover and has a population estimated at about 7000. Old Shamachi situated to the N. of New Shamachi, was once still more important, and was a greatemporium for the trade between Persia and the north. It was sacked by Nadir Shah and has not now a house standing among its heaps of ruins.

SHAMLEB, a tn Hindostan, presid Bengal, dist. and 59 m. N Delhi lat. 29° 27' N lon. 77° 8' E. It is about 23 m. in circumference, and contains many handsome houses, with a large bazaar and the remains of a mint.

SHAMO a desert, Asia. See GOSI.

SHANAGOLDEN par Irel. Limerick 4183 ac. Pop. 1918.

SHANBOGH par Irel. Kilkenny 1892 ac. Pop. 416.

SHANAGLOU par Irel. Mayo 5441 ac. Pop. 700.

SHANDRUM par Irel. Cork, 15401 ac. Pop. 3009.

SHANG-YUEK, a tn, China prov Che kwang on the Hwuychow about 63 m. W N.W. Ningpo. It is a large and important place, containing a pop. of at least 100,000.

SHANGHAI a large seaport to China, the most N. of the five ports opened to foreign trade by the treaty of June 26, 1842. It is situated in prov Kiangsoo, 1 bank Woosung about 14 m. from its mouth, 150 m. N.E. Hankin lat. 31° 10' N lon. 121° 30' E. In a wide plain of great fertility it is enclosed by a high thick wall about 4 m. in circuit with five or six gates. But the area within is by no means densely occupied with buildings. The streets are narrow and ex-

travertine, pictures, bronzes, specimens of old porcelain, and other curiosities. Large warehouses for storing goods, tea-houses, granaries, and temples are numerous; but neither these, nor the public buildings, present any remarkable features. There is here, however, what is not known to exist in any other Chinese city namely a public promenade, called by Europeans the Tea Garden. It occupies a square of a regular form planted with trees, and studded with kiosks in rock-work. The sides of the garden are lined with splendid shops, either eating-houses or tea-shops, filled with people. The vast increase of importance and prosperity which Shanghai has derived from being opened to European commerce, is made apparent by the number of foreign vessels, chiefly British and American, which are now seen at anchor here, mingled with the native junk, loading with tea and silk, in exchange for the produce of the manufactures of their respective countries. Shanghai is connected by water-communications with one-third of China and there is, therefore, considerable internal as well as external trade. In the inland navigation alone there are 5400 vessels employed, in addition to those are 7000 that go to sea, besides innumerable boats and barges employed in sailing and in conveying passengers and goods. The principal imports are sugar, sapwood, dyestuffs, opium, tanning, shagbass and gunnys. The aggregate value of imports in British ships for 1845 was £1,082,407 exports, £1,259,001. The inhabitants are represented as gentle and benevolent towards strangers. The city was taken by the British on 19th June, 1845. The pop. has been variously estimated from 120,000 to 200,000 (Martin's China, Mullis's Kingdom, Nuttall's Map, etc.) See Supp.

SHANGTUN, par Eng. Leicester 1590 ac. Pop. 60.

SHANNON, the largest river of Ireland if not of the United Kingdom properly speaking only commences its course when it begins to leave from the S. extremity of Lough Allen, but is generally considered to rise at the foot of Mount Keshagh in the N.W. of co. Cavan, and to perform the first of its course as a tributary of Lough by flowing S.W.

and joining it on the N.E. shore. On issuing from the lough it flows tranquilly through its direct course is nearly in

passing the towns of Lestrin Carrick, and Lanesborough, and expanding in several lakes, of which the largest is Lough Ree. On issuing from the lough, a little above Athlone, it flows S.W. with several large windings, receiving its most important tributary the Suir, on the right, and a little farther down the less important Brosna on the left, and then expands into the long and irregularly-shaped Lough Derg. On leaving this lough at Killesnoe it flows S.E.W. to Limerick, where, beginning to form a large tidal river with several remarkable expansions, it flows W.S.W. and falls into the Atlantic by a broad estuary between Loop Head in co. Clare on the N., and Kerry Head in co. Kerry on the S. A little above Limerick it receives the Maikarna and considerably below the Maig and the Deal, which all join it on the left, and the Fergus on the right. The whole length of the Shannon, including its upper part, and the length of its lakes, is 328 m., its whole fall is 245 ft. but of these more than a half occur before it enters Lough Allen, though it has then performed only 11 m. of its course. Its navigation properly begins in the lough, and has

thus a development of 114 m., but unfortunately meets with numerous obstructions from tortuous windings, shallows, rocks, and even rapids. Of the last the most serious occur between Castle Connell and Castle Frey and have been obviated only by cutting a canal. Below Limerick the navigation is peculiarly favorable for vessels of 400 tons. By means of improvements, commenced at the close of the last century, the navigation is opened for traffic throughout the whole length, from the upper extremity of Lough Allen to Limerick and the commercial importance of the whole river has been materially

SHANNON—After Smith's Map.

travels slowly, and the houses, mostly of brick, poorly built in penetrating into the interior, the number of warehouses diminishes, activity disappears, and large gardens surround the houses. In the outer and busier parts of the town, however, the scene is very different. Here the shops are numerous and the bustle of trade and commerce is very great. The merchandise which most attracts the notice of a stranger is the silk and embroidery cotton and cotton goods, prettily made ready-made clothes lined with beautiful skins and furs, hand-painted 5 feet long, and numerous shops for selling hand-

increased by the Grand and Royal canals, which give a direct communication to Dublin, and also a communication to the lakes of the Barrow and Lough. The tide rises in springs 17 ft. or 18 ft., and in neaps about 14 ft. Near the mouth of the estuary, where it is broadest, the rate of the velocity does not exceed 1 m. per hour, but further up becomes much more rapid and has almost the appearance of a bore. Partly in this respect, but much more in the direction of its course, the magnitude of its volume, and other general features, the Shannon presents some striking resemblances to the Severn. It contains several varieties of fish, but its most important fishery appears to be that of eels.

SHANNONVILLE, a flourishing vil Canada West, on the Salmon River, co. Hastings, 15 m. from the Bay of Quinte, and 81 m. from Kingston, with which it has communication by steam-boat and stage, it lies in a fine grain-District, and has several large flour, grain, and saw mills, and two Protestant churches. Pop. (1855) 600

SHANSAHAN, par Ind Tipperary, 94,923 ac. Pop. 6219

SHANSEE, an island prov China, bounded, E. by Petcheli and Honan S. Honan, W. Shensi, and N. Mengolia and the Great Wall, lat. 34° 40' to 40° 50' N lon. 110° 5' to 114° 40' E. area, 55,989 sq m. This province is the original seat of the Chinese people and many of the events recorded in their ancient annals occurred within its borders. Its rugged surface contrasts strikingly with the level tracts in some of the surrounding provinces, although the lowland parts of it are represented as being well cultivated and terraced. The rivers, which are almost all tributaries of the Yellow River, are numerous, but not large. The Tan-ho, the largest of these streams, is about 800 m. long, and falls into the Yellow River, near the E. W. corner of the province, after draining the central part. The V contains some of the favourite imperial hunting-grounds, and the inhabitants find sources of wealth in the coal iron clamber copper, marble, lapis-lazuli, jasper, salt, and other minerals, which it affords. The principal grains are wheat and millet, besides a great variety of vegetables with grapes and other fruits. Besides Tse yuen foo, the capital, there are several populous towns in the province. Pop. 14,004,910.

SHANTUNG a maritime prov China, bounded, N and W by Petcheli S.E. the Gulf of Petcheli and the Yellow Sea, and S. N. Korea, lat. 34° 40' to 40° 50' N lon. 110° 5' to 122° 35' E. area, 63,104 sq m. The greater portion of this province is level, but the peripheral parts of it are hilly, some of the summits rising too high to admit of cultivation. The shores are generally bold, and full of indentations some of which are excellent harbours but there is no considerable seaport town along the entire coast, and though the province is intersected by several rivers none of any size within its limits discharge into the sea, and the waters are shallow on each side of the peninsula. The inland navigation, however, augmented by the grand canal which traverses the W. part of the province N.W. to S.E. affords great trading advantages, and the transit trade is extensive. Drugs, and vast quantities of vegetables, are exported and felt-caps, carpets, and some coarse hempen cloths are manufactured. The province is over-peopled, and the great proportion of the people are very poor, still they appear to be very contented and attach peculiar importance to this province, on account of its being the birth-place of Confucius, and his disciple Mencius, and also because it contains the T'ai-shan or Great Mount, which forms a favourite resort of devotees from almost distances. Its capital is Tse-nan-foo. Pop. 28,988,764.

SHIAOU HING-POO a tn China prov Che-king on an affluent of the Hsuey-show 20 m S E Hang-show lat. 36° 0' N lon. 120° 30' E. It is walled and fortified, and enclosed by a canal which forms a kind of moat. The space enclosed by the walls is from 3 m. to 4 m. in extent, but is not all occupied by buildings. The houses on the sides of the canal are mean, but within the town have a better appearance. The trade in all the common necessities of life is extensive, and is largely grown on the neighbouring hills. Pop. about 370,000

SHAP, a tn and par England co. Westmoreland, near the summit-level of the Lancaster and Carlisle railway, 15 m. N by E Kendal. It consists chiefly of one long street, on the

road between Furness and Kendal and has a parish church and a much-frequented mineral-spring resembling that of Harrogate. Area of par, 37,770 ac. Pop. 1009

SHAPINSEAY, one of the Orkney isles. Situated, between Isla, Stronsay and Pomona. It is of irregular form, about 7 m. long, and 5 m. broad; area, 8970 ac. of which not more than 750 ac. are arable. The surface is in general level and comparatively even, but rises to a considerable elevation towards the centre. Along the shore the soil is fertile, producing excellent crops of grain, but inland it is sterile and unproductive. Pop. 899

SHAPWICK, two par Eng —1, Dorset, 8670 ac. Pop. 444—2, Somerset, 3781 ac. Pop. 416

SHARDLOW a vil and township, England co. and 7 m. E.S.E. Derby on the Trent and Mersey canal, which, about ½ m. below joins the Trent here crossed by a bridge of five arches. It has a handsome Established church, places of worship for the Baptists and Methodists, a national school and several large malting establishments and warehouses for the trade of the canal. Pop. 1121

SHARSHILL, par Eng Stafford 1986 ac. Pop. 540. **SHARK**, a large bay S.W. coast of Australia about 25 S.

SHARNBROOK par Eng Bedford 2980 ac. P. 888

SHARNFORD, par Eng Leicester 740 ac. Pop. 611

SHARON or DAVIDOWS a vil Canada West, on York about 40 m N Toronto. It stands in a fertile tract, but is chiefly remarkable as the adopted residence of a peculiar sect who receded from the Friends and have erected two singular buildings, one of them said to be in imitation of the Jewish temple, and curiously arranged and decorated.

SHARON HIRINGS, a vil, U States, New York, 46 m. W by N Albany, on an eminence surrounded by numerous interesting caverns. It has two springs, the one impregnated with magnesia, the other with sulphur; they are both much used for their exhilarating and invigorating qualities.

SHARRINGTON par Eng Norfolk 863 ac. P. 262

SHARY a considerable river, Central Africa, flowing from the S, and falling into Lake Tchad by several mouths. It forms an extensive delta, and at Showny, where its different outlets diverge, is said to be 600 yards broad in the dry season, having previously turned off three considerable branches.

SHASTA —1, a tn, U States California, cap co Shasta, near Lake Sacramento, 150 m. S.E. San Francisco. Near it are numerous gold mines and some salt-springs. Pop. 1000

—2, a peak of the Cascade range in N California lat. 41° 20' N lon. 122° W, height about 1400 ft.

SHAT EL-ARAB, the lower course of the river Furphates from the junction of the Tigris to the Persian Gulf. See LITHRATES.

SHAWI, a tn, and valley Beludokum. The town is lat. 80° 8' N, lon. 66° 56' E; also called Qetie, 30 m N.W. the Bolan Pass, on the route into Afghanistan, and 5563 ft. above the sea, consists of 800 houses enclosed by a crested wall and clustered around the base of an acropolis or huge mound 70 ft. or 80 ft. in height on which is the citadel.

It has a pretty well supplied bazaar and an active trade, being a centre of the traffic between Shikarpore Kandahar, and Kabul. It was repeatedly occupied as a military post by the British during the war in Afghanistan. Pop. 2000

—The valley in which it stands is a basin about 12 m. in length, by 8 m. or 4 m. in breadth, presenting in most parts luxuriant vegetation very similar to that of Europe, and bounded on all sides by rocky mountain ranges. Wild sheep, goats and hogs are plentiful on the hills. Inferior coal is in use with Carpets and blankets are made in considerable quantities. In winter, when the ground is covered with snow for two months, many of the inhabitants emigrate to Cutch.

Gundara. Pop. about 5000; chiefly Afghans and Baluchas, with some Hindoos.—(Bangal and Agri Gaz. Mason, in *Monthly Gaz. Jour.* vi. 83; *Ac.*)

SHAWNEETOWN, a vil., U States, Illinois, r bank Ohio, 164 m. S.E. Springfield. It has a long paved level, and exports large quantities of pork and a considerable quantity of tobacco. Coal and iron abound in the vicinity, and the manufacture of salt is extensively carried on. Pop. 1784

SHAYOOK, or **SHAYOOK**, a river of W Tibet, rises near the Karakoram Pass, about lat. 30° 30' N. lon. 77° 40' E. It flows S.E. for about 110 m., turns W N W, receives the Nubra on the right, and after a further course of 180 m. direct distance, falls into the Indus, about 15 m. E. Lakard

SHEDDOO, a vil. Palestine. See ARDOON

SHE-PA KY a ta. China, prov Fokien, in a fine and very

fertile valley on the main road between Tsung-gan-hien and Fouching-hien. It is a small but stirring place and has a considerable trade in rice and tobacco. The aculeum is also largely cultivated in the low irrigated lands, the underground stem when cut into small pieces and boiled, forming a common article of food. An excellent kind of arrow root is also made from it.

SHEREAH, par Eng. Devon 6882 ac. Pop. 1153

SHEDEIA, a tn. and par on sand and near mouth, river of same name S.E. coast, New Brunswick. It has a tolerable harbour and some trade. Pop. 2000.

SHEELIN (Lough), a small lake Ireland on Cavan, about 50 m. N.W. Dublin. It is a beautiful sheet of water, 4½ to long and on an average 2 m. broad. It abounds in fish.

SHEERING, par Eng. Essex 1636 ac. Pop. 514

SHEERNESS, a seaport and market tn. England, co. Kent, at N.W. point, Isle of Sheppey, on the river Medway at the junction with the Thames 55 m. W by S London, lat 51° 28' 45" N; lon 0° 44' 40" W (n). The town consists of Sheerness proper and two divisions called respectively Blinworth and Milestone. It has been much enlarged of late years, and is paved and lighted with gas. There are here a spacious chapel attached to the dock yard a new church in the Pointed style, and places of worship for various bodies of Dissenters and a synagogue several reading-societies, and a mechanics institute. The harbour is safe and commodious, and often crowded with vessels. Sheerness is now a second-class naval establishment, dependent upon Chatham. The wharf fronts the Medway, and the dock yard which is surrounded by a brick wall, is one of the finest in Europe, covering an area of 80 ac. The docks are sufficiently spacious to receive men-of-war of the first class fully equipped. There is a basin 26 ft. deep, two smaller basins, storerooms,

viewing-storerooms, masts, rigging-houses, &c. There are also warehouses for the port-wine, commodities, &c., and barracks, containing usually 500 men. Besides the dock yard business, there is a considerable trade in oyster-fishing, supplying shipping, the corn and seed trade, and in the manufacture of copperas. Pop. 8549

SHEFFIELD, or **SHEFFALAN** an isl., S.E. coast, Africa, in Delagoa Bay. It is about 5 m. long very narrow low, and sandy.

SHEFFIELD a market tn., mun and pari bor England, co. York, pleasantly situated on several acclivities, in a natural amphitheatre, enclosed on all sides except towards the N.E. by wooded hills, at the junction of the Sheaf and Don on the Sheffield and Don canal and on the Sheffield and Manchester and the Sheffield and Rotherham railways, 141 m

N K W London The site of the town was originally confined to the angle formed by the two rivers, but has gradually extended to a considerable distance along the slopes which rise from them, and where not densely covered with houses, presents many villas and other detached residences, distinguished both by the elegance of their architecture and the pleasantness of their localities. As a whole however, the town is both irregularly and indifferently built, consisting, particularly in its older parts, of steep and narrow streets, and brick houses often of an antiquated and poor appearance. In the more modern parts the streets are both wide and straight, and many of the shops are remarkable for their elegance, though the clouds of smoke rising from the public works come everything to assume a very dingy hue. Almost all the streets are well paved and well lighted with gas. The communication across the Don is maintained by four bridges, three of them of stone and one of iron, there are also several bridges over the Sheaf including a large space, forming a part of the Norfolk works.

The parish, which is co-extensive with the borough, contains 20 churches, and other places of worship in connection with the Establishment, and about 26 belonging to Dissenters of

various denominations, of which the most numerous are the Wesleyan Methodists, Independents, and Baptists. Among the churches the most deserving of notice are the original parish church, a spacious cruciform structure, erected in the reign of Henry I., surmounted by a central tower and spire, and containing among other interesting monuments, a bust remarkable as the first production of Chaucer's chisel; St. Paul's a handsome Gothic edifice, with a dome and tower, St. James, with a well-arranged interior and an E. window containing a beautiful painting of the Crucifixion; St. George's, St. Philip's, and St. Mary's, covered externally with a profusion of grotesque beads and other ornaments but well arranged within, and consisting of a nave and aisles, separated by ranges of light clustered columns, which support a lofty and richly groined roof. Among the Dissenting places of worship, notice is due to the Wesleyan Brunswick chapel, which has a very imposing appearance, and the R. Catholic chapel a cruciform building, in the Decorated style, with a tower terminating in an elegant crocketed spire, 200 ft. high. The other more important buildings are the townhall, a neat and substantial stone structure, with a cupola the Cutlers' hall a handsome Grecian edifice with a Corinthian portico, the Music-hall, with a library and literary society in the same building, the council-chamber, a spacious building with a portico of 16 massive pillars, the market-hall, with a roof of iron and glass, the assembly rooms, theatre, barracks, public baths, and the Victoria railway-station with the viaduct immediately adjoining it. The educational and literary establishments are the free grammar-school the Wesleyan Proprietary grammar-school or Wesley college, occupying a very handsome structure, the college a proprietary school the people's college, the national British charity, infant, ragged and various other schools, the school of design, the mechanics institution and lyceum for which complete and even elegant accommodation has been provided, the ribband-mill, the literary and philosophical society, possessed of a good museum, the medical hall the public subscription and the mechanics libraries. The principal benevolent institutions are the general infirmary the Shrewsbury and Hollis hospitals, the licensed travellers' asylum, Deakin's charity, recently founded and several valuable charities under the management of the cutlers company. To the other objects of interest already mentioned may be added the general cemetery situated on the slope of a hill about 1/2 m. from the town, and covering a well laid-out area of about 14 acres, and Brightside Brierley cemetery near Pitmeor, of 27 acres, and four smaller ones, the botanical gardens, finely situated near the general cemetery and the park, consisting of about 40 acres of pleasure-grounds.

The oldest staple manufactures are all kinds of cutlery including knives, scissors, razors, edge-tools, files, and rasping instruments. In each of these branches great numbers of workmen are employed, and the articles produced are well known and esteemed in all the commercial emporia of the world. Steel also is made in vast quantities, not only for the supply of the local demand, but of the general market. For this purpose Swedish iron is mostly employed. Another celebrated branch of manufacture is the plating of articles of copper with silver, and in connection with it the process of electroplating has recently attracted considerable attention. A great number of hands are also employed on what is called Britannia-metal, which is made to form a cheap substitute for almost all the articles made more expensively from the precious metals and by the operation of what is termed gilding the horns and heads of animals are converted into many useful and elegant forms. Other leading articles are optical instruments, including especially the grinding of spectacle-glasses, and in the more numerous articles of stoves, grates, and fenders, Sheffield holds a decided pre-eminence both in cheapness of price and elegance of design. In connection with the staple manufactures of the town are numerous extensive iron and brass foundries, grinding, tilting, rolling, and slitting mills, &c. The social condition of the workmen is generally superior. They receive large wages, and live for the most part in separate townships.

Sheffield is supposed to have been originally a Roman station, and is certainly of great antiquity. It existed as a town under the Saxons, and is mentioned in Domesday-book as a manor. In 1296 Edward I. granted it a charter to hold a

weekly market and an annual fair, and in the 14th century the mention of the Sheffield 'thyrill' or whittle by the poet Chaucer, who flourished under Edward III. indicates that it had already become noted for its cutlery. In the early part of the 16th century, the domain passed by marriage to the celebrated soldier John Talbot, Earl of Shrewsbury, who built in the vicinity of the town a manor-house, which possesses some historical interest as connected with the custody of Cardinal Wolsey and Mary Queen of Scots. A splendid castle erected in the reign of Henry VIII., was completely demolished by the Parliamentarians during the civil war. The history of the earliest manufacture of Sheffield is involved in considerable obscurity, but there cannot be a doubt that, like many other English towns, it profited essentially by the bigotry of the Duke of Alva in the Netherlands and was abundantly compensated for the asylum which it afforded to the victims of his persecution by the industry and mechanical skill which they imported. From the date of their arrival its cutlery acquired new celebrity. Its progress as a town, however, though steady was not very rapid and it is only since the middle of the 18th century and during the course of the present century that it has made its most important advances, and risen to a prominent place among the great manufacturing towns of the kingdom. Its privileges as a municipal corporation were first conferred by the Reform acts, according to which it is governed by a mayor, 18 aldermen, and 48 councillors and sends two members to the House of Commons. Pop. 130,810.

SHELFKATIL-SU, a small river, Asia, which forms the boundary between Russia and Turkey on the E. side of the Black Sea, into which it falls at lat. 41° 55' N., lon. 41° 45' E. As its embouchure is on its E. bank, is the small Russian fort St. Nikolai where is a quarantine station.

SHEIK (IK, several places, Arabia —1 The chief town of a district of same name, on the E. coast, extending 1 m. along shore the Sultan's residence, a fortified castle on an eminence near the centre being in lat. 14° 48' 40" N. lon. 49° 49' E. The only other large buildings are a few mosques and a custom house. The town has a triangular shape and the dwellings are irregularly scattered but they are tolerably spacious and comfortable. It is a place of much trade. The main business is chiefly coarse cotton cloth, gunpowder, and implements of war. Provisions may be easily obtained here, but the water is bad. The anchorage is only an open roadstead with clean sand in 7 or 8 fathoms, 1 m. off shore. Pop. about 6000.—2 A to a few m. S.W. the town just described, lat. 14° 38' 30" N. lon. 49° 27' 35" E. formerly an important place but now a village occupied by a few fishermen's families. The former population appears to have removed to SIKIL-BEIR a town lying inland about 4 m. N.W. which is said to contain 4500 inhabitants. Its nucleus may be distinctly seen from the sea above the date-groves, and the valley appears extremely luxuriant plenty of vegetables dates, and good water may be obtained here.—3 A popular appellation, in the Mahri dialect, of the lofty range of mountains, abounding with frankincense and other gums extending from the E. limits of Mahra to Dhofar and Mirbat, which are named in the maps the Mountains of Sejer or Sejer.

SHEIK SHAIN, an Isl. Persian Gulf. See BURNIS.

SHELMERHURST a river U States, Virginia after a

N E course of 140 m. entering the Potomac a little above its

passage through the Blue Mountains at Harper's Ferry. It

is navigable for a considerable distance from its mouth.

SHELDY a n Nubia, on the Nile lat. 16 88 N

lon. 35° 15' E. remarkable as the modern capital of that

territory between the Atbara and the Nile which was anciently

celebrated as the island of Meris. I revolve in the passage

of these countries by the Turco-Egyptians in 1821-3 Shendy

was the residence of the Wed Agib (or Wold Ajib), the dy-

nasty which had long divided with the rulers of Sennar the

supreme control of the Ethiopian plain. For it is worthy of

remark that the political divisions of Ethiopia which are

traceable in the earliest histories, still subsist, though in

ruins at the present day. We may now study in Shendy

the circumstances which gave Meris its importance. It is

on the road from Sennar and the gold-countries in the S. to

Egypt, and also on that from Kordofan and Darfur to Sennar

on the Red Sea. Nearly all the caravans of the country pass

through it. Hence, before the Turkish conquest, it was a

populous town with 1000 houses, but it is now in decay. The

natural limits on the S. between the Wed Agib and Sennar

are formed by the granite mountain chain of Ghirre or

Gweri, below which is the passage from the desert of Bah-

yada and the E. bank of the Nile. From these heights a

lateral ridge of moderate elevation proceeds N E at a little

distance from the river and ramifying incloses some spacious

lowlands, which, under the influence of the occasional rain, are

extremely fertile. By means of water-works and artificial

irrigation, they might be rendered very productive, and thus

we explained the existence of ancient cities, the ruins of

which are now in the desert, at a considerable distance from

the river. The chief of these are the ruins of Meris in lat.

17 0' N near the village of Degrawish, N.E. of which is an

extensive plain covered with pyramids. Other ruins (tem-

ples, tombs, pyramids, &c.) are situated at Es Sofra and Naga,

respectively 9 m. and 30 m. S.W. of Shendy. These remains

are entirely anterior to the Christian era, and the chief structures

seen all to have been erected by a queen named Kandake.

The chief ruins on the island of Meris, are the Blackwall

(who have some villages on the Atbara) the Jafin, and the

Kowah (Hercules's Wife) Cailland, Fay & Meris,

Ilkass & Tree in Ethiopia, Lepsius Briefs.)

SHERINGHAM, a par. England, co. Norfolk; 5 m. W. Cromer. It consists of the two distinct villages of Upper and Lower Sheringham, the former containing the parish church and the latter seated on the cliffs which overhang the sea and has a paper-mill, and a considerable number of boats employed in the herring fishery and in taking ool, skate, lobsters, crabs, &c. Area 2356 ac. Pop. 1874.

SHERINGHAM two pars. Eng.—1, Bucks; 1780 ac. Pop. 698.—2, Wilt; 1890 ac. Pop. 139.

SHERSTON two pars. Eng. Wilt.—1, (*Megow*); 4280 ac. Pop. 1689.—2, (*Parce or Puckridge*); 950 ac. Pop. 175.

SHERWILL, par Eng. Devon; 4703 ac. Pop. 725.

SHEWELL, or **SEWELL**, a group of islands in the Atlantic, to the N. E. of the mainland of Scotland, between lat. 56° 51' 13" and 60° 51' 40" N., and lon. 0° 45' and 1° 46' W.; greatest length, S. S. W. to N. N. E., 70 m. greatest breadth, about 50 m. area, 880 sq. m. They unite with the Orkneys, from which they are separated on the S. by a channel about 46 m. wide in forming a Scotch county, and are 90 in number. Of these some are mountain sides, only 25 are uninhabited, the largest being the following.—Thorne, Whist, Fetlar, Yell, Unst, Foula, Papa-Storey, Barra, Muckle-Koe, Fair Isle, and Mainland. The last mentioned so far exceeds the others, that at least three-fourths of the whole area of the group belongs to it. The coasts are generally bold and precipitous, presenting cliffs broken into the most rugged and fantastic forms, and though, for the most part, under 500 ft. attaining in the mural precipices of Foula the height of 1200 ft. above the sea. Their deep creeks and sounds form a succession of noble natural harbours. The interior is not very elevated, the highest summit, Bonness Hill, in the N. of Mainland, rising 1476 ft. but is extremely wild and rugged, and but for the almost total absence of wood, which is confined to a scanty supply of stunted birches, willows, and mountain-ashes, would furnish scenery not merely of a varied, but a very picturesque description. The strata consist of a few secondary rocks, chiefly sandstones and conglomerates of the Devonian or old red sandstone formation, and large concretionary tracts of gneiss, which extend through the centre of Mainland from the whole of Yell and terminate in the N. at

The gneiss often contains beds of blue limestone, which is even occasionally blended with it. Mica-slate is less abundant, but clay-slate forms the principal part of the cliffs on the W. side of the long and narrow promontory on the N. of Mainland. The principal igneous rocks are sienite, serpentine, and granite, the last forming the great mass of Bonness Hill already mentioned. The only mineral of any consequence is chromite of iron, which occurs occasionally in veins, but more frequently in a detached and concretionary form, and is exported in a crude or partially calcined and levigated state, to be converted into a pigment, dye and alloy. The soil, where the surface is flat enough to retain it, is generally mossy, but alluvium of good quality is not uncommon along some of the bays and in the small valleys, and a considerable quantity of tolerable land has been made by long culture. The principal crops are black oats here, and potatoes. Turnips thrive well and a good deal of hay is obtained from natural meadows. Its quality however owing to bad harvesting, for which the moisture of the climate is made an excuse, is very indifferent. The live-stock, including cattle, horses, and sheep, are of races almost peculiar to Shetland and are chiefly remarkable for their diminutive size and hardihood. The pony in particular, is well known, and is not surpassed by any of his own dimensions in any country and both the milk of the cow and the beef of the ox are of excellent quality. The fisheries are valuable, and include herrings, saithe, cod ling and tusk. The last two have long formed Shetland's staple articles of export. The other articles are oil, butter, beef, cattle, ponies, and horses. The hosiery consists of various articles made by knitting, and since knit has ceased to be profitable, may be said to be the only native manufacture. For ecclesiastical purposes Shetland is divided into 12 parishes and education is so generally diffused that writing and arithmetic are generally acquired and the art of reading is nearly universal. The people are diligent in stature and strength, but are hardy and patient of fatigue. Their temperament is sanguine, and more versatile than persevering. Among their moral qualities, hospitality and sobriety hold an honorable place. Their language is English, but their Norse origin is unquestionably indicated by their accent and many of their words, idioms, customs, and superstitions. The antiquities confirmatory of the same origin consist of numerous so-called *barrows* or fortified posts, standing-stones, and tumuli. Lerwick is the only town and the two chief villages are Scalloway and Hilloswick, both on W. coast of Mainland. Pop. 81,078.

SHEPPLANDS (New South) a group of islands, situated to the S. of Cape Horn and forming with it the passage between the Atlantic and the Pacific Oceans between lat. 60° 22' and 67° 15' S. and lon. 44° 08' and 68° 15' W. The group forming an archipelago of numerous islands, without a vestige of vegetation except a species of moss found upon the rocks near the shore while the more remote parts, which are mountainous and apparently volcanic, are covered with perpetual ice and snow was first discovered in 1819, by Mr. Wm. Smith of the brig *Williams* of Mythic, and shortly after was much visited by whalers, who made a valuable harvest, till by their ravages the number of the animals was much reduced. Among the islands may be mentioned Adelaide, conspicuous by its range of snowy mountains, with a single peak shooting up into the clouds. Bridgman consisting chiefly of a volcanic cone, indicating its activity by the smoke issuing from it, Smith, so called in honour of the first discoverer. Saddle, with a peak 1645 ft. high. Coronation or Mainland the largest of the group; and Desolation nearly in the form of a horse-shoe, consisting of volcanic precipices, which are evidently the edges of an extinct crater. These islands, owing to fog and ice, are very dangerous to navigators, and hence Capt. Ross when visited them in 1843, gave to a small group the name of Unhappy Isles.

SHEPPLAND a vil. and par Scotland so Lennox; 5 m. E. Glasgow with an Established and a Free church, two schools, manufactures of cotton goods, and a large magisterial establishment. Pop. (par) 1,6564.

SHEVAGU, a to Hindoostan S. Carnatic, 80 m. S. W. Tanjore. It is a large clean place, adorned with noble clumps of bamboo and other trees, but though long the capital of a Hindu principality, does not possess any ancient edifice deserving of note.

SHEVIOCK, par Eng Cornwall 3227 sq. Pop. 578.
SHIAKOTAN an Isl Kurile group lat. 49° 52' N; lon. 154° 8' E. It is 12 m long from N to S.S.W. and lies 8 m W & W. of Chersanoban.

SHIEL (Loos), a fresh-water lake, Scotland, which separates the co. Inverness from that of Argyll. It is about 15 m. long, but is extremely narrow. It discharges itself by a small streamlet into the sea, near Loch Moidart.

SHIELDS (Newen and Borty) two tns. England situated respectively on the N and S banks of the Tyne near its mouth in the German Ocean, and forming the common port of Shields—1 (North), a market tn and mun. and par. bur. co. Northumberland, 8 m E.N.E. Newcastle. It extends about 1 m. along the river and consists of an older and a more modern portion the former with narrow streets and lanes and the latter with spacious streets and squares in which many of the houses have a substantial and even elegant appearance.

The principal buildings and establishments are the parish church a handsome modern chapel of ease, Baptist, Independent, Wesleyan and New Connexion Methodist Quaker, Scottish, and R Catholic chapels national British, infant and other schools an elegant cornhouse in the Elizabethan style, a townhouse, subscription library mechanics institute, theatre, assembly rooms commodious baths and various banqueting saloons, among which the most conspicuous is an asylum for demented master-manners, consisting of a semi quadrangle of nine houses with a statue of the Duke of Northumberland in its centre. The chief industrial establishments are building yards, roperies sailcloth hat glove, starch and tobacco factories salt-works, a large work for earthenware and stained-glass numerous iron foundries, a manufactory for steam boat engines, and several forges, in which, beside other articles chain cables and anchors are manufactured.

Other Shields unites with Tyne-mouth in sending a member to Parliament. Pop. 8882.—2 (South), a market tn, mun. and par. bur. co. Northumberland, and communicating with it by a steam ferry. The older part consists of long narrow streets stretching along or parallel to the river but the modern part, immediately behind occupies a higher site, possesses many handsome ranges of buildings and has on its E side a kind of suburb containing many pleasant villas. The public buildings and establishments include three Established churches, one of them with a square embattled tower another with a spire and the third with a tower and some fine old mansions belonging to an ancient chieftain whose site it occupies a U. Presbyterian Scotch, an Independent, a Primitive Methodist, two New Connexion Methodist, two Baptist two Presbyterian, and three Wesleyan Methodist chapels, a neat and commodious town hall situated in a large square near the centre of the town, and partly employed as an exchange and newsroom while a range of colonnades beneath serves for a market place; a subscription-library a mechanics institute a theatre, national and other schools, and several benevolent endowments. The chief manufactures are glass earthenware, extensive alkali and chemical works, cordage, steam-engine boilers and chain-cables and anchors.

Ship-building once carried on very extensively has declined, and the branch of industry is now confined to the repairing of vessels. A stone pier of considerable length is being constructed at the mouth of the harbour. South Shields was enfranchised by the Reform Act and sends one member to Parliament. Pop. 28,974.—The port of Shields, including both the above towns and by an expansion of the river into a wide bay capable of containing 2000 merchant vessels, is of very difficult access, but admits ships of 300 tons to load at its quays, and carries on a very extensive trade, particularly in such from the extensive collieries in the vicinity. It has also several vessels engaged in the whale fishery. Registered tonnage of the port in 1851, 723 vessels carrying 165,613 tons, in 1864 1088 vessels, of 268,748 tons. Number of vessels entered in 1844 1224 carrying 228,929 tons cleared 1047 carrying 185,215 tons. The port communicates by railway with all parts of the country.

SHIFFHALL, a market tn and par England, co. Salop. The town 16½ m. E. by S. Shrewsbury, has an ancient church place of worship for Baptists and Independents, and a small charity school. Area of par., 11,441 ac. Pop. 6617.

SHIKAMPUR, a village in the N part, 18 m. from W bank Indus at Sukkur and on the high S route from

India into Afghanistan lat. 37° 55' N lon. 68° 48' E. It stands in a low plain flooded during inundations of the river and is surrounded by thriving orchards, date groves, and orange-plantations. The buildings are very indifferent, and streets narrow and very filthy, it has not a single public edifice worthy of note and two or three mosques, the bazaar, which extends for ½ m. through its centre, and is roofed with palm-leaves, with some mansions residences of opulent Hindoos inclosed by high walls of brick or earth are the only structures reaching mediocrity. Its trade is however very considerable; it is the great entrepot, particularly for banking transactions between Kandahar and Herat on one hand, Marwar and R. Hindostan on the other, and Kurrahee, at the mouth of the Indus, which forms its port. It has superseded Multan in this distinction within the last 200 years. Some cotton goods and longones or scarfs, esteemed next in quality to those of Peshawar are made here and the place has so thoroughly commercial a character that by far the greater number of dwellings have a shop attached to them. The Scinde canal from the Indus to Larkhans, passes about 1 m. S. the town. Pop. 30,000, one third are M. Malometans, and the rest chiefly Seikims and Hindoos.—(Howe's Geog. Jour. vol. v. Barnes, Masson, Conolly &c.)

SHILLBOY 11 L., par Eng Northumberland 7704 ac. Pop. 118.

SHILKA a river Siberia, one of the head-streams of the Amur (Schilka) river.

SHIRAZ, s. in Persia, prov. Fars, on a large and beautiful plain, 320 m. S.W. Isfahan. It was almost entirely destroyed by an earthquake in May, 1853 but previous to that event, though much declined from the splendour which it possessed in early times, when it was the Persian capital was a place of considerable importance, with a pop. estimated at about 50,000. It was of an irregular form, surrounded by walls flanked with towers, and entered by six gates. One of them forming the principal entrance, opened upon the vast gallery of a very large bazaar, one of the most handsome in Persia, and several streets, though less spacious, had a very respectable appearance. In general however, the far greater part of them were narrow and winding. The houses, built of brick, seldom possessed any architectural merit. Among the principal buildings were 90 mosques, the only one of which deserving of particular notice was that of Shah Taherak one of the most ancient sanctuaries of Shiraz, and set apart as the residence of impoverished descendants of Malomet, several beautiful mausoleums including those of the celebrated poets Hafiz and Saadi both natives of the town, and the Akh, or governor's palace situated in the midst of a magnificent garden, Shiraz, extravagantly situated on the route from the port of Basra to Kerman, Yazd, and Isfahan, was the centre of a very extensive trade. It had also considerable manufactures of silk and cotton goods, fireworks, sword-cutting glass earthenware &c. Its lapidaries and enamellers were celebrated throughout all Persia. Its vicinity exhibits the remains of many magnificent buildings, and about 25 m. N. E. are the famous ruins of Persepolis.

SHIRWAN, or SHIRVAN a dist. Transcaucasian Russia, gov. Baku, on the coast of the Caspian Sea bounded N. by Daghestan and the mountains of Aghstser, and S. by the river Kura. It was obtained from Persia by the peace of Gulistan; and is inhabited by Turcomans, Lezgians, Persians, and Georgians. Pop. about 12,000

SHIRDRA s. in Russia. See JIZOKA

SHILLINGTON a township, England co. York in the valley of the Calder 6 m. W.S.W. Wakefield, consisting chiefly of the three hamlets of Middle, Over and Nether Shillington with two Wesleyan chapels, woollen manufactures, coke-furnaces, and quarries of good building-stone. P. 1968.
SHILLINGTON par. Eng. Bedford 6690 ac. P. 1598
SHIOA (Kiamooz) formerly a prov. of Abyssinia, now an independent state the E. portion of which is known by the name of Efiat. It is situated in the S. part of Abyssinia, lat. 9° to 10° 50' N. lon. 38° to 41° E. but its S. and W. boundaries the former at one time marked by the Hawash are merely nominal being from time to time pushed further and further into the adjoining countries.

Shoa forms a series of plateaus at least 8000 ft. above sea-level. It is traversed by five mountain-chains, chiefly bearing N. and S. with spurs E. and W., with a nearly uninterrupted ascent. The loftiest summit is Mount Merataie in the vicinity of Ankobar, the capital. It attains an elevation of 10,738 ft. above sea-level, and overlooks a plain of nearly 5000 ft. of absolute height. The mountains are most abrupt and difficult of ascent, and between them are sometimes formed chains of a depth that admits the sun but a few hours. Cataracts are met with some of them 700 ft. high. The rivers, in some cases, descend 6000 ft. in the space of 500 m. In that part of the kingdom called Efiat, the hills are more rounded, and their slopes are highly cultivated, yielding large crops of grain, chiefly wheat and barley of the former of which there are no less than 24 different species in Shoa. In the lower and warmer districts, cotton is extensively cultivated. The table-lands of Shoa, are used chiefly as pasture-

grounds, though they have a deep black soil of great fertility. They are destitute of wood, and their climate is cool and healthy though often extremely cold. The valleys and more gentle acclivities throughout the whole kingdom are well cultivated, and productive to an extraordinary degree, every species of crop attaining the most gigantic dimensions. The soil generally consists of decomposed basaltic lava, the large supplies of moisture which this kind of soil requires descending copiously from the mountain sides. The valleys of Shoa are generally exceedingly beautiful, being finely wooded, and filled with a luxuriant vegetation but in summer they are insufferably hot, close, and unhealthy, and at the termination of the rains a fatal fever sets in, compelling all who can to seek a purer atmosphere in the higher regions. Amongst the trees peculiar to this country is the gippanic *Juniperus excelsa*, which attains a height of 160 ft. and a diameter at the base of 4 ft. to 6 ft. in the course of a century. The other principal forest trees are the yew *Taxus alagoa* usually about 60 ft. in height and the *Olea spectabilis* 60 ft. to 80 ft. in height.

Since the reduction (about 1840) of the savage Galla hordes by which the kingdom of Shoa was frequently attacked, the trade of the country has greatly increased and a demand for European goods and manufactures has arisen. The resources of the kingdom are great, and its position favourable for opening an intercourse with the interior of N. E. Africa. The nearest port to the E. frontier is Zeila or Zeila, on the Sea of Bab-el Mandeb distant in a straight line about 150 m., but by the usual route through Ess-Bonall and Harir, about 200 m. Some traffic is carried on, also through Berber likewise on the Sea of Bab-el Mandeb and distant about 300 m. The principal exports, being the production of the country are grain and a coarse but warm and durable cotton cloth manufactured in large quantities on every farm. To these might be added the productions of the countries around a few being those of Shoa also, namely, oxen, gold-dust, very precious gums and spices, including galls, natron, feathers, pultry, civet, sulphur, coarse parchment, dye-woods, medicinal plants, hides, shark-skins, &c. The imports most in demand are broad-cloth blue and scarlet, bright chintzes of high colours long-cloth, white alawia, tartans, blank paper books, well bound, woollen rugs, lances, coloured silk-threads, the deepest blue glassware, gilt galloon buttons, black pepper and cloves amber and coral beads, spectacles and seasons knives of all sorts, sword blades and spear heads, guns and pistols, coloured leather, crumens and green portulac blue and brass, coloured sheep-skins, crumens; paddocks, iron cooking pots of all sizes, blue silk cord and of deepest blue razors and mirrors imitation jewellery ear-rings, &c. The king's duties are 10 per cent. on all exports and imports, while several of the former including gold dust, ivory and sulphur are royal monopolies. The royal revenues, independent of tribute in kind, are said to amount to about 413,000 or 413,000 according chiefly from import duties on slaves, foreign merchandise, and salt. The annual expenses of the state are estimated at about 216,000. The few tribes of Shoa include working in iron brass, and silver tanning weaving and making rude earthenware. Weekly markets are held at several places in Shoa, where goods of every description are exposed for sale. The principal of these is Ali Ambel, near Ankobar the capital, the only other important town is Angolila.

Christianity appears to have been introduced into Shoa in the thirteenth century and continues still to be practised though in a degraded form—mixed up with Judaism, Mahomedanism, and paganism—by a large number of the inhabitants. The head of the Shoa hierarchy is entitled Abome, in whom alone is vested the power of ordination. He is appointed by the Patriarch of Cairo, who receives about 21000 at each appointment—a large sum of money in such a country, and rendering the life of the Abome especially precious. The clergy are very numerous, and form the most enlightened class of the community. They comprise priests, monks, and the corporation of *deferas*, the last of whom supply the services, the suggest the masters of ceremony and the directors of the temporal goods of the church. The priests may marry once, but the monks are tied down by very strict vows. A layman may marry four times, but not a fifth. Churches are numerous, for whoever builds one believes he has pur-

chased pardon for all his sins; but they are buildings of no architectural pretensions, being, like the ordinary houses, circular edifices surrounded by a conical roof. Morality is at a low ebb, and filth and dirt prevail in every dwelling. The bulk of the nation is agricultural but every Christian subject is compelled, under a penalty to follow his governor to the field whenever summoned. From the king to the peasant, the costume of the men consists of a large loose web of coarse cotton cloth enveloping the entire person in graceful folds, but well-nigh insulating the wearer from external

CHRISTIAN WARRIORS OF SHOAL.—From Henry's Illustrations of the Highlands of Siam.

tion. The sword, the spear and the buckler are the national weapons the first, barely 2 ft. long and rather resembling a sickle than an implement of war is firmly girded to the loins of every male, and protrudes inconspicuously behind. A cloak of prepared lion leopards, or ocelot skin is added by the better classes on the journey or on the foray but shoes or sandals are unknown. Meals are taken twice a-day and new flesh forms the grand allurement of life, the most sovereign comfort being entertained for all who employ a culinary process. The bull is thrown down at the door of the eating-house, its head nearly severed from its body, and no sooner is the breast cut of the carcass than the raw and quivering flesh is heaped round to the banquet. Sour bread made of tef, barley and wheat, is eaten with a stimulating potage of onions, red pepper and salt. Various intoxicating beverages are partaken of, the intoxication brewing and fighting ensue. The Christian population of Shoal and Effat are situated at 1,000,000 souls, and that of the Mahometan and Pagan population of the numerous dependencies at 1,500,000.—Harris, *Highlands of Siam* (Metch d'Hercourt, *Voy dans le Royaume de Siam*).

SHOAL BAY a bay New S. Wales 845 m N.W. Port Jackson lat. 29° 25' S. it receives the waters of the Clarence. Steamers ply between this bay and Sydney.

SHOALHAVEN a river, New S. Wales, which flows N.E. then E. and falls by a broad estuary into the Pacific, 10 m. S.S.W. Sydney. In the upper part of its course it is nearly on a level with the surface of the surrounding country but afterwards flows through a rocky ravine, about 1500 ft. deep. It is navigable for about 20 m. for vessels of 70 tons to 80 tons.

SHOREHAM (New), a market town, port, part bar and par England, co. Sussex, 6 m. W. by N. Brighton, near the mouth of the Adur, here crossed by a suspension-bridge, and on the London and South-coast railway. It consists for the most part of irregular streets and old houses, but has recently been much improved and is paved and lighted with gas. The principal buildings and establishments are an ancient parish church preserving an interesting specimen of Norman architecture independent and Wesleyan chapels, two endowed grammar national, and infant-schools, an elegant custom-house in the Grecian style, a museum, concert hall and theatre. The harbour is encumbered by a bar with 14 ft. to 17 ft. water and was used for some time by the steamers in connection with the above railway. The steamers have been removed to Newhaven, but Shoreham still continues to carry on an important trade owing chiefly to its being a warehousing port for timber, and for W. Indian Madagascarian, African, Russian, French, Dutch, and other produce. In 1851 the tonnage of the port was 103 vessels, of 10,804 tons the vessels entered were 1007 of 90 983 tons, and cleared 430 vessels, of 25 946 tons. Shoreham has long been noted for its ship-building and has a productive fishery, and extensive works for making cement. Area of par, 1710 ac. Pop. 2550. The bar returns two members to Parliament it includes nearly all the rape of Bamber Pop. 80,583.

SHORKOFF, a town Punjab 68 m N.E. Multan. Near it, on an eminence, are some conspicuous ruins which according to a native tradition mark the site of a town, the overthrow of which was conquered by an invader from the W., whom Burnes supposes to have been Alexander the Great. P. 2000

SHREWSBURY a market tn. and mun and pari bor
 England, cap. Shropshire, pleasantly situated on two eminences of a peninsula formed by the windings of the Severn on the Shrewsbury canal and on the Shrewsbury and Hereford railway 128 m. N.W. London. It is very largely built, and consists of several handsome modern houses, interspersed with a much larger number of an inferior description, generally of wood, and often of very picturesque appearance. Part of the ancient walls still remains, and the communication across the Severn is maintained by two bridges, one of them a handsome structure of seven semi-circular arches. The other structures and objects deserving of notice are the remains of the castle, which figured much in the wars between the English and Welsh, and is still conspicuous by its keep, though modernised; the abbey church, so called because originally attached to a magnificent Benedictine abbey and still though deprived of its original character by alterations, presenting several features of ancient grandeur; St. Chad's church, a handsome circular edifice in the Greek style, with a rustic tower, St. Mary's, of ancient date with a lofty and finely proportioned spire two other parish churches, Baptist, two Independent, Wesleyan, Primitive, New Connection, and Welsh Methodist. Sandemanian Unitarian, and R. Catholic chapels; a royal free and richly endowed grammar-school, British, national, and Wesleyan schools, a spacious and handsome town and shire hall elegant public rooms, an ancient council house with richly ornamented wooden gateway a white-hall equally ancient, a column in honour of Lord Hill barracks, assembly rooms, a theatre, a mechanics institute, a natural history and antiquarian society, with a museum and library an agricultural society a public library an ancient market house, a lunatic asylum and a jail and house of correction. The chief manufactures are thread, linen yarn, canvas large castings and other important works in iron, brass, leather and steel. As the principal depot for Welsh cloth and blankets the town commands a considerable trade, and the salmon fishery of the Severn is valuable. Besides two weekly markets, one of them for corn there are monthly fairs. Shrewsbury appears to have become a place of importance shortly after the departure of the Romans, and in the time of Alfred ranked as one of the chief cities of England. In the reign of Canute it suffered severely in 1016, for having espoused his cause in preference to that of Edmund Ironside. At the time of the Conquest, William bestowed it with most of the shire on Roger de Mowbray, who was created Earl of Shrewsbury and built his strong castle, as well as a wall across the isthmus of its peninsula. Standing on the Welsh frontier it was often exposed to the incursions of the natives, and became so important as a military station that Edward I made it his temporary residence in 1277 removing the courts of king's bench and exchequer to it, and in 1288 assembled a parliament in it. Another parliament met in it under Richard II in 1397, and in 1408, the famous battle, which issued in the defeat of Hotspur and the Scotch Earl of Douglas, his ally by Henry IV. was fought in its vicinity. During the wars of the Roses, Shrewsbury took part with the house of York, and was the asylum of the queen of Edward IV. when she gave birth to the prince Richard and George the former of whom, with his elder brother was afterwards inhumanly murdered by his uncle, Richard III. During the parliament war it assiduously advocated the cause of Charles I, and suffered severely in consequence having been taken by storm. Still its loyalty was unshaken and it afterwards made repeated attempts in the royal favour. Shrewsbury is a bor by prescription and sends two members to Parliament. P 10,561

SHRONELL, par Irel Tipperary 2896 ac. P 661
SHROPHAM, par Eng Norfolk - 2678 ac. Pop. 513.
SHROPSHIRE, or SALOP an inland co. England, bounded N. by Cheshire, the detached part of Flintshire, and a corner of Denbighshire; W. the latter county, and the co. Montgomery and Radnor; E. Hereford and Worcester and W. Stafford. Area, 859,550 ac. of which nearly 790,000 ac. are supposed to be arable, meadow, and pasture. The surface is extremely varied—in some parts rugged and mountainous, in others comparatively level. The highest summits attain elevations of from 1000 ft. to 1728 ft. above sea-level. The new red sandstone occupies the whole N. portion of the county, and the old red sandstone a considerable part of the S. division. Another portion comprising about one-fourth of its surface is composed of the stratified rocks of the Silurian and Cambrian systems. The principal mineral products are iron coal lead limestone, and freestone. Some of the coal-fields are very extensive, and very productive. The soil is various, but generally fertile, and is on the whole well cultivated although there are extensive tracts of waste-land, and considerable portions of the elevated districts too barren or rugged to admit of cultivation. The principal crops are wheat, barley oats, peas, vetches, turnips, potatoes, and beans. In the S. and W. breeding and dairying are carried on to a considerable extent. A good deal of cheese is made, and large flocks of turkeys are reared. The manufactures include that of iron to a very great extent—china-ware, carpets, gloves, and flannel. Shroveton returns 11 members to Parliament—four for the county, and two for each of the boroughs of Shrewsbury Bridgenorth and Wemlock and one for Ludlow. Pop. 239,441

SHUJABAD a tn. to Punjab; bank Chenab 80 m. E. by W Multan. It is large, and its lofty and irregular fortifications give it externally an imposing appearance. It has a good bazaar, and manufactures of cottons, and turned ware of a superior kind. It was taken by Lieut. Edgewood in his advance to Multan in June 1849. Pop. 4500. —(*Dumley Geo. Jour.* ix. 69 &c.)

SHULJANTOOL, a small tn. Punjab of about 500 houses, 8 m. E. Attock lat. 33° 53' N. lon. 72° 26' E. It is remarkable for a spring of mineral water, and a place of accommodation for travellers built near it by one of the Mogul emperors.

SHUMLA a tn. in European Turkey, Bulgaria in an extensive basin enclosed by lofty hills of the Balkan range, 133 m. N.W. of Constantinople. These hills, which present steep faces, particularly on the S. side of the town and also on the N. facing the valley immediately beyond them form a kind of natural ramparts, to which much additional strength has been given by a series of outworks, particularly on the E. where the hills though lower, are from their shape and position well adapted for this purpose. In this way the heights around Shumla form an entrenched camp which if at all defended, cannot easily be forced but which at the same time, from its extent requires a very numerous force to defend it. In addition to the fortifications on the heights, the nearer approaches to the town are protected by several strong redoubts and batteries, and also by a citadel, which occupies a very commanding position and is in excellent repair. Owing to the strength of these works, a regular war appears to have been considered unnecessary, and the only thing of the kind which Shumla possesses is an earthen rampart and fosses, confined to its E. side. There is little in the town itself to attract much attention. It is for the most part indifferently built; but has a large square, usually the scene of much activity several handsome mosques, beautiful baths, and the magnificent mansions of the great vizier Djemal-Hassan-Pasha. The most conspicuous modern build-

are two large barracks, a building for the artillery and train, a powder-magazine, and several other magazines and provisions, all erected in the most substantial manner and on the most approved principles. The principal manufactures are silk-thread and silk-goods, woollen stuffs made into dresses for Constantinople, and leather. The trains in these, and in wine and hardware, is considerable. Pop. 20,000.

SHUNA a small ill. Scotland, W. coast, co. Argyll, between the larger island Luing and the mainland, from which it is separated by a channel not exceeding 1 m. in width. It is about 2½ m. long and about 1 m. in width at the broadest part. It is noted for its slate and limestone quarries.

SHUPA YU'S a small in Chabura, at the base of a hill close to the Harupor or Daulimur river lat. 28° 45' N. lon. 74° 44' E. The summit of the hill is 7480 ft. above sea-level, and the elevation of the town 6530 ft. Close to this town was fought, in 1819 the decisive battle by which the Duke won Chabura from the Afghans.

SHURDINGTON (Gleaze), par. Eng. Gloucester, 583 ac. Pop. 178

SH'ISTER, a city Tarna, prov. Khuzestan 170 m. W. by S. Isfahan. 1 bank Karoun here crossed by an ancient bridge about 300 yards long. It is surrounded by a wall of whitest bricks, flanked by semicircular towers, and washed by an artificial canal on one side, and the Karoun on the opposite. N. from the town and outside of the present walls, are considerable remains of an ancient city chiefly of unbaked bricks. The r. bank of the Karoun is chiefly of rock, and rises abruptly from the river. It contains numerous excavations, generally in two rows, one above the other. A little to the N. E. of the bridge, rises a bluff hill of sand rock on which stands a castle part of which is very ancient. Shuster contains 10,000 to 12,000 houses, but the number of inhabitants is not supposed to exceed 15,000 having been nearly depopulated by the plague in 1832.

SHI T'U, a pass, Hindoo Kooch, from Afghanistan to Turkistan. The summit is in lat. 3° 33' N. lon. 68° 6' E. and supposed to be 13,000 ft. to 15,000 ft. above sea-level.

SHI'AN, par. Ind. Tipperary 909 ac. Pop. 151.

SHI'AN or **SHI'AN** a large town in China, prov. Shensi, on the left bank of the Hoang-hi, lat. 34° 10' N. lon. 109° E. It is surrounded with thick walls strengthened by towers here a numerous garrison and is reputed the second city in the empire after Peking. Pop. 300,000.

SHI'N a river in China prov. Kansu r. bank river of same name 116 m. N. W. Lan-chow-fu. It is large, but thinly inhabited and in several places is almost in ruins. Strangers, such as Tartars, Tibetans and others are not received in 1904, but are lodged and boarded gratuitously in establishments called *houses of repose*, where other travellers are not admitted, but as the strangers accommodated in these houses are for the most part engaged in commercial pursuits, the keepers of them are indemnified for their trouble and outlay by receiving a handsome percentage upon everything bought or sold by their guests.—[Hun.]

SHIAH or **SHIAK** a native name, with cap. of same name E. coast, in Sumatra, between the rivers Bakou and Kemper and extending from the mountains of the interior to the Strait of Malacca, about 180 m. N. to N. E. and as much E. to W. It is traversed near its centre S. W. by the river Shiah, which in the latter part of its course often overflows the low flat lands, which prevail not only in its immediate vicinity, but throughout the whole state towards the sea-coast. Rice, cotton, many kinds of vegetables, fruits, hemp, and above all most excellent sugar, are grown. Good timber, calanet-woods, honey ivory and lacumbe are brought from the interior and game and cattle are superabundant. The coast is lined by several considerable islands, including Bankalis, Padang, Pantur, Bantua, and Bopet, behind which native vessels find good shelter but the whole coast is infested by pirates. Shiah is governed by a sultan, who rules despotically, though often much controlled by his nobles.—The capital, lat. 6° 45' N. lon. 102° E., on both banks of the Shiah river, about 40 m. from the mouth, is a considerable place, and the residence of the sultan. It carries on an active trade with the interior and exports camphor, coffee, wax, dammar, and

ivory, &c. to Singapore and Hong Kong. Vessels from Coromandel fetch piece-goods, and from Penang opium, raw silk, &c., taking back wax, sugar, ivory camphor, gold, rattans, &c.

SIAM (Siam), Thai, Burmes, Siam, an extensive kingdom of S. E. Asia, comprising the centre of India beyond the Brahmaputra, with all the country surrounding the Gulf of Siam lat. 5° to 21° N. lon. 98° 20' to 108° E., length, N. to S. about 660 m., breadth, varying from 70 m. to 250 m. It is bounded, W. by the British Tenasserim provinces and the Indian Ocean (Bay of Bengal) W. W. Burma, N. the free Laos country E. Annam, and on the S. it has a coast-line of 1470 m. along the Gulf of Siam. The exact boundaries, however, are but imperfectly known, and thus, while Crawford (*Sketches to Siam*, p. 436) estimates the area at 190,000 sq. m., Burghese extends it to 324,750 sq. m., of which he assigns 141,175 to Siam proper, 20,420 to Cambodia 108,645 to the tributary Laos, and 24,460 to the Malay provinces.

General Description.—The surface is covered with hills and mountains, except in its central part—the valley of the Menam, which is described as a rich alluvial plain. The highlands bounding Siam E. and W. seem to belong to two mountain chains ranging S. from the table-land of Yun-nan in China, and on either side of the Menam valley. The S. W. of these chains is calculated to reach an elevation of 5000 ft. the height of the E. range is unknown to Europeans. The mountains of Siam Malacca nowhere exceed 3000 ft. in height and especially S. of the isthmus of Kra the watershed between the Bay of Bengal and the Gulf of Siam is less than half that altitude. Off the coast, at a distance of 10 m. or 15 m. and separated by pretty deep channels from the mainland, are numerous islands, mostly rocky and considerably elevated. Of these in the Bay of Bengal the principal are St. Matthew's lat. 10° N. 7° E. Salanga and Pandang (lat. 11° N. 1° E.) and the Laccare group (lat. 8° 30' N. 1° E.) The S. W. of Siam, by far the largest is Yuntien (lat. 7° 30' N.) and next to it are Bardin and Carnan, on the W. side, Koh-kong, and the other islands on the E. side of the Gulf are of considerable extent. The Siamese territory abounds in small rivers, but there are only three great navigable streams—the Saluon or river of Martaban forming a part of the W. border dary the Menam and the Mekon of Cambodia, forming part of the E. boundary. Of these the Menam is most important, as pervading the greater part of the kingdom and almost monopolizing its trade and navigation, but except the lower 80 m. of its course, it is very little known. It is supposed to run by two branches in the S. W. of the Chinese province of Yun-nan in lat. 23° or 24° N. has an estimated course of about 800 m., and falls into the Gulf of Siam by three channels the E. of which (Paknam) is the only one navigable by European sea-going vessels. The only other Siamese river worthy of notice is the Bang-pakung, about 240 m. in length which enters the Gulf at Bang-pakung, about 60 m. E. S. E. of Bangkok, the modern capital. All the Siamese rivers are flooded between June and September, which partly accounts for the fertility of their banks. A large lake is said to be situated about 90 m. N. W. of Bangkok, called Saekado, which communicates with the Menam by the river Talan.

Soil and Climate.—The soil of the whole valley of the Menam is of great fertility, consisting of thick beds of alluvium from the yearly inundations of that river. The more mountainous parts are of sand and limestone, arid, uncultivated or covered with forests. The climate of so extensive a country varies of course with the latitude and the elevation of its surface, but, as in other tropical countries, it has two seasons—the wet and the dry, the former beginning in April or May and continuing till about the commencement of July, when the dry season sets in, and lasts till the following April or May. The temperature at Bangkok is thus stated by Malcolm (p. 141).—Cool season (November to February) 79° Fah., hot (March to May) 85° wet (June to October), 84° Mean of the year, 82° 6'. The mean range of the thermometer is 18. It seldom sinks lower than 72° Fah. On the whole, the country is healthy. Ague and cholera are the diseases mostly rife, and are very prevalent in the wet season.

Geology and Minerals.—Granite and mountain-limestone are supposed to constitute the chief primary rocks, covered in the lower districts with thick beds of soft clay and alluvial sands. Tin, which pervades the whole Malay Peninsula down to its extreme S. point, is found within the Siamese territory

between lat. 11 and 14° N., and the mines in the island of *Raiang*, off the W. coast, are perhaps scarcely less productive than those of *Banum*. Gold not less extensively, though far less abundantly diffused than tin, is obtained in tolerable purity, but the amount obtained is insufficient for the home supply; owing to the great quantities employed in gilding temples and images, and it is accordingly imported from the Malay countries. The most abundant of all the metals in Siam is iron, which is extensively wrought in the lower districts, on and near the upper waters of the Menam. Cast-iron has been sold at Bangkok for a dollar and a half (½ Ba.) the picul of 133 lb. Copper and lead are wrought to some extent chiefly by the mountain-tribes, and both zinc and antimony are found to the E. of the Menam. The last-named metal is raised for the use of the Chinese in smelting iron. The sapphirine, oriental ruby, and oriental topaz, are found in the hills of Chantimban (lat. 18-19°) on the E. side of the gulf, where they are obtained by digging up and washing the alluvial soil. The mines yielding them are a monopoly of the king.

Vegetation.—Rice (called *iso-ann*) and maize are the grains most extensively cultivated. The former, sold at less than 2s. per cwt. is exported in large quantities, principally to China, but none of the latter is exported. Of the tropical farinaceous roots, the Siamese raise the usual varieties, and among others the sweet potato. Coconuts and areca-palms are numerous, especially the former in the lower districts and the oil is extensively exported. No part of the East is more celebrated for the abundance and quality of its fruits. The mango, mangelstein, leeches, durian, rambutan, pomegranate, papaya, guava, pine-apple, and, in short, all the fruits of S. China and Hindoostan, the Indian islands, and tropical America, are luxuriously abundant, and of exquisite quality. The cultivation of the sugar-cane (a product known here in its natural state from time immemorial) was introduced by the Chinese in 1812, and sugar is now an important article of export to China, British India, &c. Black-pepper of good quality to the extent of about 7000 cwt. annually is raised in the province of Chantimban, and mostly exported to China. Tobacco, formerly imported from Java is now raised throughout the country and exported to Cochin-China and several of the Malay countries. Cotton of several sorts is grown and largely exported to the island of Hainan in the China Sea. Cardamoms are plentifully obtained in royal preserves strictly guarded, and the produce is sent principally to China. A gum, resembling benzoin, grows spontaneously in the forests of Laos, and is cheap and abundant. Cambruge is yielded by a species of *Garcinia* in the forests on the E. coast of the Gulf of Siam, and in the Siamese portion of Cambodia (whence its name). In the same districts also are procured large quantities of scented agalla or aloes wood which is both much used by the natives, and sent to the Chinese who employ it for sacred purposes, and use it in their private and public temples. Sappan-wood is procured extensively from the forests between lat. 10° and 15° and in point of quantity it forms the most considerable of all the Siamese exports. It is sent principally to China, but also to Bengal and Europe. Excellent teak-wood abounds in the forests of Upper Siam, and is much used in the construction of junks and temples, but very little is exported. Crawford also mentions a forest-tree, producing a valuable wood of a red colour fine-grained, admitting a good polish and called *pa-roon* by the Portuguese, which is exported and largely employed by the Chinese in cabinet-work.

Animals.—Among carnivorous animals are the tiger and leopard, the bear, otter, musk-deer, the cat and the dog, both wild and domestic. Porcupines, squirrels, rats, and mice are common. The pangolin is found in the forests and its scaly skin is sold to the Chinese, who esteem it for its medicinal qualities. The orang-utong and other species of apes are pretty abundant. Among the ruminating quadrupeds are found seven species of deer, the sheep, goat, ox, and buffalo. The horses are of small size (under 15 hands), and are not much reared by the natives, those in use being principally procured from Kox-man in China. The hog exists abundantly in the forests, and is domesticated by the Chinese residents. The single-horned rhinoceros is met with in unusual numbers, and is hunted for its hide and horn, both of which are exported to China. The principal beast of the Siamese, however, is in the high perfection of their elephants,

which here attain a size and beauty elsewhere unknown, and are held in high esteem throughout India. They are freely used both for riding and as beasts of burden, except at Bangkok, where their use is expressly limited to persons of high rank. A very great additional value is set on white elephants, evidently albinos, which when captured become the property of the king. Alligators, deer, monkeys, and even tortoises, are by no means uncommon in Siam. Among the birds the water-birds and waders are by far the most numerous; game ducks, boobies, cormorants, king-fishers, storks, and pelicans are frequent in the forests abounding with peacocks, pheasants and pigeons, and in the islands are large flocks of mews and sea-swallows, the latter producing the famed edible birds' nests. Crocodiles, crocodiles, and other kinds of lizards, tortoises, and green-turtles are numerous, the last of which, as well as their eggs, are in great request among the Siamese as an article of food, and from their sale add not inconsiderably to the royal revenue. The bee-constructor attains an immense size, and there are many species of snakes. The fish of the Menam are abundant, but of inferior quality. The only insect in Siam worthy of notice is the *Coccus lacca*, which produces the valuable dye and gum, the *lac* of commerce.

Population.—The population includes, besides the native aboriginal Siamese, who comprise the *Tha-na-so*, or lesser, inhabiting the low country, and the *Tha-na-so*, or greater, a tribe of mountaineers, vast numbers of emigrants from other countries, Laos, Cambodge, Malaya, and several half-civilized mountain-tribes with numerous foreign settlers, Chinese, Mahomedans and Hindoos from W. India, Peguans and Portuguese. Crawford in 1832, and Mr Roberts, American ambassador, ten years later, estimate their numbers as follows:—

| CRAWFORD 1832. | | ROBERTS, 1852. | |
|----------------|-----------|----------------|-----------|
| Siamese... | 1,320,000 | Siamese | 1,000,000 |
| Laos... | 540,000 | Laos | 1,300,000 |
| Peguans... | 25,000 | Malay | 300,000 |
| Cambodians... | 45,000 | Chinese... | 500,000 |
| Malays... | 150,000 | | |
| Chinese... | 540,000 | | |
| Hindoo, &c. | 5,000 | | |
| Portuguese... | 2,000 | | |
| Total | 2,780,000 | Total | 2,600,000 |

By both authorities, however the numbers of the Chinese settlers are perhaps considerably underrated for besides 800,000 resident at Bangkok, they are dispersed all over the country, forming almost exclusively the miners, sugar-mans, fustic-traders, and merchants of the entire kingdom. In 1850 Mgr J. Baptista Pallegoux, Evêque de Malles (*Ball Sea*) *Geo* 1852, estimates the total population of Siam at 6,005,500 of which he claims 500,000 as belonging to the R. Catholic faith.

Physical Character.—The Siamese, in common with the Laos, Cambodians, and Malays, are members of the great Mongolian family and of the same race as the people of Burmah and Assam. In stature they do not average more than 5 ft. 8 inches in height, and in personal appearance legs Malacca, i. e. 1840 they come behind any nation I have yet seen especially the women, among whom—and thousands more under my notice—I never saw one who was comely. They have a lighter-coloured skin than the W. Asiatics, but darker than the Chinese, and all classes delight in heightening their complexion by the use of turmeric. Owing also to frequent bathing their skin is remarkably smooth soft and shining. They are inclined to obesity have large lower limbs, and stout long arms. Yet they are by no means a strong or robust people. Their faces are broad and flat, with round prominent cheek bones, a small nose obtusely pointed, and rather hollow at the bridge, a large mouth with rather thick lips, the lower jaw long and square at the back, small black eyes a low forehead, and very sandy hair. Their hair is always black, thick, coarse, and lank, worn close by both sexes except from the forehead to the crown, where it is about 3 inches long and made to stand erect. Both sexes wear the hair alike, and would scarcely be distinguishable, but that the men are better-looking than the women, who are generally very fat, with stout legs and arms and enormously large mouths.

Costs and Manners, &c.—The costume of the Siamese is very simple, consisting in both sexes of a cotton or silk cloth of dark colour wrapped around the body, with the end passed between the thighs tucked in at both ends, and descending below the knees. They reject ornaments in the nose or ears, and

wear no jewels, but are fond of bangles, bracelets, and necklaces, and they almost cover their children with gold and silver chains, armlets, and anklets. They use no turbans but in the sun wear a light hat made of palm-leaves. They universally stain the teeth with an indelible black dye, and the better classes, like the Chinese, permit the staple article to grow to an enormous length. Malacca describes the Siamese as chiefly mean, ignorant, conceited, slothful, servile, mendacious, and deceitful added to which, though very quarrelsome, they are cowardly, and exhibit a national vanity more repulsive even than that of the Chinese. They are, however, temperate and abstemious by no means revengeful obedient to the laws and strongly attached by their domestic ties. The women are not ill treated nor confined, as in some other countries, where polygamy is common, but still they perform most of the labour of the field, work the looms on the river as weavers, &c., and are extensively employed as retail traders. Those of the higher class spend their time in idleness and sleep. Slavery prevails throughout, many of the chiefs having hundreds some thousands of slaves a slave trade is regularly carried on along the Burmese frontier and the Cambodian provinces are periodically invaded by large bodies of Siamese kidnappers. Slaves are sold by their creditors, wives by their husbands children by their parents and some even sell themselves but of the aggregate number of slaves in Siam it is impossible to form even a conjecture.

With regard to food, rice is universally the staple article, mixed sometimes with balachang and dried shrimp or other small fish. The natives also freely partake of a meat-diet as beef, poultry &c. The principal amusements of the Siamese are dramatic representations, singing, playing on rude musical instruments and looking at the feats of dancers and tumblers. Playing chess is a favourite pastime as are all kinds of gambling, firing kites, shuttlecock, and cock-fighting.

Languages, Literature, and Education.—The Siamese language is exceedingly simple in its construction, and forms a connecting link between the Chinese and Malay, and is easily acquired by foreigners. The alphabet consists of thirty-six consonants and twelve vowels and the written characters, like the Burmese and Leguan resemble the Pali and Sanscrit. The roots are few in number—all monosyllabic and there are no terminations to indicate gender number person, mood, or tense. The literature is meagre uninteresting and in point of imagination and force of expression, much below the Arabic, Persian, or Hindoo—the style is simple and literal, but by no means perspicuous and the compositions except epistolary are wholly material consisting of songs, romances, and a few chronicles but the Siamese have no written dramas, nor any history beyond the dry chronologies of their kings. Education is confined to a very limited extent few can do more than read and write awkwardly and perhaps cast accounts.

Arts, Manufactures, &c.—The Siamese have made but little progress in the useful arts. House-carpenery canoe and junk building manufacturing pottery and coarse earthenware, leather dressing, and the construction of musical instruments are their chief mechanical employments. A few rude hand-looms are in operation, chiefly by women, but the fabrics, whether of silk or cotton, are of very coarse quality. Their domestic architecture is in an equally rude and back ward state—the houses of the lower orders being formed wholly of wood or bamboo, roofed with palm-leaves, and mostly raised on piles, as in the rest of ultra-Ganges India. A few only in the capital are built with brick and mortar. Many of their houses, too are constructed on boats which anchor on the river near Bangkok, of the arch they are wholly ignorant. Roads there are narrow and wheel-carriages are all but unknown. On their religious edifices, however the Siamese bestow abundant labour and expense. These are constructed of solid masonry and covered with tiles, having all the wood-work laboriously carved and gilded, and filled with carved and stately images of Buddha.

Trade and Navigation.—Siam has a most extensive trade both inland and overseas, as well as foreign. Every province of the kingdom produces some article in foreign demand, and Bangkok, from its situation on the Menam, has become the great centre of all its commerce. The principal articles brought down from the higher provinces are rice and paddy cotton, teak-wood, and sappan-wood, lac, benzoin,

ivory, and bees-wax, while the districts E. and W. of the Menam furnish gamboge, cardamoms and sugar the Malay provinces the wax, cotton &c. The foreign trade is conducted chiefly with the 8 ports of Anam, Java, Singapore, Pulo-Penang, &c., and occasionally with British India, the U. States, and Britain. Of these however, the most important is China, the trade with which employs 200 to 300 junk annually, having an aggregate burden of about 25,000 tons—mostly built in Siam by Chinese, who also are their exclusive navigators. The junks make one voyage annually, leaving the Menam in June, and returning in December. Their outward cargoes comprise sugar pepper and cotton, spices, tin, cardamoms, agilis and sappan wood, sandal and other woods for cabinet-work, ivory and horn, lac, wax, betel-nuts, salt-fish hides and skins, feathers, and edible birds-nests, for which they bring back in return pottery and porcelain, quinquina, tea, lac, dried fruits, vermicelli, raw and manufactured silks, bankens umbrellas, fans, and many minor articles. The exports to Europe and the U. States comprise sugar and pepper lac benzoin, and gamboge, tin, cardamoms, ivory, horns and hides, and with other minor articles—the imports, all kinds of textile fabrics, shawls, cotton-umbrellas, iron and steel goods, steel bars, lead and spelter, earthen and glass ware all kinds of hardware and cutlery, with firearms, muskets, &c.—the trade being carried on, of course, in foreign vessels. In 1855 a commercial treaty was concluded with Siam by Great Britain, and since then a considerable import and export trade has sprung up, chiefly through the port of Bangkok, rice first an important item of the exports.

Money.—The only coin of the Siamese are silver—merely small bars of silver rounded at the ends, and stamped with a die on one side to represent the value, cowries are used for small change, and are the ordinary medium of traffic—400 cowries make a *phas*, 4 *phas* a *fiang* and 8 *fiangs* a *tal* or *lot*, which is equal to about 2s. 6d. English money. For weights they use the *plien* and *centy*—the former = 133 lbs., and the latter = 23 lbs. British.

Government, Army, Navy and Revenue, Laws, &c.—The government of Siam is a thorough despotism, subject to no restraint, except the apprehension of popular tumult or foreign invasion. The king, therefore, is considered almost, if not altogether in the light of a deity, and addressed as such, his most common designations being 'Sacred lord of lives' 'Owner of all Most exalted and infallible lord, &c. The sovereign, however appears to admit some share of dependence on the Emperor of China, to whom a periodical tribute is sent. Next in rank to the king, but immediately below him, is the *song* or viceroy, one of the most exalted princes, chosen by the king at his accession, to assist him in his duties, and under this officer is a supreme council of ministers undertaking the different departments of government. There is neither hereditary rank nor aristocracy in Siam and the people generally seem to be more slaves, subservient in all things to the pride and caprices of the sovereign. Indeed every adult male Siamese is compelled continually to give a third of his talents in the king's service, though he usually pays in lieu an exemption-tax, or finds substitutes. There is no standing army but every able-bodied male is liable to be called into the field by the mere will of his chief. Good brass-cannons some of them very large, but seldom with proper carriages are made, and mortars are imported. At Bangkok there is the semblance of a respectable navy consisting of scores of war-junks, galleys, and other vessels of various sizes, built on the Cochinchinese model, and mounting heavy guns. But the Siamese are no sailors, and when brought into service, these vessels are manned by the Portuguese population, and officered by Chinese or other foreigners. The government revenue is derived from several sources—1, a poll-tax, 2, a tax on spirits distilled from rice, 3, license-duties on fishing and gambling (both offences against the religion); 4, a shop-tax, 5, monopoly trade-profits from the sale of tin, ivory cardamoms, agi wood, sappan-wood, gamboge, edible swallows-nests, and turtles-eggs &c, imports on external trade, both import and export, 7, a land-tax; 8 tribute from dependent states—the whole amounting in 1854 to a sum, to about \$2,145,000. The military and civil governments are also judges and magistrates, and decide cases subject to appeal to the provincial viceroys. There are written laws, which are made, altered, or amended at the sovereign's

will, but apparently generally formed on the Chinese model. Offences are punished, as in China, by a very liberal and indiscriminate application of the bamboo. No distinction is made between offenders, even should they be priests, nor are pecuniary compositions for crimes allowable.

Religion.—The Siamese profess Buddhism of a very degraded kind, introduced into the country about the middle of the 17th century. The priests are called *teppas*, and it is compulsory on every man to devote the early part of his life to the sacred office. The regular priests live together in large monasteries called *kyangas*, near the temples, divided into six grades and acknowledging the direction of a superior above them all is the *San-kra*, or high-priest, who is appointed by the king, and ranks next to him in spiritual authority. The priests, unlike the laity are always fully and respectably dressed in yellow robes, like those of Ceylon and other Buddhist countries. The moral code of the religion is comprised in five negative precepts—1. not to kill (which extends to animals, plants, and even seeds); 2. not to steal; 3, to commit no impurity; 4, not to tell falsehoods; 5, to drink no intoxicating liquors. Little attention however, is paid to any of these, except by the priests, it being the business of the laity to am, and of the *teppas* not only to be holy themselves but to their holiness to expiate the sins of the people. Their ordinary services are carefully performed and with little attention to decorum, but they have many occasional occasions of an impressive character among which are their funerals or burnings of the dead, whose ashes the survivors usually form into little gilded statues of Gaudama. A Protestant mission from America was established in 1858 and a printing-press, under the superintendence of these missionaries is in operation.

History.—Siam appears to have no place in history prior to A.D. 638 and the credible records go back only to 1350 the date of the foundation of Ayutthia or Yuttha, the old capital. In the same century the country became for a considerable period tributary to Cambodia. The first notice of the Siamese by European writers is an account of an overland expedition against Malacca in 1502 in 1612 an English ship ascended the river as far as Yuttha, eight years after which, the Portuguese sent thither their first missionaries. In 1683 Constantine Phaulcon, an enterprising Greek, became prime-minister, and (like Shing Antran) in 1684 China subsequently introduced the system for European customs and notions. Mutual embassies were at this period sent between Siam and the court of France, with which Phaulcon intrigued to bring about a revolution. The discovery of this, however led to his downfall and death as well as the expulsion of the French. Contests for the throne distracted the country from 1680 till 1750, during which internal Alompra, the victor and founder of the present Burman dynasty seized Merga Tavoy, and Martaban, and overran the whole valley of the Mekong. During the war some of the principal cities moved to Chantabun province, on the E side of the Gulf of Siam, and thus escaped the presence and exactions of the Burman armies. Among these was Pyo-pa-ka the son of a wealthy Chinaman, by a native woman, who gradually gathered followers, and made successful resistance to the new dynasty till at length he drove the Burmans from the country and assumed the throne. With a view to commerce he made Bangkok the metropolis, instead of Yuttha. The kingdom is stated to be no larger and in a better state than ever. The *Tanasserim* provinces are indeed lost; but his dynasty has also recently become possessed of one of the most valuable and fertile sections of Cambodia, embracing the rich province of Battambang conquered and retained in 1809 and recently also it has acquired dominion over the N Malay states of Kedah, Patani, Ligor &c.—(Crawford's *Embassy to Siam and Cochin-China*, Roberts' *Embassy to Cochin-China, Siam, and Malacca*, Malcolm's *S.E. Asia*, Finlayson's *Mission*, Tonkin's *Mission*, Gifford's, in *Roy Geo. Journal*, Moor's *Asiatic Archipelago*, Chenevix-Trenchard, Berghaus' *Ritter's Redlands*, Richardson's *Mission to the Court of Siam*, *Four Asiat. SIAMPA, or Siam, a country, Asia. See ASIA.

SIANG, a village, prov. Yunnan, China, 7 m. N. W. Salween. Pop. 2000.

SIANU, a vil and com. in Sardinia, div. Sassari, on a slope near Sestu. Pop. 1240.

SIANU, an Indian Archipelago. See SIAMU.

SIAS, a river, Russia, issues from a lake in gov. Nizhny Novgorod, flows N. N. W., and falls into the S. shore of Lake Ladoga, 9 m. S. E. N. Nova-Ladoga; total course, about 100 m.

SIATUV, SIATUV, or SIAT, one of the Sangir Is. Indian Archipelago about 50 m. off S. E. point of Ilo, Celebes, lat. (S. E. point) 2° 25' N., lon. 123° 27' E. It is about 94 m. in circuit and at its N. end is an active volcano. On its E. coast, at the village of Ooloo, is good anchorage, protected by a number of small islands. SIATUV is fertile, but cultivated by its indolent inhabitants, and consequently yields only coconuts, oil, and a kind of indurated earth nut. Pop. 8000.

SIATWSK, or SIATWSK, a town, Russia, gov. and 75 m. S. W. Orel, on the Sura and the Lake Maritsa. It contains three stone and two wooden churches, and two monasteries, in one of which the Bishop of Orel once had his palace and has manufactures of earthen and stone ware, paint and verdigris and a considerable trade in corn and hemp. Pop. 5000.

SIBBERTOFT, par. Eng. Northamp., 2048 ac. P. 876.

SIBBERTSWOLD, or SIBBERTSWOLD, par. Eng. Kent, 1838 ac. Pop. 428.

SIBDON, a town, par. Eng. Salop., 1090 ac. P. 60.

SIBERIA, a large section of the Russian Empire occupying the whole of N. Asia between lat. 45° and 78° N. and lon. 60° and 180° E. It is bounded N. by the Arctic Ocean, E. the Sea of Kamishanka and the N. Pacific Ocean, S. the Sea of Okhotsk, China, and Independent Tartary and W. Russia in Europe greatest length from W. to E. about 4600 m. greatest breadth, about 2000 m. estimated area, about 5,517,666 English sq. m. Its administrative divisions, with their separate population are exhibited in the following table—

DIVISIONS AND POPULATION OF SIBERIA

| GOVERNMENTS— | Population 1864 |
|---------------------|-----------------|
| Tobolsk | 1,221,706 |
| Tomsk | 984,511 |
| Jeniseisk | 394,250 |
| Irkutsk | 21,956 |
| RUSSIAN POPULATION— | |
| Tarna-Baikal | 16,034 |
| Yakutsk | 11,865 |
| Amur | 40,000 |
| Chukotka | 38,476 |
| Nenetskiy krai | 117,411 |
| Khantyng krai | 27,151 |
| Chukotka krai | 600,100 |
| Total | 4,770,928 |

This immense territory has much less diversity of surface than might be presumed from its extent. Assuming the meridian of 103° as a line of demarcation, two regions will be formed—a W. and an E., exhibiting a very marked difference in the configuration of their surface. Both regions have their greatest altitude in the S. and may be considered as a vast inclined plane, sloping gradually N. to the Arctic Ocean, but the E. region is traversed in different directions by several mountain-ranges, whereas the W. region, with the exception of the chain of the Ural on the W., and that of the Altai on the S. frontiers, forms a vast plain almost unbroken by any greater heights than a few hills and the banks of the rivers which wind across it. This plain towards the S., has a height of about 3000 ft. above the sea, but towards the N. it so near its level as often to become extensively inundated. For convenience of description, it has been arranged, according to its productive powers in four divisions—the steppe or pastoral, the agricultural, the woody and the moorland or tundra. The steppe, occupying the most elevated part of the plain extends from the S. frontiers N. to lat. 55° and from the W. frontiers, within these limits E. to the banks of the Irtysh. The greater part of it consists of what is called the steppe of Irtysh, and has a bare and almost sterile surface, often incultivated with salt, but also occasionally covered with a scanty vegetation and sometimes even enriched by meads of green pasture, over which the nomadic tribes roam with their flocks and herds. The agricultural division extends N. to lat. 60° though its exact limits cannot be properly defined by a parallel of latitude, since they more properly form a waving line encroaching or encroached upon by the

other divisions, according as the configuration of the surface and properties of the soil are favourable or unfavourable to agricultural operations. In many parts, where it borders on the steppes, it has much of the same character, and has only occasional tracts which have been or can be advantageously brought under the plough and in many other parts, as the same vegetative power which may be employed in growing corn naturally grow trees, perennial forests are often found, but still the term agricultural is properly applied to it, as it is only within its limits that agriculture is successfully prosecuted on an extensive scale, and occupies a considerable proportion of the inhabitants. The division thus named has an extent more than double that of the British Islands, and under favourable circumstances, might furnish subsistence to a very large population, but, as yet, it is only the more fertile alluvial tracts adjacent to the rivers that have been brought under anything like regular culture. Within this division, though not properly belonging to it, is the steppe of Baraba, situated between the Irkutsk and the Ob. The S. portion greatly resembles the steppes of Latvia, though on the whole it is not so arid and has a more abundant vegetation. The N. portion, though flat and swampy is covered with nearly continuous forests of birch and fir haunted by numerous wild animals, including the beaver. This portion of the Baraba or Barabinsk steppes may therefore be considered as the commencement of the wooded division which extends N to lat. 64 and in parts to 66° though in the higher latitude the trees are seldom of very vigorous growth. The whole of this division is covered with vast forests of birch and different species of fir and pine. It is not at all adapted for agriculture, but barley and rye are occasionally cultivated particularly in the vicinity of Beresov near lat. 64 where also turnips of great size are grown. The population, few in numbers, are settled chiefly on the banks of the Ob and Yenisei and live chiefly on game and fish the latter, including minnow sturgeon and herrings ascending from the sea as far as the confluence of the Tom. Wild animals also are very numerous, and many valuable furs are obtained. The last division is that of the moorland or tundra, consisting of a low monotonous flat covered with moss and nearly destitute of trees. It extends along the shores of the Arctic Ocean, and has so rigorous climate that even in summer few are found a few inches below the surface. Here the reindeer exists in vast herds, both wild and domesticated, while bears and foxes are also numerous and furnish valuable furs and the coasts and mouths of the rivers are frequented by immense shoals of fish and flocks of fowl. One remarkable feature in the W part of the tundra is an isolated mountain mass which rises with steep sides to the N of Obedinsk, about lat. 66°, and forms a kind of range divided into five summits, the highest of which attains the height of 4993 ft.

Siberia to the E. of lat. 106° forming nearly one-half of the whole territory has a much more diversified surface than the W region, and owing partly to its general ruggedness and elevation and partly to the greater severity of its climate has much less land adapted for agricultural purposes. The Sea of Okhotsk has a bold and rocky shore, and the country behind rises with a steep ascent till a mountain-range is formed, with a general altitude of nearly 8000 ft. above sea-level. This range, under the name of the Stanovoi Mountains runs nearly parallel with the coast, till it reaches the frontiers of China, where it takes the name of the Jablonoi Mountains, and proceeding W continues for a long distance to form the boundary between the two empires. It then takes the name of the Mountains of Dauria, and throws out numerous ramifications, which continuing W., throw their arms round Lake Baikal, and cover almost all the S. part of gov. Irkutsk. Other ramifications proceeding N form the water-sheds of the numerous affluents of the E bank of the Lena. On both sides of this river the surface continues elevated, and forms a tableland, the interior of which is still very imperfectly known. The best portions of E. Siberia occur in the S. of gov. Irkutsk where, in the lower and more open valleys in the vicinity of Lake Baikal, cultivation has been attempted with success, and the oak and hazel unknown in other parts of Siberia, are found growing freely. In almost the whole of the same government, where the configuration of the surface does not present insurmountable obstacles, all the grains of Europe are grown, and even the mountains and hills are covered during the greater part of

the year with good pasture. Still farther N in gov. Yakutsk, as far as the town of same name, corn is cultivated in patches in the upper vale of the Lena, though the far greater part of it is covered with fir and pine, with so much intervening space between the trees that a good deal of herbage springs up, and helps to nourish the numerous herds of cattle which are kept by the Yakuts and grazed chiefly on an immense tract of low land which extends from the Lena E. to the Aldan. The N part of E. Siberia consists of two distinct portions, the one extending from lat. 105° N. to the lower valley of the Lena, and the other from that valley F to Behring's Sea. The former portion is very imperfectly known, but, from the modes of life pursued by the Yakuts, who have taken possession of it, it is presumed that it consists chiefly of pasture-ground well adapted for the rearing of cattle, or of moorland wastes, on which no other animal than the reindeer is able to subsist in numerous herds. The latter portion, as far as the Kolyms, is traversed from N to S by chains of low hills, separated from each other by wide valleys or open plains, and generally overgrown with numerous larch and birch. In these valleys and plains are numerous lakes, generally well supplied with fish, and bordered by low banks, on which a rich grassy sward is often seen. Another remarkable feature in this locality is the number of *silvery* or dry lakes, consisting of a kind of wide basins, so far below the general level of the surface as to have become filled with water when the rivers overflowed their banks, and yet so shallow that the silt produced by the winter-frost formations drains, through which the water escapes and leaves the lakes almost dry. The alluvial bottom, owing to the richness of the soil immediately on the arrival of summer becomes clothed with the finest turf. When the drainage is less complete extensive meadows are formed covered up with moss or stunted larches, and so destitute of proper pasture that the districts in which they prevail are almost uninhabited. To the E. of the Kolyms, branches of the Stanovoi Mountains stretch N., and form a series of ranges which frequently rise from 2000 ft. to 8000 ft. Some of these penetrate to the V coast, and are seen forming precipitous cliffs at Shelaginsk Nos, Cape North, and other headlands. Other ramifications from the Stanovoi pursue an opposite course, and traverse the remarkable peninsula of Kamchatka almost centrally to its S. extremity.

Rivers.—These are both numerous and of great magnitude. From the configuration of the country they almost all flow in a N direction, and belong to the basin of the Arctic Ocean. The only exceptions are in the E where the Anadir flows E. into Behring's Sea, and a great number of small streams, following the same direction, fall either into the same sea or into the Sea of Okhotsk and in the S. W. where part of gov. Irkutsk is drained by affluents of the Amur and consequently belongs to the basin of the N Pacific. The great rivers belong to the basin of the Arctic flow for the most part through immense tracts of level country and hence are remarkable at once for the length of their course, the volume of water which they accumulate from numerous and important affluents, and the few obstacles which they present to a continuous navigation. The advantages which they offer in the latter respect are diminished by the long period during which they are frozen over; but even then they do not cease to be available for traffic and become, in fact, the great highways of the country. The Ob is one of the largest rivers of the Old World, the length of its course is 2400 m., and the area of its basin is 924,800 sq. m. Among its important affluents, many of them so large as to be entitled to rank as magnificent rivers, are the Irkutsk, and Tobol, which by uniting their streams, more than double its volume; the Tom, Tselum, and Ket. The stream of the Ob forms a gulf from 70 m. to 80 m wide and above 400 m. long. The quantities of fish taken in it, and along the whole course of the river, and in its tributaries, are almost incredible. According to Erman, the quantity consumed in gov. Tobolsk alone, and wholly taken from it, cannot be less than 65,000 tons annually. The Yenisei, the second river in importance, draws its waters from an area of not less than 1,000,000 sq. m. The length of its course if measured from the commencement of the Selenge, its remotest tributary, exceeds that of the Ob by 100 m. Its most important affluents are the Selenge, which, before entering Lake Baikal, drains an area

of more than 140,000 sq. m. the Angara, which receives the discharge of the lake, and in the lower part of its course, takes the name of Upper Tunguska; the Middle Tunguska, and the Lower Tunguska. The estuary of the Yenisei is about 20 m wide, and 900 m long. The Lena has a course of about 2000 m., and drains an area of about 800,000 sq. m. It rises hardly 30 m. to the W of Lake Baikal, and becomes navigable at 80 m. from its source. Its principal affluent is the Vitim, which has a course of 700 m., of which a considerable part is navigable; the Olchoka, which flows 600 m. through interminable forests, the Aldan, which drains an extensive tract of table-land between lon 125 and 140° E. and the Vitim, which rises in a mountainous district not far from the Lower Tunguska, and flows W for about 800 m. The three large rivers above mentioned, which far surpass in magnitude all the other rivers of Siberia, and form its main trunk, are remarkable not merely for their common N direction, but for the parallelism of their courses, which, particularly in the first two, the Ob and Yenisei, is not confined to the main streams, but is very apparent even in their tributaries. The most important of the minor rivers which send their waters directly to the Arctic Ocean are the Ixa, between the Ob and Yenisei, the Katunka, the united Anzars and Obys, and the Oleneit, between the Yenisei and Lena, and to the E. of the latter, the Yena, Indighirka, and Kolymsa. The course of the first is 500 m., that of each of the two last 700 m. These minor rivers, like the larger, abound with fish and at their mouths are frequented by such immense flocks of water-fowl as often to darken the air for miles around. The only important lakes are those of Baikal in gov Irkutsk, and Balkash Nor or Tungaia, chiefly in the N. of gov Omsk, but partly within the Chinese frontiers. Numerous other lakes are scattered over the surface, and more especially in the tundra, where whole chains of them, covering extensive tracts, not infrequently occur.

Geology and Minerals.—The geology of Siberia is very imperfectly known and hence in the best maps of it which have been published, considerable tracts are left absolutely blank. Granite and crystalline schists are found chiefly on the E. slopes of the Ural Mountains, in the S. among the mountain-ranges of the Altai as far N. as lat. 57° N., and between lon 85 and 120° E., chiefly in gobs Zensk and Irkutsk on both sides of the Upper Tunguska and E. of the Yenisei. In the upper part of the basin of the Middle Tunguska and in the very E. extremity of the country, from lon. 165 to the shores of Bohring's Strait. The volcanic rocks belong mostly to the tertiary period, and are found chiefly in the S., in connection with the granite and crystalline schists above described. They compose the great mass of the mountain range which skirts the W. shores of Lake Baikal, and are seen in a still more magnificent and interesting form in the mountains which proceed from N. to S. nearly through the centre of the peninsula of Kamchatka, where several active volcanoes were seen, and have been well described by Erman. Palaeozoic rocks, including under the designation rocks belonging partly to the Silurian, partly to the Devonian and partly to the carboniferous systems are developed chiefly in the N., where they occupy a large space in the form of a triangle, the apex of which is at the town of Irkutsk, and the base on the parallel of 60°, between lon 85° and 120° E. Another large development of the same rocks is seen on the N. W. and N. of the R. of Obkhotok and to a considerable distance inland. Secondary rocks higher in the series than the carboniferous system commence near the N. shores of Lake Tunga, and stretch N., occupying a considerable tract on both sides of the upper valley of the Irkisk, including the districts around lakes Tobolsk and Kozmy. A more partial development of the same rocks is seen on the N. of the Ob, commencing near the confluence of the Ket, and extending N. in a comparatively narrow belt to the sources of the Tax. But by far the most extensive formation in Siberia is the tertiary which stretches almost continuously from the last slopes of the Ural Mountains E., across the Ob to the valley of the Yenisei; and in other quarters though more intermingled with earlier formations, covers no inconsiderable portion of the whole surface. The shores of the Arctic Ocean, almost throughout their whole extent, and to a considerable distance inland, have a dense alluvial covering, remarkable for containing deposits of fossil elephants and other animals in such quan-

tities, that the ivory obtained from them forms an important article of commerce.

The minerals of Siberia are evidently of immense value, and though the real extent of surface on which they are found is as yet only roughly guessed at, there cannot be a doubt that the most precious of all the metals exists there in greater abundance than in any other part of the Old World. Till recently the auriferous deposits were supposed to be almost confined to the E. slopes of the Ural Mountains, and to occupy a zone extending over from 5° to 8° of latitude to the N. and S. of Ekaterinburg. The gold obtained from this zone never exceeded \$500,000 sterling in any one year and had even begun to decrease in consequence of the exhaustion of the alluvia of certain tracts, when it was discovered that some of the E. regions, particularly in gobs Tomsk and Yenisei, are highly auriferous, and that a tract larger in area than the whole of France contains gold, not in its alluvia, but in the very matrix of its rocks of palaeozoic schists and limestones, which when ponded and analyzed, are found to be more or less impregnated with gold. These regions alone, in 1843, rated \$3 250 000 sterling being more than two-thirds of the whole produce of the Russian Empire, which did not during the same year raise in all more than \$3,000 000. The principal mining districts are those of the Ural already mentioned, the Altai and Nerchinsk, in the basin of the Amoor. In the first, besides gold, a good deal of copper and iron and some silver and platinum, are obtained. The second district extends over great part of the Altai range but has its central locality at Berzouk. Its produce is gold, which used to be small but has lately been much increased. It has also extensive veins of copper, though the ore in general is not very rich, and hence, unless very easily smelted, is scarcely worth working. Argenteous lead also is found but in less abundance. Iron remarkable for its natural malleable properties, arsenic, and antimony exist in the same district. Over the district of Nerchinsk the mines which are worked consist of 160 m. are principally run in lead, which is the more valuable because little of it is found in any other part of the Russian Empire tin, zinc, and iron. The lateral valleys of the Jablonoi Mountains running from them into the longitudinal valley of the Shilka, have also been found to be highly auriferous, and are now as already mentioned yielding large quantities of gold. In the same district of Nerchinsk, are also celebrated mines of emerald and topaz, found generally in connection with an lodes. The minerals of Siberia deserving of notice are also found in natural crystals on the banks of lakes, chiefly in the straits of Ialim and Beraba. Jasper and porphyry of great beauty quarried especially in the valley of the Charysh among the Altai Mountains lapus-lazuli found among the mountains in the vicinity of Lake Baikal; diamonds found occasionally on the E. slopes of the Ural Mountains malachite obtained in greater or less quantity from all the mining districts, sometimes copper and iron, in the form of large plates, extensively used as a substitute for glass and found in great abundance on the banks of the Vitim.

Climate.—This country is remarkable for its rigor. The isothermal lines which skirt the E. coast of Iceland in proceeding E. descend rapidly till it reaches St. Petersburg and then more gradually till it reaches lon 100° E. where it is found in lat 53°. From this it proceeds nearly due E. passing through the S. part of Lake Baikal the town of Nerchinsk, and the S. extremity of Kamchatka. It thus appears that the E. coast of Iceland, in lat. 63° has the same mean temperature as E. Siberia in lat. 53°, in other words, that in proceeding from W. to E. the cold increases so much as to make places in the same latitude as Berlin to have a climate nearly as cold as Iceland. In the same manner the line of permanent ground-frost descends in parts of Siberia as far E. as lat. 56° nearly the same as that of Edinburgh and over the whole country to the E. of the Ural Mountains is as low as lat. 60°. Erman found in Yakutsk, in a well which had been sunk to the depth of 42 ft. in the vain hope of finding water, that the fine sand and clay forming the sides of the shaft, were so frozen that the spade was useless, and the miner's pickaxe alone could pierce them, and proceeding on the assumption that the heat of the earth increases in a certain ratio from the surface to the centre, calculates that in this locality the melting point of ice or snow and consequently the depth to which the well must have been sunk to

obtain water was not less than 630 ft. He found that annually between 17th Dec. and 16th Feb. and most frequently in the first three weeks of January cold is experienced as coming 40° Reaumur or 68° F., in other words, a cold 30° F. below the freezing point, and that for two entire months or one-sixth part of the whole year mercury is a solid body. This extreme winter is succeeded by an exceedingly warm summer. They usually commence on the 1st of April and the temperature increases rapidly till it attains its maximum in July. In this month the average height of the thermometer is about 68° F. but it is not unfrequently runs in the shade above 77°. The climate of Yakutsk, however, is admitted to be extreme even in Siberia, for in the W. part of it mercury does not freeze every year except in very high latitudes, and even on the shores of the Sea of Okhotsk owing probably to the influence of the sea, Erman did not find the ground frozen. In Yakutsk, notwithstanding its long and extreme winter, there are 128 days in the year without frost and within that period several kinds of grain not excluding wheat, have time to attain maturity and in rich alluvial soils often produce a return of fifteenfold.

Manufactures Trade and Towns.—The manufactures are very limited, and are confined for the most part to a few of the larger towns where government factories have been established. The most important articles are leather, earthenware, porcelain, glass, and ironware. In some places, as at Turuk, large woollen and linen factories employ a considerable number of hands, chiefly ex-slaves, in weaving woollen and linen cloth and in conducting all the previous processes of preparing the wool, flax, &c. These towns are generally of a coarse description, and are not in great demand, as almost all the articles of ordinary dress are provided at home and formed with comparatively little trouble out of the skins of reindeer, sheep, and various other animals. Among the Yakuts a clothing made of *Siberian* very supple and cold is very commonly worn. The trade is of considerable extent, and is so far as confined to the produce of the country, consists chiefly of cattle, fish, carver furs, skins, and metals. A very important transit trade is also carried on across the country between Russia in Europe and China. From the latter country by far the most important article is tea, both in the dried leaf and in the form of cakes or bricks. The greater part of the latter is disposed of to the nomadic tribes, and a very large proportion of the former never passes beyond the limits of Siberia, but is retained for home consumption. Other articles of importance from China are cotton cloth, starch, rhubarb, silk, satin, &c. The great mart for this trade is the town of Khatanga, where it is carried on in a regular and recognized form under the superintendence of both governments, and to such an extent that the value of the imports into Siberia is estimated at not less than £3 000 000 sterling. The greater part of this important traffic is transported by the Selenga to Lake Baikal, and thence by large vessels to Irkutsk, from which a continuous communication line open by the Angara and Upper Tunguska to Yenisei, on the Yenisei. A little below Yenisei the Kam fur makes a water communication to a point within 40 m. of the navigable Ket. These 40 m. can only be accomplished by land-carriage, but thence the Ket gives immediate access to the Ob, and the Ob, partly by its main stream and partly by its affluent Irkutsk and Tobol gives a continuous conveyance to Tobolsk from which a highway across the Ural Mountains leads directly to Perm. Besides this main line of thoroughfare from China, a considerable trade is carried on both with that country and with several independent khanates, by means of caravans which depart from Petropavlovsk on the Ishim, or Samoylovsk on the Irkutsk, and proceed southwards across the mountains to Kuldja, Tashkent, Koken, &c. For the interior traffic the rivers naturally furnish the most important conveyances, but when these become clogged with ice, other means of conveyance must be resorted to, among which the most characteristic is that of sledges drawn by reindeer or dogs. In carrying on the trade of a country so vast in extent, and so thinly peopled it is obviously necessary to select certain central localities and fix certain stated seasons for the transaction of business between buyers and sellers and accordingly the fair of Yakutsk are remarkable both for the value and quantity of the goods brought forward, and the vast crowds of dealers

whom they attract from the remotest quarters. The most extensive of these fairs are those of Odoorsk, on the Ob, Turukansk, on the Yenisei, Ustrensk, on the Yenisei and Olenok, on an affluent of the Kolyma. The principal towns are Tobolsk, Odoorsk, Tomsk, Omsk, Krasnoyarsk, Irkutsk, and Yakutsk.

People.—The races and tribes scattered over the different parts of Siberia are so numerous, that little more can be done here than to give the names of the more important. At least two-thirds of the whole population is Russian and consists either of voluntary emigrants who have found it their interest to settle in the country or of slaves and their descendants. In regard to the exiles Siberia is merely a penal settlement, and hence that portion of the population, which, as coming from Europe, ought to be the most civilized, is not likely to be the most unscrupulous. In those cases where the exile has been awarded for political causes merely the individuals may be more unfortunate than vicious, but when it is the penalty of ordinary crimes, the individuals being convicted in the usual sense of the term must take society in the same way as in Van Diemen's Land and Australia. A more unscrupulous and far more interesting population is furnished by the indigenous tribes beginning at the Ural Mountains and proceeding E., we find the Samoyeds in the N. W. Immediately S. of these the Ostiaks occupy both sides of the Ob, to the confluence of the Irkutsk the N. part of the steppe of Bashkir, and the whole of the woody region E. to the banks of the Yenisei. They live by fishing and hunting and though their physical structure is by no means robust, they display both great dexterity and courage in attacking the larger and fiercer animals, both of the land and water. Some of them have embraced Christianity but the great majority continue addicted to Shamanism. In the S. among the Altai Mountains, the Calmucks predominate but have laid aside a number of the usual peculiarities of their race. They subsist chiefly on the produce of their horses, cattle, and sheep and cultivate a little grain and tobacco. They have some skill in mechanical arts, particularly in the working of iron and make their own gunpowder. Though not Buddhists, they are generally addicted to other forms of superstition. Among the E. slopes of the Altai are several Turkish tribes known by the names of Beraucses, Buldies, Sengs, and Katchinches. The last extend E. to the banks of the Yenisei. The Burats, the most numerous of all the Siberian tribes, dwell chiefly on both sides of Lake Baikal and E. as far as the Onon. They are of Mongol origin and closely allied to the natives of the N. provinces of China, both in language and customs. The Tunguses or Tungusoes are the most widely dispersed of all the native tribes. They are found along the shores of the Arctic Ocean, from lon. 110° to 170° E. along the banks of the Yenisei as far S. as the mouth of the Upper Tunguska, and along the Sea of Okhotsk as far as the town of that name, and thence S. to the frontiers of China, in Daouria, and to the N. of Lake Baikal. Parts of these extensive tracts they occupy exclusively but others they hold in common with the Yakuts and some native tribes. They are considered the least forward of the native Siberians, are very expert horsemen, live chiefly by hunting, possess such skill in the working of iron as enables them to prepare their own firearms, and are generally addicted to Shamanism. Among their great amusements are cards and chess. For the latter they carve chess-men very elaborately out of the mammoth's teeth. The Yakuts, as already mentioned, live intermingled with the Tunguses, and confine themselves almost entirely to the rearing of horses and cattle, and the preparation of dairy produce from them. The herds of many of them amount to several thousand head. They have made considerable progress in divination, and pay some attention to the education of their children. They are of Tartar origin, and not a few of them are nominal converts to Christianity though the majority still adhere to Shamanism. The Tschukches occupy the peninsula formed in the N. E. of Siberia, by the Arctic Ocean on the N. and the Sea of Okhotsk on the E. They are very jealous of their independence, and are scarcely to be said to be nominally subject to Russia. Their language proves them to have a common origin with the Esquimaux. They consist of two distinct tribes, the one sedentary and the other nomadic. The former, inhabiting the sea-shore, live by fishing, in which they show great courage and dexterity,

and though not much given to hunting, kill common and white bear, and polar foxes, the latter live intermingled with the Kurils, and occupy the interior, where they feed large herds of reindeer, and live almost entirely on their produce.

History.—Siberia appears to have been partly conquered by Genghis-Khan and his successors, but did not become known to Europe till 1580 when a Cossack, called Yermak Timofeyev, who had long robbed the vessels which navigated the Volga, finding himself hotly pressed by the Czar of Moscow crossed over into Asia with his accomplices. Their number sufficed to form a small army, and their courage soon enabled them to acquire extensive settlements. These Yermak offered to the czar on the condition of obtaining pardon. The offer was accepted, and thus Russia for the first time obtained a footing in Asia. The territories thus conquered belonged to the Tartar prince Kutubum-Khan, and included his residence, which, called by the natives Iktar, and by the Cossacks Sibir, has given name to the whole country. The conquests of Yermak continued E. and though interrupted for a time by his death in 1584 were gradually extended, till the whole country W. of the Ob was subjected to the czar. In 1604 the town of Tomsk was founded, and became a centre from which new expeditions were fitted out and new conquests made. Private adventures, instigated chiefly by the hope of plunder, proceeded in all directions to the S., where not without serious reverses, they succeeded in expelling the Kurgis, and to the E. where they entered the basin of the Lena, subdued the Yakuts, and finally after passing the Aldan Mountains, reached the Sea of Okhotsk. In the neighbourhood of Lake Bektal a formidable resistance was made by the Buriats, but their subjugation was finally completed in 1658. The town of Nerchinsk, which has since become so celebrated for its mines, was then founded, and two years after that of Yakutsk. A further extension of conquests to the E. brought the old empires into collision with the Chinese, and both governments taking part in the quarrel a war, threatening the existence of one or other of the empires, became imminent. It was, however, prevented, partly by the intervention of the Jesuits resident at Peking and a treaty in 1689 definitively fixed the boundaries of the two empires. A second treaty in 1727 confirming the former regulated the commercial intercourse, and confined it to the two localities of Khabarovsk and Maimachen. Never has so large a territory been acquired at so little expense. Indeed, almost without any expenditures of her own money and chiefly by the aid of a few Cossack adventures in little more than a century more than doubled her area. The greater part of it indeed is a frozen inhospitable region, which must always remain comparatively worthless, but vast tracts enjoy a climate and possess a soil well adapted for agriculture, and seem destined, whenever the tribes roaming over them can be induced to settle down to a sedentary life, to become the abodes of a dense population, who, in addition to the resources of pasture and agriculture, will find almost inexhaustible wealth in mines and fisheries.

SIBILLA (MONTI DELLA), a lofty summit of the Central Apennines, in the Papal States, about 28 m. N.E. Spoleto. It has a height of 7212 ft., and gives rise to the Velino. **SIBSEY**, par Eng Lincoln 5480 ac. Pop 1372. **SIBSON**, or **SIBSONTON**, par Eng Leicester 8817 ac. P 484. **SIBTHORPE**, par Eng Yorks 880 ac. Pop 146. **SIBTON**, par Eng Suffolk, 2661 ac. Pop 501. **SIBUYAN**, one of the Philippines, nearly in the centre of the group, lat. 12° 14' N. lon. 122° 45' E. (p.) between 80 m. and 40 m. in circumference.

SICASHA, a vil. Bolivar, dep and 56 m. S. La Paz, cap. prov. of same name. It has a considerable appearance of comfort, many of the houses being well built near it are silver-mines. Pop. about 500.—(Gutierrez)

SICCHEN-SUSSEN or **BOZANT**, a vil and com Belgium prov Limburg 18 m. S.E. Hasselt. It has manufactures of cheery and a trade in agricultural produce. Pop. 1098.

SICIGNANO a tn. Naples, prov Principato-Città, dioc. and S.E. Campania, on a hill with two churches, and a Capuchin convent. Pop. 2340.

SICILIES (KINGDOM OF THE TWO) SEE NAPLES.

SICILY [see **TRINACRIA**], Latin and Italian, *Sicilia*, French, *Sicile*, German, *Sizilien*, Dutch, *Sicilië*, the largest isl. of the Mediterranean, belonging to Italy and formerly a part of the kingdom of Naples, or of the Two Sicilies, and

then named *Sicilia di Isola del Faro*. It is only separated from the S.W. extremity of Italy by the narrow strait of Mesina, and extends from lat 36° 38' to 38° 16' N. lon. 13° 20' to 15° 40' E. It is nearly in the form of a triangle, the three angular points of which are formed by Cape Boeo in the W., Cape Passaro in the S.E., and Cape Faro in the N.E. The longest of the sides, represented by a straight line drawn from Cape Boeo to Cape Faro, is 180 m., the next longest from Cape Boeo to Cape Passaro, 171 m. and the shortest, from Cape Passaro to Cape Faro, 113 m. It is divided into seven provinces, the names, areas, and populations of which are given in the following table—

| Pr. towns. | Area in sq. m. | Population, 1861. | Pop. alicia 1861. | Chief Cities. | Population 1861. |
|---------------|----------------|-------------------|-------------------|---------------|------------------|
| Caltanissetta | 1 193 | 170 612 | 203,146 | Caltanissetta | 30 411 |
| Catania | 1 705 | 3 3 091 | 460 460 | Catania | 94 921 |
| Girgenti | 1 177 | 235,167 | 264,265 | Girgenti | 10 412 |
| Mazara | 1 000 | 340 464 | 374 120 | Mazara | 28 264 |
| Palermo | 1 458 | 478 785 | 685 163 | Palermo | 16 465 |
| Syracuse | 1 544 | 377 814 | 520 618 | Syracuse | 19 401 |
| Trapani | 1 300 | 153 800 | 214 661 | Trapani | 36 393 |
| Total | 110,356 | 2,041,583 | 3,302,414 | | |

Physical Features.—The coast, though presenting numerous small indentations, has few large bays. Of those the most marked are the gulfs of Castell-a-Mare, Palermo, and Patti on the N. and those of Catania, Augusta, and Syracuse on the E. The most conspicuous headlands are capes San Yvo Di Gallo, Melazzo, and Faro on the N. Santa Croce, Morro di Porro, and Passaro on the E. Currenti, Tolut, Scalabrara, Alicata, and Granatola on the S. and Hoen on the W. The interior is finely diversified. A range of mountains commencing in the N.E. extremity of the island, stretches across it in a W. S. W. direction, taking the name first of the Neptunian and then of the Madonian Mountains. This range, which lowers gradually in proceeding W. throws out numerous ramifications, the most important of which breaking off from near its centre proceeds somewhat irregularly S.E. towards Syracuse. The whole range bears a strong resemblance to the branch of the Apennines which stretches to the S. extremity of Italy and strongly confirms the opinion generally entertained, that it was originally continuous with it and that Sicily consequently must at one time have been not an island but a part of the European continent. A tradition always has existed that the separation was effected by some tremendous convulsion of nature, and powers sufficient to accomplish it are still apparent in the tremendous earth quakes by which the island and the adjacent continent have been visit d within historic times and the volcanic agency still active in Stromboli, Lipari, and Etna. The last is undoubtedly the most remarkable natural feature of Sicily and one of the greatest wonders of the world. Though not distant from the Neptunian range already referred to, it stands completely isolated forming an immense cone, which at its base has a current of 87 m. and rises gradually from the plain till it attains the height of 10,874 ft. Compared with this all the other summits of the island are insignificant, the loftiest of them, Caltanissetta, Monte Cucco, Monte Sordani, and Dimmaro over Mesima, having only the respective heights of 8690 ft., 3399 ft., 3190 ft., and 3112 ft. The far greater part of the mountains have a far less average height, and their sides are generally covered with magnificent forests, wherever from their loftiness or ruggedness they cannot be brought under regular cultivation. Between the mountains deep and romantic valleys often intervene, and occasionally the ruggedness of the country altogether disappears, and large, beautiful and fertile plains are seen stretching out almost as far as the eye can reach. The most important of these plains are those of Catania and Melazzo on the N.E., Syracuse on the S.E. and Trapani on the S. The rivers and streams are very numerous, and not a few of them of classical celebrity but they are individually insignificant, and in summer are often almost without water. The most desirable of notes are the Garista or Simeto on the E. coast, the Salto, Platani, Caltanissetta or Idrone, and Belice on the S. and S.W., and the Tormida, Fiume Grande, and Pollina on the N. There are no lakes worthy of the name; the largest is Lentini, not far from the E. coast.

Climate.—The climate is excellent, and except in some spots where the air becomes tainted by the effluvia of mornings and stagnant pools very healthy. The thermometer in the hottest days rises to 90° or 93°, and even in the depth of winter very seldom falls below 36°; the medium temperature is 63°. The sky in summer is for the most part beautifully clear and serene, but after the autumnal equinox dews and fogs increase, and rain falls in frequent and heavy showers. The prevailing winds, the N. and W., are dry and salubrious; those of an E. direction make the atmosphere heavy and dense, and are often accompanied with rain and thunder, the most annoying wind is the S. E. or sirocco, which, blowing from the deserts of Africa, not only is almost intolerable from its stifling heat, but produces oppressive debility and lassitude, and is considered so noxious that during its continuance, generally from three to four days, the natives confine themselves to their houses, carefully closing every door and window and the streets become silent and deserted. The quantity of rain which falls is 28 inches, which if equally distributed over the year would, without being in excess, amply suffice for the wants of vegetation and all economical purposes. Unfortunately however the water receives a very disproportionate share, the regular rains usually commencing in November and continuing to fall at intervals often in very heavy torrents, with vivid lightning and occasional snow storms till March while not infrequently particularly in the interior, long droughts prevail from April to November to the serious injury of the harvest and vintage. Another evil from which Sicily suffers is the frequency of shocking earthquakes. These have repeatedly spread fearful devastation over whole tracts of country and even when unaccompanied with actual damage, keep the minds of men in a state of anxiety and alarm.

Geology.—Sicily itself and the large circular space of which it forms the centre, extending W. to Bronte, and E. to the coast over the whole tract that lies between Catania and Taormina, is covered completely with volcanic products. Another tract of less extent and more irregular shape extending S. from Canicci to Chiantrone, is similarly composed. Granite with gneiss and mica schist has its only large development in the N. E. where it forms the mass of Mount San Felice, and trends along the coast when it stretches N. from Scazzano, and then leaving a narrow belt of tertiary formation along the straits, skirts the town of Messina and terminates on the N. coast at Cape Rosicchio. It also forms an irregular belt around the town and along the W. side of the Gulf of Patti, and thence W. past Cape Calava to Cape Orlando. The Jura-limestones occupies only two small patches, the larger on the N. E. coast from Taormina to Scazzano, and the less still farther N. to the S. of Melazzo but the series of rocks immediately above the limestones, and belonging to the cretaceous system, are so largely developed as to cover at least a half of the whole surface of the island. They extend without interruption along the N. coast from Cape Orlando to Cape Zafferano, occupy the far greater part of the peninsula between the gulfs of Palermo and Castell-a-Mare and between the latter gulf and the town of Trapani, form the great mass of the Neptunian and Madonian ranges, and fill up the whole of central parts of the island stretching across it unbroken from its N. to its S. shores. The rocks of the tertiary formation occur chiefly in the S. E. and the W. In the former direction they line the whole coast from Cape Santa Croce S. past Syracuse to Cape Passaro, and then with a slight interruption continue along the S. E. coast past Cape Scazzano to the mouth of the Drillo in the latter direction they commence at the mouth of the Platani and occupy the coast continuously from that point to the town of Trapani. The only alluvial tract of any extent is in the E., where it stretches along the S. part of the Gulf of Catania, and thence inland along the bank of the Giareta. Shallow patches of alluvium occur on the S. coast at the mouths of the Terranova and the Saleto. The minerals of Sicily are more numerous than valuable. They include argillaceous lead, quicksilver, iron copper, and antimony, in quantities so limited that few of them are worked; lignite, bitumen, petroleum, and asphalt, asbestos, gypsum, emery stone, rock-salt, nitre sulphur, and a great variety of marbles, agates, chalcedonies, and jaspers. The most important of all these is sulphur, which has been worked in mines for more than three centuries, and is extensively exported.

Vegetation, &c.—Both the climate and rich soil of the island procure for it both a very large amount and great variety of vegetable products. The hilly regions presenting alternately bold crags and undulating slopes, are generally clothed with forests of fine timber, among which the prevailing trees are oak, ash, pine, elm and chestnut or covered with pastures, on which numerous flocks and herds are reared. In the lower grounds cultivation is general and the crops are often remarkable for their luxuriance, though the mode of culture is for the most part unskilful and careless in the extreme. The implements in use have remained unimproved for centuries and the grain is still thrashed out by being trodden under the feet of cattle. The most important crops are wheat, maize, barley and lentils or other pulses. Artificial grasses, partly sown down with grain crops, and partly in the form of permanent meadow occupy a considerable extent of surface, but are far less productive than they might easily become by the introduction of proper modes of irrigation. Many of the deeper and lower grounds are devoted to the growth of hemp. Next to grain the most important objects of culture are the vine and the olive, often planted intermixed. The produce of the vine is partly dried into raisins, but is much more frequently converted into wines of various kinds, and generally of rich flavour. The produce of the olive is abundant but from subsequent mismanagement often fails to yield oil of the first quality much of it becoming pungent, rancid, and feid. Other vegetable products deserving of notice are the mulberry, extensively used in rearing silk-worms; radish sunnamb and berilla, all of which in the localities best adapted for them are regularly cultivated on a large scale cotton, which has its chief locality near Mazzara, mame obtained by means in the bark of a species of ash (*Fraxinus ornus*) and in such quantities in the neighbourhood of Castell-a-Maro, Carini, Cefalù, and Caronia, as to yield an annual revenue of above £40,000 various species of fruit, more especially the Lulian fig or prickly pear (*Cactus opuntia*) on which when in season great numbers of the lower orders subsist the almond of which numerous groves are scattered over the island the common fig extremely delicious when fresh, but not dried with sufficient skill to create a foreign demand, the date, very common under the Saracens, but now much neglected the liquorice plant, growing spontaneously on the plains, especially of Melazzo and Catania, and furnishing a considerable quantity of liquorice for export and the sugar-cane, which thrives well, and continued to be extensively cultivated till its produce was driven out of the market by that of Brazil. To these might be added a great number of trees and plants valuable for fruit, fibre, medicinal properties or the essences extracted from them. The domestic animals of Sicily, with the exception of goats of which there is a good breed, and of mules, to the proper rearing of which a great degree of attention is paid, are of an inferior description. The horses, though descended from those of Barbary have lost traces of the good qualities for which the parent race are distinguished, and the sheep, with exception of a few improved merinoes, rank low in respect both of carcass and wool. Oxen especially those used for draught, are strong and tolerably well formed, but the cows are ill adapted for the dairy. Swine are numerous, and whose tracts of forest extend thrive vigorously. In general, however, the breed is weakened in the extreme.

Manufactures Trade, Money, &c.—The manufactures are of very limited extent, and when not entirely domestic are confined to a few of the larger towns. They include the ordinary silk, woollen linen, and cotton tissues, for the most part of a coarser description oil-cloth, leather, cordage, glass, earthenware, &c. Trade suffers much from want of inland communication, but considering the vast extent of sea-coast, and the many valuable products indigenous to the island, would soon become far more important than it is, were either government more enlightened or its subjects more industrious and enterprising. If the only branch of trade for which the Sicilians are celebrated any particular production is that of fishing, for which they possess numerous advantages, the fisheries along the coast being the finest in the Mediterranean. By far the most productive is that of the tunny for the capture of which at the proper season whole fleets of boats are fitted out. The mullet and anchovy fisheries are also of great value, and numerous varieties of testaceous and crustaceous, affording delicate food, are

taken throughout the year. The most important articles of export are grain, fruits, wines and spirits, sulphur, oil, tannin, henna, silk, hosiery, and dress-stuffs of imports, colonial produce, cotton and woolen yarn, silk, linen, cotton, and woolen goods, hides, hardware, &c. Accounts are kept in drams, each equal to about 4s 2d. Sicily has its own mint, but its coins pass in common with those of Naples. Spanish gold and silver coins are also current. The principal measures are the palm or foot for length = 10 inches 2 lines, the *salma* for land = 5½ acres, the *salma* for wine = 86½ gallons, the *salma* for oil = 4½ gallons, and the *salma-generale* for wheat and other grain = 20 bushels, or 2½ qrs imperial. Government, *People*, &c.—Sicily, though an integral part of the kingdom of Naples, continued till within recent times to possess its own parliament or representative assembly composed of the three estates of clergy nobility and representatives of free towns. The last formed a very small minority, and consequently were completely outnumbered and overpowered by the two former, who united together and secured to themselves the most odious and oppressive privileges. The parliament thus proved far more an instrument of tyranny than of freedom. In 1818 an improved constitution under the auspices and the model of that of Great Britain, was established, but the people generally being altogether unprepared for it, regarded it with little favour and expressed little regret when after a short-lived existence of four years it was formally abolished by the crown, and a virtual despotism was substituted in its stead. The R. Catholic is the established religion, and the great body of the people normally belong to it, though a considerable number of Greeks, who profess the worship of their own church, live in different parts of the island, and more especially in the vicinity of Palermo. The greatest misery, accompanied with the gross want of humanity, as a very slight among the higher and has also spread widely among the lower order. Education is very much neglected, and even when received is not of a kind fitted to enlarge the mind. In all quarters a general listlessness prevails. The nobility instead of devoting themselves to the duties of their station, or engaging in manly pursuits, spend most of their time in paying and receiving ceremonious visits, or in dissipation and gambling, the common people are effeminate and indolent, and take every means of escaping from hard labour and peasant industry. The best specimens of Sicilian manners are found among the peasantry who, unaffected by the vices of the towns are sober and tolerably observant of the duties of domestic life. For intellectual pursuits the Sicilians, though not deficient in natural capacity, show little inclination. Science, literature, and art have numerous professors, who are keen for the honours or emoluments which proficiency in them confers, but fail to prove their title to them by the excellences of their productions.

History.—According to early tradition, the first inhabitants of Sicily were Cyclopes and Lustrigians, a kind of fabulous beings who long furnished the poets with ample materials, of which, among others, Virgil has largely availed himself. Sicilians from Iberia afterwards gained such a footing in the island, or to change its name from Trinacria, which it had hitherto borne, to that of Sicania. Sicily, driven from Italy created the straits, and having vanquished the Sicani, gave the island the name which it still bears. After a considerable interval the Greeks began to plant colonies on the coast, and founded a number of towns, of which Syracuse, Agrigento, and Messina, became the most celebrated. They were not, however, allowed to remain in undisturbed possession. The island was conquered first by the Carthaginians, and next by the Romans, and on the decline of their empire, it was overrun by the Goths, who retained possession till Belisarius expelled them. In the beginning of the 9th century the Saracens became masters, and continued so till their expulsion by the Normans, who remained long enough in possession to establish the feudal system in all its rigour. In 1184, the Emperor Henry VI. established the Swabian dynasty, which in its turn made way for that of the French under Charles I. Duke of Anjou, whose government, established in 1266, was suddenly terminated in 1282 by the massacre known by the name of the Sicilian Vespers. Princes of Aragon now became its sovereigns, and reigned till 1516, when by the succession of Ferdinand the Catholic, Sicily was annexed to the crown of Spain whose viceroys governed it till 1706.

1706, when a successful popular insurrection hurled it on Austria. The peace of Utrecht in 1713 gave it to the Victorians, Duke of Savoy who retained it only for four years, and restored it to Austria, receiving Sicily in exchange. In 1734 the Austrians were driven out by the Spaniards, and in 1788 a peace was concluded, confirming the possession to the infant Don Carlos, who united Naples and Sicily into one kingdom, under the name of the Two Sicilies, though in common parlance that of Naples alone is still commonly used to include both. Since then the history of Sicily though necessarily linked with that of Naples, has not ceased to be without interest. When Napoleon in the prosecution of his restless and ambitious schemes invaded Naples, the reigning sovereign Ferdinand IV. withdrew to Sicily and there, partly by the patriotism of his Sicilian subjects though still more by the efficient aid of Great Britain, was enabled to preserve his throne. The moment was, however deemed favourable for the reformation of gross abuses which pervaded every part of the government, and accordingly, under British auspices a liberal constitution, modelled on that of Britain, and dividing the parliament, which had previously met in one chamber, giving the nobles and clergy a complete control into two chambers in one of which the representatives of the people meeting alone obtained their proper share of influence. This constitution to which the king had given a reluctant consent in 1812 was not permitted to remain in force beyond 1816 when the king availing himself of the downfall of Napoleon, and the political changes consequent upon it, resumed his former powers, or rather stretched them far beyond their former limits, by abolishing the peculiar privileges of Sicily and converting it into a mere province of Naples. The heart-burnings thus produced manifested themselves in 1820 by a popular insurrection which was only suppressed by Austrian bayonets. Another outbreak took place in 1848 the chief seats of which Messina and Palermo, suffered severely before the insurrection was quelled.

SICOMARIO (Sax. Mithras) a vii and com, Italy Piedmont, div. Novara prov. Lomellina, 3 m N W Pavu with a court of justice and a parish church. Pop. 1470.

SICULIANA (anc. Cumæa) a vii Sicily prov. and 9 m W N W Gargano. Corn and sulphur are exported in considerable quantities.

SICUNY a celebrated city of ancient Greece, the site of which is partly occupied by the modern village Vasilio about 12 m W N W Corinth. It was built on a lofty plateau of a triangular form surrounded by walls of great strength and rose to be the capital of a kingdom. The pavement of the road and the lines of the streets may still be traced, but the ruins are neither numerous nor very interesting.

SIDBURY.—1, A vii and par England co. Devon nearly 8 m N E Sidmouth with a parish church and an independent chapel. Area of par. 6527 ac. 1 op. 1872 —2, Par Eng. Salop 1777 ac. Pop. 61.

SIDDAB, par. Ind. Madras, 5104 ac. Pop. 1092. SIDDUBURGH a vii Holland prov. and 12 m E Groningen, on a rising ground with a church and school. Pop. (agricultural), 1385.

SIDDINGTON (St Mary and St Peter), par Eng. Gloucester 1950 ac. Pop. 502.

SIDEK, par Eng. Gloucester; 514 ac. Pop. 42.

SIDERNO, a vii Naples, prov. Calabria Ultra 1, 8 m. N E Gerace with three churches. Pop. 2800.

SIDELAND, par Eng. Norfolk; 640 ac. Pop. 140.

SIDI KHALID, a vii Algerian Sahara, oasis of Ziban, 80 m W by B. Biskra. It is surrounded by a wretched enclosure, and by palm-trees, and outside the walls is a mosque. Powder is manufactured here, and sold at Togrut. Pop. about 1100.

SIDLAW HILLS, a low mountain-range, Scotland which commencing with the rock of Kinross about 8 m N E Perth, stretches E N E into co. Forfar in which are their loftiest summits—Sidlaw proper 1408 ft. and Craig Owl, nearly 1700 ft. The average height is below 1000 ft. These hills are covered with corn-fields and rich pastures.

SIDLEHAM, par Eng. Essex 4109 ac. Pop. 641.

SIDMONTON, par Eng. Essex 4470 ac. Pop. 144.

SIDMOUTH, a seaport, market-town and par. England, co. Devon. The town, 12 m. E S E. Exeter, is situated in a

valley between two high hills, near the mouth of the Sel. It is irregularly built, but is neat and clean. It has an ancient church with a well-built tower and places of worship for Independents, Wesleyans, and Unitarians. Sidmouth was formerly a seaport of some importance; but no craft except pleasure-boats and fishing-smacks can now approach the town in consequence of the harbour being choked up with sand and pebbles. It has now however become a favourite watering place, and has every accommodation and all the sources of amusement usually found at such resorts—luna, boarding-houses, baths, public rooms, library with assemblies and concerts. The climate is salubrious, and remarkably mild—the mean annual temperature being 51.97° while the summer averages 62°, and the winter 42.44 the surrounding scenery is exceedingly picturesque. Pop. 2516. Area of par, 1600 ac. Pop. 5441.

SIDON or **SAYON**, a seaport to Asiatic Turkey Syria par. Area, 15 m. S. Beyrut, on a tongue of land the isthmus of which is protected by walls flanked with towers, while a bridge of seven arches leads to an island on which the castle of Malik-el-Bahar together with a ruinous fort, are situated. Viewed from the sea it has rather an imposing appearance and though very indifferently built of stone-houses, which stretch straggling along the shore, is large, and not without signs of prosperity. The principal buildings besides some mosques, a Christian church, and a synagogue, are the bazaar, and an ancient building, now forming the French khan. The harbour once famous, has been choked up, so as to admit only small vessels; and the trade chiefly confined to silk, fruit, oil and nut-galls, has declined from inability to compete with Beyrut. Ancient Sidon, called in Joshua Great Sidon, and repeatedly mentioned in other parts of Scripture, and by the earliest profane writers, including Homer is supposed to have stood about 2 m. inland. Pop. about 6000.

SIDRA or **REIT** (GULF OF) [see Syria Major] an extensive inlet of the Mediterranean E. part scenery of Tripoli, extending from Cape Mesurata to Bengasi or from lon. 15° 30' to 20° E. In the interior are extensive quinquains celebrated in antiquity under the appellation of Syria, from a corruption of which the modern name is derived.

SIEBEL
DIAGEN a vil. Bavaria. Palatine near Landau with a church and a mill. P. 1023.

SIEBEN
BURG a prov. Austria. See TRANSYLVANIA.

SIEBEN
GEIRGE a small mountain-range, Germany, Rhenish.

SIEBEN It breaks off from the Westerwald, and stretches N. W. along the right bank of the Rhine, and between that river and the Wied and the Sieg, from the village of Hunsdorf to a little beyond Keldgswinter. It takes its name from seven remarkable basaltic heights, crowned with the ruins of ancient castles. The loftiest of these heights is the Lidenberg, 2080 ft.

SIEBENLEIN a tn. Saxony circle and 47 m. S.E. Leipzig. It has manufactures of shoes, stoneware, and refined wax; a millinery, several tanneries, and a trade in cattle. 199, 1480.

SIECHANOWICZ, a tn. Russia. See CIECHANOWICZ.

SIEDELEC, a tn. Russian Poland, 58 m. E. Warsaw. It has a castle, several churches, a gymnasium and other schools; and the produce of its bakeries is in much repute.

SIEG, a river, Rhinish Prussia, rises in E. of gov. Arnberg. Flows N. E. past Siegen, Widen, and Blankenburg, and joins the bank Elfter, 4 m. below Bonn; total course, 90 m.

SIEGBURG, a tn. Prussia, gov. and 14 m. S.E. Cologne, on the bank Sieg. It is walled entered by four gates and has four churches and chapels, a superior burgher school and the buildings of an old Benedictine abbey beautifully situated on a rock which overhangs the town, and now used as a lunatic asylum. manufactures of earthenware, leather and tobacco, some shipping, a fishery and several mills. Pop. 2384.

SIEGEN a tn. Prussia, Westphalia gov. and 40 m. S. S.W. Arnberg, cap. circle, on the Sieg. It is walled has six gates; three churches, an orphan hospital and poorhouse, manufactures of cotton and woollen goods, leather and various articles in iron and steel, particularly files. Pop. 6481.

SIEGHARTS (GROB), a market in Lower Austria, in a valley 28 m. N.W. Vienna. It has a parish church, a castle and important manufactures of ribbons. Pop. 2400.

SIEGLAHN, a vil. Rhinish Prussia, gov. Cologne, circle and near Sieg, with a church, tanneries, and a mill. P. 1126.

SIEHEM, a tn. and com. Belgium prov. Brabant, on the Demer 14 m. N.E. Louvain with a large church. P. 1097.

SIFNA [see S. S. Judea] a tn. Tuscany, cap. comp. of same name on the tops of two hills which rise from the borders of a barren and dreary tract on the S. frontier of Tuscany 29 m. S.E. Florence. Its lofty site, and the fine avenue of trees by which it is approached give it at a distance a very pleasing appearance but the streets are irregular and narrow, many of them being mere lanes often so steep as to be almost inaccessible by carriages and the houses which line them though often bearing the name of palaces have little in their aspect and architecture to entitle them to such an appellation. It is nearly of a triangular shape, is surrounded by walls with gates, of which several are well deserving of notice, and is defended by a strong citadel, situated at its N.W. side. The most remarkable buildings and establishments

are the cathedral one of the most characteristic specimens of Italian Gothic, with a curious facade, inland with black red, and white marble, and covered over with sculptures and decorations several other churches, many of them imposing structures, and almost all rich in works of art the Palazzo Publico, an extensive and a lofty tower now occupied as

PALAZZO PUBBLICO, SIENA.—From Gally Knight's Architecture of Italy

public offices, courts of law, and prisons, and finely situated in the Piazza del Campo, a large open space shaped like an ancient theatre for public games, the palace in grand manner, and in almost every variety of simple and compound Gothic among others, the Palazzo del Magnifico, with fine bronze ornaments and rings; the Palazzo Buonarroti, with a terrace front; and the Palazzo Piccolomini, remarkable for its elegant balcony and considered one of the finest in the city, the university of very early date, once celebrated, but now greatly decayed; the public library, containing 50,000 vols and above 5000 MSS., many of them of great rarity and value; the hospital of Santa Maria della Scala, one of the most

ancient in Europe, and containing 800 beds the lunatic asylum, and various other benevolent institutions. The manufactures, not of very much importance, consist chiefly of woollen cloths, paper-hats, and leather and the trade is chiefly in corn and fine marble. Siena is the see of an archbishop, the residence of a military governor, the seat of civil and criminal courts, and possesses numerous academies and societies for literature, science, and the fine arts. Its foundation is of very ancient date, as attested by its Etruscan walls, of which portions are still visible, but its chief interest is derived from the important position which it occupied among the early Italian republics. It is said to have then had 150,000 inhabitants, and repeatedly sent large armies from its gates. It has given birth to a great number of remarkable individuals, and furnished no fewer than seven popes. Pop. 21,596.

SIERALWA a market to Austria, Galicia, circle Przemysl, r bank San. It has a castle. A great many of the inhabitants are famous for their skill in building dykes. Pop. 1000.

SIERADZ or **SIERAZ**, a tn. Poland, 87 m. N Grodno. It is poorly built, has two churches, and a Dominican monastery and manufactures of woollen and linen cloth, leather, gloves and hats. Pop. 1698.

SIERCKE, a tn. France, dep. Moselle, in a valley r bank Moselle, 26 m. N Metz. It is walled, defended by a castle is composed generally of steep and narrow streets and has manufactures of can-de-colours, plaid leather and glass and a trade in hardware, leather ribbons, wine and wool. P. 1590.

SIERENING, a tn. Upper Austria 6 m. W Steyr, with manufactures of oil, cotton, hosiery and ironware. P. 1868.

SIEREP, a tn. Russian Poland, 19 m. W Plock with a castle, two churches, a synagogue, and an old Benedictine monastery and some general trade. P. 1923.

SIERRA [a mountain] the prefix of numerous places, Spain—1, (*de Angerona*), A tn. Valencia, prov. Castellon de la Plana, 1 m. S bank Mazon with a church, distended palace, courthouse, and school, an oil and two flour mills, and a trade in agricultural produce. Pop. 1108.—2, (*de Buxet*), A vil. Extremadura prov. and 7 m. E Casares, with a church, courthouse, prison school, and a trade in corn, oil and fruit. Pop. 1260.—3, (*de Yegua*) A vil. Andalusia, prov. and about 85 m. from Malaga with a church, courthouse, school salt works, and several oil-mills. Pop. 1098.

SIERRA AGUAS mountain (Sierra) (British) (Slovak) see

SIERRA LEONE, a British colony, W Africa, between lat. 8° 40' and 8° 50' N. bounded N. by the Mungo river on Little Boreas W. the Atlantic E. the Sherbro and E. by an imperiously defined line area, estimated at 25,000 sq. m. The coast-line is indented in the E. by the broad estuary of the Sherbro, and near its centre by Fawey Bay and the estuary of the Sierra Leone, which have between them the peninsula of the latter name, on which is situated Free Town (the capital) forming the proper nucleus of the colony and only connected with the mainland by an isthmus about 1½ m. broad. Besides the peninsula and mainland, the colony includes a great number of islands, which contribute to form several deep harbours. The surface near the shore, though sometimes rocky is generally flat, but in the interior is covered by rugged hills and mountains, varying in height from 500 ft. to 2500 ft. The only level land is a belt along the shore from ½ m. to 3 m. wide, and about 24 m. long and a plain of some extent in the S E. The principal rivers have courses varying from 200 m. to 800 m., but have been very imperfectly explored. The best-known names, besides those above mentioned, are the Bunde, Rokelle, with its large estuary, Karamunta, and Kaka. The soil, of which only a comparatively small portion is under regular cultivation, is very fertile, growing excellent crops of rice, Indian corn, yam, plantains, pumpkins, and cassava. Many of the W. India products have been introduced and sugar, coffee, indigo, ginger, and cotton thrive well. The principal fruits are those of the baobab, cocoa, banana, pine-apple, orange, lime, guava, papaw, pomegranate, and plum. The forests are extensive and the trees in them are often so magnificent as to be converted into canoes capable of containing 100 men. The principal live-stock are pigs and goats. Poultry also, particularly guinea-fow, are very abundant. The fisheries, both on the coast and in the rivers, are productive, and employ about 200 canoes, which occupy from 1000 to 1600 men,

and realise an annual value of about £4000. The chief industrial establishments are the factories in which the coconuts are crushed and the oil from it extracted and prepared. Boat-building is also carried on to some extent and leather is dressed on a small scale. The trade, carried on chiefly with Great Britain, amounted in 1861 to £103,477 in imports, and £20,586 in exports; in 1868 the imports were £209,106 and the exports, £289,863. The principal articles of import were India goods, cottons, hardware, spirits, &c. of export palm oil, pepper, ginger, ground wax, hides, ivory, timber, bees wax &c. Sierra Leone appears to have been discovered by the Portuguese in 1482 but it first became a British colony in 1787 when a company was formed with the humane intention of making it a home for free negroes and proving by their means that colonial products could be raised without slave-labour. Its prosperity was seriously affected at the outbreak of the French revolution, by the barbarous proceedings of French cruizers, and gave no little prospect of recovery that in 1808 the company ceded all their rights to the crown. Its affairs are now administered by a governor and a council of several more members, appointed by the crown on his recommendation. One great obstacle to its prosperity is the deadly nature of its climate particularly to Europeans but its progress, though slow has been steady. Its population consists chiefly of native Africans many of them liberated from slave ships, being brought under the influence of a religious education they are fitted to become an important lever in promoting the civilization of their native people. Pop. (1851) 44,501 (1858) 41,791.

SIERRA NEVADA Spain see NEVADA (Sierra)

SIT-TE AGUAS, a vil. Spain, prov. and 82 m. W Valencia with a townhouse two schools a church and three flour-mills. In 1808 the French army under Mouton here defeated the Spaniards and the Carlists were defeated in 1830, by O'Connell, the queen's general. Pop. (agricultural), 324.

SIXT, a tn. Naples prov. Principato-Città, 8 m. N E Salerno, with a castle and two churches and a convent.

SIEVERK or **SEVER**, a tn. Russia, gov. and 80 m. S W Orel, r bank Seve. It has 10 churches, but yet is of a paltry appearance. Pop. 6000.

SILWIFRZ a tn. Russian Poland 41 m. N W Casow, on a large lake with a castle, a church, blast-furnace, and other important iron-works. Pop. 1202.

SIGGLESFOHRN, par. Eng. York (F. Riding)

6319 ac. Pop. 707.

SIGHADJIK, a tn. Asiatic Turkey, on a gulf of same name, 30 m. S S W Smyrna lat. 38° 19' N. lon. 26° 48' E. It is one of the harbours of ancient Tarsus, is situated on low ground at the head of the gulf, and is surrounded by walls, and to be Genoese, and almost entirely composed of marble blocks derived from the ancient ruins of Sigadjik is a poor place, without shops, or even a bazaar, its inhabitants chiefly agricultural.

SIGISMUND (Sijw) a vil. and con. France, dep. Haute Savoie, prov. Faucigny 2 m. N V. Chusson with many churches, a courthouse, and grain-quarries. Pop. 1855.

SIGMARINGEN, the seat of Hohenzollern-Sigmaringen, r bank Danube, 48 m. S Stuttgart. It has an old and new palace, a castle, R. Catholic parish church, government offices, gymnasium, Latin and grammar schools, museum, and theatre a musical society and two printing-offices. Pop. 1804.

SIGN, a market to Austria, Dalmatia, nuclei and 21 m. N Spalatro with a church and an old castle, on a rocky height overhanging the town. Sign was long the bulwark of the Venetians against the Turks, and particularly distinguished itself by its defence against the Turks in 1717. Pop. 5860.

SIGNA (LAKET) a tn. and par. Tuscan 7 m. W Florence, r bank Arno with a church school and castle, and a trade in wine and oil. It is particularly celebrated for its straw-hats, which have long been regarded as the best made in Tuscany. Pop. 5968.

SIGNALCH, a tn. Transcaucasian Russia, gov. and 80 m. E. S. E. Tiflis, on the Anzoughkhan. It consists of the town proper, which is strongly fortified, and a suburb.

SIGNAL, a vil. and par. Switzerland, can. and 14 m. E. S. E. Basel, 1 bank Rhine. It is a well built place, and has a church and school. On a steep height above the village are the ruins of an old castle, with a stately tower. P. 2824.

SIGNY two places France, dep. Arisennes—1 (F. 48-490), A. vil. 15 m. N. Mœuvres, with manufactures of fine shawls, a blast-furnace, and other iron-works Pop. 3447.—2 (F. 48-490) A. vil. 14 m. N. Mœuvres, with an old castle. Iron is mined and smelted and slates are quarried in the neighbourhood. Pop. 1284.

SIGRISWIL, a vil. and par. Switzerland, can. and 20 m. N.E. Bern, near Lake Thun. A coal-mine has been opened in the neighbourhood Pop. 2548.

SIGSTON-KAMR par Eng. York (N Riding) 3369 ac Pop. 382.

SIGTUNA a tw. Sweden, Ho and 24 m. N.W. Stockholm, on a tongue of land which projects into the Stockholm, on the N. break of Lake Mälaren. It is regarded as the most ancient place in Sweden, and was once its capital, Odin, whose original name of Sigtun was borne by the town, having first fixed his residence here. The old town has almost disappeared and the new town is about $\frac{1}{2}$ m. distant from the original site. It contains a church with three towers and has manufactures of coarse pottery and a fishery P. 1290.

SIGÜENZA a city Spain, New Castile, prov. Guadalajara, 72 m. N.W. Madrid, on the S. slope of a symmetrical cone, on the side of a hill which slopes down the valley of the Henares. The upper town, therefore, is steep and it is surmounted by the episcopal palace or Alcazar which crowns the hill, for the bishop was once lord of Sigüenza. It has a fine subterranean Gothic cathedral, three parish churches, two deserted and two completed Franciscan convents, barracks, a civil and military hospital, several colleges and schools, and a courthouse situated in the great square, which is very large, and provided with a beautiful fountain and esplanade. There are also flour and tanning mills, dye-works, potteries, tanneries and many factories of linen-clothes, bales, harnesses, &c. Pop. 4717.

SIGÜENZA a vil. Spain prov. Leon, dist. Astorga with a church school and manufactures of lums. Pop. 1732.

SIGVA, a river, Asiatic Russia, rises on the E. slope of the Ural Mountains gov. Tobolsk flows S.E. and joins the bank Suva, after a course of about 130 m.

SIGUN a river Asiatic Turkey. See BYZONS.

SIGHT a seaport in S. coast, Arabia, S.W. the promontory of Ras Farak lat. 15° 30' N. lon. 51° 10' E. The length of the stretch along the shore makes it look large when viewed from the sea, but on inspection it is found to be a comparatively insignificant place, in a very dilapidated state, and containing from 300 or 400 to 2000 inhabitants, according to the trade and season. The anchorage is merely an open roadstead. About 30 vessels belonging to it are employed in catching sharks sun-fish &c., in exporting these products to Muscat, Zanzibar, &c. or in carrying on an lucrative trade in grain along the coast.

SIGY a or **SIGYAN** [anc. *Sigyn*] a tw. France, dep. Aude, on a lagoon of the same name, 34 m. S.E.E. Carcassonne. It is surrounded by salt marshes, from which much salt is made; and has a trade in salt, wine, brandy, honey and wool P. 1015.

SIKINO [ann. *Sikino*], an isl. Grecian Archipelago, one of the Cyclades, between isla. Nio and Polyandros, lon. 26° 40' N. lon. 25° 10' E. greatest length N.E. to S.W. about 10 m. breadth about 3 m. Its surface is elevated and even mountainous, but the soil is generally fertile and produces wheat, fruit, particularly figs, a little cotton, and much wine. Owing to the abundance and excellence of the figs, Sikino is sometimes called the Wine Island. Its chief place is a town of same name, situated on a height near a tremendous precipice which overhangs the sea. There is no proper harbour, but the landing-place at San Bourgnias.

SIKKIM a rajahship, N. Hindoostan, under British protection lat. 26° 40' to 28° N., lon. 88° to 90° E. bounded, N. by Tibet, E. by Bootan, from which it is separated chiefly by the Chola range, and partly on the S.E. by the river Teesta. S. the plains of the presidency of Bengal and W. Nepal from which it is separated by the Sikkim range greatest length N. to S. 90 m. breadth, 60 m. It forms a S. section of the Himalayas, and consists of a series of mountain ranges, which on the S. rise steeply from the plains in steps from 6000 ft. to 10,000 ft. and continuing to increase in height as they proceed N. finally on the N.W. rise to Kanchenjunga to 28,178 ft., the loftiest height that has yet been measured on the surface of the globe. A range stretching

from this mountain E.N.E. to that of Donkhi has a mean elevation of 18,000 ft. to 19,000 ft. while several individual summits are higher and that of Chomomo, in particular, is 22,000 ft. The whole surface is thus a mere mass of mountains, separated by precipitous ravines, and nowhere so far distant as to leave room for flat valleys or plains. The whole country belongs to the basin of the Ganges, which receives its drainage chiefly by the Teesta. This river rising in Tibet, at the height of 19,000 ft. pursues a winding course E. through Sikkim, and is augmented within it by numerous tributaries, of which the most important is the Great Rangpo, which joins it on the right shortly before it quits the rajahship. The strata are composed chiefly of granite strangely colored gneiss, mica and chlorite slate, porphyry, and sandstone. Limestone occurs rarely in detached portions, and never in continuous seams. In many places the decomposition of granite, in which feldspar abounds, has produced beds of fine porcelain-clay. The latter assumes being far beyond the snow limit, of course retains their snowy covering at all seasons but bare black mountains are never seen, and up to the height of 15,000 ft. the loftiest and steepest precipices are covered with vegetation and the mountains present an uninterrupted succession of magnificent forests. In the narrow valleys watered by mountain streams, the rhododendrons are particularly luxuriant, and often give to the scenery one of its characteristic and not least pleasing features. Thus luxuriance of vegetation is evidently owing to the excessive humidity of the atmosphere. The N. and N.E. of Sikkim are indeed beyond the region of much rain, but with this exception it is the dampest territory within the whole range of the Himalayas. A. winds, blowing almost constantly from the Bay of Bengal whose nearest shores are about 400 m. distant, pass over the low plains without parting with any of the moisture with which they are overloaded, but on reaching the mountain-terraces of Sikkim, discharge it either in heavy torrents of rain, or send it down more gradually in dense mists, which hang particularly over the lower valleys, and make them so unhealthy that the villages are always placed above them, on lateral spurs, at least 4000 ft. above sea-level. Above this height the climate is generally salubrious and Darjiling, the station of a British resident, on the S. frontier at the height of 7165 ft., is most admirably adapted for the Bay of Bengal constitution after they have been planted by residents in other parts of India. At this station the mean temperature is about 50°, or 2° higher than that of London, and 28° higher than that of Calcutta. The range of the thermometer, or the mean difference of temperature between the hottest and coldest months, is only 22° while that of London is 27°. The following table furnishes an approximate estimate both of the temperature and humidity at different altitudes:—

| Altitude. | Mean Month. | Mean Wettest Month. | Mean Coldest Month. | Mean Daily Range. | Mean Rain in India. |
|------------|-------------|---------------------|---------------------|-------------------|---------------------|
| 11,000 ft. | 49° 6 | 56° 0 | 36° 0 | 20° 0 | 1° = 320 ft. |
| 15,000 ft. | 39° 6 | 46° 0 | 10° 0 | 36° 0 | 1° = 320 ft. |
| 19,000 ft. | 19° 6 | 22° 0 | 6° 0 | 36° 0 | 1° = 400 ft. |

The soil of Sikkim consists for the most part of a rich black vegetable mould, resting on a bed of clay so tenacious as to be well adapted for making bricks. The principal crops are varieties of millet, maize, and rice. The last has been cultivated at the height of 8000 ft. though the crop then becomes uncertain. Other crops more partially cultivated are wheat, barley, peas, radishes, and turnips, but the husbandry is very indifferent. The aboriginal inhabitants of Sikkim are Lepchas, who have markedly Mongolian features, speak a language radically Tibetan and though not professing of any religion, acknowledge the existence of good and bad spirits, and appear to have a leaning to Buddhism. They are deficient in courage, but frank, generous, and polite, scrupulously honest and, in respect to domestic relations, contrast favourably with their Chinese and Nepalese neighbours, polygamy being rare among them, and polyandry unknown. They live chiefly on rice, but are coarse feeders, and delight in pork, elephant, and all kinds of animal food. Next to the Lepchas the most numerous tribes in Sikkim are the Limbus, professed Buddhists, and equally remarkable for bravery and

crucely and the Moormin, a scattered people, of whom little is known.—(Hooker's *Himalayan Journals* London 1854.)

SILKLO a market in Hungary, co and 24 m. N. Arad with a church, and the remains of old fortifications. P. 2724.
SILKLO (Dacian), *Silva*, *Silva*, or *Silva*, a market in Hungary. Thither Danube, co Borsany 47 m. N. E. Pöcs; with three churches a celebrated old castle, situated on a precipitous height. A Franciscan monastery, with thermal springs immediately adjoining it a silk mill and marble quarries. Pop. 2347.

SILKOF the smallest of the four principal isles of Japan lat. 33° 45' to 34° 38' N. lon 131° 50' to 134° 40' E. it has 8 of Nippon, and E. of Kiusiu from both of which it is only separated by narrow channels, thickly straddled with small islands. It is about 140 m long, and 70 m broad at its greatest breadth. Its interior appears to be mountainous and barren. The coast is exposed to a wild and tempestuous sea, and, although indented with many deep bays, has scarcely a harbour that could be entered with safety. It is divided into four provinces—Awa, Iyo, Sanuki, and Ise.

SILKULA a vil. Hungary Thither Thalm, co and 14 m. N. E. Arad on a tongue of land in an island formed by the White Kőrös. It contains two churches, and is remarkable for the excellence of its fruit, particularly apples. Pop. 1418.

SIL, a river Spain, rises in the mountains of Asturias, in the N. W. extremity of Leon. flows S. W. and 7 m. N. W. Orreaga joins its bank. Much nearly doubling its volume, after a course of about 100 m. Its chief affluents are the Valcarlos, Selmo, Borea, Cabrera, and Silvan.

SILANO, or *Silano* a vil. and com. duchy of Modena, about 5 m. N. Campeggiano with a church, and the remains of an old castle. Pop. 1001.

SILANUS, a vil. and com. isl. Sardinia, div. Sassari 65 m. N. E. by Cagliari. It has marble quarries. Pop. 1502.
SILAO, a m. Mexico, 360 and 10 m. N. W. Guaxacaute. It is well built. Pop. 400.

SILBERSACH, a vil. Bohemia, circle Eibegun, with a school, manufactures of linen lace, printed calicoes, and Prussian blue and several mills. Pop. 2045.

SILBERSBERG a m. Prussia, gov. and 40 m. S. R. V. Breslau. It is a place of great strength formed by Frederick the Great to guard the pass from Bohemia, at the cost of nearly 4,000,000 sterling. Its works now almost entirely out of the rocks, and their formidable nature, have procured it the name of the *Stille Stadt*. It contains two churches and an hospital. Pop. 1760.

SILCHESTER, par. Eng. Hunts 1881 ac. Pop. 466.
SILE, a river Italy Venetia, rises in prov. Treviso flows E., divides into two branches, one of which, proceeding E., joins the Piave-Venetia, while the other flows S. and falls into the Adriatic about 4 m. E. Venice. total course, 40 m., becomes navigable 8 m. above its bifurcation.

SILBY a vil. par. England, co. Leicester on the Midland railway, which has here a station, above 3 m. E. Mountsorrel. It has a parish church, Baptist and Wesleyan chapels, and a free school, inhabitants chiefly employed in agriculture. Area of par. 2190 ac. Pop. 1660.

SILLES, a walled vil. Spain Andalusia prov. and 70 m. N. E. Jaen with a church, hospital, townhouse, school, and hermitage, manufactures of dyes for wool, a tanning and several oil and saw mills. Pop. (agricultural), 2203.

SILESIA (Austrian) See MORAVIA.

SILESIA (Prussian) (German, *Schlesien*) a prov. in the S. E. of Prussia, bounded N. by provs. Brandenburg and Posen E. Posen and Poland S. Moravia and Bohemia, and W. Bohemia, and the kingdom, and prov. of Saxony. area 11,868 geo. sq. m. The Oder which traverses the province S. E. to N. W. divides it into two nearly equal portions. That on the S. bank is generally mountainous being covered in the S. by the Sudetes, and in the S. W. by branches of the Riesengebirge. Between the ridges, however, are numerous valleys, some of them of considerable extent, and generally both fertile and well cultivated. The division on the right bank is flat but nearly extensively covered by heath and stagnant pools, and far from fertile. The whole province belongs to the basin of the Baltic, and with exception of a small portion in the S. E. which sends its waters to the Vistula is drained by the Oder, and its affluents the Bober, Kainbach, Weichitz, Loba, Ohlau, and Neisse on the left; and the

Bartisch, Weide, Malapane and Kłodzka on the right. The system of agriculture pursued is very imperfect, and the grain raised in ordinary years is not more than sufficient for the home consumption. There is not much ground well adapted for wheat and the principal crops are rye, oats, and barley. Potatoes and flax, also, both of which thrive well, are extensively cultivated, and in some districts hops, tobacco and madder yield valuable returns. The vine is only cultivated in small patches, and the wine produced is very indifferent. Sheep are reared in vast numbers, and are celebrated both for the abundance and the fineness of their wool, and bee-culture forms an important branch of rural economy. The minerals are of great importance and include iron, copper, lead, calamine, arsenic, alum, pyrites, and coal. They are worked extensively and employ numerous smelting-furnaces. Other manufactures also, particularly woollen and linen tissues, have made great progress, and few provinces of Prussia can boast of an equally industrious population. Silesia is divided into three governments—Breslau (the capital), Legnica, and Oppeln. Pop. (1849), 8,061,598.

SILHET, or *Sylhet* a m. Hindoostan prov. Bengal cap. dist. of same name, r. bank Soomah, 270 m. N. E. Calcutta. It is a large Mahometan town pleasantly situated on a slightly raised part of the hills, but still so low that during the rains it is surrounded by water, and becomes accessible only by boats. The houses of the Europeans are built on tables or hillocks one of which 150 ft. high is crowned by the residence of the district judge, and surrounded by fine spreading oaks. The climate, though hot and damp, is remarkably healthy and the two most important branches of trade are lime, and a long sedge used for thatching, both of which are sent in large quantities to Calcutta.—The mirror area, 2861 sq. m. consists chiefly of broad flat valleys, annually submerged, broken by low hills, which on the N. frontier, rise into the Coomra Mountains; has a luxuriant vegetation and is often beautifully clothed with a bright green jungle of small palms and many kinds of ferns. Trees, on the slopes of the narrower parts of the valleys, often raise their slender brown trunks 40 ft. high and terminate in feathery crowns of foliage. Among the hills many remarkable fossils have been found, and in the Soomra which receives most of the drainage porpoises and alligators, both long and short nosed, abound. On the low swampy grounds very heavy crops of rice are raised. On the higher grounds cotton and sugar are produced, but not in sufficient quantities to supply the wants of the district; there too oranges and limes grow in whole forests, and form one of the most important articles of export. Other articles of commerce are opium, found in inexhaustible beds, wax, ivory and elephants. Coal also has been discovered. The principal articles of manufacture are a cloth made from wild silk, and shawls, remarkable for the lustre and durability of their black varnish. Boat-building is carried on to a large extent.—(Hooker's *Himalayan Journals*, &c.)

SILLAN par. Wales, Cardigan 2123 ac. Pop. 866.

SILLIGU, a vil. and com. isl. Sardinia div. Sassari on a slope in a rather unhealthy district. Pop. 2643.

SILINTY (anc. *Thymozotus*) a maritime vil. Asiae Turkey, peak Iteia, E. side, entrance to the Gulf of Adalia 25 m. S. S. W. Alaya.

SILILQA a vil. and com. isl. Sardinia. 12 m. W. N. W. Cagliari, near the entrance of the valley of Dorica. 1. 1446.

SILIBTRI or *Silivria* a fortified town in Turkey by Europe, Bulgaria, at the foot of a hill r. bank Danube, 66 m. N. by S. Stambul. It is of semicircular form in general poorly built, consisting of narrow winding, ill paved and dirty streets lined by low and gloomy-looking houses, built of wood, and has five mosques, a large Greek church and convent, capacious barracks, public baths a custom-house with extensive magazines attached for warehousing flour and grain, a few insignificant manufactures and a considerable trade, chiefly in wood and cattle. Its fortifications are strongly built of solid masonry, and strengthened by several detached forts of admirable construction and of the most formidable description. The principal of these forts, *Abd i Mejid*, occupies the hill *Abdur*, which commands the town, and is esteemed one of the most remarkable military works of the age. Silivri successfully withstood the Russians in 1773 and in 1809 but after a long siege was taken by them in 1829, since which time the fortifications have been immensely strengthened. Pop. 36,000.

SILVRI or **SELAVAL** (anc. *Selma*) a town in Turkey in Europe, N shore S. of Marmora, 40 m. W Constantinople. It rises in the form of an amphitheatre on the side of a hill, covered by a ruined fortress and consists of an upper and a lower town the former occupied chiefly by Greeks and Jews and the lower by the Turks. It has a bazaar, several mosques, a harbour and some trade. Pop. about 5000.

SILVA or **SILVIA** a lake, Sweden, 114 and 28 m. N W Fölen. It is of very irregular shape about 20 m. long, by 9 m. broad, area, 48 geo. sq. m. and is remarkable for the beautiful and finely wooded scenery along its banks. Its shores is covered by a lofty and almost inaccessible mountain range. Near its W shore is the island of Soller.

SILVADONOV par Eng. Lincoln 3505 ac. P 256.

SILVASTON, a vil and par England, York (W. Riding) 4 m. S.W. Barnsley. The village, situated in a picturesque valley has an ancient but handsome and commodious parish church, said to have been erected soon after the Norman conquest. The inhabitants are chiefly employed in the coal-works of the neighbourhood, but partly also as handloom-weavers and milters. Area of par. 14,981 ac. Pop. 21,296.

SILVA, a tu. Spain, prov and 9 m. S Valencia, on the Albufera lagoon with a townhouse, granary, two primary schools, a church and a hermitage. Oil, rice, and flour mills. Pop. (agricultural) 3070.

SILVA a tu. of W. Africa Danbarra r bank Joliba, between Jamba and Lago lat. 13 17' N lon. 5 50' W Park's first expedition terminated here.

SILLAN Mew a tu. Burma. See CHALAIN Mew.

SILLAW a large and populous in. Mirdoudan, prov. Hilar about 40 m. S.E. Patna.

SILLE-LE-GILLAUNE, a tu. France dep. Sarthe 21 m. N W Le Mans. It has an ancient parish church with a fine W porch and a castle of very early date, but still in good preservation and manufacture of fine linen and leather and a trade in hemp thread, wool fabrics wax, &c. P 2210.

SILLEU a vil and com. Belgium prov. Hungary, near Treutchen, 1 bank W. seg. 43 m. N W W. N. It is an old but well built village. The houses are lined with arcades and it has a gymnasium, a high school, several breweries and some trade in linen and wine. Pop. 2240.

SILLEJÖRD a vil and par Norway prov. Agderhus, half Brædberg, on the N W extremity of a lake of same name where it receives the Fjodal. Pop. 2400.

SILLINGY a vil and com. France, dep. Haute Saône prov. Geneva road Auvier in an elevated plain P 1143.

SILLY a vil and com. Belgium prov. Namur 13 m. N by V. Meuse with manufacture of soap, leather oil bricks, and some woollen s. uff. Pop. 2603.

SILLO, a vil. Canaries, in Teneriffe, at the S foot of the *Montaña de Arguine* about 1 m. from the sea. It is poorly built but has a church and a primary school a flour mill and some trade in silk. Pop. 1063.

SILS, two vils. and par Switzerland can. Grisons. The one, in an angle formed by the confluence of the Albula with the Hunter Rhoden, 12 m. S.W. Corvè, has two churches, a modern castle finely situated, and the ruins of two ancient castles. P 291. The other in the S.E. of the canton N. E. side lake of same name 5264 ft. abo. a sea-level is the highest village in the Engadine. Pop. 225.

SILSDEN a vil and claybury, Eng. and com. York (W. Riding) in a romantic and beautifully varied district on the Aire, 4 m. N by W. Knaithley with a neat parish church, Primitive and Wesleyan Methodist chapels, manufactures of nails and woollen and cotton goods, and quarries of excellent building-stone. Pop. 2846.

SILT, or **SILT** an isl. Denmark, in the North Sea, off coast Schleswig; greatest length, N to S. about 20 m. breadth, varying from 3 m. to 6 m. Area, 55 geo. sq. m. It is surrounded with sandbanks, and affords a valuable protection to the marsh-lands of Schleswig from the encroachments of the ocean. It is by no means fertile, the arable land not exceeding 9 geo. sq. m. and sand and heath occupying almost all the rest. The inhabitants are Finelanders, generally distinguished by fine, mainly and beautiful forms. They make excellent sailors, and live chiefly by fishing and seafaring. Pop. 2600.

SILTON two pars. Eng. — 1 Dorset, 1257 ac. P 368 — 2 (Over) York (N. Riding), 8694 ac. Pop. 265.

SILVANO a vil. and com. Italy, Piedmont div. Genova prov. Novi, near the confluence of the Ormentas with the Orbe. It is an ancient place, and has two churches. Pop. 1922.

SILVER ISLAND, China. See Kwantoo.

SILVERSTONE, par Eng. Northampton, 2110 ac. P 1184.

SILVERTON a vil and par England Devon, near the Great Western railway 7 m. S. H. Exeter. The village, situated on a commanding height, contains a handsome parish church, a Wesleyan chapel a free school, and two annual fairs. The inhabitants are chiefly agricultural. Area of par. 4714 ac. Pop. 1376.

SILVES, a tu. Portugal prov. Algarve, 17 m. S. N. E. Lagos, on the Partimão, here crossed by a stone-bridge. It has a handsome church, a convent, Latin school, hospital, and almshouse was taken from the Moors in 1348. Pop. 2400.

SILVÉS, or **SANTA ANA**, a vil and par. Brazilian Guayana, on the Lake Saraca, 20 m. from 1 bank Amazon, above Obidos. The inhabitants, Indians and Moriscos, cultivate cotton and excellent tobacco, and gather cacao and sarsaparilla, which grow here spontaneously.

SILVINGTON par Eng. Salop 403 ac. Pop. 27.

SILZ, a vil Tyrol, circle Inns, r. Isar, 1 m. with a court of justice and a church. Pop. 1116.

SIM or **SAMA** a river Russia, rises in gov. Orenburg flows eastwardly N. then S. E. and joins r. bank Ismer, about 18 m. S. E. Omsk. Total course, 100 m.

SIMABARA, a vast isl. Japan, W coast 11. Kus u, stretching far inland, and forming the basin in which are the peninsula of Simabara and the islands of Amakusa, Kami Fogi Sumo-Togi, Oho-Jano, Nagasima, and a number of other islands and rocks. The peninsula of Simabara is remarkable for the lofty volcano of Wuzendake.

SIMANCAE, a tu. Spain Leon prov. and 8 m. S W Valladolid, r. bank Pisuerga, here crossed by a bridge with 17 arches. It has a courteous, primary school, and church, but its chief public building is a spacious and strongly fortified edifice rising above the river which formerly belonged to the Henricians, the admirals of Castile, but was taken from them by Ferdinand and Isabella, and destined by them for the national archives. Most of the earlier papers were destroyed by the Comuneros in 1520 but those dating from 1476 were very complete. When quartered at Simancae in 1809 the French seized all the papers relating to their diplomacy with Spain and before leaving they destroyed immense quantities of records, and set fire to the building the left wing of which was burned down. The castle has since been repaired and the monuments which escaped destruction and spoliation have been re-arranged. Simancae figure in the Roman itinerary under the name of *Silmanca*. The celebrated Irish rebel Hugh Roe O'Donnell, died here in 1603. Pop. 808.

SIMAND, a market in Hungary, Thither House, so, and 21 m. N. E. Árad with two churches, a synagogue, the remains of a fort built by the Emperor Trajan, and some trade in corn and cattle. Pop. 4868.

SIMBIRSK a gov. Russia, bounded, N. by Kasan, E. Orenburg, S. Rostov and W. Penza and Nym. Novgorod lat. 52° 40' to 55° 40' N lon. 45° 30' to 51° E. greatest length, N. W. to S. E. 260 m. greatest breadth, 149 m., area 22,400 geo. sq. m. It contains generally of an arid are plain broken by low hills, which rise to the height of 400 ft. on r. bank Volga. This river traverses the government circuitously N. to S. and towards the S. makes a very remarkable sweep, including a large tract, which has much the appearance of a steppe. The only other river of importance is the Sima, an affluent of the Volga. The lakes are individually small, but so numerous that 666 have been counted. The climate is considered mild, though for five months in the year the Volga is covered with ice. The air is clear and healthy. The soil consists of a mixture of chalk, marl, clay, and vegetable mould; and is of the greatest fertility, producing abundant crops of all kinds of grain, hemp, flax, hay and tobacco. The domestic animals are of very inferior breeds, and the fruit is generally of indifferent quality. The N. part of the government is well wooded but considerable scarcity is felt in the S. The principal trees are birch, alder, and oak. Fish abound both in the rivers and lakes. The minerals consist chiefly of gypsum, alabaster, limestone, sulphur, and naphtha. The manufactures, not carried on to any great extent, consist chiefly of woollen and linen

cloth, leather, glass, soap, and candles. The trade by the Volga is important. The chief exports are grain, hemp, cattle, raw and prepared hides, soap, fish &c. The government is divided into 10 circles, of which Simbirsk is the cap. Pop. (1850) 1,345,000.

SIMBIRSK, a tn. Russia, esp. above gov. on a lofty bank of the Volga, 448 m E S.E. Moscow. It is very irregularly built, and consists principally of wooden houses and narrow streets. It contains 16 churches, most of them massive structures, two convents, a gymnasium, and a central school, and has an extensive trade, particularly in corn and fish; and an annual fair, which lasts three days. P. 13,500.

SIMCOE (LAKE), a lake, Canada West, between Lake Ontario and Georgian Bay, Lake Huron, nearly 80 m long and about 18 m broad at its widest part, and said to be about 170 ft. above Lake Huron, into which it discharges itself through Lake Georgian, the Severn, and Georgian Bay. The water in some parts of the lake is of considerable depth, and it is generally frozen completely over in the winter so as to be passable with safety for sleighs. It contains numerous islands, some of them of large size, but only one of them, Simcoe Island inhabited, and that by Indians. The banks are generally clothed with wood down to the water's edge. A steamer has plied on the lake for many years past, and very fine white-fish are taken in it.

SIMCOE, a tn. Canada West, esp. oo. Norfolk, on Patterson's Creek about 8 m N of Lake Erie and 70 m S.W. Toronto. It is the seat of the government and county offices, and has a courthouse and jail, an Episcopal, Presbyterian, Congregational Methodist and two Baptist places of worship, a grammar and several other schools, a soap and umilla factory, a brewery, three distilleries, two canneries, two foundries, an ashery, a saw and two flour mills. It publishes three newspapers. Pop. (1852), 1452; (1854) 1700.

SIMETO a river Sicily. See GIARRETTA.

SIMFEEDOPOL, a tn. Russia, cap. gov. Taurida, on a dry unsheltered plateau at the foot of lofty hills, on the left bank here crossed by a bridge 192 m S.E. Odessa, and 40 m N.E. Sevastopol. It consists of an old and a new town, the former very poorly built, and composed of crooked narrow streets, inhabited chiefly by Tatars, and the latter very regularly built in straight and spacious streets, and a very hand some square, and has three Greek churches, five mosques, a R. Catholic chapel, a gymnasium, large civil and military hospital, and several important courts and public offices. Pop. 8000.—(Demidoff *Voy. dans la Russie Merid.*)

SIMLAH a sanitary station Hindoostan in the protected Sikh territory 60 m N.N.E. Umballa, and 7300 ft. above the sea. Besides a bazaar which was almost be called a

belong chiefly to the more opulent ranks. It was founded in 1819 and for several years past it has been the most frequent residence of the governor-general of India.

SIMMEN, a river Switzerland, rises in the S of San Bern on the N slope of the Bernese Alps; flows first N.N.W. through the romantic valley of same name, then E.N.E. and joins the Rhine, 3 m above Lake Thun; total course 85 m.

SIMMERING a vil. Lower Austria, near r. bank Danube, about 13 m S.E. Vienna, of which it may be considered a suburb. It has a very extensive brewery; and manufactures of leather and chemical products. A great quantity of vegetable stuffs are raised in the neighbourhood for the Vienna market. Pop. 2080.

SIMMERN a tn. Rhenish Prussia gov. and 86 m S.W. Coblenz with three churches, a synagogue, and burgher-school manufactures of woollen and linen cloth, hosiery and leather, and iron and several other mills. Pop. 8100.

SIMMOZHEIM a vil. Württemberg circle Schwabmünd, bail and near Ulm, with a parish church. Pop. 1020.

SIMNETZA, or *Simnetza*, a market in Walachia, on the Danube, opposite Kustova, 77 m S.W. Biala, near.

SIMOGA a fortified tn. Hindoostan Mysore, 1300 m N.W. Seringapatam, lat. 13° 56' N. lon. 75° 41' E. destroyed by the Maharras in 1790.

SIMONVHURA, par. Eng. Northumb. 13 872 ac. P. 1080.

SIMONVSEKI a small tn. and harbor Japan lat. Nippon on the Strait of Kiusiu with an active coasting-trade, some quarries of serpentine, and a celebrated temple.

SIMONSTOWN, a tn. Cape of Good Hope, on Simon's Bay an indentation on W side of False Bay. It is 25 m. S. Cape Town and consists of little more than a single row of houses between the sea and the foot of a steep mountain. A large proportion of the houses are places for the sale of strong drink, and many are also stores. There are here a Wesleyan chapel and an Episcopal place of worship.

SIMONFORAYA or *Simonsforaya* a market in Hungary co. Tolna, on the Slo 56 m S.W. Buda. It contains a church, a handsome chateau, and the ruins of an old castle and has several mills. Pop. 1500.

SIMONY, a vil. Hungary. Thudis Danube co. Tura, burg. 10 m from Stein-am-Adner with two churches. P. 1414.

SIMPANG a vil. Java, close by Sorabaya, of which it forms a kind of suburb, containing many elegant seats, and the magnificent residence-house of the provincial governor.

SIMPANG, a tn. Borneo 16 m. from S.W. coast, 21 m N.E. Succadana near the confluence of the Mahan with the Simpang, a short stream which rises in two branches in Mount Spontick, is called the Semandang in its upper part, and has a S.W. course of 4 m.

SIMPLON (German, *Simplen*, Italian *Simplone*) a mountain of the Lepontine Alps Switzerland in the P. of San Vailala, and celebrated for the road which passes over it, and is justly regarded as one of the most celebrated engineering works of modern times. It commences near Brig on the Swiss side, and terminates at the town of Domodossola in Piedmont. (See Alps, vol. 1 p. 108).

SIMPSON par. Eng. Bucks 1380 ac. Pop. 540.

SIMUSIR one of Kurile Is. N. of Urup lat. 47° 50' N. lon. 151° 53' 50' E. It has a circuit of about 75 m but has no good anchorage; and consists almost entirely of a mass of mountains many of them peaked, and evidently volcanic. It does not appear to be inhabited.

SIN or *Sin*, a town, a tn. France dep. Nord, 2 m E. Douai. It has some trade in flax. Pop. 1640.

SINACANTAN (SAN DOMINGO) a tn. Mexico dep. Chiapas, on the borders of Tabasco in the territory of the Yagques, with considerable manufactures of shawls, and other articles of silk. Pop. 2500.

SINAI is properly the general name of a mountain-mass, Arabia Petraea, occupying the E. extremity of the peninsula of same name which projects between the two forks of the Red Sea, the Bay of Suez separating it from Egypt on the W. and

SINAIAN.—From a Sketch by Hugo Landt.

native town, it contains above 400 houses, built of wood and stone, in European style, and dispersed amongst forests of oaks, along the crest of different mountain-ranges. At the observatory, the summer-heat has been found seldom to rise above 75°, and the mean temperature of the year is about 63°. The Sinaitic is accordingly resorted to by British invaders, who

of Tabasco in the territory of the Yagques, with considerable manufactures of shawls, and other articles of silk. Pop. 2500.

SINAI is properly the general name of a mountain-mass, Arabia Petraea, occupying the E. extremity of the peninsula of same name which projects between the two forks of the Red Sea, the Bay of Suez separating it from Egypt on the W. and

the Bay of Amabek separating it from another portion of Arica or the E. Southern, however, the name Sinal, or rather Jobelot-Sinal is used in a more restricted sense, and confined to the culminating mountain of the mass, which is situated not far from its N edge and presents a number of magnificent peaks, the loftiest of which rises 9274 ft. above sea-level. The whole mass is of a triangular shape, about 70 m. long from N to S., terminating nearly in a point in the latter direction but gradually widening out till its N base has a breadth of about 80 m. It consists of a series of mountains, composed for the most part of granite, gneiss, and porphyry, with occasional strata of sandstone and limestone, and intersected by numerous valleys or canyons. These are generally mere ravines, deep and narrow, and bounded in by walls of granite, which in some instances rise almost perpendicularly, so as to form precipices 1000 ft. in height but a few of them attain a considerable width, and one of them in particular, called Waddi Mema, is believed, both from its extent and its locality to be that on which the Israelites encamped during the giving of the Law. Mount Sinal proper is situated considerably N W of the true waddi, and not being visible from the supposed encampment, cannot claim to be the sacred mountain where the Law was promulgated; but immediately S. and E. of the waddi another mountain rises more than 2000 ft. above it and has been almost universally recognized as the scene of the wonders with which that ever-memorable event was accompanied. This mountain, 7565 ft. above sea-level still bears the name of Horob, and immediately at its base overlooking the Waddi Mema, stands the celebrated monastery of St. Catherine. Its buildings form a quadrangle, inclosed by walls, on an average 30 ft. and at some points 50 ft. high, and strewn by bastions, which give it all the appearance of a fortress. The interior contains, in addition to cloisters for the monks and extensive offices a principal church, overladen with tasteless ornaments, 23 more churches or chapels each dedicated to a particular saint and a library supposed to have been once of great value but now deprived of its treasures through the carelessness or mercenary spirit of the monks. In the loftier waddi of the Sinal peninsula the moisture is tolerably abundant, and suffices not only to furnish a spontaneous covering of grass, but to rear shrubs of mosses and ferns; but in the lower waddi the vegetation is much more scanty and the general appearance of the surface is very desolate.

SINALOA a dep and in Mexico. See CHICALOA.

SINALUNGA a m. Tuscany. See ANTRALUNGA.

SINARUCCI, a river Venezuela rises in prov. Aoba-guas about lat. 8° 30' N lon. 69° 12' W flows nearly due E., and falls into the Orinoco, about lat. 6° 30' N lon. 67° 30' W having been previously joined by the Sinarungito. Entire course about 120 m.

SINAY a vil. and com. Belgium, prov. E. Flanders 15 m. N E by E. Ghent with manufactures of linen and cotton, distilleries, breweries a tannery dye-work vinegar-factory and several cere and oil mills. Pop. 4110.

SIAI, or SINDU, a river Hindoostan which rises in a small mountain-range in Malwah, 13 m. S. W. Seronag flows easterly N N W., and joins bank Chambal total course, 200 m. Its current is too rapid for navigation.

SINDE See SINDH.

SINDLFFINGEN, a m. Württemberg, circle Neckar, 2 m. N N W. Böblingen, with a handsome church, a grammar-school, and manufactures of linen and woolen cloth. There was once a Benedictine monastery here. Pop. 8869.

SINDIA, a vil. and com., M. Sardinia, div. Sassari, 7 m. E. N. E. Bosa. Pop. 1061.

SINDIM, or SINDUR, a m. and par. Portugal, prov. Beira-Alta, 13 m. S. E. Lamego, near bank Tavora. P. 1185.

SINDORSKOE, a lake, Russia, in N. of gov. Vologda, 80 m. N N E. Ust-Sheksk great length, E. to W. 12 m. mean breadth, about 8 m.

SINEJA a river Russia, rises near Laskow gov. Vitebsk flows N through gov. Polov and turning E joins L. bank Volga, 15 m. above Orel; total course, 100 m. **SINIS**, a m. and exort, Portugal, prov. Algarve, on a small creek of the Atlantic, 47 m. S. by E. Setúbal. It is walled, has tolerably well-built houses, and straight spacious streets. Its port is small, and the inhabitants are chiefly engaged in fishing. Vasco-da-Gama was born here. P. 1860.

SINEU a m. Spain, Isl. Majorca, 21 m. E. Palma; with an ex-convent, the church belonging to which is open for worship; a manum, formerly a palace of the kings of Majorca, a parish church and a school of primary instruction near it is a fine quarry. On May 1, there is a well-attended fair for cattle, fruits and general merchandise. Pop. 3818.

SINKW a river, British America, rises E. side of the Rocky Mountains, about lat. 66° N flows N. E., and joins the Peace River, after a course of about 100 m.

SING SING, a m. U. States, New York, pleasantly situated on a commanding height above 1 bank Hudson, 30 m. N New York. Among its public edifices are Episcopal, Presbyterian, Methodist, and Baptist churches, an academy, occupying a marble structure three stories high; a female seminary, remarkable for the beauty of its site; and a large state-prison or penitentiary. The last, situated in an inclosure of 130 ac., consists of a range of buildings in the form of a hollow square, five stories high and containing cells for 1000 prisoners. The main prison has a front of 484 ft. facing the Hudson, and the female prison stands on a height apart from it. The whole buildings are constructed of fine white marble, obtained in abundance in the vicinity and are handsomely quarried, chiefly by the convicts, who, in 1850 numbered 721 of whom only 80 were females. Another magnificent structure recently erected here, is the Croton aqueduct-bridge, which spans the Sing Sing creek by a single arch 88 ft. wide, and 100 ft. high. Pop. 1850) 4699

SINGAPORE, a British settlement, India beyond-the-Ganges, subordinate to presid. Bengal and consisting of a small island, lat. 1° 17' N lon. 103° 50' E., and its cap., of same name, with numerous surrounding islets off S. extremity of Malay Peninsula, between Cape Horn and Cape Sumatra, and separated from the mainland by a narrow strait 2 m. to 4 m. in breadth, called Strait Tabera [old strait] through which ships between India and China used to pass in the earlier periods of European navigation. The principal island is of rhomboidal shape about 20 m. long E. to W., and 11 m. average breadth, area, about 275 sq. m. Like the adjacent islets, it is mostly covered with a very thick jungle down to the water's edge. Its surface is generally undulating rising in some parts into round jungle-covered hills, the highest of which (called Bukit-Tima or the Tin-hill) rises 500 ft. above the sea. Near the coast are some low ridges of a very character, flooded daily by the tides. The soil of the hills is chiefly of coralline resting on sandstone that of the low ground is generally blackish, from containing a great proportion of decayed vegetable matter. A stiff clay is found in some parts, well suited for the manufacture of kaolin-pottery but it is little employed for burning. Fragments of granite and trap are scattered along the beach, and these formations seem to underlie the sandstone on the higher parts of the island. Iron is the only metal produced though iron probably exists here, as in the neighbouring countries. The island has no rivers, but has several rivulets, one of which stands Java, the capital. The climate resembles that of Malacca in its equability, but from the absence of regular alternations of land and sea breeze, it is considerably hotter. The thermometer annually ranges between 71° and 89° Fah., the average summer-heat (May and June) being 84° the temperature of the colder months (December and January) 76°. Though only 76 m. from the equator, the island is remarkable for salubrity. Its proximity to the line secures frequent refreshing showers in the forenoon, in consequence, always in the full bloom of summer. The greatest quantity of rain falls in December and January, and the total annual fall averages about 108 inches, nearly a half less than that at Rangoon. The soil where of sufficient depth, is well adapted for the growth of spices, and all kinds of these products grow readily, but nutmegs, cloves, ginger and pepper are the only sorts raised for commerce, the last named is dependent on the cultivation of gambier an abundant crop, the leaves of which, after being boiled, are used as manure for the pepper-vines. The sugar-cane and coconuts have also been cultivated with considerable success. Rice, coffee, and cotton do not thrive. Numerous vegetables are raised by the Chinese settlers, including pumpkins, various kinds of melons, cucumbers, pumpkins, sweet potatoes, onions, garlic, and others peculiar to the country. Singapore possesses all the fruit-bearing trees of the Indian Archipelago. Agr-agar is delicate tree-like sta-

wood) is plentifully found on the neighbouring coral reefs and shoals, and is an important article of commerce for the China and eastern markets. Tigers swarm in the jungles occasionally committing great havoc and, indeed, according to a recent authority carry off from 300 to 800 persons annually. The wild-cat otter, flying-squirrel, ferret, porcupine, pangolin, sloth, wild-bag several kinds of monkeys bats, especially the flying-fox or *Pteropus* several varieties of rats, two peculiar species of deer and two small varieties of the ox tribe,

are native the dugong abounds on the shores. The birds comprise falcons, owls, various species of peacocks, pheasants, and partridges, penguins, herons woodpeckers, paroquets, Java sparrows, &c., with many varieties of visiting birds but web-footed birds are rare. Amongst reptiles, are turtles (both plentiful and cheap) tortoises, crocodiles, the black cobra and other varieties of serpents. The coast and rivers abound with fish—soles, molluscs, rays sharks, &c., with crabs and prawns and other crustaceans are abundant.

Land, Tenure, and Agriculture.—Not more than one-fifth of the island has hitherto been cultivated the expense of clearing the land and, till recently, the government regulations respecting territorial grants, presenting serious obstacles to agriculture. Since 1840, however the government land has been let, under a new regulation at the rate of five rupees (10s) per acre yearly, in perpetuity.

The lands under cultivation are stated to be—gambier bushes 24,220 ac. pepper-vines 2614 ac., coconut trees, 2648 ac. pine-apple, 1460 ac. nutmeg and mace, 1190 ac. rusk 1038 ac., cloves ginger &c. 1780 ac. making a total of 54,900 ac. Of the coco-nuts 1 080 000 are produced annually and of the pine-apples about 9 000 000. The field-labour is performed mostly by Chinese, but also by Javaneses, Boyans and Malays.

The government of the colony is vested in a governor (who holds that office also in Malacca and Penang) assisted by three resident councillors, a police-magistrate, &c. The high court of justice has civil, criminal, and admiralty jurisdiction, and is presided over by a recorder appointed by the British crown or, in his absence (for he generally resides at Penang), by the governor and councillors. The military force of Singapore consists of three companies of Madras native infantry, and a small corps of artillery—in all about 700 men.

THE TOWN OF SINGAPORE is situated on the S side of the island, on both banks of a creek or rivulet of same name, and stretches E for about 1½ m. to another small creek, called the Roshu river. By these rivulets it is separated into three distinct divisions—the W. inhabited by Chinese the central and best part, by the Europeans, and the E., by the Malays,

&c. The central part of the town is laid out in regular streets, lined with substantial brick houses and towards the shore is ample space for parks and carriage-drives. Here are the principal public offices, official residences, hotels, exchange and churches. The English church, erected in 1830 is a handsome building and the American chapel is also a neat little edifice. On a hill N of the town is the government-house and on the shore is the Singapore Institution, founded

SINGAPORE. View from Government Hill.—From sketch by W. G. F. P. M. P. M. P. M.

by Sir Stamford Raffles, in 1823, for the cultivation of the Chinese and Malay languages, &c. but now ill supported and falling into decay. The W. division comprises the warehouses of the English merchants, as well as the dwellings and shops of the Chinese, who have also here a splendid pagoda of grotesque exterior. The E. part of the town (designated the *Kewong-gian*) comprises the slopes of the Klings and Malaya, and is remarkable for its filth and squalor. Many of the dwellings there are raised on posts. Bridges, chiefly of wood,

make any permanent settlement, though the Malays were driven N to Malacca, where they founded a new kingdom. After this event, the town seems to have fallen into decay, and the country to have been abandoned, for when the British (after having restored Malacca to the Dutch at the conclusion of the last continental war) wished to form a settlement in this neighbourhood, in order to preserve their trade with the Indian Archipelago, they found, on their arrival at Singapore, which then belonged to the kingdom of Johore, in Malacca, that the whole island had only 150 inhabitants. It was by the sagacity of Sir Stamford Raffles that the happy choice was made of Singapore for the site of the present flourishing commercial emporium. From the then resident officer or chief, called the *Rampong*, the British, in 1819, obtained permission to build a factory on the S. shore of the island, and by treaty in 1824 purchased for 60,000 Spanish dollars (£12,000), and a life annuity to the Sultan of Johore, and his resident officer, of 24,000 dollars (£2400) the sovereignty and fee-simple of the island, as well as of all the seas, straits, and islands to the extent of 10 geos. m. around. On the cession of Benocool to the Dutch, in exchange for Malacca, in 1826, Singapore was placed under the provincial government of the Straits settlement, which is fixed at Penang, where the governor usually resides.

The population in 1823 amounted to about 10,000 persons. In 1836 it had increased to 80,000 and, in 1850, the island of Singapore and its dependencies contained a population of 62,891, besides 1,548 convicts from India, and 670 troops. Pop. in (1860), 25,918. The census of 1860 showed the total population of the island to be 81,734 of which number about 60,000 belong to the town. Among these the Europeans and their descendants counted 2386, 1008 males and 882 females; Malays 11,688, Chinese 50,048 (46,786 males, and 3248 females); Indians 3,773; other Asiatics 4445. In the whole island there were 70,122 males, and only 11,610 females.

(*Four Ind. Archip. Belcher, Voy. Samarang Singapore Free Press Davidson's Trade and Travel in the Far East, &c.*) SINGBOOM, a tn Hindoostan, prov Orissa, 180 m W Calcutta lat. 21° 31' N lon. 85° 40' E.

SINGEN a market in Baden, Lake circle, 7 m W N W Radolfzell near l. bank Aach. It has a church manufacture of tobacco, and a bleachfield. Pop. 1174.

SINGHAI, a tn Hindoostan, prov Bahur, 17 m W Paim, lat. 25° 19' N lon. 85° 15' E.

SINGILLILW a tn Russia, gov and 27 m S S E Simburk, on the Volga, at the confluence of the Bugileika It has a stone-church, and a haven on the Volga, at which a considerable trade in corn is carried on. Pop. 2482.

SINGKEL, a tn Sumatra, W coast, mouth of the Singkel 8 m N W Cape Singkel lat. 2° 15' N. It has a good harbour, some boat-building and a trade in betanum, camphor, pepper, gold, trepang, wax, rhino, &c. Near it are pearl-banks.

SINGLA FOM, par Eng Bazar, 5010 ac. Pop. 608.

SINGLETON a tn New S. Wales, co. Northernland r bank Hunter 120 m from Sydney.

SINGO-SANUR, a vil Java, prov Pascoeroun dist Malang with remains of one of the finest heathen temples in Java.

SINGAGLIA (*anc. Sona Gallio*) a tn Italy, deleg. Urbino-Pesaro, at the mouth of the Meta 17 m W N W Ancona. It is surrounded with ramparts and bastions and defended by its citadel, and is in general well and regularly built. The principal edifices are the cathedral, the churches of St. Martin and Santa Croce, and the church attached to the Franciscan convent beyond the walls, the mint, theatre, several monasteries and convents, and a Jewish synagogue. Its port is small, and admits only small vessels, but from its advantageous position, enables the inhabitants to carry on a considerable trade. Its fair one of the largest in Italy has existed annually for about 600 years; it lasts 20 days, from July 20 to August 8, and is attended by dealers from all parts of Italy from beyond the Alps, and from the Levant. The celebrated singer Madame Caraceni was born here. Singaglia was the scene of an infamous and perfidious massacre, which Count Sforza, son of Pope Alexander VI., perpetrated on his allies in 1502. Pop. 8000.

SINGOUKHA a sluggish muddy river Russia rises in gov Kiev; flows S S E, and joins l. bank Derg at Orlov; total course, about 150 m. Before the peace of 1791, this river formed the boundary between Russia and Turkey.

SINIBCOLA a maritime vil and com., isl Sardinia, div Sassari, prov and 30 m. N E Nuoro. It has a handsome church and a trade in corn, fruit, honey and cheese. It has an unhealthy site, but the number of Genoese and Neapolitan fishermen, which wait the bay on which it stands, for trade, have made it wealthy and thriving. Pop. 2400.

SINJAR, or SINGALI a small decayed tn Asiatic Turkey, pach. and 70 m W Mosul l. bank Al Kmal, on a small hill at the base of the Sirjir Mountains, and edge of the desert of Surar. It occupied a much greater space in former times than it does at present, as appears from the extensive ruins in the plain below. It consists now of not more than 80 houses. — The SIZAR MOUNTAINS extend about 60 m. N W from the town and have a breadth of 7 m. to 9 m. In some parts they are covered with oak, and in others with the fig-tree and the vine. — The Taurus extends between the Euphrates and the Tigris, from Karkas to Mosul and is traversed by the Hamran Hills.

SIN, or SINI (*anc. Sini*) a tn Asiatic Turkey, pach. and 90 m. S S E Mosul, in a well-cultivated valley r bank Tigris, opposite to the confluence of the Little Zab. It is a flourishing place, indebted for its prosperity to an active trade with Mosul, Bagdad, and Ispahan. Pop. about 8000.

SINMA, Sauria, or Sarmanat a tn Persia, prov Irak Ajem dist. Arbilan, 285 m W S W Tehran. A castellated palace on a height with some good looking buildings round its base give to this town a somewhat imposing appearance. It contains about 4000 or 5000 families of which 300 families are Jews and 50 houses of the Chaldean Catholic rite, dependent on the Patriarch of Diarbekir.

SINNAI a tn Sardinia, div and 10 m. N E Cagliari in a fertile district with a trade in corn, wine, cattle, and dairy produce. Pop. 2628.

SINNAMARI, a river S. America, French Guiana, which descends from a mountain-chain traversing the centre of the interior flows N and falls into the Atlantic at a town of same name after a course of about 130 m.

SINNINGION par Fug York (N. S. W. 1813) 3890 ac. Pop. 879.

SINNO a river Naples rises in prov Basilicata flows N N E, and falls into the W shore of the Gulf of Taranto, after a course of about 65 m.

SINOPE (Turkish, *Sinop*) a seaport, Asiatic Turkey, pach. Anadolu on the Black Sea, 350 m N E V. Constantia, lat. 42° 12' N lon. 35° 13' 30" E. It is beautifully situated on an isthmus which connects the high rocky penin-

sula, called Cape Sinope with the mainland. It is defended by a wall, strengthened by several towers, while the harbor or roadstead which is on the S side of the isthmus is surrounded by several batteries, and the castle, a massive building, erected in the time of the Greek emperors. The town to a considerable extent is built of the ruins of an old Greek city and in many of the walls Greek and Paphlagonian bones, statues, and inscriptions are to be seen. It is a naval arsenal, and has a building-yard. The oak of the neighbourhood being well suited for ship-building many of the Turkish war-vessels are built here. Commerce there is almost none but it is a coast-

Superior for the steamers between Constantinople and Trebizond. Its chief importance arises from the facility with which it might be strongly fortified, and from the secure anchorage

the two are the ruins of a castle, called Tourbillon built in 1594, and long the residence of the bishop; on the other height is a castle, called Valerla, which, with its lofty walls and towers, has a very imposing appearance. Below these castles, but still higher than the town, is a third, called Majors, which was made uninhabitable by a fire in 1788. It has been repeatedly suffered much from war fire, and inundation. Pop. (1850), 3016

SINOPOLI.—From a Sketch by Dr. G. F. Moore.

presented by the bay and harbour the best indeed on the S. shore of the Black Sea. On November 30, 1853, a Turkish fleet of six frigates, three corvettes and two steamers, lying at anchor in the bay was suddenly attacked by 18 Russian ships, three deckers, two dockers, corvettes, and steamers which had approached unperceived by favour of a fog. After several hours obstinate fighting the whole of the Turkish flotilla, with exception of one steamer which escaped, was destroyed, and along with it about 4000 men. The batteries and forts on shore were silenced by the Russian guns. Sinope was the birth place of Diogenes, and the capital of Mithridates by whom it was embellished and who formed a line here on either side of the isthmus. Pop. about 4000

SINOPOLI (SINOPOLIS and SINOPOLIS) two adjoining places Naples, prov. Calabria-Ultra II about 8 m. S.S.E. Pulo. The former has pop. 590 the latter contains a collegiate church and has near it a spring of nitre. Pop. 1500

SINZ a vil and par. Switzerland can Grisons, on a hill in Lower Engadine valley. It is very well built and contains a combined town-hall and schoolhouse. Pop. 1425

SINSHIFIM a tn. Baden above Lower Rhine, on the Elsenz, 23 m. S.S.E. Mannheim with a church and a superior burgher-school; manufactures of woollen and linen cloth, tanneries, oil and saw mills. Pop. 2869

SINU or ZINU a river New Granada, rises in the central branch of the Andes, dep. Cauca about lat. 7° N. flows first N.E. then S.W. and after a course of about 100 m. falls into the Gulf of Morroquillo in the Caribbean Sea

SINZIG (anc. Sinzicum) a walled tn. Rhemus Prussia, gov. and 19 m. N.W. Coblenz, near 1 bank Rhine. It is poorly built, and has an old parish church and a synagogue. According to tradition it was near this place that Constantine, on his march from Britain to Rome, saw the appearance of a cross in the sky and was in consequence led first to embrace and then to establish Christianity. Pop. 1856

SION (German, *Sion* and *Sion*) a tn. Switzerland, cap. can. Valais, pleasantly situated near 1 bank Rhone, in the widest part of its valley 56 m. E. Geneva. It is surrounded with walls and ancient towers; and consists of a principal street, planted on either side, while the torrent Rhone runs in a deep bed along its centre, and several minor streets which open into it. The houses in the principal street are good, the others very indifferent. The principal buildings are the cathedral, a Gothic structure; the church of the Jesuits, the townhouse, a fine specimen of pure Gothic, the arsenal, and the hospital. Close to the town rises a steep rock, divided into two parts by a deep ravine. On the higher of

excavations. It has several basins, and some handsome mosques, one of which is remarkable for its lofty minaret but the generality of the houses are mere hovels, and the streets are narrow and unpaved. Pipe-bowls of a superior kind are manufactured here, and sent in great numbers to Cairo. Sion is the resort of the caravans from Darfur which come through the Great Oasis. Pop. estimated at 30 000

SIOUX or Big Sioux a river U. States, rises in an elevated prairie near the centre of the Minnesota territory and not far from the sources of the Minnesota or St. Peter flows S.E. for about 200 m. and joins 1 bank Missouri! In the lower part of its course it forms part of the boundary between Minnesota and Iowa.

SIPHANTO (anc. Siphnos) an isl. Grecian Archipelago, one of the Cyclades lat. 37° N. lon. 24° 40' E. about 19 m. W. Paros greatest length N. to S., 10 m. breadth about 6 m. circuit, 40 m. It has a somewhat elevated but finely diversified surface a good climate, and a fertile soil, producing much corn fruit, particularly figs, olives, honey, wax, sesamum, and silk, in all of which a considerable trade is carried on. The principal town a decayed place, bears the same name. It has manufactures of cotton and straw-hats. Pop. 1856

SION.—From Germany, looking out to Sion.

phanto was once celebrated for its mines of gold and silver and is said to be still rich in lead

SIPOTUBA, an auriferous river, Brazil. It rises in the plains of Parana, prov. Mato-Grosso; lat. 18° 50' S.; between the town of Mato-Grosso and the Passaguary follows the E.

slope of the Sirra Taparapen throughout its whole length receiving the Taparapen, Juva, and Jarambalda. The Sipotaba, after the junction of these streams becomes navigable, and proceeding S for about 200 m, in a course nearly parallel to that of the Sirra, joins the E bank of that river about 30 m above Yila-Mara.

SIR CHARI ED HARDY'S ISLANDS. See **HARDY**.
SIR-DARIA DAKARZEN, or **SIRON** a river, Central Asia which rises in Mustang Mountains, on the E. frontiers of Kokan, flows nearly due W past the capital of that name to Khojend, lat. 40° 30' N, where it turns suddenly N and flows first in that direction past Tashkend to Tunkat, then N N W to Otrar and finally W N W to its mouth in the N.E. shore of Lake Aral. Its direct course N W is about 750 m and its indirect at least 1000 m. In the beginning of its course it flows through a country covered with lofty wooded mountains, from which numerous torrents and small rivers descend into it but after reaching Khojend it begins to skirt the sandy desert of Kizil Kam on the left, and beyond Otrar where it divides into two arms, skirts the desert of Karam-Kam on the right. After reaching these deserts it is not augmented by any tributaries of the least consequence, and pursuing its course along flat banks covered with reeds and brushwood, divides into several branches which form islands. After the union of the streams which form its sources, it acquires considerable breadth, and might be used for transport, though it is only employed for irrigation. In July it reaches its greatest height by the melting of the snows and besides overflowing its banks extensively brings down immense quantities of debris, which have produced at its mouth several sandbanks and even islands. On the largest of these islands called Koz-Aral as well as on the oases on both sides of it, many of the nomadic Kirghiz have winter stations. The other arm into which the river divides beyond Otrar takes the name of Kizil Dera and appears also to have formed a regular channel and continued its course W N W to Lake Aral, but is now lost in the sand without reaching it.
SIR EVERARD HOMES ISLANDS, a cluster of islands off N.E. coast, Australia, extending about 4 m. from Cape Grenville lat. 11° 57' 40" S lon 143° 11' E.
SIR-KOR, a lake, Asia, Hindukush on the table-land of Pamir at the height of 16 600 ft above sea-level lat. 37° 27' N, lon 78° 49' E. It is in the form of a crescent, about 14 m. long E. to W. with an average breadth of 1 m., is surrounded on three sides by swelling hills, and on the S. by mountains which tower 3500 ft above it and belong to ranges which give rise to some of the principal rivers of Asia. This lake is the source of the Oxus or Amoo-Daria.
SIR JAMES SMITH'S ISLANDS, part of the Cum berland group, off N.E. coast, Australia. The principal island called Lums Peak is in lat. 20° 45' 30" S lon 140° 5' 10" E.
SIR JOSEPH BANKS' ISLANDS. See **BANKS**.

SIRANG Isl. Indian Archipelago. See **CERAM**.
SIRALUT, a vil. and com. Belgium, prov. Hai naut, 9 m. W Mons with manufactures of linen cloth, earthenware, glass and the pavement, an extensive salt refinery, brewery, luncheon, and two flour-mills. Pop. 2337.

SIREN, **CHIMERO**, or **GECHIK**, a vil. Hungary co. and near Odenburg, with a church and mineral-springs. Pop. 1168.

SIRINDA, a vil. to Hindostan prov. and 155 m. N N W Delhi, cap. dist. of same name. It was long a famous city but is now almost a shapeless mass of ruins, having never recovered from the dreadful ravages of the Fifth Baragalia Banda, who, about 1707, destroyed its mosques and levelled its palaces and public buildings with the ground. In its vicinity are numerous mango groves, and some tanks of excellent water. The extensive plains between Sirhind and Karnal have been the scene of many celebrated battles, both in ancient and modern times. The district in the N.W. of prov. Delhi, between the Satlej on the N and the head branches of the Jumna on the E., consists of extensive plains, generally fertile, well covered with mango-trees, and productive of wheat, barley, and other grains, though the crops occasionally suffer from a deficient supply of water.

SIRI POOL, a tn. on the N frontiers of Afghanistan, where the Mountains of Husah slope towards the Mountains of Koonduks lat. 36° 11' N, lon 65° 44' E. It belongs to an Uzbek chieftain, who masters 1000 horsemen, and maintains a precarious independence.

SIRNAGUR, a tn. in Cashmere. See **BANAGARA**.

SIRMORE, or **SERMOOR**, a municipality N Hindostan bounded N by Hussahar from which it is separated by the Jaber, W Hindoor and the Barah Fodrah S. prov. Delhi and E. Gurhwal and the Jumna. It is entirely covered by ramifications of the Himalaya, radiating from the peak of Char which is situated within the municipality, and has a height of 10 538 ft. It has long been governed by a race of Rajput princes, said to have come originally from Jalandhar.

SIRNACH, a vil. and par. Switzerland, cant. Thurgau, 17 m. S.W. Gossau. It contains a great number of well-built houses, and a church used in common by Protestants and Catholics, who are nearly equal in number. Pop. 3742.

SIRONK a vil. Hungary. Hither Thaum co. Haren about 9 m. from Balau with a church and an old castle. 1 1164.

SIRONKA a vil. Hungary. Hither Thaum co. Saron 6 m. from Berthor with a trade in wool and cattle. Pop. 1139.

SIRUKA KULA a vil. Austrian Croatia about 8 m. from Gospiak, with a church and the ruins of two old Turkish castles. Pop. 1991.

SIRULLA a tn. Spain, Estremadura prov. and 65 m. L. Badajoz. It has a townhouse, prison, public granary, palaces of the counts of Sirula, an endowed and two private schools, an hospital, a convent occupied by Franciscan nuns, and a church manufactures of linen by handloom and of soap, brick tile and pottery. Pop. 3240.

SIRWAN a ruined city, Iran, prov. Luristan 65 m. S.W. Kermanshah lat. 35° 30' N lon 48° 25' E. The ruins are composed of massive stone walls, a foundation of arches and a vaulted passage appears unusual above which the usual construction seems to have been a single arched passage divided into a number of apartments surrounding a quadrangular court. Some of the houses are in a state of perfect preservation, the flowers and rude patterns upon the cement-coating of the interior of the vaults appearing as fresh as if stamped but a few years ago.

SISAL, a seaport in Yucatan on the Gulf of Mexico, 100 m. N.E. Campeche with a fort lat. 21° 10' 6" N, lon 90° 2' 45" W (n). At its entrance is a large anchorage.
SISAL FL., a tn. in Spain. New Castle, prov. Cuenca 98 m. S.E. Madrid. It has two primary schools, a church several barnyards and a convent of Nazarene nuns. Pop. (agricultural), 3229.

SISARGA, a group of three barren uninhabited islands Atlantic, off N.W. coast, Spain about 24 m. W Coruña. The largest which is about 3 m. long is of a spherical figure.

RUINS AT SIRINDA — From a Sketch by Major Leard.

SISEBOLI a tn. Turkey in Europe. See **SUSEBOLI**.
SISLAND a par. England, co. Norfolk, area, 466 sq.

SISLAVICH, or **SISLAVICH**, a vil. Austrian Croatia, on the Kupe, 9 m. from Karlsbad, with a church and an castle. Pop. 1026.

SIBSA, a to. and com. duchy and 14 m. N. W. Parma, near 1 bank Taro. It has a primary school, and a trade in hemp and cattle. Pop. 4855.

SIBSALH, a vil. and par. Switzerland com. and 18 m. S. E. Basel; with a handsome church, a fine chateau with gardens, the ruins of an old castle, a school manufacture of silk ribbons and a trade in corn, wine, and fruit. Pop. 1284.

SISLERON [*anc. Ostro*] a to. France dep. Hautes-Alpes, at the confluence of the Isère with the Durance, here crossed by a handsome bridge, 17 m. N. N. W. Digne. It is picturesque situated at the foot of a rock crowned by a citadel, is surrounded by ancient walls flanked by dismantled towers, ruins of a fortress of the third class but is a poor dirty place. It has a considerable trade in wine. Pop. 3765.

SISFANS—1. Two small adjacent islands Indian Ocean Andaman group lat. 11° 10' N., lon. 92° 46' E. (x.)—2. Two islands Tungshan ying Bay, S. E. coast China prov. Quangtung; about lat. 23° 25' N. lon. 117° 47' E.—3. Two low woody isles. Philippines, off the W. coast, Luzon lat. 10° 30' N. lon. 119° 49' E. (x) with a conspicuous sandy beach, and distant about 2½ m. from each other.

SISTON par Eng Gloucester 1827 ac. Pop. 926.

SISTOVA or **SISTOVA** a to. Turkey in Europe, Bulgaria, 85 m. S. W. Rustchuk, on a high bank of the Danube, here capable of floating vessels of 600 tons. It is surrounded by a palisaded fence, and defended by a castle is poorly built, but has several mosques, a Greek church, and an active trade chiefly in leather and cotton. It was taken and dismantled by the Russians in 1810. Pop. 12 000.

SIT a river Russia, rises in gov. Perv flows to. into gov. Jaroslavl then N. and joins the bank Volga, after a course of about 80 m. It is famous for a signal victory gained upon its banks in 1237 by the Tartars over the Russians.

SITGES, a to. Spain, Catalonia, prov. and 18 m. S. W. Barcelona, on the Mediterranean lat. 41° 18' N. lon. 1° 54' E. It is divided into two groups of houses, called the Old and the New towns each surrounded with walls, the former with irregular and the latter with regular streets. It has a courthouse, a large semicircular clock-tower built by the Moors, an ancient feudal castle, on an eminence in the centre of the Old town, and now used as the prison. Several schools a college, and a male school an hospital placed on the very cliffs, with two churches, one of them on a rock which serves as a bastion, and overlooks the sea. The vineyards which cover the amphitheatrical hills behind the town produce the famed Malvey wine. Trade important Anchorage of port as good as any on the coast of Catalonia. Pop. 8503.

SITHNEY par Eng Cornwall 5998 ac. Pop. 2773.

SITIA, or **SITIA** [*anc. Othman*] a to. on a bay N. W. coast, on Crete, 60 m. E. by S. Candia. It is fortified, and has some trade, but its harbour and roads are very imperfectly sheltered from the N. and N. E. Pop. about 4000.

SITIZEN, a to. Naples, prov. Calabria-Literno 15 m. S. E. Palmi, nearly destroyed by the earthquake of 1783.

SITIA, or **SITIA** [*anc. Othman*] a to. on a bay N. W. coast, on Crete, 60 m. E. by S. Candia. It is fortified, and has some trade, but its harbour and roads are very imperfectly sheltered from the N. and N. E. Pop. about 4000.

SITIZEN, a to. Naples, prov. Calabria-Literno 15 m. S. E. Palmi, nearly destroyed by the earthquake of 1783.

SITIA, or **SITIA** [*anc. Othman*] a to. on a bay N. W. coast, on Crete, 60 m. E. by S. Candia. It is fortified, and has some trade, but its harbour and roads are very imperfectly sheltered from the N. and N. E. Pop. about 4000.

SITTEN, a to. Switzerland. See *St. Gallen*.

SITTINGBOURN, a market to. and par. England, co. Kent. The town 88 m. S. E. London, contains chiefly of one wide street, which stretches along the high road. It has a spacious church, and a place of worship for Wesleyans. Area of par. 1008 ac. Pop. 2897.

SITZENDORF a vil. Lower Austria, on the Schmelz, 8 m. S. E. Schrems with a church. Pop. about 1000.

SIVA, a river. Russia, rises in gov. Perm; flows S., and joins the bank Kama, 14 m. N. N. W. Digne. It is picturesque situated at the foot of a rock crowned by a citadel, is surrounded by ancient walls flanked by dismantled towers, ruins of a fortress of the third class but is a poor dirty place. It has a considerable trade in wine. Pop. 3765.

SIVACI GAZILAR-MOSES or **PURVIT** SIVA, Russia, on the Sea of Anzof on the N. E. side of the Crimea, commercial centre with the sea by a narrow entrance on the N., and separated from it by a long and narrow belt of land. It has a length about 110 m., with a breadth varying from 9 m. to 15 m. is indented by numerous small bays, and contains several small islands, with precipitous cliffs.

SIVANA, or **SARADUNA**, an isl. Hindoostan, presid. Madras dist. Coimbatore, formed by the Cavery 10 m. long and 9 m. broad. It was the site of the ancient Hindoo city of Ganga Para. The place is now enveloped in the thickest forests, and the interior an impenetrable jungle; but the principal street may still be traced, extending N. to S. about 1 m. There are here the ruins of many Hindoo temples great and small and much sculpture of various kinds. Near it the Cavery forms two magnificent cataracts.

SIVAN or **ROUM** a push Assin Parkey in the N. E. of Assin Minor bounded N. by the Black Sea E. push Trabzon and Erzerum S. E. the Euphrates, separating it from push Diarbekir, S. push Marsh and Karamania and W. the Kizil Irnak, separating it from Anadolia greatest length, E. to W. 810 m. central breadth, 175 m. The surface is in general finely diversified, being covered by several mountain-ranges of which the Anti Taurus to the E. and the Taurus Dagh to the N. W. are most conspicuous. The mountains are for the most part well wooded, and between them are extensive valleys and plains, often of great beauty and fertility. A small portion of the S. E. drained by the Euphrates, belongs to the basin of the Persian Gulf, but the whole of the remainder constituting by far the larger portion, belongs to the basin of the Black Sea, which receives its drainage chiefly by the Kizil Irnak, and more partially by the Yeil Irnak and other small streams. The soil is usually of great fertility and though only cultivated to a limited extent, raises in abundance, in addition to the ordinary cereals, maize, sugarcane, flax, hemp, tobacco, silk, wine, and excellent fruit. The pastures, extending not merely over the mountainous districts but over many of the valleys and plains, well adapted for arable husbandry are chiefly occupied by the flocks and herds of the Kurds and Turcomans. There are mines of iron, lead, and copper and quarries of marble, alabaster and slate. Salt also is abundant. The most important place of traffic in the interior is Tokat, and the best frequented port is Samsoun but the capital is Sivas. Pop. roughly estimated at 800 000.

SIVAS [*anc. Sigea*] a to. in Asiatic Turkey cap above push on an affluent of the Kizil Irnak, near the centre of a large and fertile plain, 410 m. S. E. Constantinople. It covers a space much of which is occupied by ruins consists of about 5000 Turkish and 1000 Armenian houses, partly tiled and partly flat-roofed, and arranged for the most part in very narrow, winding, and ill-paved streets is defended by two castles, each situated on a hill and has among its edifices numerous mosques, many of them with elegant porches and minarets, in the best style of Arabian or Persian architecture, and numerous and well-constructed commodious khans, bathes, &c. Its manufactures are unimportant, but its central situation on the best road from Bagdad through Diarbekir and Malatya and its easy access to the Black Sea, enables it to command a considerable trade. Its vicinity is celebrated for a great victory gained by Lucullus over Mithridates, and a series of battles between Bajazet and Tamerlane towards the end of the 14th century, when Bajazet was taken prisoner and the town laid in ruins. Pop. about 57,000.

SIVEREM, or **BOUMER**, a to. Asiatic Turkey, push and 55 m. W. S. W. Diarbekir. It consists of about 5000 houses, and has three mosques and three public baths.

SIVRY a vil. and com. Belgium, prov. Hainaut, 24 m. S. E. Mons, with two churches, a chapel-house, three

primary schools manufacture of woollen stuffs, charcoal, glass, bricks, &c., and an active export trade in butter, cheese and timber. Pop. 8078

SIWAH, or **AMMON** or **THEAS**, Egypt, 830 m. W S W Cairo lat. 26° N lon. 28° E. 6 m long by 5 m broad. It consists of an E and a W district; the former abounding in date-trees, yielding fruit of very superior quality. The inhabitants are insupportable, but suspicious and savage. The principal town Siwah is divided into an upper and lower district. It is defended by a Citadel, and surrounded by strong walls. Maroon people alone are allowed to inhabit the upper town, and there no strangers are admitted. Bachelors are compelled to live in the lower town. The principal commerce and source of revenue is derived from dates. The people have few manufactures beyond those things required for their own use which their skill however in making wicker-baskets is remarkable. About 8 m. W the town of Siwah are the ruins of the temple of Jupiter Ammon now called *Om Daydan* [another village], near which is supposed to be the fountain of the Sun. The ruins are not very extensive. Many of the sculptures, including figures of Ammon with the attributes of the ram headed god, and of other divinities, still remain.

SIX ISLANDS, Chagos Archipelago. See **KOMOR**

SIX MICA-BANDER, a tn. Ireland co. Clara, 8 m N W by W Limerick with a church, two R. Catholic chapels a national school, and a dispensary. It is altogether in a most miserable and ruinous condition. Pop. 762

SIXHILLS, par Eng Lincoln, 1692 ac. Pop. 175

SIXT a vil and civil James Gap, Haute Savoie, prov. Tanngney 8 m E.S.E. Barmoset, on a steep rock in the valley of Muz. It has iron-works, supplied from mines in the vicinity. Pop. 1659

SIZEWALL [anc. *Simpolis*] a tn. Turkey in Europe on a low promontory Gulf of Burgas in the Black Sea, 120 m. N W Constantinople. It is well built and has a commodious and well-sheltered harbour at which a considerable trade is carried on in wine and timber. The inhabitants are mostly Greeks. Near it are the ruins of the ancient Apollonia **SKEAGEN** [Lat. *Skeagen*] a vil Denmark, prov. S. Jutland, bail. Hjørring on the remarkable tongue of land which forms the N extremity of the province, and terminates in Cape Skaw or Skagen. It consists of three miserable groups of houses, the inhabitants of which are obliged to carry on an incessant and too often unsuccessful war with the sands, which threaten to engulf them. The church is already buried but its tower remains, and is an important land-mark for mariners. A little to the N is an important lighthouse, 87 ft. high, built of stone, in 1854, by Frederick II. The inhabitants are industrious, and export a good deal of fish. Pop. 1400

SKAGHOLM-HACK, or **SKAGHOLM** a broad arm of the North Sea, or German Ocean, which penetrates between Norway on the N., and the peninsula of Jutland on the S., eastwards to the coast of Sweden, and then communicates with the Kattegat, of which it is sometimes considered as the N. portion length, V. S. W. to E. E. about 160 m., breadth about 80 m. area, about 11,300 sq. m. in N. of the Danish coast the depth varies from 60 to 400 near the centre from 80 to 100 and off the Norwegian coast in some places exceeds 200 fathoms. The stream which not interrupted in its course by violent storms, sets in E. along the coast of Jutland and W. along that of Norway. On the former coast there is neither haven nor secure anchorage, but along the coasts both of Sweden and Norway in the numerous indentations which present, good natural harbours abound

SKALHOLT, a vil Iceland, once its cap. 42 m P by N Reiknisk, on the Hvit-sue with a finely situated cathedral **SKALITZ**, or **SKALITZ**, a royal free tn. Hungary co. Neutra, 1 bank March near the confines of Moravia, 47 m N Pressburg, on a lofty height, surrounded by walls, and nearly in the form of a square. It has a Protestant and four R. Catholic churches, a school, an elegant townhouse, a gymnasium attached to a Franciscan monastery and considerable manufactures of cloth. The district is famous for its fruit and produces good wine. Pop. 8700

SKALMITEZ, a tn. Russian Poland, 26 m N E Cracow, on the Skalmierska, with manufactures of coarse woollens. Pop. 1009

SKANDERBORG, a tn. Denmark prov. N Jutland, cap. hall, on a tongue of land between the Skanderborg-Ses

and the Lette Helsing-Ses, 14 m S W Aarhus. The small church situated on a height was once the chapel of the old castle of Skanderborg. On a height in the vicinity is a statue of Frederick VI. by Thorvaldsen. Pop. 1000

SKANEATELES, or **SKANEATELES**, a vil and township, l. States, New York. The village, pleasantly situated at the outlet of lake of same name, 137 m W Albany, contains four churches, two carriage-factories, woollen factories, a tannery, an iron-foundry and a machine-shop. Pop. 4030

The LAKA, greatest length N W to S.E. 15 m; greatest breadth, scarcely 1 m. discharges itself at the N. extremity by a stream of same name into Lake Seneca.

SKAKA, a tn. Sweden, lku and 27 m S W Malmö. It is an ancient place, of considerable historical interest. It is the see of a bishop, and contains a cathedral, built of sandstone, and completed in 1150 originally crowned with numerous towers, of which only two now remain in a complete state, but still adorned externally with fine facades, and internally with lofty pillars a gymnasium with a library of 10,000 vols. particularly rich in theology, several other collections, and an observatory. Near it are a mineral-spring, and Brockförs, a celebrated veterinary institute with valuable anatomical preparations a library botanical garden, &c. Pop. 1491

SKAHABORG a tn. Sweden See **MARIBERG**

SKARO a tn. on a remarkable promontory of same name projecting from the precipices which form the W side of the island of Santorin, in the Grecian Archipelago. It was till recently the seat of government, and in the middle ages was occupied by the 1 acedonians, who built its castle, of which only some remains now exist. The houses, mostly ruined by the effects of volcanic agency form an extraordinary group around a red and black crag, 1000 ft. above the gulf, perched one over another in a crevice in the sides of the precipice, and in the most frightful positions the outer wall of the buildings forming a continuation of lofty perpendicular rocks.

SKEN or **SKEN** a tn. Norway prov. Agderhus cap. bell Bredberg on a river of same name which issues from the Lake of Nord and a little below, falls into a bay of the *Kjager* Beck, 66 m S W Christiansia. It is an ancient place, and has a church, several saw-mills, and a considerable export of timber, deals, pitch tar iron and millstones. 1 op 1800 **SKEFFINGTON** par Eng Lincoln, 2128 ac. SKWIRA a tn. Russia, gov. and 60 m S.W. Kazan inhabited chiefly by Jews. Pop. 1135.

SKYE [anc. Scaudunian, clon] the largest of the Hebrides or Western Isles of Scotland, situated on the W. of co. Inverness, of which it forms a dependency, and from which at the narrowest points in the S.E., it is separated by Kyle Rhea and the Sound of Sleat greatest length, N.W. to S.E., about 45 m. extreme breadth, 24 m. mean breadth 15 m., area, about 565 sq. m. It is very irregular in shape and so deeply penetrated by bays and creeks, that it is difficult to find a spot in it 5 m. distant from the sea. The coast is rocky and elevated, and generally lined with bold and picturesque cliffs, some of them of very great height; in many localities but more especially on the N.E., composed of columnar rock presenting masses of banded pillars, not surpassed by Staffa or Glun's Causeway. The interior is not

regarded as one great mountainous moorland the only exceptions are two tolerably level tracts one called the Plain of Kilmuir, and another of more limited extent near Loch Breacdale. The principal districts into which the island is divided, are Sliat in the S., Mingish in the centre, and three large peninsulas in the N. and N.W. called respectively Trotternish, Waterish, and Kilmuir. The mountains form three distinct groups, separated by intervening tracts of high and undulating land. That of Sliat has an average height of about 1800 ft. and extends along the coast in a continuous ridge, till it suddenly subsides on the N. into a comparatively low tract. It is the best wooded part of the island—the ash as well as the birch and alder flourishing on both its declivities, wherever any water-course, ravine, or small valley affords them shelter. Immediately beyond the flat tract into which the hills of Sliat subside, a more elevated ridge, consisting of five united mountains suddenly rises, and attains the height of 2000 ft. These mountains on the W. side subside gently but on the E. descend rapidly towards the sea, and become

height, and of dreary appearance, presenting no objects of interest except two conspicuous blunt-topped heights called Macdonald's Tables, and covered with brown heath, except in the vicinity of Loch Brittle and Eynort, where the eye is relieved by green pastures and the low tract of Breacdale, which is generally under cultivation. The district of Trotternish, in the N.E. is less monotonous and rises towards its centre into a mountain-ridge, the culminating point of which, called the Storr, about 2000 ft. in height, has a very picturesque appearance. Its summit descending thence vertically for at least 400 ft., while the steep declivity below is covered with huge masses of detached rocks. The whole of the island situated N. of the narrow isthmus lying between Loch Brittle and Sligachan, on the opposite sides of the coast, and constituting at least two-thirds of the entire surface, is composed of trap rocks in immense beds or tabular masses overlying or inclosing portions of secondary sandstone. At various places, and generally in trap, coal is found, but in such small quantities, and so much disturbed, as to be of no economical value. The only mineral of Skye which is profitably worked is the crystalline limestone of the Strath which furnishes good blocks of marble both pure white and variegated. In this limestone are numerous caves one of which, on the N. side of Loch Slapin, called the Spar Cave, is celebrated for its beautiful stalactites. In others of them the Presbyter found temporary refuge after the battle of Culloden. The worst feature in the climate of Skye is its humidity and variability. On several of the loftier heights the snow remains in masses till the season is advanced, and when the melting takes place, it is most frequently accompanied with deluges of rain. Mists also, are so frequent, that extensive views from the most commanding heights are seldom to be obtained. The chief spots under culture are Breacdale, parts of Trotternish and Sliat, and patches of moor or less extent at Broadford, Bransart, Iornro, &c. The land is not skilfully managed, and the crops are very scanty. The far greater part of the surface consisting of moorland, interspersed with tracts of green herbage is devoted to the rearing of cattle and sheep. The breeds of both have been much improved, the latter

are chiefly Cheviots. In addition to agriculture and pasture, the fisheries give employment and furnish subsistence to a large number of the population. The manufacture of kelp, once a most important resource, has been all but extinguished. For the disposal of produce the only markets of any consequence are held at Portree which has the advantage of an excellent harbour and has regular steam communication with Glasgow. The people are remarkably peaceable and moral but extremely indolent, and not cleanly in their habits. Most of them are in indifferent circumstances hence many have recently emigrated. Skye forms a separate presbytery composed of six parishes. Pop. 21,591.

SKYUO [see Skye] an Isl. Grecian Archipelago, lat. 38° 45' N., lon. 24° 40' E., about 25 m. E. in Nagropont, greatest length, N.N.W. to S.S.E. about 18 m. breadth, 7 m. It is very much indented, particularly on the W. side, where a bay, with an island in front of it, forms a large natural harbour. The surface is very rugged and has numerous steep precipices, forming the sides of valleys, in which corn and wine are grown in considerable abundance, and great numbers of cattle, particularly sheep and goats are reared. Many of the higher grounds are densely wooded. The chief place, which bears the same name, stands on the W. bay already mentioned, at the foot of a conical hill. The greater part of its consists of a Greek monastery. The inhabitants are deficient in industry and seem to be generally in wretched circumstances. Pop. about 2000.

SLA, a town Morocco. See SALER.

SLAGELSE [Latin, Slagoele] a town Denmark, in Zealand 40 m. W.S.W. Copenhagen with two churches, a grammar-school, and poorhouse, and an active trade. It had once a celebrated cloister which was for some time used as a royal palace. Pop. 8500.

PARALLEL CLIFFS ON THE N.E. COAST OF SKYE.—From Col. Murray's Sketch.

conspicuous among the hills of Skye, both from their actual elevation, and the comparative lowness of their base. Both of these ridges belong to the district of Sliat, and are composed chiefly of red sandstone, argillaceous schist, quartz, and gneiss. Beyond the latter ridge, a lower irregular tract, forming a kind of valley parallel to it, occurs, and is succeeded, first by a low ridge, and then by another parallel valley called the Strath, which stretches across the island to the opposite coast, and is not much raised above them. These valleys are almost entirely composed of limestone and shale, occasionally interrupted by masses of granite. To the N. the Strath is succeeded by the loftiest part of the island, consisting of a confused assemblage of mountains, forming two distinct groups, the one called the Red and the other the Cuolullin Hills, varying in height from 2000 ft. to 3000 ft. composed almost entirely of granite. The Red Hills are for the most part tame, rounded, and covered with streaks of red rubbish to which they owe their name. The Cuolullin Hills strikingly contrast with them in the darkness of their colouring and their rugged and serrated outline, and the wildness and grandeur of their whole aspect. They partly form a circular chain round Loch Coruisk, enclosing it by an insurmountable barrier, and indenting the sky by their pinnacles and projecting crags, but the loftier portions of them rise with a rapid and rocky ascent from the W. shore, opposite to Loch Brittle and the head of Sea, and form a curved ridge of six summits obscurely divided and terminating on the E. in a precipitous face, deeply furrowed by torrents. Still farther E. a long, acute ridge, called Blaven, overtops the whole, and contains the culminating point of the island. To the N. of this mountain-group the surface descends rapidly particularly on the W. into an undulating tract, from 800 ft. to 1000 ft. in

SLAIDBURN, a vil and par Englad co. York (W Riding) on the Humber 8 m. N by W Githers with an ancient parish church, Presbyterian, Methodist, and Quaker chapels, a grammar-school, and three large cattle-fairs. Pop. (1911) 768. Area of par 40,331 ac. Pop. 3017.

SLAINS and **Forvie**, par Scot. Aberdeen 5 m. by 5 m. Pop. 1322.

SLAITHWAITE, a vil and chapelry Englad co. York (W Riding) in the valley of the Colne 5 m. W S.W. Huddersfield. It has a plain but spacious chapel with a tower, a free and national school, manufactures of woollen and silk goods, cotton and silk mills, and freestone-quarries. Near it are chalybeate-springs, which closely resemble those of Harrogate, and in connection with which baths and lodging-houses have been erected and gardens and pleasure grounds tastefully laid out. Pop. 2862.

SLAITY par Eng. Northumberland 7430 ac. Pop. 881.

SLAMANN par Scot. Shiring 5 m. by 3 m. P. 1555.

SLANE, a tn. and par Ireland co. Meath, 63 m. W S.W. Droghda, 1 bank Byrne, within 4 m. of the spot where the battle of that name was fought. It has a Protestant church and a R. Catholic chapel, a session house and police-barrack, three schools and a dispensary but no manufactures, and little trade. Area of par 5947 ac. Pop. 2050.

SLANE par Ireland, Down 946 ac. Pop. 461.

SLANEY RIVER, rises in the Wicklow Mountains flows S.E. through co. Wicklow Carlow and Wexford passing the towns of Ballinglass Rathilly Newton-Berry, and Kinsworthy, and after a course of about 50 m. falls into Wexford haven, a little above the town of Wexford. It is navigable by barges to Kinsworthy a distance of about 14 m.

SLANKAMENY (Havr and Brany) two nearly contiguous vil. Austrian dominions Slavonia opposite to the confluence of the Theiss with the Danube, about 6 m. from Batska. Bary Blakmentz, the larger and more important of the two was once fortified. They contain a R. Catholic and two Greek churches. Pop. about 1300.

SLATION three par. Eng. —1 Bachel, 840 ac. P. 256 —2 Devon 2430 ac. P. 705.—3, Northampton 950 ac. P. 317.

SLATIN a vil Bohemia, near Kinsworthy near Semtberg, with a church a new and a flour mill. Pop. 1185.

SLAUGHAM par Eng. Sussex 5963 ac. Pop. 1481.

SLAUGHFLEET two par. Eng. Gloucester —1, (Lower) 1340 ac. Pop. 236.—2 (Upper) 1390 ac. Pop. 218.

SLAUGHFORD par Eng. Wilt, 540 ac. P. 126.

SLAUNICE (Ossa and Urtze) a vil Bohemia circle Chudum 6 m. from Lautenthal with two churches. P. 2335.

SLAVE COAST W Africa, extending between the Volta and Akings, a distance of about 240 m. It is unbroken by any marked mountains. The principal towns on the coast are Badagry and Whydah. The king of Dahomey's dominions extend over a great part of the inland territory.

SLAVE LAKE (Havary) a large lake, British N. America. Hudson's Bay Company's territory, centre, about lat. 62° N. lon. 112° W.; about 500 feet above sea-level. It is of extremely irregular form. Length, N. to S.W., upwards of 350 m. breadth, generally under and rarely exceeding, 50 m. Area, estimated at 19,000 sq m. Its N. shores are precipitous and rugged, and it contains many rocky and wooded islands. Its largest tributary is Slave River which falls into it from the S. It empties itself by the Mackenzie River, which flows from the S.W. extremely close to the stream by which Lake Athabasca empties itself into the Great Slave Lake. It receives the Peace River on the left immediately after leaving Lake Athabasca, E. of Fort Resolution. The banks are in many parts well wooded, but numerous rapids and falls occur in its upper course.

SLAVONIA a territory, Austria. See **SCALVONIA**.

SLAWEN (SERK), a tn. Russia, gov. and 100 m. E. N. E. Ekaterinodar on an affluent of the Donets. It is a straggling place, and has an annual fair. Pop. (1881), 2396.

SLAWANSK, a tn. Russia, gov. and 90 m. S.E. Khar'kov. It has two churches and near it are four salt-lakes. Pop. (1882) 8205.

SLAWIRZYNA, a tn. Russian Poland, N. Kalisz, on a small affluent of the Prosna. It is walled, and has manufactures of linen and linen. Pop. 1600.

SLAWKOW, a tn. Russian Poland, N. W. Cieszyn; with mines of lead and cadmium. Pop. 1590.

SLAWSTON, par Eng. Leicester, 1510 ac. Pop. 281.

SLAFOARD (Havr) a market tn. and par Englad co. Lincoln. The town, 17 m. S. by E. Lincoln, is well paved, lighted with gas, and amply supplied with water has a hand some and spacious church of the 13th century, several dis seminating places of worship, a handsome townhall, a new free school another unfenced school and an hospital. Pop. 3729. Area of par 3180 ac. Pop. 3539.

SLAFOORD (Oss), par Eng. Lincoln, 1150 ac. P. 857.

SLAITY, par Scot. Inverness 25 m. by 5 m. Pop. 3531.

SLIBECH, par Wales, Pembrokeshire 4586 ac. Pop. 883.

SLIDMERE, par Eng. York (E. Riding) 6650 ac. Pop. 497.

SLIMNO, a tn. Prussia. See **GAUDRE**.

SLISWICK Denmark. See **BOLLENWIS**.

SLIDYNG, a vil and com. Belgium prov. H. Flandres, 7 m. N. by W. Ghent; with manufactures of linen and cotton fabrics, leather, candles, mustard vinegar and oil, two breweries, seven flour-mills, a dye-works and some trade in grain, cattle and manufactured goods. Pop. 5795.

SLIDRE a vil and par Norway prov. Agderhus, lat. and 97 m. N. W. Christiania, on a lake of same name, forming an expansion of the Belva. Pop. 8100.

SLIEDRECHT a vil Holland, prov. S. Holland, 5 m. E. by N. Dordrecht, on the Margravedike. It has a Reformed church three schools and some trade in fire-wood hoops, and balustrade and chairs. Some fishing is carried on in the river. Pop. 4540.

SLILVE, or **SLILVER** a mountain-range, Ireland stretching nearly 15 m. between King's and Queen's cos. It attains in Ardara a height of 1889 ft. and furnishes the chief sources both of the Nore and the Suir.

SLIGO a maritime co. N. W. coast, Ireland, prov. Con naught, bounded, N. by the Atlantic, E. co. Leitrim, S. Roscommon and Mayo, and W. Mayo. Greatest length E. and W., 41 m., breadth, 38 m. area, 721 sq m. or 481,758 ac. of which 290,890 ac. are arable. The coast-line, in some places very rugged, is deeply indented by Kilala and Sligo bays. A large portion of the county is rough mountainous and hilly, but it contains a considerable extent of very good land, though a good deal of the arable soil is very indifferent, being a light sandy loam. The summits of the mountains have a mean height of 1500 ft. above sea-level. The principal range is composed of the Ox Mountains, consisting chiefly of micaceous, with occasionally granite, hornblende gneiss and quartz-rock. A great portion of the county is occupied by the formations of the carboniferous limestone-group. Copper and lead mines were formerly wrought, but are not now carried on. The principal rivers are the Sligo, Arroy, Avonmore, Eskay, Moy, &c. There are also several lakes having an aggregate area of 20 sq m., and including the beautiful Lough Gill (which see). The number of acres under crop in 1851 was 94,791, chiefly occupied by oats and potatoes, with a small breadth of wheat, barley, beans, &c. The grazing-farmers in this county are generally men of more capital than the tillage-farmers, but the pasture-land is commonly poor. In 1851 the horse-cattle numbered 81,774; the sheep, 85,500 the pigs, 17,797—a considerable increase in cattle and pigs over 1841 when they numbered respectively 45,889 and 19,365, but a decrease of sheep from 82,708. The fishery district of Sligo comprises 109 m. of maritime boundary, and had in 1850 575 registered vessels, employing 3263 men and boys. The county is divided into six baronies and 41 parishes. It returns three members to Parliament, two for the county and one for the borough of Sligo. Principal towns—Sligo (the capital) Drogheda, and Teberurry. Pop. (1851), 128,510.

SLIGO, a seaport tn. and pari bor., N. W. coast, Ireland, esp. above co., 181 m. N. W. Dublin lat. 54° 18' N.; lon. 8° 28' W. (a.), near the mouth of the Garraun in Sligo Bay. The streets in the older parts of the town are narrow, dirty and ill-paved. It contains, however, convenient markets and large stores and considerable improvements have been made on the streets. It is lighted with gas, and well supplied with water. The public buildings are the county courthouse, prison, infirmary, fever hospital, union workhouse, new assembly hall, and a lunatic asylum and it has two Protestant churches, a Presbyterian and Independent; two Metho-

the meeting-houses a R Catholic chapel, and one friary or abbey church. The manufactures are linen, flour, soap, candles, ropes, whiskey, and beer. The harbour admits vessels of 13 ft draught of water to moor at the quays, which have recently been considerably extended and improved. That called the bullock quay is 248 ft long. Vessels of large draught have to anchor in the pool, which is safe and secure, but inconvenient for discharging or taking in cargoes. The num-

ber and tonnage of vessels registered as belonging to the port in 1850 was 35, ton 4789, in 1865, 30 vessels of 4391 tons. In 1850 there entered the port 389 vessels, ton 48169 and departed 159 vessels, ton 53757. In 1864 4 vessels of 1097 tons entered and 88 vessels of 10,994 tons cleared from and to foreign countries. The exports consist chiefly of provisions from sheep, linen-yarns, &c. and the imports colonial produce, timber, wool, iron and salt. It sends a member to Parliament. Pop. 11,209.—The bay about 6 m across at its opening penetrates the land by various arms at the head of the two chief ones are Sligo and Bellefleur, both about 12 m. from the mouth of the bay. It has 8 to 20 fathoms water and a sandy shore.

SLIPTON, par Eng. Northampton 720 ac. Pop. 105
SLIODORSK, or **SLIODORSKO**, in Russia, gov. and 18 m. N. E. Viatka, r. bank Viatka. It contains nine churches and a convent, and has manufactures of soap and leather, an important trade in corn, linseed, wood, and tallow with Archangel, and five annual fairs. Pop. (1850), 6032

SLIOCHTEREN, a vil. Holland, prov. and 10 m. E. Groningen, with a church, school, some breweries, and corn mills, but inhabited chiefly engaged in agriculture, cattle-rearing, and turf-cutting. Pop. 1265

SLIOE (Hwy), that part of the W. Scheldt river which separates the island of S. Beveland from that of Walcheren.

SLIOLEY, par Eng. Norfolk 719 ac. Pop. 294

SLONIM, a tn. Russia, gov. and 67 m. S. E. Grodno. R. Catholic churches are old castle, and extensive manufactures of woollen and linen cloth. Pop. (1850) 6693

SLOTEN, or **SLIOTEN**—1 A tn. Holland, prov. Friesland, 22 m. S. by W. Leeuwarden, with a church. Inhabitants employed in agriculture and handicrafts. Pop. 886—2 A vil., prov. N. Holland 4 m. S. W. Amsterdam. Pop. 825

SLOUGH, a vil. England, co. Bucks, 20 m. W. London on the Great Western railway, which has an important station here and handsome hotel. Slough is memorable for the astronomical labours of Sir William Herschel, whose enormous telescope was constructed here. Pop. (1841) 1189

SLUIS, a tn. Holland, prov. Zealand, on the frontier of Belgium, 12 m. S. W. Flushing. It was formerly fortified, but was dismantled in 1839, and the harbour, once well frequented, and the first in Flanders, is now nearly sanded up. It has several considerable market-places, in one of which, the Groote-markt, are the town-houses and the watch-house, and it also has two churches, a town-school, a library, and several benevolent and religious societies. Several mills, a soap-work, a brewery, some shipping trade and fishing. Pop. 1493

SLUTSCH two rivers, Russia.—1, Rises on the frontier of Poland in gov. Volhynia flows E. then circuitously N. across Volhynia, and near its N. frontier, joins r. bank Dniester amidst the moraines of Pinak. Total course, above 250 m.—2 Rises in gov. Minsk not far from Slutsk flows E. past that town and after a course of about 100 m., joins 1 bank Pripiet, 22 m. E. Pinak

SLUTYK, a tn. Russia gov. and 60 m. S. Minsk, on the Slutsk. It is a large and well built place, though almost all the private houses are of wood, and contains three castles a Lutheran a Reformed two R. Catholic, and two Greek churches, a lyceum or central school in which a very complete course of education is given and a gymnasium. Pop. (1842) 6859

SLYPT, a vil. and c.m. Belgium, prov. W. Flanders, 17 m. W. S. W. Brugge. It has three breweries an oil and two flour mills, and a trade in agricultural produce. Pop. 1178
SMALLHOI M. par Scot. Roxburgh; 4 m. by 8 m. P. 617
SMALL ISLES, par Scot. Inverness including isle. Rum, Eigg, Mull, and Ganna. Pop. 816

SMALLBURGH, par Eng. Norfolk, 1247 ac. Pop. 601
SMALLEY, a vil. and chapelry. England, co. and 7 m. N. E. Derby. The village is well built, and has recently been much improved. Besides the chapel, which is a modern structure with nave and transepts there are a Baptist chapel and an endowed school. The inhabitants are chiefly employed on the extensive collieries in the vicinity. Pop. 804

SMARDEN, par Eng. Kent 5380 ac. Pop. 1206

SMARTON two pars. Eng. York.—1 (Gravel) N. Riding 1192 ac. P. 974—2 (Rural) W. Riding 1770 ac. 1 372

SMETHWICK, par Eng. Kent 1811 ac. Pop. 406

SMETHWICK, par Eng. Salop 7705 ac. Pop. 109

SMETHWICK, a large vil. England, co. Stafford, 3 m. W. by N. Birmingham on the Birmingham Wolverhampton and Stour Valley railway. It has two principal streets straight and pretty well kept, two churches Independent, Wesleyan and Primitive Methodist chapels two national an infant, a Scotch Presbyterian, and several other schools and extensive iron and cotton and plate glass works. Pop. 3879

SMETSCHNA or **SMETSCHNA**, a vil. Bohemia circle Blatna, about 5 m. from Seibitz with a church castle, school and chalybeate springs. Pop. 1040

SMICHEW, or **SMICHOW**, a vil. Bohemia, circle Rakonitz, so near 1 regie as to be almost its suburb. It has a chateau, and several manufacturing establishments. Pop. 2500

SMIDAE or **SMIDAT** a market tn. Bohemia, circle Bidechow on the Zydina, 4 m. from Zbonitz; with two churches, a castle, manufactures of potash, a distillery the works, and a saw mill. Pop. 1160

SMILEW, a tn. Russia, gov. and 20 m. S. Khar'kov on the Southern Donetz. It has a considerable trade in silk cotton and woollen goods. Pop. (1843), 3905

SMIRZIG or **SMIRZIG**, a tn. Bohemia, circle and 10 m. from Königgrätz, on three little arms of the Elbe, which are here crossed by bridges. It has an elegant castle, town-house, and school, manufactures of leather and rosoglio, a brewery a saw and other mills. Pop. 1154

SMIRBY or **SMIRBY**, par Eng. Derby, 990 ac. P. 399
SMITH, an isl. Antarctic Ocean, being the most W. isl. of New South Shetlands lat 63° 2' S. lon 64° 47' W. It has a very wild and desolate aspect, and has a summit about 8400 ft. above the sea, and visible at the distance of 85 m.

SMITH'S FALLS, a tn. Canada West, on the Rideau canal, co. of Leeds, 22 m. from Rockville, with manufactures of coarse woollens, iron, and leather several grist and saw mills; three Protestant churches, a R. Catholic chapel, and a public and two private schools. Pop. 1000

SMITHVILLE, a vil. Canada West co. Lincoln, pleasantly situated on the Jordan or Twenty Mile Creek, about

35 m. S.S.W. Toronto, with Wesleyan and Episcopal Methodist churches a foundry a tannery a woolen factory, and a saw and a flour mill. Near it is a mine, said to be rich in argentiferous lead. Pop. about 450

SMOLÉN an isl. off N.W. coast, Norway. lat. 66° 30' N lon. 8° E. 3 m. W.S.W. Hittera. It is tolerably compact, length E.E. to W.S.W. 15 m. central breadth, 10 m.

SMOLÉNISK, a gov. Russia, bounded, N by Tver, E. Moscow and Kaluga, S. Orel and Casimirov and W. Mohilev, Viatka, and Pskov. lat. 53° 11' to 55° 32' N. lon. 31° 50' to 36° 40' E. greatest length, N to S, 235 m. central breadth 180 m. area, 16,800 sq. m. It consists generally of extensive plains, in part covered with extensive meadows, but is traversed in part by the water-shed which divides Europe into two great basins. Within the government, however that water-shed is formed only by a chain of low hills. The waters on its N.W. side are sent to the Baltic by the Volga and several affluents, those on the S.E. side, forming the far larger proportion are carried chiefly to the Black Sea, by the Danube, which has as its affluents, the Dniester and the Bug, which has its source in this government, and partly also in the Caucasia by the Volga, which has here some small tributaries. The climate is cold, but the air generally clear and healthy. The soil is fertile, and on the whole well cultivated, though the produce barely suffices to meet the home consumption. The principal crops are rye, hemp and flax also are extensively cultivated, and, in particular districts, tobacco and hops. The pastures are both extensive and rich, and rear great numbers of cattle the rivers are only scantily supplied with fish. One chief source of wealth in the government is its forests, which cover a large extent of surface, furnish excellent timber and fuel and abound with large and small game. Great attention is paid to the rearing of bees, and honey and wax are largely exported. The minerals include, in considerable quantities, copper, iron and salt. Many factories have not made much progress, but the trade is considerable and consists chiefly in timber, hemp, flax, wax, pitch, honey, wax, hides, and tobacco. The government is divided into 11 districts of which Smolensk is the capital other towns are Bielol, Lyask, and Roslavl. P. (1850) 1,194,000.

SMOLÉNISK, a town, Russia, cap. above gov. on both sides of the Dniester here crossed by a wooden bridge 233 m. W.S.W. Moscow. It has a picturesque site and occupies a large area. The part on the L. bank of the river is surrounded by a strong and lofty wall flanked by towers. The part on the R. bank is also fortified, but the wall is only of earth. The interior of the town contains a large extent of open ground, partly occupied as gardens, and presents in general a very poor appearance, most of the houses being of wood and a single story. The only exception is in the centre of the town where there is a large and handsome square. The principal buildings are two cathedrals, which date from the 12th century and one of which is regarded as among the most celebrated ecclesiastical edifices of the N. of Europe. 16 other churches, including a Lutheran and a R. Catholic, an episcopal palace, two monasteries, and a university, a diocesan seminary gymnasium, military and commercial schools, a founding hospital, and houses of correction. The manufactures consist of linen, leather, hats, and soap, and the trade is chiefly in corn and hemp. Smolensk is the seat of an archbishop, the residence of a governor, and the seat of several important courts and public offices. The date of its foundation is unknown but it had become a place of great importance in the 16th century. It has been twice severely ravaged by the plague, once in the 17th century, when it lost 43,000 inhabitants, and again in the 18th, when almost the whole population was destroyed. It again acquired importance, was surrounded by walls in 1599 and afterwards more regularly and strongly fortified by Peter the Great. It has often suffered much from war. Its last great disaster of this description was in 1812 when,

after the great battle which bears its name, it was taken by the French, and a great part of it burnt down; a disaster from which it has only partially recovered. Pop. (1859), 10,702

SMOLIANI, a town, Russia, gov. and 50 m. N.W. Mohilev. It has three Greek united churches a synagogue and several large annual fairs. Near it are the ruins of a castle and convent. In 1708 the Swedish general Kanitz, and the corps he commanded were made prisoners here.

SMORGODVÍ, a town, Russia, gov. and 47 m. E.S.E. Wilna. It is a handsome well built place, and is inhabited chiefly by Jews. It was here that Napoleon on his disastrous retreat, abandoned his army to return to France.

SMOTRITZA, a town, Russia, gov. Podolsk on a stream of same name, N. Kamenez. Pop. 1700

SMYRNA, an ancient city and important seaport, Asiatic Turkey, push. Anatolia, on a narrow flat at the head of the gulf of the same name lat. 38° 26' 30" N. lon. 27° 9' 45" E. (a). The appearance of the city from the sea is extremely attractive

live, and is much heightened by the picturesque scenery around it but a closer inspection dispels the illusion although the variety of costume and feature presented by Turks, Greeks, Armenians, Jews, and Franks thronging the narrow streets, is sufficiently entrancing and amusing. The houses, nearly all constructed of wood, are mean and fragile-looking, the streets close and filthy and filled with a hot, unwholesome, and oppressive atmosphere, poisoned during the summer months particularly by intolerable stenches proceeding from the sewers and drains which run through the streets and court-yards of the best houses, only a few inches under the pavement, which is frequently loose and full of excrement. To these evils have to be added the vermin infested by mosquitoes, fleas and other vermin says Macartney, 'larger and more pestiferous than any I had ever yet seen. The city is divided into four quarters—Frank, Turk, Jew, and Armenian. The bazars, which are also constructed of wood, are winding dark, and dirty but have a somewhat striking appearance from the variety and brilliancy of the colours of the silk, woollen and cotton goods exposed to sale. The air here, too, is generally impregnated with the mingled odours of otto of roses, musk, and tobacco-smoke. There is an English hospital and burying-ground. The other public buildings are the Viceroy's, the palace of the governor, a large barracks, a number of mosques, and several Greek, Armenian, R. Catholic, and Protestant places of worship.

Smyrna has been for centuries the most important place of trade in the Levant. This trade has been carried on as well by shipping as by the caravans of Asia Minor, Syria, Bagdad,

and Persia; and hence, as well as at Constantinople, and most of the Turkish towns, the Jews have managed to become the principal agents in the purchase and sale of commodities. The chief imports are cotton manufactures, woolen clothes, colonial goods, mostly coffee and sugar, iron steel lead, tin, hardware goods, &c. The principal exports are dried fruits, cotton, silk, goats hair, sheep and goats wool, rabbit and

THE GAZETTE AND PORT OF SMYRNA. — From London Telegraph, Oct. 1.

hare skins, valonia, madder-root, yellow berries, and opium. In 1852 the total exports amounted to £1 766 653, of which £282 980 were to Great Britain and £90,849 to Russia, and the imports to £1 357 539 of which £482 981 were from Britain, £112,959 from the U. States, £283 322 from America and the Zollverein, £289 930 from France and £70 223 from Russia. In 1850 1851, and 1853 the vessels that entered and cleared were as follows:—

| TOWN. | R. S. S. D. | | CLEARING | |
|-------|-------------|---------|-------------|---------|
| | Vessels. | Tons. | V. vessels. | Tons. |
| 1850 | 977 | 132,866 | 940 | 119,541 |
| 1851 | 960 | 129,644 | 810 | 122,110 |
| 1852 | 1,022 | 140,422 | 1,125 | 137,052 |

The cargoes entered in 1853 were of the value of £3 538 228, and those cleared, of the value of £3 843,250.

Smyrna is subject to destructive earthquakes and exterminating plagues. The last calamity of the former kind occurred in 1846, when the city was much damaged, and several persons killed. The Smyrniote ladies, according to Macfarlane, fully maintain their reputation for grace, elegance, and beauty, while they remain at their windows at which they generally spend nearly the whole day, and are content to be contemplated from a distance, but a sadder approach describes the charms, by discovering how much they are indebted to the ingenious use of cosmetics, dyes, and paints, for their most captivating attractions, while their really fine heads and necks are generally badly set off on a clumsy lumpy body supported by enormous legs and large vulgar feet, all of which is useless while they remain in their frames—the windows. Pop. estimated at 160,000 of which more than one-half are Turks, the remainder Greeks, Jews, Armenians, and Franks.

SMYRNA, a gulf, Asiatic Turkey W coast, Anatolia, in the archipelago, opposite to the isthmus of Mytilene or Lesbos. It is formed by capes Rod and Karamorum, and has a length, W E W to E E E, of about 40 m. with a maximum breadth of about 20 m., gradually narrowing as it proceeds inland. It contains several islands and receives several streams, of which the largest is the Sarabat.

SNAILWELL, par Eng Cambridge 2014 ac. P. 223. **SNATH**, a market in and par England co York (W Riding) The town, situated on a gentle declivity on the Aire, 23 m S. by E. York, is small, and irregularly built with a spacious church, in the latter English style a free grammar-school, several sets of almshouses, and various minor charities. Area of par, 23 435 ac. Pop. 11,363.

SNEHAEITEN, a mountain, Norway, belonging to the Dovrefield group lat. 63 30' N., lon 9 20' E. and long supposed to be the culminating point in the kingdom though it has since been proved to be more than 200 ft. lower than the Skagastollet in the Hogned id. It rises from the plateau covered with snow and ice. It is entirely composed of volcanic and gneiss, chiefly the former. On the summit there is a crater broken down on the N side, and on the others surrounded by perpendicular masses of black rock. The interior descends about 1500 ft. in a vast sheet of snow, and terminates in the bottom in an icy lake.

SNYLFK (Latin, *Sneek*) a tn Holland, prov Friesland 13 m. S.S.W. Leeuwarden, in a low situation, partly surrounded by an earthen wall a portion of which is planted and used as a promenade, and outside of which is a ditch. The town is traversed by various canals or ditches, crossed by numerous wooden bridges, and contains a good looking but not very large townhouse, a courthouse prison weighhouse, a fish and other markets. Reformed, Baptist, and E. Catholic churches, a neat synagogue, a workhouse, general and orphan hospital, and Latin, French two poor, and other schools and has four host-building yards, three rope-walks, three foundries, two soap-works, two tanneries, and a considerable trade in butter, cheese, &c. Pop. (1850) 7750.

SNIZORT (Loon) a large bay or arm of the sea, Scot land on N of Isl. Skye, between points Waterish and Hanaish, and the promulges of Waterish and Trotterish. After penetrating into the island for about 11 m. with an average breadth of 5 m., it divides into two narrow branches.

SNODLAND and **PANDIASWORTH**, par Eng. Kent, 2072 ac. Pop. 625.

SNOREHAM, par Eng Essex 398 ac. Pop. 105.

SNORING, two pars Eng. Norfolk.—1, *Grest*, 1446 ac. Pop. 656.—2 *Little*, 1524 ac. Pop. 383.

SNUG, a river Russia, rises in N of gov Cassanogov flows S.S.W., and joins r bank Derna, 10 m. above the town of Cassanogov; total course, 140 m.

SNOWDON a mountain range, N Wales, stretching N $\frac{1}{2}$ E to S $\frac{1}{2}$ W across Carnarvonshire, from the mouth of the Conway to Tremadoc, near the N extremity of Orddan Bay; length, about 24 m., average breadth 8 m. It attains its greatest height in Snowden proper whose loftiest summit, Wyddfa 2571 ft., is the culminating point of S. Britain. The descent of the range is gentle on the E. and precipitous on the W. and its nucleus, composed of primitive rocks, is flanked by immense beds of slate overlain by strata of limestone. Copper is found in many places.

SNOWSHILL, par Eng Gloucester 2204 ac. P 804. **SNYATIN**, a tn. Anglia, Galilee, 122 m S E. Lomborg, in a beautiful plain on the Frith with a castle, a Greek united and an Armenian church extensive tanneries, and a considerable trade in horses and cattle Pop. 6469

SOAJO a tn and par Portugal, prov Minho, 12 m. S E. Monlelo, in a district covered by the mountains of Gaviara. The inhabitants have many peculiar customs and have been called the Laplanders of Portugal. Pop. 1190.

SOAH, a river England which rises on the frontiers of Lancashire flows N. E. to Leicester then N. N. W. forms part of the boundary between co. Leicester and Nottingham, and joins r. bank Trent at Cavendish Bridge, about 7 m. below Loughborough to which it is navigable. Its chief tributary is the Fye or Wreck, which joins it on the right. Its course is for the most part through a rich grazing-country.

SOAY or Soa two islets, Scotland. The one, belonging to co. Inverness, par Broadale separated from the is. of Skye by the sound of its name, and opposite to Loch Skavang has a deeply indented creek which nearly divides it into two parts the other, belonging to co. Sutherland and situated on its W. coast at the entrance of Loch Inver forms a narrow spit about 1 m. long, and though heathy has some good pasture.

SOEHNEHEIM a tn. Rousch Pommers gov and 43 m. N Coblenz, 1. bank Rhine with four churches a chapel, and a gymnasium a paper and several other mills, and a tile-works. Pop. 2573.

SOBETON par Eng Hants 5814 ac. Pop. 1147 **SORIELLAL** a tn Bohemia, on the Lamehriz, 53 m. S. by E. Prague. It is walled and has a church, townhouse castle and hospital important manufactures of woollen cloth, and several saw and other mills. Pop. 9468.

SOUOTZE, or **SOOTZE**, a vil. Austria, Moravia, circle Olmütz, with a church. Pop. 1126

SOIKOTKA, a tn Bohemia, circle Bunslau between Mieschegra and Gieschle with a church and near it the fine old castle of Humprechtberg, picturesquely situated on a precipitous height. Pop. 1500

SOBRADILLO a tn. Spain Leon, prov and 45 m. W S. W. Salamanca with a church a primary school and some general trade. Pop. 1104.

SOBRADO two places, Spain Galicia —1 A tn. and com., prov and about 25 m. S. E. Coruña, r. bank Tambe has crossed by two bridges. It has a church, courthouse, prison, and primary school and a trade in maize and other agricultural produce. Near it is a lake with the largest oia in Galicia. Pop. 2803. —2 (de Trébo) A tn. and par., prov and about 80 m. from Orense with an ancient and massive church, manufactures of woollen and linen cloth, and a trade in wine, flax, chestnuts, and hams. Pop. 1055

SORBAN or **VELLIGAN** a tn and par Spain Galicia, prov and 12 m. from Pontevedra, on an elevated plain above the E. shore, Bay of Aroux, where it has a harbour. It has a church townhouse, prison, primary school several fountains, and a trade in sailcloth. Pop. 2273

SORBARRE, a dist. Spain in the Aragonian Pyrenees, extending about 45 m. in length, and 40 m. in breadth, bounded E. by the ancient county of Ribagorça, N. the Hoyas-de-Burbastró, from which it is separated by the Sierra of Aragon, whence its name is derived. W. the ancient county of Aragon and N. France. This was the cradle of the brave Aragoneses who first held the Saracens invaders in check and laid the foundations of the liberties of Spain. They assembled as early as 819 in the fastnesses of Sobarre, where their great laws were drawn up. These were called *Fueros de Sobarre*, and became the model of those of many other places.

SORREIRA-FONSECA a tn. and par Portugal, prov Beira Baixa, 22 m. W S. W. Castello-Branco, r. bank Foz-zares. Pop. 2484.

SOCANDAGO or **SACANDAGO**, a river, U. States issues from a small lake in the N. of New York; flows first E. then N. E., then suddenly turns N. E. and after a course of about 75 m., joins r. bank Hudson.

SOCATTOO, a tn. Africa. See **SACKATOO**

SOCZACZEW, a tn. Russian Poland r. bank Bzura, 20 m. W Warsaw, with two churches, a synagogue, the remains of an old castle, and a considerable general trade. Pop. (1841) 5378.

SOCIETY ISLANDS, in some respects the principal group of the S. Pacific; between lat. 16° 11' and 17° 58' S. and lon. 148° 5' and 151° 49' W. and between the Low Islands, while almost join them on the E., and the Friendly Islands, situated at a greater distance on the W. The group consists of the principal island of Tahiti or Otahiti, which is about 32 m. long N. W. to S. E., and is divided into two peninsulas by an isthmus about 5 m. broad and a great number of comparatively small islands, of which the most deserving of notice are Eimeo, Omeihu or Matia, Taurua, Tapunua or Samuier's Island, Huahine, Raiatea or Uieia, Taha or Oahu, Bora-Bora or Bora-Bora, Maroua, or Maroua, and Taiti or Motu-iti. All the islands are elevated, and more or less mountainous. In Tahiti, which consists of an elongated ridge, the loftiest summit, Orohena, is 8500 ft. above the sea, and two other summits near it are respectively 7000 ft. and 6979 ft. Among the mountains, remarkable for their magnificent scenery are many deep valleys and romantic glens in which a delightful climate and fertile soil maintain a luxuriant vegetation but it is towards the sea-side and along the foot of the mountains that the land is both most densely wooded and carefully cultivated. Close along the shore an excellent broad road, overhadowed with trees, affords an agreeable access to the different settlements which have been made around it. A coral reef, encircling the island at the distance of 2 m. or 3 m., presents an effectual barrier against the violence of the waves, and at the same time, having several openings in it, forms a number of harbours, where the sea is constantly tranquil, and the largest vessels can ride in safety. The best of these harbours, and the only one much used, is Matava Bay on the N. Point Venus, which contributes to form it, and is at the extremity of Tahiti is the most conveniently situated site in the Pacific, and is frequented by Lieutenant Raper as a secondary meridian. According to him, the flagstaff on it is in lat. 17° 25' 15" S. and lon. 149° 29' W. One of the most remarkable features in the vegetation of Tahiti is the extent of ground occupied by the guava shrub. It was introduced from Norfolk Island about 40 years ago, and it now forms miles of woodland and bush entirely composed of it, and bearing a profusion of large and delicious fruit. The scenery of Eimeo is, if possible still more attractive than that of Tahiti and almost every island of the group has been described by navigators in rapturous terms as realising their ideas of a earthly paradise. The Society Islands appear to have been first discovered, in 1696, by the Spanish navigator Pedro Fernandez de Quirós, who gave to Tahiti the name of La Sagittaria. It remained unknown to the rest of the world till 1767, when Captain Wallis sent by George III. to make discoveries in the Pacific, reached Tahiti, and believing himself the first discoverer, gave it the name of King George Island. The year after it was touched at by Bougainville, but by far the most important visit was that of 1769 made by Captain Cook, in company with Sir Joseph Banks and an efficient scientific staff, mainly for the purpose of observing the rare occurrence of the transit of Venus across the sun's disk. On this occasion, Captain Cook, besides surveying the chief island discovered several of the W. group, and gave to the whole the name of Society Islands. These discoveries excited the deepest interest in Great Britain and one of its most important fruits was the formation of the London Missionary Society which fitted out a vessel called the *Duff* to carry out missionaries and the blessings of Christian civilization. The result was successful beyond expectation. The great body of the natives abandoned their abominable practices threw away their idols, and had been formed into regular Christian communities, whom the Popish propagandists envying the Protestant success, sent two French priests for the avowed purpose of sharing in the evangelizing harvest. The unwillingness of the natives to receive them easily furnished a colour for a complaint of ill

usage, and the French government, either willing to become the tools of Russia, or anxious to turn their complaints to good political account, have robbed the natives of their independent men, by establishing a protectorate under which there is reason to fear that all the labour and expense bestowed in civilizing these beautiful islands and their people will be lost. The population of the Society Islands has, like many of the other groups of the Pacific, remarkably decreased (look, in 1774, probably very much over-rated it at 300,000. The missionaries in 1797 made it only 10,000. A census taken about 1840 reduced it to 10,000 of which 1000 belonged to Samoa. In the earlier periods the main causes of decrease were, undoubtedly indolence and the licentious sensuality of the Arolo.

SOCKBURN par Eng Durham and York (N. Riding) 2638 sq. m. Pop. 218

SOCKNA, **SOEKNA**, or **SUEKNA**, a tn. Fuzum, half way between Tripoli and Mourouk lat. 29° N, lon. 16° E. It is walled, about 1 m. in circumference, has eight gates, and is clean and neat. The dates of Sockna are abundant and excellent, and the inhabitants hospitable and good tempered (see sometimes false hearsay). Pop. 8000

SOCCOR, a tn. Spain, Murcia, prov. and 87 m. from Alhacete, near the Segura, with a parish church, courthouses, primary school and the ruins of an ancient castle. oil and flour mills, and a trade in honey and silk. Pop. 1473

SOCCUNUBCO, a tn. Mexico, dep. Olinapac, cap. prov. or dist. of same name, 212 m. W N W Guatemala. The district stretches along the Pacific about 43 m. with a width of about 38 m. and is mountainous and hot. Prior to 1843 it formed part of Central America, but in that year it was taken possession of by Mexico, and went as treaty.

SOCCORRO, a tn. New Granada, cap. prov. of same name, 150 m. N N E Bogota, in an excessively hot and unhealthy district. It contains a number of commodious houses but is for the most part ill built, ill paved and dirty. It has manufactures of cotton goods and straw-hats, dye-works, a spinning-mill, and a considerable trade with the surrounding districts. Pop. 12,000. The province is of great extent and has many fertile tracts. In the valley of Socorro both iron and copper are found.

SOCCORRO, a tn. Pacific Ocean lat. 18 45' 14" N lon. 110° 54' 10" W about 24 m. long and 9 m. broad. It may be said to consist of one mountain the summit of which is about 2000 ft. above sea level, and may be seen at the distance of 60 m. It is mostly covered with brushwood, intermixed with the prickly pear. Some vegetables are obtained here and both land and sea birds abound. Fish are also plentiful. The E. coast is very dreary and forbidding.

SOCCOLBA or **SOCCRA**, an isl. Indian Ocean, about 150 m. E N E Cape Guarafu in Africa, and 220 m. S S E. Ras Farak in Arabia, greatest length E to W, 71 m., greatest breadth, 22 m. area, about 1000 sq. m. The shores are generally bold, and, with exception of a few headlands with projecting reefs, have considerable depth of water near them furnishing tolerable anchorage. The surface is generally elevated, consisting of a table-land about 800 ft. above the level of the sea, which occupies nearly four-fifths of its area, and from which several mountain-rifles rise, presenting numerous granite peaks, some of them 5000 ft. high. On the more level parts of the table-land several wide depressions occur, and form valleys in which the moisture being more abundant than elsewhere, vegetation is more vigorous, and the best pasture of the island is found. The E. district is the most fertile. There date-hives skirt the water-coasts, and Sukum (*Sorghum eschwerum*) and cotton are cultivated to some extent. The N. district is also similarly though more partially cultivated, but the W and E. districts are for the most part very sterile. The principal natural productions are slaves, which when properly gathered and packed, are the finest in the world, the gum of the dragon-blood tree (*Pterocarpus draco*), also of excellent quality, the common date, and the tamarind, or Indian date, from the fruit of which the natives obtain a cooling and refreshing drink. The domestic animals are, chiefly camels, oxen, sheep, asses, and goats. Socorra is a dependency of the Sultan of Kahan, on the Arabian coast. The capital is Tameria. The inhabitants, apparently a mongrel race formed by a mixture of aboriginals and Bedouin Arabs, are estimated at 4000, being only four to the square mile.

SOCUELLAMOS, a vil. Spain, New Castile, prov. Ciudad-Real 102 m. S S E. Madrid with a courthouse, prison, two primary schools, a church, an ex-convent, two hermitages, and three flour-mills. Pop. 3510

SODAH an isl. S E coast Arabia, the second largest of the Oms-Murra group 3 m. long, by 3 m. broad, highest peak composed of stratified granite, 1810 ft. high. On the S. side is a bay 1500 yards deep with good anchorage decreasing from 10 fathoms as the centre of the bay is approached. **SODBURY** two pars Eng. Gloucester—1 (*Little*) 1071 sq. m. Pop. 198—2 (*Old*) 3637 sq. m. Pop. 630

SODERBY (*Carpping*) Eng. See Carpping-Sodbury **SODERBY**, a vil. Sweden, län and 40 m. N N W Upland, on lät Järna, in an expansion of the Dal-Ell. It is beautifully situated in the vicinity of a fine garden and park finely covered with large oaks and other hardwood trees, and has one of the most celebrated and extensive iron-works in Sweden. The establishment is on a magnificent scale, many of the buildings are handsome and there are a church and several good collections belonging to the work.

SODERHAMN a seaport tn. Sweden län and 42 m. N Götta, between two bays on a bay of the Baltic connected by a canal with the Lake of Tälja. It is built with great regularity, and has manufactures of linen, some fishing, a fishery, and general trade. Pop. 1500

SODERKÖPING a tn. Sweden län and 26 m. E N E Linköping, on the Stur Å, near its mouth in the Bistrik, a bay of the Baltic. It consists of wooden houses, coloured with dark red ochre has two churches, a townhouse, and schools, and manufactures of linen. The Gotha canal passes near the town. In the immediate vicinity is the much-requested thermal spring of St. Nagers. Pop. 506

SÖDERMANLAND or **SÖDERMANIA**, an ancient prov. Sweden now forming the greater part of län Nökingen, and a small portion of that of Stockholm

SÖDERNÄS, an isl. Sweden in the N of N Stockholm, opposite to Osthannum, from which it is separated by a narrow channel

SÖDERRIEJÖ a tn. Sweden län and 18 m. W S W Stockholm on the Tälje canal which unites Lake Mälar with the Baltic, and is here crossed by an ingenious swing bridge. It contains a large godown finally situated on a height, an hospital, and is celebrated for its linen manufactures. **SOLFA** or **SOLFA**, a native state, on Ouhela, about the middle of the W coast of the Gulf of Ben. One of the most important in the island. It is fertile and well cultivated. Pop. 18,000

SOERABAYA or **SOERABAYA** an E prov. Java bounded, N by the Java Sea, E the Strait of Madura, S. prov. Passeroean and Kediri, and W Pamezang length, N to S. 60 m. breadth about 40 m. exclusive of the island of Madura (which and which also forms part of the province. Towards the coast the country is low and flat, but rises inland to wooded hills of considerable height, culminating in the volcano of Ardjoeno or Walurang 11,463 ft. high and is watered by several streams, of which the chief are the Brantas or Kadiri and the Solo. It is very fertile, yielding rice, sugar, cotton and indigo. buffaloes and horses are numerous; sea and river fish are abundant and on the coast salt is plentifully obtained. The chief places are Soerabaya and Gresik Pop. (1845) 970,000

SOERABAYA **SOERABAYA**, **SOERABAYA**, or **SOERABAYA**, an important seaport in Java, cap. above prov. in a low situation on the Strait of Madura, and intersected by a small stream of its own name, crossed by a draw bridge lat. (Kali-mas) 7° 14' 40" S lon. 112° 44' 45" E (a.) It is surrounded by an earthen rampart and wet ditches and other well defended by several forts and a strong citadel. It has a large, roomy and secure harbour somewhat difficult of access from the slitting up of its approaches. It contains above 8000 private houses of which above 1000 are stone-edifices, and has a townhouse, various government offices, a Reformed and a R. Catholic church, an orphan hospital, a town and several other schools, a ship-foundry and powder magazine, a graving-dock, a ship-building yard, in which an extensive business is done in repairing as well as in building vessels, and an extensive shipping trade, exporting the produce of the island, rice, sugar, coffee, indigo, hides, rams, birds nests &c., and importing European manufactures. It has several

tema suffered severely from fire. Pop. (1845) 50,000.—(Foy of *Fig. Van der A.*)

SURAKANTA, a central prov Java, bounded N by prov Sasang, E. Madelon, W Kadon and Dyocokarta, and S the Indian Ocean; length, N to S, about 77 m. breadth, about 40 m. It is traversed in the N by a mountain-range, but is chiefly composed of an extensive valley, the extreme E. and W. points of which are formed by the volcanic Lawos, 10,900 ft., and Marep, 9186 ft. It is watered by several streams, the principal of which, the Solo, flows E. N. E. to the Java Sea. Only a small strip, S. of a low mountain-range near the coast, sends its waters directly to the Indian Ocean. Rice, coffee, tea, tobacco sugar, and a variety of fruits are grown, and buffaloes, horses, and other domestic animals are numerous. Besides agriculture, the inhabitants pursue successfully many handicrafts and are workers in iron gold silver copper, and leather cabinet-makers, carpenters, etc. The climate is favourable for Europeans. This province also forms a kingdom subject to Holland. Pop. (1845) 400,000.

SOERAKANTA, or **Soto**, a tin Java, esp. above prov, 140 m. W. S.W. Soerabaya. It is a large important place, the residence of the emperor or Soesoehenna, many princes, and other important personages and has a strong Dutch castle occupied by the resident. Fraterne schools, and several schools, including the Javanese institute, founded in 1833 for the instruction of the children of European parents in the customs, language, laws, &c. of Java, and fitting them for public offices. The inhabitants are very industrious they are excellent workers in leather making good saddles and horse-furniture, and the products of their looms and their dyeing are much esteemed. Pop. 100,000.

SOERHASSO, a vil., isl. Sumatra, in the uplands, 43 m. N. E. Padang, in a small deep valley near the Ralo. It is one of the four old capitals of the kingdom of Menangkabau.

SOERLOZ, see SOLO.

SOEST a tn. Prussia, Westphalia, gov. and 15 m. N. Arnsberg, esp. circle, on a height washed by the Soestbach. It is surrounded by lofty walls flanked with towers, is entered by five gates and has a singular antiquated appearance. The streets are generally dark, narrow and winding but several of the churches, which are no fewer than 10 in number, are very curious. Among others may be mentioned the Dom or cathedral, and the Petri Kirche, both Byzantine and the Waisen Kirche, a splendid specimen of German pointed Gothic. The main features consist of wooden and stone cloth, hair, laundry paper, and leather. There are also several mills, breweries and distilleries. The trade is in cattle, corn, fruit and vegetables. About 1 m. from the town are the salt-works and bath of Sinsdorf. Soest is the seat of several courts and offices for the circle, and has a normal school, orphan hospital and register-office for the crown. It was a place of great importance during the middle ages being situated on the line of traffic from the Netherlands across Germany. In the 16th century it stood a memorable siege by Dietrich, Archbishop of Cologne, who aimed at the subjugation of all Westphalia. He had an army of 50,000 men but the citizens ultimately compelled him to retire in disgrace. The painter Sir Peter Leys was born here. Pop. 3668.

SOEST or **Soez**, a vil. Holland, prov. and 11 m. N. E. Utrecht, in a well-cultivated district with a Reformed and a R. Catholic church, and several schools. Inhabitants chiefly engaged in agriculture, cattle-rearing, and in the turf and wood trade. Pop. 1986.

SOYALIA, a small tn., S. E. coast, Africa, Mozambique Channel, at the mouth of a river of the same name lat. 20° S., lon. 25° E. It is built on an unhealthy marsh and contains nearly of a small congregation of white-voiced mud-crocodiles. It has an excellent basin for small vessels, but on account of the shallow bar at its mouth, it can be entered only at high water. It exports some gold-dust, and according to some old authors, is the Ophir of the ancients.

SOFIA SARRA, a tn. Naples, prov. Calabria-Città, 20 m. W. Rossano with three churches. Pop. 1280.

SOFIGIANO, or **Sofigiano**, a vil. and par. Tuscany, comp. Florence, 7 m. from Prato with a church, and the remains of several ancient towers. Pop. 1016.

SÖFLINGEN, a vil. Württemberg, circle Donau, about 2 m. W. W. Ulm, on the Elbe with a church, a textile and manufactures of linen, ribbons, and eschewers. Pop. 1697

SOFOBO, or **SABOBO**, a tn. Morocco, prov. and 24 m. S. S. Fes, in a large and steep but fertile plain, which is the nucleus of the town is laid out in gardens, orchards, and vineyards. It is surrounded with walls, and consists of houses built mostly of brick, of only one story, and huddled together in narrow dirty streets. The only building deserving of notice is a handsome mosque.

SOGAMOZA, a tn. New Granada, 90 m. N. E. Bogota, on a river of same name also called Guzman, which flows first N. and subsequently N. W. and falls into the Magdalena at Bojoceros, 180 m. N. Bogota.

SOGNÆFELD, a mountain-group Norway, considered as belonging to the Thule or Langfeld Mountains, and covering part of prov. Bergenhus and Christiansand, between lat. 61 and 62° N. It connects on the S. with the Fjellfjeld and on the N. with the Langfeld proper and contains some of the loftiest summits in the kingdom; among others, the Hagesfjeld, 8890 ft. The great mass of the Sognæfjeld forms an elevated plateau, from which the loftier summits rise, often in peaks of the most fantastic form, and present scenery of the grandest alpine character. They are almost entirely composed of granite and mica-schist. They do not seem to contain any minerals of value.

SOGNÆFJELD, a very long and comparatively narrow creek, Norway stretching E. from the sea, where the Røden Islands nearly form its mouth up to the foot of the Sognæfjeld Mountains a distance of about 95 m. It forms numerous branches, in which, as well as in the main flow many fine cascades and much noble but grand scenery occurs.

SOHAM a market tn. and par. England, co. Cambridge The town. r. bank Cam, 16 m. N. N. E. Cambridge, is irregularly built, and many of the houses have a mean appearance. It has a spacious cruciform church, places of worship for Baptists, Independents, Wesleyans and Unitarians a large charity school and four almshouses. The chief employment of the inhabitants is with dairy-bulldozing. Excellent cheese and butter are made here. P. 2755. Area of par. 12706 ac. Pop. 4760.

SOHAR, a tn. Arabian coast of Oman, 120 m. W. N. W. Muscat lat. 24° 24' N. In former ages it was the chief port or commercial capital of Oman, and it still has a population of 9000 souls, and a considerable trade. The town of Sohar, in the interior appertains to it, and increases the richness of its wealth. The adjoining country is well watered, and is fertile in populus. Near exports large quantities of dried fruits particularly cotton, to Persia.

SOHL, or **SOLOTHURN**, a co. Hungary bounded N. by co. Lipitz, E. Glimb S. E. Neograd, S. Honth, and W. Honth, Bars, and Thronos area, 808 geo. sq. m. It is covered by ramifications of the Carpathians, and watered by the Gran, which traverses it in a S. W. direction. There is little arable land but the pastures are excellent and are chiefly employed in feeding sheep. The forests are extensive, and abound with game; and the minerals are both numerous and valuable, including silver, quicksilver, iron, and sulphur. The country is divided into two districts, Upper and Lower (the capital) and Lower or Aitah. Pop. 91,469.

SOHRAU, a villet in Prussia, Silesia, gov. and 51 m. S. E. Oppeln, on a height, in a well-wooded but marshy district, with a church and synagogue, manufactures of woollen cloth, ordinary linen, and damask. Pop. 4094.

SOIGNIES, a tn. and com. Belgium, prov. Hainaut, 10 m. N. E. by N. Mons, with old and decayed ramparts. Most of the houses are well built and spacious, and form regular, well-laid streets. It has an ancient church, rebuilt in 155 by St. Brannon Archbishop of Cologne a townhall, in the Spanish style, erected in 1629, an hospital, an orphan-asylum, almshouses, colleges, and numerous schools and manufactures of soap, silk, brandy, beer, and leather. Pop. 6589.

BOISSONS (anc. *Boisodunum*), a tn. France, dep. Aisne in a beautiful and fertile valley, 1 m. bank Aisne. It is walled and otherwise fortified and though a very ancient place, has recently been so much improved that it has all the appearance of a handsome modern town. The principal buildings are the cathedral, an edifice of the 13th century, in a very dilapidated state, the abbey of St. Jean des Vignes, once a magnificent edifice, dismantled and despoiled, but now a museum, the college, castle, and public library of 24,000 vols. and several rare MSS. The manufactures consist of coarse linen, hosiery,

stained paper earthenware, cordage and leather and the trade is in wool, corn, flour, flax, hemp, cattle, wood, and charcoal. **SOLESNO** is the seat of a bishop, the seat of a court of first resort and commerce, and possesses a diocesan seminary and communal college. It is mentioned by Cassius, under the name of Noviodunum, as the capital of the Suetones. At a later period, under the Romans, it took the name of Augusta. In 466, after the defeat of Sygryus by Clovis, it became the capital of the Franks and continued so till the seat of government was removed to Paris. Pop. 7900.

SOJ or **SOJA**, a river, Russia, rises in S W of gov Smolensk, flows S W into gov Mohilev, turns almost due S and reaching the frontier of Guberniya joins L bank Dnieper, after a course of about 250 m. principal affluents, the Oster, Besel, and Iput, all on the left. The stream is very rapid, but for a long distance navigable.

SOKE, a river, Russia, rises in N W of gov Orenburg near Novara, flows S W into gov Simbirsk, and joins L bank Volga, 15 m above Samara, total course, 140 m. Some naphtha-springs are found near its banks.

SOKEAL, a tn. Austrian Galicia, 50 m. N. E. Lemberg, r bank Bug with three churches, a Bernardine monastery and manufactures of silk ribbons. Pop. 3100.

SOKEA a tn. Russia, see SOCKA.

SOKELEA, a tn. Russia, prov and 23 m N E Buly stock, near a small lake, in a fertile district. It is poorly built but has a spacious market place. Pop. (1840) 4008.

SOKELOW, a tn. Russian Poland 18 m. N. Siedlce, in a sandy district, near r bank Cetyana. Pop. 1200.

SOKEOTA a market in Abyssinia, 97 m W S W Gondar. It is a place of considerable size, but scattered and straggling. It is much frequented by the merchants of the S and W and is the great centre of the salt trade.

SOKEUT a vil. Hungary, or Stuhlweissenburg, 6 m N Martonvasar, with a trade in corn and wine, and an excellent stone-quarry. Pop. 1891.

SOL-GALINSKAIA, or **SOL-GALITSKOI** a tn. Russia gov and 100 m N N E Kostroma, with six churches, manufactures of silk, limestone-quarries, and some general trade. Pop. (1861) 2988.

SOLANA, a tn. Spain New Castile prov and 28 m E Ciudad-Real, with a courthouse prison, several schools, two suppressed convents, a parish church and in the vicinity seven hermitages, a quarry of gypsum and Jasper. It has manufactures of linen, serge, hosiery, and coarse cloths coarse earthenware, oil, tiles, and bricks. Pop. 7635.

SOLARO a vil. and com. Italy Lombardy prov Milan, 5 m. S. W. Barisiana, with three churches. Pop. 1123.

SOLAROI several places Italy but the only one deserving of notice is *Solarolo-Rusaro* a vil. and com. prov Cremona, 9 m. N. Casal Magnora. Pop. 1838.

SOLARUSA, a vil. and com., Isl. Sardinia, div Cagliari, prov and 15 m W S W Busachi, near the Tiro. P. 1641.

SOLDRO, or **SOLDZO** a river (origined) rises in prov Alentejo flows almost due N then N W, past Alentejo-do-Sal, and falls into the Atlantic by a broad estuary, forming the Bay of Setúbal total course about 110 m. of which 40 m. are navigable. Its principal affluents are the Charrama, Odega, and Maraboa, the Romão, Campilhas and Davina.

SOLDAL, a river, L. Prussia, issues from a lake near a town of same name near Neudenburg flows first S W then W, enters Russian Poland, flows S. E. E. and E., and unites with the Mierka in forming the Wkra. total course 60 m.

SOLDAL, or **DEALDOVO**, a tn. Prussia, gov and 100 m S. W. Königsberg with two churches, and manufactures of woollen cloth, hosiery, and hats, several mills, and five general horse, and cattle markets. Pop. 1851.

SOLDIN, a tn. E. Prussia, gov and 42 m. N. N. E. Frankfurt, esp. circle, and near the S. shore lake of same name. It is walled has three gates, two churches, and two hospitals and manufactures of woollen and linen cloth, ribbons, hosiery, hats, leather, gloves, starch, and gunpowder. Pop. 8698.

SOLEC, a tn. Russian Poland, near l bank Vistula, 81 m. S. E. Radom. It has a considerable transit trade, the hardware and other articles from Silesia being landed here, and then forwarded. Pop. 1274.

SOLENT, or **SOLENT SEA**, that part of the British Channel separating the N. W. shore of the Isle of Wight from the

mainland of Hampshire, and extending between the Needles and W. Cowes. It has a width varying from 2 m to 5 m, and, though its navigation is rather intricate, it affords a safe and well-sheltered roadstead to numerous vessels when either wind-bound, or in time of war waiting for convoy.

SOLERO a vil. and com. Italy, Piedmont, div and 6 m W N W Alessandria, on a small affluent of the Tanaro, with four churches. Pop. 2312.

SOLESINO, a vil. Italy gov Venezia, prov and 17 m. S. S. W. Padua, with a church and two oratories. P. 3100.

SOLESMER, a tn. France, dep Nord 20 m. E. Cambrai on the Sella with an ancient abbey and a large and handsome parish church, having a lofty tower and four remarkable groups of statues, called the Saints of Solesmes, considerable manufactures of linen, plain and printed cotton tissues, mercurio, soap, and leather flax and cotton mills, and numerous breweries. Pop. 4868.

SOLETO a tn. Naples, prov Orontia, S. S. E. Lecce, with a church and two convents. Pop. 1850.

SOLETERE, a tn. Switzerland, see SOLOTEREN.

SOLEFATARA, a tn. *Lacus Albiculus*, a lake, Papal States, 14 m. E. N. E. Rome. It is of small extent, and owing to the deposits made by its strongly petrifying waters, is constantly diminishing. Its greatest diameter is little more than 500 ft. Its surface is almost completely covered by floating masses of vegetable matter and hence it sometimes takes the name of Isola Flottante. Its water which is of a milky color, temperature 80° contains more than its own bulk of carbonic acid gas, with a small quantity of sulphuretted hydrogen, it emits a strong smell of sulphur and is discharged into the Tevere by an artificial channel, called the Solifatare canal. It was in high repute among the Romans, who used it medicinally for various malades.

SOLETERIN a vil. and com. Italy, Lombardy prov and 18 m. N. W. Mantua, with a church and two chapels. In 1795 the Austrians were here defeated by the French and again in 1863 by the French and Sardinians. P. 1093.

SOLIGNANO (Latin *Solignanus*), a vil. and com. duchy and 23 m. S. W. Parma, l. bank Arno. It has a large and beautiful church, in the form of a Latin cross, an old castle in ruins, a primary school, a trade in corn wine, chestnuts and wood, sandstone and limestone quarries, and a sulphur springs. Pop. 2341.

SOLINGEN, a tn. and par. England on Warwick. The town 19 m. N. W. Warwick, has two principal streets, clean and well kept, a handsome parish church with a beautiful spire, an Independent and a R. Catholic chapel seven schools including a free grammar school, a reading-room and a library. Area of par. 11 296 ac. Pop. 3277.

SOLIKAMSK a tn. Russia, gov and 117 m. N. Perm on the Ussolski at its confluence with the Kama. It is an ancient place has five churches, two monasteries and two hospitals and manufactures of soap, embroidery lace and articles in gold, copper and tin, several tanneries and a trade in agricultural produce, furs, and silk. Pop. (1840) 3985.

SOLIMAN MOUNTAINS, Afghanistan. See SOULMAN.

SOLIMOEBS, a name of the river Amazon (Solimoes).
SOLINGEN a tn. Rhineish Prussia, gov and 18 m. S. E. E. Düsseldorf on a height above the Wipper. It contains a Protestant and two R. Catholic churches, a synagogue, and a commercial school and is the principal seat in the kingdom for the manufacture of hardware and cutlery. The staple article used to be sword blades, admired for their hardness, temper and elasticity and manufactured annually to the number of 900 000. The article next in importance is scissors of which 200 000 dozen are annually made. Solingen knives also are disposed of in large numbers at all the fairs of Germany. Articles in copper and brass though of less importance, command a large sale. The celebrity which Solingen enjoys, in its particular branch of trade, reaches back to the 13th century (147) when the manufacture of Damascus blades is said to have been introduced from the East by Count Adolphus, of Berg. Pop. 6618.

SOLIPACA a tn. Naples, prov Lavoro, div and 15 m. N. E. Caserta, near l. bank Calore with two churches. It is celebrated for its wine. Pop. 8400.

SOLK, or **GAOS-SOLK**, a vil. Austria, Styria, circle Jelenburg about 15 m. from Steinhof; with two churches, an old castle, and near it copper-mines. Pop. 1180.

SOLLER a maritime to Spain, in Majores, 14 m. N. Palma; lat. 39° 48' N. lon. 1° 47' E.; in a pleasant valley it has paved but narrow streets a townhouse, prison, three primary schools, a suppressed Franciscan convent, parish church and an hospital. Iron and cotton thread are manufactured. As a heavy sea sets into the harbor with the W and N.W. winds, there is no safe anchorage. Oranges, oil and the lemons of the country are exported. Pop. 7034.

SOLLERS-HORN, par. Eng. Harford 1152 sq. P. 147. **SOLLERS-PORT**, a n. France, dep. Var 9 m. N.E. Tonlon on the Gapeau, with a handsome church, silk-mills, tan-neries, and a trade in figs, oranges citrons &c. Pop. 2485.

SOLLINGEN a vil. Baden, circle Middle Rhine, 3 m. S.E. Durlach near I. bank Rhine with a church a forge, and brick works. Pop. 1125.

SOLLINGHOBURG, par. Incl. Tipperary 2201 sq. P. 634. (Sollighoburg) par. Incl. Tipperary, 6857 sq. P. 2176.

SOLMAN a vil. Hungary, district Dunabony, co. and 3 m. from Pesth with a church and a flour-mill. Pop. 1232.

SOLNITZ, or **SOLNITZ**, a to Bohemia, circle Königgrätz, 5 m. from Meissen. It is poorly built has an ancient townhouse, a handsome church a poorhouse, and many *Solnitzer* of linen cloth and shoes. Pop. 1444.

SOLA, **HERKALAN** or **SARAKATA**, the largest and most important river of Java. It rises in the prov. of Soerakarta, passes the town of that name flows E.N.E. in a very zigzag course through great Malayan secondary forests, and falls into the Java Sea, opposite W. end, of Malacca. The total course with windings about 356 m. Exemplary in the months of August, September, and October it is navigable for native boats till far above Soerakarta. — **SOLA** in JAVA. See **SOERAKARTA**.

SOLUPRA, a to Naples prov. Principato-Ultra 7 in S.S.E. Avellino, at the source of the Sarno. It is well built and contains a handsome collegiate, five parish, and several other churches three monasteries, two numeraries and two almshouses and has manufactures of wollen cloth, leather parchment, and jewellery. Pop. 6300.

SULOVA (Latin, *Cerastes Scodionis*) a small district, France, which formed part of prov. Orleansais, and had Rouennais for its capital now included in dep. Loire-et-Cher.

SOLULA a corregimiento, Central America, Guatemala, bounded N.W. and W. by Quetzaltenango and Totomocapan E. Sacatepequez and Guatemala, and N.E. Vera Paz, area, about 8600 sq. m. The surface, though mountainous, is fertile, well watered, especially in the valleys and well cultivated, yielding good crops of wheat, maize, barley and various kinds of fruit, and rearing great numbers of cattle and sheep. Manufactures have made considerable progress and much of the wool grown is employed on the spot in the manufacture of serge and other coarse textures. Nearly three-fourths of the inhabitants are Indians of the Quiché and Kachiquel tribes.

SOLOMBO (Gharat and Litzan), two small isls. Java Sea. Great Solombo lat. 3° 28' S. lon. 114° 28' E. is visible 24 m. off. Little Solombo, about 9 m. N. from the latter, and nearly of the same extent, is low and woody.

SOLOMON ISLANDS, S. Pacific. See **SALOMON**.

SOLONG, an Isl. Indian Archipelago, S. entrance to the Strait of Flores, lat. 3° 47' S. lon. 125° 8' E. (s) 30 m. long, by 10 m. broad. It is hilly, partly stony and little cultivated. The people consist of the mountaineers or aborigines, and the maritime inhabitants who are Malays. The chief exports are wax and fish-oil, which last is procured from a species of black whale.

SOLOTHURN (French, *Soleure*) a can. Switzerland, bounded N. by Basel-Landschaft, W. S. and S.E. Bern and L. Aargau. It is the most irregularly shaped of all the Swiss cantons, its contour presenting merely a succession of protuberances and indentations greatest length N.E. to S.W. 80 m. greatest breadth, 18 m. area, 823 sq. m. It is traversed throughout by the Jura, which here assumes the form of seven distinct and nearly parallel terraces, highest at the S. and gradually lowering as they proceed N. from 3000 ft. to 1000 ft. Corresponding with these terraces are a series of parallel valleys. The whole canton belongs to the basin of the Rhine, which receives the far greater part of its drainage through the Aar which traverses the canton in an E.W. direction, and receives within it the Dornau and Emmen. The climate is on the whole remarkably temperate.

The strata belong to the Jura limestone-formation, and nowhere are the blocks of gneiss and granite which cover the surface of the slopes of the Jura more numerous and of larger size than in Solothurn. Among minerals the first place is due to iron, of which extensive beds, in the form chiefly of bog-iron, are found both on the N. and S. foot of the Jura chain. Both gold and silver were at one time worked, but the operations are now not combined. The limestone is extensively quarried, partly for burning and partly for building. When susceptible of a high polish or variegated, it takes the name of Solothurn marble, and is much used for ornamental purposes. In some spots brown coal or lignite occurs. In respect of soil this canton is one of the most highly favoured in Switzerland. Not only in the lower grounds but in many of the mountain-slopes, almost all the ordinary cereals and large quantities of fruit are raised. After satisfying the home consumption grain is extensively exported. A large proportion of the surface is occupied by meadows and pastures. On these immense numbers of cattle, both for feeding and dairy purposes, are kept, and the produce forms one of the most important sources of revenue. The woods also are extensive. They are chiefly of hardwood, but are partially intermixed with pine. Manufactures, instead of making progress appear rather to have recently declined but trade, favoured much by locality continues to increase. The inhabitants are mostly R. Catholics and speak German. Numerous schools are provided and every child seven years of age must be attended. The canton is divided into nine districts or bailiwicks. The government, once aristocratic, was considerably modified in 1831 and 1841 by a strong infusion of the democratic principle. Of the 106 members, of whom the great council or legislative body consists, 65 are chosen directly by the people, 45 by electoral delegates, and none are named by the council itself. P. (1860) 69 263 of whom 69 524 are R. Catholics and 3645 Protestants.

SOLOTHURN (French *Soleure* and *Solodurum*) a to Switzerland cap. above an eminence situated on the S. side of one of the most beautiful parts of the Jura chain, on both ends of the Aar. Here crossed by two bridges, 18 m. N. Bern. The town was once regularly fortified but in 1835 the demolition of the fortifications was decreed by the grand council, and has since been accomplished. It is well built, has wide, well-paved streets, several good squares, of which that of the market-place, adorned with a fine fountain, is the best. The principal edifices are the minister or cathedral, the clock tower of Burgundian origin a massive square of solid masonry rising for 80 ft. without window or other opening the town house, an old irregular building, surmounted by several towers, the museum, containing a rich collection of Jura fossils the barracks, the arsenal, with a very curious and extensive collection of ancient armour the theatre, public library and gymnasium. The manufactures are of little consequence, and consist chiefly of cotton stuffs leather, ironware, paper beer and vinegar. Trade also is very limited. Koenigskopf the 10th patriot, spent the last two years of his life, and died here in 1817. Pop. (1860) 5916.

SOLOTWINA, a to Austria, Galicia, 90 m. S.E. Lemberg in a richly-wooded district on the Bystrzyca. It has a Polish and Russian parish church, and a flour-mill. P. 2500.

SOLOVETZKO (Cernow, or *Solowki*) a group of isls. Russia, Gulf of Omega, 140 m. W.W. Archangel. The largest of them is 18 m. long by 8, by 12 m. broad and abounds with tale, obtained in large plates, often more than a foot square, and extensively used for glazing, particularly in sun-lanterns. It has a celebrated monastery to which numerous pilgrimages are made, and a large beautiful church, with a library containing many ancient books and MSS.

SOLRE, two places, Belgium — 1, (near-Sambre), A vil and com. prov. Hainaut, on the Sambre, 18 m. S.E. Mons, with manufactures of refined salt, a foundry, a brewery, marble saw-works, a flour-mill, and quarries of marble. P. 1978. — 2, (Saint-Gorp) A vil and com. prov. Hainaut, 31 m. S.E. Mons, with a blast-furnace and other iron-works, brick-works, chalk-works, a brewery and a flour-mill. Pop. 870. **SOLRE-LE-CHATEAU** a to France, dep. Nord, on the Sola, 51 m. S.E. Valenciennes. It has manufactures of lace, serge, and wollen cloths, several worsted and filting mills, miteries, tanneries, marble and glass works; a trade in wool, flax, wood, &c. Pop. 2220.

SOLSONA [*Latin, Solisena, or Solisena*] an episcopal city, Spain, Catalonia, prov Lerdia, 54 m NW Barcelona, on the Rio Noya. A strong wall with nine towers, three gates, fenses, and redoubts, surrounds the city, and on an eminence which commands the town, stands the square old castle with its round-tower at the angles. It has two aqueducts, one with a fountain in the centre, and the other surrounded with colonnades; a townhouse, with prison attached, two endowed schools, several convents, an hospital, an episcopal palace, and a Gothic cathedral; manufactures of knives, locks, lamps, nails, &c., and two flour-mills. Pop. 2056

SOLTA [*anc. Olyetika, or Solisum*] an nl. Austria, in the Adriatic, on the coast of Dalmatia, nearly opposite to Spalato and separated by a narrow channel from the Isle of Bracon; greatest length N W to S.E. 10 m. mean breadth, about 8 m. It is well wooded and fertile, and is famous for its honey, which owes its flavor to the rosemary which abounds. It has also a trade in wine and oil and supplies Spalato and Trau with freewood. Pop. 1742

SOLTH, a market tn. Hungary. Hither Danube, co and 49 m. S. Feeth in a marshy district on a branch of the Danube. It contains a Protestant church. Pop. 6949

SÖLVEBORG or **SÖLVESBORG**, a seaport to Sweden on a bay of the Baltic, lin and 98 m W.S.W. Carlskrona. It is old, but tolerably well built, has a handsome market place, and a considerable trade with the interior. The harbor is good, the environs are covered with orchards, and in the vicinity are the ruins of an old castle. Pop. 1284

SOLWAY FIEETH, an arm of the Irish Sea forming part of the boundary between England and Scotland and extending inland in a N.E. direction for above 41 m with a breadth diminishing from 20 m at its entrance between St Bees Head in Cumberland and Rayberry Head in Kirkcudbrightshire, to 7 m, and finally only to 3 m. On the Scottish side it receives the Urr, the Uth, and the Annan, and on the English side the Derwent, Ebor, Waver, Wanspoo, and Eden. All these rivers owing to the rapidity with which the tide advances, are liable to a bore at high springs. A large portion of the Solway is left dry at low-tide, and the water from the quantity of sand is of a whitish color. It abounds with fish, and has several valuable salmon fisheries. On its E. shore are Whitehaven, Maryport, and Allonby, and on its W. Annan and Kirkcudbright.

SOL WYCHOWSKA, a tn. Russia, gov and 257 m N. P. Volodia. A bank W-yichowka with 10 churches, a monastery, manufactures of leather, lard, molting calicoes, musins, and extensive salt-works. Pop. (1849) 1106.

SOLYMONS, several places, Hungary, particularly —1, A vil Thutter Thous, co. Arad with a Greek church, and the ruins of an old castle occupied by Isabella queen of John Zephyr, as a place of refuge at the time when Duda fell into the hands of the Ottomans. P. 1215 —2, A vil Hither Thous, co. Heves, near Gyöngyös, with a handsome church. P. 1604

SOMAGLIA, a vil and com. Italy Lombardy, prov. Lodi, 3 m S.W. Codogno, with a church and manufactures of tiles and earthenware. Pop. 2047

SOMAIN, a tn. France, dep Nord 10 m E. Douai with manufactures of cambric and mills in which fine thread for lace is spun. Pop. 2458

SOMARIVA LERZO, a vil and com. Italy Piedmont, div Com, prov Alba with a splendid palace, and several churches. Pop. 1995

SOMALI, a country of F Africa, occupying the most N.E. portion of that continent. It is of a peninsular form having the Sea of Adal-Mandab as far as Zeila, on the Indian Ocean, as far as Ras-el Khyle, lat 7° 45' N., on the E., and terminating N.W. in Cape Guardafui. Its limits S.W. are unknown. Two ranges of mountains traverse the peninsula S.E. to N.W. between which lies the Wadi Nogal, or Happy Valley, extending in almost a straight line throughout the whole length of the double range. The natives speak of this valley in the most glowing terms, which apparently forms their great road for trade. It is extremely fertile and beautiful, is rich in gums, and abounds in game and water. The greater part of the N. coast, and a portion of the S.E. of Cape Guardafui, is lined with hills of considerable elevation, in some parts attaining a height of between 6000 ft. and 7000 ft. On some of the mountain-ranges many large blocks of pure white marble are found, with abundance

of obsidian, gypsum, and large masses of basalt. It is not a little remarkable that the majority of the streams flowing from the mountains on the coast are bitter and in quality highly astringent. There are, however, others that afford most delicious and pure water. Several varieties of gum-trees occur and the mimosa, tamarisk with fig, and several species of the cactus and also are abundant. Wild beasts are numerous; they include elephants, lions, leopards, hyenas, wolves, and jackals. Several varieties of deer, jerboas, squirrels, and a species of toucan are common. White vultures of enormous size are frequently seen also the common osprey. The Formiculus are represented as peridious, bigoted and quarrelsome. The principal articles of trade or produce are glue, myrrh, ivory, ostrich-feathers, and gum-arabic some orchill-wood, and a kind of saffron. The only port is Berbera, on the N. coast.

SOMBREFK, a vil Hungary, Thutter Danube, co. Banya, about 8 m. from Mohacs, in a fertile wheat-district with a church, two handsome chateaux and some trade in cattle and horses. Pop. 2173

SOMBOR, in Hungary. See ZOUNON

SOMBORN formerly **BOURGON**, a market in Hesse-Cassel prov and 7 m. E. Hanau with a church, tile-works, and four mills. Pop. 1544

SOMBORUN, two para. Eng. Hants —1 (Kings), 7426 ac. Pop. 1549 —2, Little, 1291 ac. Pop. 101

SOMBRELE, a vil and com. Belgium, gov and 12 m W. N. W. Ymmer inhabitants chiefly employed in agriculture, and partly in linen weaving. Pop. 2120

SOMBRETE, a small tn. Mexico, dep. and about 80 m. N.W. Zacatecas remarkable only for the rich mines of silver in its neighbourhood.

SOMBREIRO, an uninhabited isl. W. India, the most N. of the Caribbean Islands, lat. center 18° 33' 40" N. about 8° 27' 45" W. about 8 m long N.N.W. to S.S.W. breadth 100 yards. It is flat, rugged and without soil as occupying a small patch near the centre, on which grow a little grass, some weeds, and a kind of sassafras. Multitudes of sea-birds frequent the island during the breeding season.

SOMERSET [*anc. Somerseta*] an ancient ruled in Assate Turkey peah. Marash on the Euphrates 50 m. N.E. Hic. The remains of this celebrated place, the birth-place of Lucretius are just recognizable. The modern town is small and miserable.

SOMERBY three para. Eng. —1, Jester 1000 ac. Pop. 503. —2, Lincoln, 2990 ac. Pop. 297. —3, Lincoln 1940 ac. Pop. 270

SOMERCOTES, two para. Linc. Lincoln —1 (North) 8622 ac. Pop. 1039 —2 (South) 2597 ac. Pop. 400

SOMERFORD three para. Eng. Wilt —1 (Great) 1770 ac. Pop. 650 —2 (Keynes) 1640 ac. Pop. 373 —3, (Little) 1892 ac. Pop. 957

SOMERSET, a tn. and com. Belgium prov. F. Flan. about 8 m. N.W. Ghent with a church, civil communal house, orphan asylum, hospital, and two chateaux. Linen and cotton manufactures, a dye-works, two breweries, and numerous mills. Pop. 7158

SOMERSET, a tn. and com. Eng. Suffolk 1410 ac. Pop. 627

SOMERSET, a tn. and com. Eng. Derby 697 ac. Pop. 111

SOMERSET, a tn. and com. Eng. Lincoln 600 ac. Pop. 64

SOMERSET, a co. England bounded N. by the Bristol Channel, A.E. Gloucestershire, B. Wiltshire, S. Dorsetshire, S.W. and S. Devonshire, greatest length E. to W. 68 m. greatest breadth 43 m., area, 1607 sq. m., or 1,078,090 ac. The coast in which the only two harbours of any importance are formed by the mouths of the Avon and Tamar, is in the E., with the occasional interruption of a few limestone-cliffs, low and marshy but in the W. is generally lined with lofty cliffs, composed of slate. The interior consists of ranges of hills separated sometimes by valleys, but more frequently by extensive low marshy flats or fens. In the N.E. these hills are irregularly grouped, and form a number of picturesque eminences the loftiest of which, Lansdown and Dundry hills attain the respective heights of 818 ft. and 790 ft. E. of these groups, and extending in a W. N.W. direction from near Frome to the Bristol Channel, are the Mendips Hills, which form a marked and continuous range nearly 30 m. long, and

in some parts exceed 1000 ft. in height. The Quantock Hills, occupying the W. part of the county are still more elevated, and in their culminating point, called Bagborough Station, or Wolf's Neck, attain the height of 1270 ft. In the N.E. the prevailing strata belong to coralline formation, and contain the quarries which furnish the famous Bath stone. In the E. and S.E. magnesian limestone is largely developed. On the N.E. side of the Mendips Hills, extending from the neighbourhood of Frome towards Keynsham, are three small isolated coal fields, the last of which is nearly connected with the large field of Gloucester. These fields are skirting, particularly on the S. by mountainous limestone, interrupted by occasional patches of old red sandstone. In the W. of the county the latter forms the prevailing formation, and consists chiefly of slaty rocks, forming the wild moorlands of Exmoor Forest. Besides the Avon and Parret already mentioned, the former bounding the county on the N.E. and the other traversing it nearly centrally in a N.W. direction, numerous other streams descend from the hills, and afterwards wind extensively among the marshes. Among others are the Yeo, Axe, Durn, another Yeo or Ival and the Tone. By a number of cuts and canals, and more especially by the Glastonbury canal and the Yeo and Parret Navigation an important chain of internal communication has been formed, and to this the advantages of the railway system have recently been added by the Great Western railway which, after skirting the county from Bath to Bristol, pursues a somewhat circuitous course S. to Exeter and is joined by several important branches. Both the soil and climate of Somerset are well adapted for agriculture, and particularly on the rich alluvial tracts, and in the vale of Taunton heavy crops of the finest wheat are raised. The meadows and pastures too are remarkably luxuriant and rear large numbers of excellent cattle both for the butcher and the dairy. The hilly grounds are chiefly pastured with Leicester or Southdown sheep. After cereals the most important crop is potatoes. Flax and hemp are grown to some extent, and wood and tannin form important objects of culture in particular districts. The manufactures, mostly woollen and worsted goods, gloves silk and lace, have their principal seats at Frome, Taunton, Wellington, Clarendon, Blandford and Shipham-Mallet. The salmon fisheries and other fisheries are carried on to some extent in the Bristol Channel. P. 448, 016.

SOMERSETSHIRE—A N. and par. Langdon, co. Somerset. E. N.E. Hentington is a fertile district with a parish church a Baptist chapel, and a free school. Area of par. 4121 ac. Pop. 1653.—2 Par. Langdon, 1027 ac. Pop. 473.

SOMERTON a market town and par. Langdon co. Somerset. The town nearly in the centre of the county but far from 1 bank Cary over which is a stone bridge. 23 m. S.W. Bath consists chiefly of five narrow streets and has an ancient church a free school, a well-endowed almshouse; and places of worship for Independents and Wesleyans. Glove making is carried on to some extent. Area of par. 6926 ac. P. 2140.

SOMERSETT four parts Reg.—1 Oxford 2140 ac. P. 342.—2 Suffolk; 1040 ac. P. 186.—3 (East) Norfolk, 706 ac. P. 62.—4 (West) Norfolk 1189 ac. P. 262.

SOMERVILLE a vil. and township 1, State Massachusetts on the Shawbush and several lines of railway and 8 m. N.W. Boston. It has among its establishments the Mass. asylum for the insane, and Taft's college established by the Universalists in 1852. The only extensive public works are those of the New Bedford Company. Pop. 1850 2540. **SOMIDOURO** a vil. and par. Brest prov. Finist. France, 12 m. S.E.E. Marianne with a parish and five auxiliary churches most of the inhabitants are miners. Pop. 3000.

SOMILYO or **SILAYO-SOMILO** a market to Austria, Transylvania co. Krassna, on the Krassna, 52 m. N.W. Klausenburg with a Protestant and a Greek church a Minorite cloister, courthouses, and thermal springs. Near it is the old castle of Bathyory. Pop. 2747.

SOMMA, a tn. Naples, prov. and 9 m. E. Naples, at the foot of Mount Vesuvius with a castle, three churches, three monasteries, and a nursery. Pop. 7120.

SOMMA, co. Hereford, a tn. and com. Italy Lombardy prov. and 37 m. N.W. Milan, on the Ticino at the point where it issues from Lake Maggiore. It is a well-built place, of considerable antiquity; has a court of justice, a magnificent palace, two parish churches, and a trade in wine and silk. Two great battles have been fought in the vicinity—one be-

tween Caesar Marcellus and the Insubri, and the other between Hannibal and Scipio. The Romans gained the former, but lost the latter. Pop. 880.

SOMMARIVA **del-Bosco** a tn. Italy, Piedmont, div. Cune, prov. and 14 m. N.W. Alba, with a court of justice, a parish church, finely seated on a height near the site of the old castle, of which some ruins still exist, an hospital, three schools, and a charitable endowment. Pop. 553.

SOMME (Latin, *Sommar*) a river France, rises in dep. Aisne, 7 m. N.W. St. Quentin flows S.W. enters department Somme, flows N.W., past Peronne, Amiens, and Albertville, beyond which, about 16 m., it falls into the English Channel. Its only affluents of the least importance are the Avre and Cello, both on the left. Its whole course is about 185 m., of which 30 m. commencing at Amiens, are navigable. By the canal of Somme and that of St. Quentin, it communicates with the Oise and the Scheldt.

SOMME a dep. France bounded N. by dep. Pas-de-Calais, N.E. Nord, E. Aisne, S. Oise, S.W. Seine-Inférieure, and N.W. the English Channel, greatest length E. to W. 71 m.; average breadth, 38 m. area, 2543 sq. m. The coastline which has an extent of about 25 m., is divided into two nearly equal portions by the mouth of the Somme that to the N. consisting of low sandhills, little raised above the sea-level and that to the S. of steep cliffs, composed of clay, sand, and chalk, which are of a mouldering nature, and incessantly giving way before the action of the waves. The interior consists for the most part of extensive naked plains, which have a dull monotonous appearance, but are occasionally diversified by small valleys, cultivated by streams, and often covered with verdant turf. The principal river is the Somme, which gives its name to the department, and traverses it centrally E. to W. receiving the Authie and the Selle both on the left bank. The water-communication is extended and greatly improved by the canal of the Somme. The soil is for the most part a mixture of chalk sand and clay, and is not possessed of much natural fertility but has been greatly improved by careful cultivation. About three-quarters of the whole surface are arable and one-twelfth in wood which is much scattered over the department. The cereals produced more than suffice for the consumption. Oleaginous crops beet, hops, dye and medicinal plants are also extensively grown. There are many large and thriving orchards, from the produce of which an excellent cider forming the common beverage of the country is made. There are no minerals of any importance. Most of the inhabitants are engaged in agriculture but manufactures have made considerable progress, and consist chiefly of woollen cloths, velvet, furniture, grained hempen, cotton and linen goods, basketry, iron ware, bent-root sugar, leather, paper, soap, oil, glass, mineral acids, and chemical products. The trade is chiefly in corn, flour, clover, linens, and oleaginous seeds, cattle, salt provisions coal wood cotton and linen thread, rack-vesting, cordage, and colonial produce. Somme is divided into five arrondissements—Amiens (the capital), Abbeville, Doullens, Montdidier and Peronne subdivided into 41 cantons, and 881 communes. Pop. (1852), 570,841.

SOMMEP a tn. Hindostan, prov. Gajerat, 30 m. S.E. Rajahmundry, in a swamp, and during the rainy season almost under water. It contains about 4000 houses.

SOMMELESDIJK, a vil. Holland, prov. S. Holland, nl. Overflakkee, 19 m. S.W. Rotterdam, with a convenient harbour connecting with the Hartingvliet. It has a church and a chapel a townhouse, a school a general and an orphan hospital, and some trade in fish and agricultural produce, particularly grain. Pop. 2454.

SOMMEN a lake, Sweden, in S.W. of Mln Långbyng. It is of very irregular shape, and stands about 450 ft. above the sea-level, in the midst of wild and mountainous scenery, greatest length, N.W. to S.E. 25 m.; greatest breadth, 8 m. It contains a large island, receives several small streams, and discharges itself at the N. extremity by a stream which joins the Reme, and by means of a canal communicates through it with the Baltic.

SOMMERDA, or **GROSE SCHENCK** a tn. Prussia, gov. and 15 m. N.N.E. Erfurt, on the Unstrut. It is walled has two churches, and manufactures of iron ware. Pop. 3880.

SOMMERREIN, or **SOUMSA**, a market in Hungary, co. and 11 m. S.E. Frensburg, in the greater island Schütt,

near l bank Danube. It has a Lutheran a Calvinistic, and a R. Catholic church and a handsome townhouse, with a tower; and several mills. Pop. 8690

SOMMERFELD a tn. Prussia, prov Brandenburg gov and 45 m S.S.E. Frankfurt, on the Lubat. It is walled and has a castle, manufactures of woolen and linen cloth, and a trade in horses and cattle. Pop. 9348

SOMMERHAUSEN, a vil. Bavaria, Lower Franconia, r bank Main, 8 E. Würzburg, with a church, castle, poor-house, and orphan hospital; manufactures of tobacco, molasses, lace, and wicker-work, and a trade in wine and fruit. P. 1929

SOMMILIKES [anc. *Amserew*] a tn. France, dep. Gard, 15 m. S.W. Nîmes on a height above l bank Vidourle. It was once fortified, and formed an important Protestant stronghold during the religious wars. The fortifications have been razed, with exception of the castle. The manufactures, which are of considerable importance, consist of woollen cloth, woollen covers, and molasses. There are also several distilleries, tanneries and fulling-mills. The trade is in agricultural produce, wine, brandy, combed wool sheepskins woollens &c. Pop. 8623

SOMNAUTH, or **PURAN SOMNAUTH** a tn. Hindoostan at the junction of three streams near S.W. shore Gujarat 29 m. N.W. Diu Head; 10° 58' N. lon. 70° 35' E. It is celebrated for its temple which stands on the site of an ancient edifice erected by the Sultan of Ghuznee and subsequently razed by the Mahometans. It is annually visited by multitudes of pilgrims. The gates of the original temple carried off by Sultan Mahomed, and erected on his tomb at Ghuznee, were restored to Somnauth in 1842 after an absence of 800 years, by Lord Ellenborough, after Ghuznee had been taken by the British. The whole district is celebrated in the tales of Hindu mythology

SOMNO (Rio do) two rivers Brazil — 1, Rises on the confines of prov Pernambuco, in the Serra-da-Figueras prov Goias and proceeding N.W. through the prov. joins r bank Tocantins — 2, Rises in the Serra-da-Sandalia, prov Minas-Geraes, on the frontiers of prov Goias flows N.E. receiving the Almota on the right, and joins r bank Paracatu whose volume it doubles.

SOMODY, or **SOMODY** a vil. Hungary Mather Theiss, co. Abauyvar, about 25 m. from Kuchua. It is a cavalry station and has a church and a mineral spring. Pop. 1189

SOMUGYVAR, a vil. Hungary Thutier Danube, co. Fumegh about 2 m. from Oreg Lake, in a fertile district it has a church, the extensive ruins of a strong castle, several mills and a trade in corn, cattle, and wine. Pop. 1042

SOMOLYA a vil. Hungary, co. Nara, about 5 m. from Mero Károly, with a trade in corn, wine, and timber, and a stone-quarry. Pop. 1149

SOMORROBIO a vil. Spain prov Biscay, in a valley and l. bank river of same name near its mouth in the Bay of Hiscay, 18 m. N.W. Bilbao. It has a small port, defended by several batteries and near it a fortified palace. In the valley are rich seams of iron which is extensively mined and manufactured. Pop. (valley) 9040

SOMON, a market town Hungary Mather Theiss, co. Barca, 6 m. from Egriker, in a fertile district with a church a castle with fine gardens a mill and fine oak timber. Pop. 1068.

SOMOSKEZS, or **SOMOSKEZ** a vil. Hungary, Thutier Theiss, co. Arad in a well-wooded but not fertile district, 15 m. from Zeredo. It has a Greek church. Pop. 1142

SOMPTING par Eng Sussex 2830 ac. Pop. 559

SOMU Somu a tn. S. Pacific, N.W. side, lat. 14° 46' S lon. 178° 58' W consisting of about 300 houses.

SOM-SAVANA, a vil. Spain, E. extremity of Isl. Majorca, near the sea. It has a square, which serves as a market-place a parish church, endowd primary school 12 flour and 14 oil mills, and a tile-work. Pop. 1286.

SOMALI a tn. Hindoostan, prov Matrah, 145 m. E. by S Odeypoor; a flourishing place, with about 4000 inhabitants.

SOMCINO a market to. Austria Italy, gov Milan, prov and 20 m. N.W. Cremona, r bank Oglio. P. 4228

SOMERBERG, a tn. Denmark, cap. bail. of same name, on S.W. of Isl. Alsen duchy and 97 m. N.E. Schleswig on an activity near the Alsen the whole of which may be regarded as a continued harbor. It has a collegiate church an old towered castle of its name on the strand, and the well

endowed hospital of St. Jürgen good building-yards, and some shipping and general trade. Sonderburg was fortified in 1548. Pop. 2800

SONDERSHAUSEN, the cap. of Schwarzburg-Sondershausen, 34 m. S.W. Weimar. It is walled has four gates, a palace, with gardens, and a rich cabinet of natural history, two churches, a synagogue, gymnasium, normal school, savings bank, and theatre. Pop. 3500

SONDURIO a tn. Italy Lombardy, gov and 57 m. N.N.E. Milan cap. prov of same name at the S. foot of the Rhetian Alps, on the Maffero near its junction with r bank Adda. It has eight churches, a gymnasium, hospital, theatre, and house of correction, a civil and criminal court of first resort, several schools, and several industrial establishments. It is extremely liable to inundation by the Maffero, which almost destroyed it in 1834. Pop. 4767 (prov) 50144.

SONE, or **SONE**, a river Hindoostan, which rises in a plateau on the N. frontiers of Gundwana, not far from the sources of the Nerbudda flows first N.W., then E.N.E., and joins r bank Ganges, 25 m. above Patna after a course of about 450 m. Its principal affluents, all on the right, are the Coput Huttee Kumbher and Coyle. In this upper part of its course it flows through a narrow valley hemmed in, particularly on its l. bank by lofty mountains, separating its basin from that of the Jumna, during its middle course, the same mountains separate it from the Ganges to which for many miles its direction is almost parallel. In its lower course the valley widens out into alluvial plains while its bed, nearly dry, except in the rainy season, is marked by a desert of sand resembling a vast arm of the sea when the tide is out. At Daroon about 60 m. above its mouth this bed is 8 m. wide and the banks, unprovided with trees have a very barren and desolate appearance. In February, 1848 when Dr. Hooker crossed the river at this point, the body of water was not above 30 yards wide, but in the rains the whole S. m. became one rapid flood, 10 ft. or 12 ft. deep, and charged with yellow sand. Above Haroon the country becomes rich and highly cultivated and is covered with indigo cotton sugar-cane, &c., while the date or toddy palm, and the fan-palm become very abundant and tall. Still higher up the mountains approach the river, and amid steep spurs forming lofty precipices of limestone and sandstone. At Kola, considerably farther up the strata become carboniferous, and coal is reported to exist. Along the banks of the river, shivered and undulating areas of micaceous quartz, hornstone, &c., occur in many places, and appear to form the beautiful agates and carnelians known in commerce by the name of Sonae pebbles. Alligators, chiefly of the short nosed or mugger kind are numerous in the stream. Fish also, particularly several varieties of carp, abound and are said to be superior to those of the Ganges. The Sone claims to be a classic river having been satisfactorily identified with the ancient Eraboeas an apparent corruption of the Sanskrit *Hierappa* Salm, or Goldenstream. Gold is, however, no longer found — (Hooker's *Himalayas Journals*)

SONEJA a vil. Spain Valencia, prov Castellon do la Plana, 27 m. Valencia, r bank Palancia with a townhouse, built in 1845, of good architecture two primary schools, a parish church, and a hermitage oil and flour mills, and manufactures of which lead. In 1836 the Carlists burned Soneja, but were overtaken by General Guesca and defeated. P. 1640

SONG oa, a large river Annam, formed by the junction of the Lo-tien and Song-sha the former rising in China, and the latter in Laos. It flows S.E. passes Kancho and Hani, and falls by several mouths into the Gulf of Tonquin. The natives on its banks wash gold from its sands.

SONGARI, or **SONGARI**, a river, China, Manchouria, rises in the N. slope of the Amur Chanyan Alin Mountains, on the N. frontiers of Corea. flows first N.W. past the towns of Kirm Oula and I storme to the frontiers of Mongolia, then E.N.E. past the town of Oouanlin, and joins r bank Amoor, after a course estimated at about 700 m. It has a deep channel well adapted for navigation, and receives numerous tributaries, of which the most important are the Hoochea on the right, and the Tonken and Tamlie on the left.

SONICO a vil. and com. Italy Lombardy prov Bergamo 3 m. S.E. Edolo l. bank Olito, with several churches, and a saw-mill tile-works and lime-kilns. Near it are slate-quarries and iron-mines. Pop. 1454

SONINO [unc. Swenson] a m Italy 17 m S.S.W. Frosinone. Pop. 1000

SONNEANE, or SONNEAKER, a tn Beloeuchatan, N extremity bay of same name, lat. 32° 25' N lon. 66° 25' E. It is mean and dry and has about 500 houses built of mud, and each surrounded by a small turret or fire, upon an earthen side to the sea-breeze, which it sends downward into the interior of the building, for the purpose of mitigating the excessive heat. The inhabitants live principally by fishing and are extremely poor, except a few Hladons who have the whole trade of the place in their hands. The imports from Bombay are silk, cloths, iron, tin, steel copper pepper sugar, and opium; from the Persian Gulf, dates and slaves from Senegal, coarse cotton cloths. The exports are horses, butter, wool, hides, oil, grain, dried fruits, and gum. — The bay is said to be free from rocks or shoals, and is capable of affording anchorage to the largest fleet. The harbour on which the town is situated, is a large irregular inlet, spreading out in westerly swamps, and choked with shoals. It is difficult of access, and has many other disadvantages, including a bar at the entrance. Sea-going vessels in general anchor outside the bar at the distance of about 3 m from the town.

SONNEBURG a tn Germany, Saxe-Meiningen cap. lat., in a narrow valley on the Rhine 34 m E.S.E. Muehlhausen. It contains a handsome church and townhouse, but is chiefly remarkable for the extent to which it carries on the manufacture of all kinds of toys, which, under the name of Sonneberg and Nürnberg wares, are known over Europe. A quarry in the neighbourhood produces excellent stones, and vast numbers of slate-pencils. Pop. 3783

SONNEBURG, or SUNKRANZ, a mining tn. Bohemia circle and N.W. Sax on the Erzgebirge. It is regularly built, has a church, townhouse, school and numerous mills, near it silver and iron are worked. Pop. 1643

SONNEBURG a tn. Prussia, prov. Brandenburg, gov. and 17 m N.E. Frankfurt, at the confluence of the Lanna with the Lantz. It has a church and a castle manufactures of woollen cloth a tale-work, and several mills. A great number of eels and cray fish are taken here. Pop. 3186

SONNEWALDE, a tn. Prussia, prov. Brandenburg, gov. Frankfurt, circle and 11 m S.W. Luckau. It has a church a town-school, an hospital manufactures of linen, cloth-works, and a trade in cattle, fax, and yarn. Pop. 1005.

SONNING, par Eng. Berks and Oxford 2615 ac. Pop. 8035.

SONOMA a post and port of entry U. States, California, cap. co. of its name. W. side Sonoma Creek, on N. shore of Bay of San Pablo, 50 m from San Francisco, in a rich agricultural district. Pop. (1853), 3200.

SONORA a tn U. States, California, on the Woods, a tributary of Tuolumne, 120 m. E. San Francisco. Pop. (1853), 4000.

SONORA a dep Mexican Confederation, bounded N. by New Mexico, belonging to the U. States E. Chihuahua and Durango, W. Coahuila, and W. the Gulf of California area, 123,406 sq. m. The surface in the W. and E. is generally flat, and in the latter direction contains a considerable extent of fruitful land watered by the rivers Mayo and Yaqui, and a number of small lakes which are formed on the flats during the rainy season, and are carefully used for irrigation towards the E. the cordillera of the Andes begins to rise, and ultimately attains great height in the Sierra Madre and other massive mountain-chains. In the mountainous district many fine and fertile valleys intervene, and rich mineral deposits have been discovered. The climate is warm throughout the year the thermometer ranging between 75° and 84° from April to September but in early spring rapid changes of temperature are common. The chief rivers, besides the Mayo and Yaqui or Hualqui, already mentioned, are the Rio-Grande de San Pedro, the Opasari, Sonora, and tributary Dolores, Guaymas San Ignacio Uila, and Colorado, the last forming part of the N. boundary. A large portion of the department is occupied by Indian tribes, some of whom have been converted to Catholicism, and submit partly by agreement but the greater part are wild and nomadic, and generally hostile to the whites, on whom they often commit great ravages. The trade of Sonora is chiefly carried on at Guaymas which has one of the best harbours in W. of Mexico, and at Pico, a great depot for the goods imported at Guaymas. For administrative purposes

it is divided into the two depts. Arizpe and Hermosillo, each with three cantons. Its capital is Ures. P. (1850) 189,874

SONORA a river, Mexican Confederation rises to N. of dep. Sonora, near lat. 28° N; flows first S.W., skirting the E. side of a cordillera, then nearly due W., past the town of Pico, and a few miles below disappears in an extensive lake. total course, 320 m. chief affluent, the Dolores.

SONSBECK, a tn. Rhinisch Prussia, gov. and 31 m N.N.W. Düsseldorf, on the Rhinebeck with a castle, and a Protestant and E. Catholic church; manufactures of woollen cloth, and articles in brass. Pop. 1386.

SONSBLA a tn. Spain New Castile, prov. and 11 m. S. Toledo. It has a townhouse, and prison a primary endowed school for boys, three private schools for girls, a parish church, a hermitage, and a presencio. Coarse cloths are manufactured and there are a chocolate mill, and several linen-dustilleries. Pop. 4087

SONSONAIE in Central America. See SANTA ANNA. **SONTHEIM** — 1. A tn. Württemberg circle Neckar near Heilbronn with a church and manufactures of saw-logs. Pop. 1014 — 2. A tn. Württemberg, circle Jax, near Heidenheim; with a church and a market. Pop. 1167

SONTUFEN a market tn. Bavaria, circle Swabia, at the confluence of the Oetzwach with the Iller 99 m E. Lindau. It has two churches, a castle, hospital and a brewery a blast-furnace, and other iron-works, several mines, numerous mills, and a trade in linen. Pop. 1863

SONTURA a tn. Hesse-Cassel Niederhessen, on a small river of same name, 24 m S.E. Cassel. It is entered by four gates contains a church and a castle, and has manufactures of woollen and linen cloth a paper and powder mill. P. 1746.

SONGOW ROO, a tn. China, prov. Kiangsoo, on a lake in the line of the Imperial canal, and in the furthest reaches, and most populous district of China, 125 m S.E. Nankin. It consists of the town proper surrounded by walls about 10 m in circuit, and of four suburbs of great extent together with an immense floating population and is completely inter-acted by canals crossed by numerous bridges, several of which are substantially built of granite. It is celebrated throughout China for the splendour of its buildings, the beauty of its terraces and gardens, the luxury and refinement of its inhabitants, and the excellence of its manufactures including silk goods, said to be superior in variety and richness to those of any other town in the empire. Linen and cotton fabrics, glass, lacquered ware paper and numerous articles in iron, silver wood, horn &c. The trade, both in these articles and in the general produce of the country is very extensive, and the signs of prosperity are everywhere visible, the whole road to Shanghai about 40 m. S.S.E. presenting a continuous range of towns and villages while the environs are covered with orchards, gardens, mulberry plantations, and highly cultivated fields of cotton, rice wheat, &c. Pop. and to exceed that of Nankin and Nankin not to be far short of 2,000,000

SOODAN, BOODAN, or BUDAN more correctly Berr or Bilal or Sudam the Land of the Blacks is the general name given by Arab writers to Negroland, where it confines on the desert, or to the countries along the N. frontier of the Sahara. The application of the name however, is often applied, and appears to vary in different authors, not so much owing, perhaps, to the political fluctuations of the African interior, as to different degrees of intimacy with the several commercial routes across the desert, though the relative importance of those routes must, doubtless, have risen or fallen with the power of the tribes who used them, and the prosperity of the trade to which they ministered

Berr or Bilal, estimated, were told from the Hills in the E. to the Atlantic Ocean in the W. that is to say, nearly across the African continent. But when the Arab writers proceed to details and attempt to describe the several nations occupying this long line, it is obvious that they omit altogether the Yolofs, Seracoles, Foulahs, and other nations dwelling on the Senegal. Towards the Atlantic their knowledge was bounded by the Magharwa, a Berber tribe, who occupied the coast near Arguin and the districts of the gum-forests. The most W. kingdom of the blacks (Boodan), as they faintly state, was that of Ghana, and Ghana was unquestionably near the W. head of the great river (the Zaira, Senegal or Quorra) and not far from the site of the modern Timbuctoo. Yet El Bekri in one of the earliest accounts of Ghana ex-

tant (of the 11th century), mentions Silla, which lies much higher up the river above Jendé (or Ghenné), whereas Ghinnawé (and Guisné) S.W. from Timbuctoo. The name Silla belongs to the language of the Mandingoes, who are thus recognized among the Soodan of this age. But early in the 13th century the Benue, a people of Mandingo race, conquered Ghinnawé, and founded Timbuctoo. They gave way, however, in a few years to the Mali, a people of the same race, whose original seat appears to have been Bambarra, on the Joliba. How long the Mandingoes remained masters of the chief commercial frontier of the Berre-Sudan we know not as Arab writers enable us to trace the empire of Mali during only a century and a half, but the title of Mali was still very eminent in the 16th century and is not yet quite forgotten. The people immediately S. of Ghinnawé were the Inkasé (Nikassé), the Kigoor of Gailat. The Kigoor or Nikasé language is that known to the tribes of the desert as the Songhay or Songay which extends from Jendé or Ghinnawé, on the Joliba, E. to Sai where the same great river, flowing S., takes the name of Quorra. It is, in short, the language of the country embraced by the great winding of the river, which flows N. from Jendé to the borders of the desert (near Timbuctoo) then running E. a few days' course S. or S.E. to Ghurmas and Nañ. The chief place of the country was Kaghé or Kaghé, on the river above Sai, of which little is known at the present day, though it will probably be found to exist still under the name of Gogoma. The river of Ghinnawé flowed, according to the Arabs, into the lake or sea of Quorra, and the river at N. or from Rabba downwards, is still called the sea. They added that a branch (the Tekadda, want E., which was supposed to join the Nile near this branch they placed the Yomzem or Lemlem, the wild people reputed to be cannibals, who though they seem to retreat before close inquiry are still connected by tradition with the hills of the Banuel (poor or peasant) in the House of Quorra. While the Beni ruled this part of Negroland they pushed their conquests E. beyond the river from Kaghé to Tekadda in the desert, where there were copper-mines. There can be no doubt that the name usually read Tekadda is the Tekidd of Dr Barth a little way N. of Agades. This movement of the Mali shows the early connection which subsisted between Kaghé and that part of the desert a connection proved also by the prevalence of the Songay language at Agades a remarkable fact pointed out by Dr Barth, who was materially however in his explanation of it, for he seems to regard Timbuctoo as the first source of that language, which was in reality diffused along the frontier of the desert from Timbuctoo to Agades, by the commercial activity of the natives of Inkasé, between Jendé and Kaghé. From this prevalence of one language at the chief markets on the S. borders of the desert, we are justified in drawing the important conclusion, that wherever the names Soodan, or Sudan, and Berre or Sudan, are used specially and not in a general sense they apply to the country and people embraced within the limits of the Songay language, that is to say, from Jendé to the W. to Agades in the E. or the whole frontier of Negroland lying between the terminations of two great routes across the desert, namely that from Tadmelt or W. ad N. and that from Tripoli.

The most E. nation of the Berre-Sudan mentioned by early writers, is Hamam which seems to have enjoyed an unimpeded superiority before Bornu rose into notice. Darfur and Kordofan, connected with Egypt from the earliest times were never expressly mentioned as parts of the Berre-Sudan though with Bergeou, Wadéy Senaar &c. they are often now designated under the name of Eastern Soodan. Mention is made of Guber, Zaggig, Kaid, Kwan, Nadi, &c. but the genuine name Hamam, under which these provinces are now included, never occurs. Makrél appears to have known Adana, on the Benue or Tekadda, and Umbarra, S. of that river. The country S. and S.E. of Inkasé or behind Dahomey and Assinie, was called Wangara—the name still given to it by the people of Hamam.

The recent explorations of Dr Barth show that the sources of the Benue (Tekadda) and Fero (his chief stream) are in the heights which send their waters in the opposite direction to the Gambia and Gambia, and that the country, as far at least as the chief peaks of the plateau, diversified only at wide intervals by isolated mountains of no great elevation nor do the accounts of the natives which reach some distance S.E., indicate anywhere the existence of chains of high mountains

With the campaign character of the country may perhaps be connected the wide diffusion of the Fallata, whose equestrian habits would exclude them from rugged and mountainous districts. These remarkable people are now known to extend in an almost uninterrupted chain of independent states, from the banks of the Senegal to those of the Benue in Adana, and report adds that they are not very distant from the White Nile in lat. 5° N.—(Jomard's *Asie, la Nigroland of the Arabs* 1841.)

SOODAN, two small places, Hesse-Cassel.—1. A town, prov. Hesse, circle and 9 m. W. S. W. Sehlthorn with a church, castle, and a mineral-spring. Pop. 1905.—2. A vil. Niederhessen, circle Wittenhausen. It has salt-springs, with works which produce about 3000 tons of salt yearly. Pop. 1905.

SOODEN, a watering place, Nassau dist. and 8 m. N. W. Höchst, in the vicinity of Frankfurt-on-the-Main. The springs, seven in number are of a chalybeate and saline nature and are said to have great efficacy in many disorders. The bathing establishment is complete and much frequented.

SOOKERTAL, a fortified town Hindostan prov. Delhi, 53 m. S. by W. Hurdwar. lat. 28° 28' N. lon. 78° 7' E.

SOOKULTERUT, a town Hindostan prov. Gujerat, 7 m. N. N. W. of Rajahmundry. lat. 21° 48' N. lon. 73° 12' E.

SOOLOO [Spanish *Jolo*] an archipelago Indian Ocean, between the Mindoro or Bonoe Sea on the N., the Calabes Sea on the S., the island of Borneo on the E. W. and that of Mindanao on the N. E., and between lat. 4° 44' and 6° 56' N. and lon. 119° 30' and 123° 30' E. length, S.W. to N.E., about 300 m. It consists of nearly 150 islands, most of them very small and divided into three groups named respectively after the three principal islands, Basilan in the N.E. Sooleo in the centre, and Tawee Tawee in the S.W. Basilan situated S. of the fortress of Zamboanga, on the S.W. extremity of Mindanao from which it is separated by a strait about 10 m. wide is of an oblong form about 43 m. long, by 6 m. broad, low towards the coast, but mountains toward the centre; well wooded, abounding in picturesque scenery and very fertile. The only other island of this group deserving of notice is Pias situated W. of Basilan, about 8 m. long N. to S. low and narrow in the S. but widening out and rising into mountains in the N. Sooleo of an elongated form stretching 30 m. from E. to W., with a breadth of 5 m. to 10 m. has an elevated surface rising occasionally into mountain of remarkable appearance, abounds in magnificent scenery and is both well wooded and fertile. Among the valuable timber-trees are teak and sandal wood and among the fruit trees are areca nut, banana, mangoes, and coconuts. Wild boar and deer are common, and oxen, swine, goats, and poultry are very abundant. The fishing along the coast is very productive, and employs a large number of the inhabitants. The principal town of same name also called Song situated on the N.W. coast has a good roadstead, with anchorage in 18 to 20 fathoms on a loose sandy bottom is defended by several forts mounted with very defective cannon and though generally composed of huts, has a stone house of more substantial appearance among which are the sultan's palace, a small mosque, a tomb called that of Shah-Sabab, and the residences of several datus or chiefs. The trade of the whole island centres here and is carried on to some extent with Manila, but one of its most important items is the produce of piratical expeditions to which the inhabitants are much addicted. Pop. of town, 6000. The other chief islands of this group are Palla on the S. and a small group called the Tawee Tawee on the S. S. W. Tawee-Tawee, the last of the three principal islands is situated near the peninsula of Usang, forming the N.E. extremity of Borneo, is about 85 m. long N.E. to S.W.; has a very elevated and mountainous surface, making it visible at the distance of above 30 m., is densely wooded, and has a large lake, called Boe-dato situated near its centre. Another lake, or rather arm of the sea, situated in the S.E., and called Dongon, forms an admirable natural harbor and its only port. Very little is known of this island, but the system on its coasts and shores of several other of its islands, are said to contain excellent pearls. The whole of the Sooleo archipelago is under the sway of a despotic sultan, and the inhabitants, originally of Malay origin, of the kind to which the Spaniards of the Philippines apply the common name of Moros, are generally represented as cruel and treacherous. Their aggregate pop. is estimated at 200,000.

SOOLOO SEA. See **MONONOE SEA.**
SOONDA, a ruined Hinduoostan, prov. Bajasoor lat. 14° 43' N; lon. 74° 58' E. According to native authorities this town was 3 m. each way within the walls and fully occupied with houses. The outermost wall was estimated by the natives to have been 48 m. in circumference and there were formerly three lines of fortifications around this city. It is related now to less than 100 houses.

SOONKEL, a Hinduoostan, prov. Malwah, 80 m. N. Oyo lat. 24° 35' N lon. 75° 56' E. It is a place of considerable extent, and of a square form, having two broad streets that cross each other at right angles.

SOONERONGON a decayed city Hinduoostan, on an arm of the Brahmaputra, 13 m. S.E. Dacca, lat. 23° 39' N lon. 90° 43' E. now reduced to a mere village. It was formerly celebrated for the manufacture of a beautiful cloth, called *casas*.

SOONGARIA, TCHOONGARIA, or TCHOONGARIA (Chinese *Tsao-sheng-sha*) a country Central Asia, forming part of the Chinese Empire, between lat. 41° 30' and 48° 40' N, and lon. 75° and 90° E. and bounded N by the Russian govs. Omsk and Tomsk; W by the Bourtous and Kirghis of the Great Horde, S. several ranges of mountains, of which little is known. It is divided into three military divisions—III in the S W. Kour-Kara-Omsou in the centre, and Tarbagatai in the N E. The southern consists chiefly of an elevated and almost desert plateau surrounded and partly intersected by lofty mountain-chains. Numerous rivers descend from the mountains, but many of them before attaining much magnitude disappear in the sands of the desert or empty themselves into the lake. Of these the largest, though only a minor portion of it belongs to this territory is Balkash Nor or Tongus. The largest of the others are Issik-Kul or Temoukour Nor in the S W. Kourgha-Nor, Kaiter Ouk-Nor and Avar-Nor towards the centre, Kural Bacha Nor in the E. and Zassan in the N E. Large tracts are altogether or nearly unfit for human habitation, but some of the plains and many of the valleys, are covered with good pasture, on which numerous nomadic tribes feed their herds. In all the three divisions considerable tracts are under cultivation, and produce grain of different descriptions, chiefly millet and barley. N of the II, which is the principal river of the division of its name, and flows W N to the S extremity of Lake Tongus, extensive forests occur towards the E. are many marshy tracts covered with reeds, and furnishing shelter to numerous wild beasts. The domestic animals are principally camels and buffaloes. Among the minerals are gold, copper, iron and it is said also coal. Salt is obtained in abundance, both from salt-lakes and from mines. Soongaria was originally inhabited by the Os, who, who appear to have been completely distinguished from the neighbouring nations by having blue eyes and red hair. About the 6th century they were expelled by the Turks, who after remaining masters for several centuries, were obliged to yield to the victorious arms of Genghis-Khan and his Mongols. The Mongols became divided into two great divisions—Mongols proper and Eleuths or Calmucks. The latter long were held in subjection by the former but at last the Calmucks threw off the yoke and one of these tribes, called Soongars or Soongarans, having greatly distinguished themselves, gave their name to the country. About the end of the 17th century the Emperor of China, after a long and bloody war effected the subjugation of Soongaria, and, in 1754, rivetted his authority more firmly by putting down an insurrection in which 1,000,000 Eleuths are said to have perished. Since that period Soongaria has been treated as a Chinese province.

SOONTH a tn and fort, Hinduoostan, prov. Gujerat, 80 m. E. by N Ahmedabad, lat. 23° 13' N lon. 73° 55' E. The fort is built on the W face of a low rocky hill, and contains a curiously-constructed palace.

SOONWALD an elevated plateau Germany, which belongs to the Hinderwick, a ramification of the Vosges, and terminates abruptly on the I bank of the Rhine, near Rheinfelden.

SOOTY, a tn. Hindostan, prov. Bengal, 80 m. N N W Moorshedabad, lat. 24° 25' N lon. 88° 2' E. In 1768 the British troops here defeated those of Meer Cassim.

SUOVAR, SALINSBURG, or SLANA a market tn. Hungary. Hither Thelae, co. Baran, 3 m. from Epries; with two churches and a castle. It is famous for its salt-mines. F. 1823.

SOPHIA, or THIAPISTRA, a tn. Turkey in Europe, Bulgaria, cap. metropolis of some name, in a plain on the Bugeina, an

affluent of the Iskar, near the foot of the N side of the Balkan Mountains, 810 m. W N W Constantinople. It is a large but very indifferently built place, consisting for the most part of mean houses, and narrow uneven, dirty streets; in the sea of a Greek archbishop, and a Catholic bishop and has several mosques, elegant public baths, very extensive bazaars, and a considerable trade, chiefly in the hands of the Greeks and the Russians. There are thermal springs in the vicinity. Sophia was built by the Emperor Justinian, on the ruins of the ancient Sardica. Pop. about 50,000. — **THE NARAI,** about 270 m. long N W to S E with a maximum breadth of 100 m. has a mountainous surface, covered by ramifications of the Balkan, one of which here forms a water-shed between the basins of the Black Sea and the archipelago. In the valley the climate is mild, and the soil fertile, producing much wine, corn, rice, tobacco and flax; the pastures feed great numbers of cattle and sheep, and the mountains are clothed with forests of excellent timber.

SOPHIA (Ss) a tn. Russia, gov. and 17 m. S St. Petersburg, with which it communicates by railway. It contains a remarkable church, built in imitation of St. Sophia at Constantinople. Has manufactures of linen and near it is the imperial palace of Tsar Nicholas. Pop. 700.

SOPLEY par. Eng. Hants; 4400 ac. Pop. 890.
SOPONYA a vil. Hungary. Thither Danube, co. and 8 m. from Szilvasszentgyorgy in a fertile district. It has a Protestant church, and a trade in sheep. Pop. 1600.

SOPORNYA a vil. Hungary. Hither Danube, co. and about 12 m. from Neutra, on the Vag, with a church, and a trade in corn and timber. Pop. 1178.

SOPOTNICE, or SONOTNICE, a vil. Bohemia, circle Kladyska, 20 m. from Hohenemsuth. It has a church, a mill and a trade in corn cattle, and denim. In 1884 a remarkable landslide took place here. Pop. 1125.

SOPWORTH, par. Eng. Wilt; 1011 ac. Pop. 220.

SORA a tn. Naples, prov. Lavoro, in a fertile plain. r. bank Lari, which bends round the town, and is here crossed by two bridges, 15 m. E N E Frontino. It is walled, defended by a castle, and tolerably well built. The principal offices are the cathedral, which is a noble structure; three collegiate and two parish churches, two monasteries, and a nursery two seminaries, and a school for *belles-lettres* an hospital and two almshouses. The manufactures consist of woollen cloth and paper. Sora is the see of a bishop and seat of a court of justice. Cardinal Hieronymus, author of the annals which bear his name, was born here. Pop. 8000.

SORAGNA [Latin *Soroceni*], a tn. and com. duchy and 18 m. N W Parma, with a parish church, a large and magnificent palace, with marble sculptures, fine gardens a primary school, an almshouse, and an orphan hospital. F. 5312.

SORANO a vil. and par. Tuscan, comp. Grosseto, 5 m. N E Pitigliano. It is walled and has a collegiate church, a school and manufactures of salt-petre. Pop. 1063.

SORATA, a tn. Bolivia, in the Andes, dep. and 57 m. N W La Paz, prov. Laracaia, 8850 ft. above sea-level, with an agreeable temperate climate, reputed healthy. Pop. 1300 or including canton 3000. A few miles S are the two peaks of Sorata, the one 14,043 ft. and the other 13,366 ft. high.

SORBAU a tn. Prussia, prov. Brandenburg, gov. and 50 m. S.E. Frankfurt. It is walled, flanked with towers, well built, and has two castles, two Protestant parish churches, three chapels, a gymnasium, lunatic asylum, orphan asylum, and two hospitals and manufactures of woollen and linen cloth, hosiery, leather tobacco, and carriages a sugar-refinery dye-work, and worsted-mill. Pop. 7801.

SORIANO-DE-ROMAGNA, a vil. and com. Tuscan, comp. Florence, r. bank Savio. It has a church, a castle, and a trade in chestnuts and cattle. Pop. 1014.

SORRAB, a tn. Spain, Andalusia, prov. and 26 m. E.N.E. Almeria, on an eminence rising perpendicularly from the centre of the natural basin to the height of about 50 paces. It is ill built, and has a square containing the parish church, the conthouse the granary, the prisons, and the palace of the Duke of Velazco and Alva. There are also a poorhouse, three primary schools a bowling-green, the ruins of a Moorish fort; and manufactures of coloured pottery-ware, of which great quantities are sent to Jaen, Murcia, and Granada, as well as shipped at Almeria, also weaving of linens and serges. F. 5920.
SORBIK, par. Scot. Wigton; 6 m. by 6 m. Pop. 1896.

SORBOLO, a vil. and com. duchy and 7 m N E Parma, on the Enea, with a large church, two primary schools, and a trade in corn, wine, hemp, rice, and cattle. P 8397

SORDEVOLO, a vil and com Italy, Piedmont, div Turin, prov and 6 m W N W Biella, near I. bank Ingauna. It has two small squares and a church. Pop. 2137

SORDI, a small isl. off W end, Crete, lat 34° 54' 15" N; lon. 23° 37' 15" E.

SOREL, or WILLIAM HECKY, a in Lower Canada, co. Richelieu, at the confluence of the rivers Richelieu and St. Lawrence, 45 m. from Montreal. It is well laid out, and is the principal market of one of the most productive districts of Lower Canada. Ship and steam-boat building are extensively carried on, and most of the steamers which ply between Montreal and Quebec and the intermediate ports are laid up here during the winter it being the safest port, and least incommoded by ice, which runs between Kingston and Quebec. During the last war with the U States, Sorel was the head-quarters of a considerable military force, and the imperial government are still possessed of extensive barracks here, but no military are now resident in them. There are two R. Catholic churches and a convent, an Episcopal church, and several good schools. Pop. (1868) 8424.

SORELL CAPE, Van Diemen's Land, W side of the entrance into Macquarie harbour lat. 42° 10' S. lon. 115° 11' E.

SOREMBE, a m. and com Italy Lombardy, prov and 14 m. N W Cremona, beautifully situated at the foot of Monte Carlo, among vineyards. It is well built has a court of justice four churches a nunnery an hospital two schools and a trade in corn, mustard, and excellent flax. P 7749

SOREZE a in France, dep Tarn on the Sor 85 m. S. Alby. It long formed an important stronghold of the Protestants, but its fortifications were razed in 1629. It contains an old abbey of Benedictines, the buildings of which have been converted into a college, which has acquired considerable celebrity, and possesses an observatory chemical laboratory cabinet of natural history, and botanical garden. The surrounding country consists of woolen and cotton weavers, and there are several tanneries and cotton-mills. In the neighbourhood is the vast reservoir of St. Ferreol constructed as a feeder to the canal du Midi. Pop. 1559.

SOROGONO a vil. and com. isl. Martinica div Ceglaxel, prov and 7 m. E. S. E. Bouchel, on a hill, in a healthy but somewhat malarious district. Pop. 1186

SOROGOR a vil. Philippines, isl Luzon, prov and 30 m. S. B. Albay lat. 12° 53' 12" N lon 123° 52' E. (a.) on a large land locked bay of same name, presenting secure anchorage for large vessels. Some boat-building and rope-making are carried on.

SORGUES two small rivers France. The one rises in dep. Aveyron flows W N W., passes St. Afrique, and joins R. bank Dordogne, after a course of above 30 m. of which 18 m. are used for floating. The other, formed by the celebrated fountain of Vaucluse, in the dep. of that name, flows first W then N W., and about 4 m. N Avignon, joins an arm of the Rhone, after a course of 24 m. It is much used for irrigation.

SORGUES, a vil France, dep. Vaucluse, on the Sorgues here crossed by a remarkable bridge, 6 m. N Avignon. It is walled, contains the remains of an old castle, built by the popes in the 14th century; and has manufactures of madder, a paper mill, and some trade in wine. Pop. 2226.

SORI, a vil and com Italy Piedmont, div Genoa, near Recco, on the Gulf of Genoa. It has a small but richly decorated parish church, with some good paintings. The inhabitants are almost all fishermen or sailors. Pop. 1969

SORLA a prov Spain, Old Castile, bounded, N by provs. Burgos and Logroño, E. by Burgos, S. Guadalupe, and W. Segovia and Burgos area. 5770 sq. m. This is the most cold, arid, and rugged district in the whole peninsula, for the predominate of the central line of the Pyrenees, which forms the N and N E boundary, sends out innumerable branches, which alternate with valleys, glens, and mountains of the second and third order, presenting altogether scenery of a grand but not very pleasing character. In some places are forests of pine, beech, and oak, as well as an infinity of aromatic and medicinal herbs; while in others are abundance of fine pastures, which maintain a considerable number of sheep and horned cattle, and some swine but the most striking

ing objects are barren hills, quite devoid of vegetation, where the snow remains the greater part of the year. In general the soil is not fruitful, neither producing grain nor vegetables of a good quality, nor in sufficient quantity for the consumption of the inhabitants, although there are tracts of rather fertile land in the neighbourhood of Sarla, the capital of the province, Alcañiz, Orens, and Madriaga. The Duero, Godesco, Quilete, San Pedro, Cornago, Alhambra, Avion, and other streams, take their rise in this province, and it is also watered by the Tago the Tago, &c. Agriculture employs the greater part of the population, but the labours of the field in many places are left to the women while the men employ themselves in preparing charcoal cutting and sawing timber, and making furniture and implements of pine. Rearing cattle forms another branch of industry but there is a great falling off in the production of fine wools. For want of roads, Sarla has little communication with the other districts of Spain, and accordingly there is scarcely any commerce, the only article of consequence exported being timber for Madrid and Aragon. As regards crime, Sarla possesses an unsavoury distinction, when compared with most of the other provinces of Spain. P 140,000

SORIA, a city Spain, cap. above prov., 118 m. N E Madrid, on an irregular eminence, R. bank Duero, over which there is here a fine bridge. The houses are generally two and three stories high streets commodious, well paved, clean, and generally provided with sewers, the principal ones have arcades, and the town is well lighted. There are six squares, in one of which stands the town-hall, with prisons attached, and is another the gigantic statue of the counts of Gomara, a substantial edifice in the Gothic order, which among other remarkable things, has a stable large enough to accommodate a squadron of horse. Soria has also several parish churches, a founding and a civil and military hospital, a very handsome theatre, various educational establishments among other a normal school and a college, a J. unit college, which now serves as barracks, several convents, also converted to secular uses and two nunneries. Agriculture, and the preparation of exquisite butter-cakes are the chief occupations; and there are flour-mills, tanneries, dye-works, potteries, a brewery, &c. and a trade in fruit, sheep, wool wood &c. This city is still surrounded with its walls, which were razed in 1290 and are well preserved. It was sacked by the Moors in 1608. The famous Numantia is said to have been 4 m. from Soria. Pop. 6400

SORIANO a in Naples, prov. Calabria-Ultra II, dist. and 8 m. S. E. Monteleone, with a convent. Pop. 2500

SORIASCO a vil and com Italy Piedmont, div and 94 m. N N E Alessandria with a court of justice, a parish and an auxiliary church, and two palaces, one of them in a ruinous state. Pop. 1662

SORISOLE, a vil and com Italy Lombardy, prov and 2 m. N W Bergamo, at the foot of Monte Carlo with a large and handsome church, tile-works, and lime-kilns. Rock salt and coal are mined in the neighbourhood. Pop. 1617

SORN, par Bent Ayr 64 m. sq. Pop. 4174.

SORSE (Latin, Sors), a in Denmark isl Zealand, cap. hael and on a lake of same name, 44 m. W S. W. Copenhagen. It has an excellent richly endowed academy in a flourishing condition. Pop. 850

SORSE an isl Norway prov Fimmark lat (W point) 70° 29' N lon 21° 20' E. (a.) a few miles from Hammerfest, and separated from isl. Roeland by Sorse Sound. Its coast is very much indented, length, 18 m., breadth, 6 m.

SOROKA two places, Russia — 1. A. in gov and 185 m. W Archangel, on an isl of the White Sea, in the mouth of the Vag, which here forms several picturesque cascades. It is a clean, well-kept place; has a small harbour, and carries on an active salmon and herring fishery. Pop. 800 — 2. A. in prov. Bessarabia, cap. circle, R. bank Dniester, 86 m. N N W Kishinev with three churches, a synagogue, a monastery, and an active retail trade. Near it much salt-petre is obtained.

SOROKBAR, a market in Hungary Hither Danubius, co. and 8 m. from Pesth. It has a R. Catholic church, and a trade in corn and cattle. Pop. 8518.

SOROTCHINEKALA, a Russian fort gov Orenburg, 1. bank Samara, 180 m. S. S. W. Ufa. It is the most important of the forts which line this river; is enclosed by a fine earthen rampart, and a wooden wall, flanked with towers and has a church, barracks, and extensive magazines. The number of houses is about 200

SORRENTO [*anc. Sturionia*], a tn. and seaport, Naples, prov. and 17 m. S.S.E. Naples, S. shore, Gulf of Naples. It has about walls, flanked with towers; and besides occupying a beautiful site and possessing a fine climate, is clean and well built. It is the seat of an archbishop and contains a cathedral and six other churches, seven monasteries, three nunneries, a college, seminary, and hospital, and has considerable manufactures of silk. In ancient times it was famous for its wine, but its present produce is very indifferent. It carries on an active trade with the capital, supplying it with oil, milk, cheese, and veal of all which, but particularly the last, are excellent. It is the birth-place of Turgotano Tasso. P. 8000.

SORSO, a tn., *el Sordana*, div. and 7 m. N.N.E. Sassari, near lake Pistanza, a large sheet of water abounding with eels and mullet. It has a large baronial palace, in a dilapidated state, a fine fountain, with pilasters and sculptures, and a trade in corn, wheat, and tobacco. Pop. 4000.

SORTELLA, a tn. and par. Portugal, prov. Beira-Baixa, com. and 19 m. S. by E. Guarda, on a lofty height near the source of the Coa. It is walled, and defended by a castle and contains a Latin school, and an hospital. Pop. 850.

SOREVILLAN a vil. Spain, Andalusia, prov. and about 40 m. from Granada, 4 m. from the Mediterranean, with a church, courdouses, numerous school, several distilleries, and a trade in bread. Pop. 1640.

SORS, a tn. Spain, Aragon, prov. and 56 m. N.W. Saragossa, on two eminences at the foot of a lofty hill. It possesses much importance in a military point of view from its lofty position, its strong old walls, its very ancient citadel, planted on a rock in the centre of the town and a magnificent tower of the most solid construction towards the W., once regarded as impregnable. The houses are of moderate height, streets are narrow and steep, but well paved. It has a town-house, college with about 300 pupils, a school for girls, an hospital, a church, a convent without the walls, and various monasteries and hermitages. On the S. stands a fine Gothic palace, belonging to the Marquis of Campo Real which served as a residence to the governors and in which Ferdinand the Catholic was born March 10, 1452. Agriculture, weaving pottery, wax-chandlery, pressing oil, and grinding corn are the main occupations. Pop. 2375.

SORA a vil. Saxony circle Zwickau, 6 m. W.S.W. Schwarzburg with manufactures of articles in iron and tin, two steam works, several saw and other mills, and a trade in lace. Pop. 1750.

SORDIA, a vil. Hungary, Töltsch Thelcs com. Temevar, 12 m. from Datta, with a Greek church. Pop. 1167.

SORSIO (Sas) a tn. Naples, prov. Principato-Ultra, dist. and 7 m. S.E. Arzano. Pop. 1950.

SORSNA two rivers, Russia.—1 (*Dnestro*, or *Prut*) flows E. from Malo-Archangelsk, gov. Orel flows N.E. and after a course of about 140 m., joins r. bank Don.—2 (*Zilka*, or *Quetz Chon*), rises in the W. of gov. Voronezh and flowing N.E. joins r. bank Don; total course, 110 m.

SORSNILLA, a tn. Russia, gov. and 59 m. E. Casanov at the confluence of the Uda with the Tura. It has 10 churches, and a trade in corn and cattle. P. (1849) 4895.

SORPELLO a tn. France, dep. Alpes Maritimes, 17 m. N.E. Nice, on the Berre. It possesses several public walks, is the seat of a superior court and has a handsome church, a college and gymnasium, several schools a convent, and an hospital. Pop. 4384.

SORTE, a tn. Naples, prov. Calabria-Ultra II S.S.W. Catanzaro, with manufactures of common woollen stuffs cotton and silk are raised in the neighbourhood. Pop. 1600.

SORTE (Sas) a tn. Naples, prov. Calabria-Ultra, S.S.W. Casertovillar, with two churches. Pop. 1890.

SORTIGNO a vil. and com. Italy, Piedmont, div. Turin, prov. and about 12 m. E.N.E. Biella, on the side of a fertile hill. It has two churches. Pop. 1421.

SORVA, two rivers, Russia. The one rises in the N. of gov. Perm on the E. slope of the Ural Mountains; flows first easterly S.E.E. then E.N.E. into gov. Tobolsk, and after a course of about 180 m., unites at Polmak with the Polm forming the Tardva. The other rises in the circle of Perm, on the frontiers of Perm and Tobolsk, flows first N., then E. then N.N.W., and after a course of about 360 m., joins L. bank Uda, at the town of Berzov. Its chief affluents are the Melia, Nerva, Bogutka, and Bogutika.

SUT DE-TRAMAZ, a vil. Spain, Valencia, prov. and about 30 m. from Castellon-de-le-Plana. It is regularly built, has a church, a very indifferent court-house, a primary school, and a prison, occupying part of the buildings of an old castle, oil and flour mills, and a trade in corn, wine, and fruit. P. 1891.

SUTRY, par. Eng. Lincoln, 1690 ac. Pop. 153.

SÜTHERN, a vil. Oldenburg, princip. Birkensfeld, near Bokshiden; with a church and two mills. Pop. 1083.

SUTHERTON, par. Eng. Suffolk; 1080 ac. Pop. 253.

SOTILLO DE LA ANDRADA, a tn. Spain, Old Castile, prov. and 9 Avila, with a church, court-house, and primary school; oil and flour mills, and a trade in silk. Pop. 1049.

SOTUMOC, numerous places, Spain, particularly—1 (*de Camero*), a vil. Old Castile, prov. and 17 m. S. Logroño, on the Luma, here crossed by a bridge. It has two squares, a church, a good hospital, two endowed primary schools, and several hermitages, manufactures of cloth, chiefly black and brown, seven works for spinning wool, 13 fulling-mills and dye works, and three flour-mills. Pop. 2521.—2 (*de Lezula*), a vil. and par. Asturias, prov. and about 28 m. from Oviedo, on the Bay of Biscay, near the Quejudo, here crossed by a bridge. It has a church and a primary school, a fishery, and several flour-mills. Pop. 1800.—3 (*de Lezula*) A vil. prov. and about 25 m. from Leon with a church, a pri. and a school, a flat, oil, and two flour-mills and a trade in corn and flax. Pop. 1485.—4 (*de Amio*), A vil., prov. Leon, near Murias-de-Paradise. Pop. 994.

SOTO-LA MARUA a small seaport, Mexico dep. Tamaulipas, 20 m. N.E. Tampulco 1 bank river of that name, near its mouth, where there is a harbour frequented by a bar. It is composed chiefly of Indian huts. Pop. about 8000.

SOTOANNE a group of the Caroline Islands, near lat 5° 30' N. lon. 155° 30' E. It consists of more than 60 islets connected by reefs, enclosing a lagoon, with openings into it. All the islets are covered with woods and appear to be uninhabited. They extend over an area about 17 m. long, by 12 m. broad.

SOTOMAYOR (SAN SALVADOR) a vil. and par. Spain, Galicia, prov. and 7 m. S.E. E. Pontevedra with a church, townhouse, old castle, and primary school. Pop. 1730.

SOTTEGEM a tn. and com. Belgium, par. E. Flanders, 124 m. S. by E. Ghent; with a good market-place, a church, chapel, townhall, prison, musical society several schools, and manufactures of linen, woolen, and cotton fabrics; leather, soap, candles, tobacco distillery, and oil. Pop. 2186.

SOTTERLEY, par. Eng. Suffolk, 1590 ac. Pop. 237.

SOTTEVILLE-LES-MOULINS a vil. France, near Rouen as to be properly one of its suburbs with manufactures of soap, glass, chemical products and several spinning-mills. P. 3877.

SOTTO MARINA, an *isl.* Italy Venetia. It is one of the low, long, and narrow islands which separate the lagoons of Venice from the Adriatic Sea. Its greatest length, 5 m., breadth, little more than 1 m. The town of Chioggia stands on its N. extremity and a long stone-wall 22 ft. thick, but now much dilapidated protects it imperfectly against the waves.

SOTWELL, par. Eng. Berks, 701 ac. Pop. 138.

SOUDAN, *See* SOUDAN.

SOUDJA, or *SUDJIA*, a tn. Russia, gov. and 54 m. S.W. Kozlov, in a low and unhealthy situation. It contains eight wooden churches, and several charitable endowments and has a salt-petre-work, and an annual fair. It is surrounded by numerous orchards and kitchen gardens, in which the inhabitants find their chief employment. Pop. (1849), 2776.

SOUFFLENHEIM or *NUTEN*, a tn. France, dep. Bas-Rhin, about 20 m. N.N.E. Strasbourg; with manufactures of fire-brick. Pop. 8065.

SOUILLAC [*anc. Solacius*] a tn. France, dep. Lot, in a fertile valley, r. bank Dordogne, here crossed by a bridge of seven arches, 22 m. N. Cahors. It is generally well built, has a court of commerce, the remains of a Benedictine abbey; manufactures of coarse woollens, agricultural implements, and iron-ware, and a trade in wine, tobacco, leather, salt, cattle, and ship-timber. Pop. 2248.

SOUKOUUM KAZI, or *SOUKOUKATZ*, a tn. and fort, Russia, in Abkhaz, on the Black Sea, S.E. Anapa. It was a place of some importance, and is supposed by some to be the ancient Sochetopolis. It was fortified and garrisoned by the Russians, but was evacuated in the war of 1854-5. The trade is chiefly in salt and furs.

SOULBURY, par. Eng. Bucks; 4460 ac. Pop. 528.

SOULDERN, par Eng. Oxford, 1451 sa. Pop 619
SOULDEROP, par Eng. Bedford, 1390 sa. Pop 267
SOULTZ, or **SOULTZ-LA-VILLE**, a tn. France, dep. Haut-Rhin, 13 m. S.E. Colmar. It is entered by three gates, is tolerably well built, has a handsome townhouse, and a church with an elegant spire; manufactures of woollen cloth, hosiery, silk-ribbons, and black-scap a glassfield, paper-mill, and several tanneries. Pop. 8000

SOULTEMAT, a tn. France, dep. Haut-Rhin 10 m. S.E.W. Colmar, with some mineral-springs, manufactures of muslin, and several cotton-mills. Pop. 2475

SOUMAGNE, a tn. and com. Belgium, prov. and 7 m. E. Liège, with a church, and two primary schools, inhabitants chiefly sailors and colliers. Pop. 2468

SOUMBOU, one of the Kevile mts., about 10 m. S.E. W. Cape Lopatka, the S. extremity of the peninsula of Kamtschatka. It is about 10 m. long N to S, and from the number of shoals between it and Cape Lopatka, is supposed to have been once united to it. Its centre is in lat. 56° 46' N. lon. 156° 26' E.

SOUMY or **SUMY** a tn. Russia, gov. and 83 m. N.W. Kharkov, r. bank Poul at the confluence of the Soumy and Soumki. It is surrounded by earthen ramparts and a fosse, and defended by a citadel; contains two stone and eight wooden churches, and several almshouses, and has numerous distilleries, a trade in brandy, corn, and other agricultural produce, and four large annual fairs, which attract great numbers of dealers from distant quarters. P (1842 11 712).

SOUMY a lake, Esthonia, in the W. part of gov. Tomsk, near r. bank Irtysh, length N to S, about 55 m., breadth, about 55 m. It communicates on the E. with Lake Tchary.

BOUND (Tas) or **OKANAGAN**, a strait which connects the Kootenay and Balise Seas, and separates the Danish island

greatest breadth, measured from Copenhagen eastward, is 17 m. The name of Bound however, is properly confined to the comparatively narrow part of the passage which, between Elsinore and Helsingborg, has a width of only 3 m. Though the Great Belt affords a much wider and deeper communication between the Kattegat and Baltic, the Sound is that almost universally selected by vessels, partly because it is the shortest, and partly because there is a greater probability of meeting with favourable winds. The depth of water varies from 4 to 20 fathoms, but the channel, to which the name of deep or rume is given, is bounded on both sides by shelves and quicksands, which make the navigation dangerous. The clearest passage is on the Danish side, and by almost immemorial custom, sanctioned by treaties and finally confirmed and regulated by the Congress of Vienna in 1815, all merchant vessels passing the Sound must anchor at Elsinore and pay duty. The sum paid is not so serious as the delay which often occasions the loss of a favourable wind. About 18 000 vessels, aggregate burden about 8,000 000 tons, pass the Sound annually.

BOUNG a seaport, Indian Archipelago. See SOOTOO

BOULET (St.) a tn. France, dep. Nord, 15 m. S.E. Cambrai with manufactures of muslin, shawls and marines.

BOURABAYA, Java. See BORABARA

BOURAJ a tn. Russia, gov. and 55 m. N.E. Vilna, with a Greek united church, a synagogue, and some transit trade. Pop. 3000

BOURBOURG a vil. France, dep. Bas-Rhin, 11 m. S. Wissembourg, with manufactures of woollen cloth. 1 2081

BOURDEVAL, or **BOURDEVAL-LA-BARRE**, a tn. France, dep. Manche, 30 m. S.E. St. Lo, with a beautiful granite fountain, manufactures of cutlery and hardware, and numerous paper-mills. Pop. 1346

BOULE, a tn. and par. Portugal, prov. Trasmadura, r. bank river of same name, 17 m. S.W. Coimbra, with two churches, a Latin school, and an hospital. Pop. 9870

BOULIE, two places Brann!—1 A tn. prov. Bahia, 40 m. W. Itapicuru, with a church and a primary school.—2 A tn. prov. and 16 m. from Coara, r. bank Coara. It was originally founded by the Jesuits, with Indian converts and has a church, and townhouse with prison. Pop. under 1200

BOULTON, par Eng. Devon; 5018 sa. Pop 615

BOLSA or **BONA**, a seaport, regency and 10 m. S.E. Tunis, lat. 36° 47' N. lon. 10° 52' E. It admits vessels of the largest size, but is exposed to the violence of E. winds. Pop. 10 000

BOUTI BRAINE (La) [anc. Sudterraine] a tn. France, dep. Creuse 24 m. N.N.W. Guéret, on the Bedelle. It has an ancient parish church, manufactures of linen, and a trade in thread and hemp. Pop. 1966

SOUTH AUSTRIA. See ACHERAZIA (BOTTI)

SOUTH BEND a tn. U. States, Indiana, and so called from its situation on the S. bend of the St. Joseph, 120 m. N. Indianapolis. It is increasing rapidly and has a court-house, jail, four churches, and a county academy, all built of brick; manufactures of woollen cloth, tools, and agricultural implements; an oil and two large flour mills. The Michigan Southern, and the Northern Indiana railways connect it with Chicago. Pop. 1800

SOUTH LAPE, the most S. point of Van Diemen's Land; lat. 48° 40' S.

SOUTH CAROLINA. See CAROLINA

SOUTH EAST ISLAND 17 m. lat. Louisville Archipelago, lat. S.E. point 17° 55' S., lon. 165° 43' E. 41 m. long, and 10½ m. broad at its greatest width. Its N. coast is highly indented, but there are several marked bays and promontories on the S. coast. Near the centre of the island, on this coast, occurs an isolated peak, 2689 ft. high. The *Sparganium dilatatum* or phalaris-plant, and two ferns (*Equisetum*) 15 ft. high, with a diameter at the base of 8 inches are abundant. Wild pigs are numerous and birds plentiful, including a very handsome scarlet lory, small green-coloured paroquets, and pigeons. The natives of this island and of those adjacent point their bodies, using as pigments powdered charcoal mixed up with cocoa-nut oil and lime obtained from burnt shells. The most common fashion of painting is with a broad streak down the forehead, and a circle round each eye. Occasionally the entire body is blackened, but often the face only with dashes of paint on the temples, cheek, and round the

of Seeland from Sweden. Taken in its largest sense, as including the whole range of the Swedish coast from Kullen to Zelesterbo, its length, nearly due N and S., is 66 m., and its

south, and one or both eyes, giving them a hideous appearance. The women are represented as very unfavourable specimens of their kind. They wear a short petticoat of grass-like stuff worked into a narrow band, which thus round the waist. They are reserved in their behaviour.—(Vop. of Baffinland.)

SOUTH HILL, par Eng Cornwall; 3459 ac. P 730.
SOUTHAMPTON, par Eng. Norfolk; 2492 ac. Pop. 94.
SOUTHAM, a market to, par Eng. Wilt. co. Warwick. The town, 10 m. E.S.E. Warwick, on bank Watergall, across which there is a neat stone-bridge of two arches, has a parish church, with a fine tower and spire and a chapel for Independents, an eye and ear infirmary, a handsome building, and the national school-house, a large and tasteful Gothic edifice. Area of par. 2770 ac. Pop. 1771.

SOUTHAMPTON, HAMPSHIRE, or HAMPSHIRE, a maritime co. England including the Isle of Wight (which is) bounded,

E. by Surrey and Sussex, W. by Wilt and Dorset, N. Berkshire, and S. the English Channel area, 1,040,000 ac., of which about 900,000 ac. are supposed to be arable, meadow, and pasture. The surface is beautifully varied by hill and dale, adorned with numerous seats and villages. The valleys are for the most part fertile but the soil generally is indurated, the greater part being sandy or gravelly with chalky hills, and extensive tracts of heath. The N. part of the county from the borders of Berkshire to Basingstoke, is particularly unproductive, being covered with a brown heath, some parts of which, however, have been brought into cultivation. The S.W. part of the county again is occupied chiefly by the New Forest, and by extensive heaths. The really good lands are thus confined almost wholly to the central parts where the soil is rich, and heavy crops are obtained. The climate is remarkably mild, and in the highest degree favourable to vegetation. The principal crops are wheat, barley, oats, beans, and a few pease. Turnips also are extensively cultivated on the lighter soils. Along the coast the smaller breed of Hornum cattle predominates in other parts of the county, Devon, or a cross between them and the Alderney are most common. The sheep are of various breeds, including the common small forest-breed, or beath-sheep, which yields a fine-flavoured mutton, formerly known by the name of Basingstoke mutton. The dairy is not much attended to, little more butter being made than the consumption of the county demands. Hampshire has been long famous for its hams, the excellence of which is chiefly owing to the manner in which it is cured, as the native hogs are of very indifferent quality being coarse and raw-boned, though an improved breed, crosses of the Berkshire, Suffolk, Essex, and Chinese, now predominates. The New Forest occupies the whole country between Southampton Water on the E., the British Channel on the S., and the Aven on the W. comprising a space of about 12 sq. m. The trees are mostly oak and beech, raised for the use of the navy, about 60,000 acres of the forest being the property of the crown. The hares and hogs of the New Forest are peculiar to that locality the former having a crimson tail and mane, the latter a light and active form, with much of the fawn spirit, and something of the colour of the wild boar

The manufactures of the county are unimportant. Shalloons and serge were formerly made at various places, but the business is now much declined. There are all-mills at Overton, and mauling is carried on to a great extent. Straw-hats, lace, and paper are also made in different parts. The principal rivers are the Aven, Anton, and Itchen. Principal towns—Furtonmouth, Southampton, Winchester, and Lymington; the three former having communication with the metropolis by railway. The county is divided into 28 hundreds, and 298 parishes. It sends 17 members to the House of Commons. Pop. 405,870.

SOUTHAMPTON, a bor and seaport in England, co. Hants, beautifully situated on a peninsula at the mouth of the Itchen near the head of Southampton Water, and on the South-Western railway 71 m. S.W. London. It comprises an acclivity rising gradually from the water, and when ap-

proached by the London road through an avenue of stately elms, has a very striking appearance. It consists of an old and a new town, the former at an early period surrounded by walls flanked with round-towers, of which considerable portions still remain, particularly on the W. side, and entered by several gates, of which there are still standing, and bear the names of West-gate, South-gate, and East-gate. The last, a remarkable structure, unaltered and unobscured, and large enough to contain the townhall in the upper part of it, is now, on consequence of the extension of the town, nearly in its centre, and being placed across the principal street, running nearly N. and S., divides it into two parts, the part to the N. taking the name of Above-bar, and that to the S. the name of

Below-bar The latter part contains 8 for about 2 m and terminates near the pier, which was erected in the year 1833 and having been opened by her Majesty (then Princess Victoria), is named the Royal Pier. The principal street is crowded at right angles by several others, which in the older quarters are very irregular though generally substantial. The houses in the more modern portions Above-bar present many fine ranges of building. Among these the terrace built along the W shore, and commanding fine views of the surrounding scenery, is conspicuous. The environs are studded with handsome villas.

The ecclesiastical edifices include five parish churches nine chapels of ease, various dissenting chapels, of which four are Independent four Baptist, English Presbyterian, two Wesleyan Methodist, Primitive Methodist, Unitarian, Friends, and E. Catholics. St. Michael's, of the churches the oldest, situated in the W part of the town and occupying the E side of a square formerly used as a fish market, is a spacious Norman structure, with a roof supported by light octagonal columns and sharply pointed arches, a large

and objects deserving of notice are the guildhall, custom house, audit house, jail, theatre, philharmonic-rooms, assembly-rooms, ordnance map office, baths, and public parks. About 6 m. from Southampton and 3 m. from Netley abbey is the Royal Victoria Hospital for sick soldiers, the foundation-stone was laid by the Queen in 1856. The hospital stands on about 100 acres of grounds, and beautiful scenery and has a frontage facing west of 1400 ft. It is three stories high, and consists of a central block and two wings, and has accommodation for 1000 men. There are also quarters distinct from the hospital arranged to receive 1000 convalescents. A well-organised lunatic asylum forms part of the establishment, but is detached from the main building. There are chapels for Protestants and Roman Catholics a museum and anatomical theatre. In the grounds is a fine monument to the memory of the medical-officers who fell in the Crimean war. The hospital is connected by rail way with Southampton, Portsmouth, and Aldershot.

The docks present a very bustling appearance, filled as they generally are with shipping of every class from the noble vessels of the Peninsular and Oriental Co. West India Co. and other large companies down to the small steam-tugs. The dock company was incorporated in 1836 and the first tidal dock (which is paved with granite and surrounded with extensive warehouses) was opened for business in 1842 the cost of it being £140,000. Since that time a second large tidal-dock has been added as well as three large graving-docks. The accommodation thus provided has made Southampton the most important mail packet station in the kingdom steamers leaving every fortnight for the West Indies and China, monthly for the Cape of Good Hope and Mauritius weekly for Gibraltar, Malta, Alexandria, and most parts of India, and daily for France, Jersey and Liverpool and several times daily for Portsmouth and the Isle of Wight. There is also a monthly communication with Australia and Alexandria and also via Panama. Some idea of the large trade done in the docks may be formed from the unbroken list of the steam packets belonging to the several companies sailing from this port in 1856 since which time several new boats have been launched and fitted out—

ABOVE-BAR STREET, SOUTHAMPTON.—From a Print by P. Branson

W window with beautiful tracery and upper compartments of richly stained glass, and a tower surmounting in a lofty octagonal spire. Holy Rood situated in the principal street, is also ancient, and is surmounted by a tower and spire. St. Lawrence also stands in the High-street. St. Mary's is also an ancient edifice but has been modernized in its internal arrangements, and by the addition of two wings it stands in the centre of a large grave-yard for many years, prior to the opening of the cemetery the only repository for the dead for the whole town. All Saints is a handsome Grecian structure, with a turret at its W end and surrounded by six Corinthian columns and crowned by a dome. St. Paul's chapel belonging to this parish is built in the later English style, possesses considerable architectural merit and has a window of stained glass. The chief educational establishments are the free grammar school the Southampton college, the national British, parochial, and infant schools and the literary and scientific works of the town are supplied by the Polytechnic and Athenæum Institutions, which have a large number of members, and are yearly increasing in importance. In the High-street close to the Post Office is the Hartley Institution, the foundation-stone of which was laid by Lord Palmerston in 1861, and the completed building opened by him in 1862. The funds for the erection of it were devised by a Mr. Hartley formerly a resident in the town, who left £60,000 for the purpose; but by law this sum was decreased to £50,000, of which one-fourth was expended on the building. It is in the Italian style, and contains a magnificent reading-room, library laboratory, a museum well filled by various contributors, and a noble lecture-hall. The charitable endowments include an infirmary, a dispensary, a female reformatory, several almshouses, and no hospital, originally founded as a monastery and occupying an antique range of buildings, with a chapel, long appropriated to the use of French Protestant refugees. Other buildings

In addition to the above, there is a new company running to New York from Germany sailing at this port, and a new line to New Orleans. The imports consist chiefly of stone from the W and coal from the N.E. maritine countries, corn and provisions from Ireland timber from the Baltic and America and wine and brandy from France, Portugal and Spain. The declared value of exports was £1,850,647 in 1850 and £4,726,618 in 1864. In the former year the number of vessels entered from foreign ports was 636 (162,117 tons) and there cleared for foreign ports 603 (147,519 tons); in 1864 the number were 916 (264,637 tons) entered and 819 (283,878 tons) cleared. The tonnage employed in the coasting trade was at least equally large. The local trade includes a vast amount of retail chiefly for the use of shipping, and has also a daily market for fish three general weekly markets, and two annual fairs one of which, chiefly for cattle, is very important. The manufacturers of Southampton are chiefly confined to brewing, coach-building, iron-casting, sugar-refining, and ship-building. The extent of the last is very considerable, and many very large steam-vessels have been built of late years.

Southampton is governed by a town-council, or corporation, consisting of 80 councillors and 10 aldermen (from whom the mayor is annually elected).

One of the greatest attractions connected with the town is the Southampton Common a beautiful tract of land, richly wooded, 866 ac in extent, left to the town for public purposes many centuries ago. On this common is situated the race-course, one of the most picturesque in England. Ten acres of the common in the S.E. corner, are now appropriated as a cemetery for the town, with three chapels for the use, respectively, of the Established Church, Dissenters, and Jews. The public parks in the centre of the town are well laid out, and contain several monuments of men of local and general note.

Southampton stands about 1 m. S.W. of the Roman Clausen than, the site of which is still indicated by a fosse and vallum. The modern town is attributed to the Anglo-Saxons and was first called *Hastanston* from which the present name is obviously derived. In the 10th century it was repeatedly pillaged by the Danes, and afterwards, when their sovereign had gained the throne became the occasional residence of Canute, who is said here to have administered the memorable reproof which has sometimes been provoked, by the grossness of their factory in declaring that the very waves could obey him. In 1386 during the reign of Edward III., it was sacked by a united French, Spanish, and Genoese fleet, but soon recovered and receiving additions to its castle and other fortifications, acquired new importance. It claims to be a borough by prescription, but its earliest known charter was granted by Henry II. Since the time of Edward I. it has returned two members to Parliament. Among its natives the only one particularly noted to posterity is Isaac Watts. P. 1867, about 50,000. **SOUTHAMPTON**, or *Sattocet*, a rapidly rising town, Canada West, in a fertile district, on Lake Huron, at the mouth of the Saugeen river 60 m. from Goderich. Pop. (1871) about 600. The river Saugeen, which is now being improved, so as to render it a safe harbour will afford one of the best ports on the E. side of Lake Huron.

SOUTHEND a hamlet and watering-place, England, co. Essex at the mouth of the Thames, opposite to that of the Medway 40 m. E. London. It has recently made rapid progress, has a fine promenade a district church, an independent chapel, an assembly-room library theatre, baths, some beautiful walks, and a park 11 m. long. Pop. 1134.

SOU PHGATH, a vill and comm. Belgium, prov. Hainaut, 21 m. E. Mages, with a brewery several distilleries, and two flour-mills but the chief employment is agriculture. Pop. 1144.

SOUZA, a river Portugal rises in the Serra Alva, 30 m. E.S.E. Guimarães flows first 8 W. then E. and after a course of 38 m. joins the bank Douro, 12 m. E.S.E. Oporto.

SOUZDAL or *Stunat*, a town, Russia, gov. and 22 m. N. Vladimir in a fertile plain on the Karamanka. It is a very ancient place, and consists of three quarters, one of which, called the Kremlin, is surrounded by earthen walls and a deep fosse in a very dilapidated state. It contains a handsome episcopal palace, now used as court-house, six churches several of them large and richly decorated structures three monasteries and two nunneries, a diocesan seminary, and almshouses; and has manufactures of woollen and linen cloth, and some trade. Pop. 8000.

SOUZEL, a town, Brazil, prov. Para, at the foot of a mountain which overhangs the bank Amazon, above 100 m. from its mouth is the Amazon with a church and a school. The inhabitants, who are all Indians, live chiefly by fishing and hunting, but also make bricks and earthenware for exportation.

SOUZEL, a town and par. Portugal, prov. Alentejo, 8 m. N. by W. Estremoz. A sanguinary battle was fought here in 1483 between the Portuguese and Spaniards. Pop. 1620.

SOVEL, an island about 10 m. off E. coast Anam, lat. 16° 5' N. lon. 106° 34' E. (n.)

SOVERIA, a town, Naples, prov. Calabria-Ultra II. N.E. Catanzaro, on a hill near the bank Sumari. Pop. 1050.

SOVICILLE, or *SOVICILLA*, a vill. and comm. Tuscany, about 8 m. from Florence, on a slope above the Spino. It is the seat of a court of justice, contains a parish church and an old castle, and has a trade in corn, oil and wine. P. 5500.

SOWAUBA, a group of islands. See *Sowab-Borom*.

SOWERBY two places, England, co. York. — 1. A vill and chapelry (St. Riding) 1 m. S. Thirsk, near the York and Newcastle railway, with a manufactory of varnish. Pop. 1072. — 2. (Bridge) A vill and township (W. Riding) 15 m. W.N.W. Leeds, on the Boothdale canal, and the Manchester and Leeds railway. It has a large chapel with a finely

ing, day, girls', national, and infant schools, and a literary institution. Cotton stockings are manufactured extensively in the vicinity, as are also bricks and tiles; and there is a pretty large mill for spinning silk. Area of par., 4550 ac. Pop. 3514.

SOUTHWICK, a vill and par. England, co. Durham, nearly 1 m. W.N.W. Sunderland, on the heights above the Wear. It is well built, and has a wooden church with a square tower. Primitive and Wesleyan Methodist chapels, a national school; manufactures of glass and earthenware, building yard and limekilns. Pop. 3791.

SOUTHWICK, a vill and township U. States Massachusetts. The village, 10 m. W.S.W. Springfield, contains two churches and an academy. In the township are several mills and manufactures. Pop. 1214.

SOUTHWOLD a seaport in and par. England, co. Suffolk. The town, on a hill, 11 m. S. Lowestoft, near the mouth of the Blyth, is modestly well built, and has a fine church a guildhall, and places of worship for Baptists, Independents, and Wesleyans. The principal occupation of the inhabitants is the saltery: some are employed also in the preparation of salt, which is exported in considerable quantities. The chief imports are coal, rock-salt, fire and daim, iron &c. and the exports, wheat, barley malt, &c. The haven is formed by the Blyth. Area of par. 586 ac. Pop. 2109.

SOUTHOKE a vill W. Africa, Woolli lat. 15° 28' N. lon. 13° 55' W. consisting of well-constructed cottages. It has an elegant fortress, and excellent gardens with bamboo inclosures. It is inhabited by Mandingo merchants, and is an emporium for British merchandise.

SOUVIGNY (anc. *Solignacum*), a town, France dep. Allier 6 m. S.W. Moulins. It has a handsome Gothic church manufactures of soda and glass-bottles, and a trade in corn wine and cattle. There are blast furnaces and other iron works in the neighbourhood. Pop. 1756.

SOUVILLIER, a vill Switzerland can. and 27 m. N.W. Bern on the Siss. It contains a church and a parish court-house. Near it are the ruins of the castle of Erguel, and several remarkable natural caverns. Pop. 1304, chiefly employed in making clocks and watches and other ornaments.

SOUVRET, a vill and comm. Belgium, prov. Hainaut, 21 m. E. Mages, with a brewery several distilleries, and two flour-mills but the chief employment is agriculture. Pop. 1144.

SOUZA, a river Portugal rises in the Serra Alva, 30 m. E.S.E. Guimarães flows first 8 W. then E. and after a course of 38 m. joins the bank Douro, 12 m. E.S.E. Oporto.

SOUZDAL or *Stunat*, a town, Russia, gov. and 22 m. N. Vladimir in a fertile plain on the Karamanka. It is a very ancient place, and consists of three quarters, one of which, called the Kremlin, is surrounded by earthen walls and a deep fosse in a very dilapidated state. It contains a handsome episcopal palace, now used as court-house, six churches several of them large and richly decorated structures three monasteries and two nunneries, a diocesan seminary, and almshouses; and has manufactures of woollen and linen cloth, and some trade. Pop. 8000.

SOUZEL, a town, Brazil, prov. Para, at the foot of a mountain which overhangs the bank Amazon, above 100 m. from its mouth is the Amazon with a church and a school. The inhabitants, who are all Indians, live chiefly by fishing and hunting, but also make bricks and earthenware for exportation.

SOUZEL, a town and par. Portugal, prov. Alentejo, 8 m. N. by W. Estremoz. A sanguinary battle was fought here in 1483 between the Portuguese and Spaniards. Pop. 1620.

SOVEL, an island about 10 m. off E. coast Anam, lat. 16° 5' N. lon. 106° 34' E. (n.)

SOVERIA, a town, Naples, prov. Calabria-Ultra II. N.E. Catanzaro, on a hill near the bank Sumari. Pop. 1050.

SOVICILLE, or *SOVICILLA*, a vill. and comm. Tuscany, about 8 m. from Florence, on a slope above the Spino. It is the seat of a court of justice, contains a parish church and an old castle, and has a trade in corn, oil and wine. P. 5500.

SOWAUBA, a group of islands. See *Sowab-Borom*.

SOWERBY two places, England, co. York. — 1. A vill and chapelry (St. Riding) 1 m. S. Thirsk, near the York and Newcastle railway, with a manufactory of varnish. Pop. 1072. — 2. (Bridge) A vill and township (W. Riding) 15 m. W.N.W. Leeds, on the Boothdale canal, and the Manchester and Leeds railway. It has a large chapel with a finely

Coast.—The coast-line, forming about two-thirds of the whole perimeter, has a length of about 1870 m., of which about 600 m. belong to the Bay of Biscay and the Atlantic, and 1770 m. to the Mediterranean. It is not much broken, but except toward the gentle curves, presenting few remarkable headlands or indentations, except on the W. coast of Galicia, where it is fully exposed to the billows of the Atlantic. The whole of this coast, from Pasabaterria on the frontier of France, W. to Cape Ortegal, and thence round by Cape Fisterra to the mouth of the Miño, is rocky, but not very elevated, the heights never exceeding 900 ft. and often not rising to 40 ft. On the N., though the water is deep up to the shore, there is little sheltered anchorage, but on the N. W. and W. a succession of excellent harbours are found, among which those of Ferrol and Vigo are conspicuous. In the S. W. at the mouth of the Guadalquivir, a low, sandy and even swampy shore occurs, skirted in many parts by islands of a similar description, and so shallow that even small coasting-vessels find a difficulty in approaching it; but beyond the mouth of the Guadalquivir the shore rises gradually and becoming well defined, presents the admirable Bay of Cadiz, with its almost unassailable harbour. The same kind of coast continues till the celebrated Cape of Trafalgar is reached when the appearance of cliffs is seen. Thence on proceeding E. to the Bay of Algeciras, the coast is low, sandy and even swampy. Bay of Algeciras, rises suddenly up into the magnificent rock of Gibraltar where Spain has the fortification of seeming her strongest fortress in the hands of strangers. The rocky shore, though at a much lower elevation is continued almost without interruption along the remainder of the S. coast, to its termination at Cape Fales and with the exception of the ports of Málaga and Cartagena, the latter particularly excellent, presents scarcely a single spot where the anchorage is not more or less exposed to prevailing winds. At Cape Fales the shore is taken place, and a low sandy beach partly lined with lagoons, stretches N. to within a short distance of Alicante, where there is a good roadstead, but a very ill-favoured harbour. Here the coast again rises, and bold rocky cliffs, terminating the lofty ridges of the interior are seen as far N. as Denia, beyond Cape St. Antonio. Here a long curve commences, and sweeps round to the mouth of the Ebro, presenting throughout, with the exception of a few ridges in the vicinity of Castellón-de-la Plana, a low, sandy, shallow shore, lined with lagoons, along which numerous settlements are established but unprovided with a single harbour deserving of notice. Beyond the Ebro low and rocky shores alternate in considerable stretches to the French frontier. The only ports of consequence are those of Barcelona and Roses, the latter particularly excellent, though the former is by far the more frequented.

Mountains.—The interior of Spain is as much diversified as that of any other country of the same extent in Europe but its characteristic feature is the central table-land, which occupies more than a half of the whole surface, and is from 2000 ft. to 8000 ft. above sea-level. It is nearly surrounded by mountains N. by those of the Asturias, an obvious continuation of the Pyrenees W. by a branch of the same mountains stretching S. through Galicia, and along the frontiers of Portugal to the banks of the Douro, and thence continued through the S. of Leon and Extremadura by a series of cordilleras which finally become linked with a branch of the Sierra Morena S. by the Sierra Morena; S. E. and E. by the mountains of Murcia and Aragon, among which the Sierra Albaracín and Molina are the most conspicuous, and N. E. by a range which, commencing in the Sierra Moncayo, stretches N. W. through Old Castile, and thence forms the S. boundary of the basin of the Ebro. On the surface of the table-land itself there is no necessity. It is not only very rugged in many of its parts, but is traversed throughout its whole breadth, E. to W., by two mountain-ranges. The latter of the two, commencing near the Sierra Moncayo, already mentioned, on the E. frontiers of Old Castile, stretches first between it and New Castile, then between Leon and Extremadura, and finally entering Portugal, becomes linked with the Sierra da Estrela. It may then be considered as dividing the table-land into two distinct portions; a N. comprehending the kingdom of Old Castile and Leon, and covering an area of about 44,000 sq. m., and a S. comprehending the kingdoms of New Castile and Extremadura, and covering

an area of about 40,000 sq. m. The second great range of the table-land lies wholly within the latter and commencing in the Sierra Albaracín, on the S. W. confines of Aragon, stretches under various names among which those of the Sierras of Guadalupe, Toledo, and Manana, are most conspicuous, nearly across the centre of New Castile and Extremadura, till it is met by the Sierra Alpedraza, from Portugal. Besides these mountain-ranges which thus bound or traverse the table-land, there are others which, though without its limits, are equally deserving of notice. One of these is the magnificent chain of the Pyrenees, which, though partly belonging to France, presents its boldest front to Spain, and has its loftiest summits within it. Another is the Sierra Nevada, which, with its ramifications, covers the greater part of the S. of Andalusia. Its general direction is from E. to W., and is preserved, with more or less distinctness, by its three principal ranges, one in the centre forming the Sierra Nevada, properly so called, running E. and W. and attaining in the Pico de Mulhacen 11,966 ft. the eminent point of Spain, another on the N. which, commencing in the Sierra de Agudagorda on the S. frontiers of Murcia, is continued W. by the Sierra de Estrella and the mountains of Granada and a third on the S. skirting the shores of the Mediterranean, commencing in the Sierra Gador and continued S. W. under the name of the Alpujarras, Jorquera, Luján, and Tejeda, and then S. W. under that of Tolox. After Mulhacen, the most elevated mountain-summits are Maladita, Mont Perdu, Poseta, and Vignemale in the Pyrenees; Velez, W. of Malhacen, Penarreda, and Penanarreda, in the mountains of Asturias; Penagol, on the frontiers of Aragon and Valencia; Pasañela, in the range between the two Castiles; Moncayo, Gador &c.

Rivers.—There are numerous, and several of them pursue courses of several hundred miles, draining large tracts of country. In general however, rising in the table-land, where the atmosphere is dry, and rain is seldom frequent and copious, their supply of water is comparatively small, and their navigable importance limited. Their basins, lying chiefly in the intervals between the mountain-ranges, are usually bounded by them on the N. and S. and hence all the large rivers flowing through valleys which are open only on the E. or W. necessarily follow one or other of these directions. Those which flow E. belong to the basin of the Mediterranean, and those which flow W. to that of the Atlantic. The most important of the former basins are the Ebro, which, rising in the mountains of Asturias, has a course of more than 400 m. to the Bay, which rises in the west W. part of Murcia. In the Sierra of same name, and has an E. course of at least 300 m.; the Júcar which, rising between the sierras Molina and Albaracín, flows for the most part through a wide and fertile valley upwards of 200 m.; and the Guadalquivir which has a course of about 150 m. The most important rivers of the latter basin are the Douro and Tago, which however, are more Portuguese than Spanish rivers, because, though they both rise and run the longer part of their course in Spain, the latter, and consequently more valuable part of it, is in Portugal, the Miño and Guadalana, also partly shared by Portugal and the Guadalquivir which, flowing between the great ranges of the Sierra Morena and Sierra Nevada, has a more regular and constant supply of water than most Spanish rivers, but notwithstanding its course of above 400 m., is not navigable by sloops beyond Seville. Considering the number and height of the mountain-ranges, it is remarkable that Spain does not possess a single mountain-lake deserving of notice its only expenses of standing water are the lagoons which line part of its E. and W. coasts, and are not only devoid of beauty but often poison the air with pestilential vapours.

Geology and Minerals.—Almost all the mountain ranges have a nucleus of granite, overlain by crystalline schists. This is particularly the case in the Pyrenees, the mountains which separate the two Castiles, and the basins of the Douro and Tago, the Sierra Morena, and the Sierra Nevada. In the last the granite and schists often give place to immense masses of serpentine. The mountains of Asturias, however, form an exception to the general rule, and though evidently a continuation of the Pyrenees, differ from them essentially in geological structure, exhibiting no traces of granite or crystalline rocks, and consisting almost entirely of carboniferous limestone, and sandstone. The latter formation is largely developed in the Sierra de Gador, and in the deep valleys of the

Alpargatas. Secondary rocks, still higher in the series, consisting of chert and the accompanying strata, often overlie those of the carboniferous limestone and have their largest development in the districts which border the E. coast. They also form great part of the ridges which intervene between the plains of La Mancha and the Mediterranean. Tertiary formations are found partly on the higher table-land in Old Castile, where they consist chiefly of marls and gypsum, and partly on the plains of Valencia, Alcantara, Murcia, Cartagena, Aguilar and Granada. They also fill several valleys, among others, those of the Segura, Lorca, Lower Ebro and Guadalquivir. The minerals are numerous and valuable and though, owing to the general decay into which almost all the industrial resources of the kingdom have fallen, they are less extensively worked than they formerly were, there cannot be a doubt that the more valuable of them are by no means exhausted. They include gold, which was at one time found in considerable quantities in the Asturias and Galicia, though no mines are now worked; silver, found in numerous quarters, particularly in the Alpargatas, the Sierra de Luján, and the Sierra de Gador, in all of which the lead, found in the greatest abundance, is highly argentiferous quicksilver, particularly at Almadén, where the mines, still in operation, are among the richest in the world. Copper is found in the Sierra Morena, the Alpargatas, and Teruel, in Aragón, but at present almost abandoned; iron in almost every quarter, and more especially in the Baesque provinces, where it is worked to a considerable extent, and has long been famous for some of the articles produced from it; zinc in more limited quantities in several places, particularly in the Asturias and the Sierra Morena, though the extent of the fields is imperfectly known, and the workings are extremely limited; saltpetre, cobalt, and bluish, in La Mancha, Aragón and Granada, and antimony, tin, sulphur, alum, sulphur, and saltpetre. Salt is only very partially worked in mines, but great quantities are manufactured from the lagoons. Several quarries yield excellent marble, alabaster and jasper, and many precious stones, as rubies, topazes, amethysts, and garnets, are found.

Climate.—This, owing to the physical configuration of the surface, varies much in different localities. On the elevated table-land it is both colder in winter and hotter in summer, than usual under the same latitude. In Madrid, which is situated upon it, the mean temperature of winter is about 47°, of spring 58°, of summer 68°, and of harvest about 65°. In the hottest month the mean temperature sometimes rises above 80°, and in the coldest, falls below 40°. The mean annual temperature is between 50° and 55°. On the table-land, in summer the sky is generally clear and cloudless, and rain seldom falls, but in winter it both rains and snows frequently. On the N coast the climate is damp, and injury is often suffered from a superabundance of moisture. In the N.W., in Galicia, a piercing wind, which the Castilians call *gallega*, often blows. In these quarters, in severe and rainy winters, the cold is occasionally extreme, and the olive and other southern fruits cannot be successfully grown. In the S.E. districts, particularly in Murcia and Valencia, a kind of perpetual spring prevails; on the contrary in the S. and S.W. in Granada, and other parts of Andalusia the climate is almost African, and a wind called *solano*, which withers up vegetation, enfeebles the animal frame, spreads epidemic diseases, of which the yellow fever is one, and is usually accompanied with numerous swarms of mosquitoes, often blows for two weeks in succession. In the W. the climate is mild but variable; the summer, however, is often very hot, and in Extremadura, in particular, withering droughts of nearly six months duration are not uncommon. In the E. the climate resembles that of Asia Minor and Syria. Snow is confined chiefly to the more mountainous districts. Storms are not frequent, but shocks of earthquakes are often felt and many attended with fearful disasters are on record.

Vegetation, Agriculture, &c.—Few of the mountains are so high as to be beyond the limits of forest vegetation; but both they and many tracts of the table-land are in general very luxuriantly supplied with trees, and a want of timber, both for fuel and commercial purposes, is severely felt in many quarters. The finest forests are on the W. slopes of the Pyrenees, and in the mountains of Asturias, from which the oaks which need to supply the docks of Ferrol were obtained. The more

remarkable trees are the Spanish chestnut, and several varieties of oak, more particularly the *Quercus bellota*, the acorns of which are edible, the *Quercus rubra*, or cork-tree, and the *Quercus coccifera*, from which a crimson dye, resembling the genuine cochineal, is obtained. Orchard and forest fruits are extremely abundant, and include, in addition to apples, pears, cherries, plums, peaches, and apricots, the almond, fig, orange citron and pomogranate and in the lower districts of the E., the fig, the fig, the fig, and the fig. This culture of the vine is general, and great quantities of wine are made, both for home consumption and exportation. The demand for the latter is chiefly confined to sherry and the sweet wines of Malaga and Alcantara, a considerable part of the grapes grown are dried, and furnish one of the principal exports from the port of Malaga. Nuts, common and pishable, walnuts, and chestnuts, grow in such abundance as to form important articles of trade. In the warmer districts the olive, sugar-cane and cotton-plant are partially cultivated. The extent of land under regular agricultural crops is somewhat limited. Much of the higher part of the central table-land presents a very sterile appearance, having a thin stony soil and a covering of heath and scrubby pasture; and even extensive tracts, which might be advantageously cultivated, are left almost in a state of nature, to be ransacked by cattle, sheep, goats, and swine. The finest agricultural district is in Valencia, where both rice and corn are grown far beyond the wants of the actual population, and furnish large supplies to those parts of the interior which are less favourably situated. After Valencia, Catalonia, Murcia, and some of the N. provinces, raise the largest quantities of grain. The quality is in general so excellent, that the bread of Spain is said to be the finest in Europe, but the system of agriculture is very defective, and the amount of produce is far less than a better system might easily obtain. Considerable improvement, however, is said to have been recently made, and Spain which used regularly to import grain, has now a small surplus for export. The more important crops are wheat, rice, maize, barley, and legumes. Hemp and flax are extensively grown in Aragón and Galicia and asparagus grows in abundance, more especially in Valencia and Murcia, where it is in extensive demand for making ropes, mats, baskets, &c. The mulberry thrives well, and is largely cultivated, for rearing silk worms, in Valencia, Murcia, and Granada. Buffon and other dry-plants grow and flourish in the interior the caper and grow on the coast of the Mediterranean shores, and there also, particularly on the E. large quantities of harille are manufactured. The liquorice-plant is cultivated chiefly near Seville, and at the mouth of the Ebro, and the juice prepared from it is in demand in all parts of Europe. The zoology of Spain includes a vast number of species. Of these, however, the only large animals in a wild state are the wolf, common in all the mountainous districts, and the bear and chamois, found chiefly in the Pyrenees. In Baesque the marten is frequently met with, and lynxes, foxes, wild cats, weasels, &c., are numerous in many quarters. The chameleon is found in the vicinity of Cadix, and numerous monkeys haunt the rocks of Gibraltar. The feathered tribes are very numerous, particularly on the coast and at the mouths of rivers, eagles are not uncommon, and among rarer visitors may be mentioned the flamingo, which is sometimes seen near Valencia. The number of rivers and great extent of sea-coast give great scope to the inhabitants of the water and some important fisheries are carried on, particularly those of sardines on the coast of Galicia and anchovies on the S.W. coast, between Cadix and Gibraltar. Nothing, however, more strongly indicates a general want of industry and enterprise in Spaniards than the fact, that instead of preying by the treasures which their own sea spontaneously offer their main supplies of fish are derived from foreigners. Among domestic animals the horse, descended from breeds which the Moors had introduced, was long celebrated throughout Europe but has in recent times declined in reputation though Andalusians still possess of many fine animals. One great cause of the comparative scarcity of good breeds of horses, was the rapacity of the French, who, during the unprincipled invasion, never allowed a superior animal to escape their hands. The mule is generally preferred to the horse, both for carriage and draught, and is extensively reared in New Castile. Both it and the ass are generally of a very superior description. Horned cattle are generally in-

Andalus and not numerous; only in a few districts are cows kept for dairy purposes; bulls, in great demand for the national amusement of bull-fights, are reared in greatest perfection in Andalus. The favorite stock is the sheep, of which about 18,000,000 are kept. A considerable proportion of these belong to the celebrated Merino breed, in which almost all the other breeds of Europe are more or less indebted for improvement. Goats also are very numerous, and in their flesh, milk, and cheese, furnish the favorite food of the inhabitants. Swine are kept in large herds in some parts of Extremadura, and in some of the N. provinces, both near the coast and among the mountains of Asturias, where they roam at large in the forests.

Manufactures and Trade.—In the middle ages, the Spanish factories of Spain, particularly along the coasts of the Medi- terranean, were in a flourishing condition, and found an ex- tensive demand particularly in the Levant and other parts of the East. With the expulsion of the Moors, the branches which they had specially fostered sunk rapidly into decay and have never been revived. New demands however arose in the W. and Spain, as the mother country, reserving to her- self the sole supply of the colonies, was able for that purpose alone, to carry on a number of lucrative manufactures. The loss of these colonies putting a sudden stop to the demand, was followed by their almost as sudden extinction. The circum- stances of the country since have been the most unfavorable that can be conceived to the progress of any branch of regular industry and hence, the only manufactures deserving of notice are to be found in a few of the larger towns. Cotton goods are made to some extent in Catalonia, particularly Bar- celona, and in Murcia, Tarragona, Guadalupe, and dif- ferent towns of Valencia and Aragon; leather in Valladolid and several towns of Andalusia; wax cloths in Barcelona; linen, both ordinary and damask, in Galsala, Malaga, at Cornus and Carthagena; stained paper, jewellery, and porce- lain at Madrid; iron-ware, chiefly in the larger and coarser descriptions, in the Basque provinces, Mondragon, Toledo, Alhambra, Guadix, &c. for common and sword cutting com- mon earthen and delf ware in Andalus, Alcora, Caceres, &c. paper in Valencia and Catalonia and tobacco in various towns, but more especially in Malaga and Seville. The trade laborers under great disadvantages from the want of proper means of communication. The roads, except the royal roads (camino reales) are generally wretched, the rivers, though numerous, are all fitted for navigation and little has been done for their improvement, either by removing obstructions from their channels, or connecting the more important basins with each other by means of canals. Of those six, which promised important advantages, have been commenced, five of them within the last century but, as Melillo expresses it, from that species of fatality which has always persecuted Spain, not one of them is finished. Recently some little has been done in building railways, but their extent is yet (1854) too limited to have much effect on the general trade of the country. In such circumstances, the foreign trade is almost necessarily confined to such articles of raw produce as are produced in greatest abundance, and can be most easily conveyed to a seaport. The chief articles of export are wine, salt, fruits, lead, oil, soap, and agricultural produce. The following table exhibits a general view of the commerce of the whole Spanish monarchy: European, African, American, and Asiatic.—

| | 1851 | | 1850 | |
|-------------------|------------|------------|------------|------------|
| | Imports. | Exports. | Imports. | Exports. |
| Europe and Africa | 64,062,714 | 63,300,179 | 61,441,831 | 63,388,649 |
| America | 2,968,262 | 2,618,403 | 4,615,700 | 5,316,378 |
| Asia | 716,595 | 84,495 | 199,467 | 22,665 |
| | 7,046,569 | 5,233,079 | 15,256,198 | 15,126,719 |

Weights and Measures.—These vary so much in different provinces, that it is almost impossible to specify them. Those of Castile, however are the most generally adopted, and here are only given. Acrents are kept in maravedis, of which 34 = real de vellón = about 284 sterling. The principal coin is, in gold, the *double-escudo* = 320 reales the *double-escudo* = 160, the *double-silver*, or *plata* = 80, the *double* = 40 and the *double* = 20, in silver, the *piece* = the *double* or 20 reales, the *half-piece* or *double* = 10, the *fourth-piece* or *piece*, &c., in copper, the *double* = 8, the

single = 4 and the *half-escudo* or *maravedi*, or 10 *Castilian dineros*. The principal measures of length are the *vara* = 36 in. imp., the *estada* or *fathom* = 6 *varas* = 36 paces. Of these *paces* or *paces*, the *posting* mile or *leuga* has 4000, the *common* mile 4000, and the *statute* mile 8000. The *caño*, or principal corn-measure, contains 12 *fanegas*, of which 8 = a *quarta* *imperial*. The *cañero* or *arrobe-major*, and the *arrobe-menor*, are the principal liquid measures, the former being used generally for all liquids, and the latter only for oil. The *arrobe-major* contains about 43, and the *arrobe-menor* about 24 *libras* *imperial*.

Government, &c.—This is an hereditary constitutional monarchy, regulated by a constitution adopted in 1807, and subsequently modified in 1845. The legislative power is vested in the crown and cortes jointly. The cortes consist of two equally independent bodies—a senate and a house of deputies. The senate has no limit as to numbers, and is appointed solely by the crown each senator holding his office for life. The deputies are nominated directly by electoral juries, at the rate of one deputy for every 50,000 of the population. Each deputy is elected for five years, and has full liberty of speech and vote, but the crown may at any time dissolve the house of deputies, subject to the condition that a new house must be elected and summoned to meet within three months. Either of the three powers, the crown, senate, or deputies, may originate bills, with the exception of money-bills, which belong exclusively to the last, but no law can be passed before the consent of each has been obtained. The crown is responsible only by its ministers, composed of a council of six principal secretaries of state, finance, war, justice, marine, and government. Justice is administered by a supreme court, composed of a president and 15 judges, divided into three halls or courts—a first and second court of justice, and a third court of the Indies. Next in order to this court are the audiencias, or courts of second resort. The whole number of these within the peninsula and the adjacent islands, is 15 each having its seat at some principal town and exercising jurisdiction over two or more provinces. Judges of the first resort (*procuradores*) are found in all the more important districts. The revenue, raised chiefly by direct and indirect taxation, the latter often on the most objectionable principle, the proceeds of suppression of monasteries, royal domains, lotteries, monopolies of the manufacture of tobacco and salt, &c. amounted in 1854 to £27,493,602 and the expenditure to £27,478,323. The public debt amounted in 1851 to the sum of £110,107,073 and in 1854 the short space of thirteen years, it had increased to £183,927,471.

Army and Navy.—The army consists of regulars and reserve, or of regiments of the line and militia. The whole force is about 136,787 men, of whom about 90,000 are regulars. They are in general ill-disciplined and ill-paid, and though once the best troops in Europe, are now among the worst. The only kind of service in which they still possess considerable reputation is guerilla warfare. The navy which long contained the finest ships in the world and almost ruled the seas, was almost annihilated by the wars carried on with Great Britain and now musters no more than four ships of the line, five frigates, six corvettes, eleven brigs and 29 steamers and some small vessels, carrying in all 1306 cannon and manned by 9028 sailors.

Religion.—The only religion which the state recognizes, and declares itself bound to support is the R. Catholic. It is governed by 10 archbishops and 59 bishops, but two of the former and five of the latter have their jurisdiction beyond sea. The number of parishes is about 21,000. In 1857 all the convents of monks, with a few exceptions, were suppressed, and their revenues subject to a provision for saluting members, conformed to the state. At the period of extinction the number of convents was 1940 with 36,905 monks, the numerics still amount to 680 with 12,000 nuns, for the most part aged. In no country has the dominant religion manifested a more intolerant spirit, or been guilty of so many atrocious deeds. The same spirit still exists, but its powers of mischief are considerably curbed. The monks of the clergy have long been notorious for luxury and the latter are said to have very generally utilised their priories.

People.—The inhabitants of Spain smelt chiefly of Spanish proper composed of a mixture of ancient aborigines, Romans, Visigoths, Vandals, and Suevi, but partly also of three

with them no inconsiderable portion of the wealth, industry, and trade of the kingdom. The next reign is that of Philip III., during which Portugal recovered her independence, and the United Provinces of Holland nobly asserted their freedom. He was succeeded, in 1665, by his son Charles II. a mere child. His long reign was only a series of disasters, and several treaties were made, in all of which Spain was obliged to submit to humiliating terms. The old Castile till 1700; but as he had no issue, and had appointed Philip of Anjou, grandson of Louis XIV., his successor, a competition for the crown took place, and led to the war of the succession, which was not terminated till 1707, when Philip, by the defeat of his opponents at Almansa, made good his claims; while, at the same time, by the peace of Utrecht, Spain was stripped of all her European dominions beyond the peninsula, and, even within it, was obliged formally to cede Minorca and Gibraltar to the British. Ferdinand VI succeeded his father Philip in 1746 and by observing a strict neutrality in the European wars, gained some important advantages for his country which began to show symptoms of recovering from its degradation. The same was policy was pursued for a time by his successor Charles III. till what is called the Bourbon family compact led to a war with Great Britain. It was at this time France and Spain united were successively defeated in their celebrated attempt to take Gibraltar. On his death, in 1788, he was succeeded by his son Charles IV., whose reign under the administration of the queen's favourite, Godoy, proved most inglorious. An ill-conducted war against the French revolutionists was suddenly concluded by a most disadvantageous peace and an alliance with France, which necessarily brought Spain into collision with Great Britain. The result was the loss of many of her colonies, and the almost total annihilation of her fleet. The infamous attempt of Godoy to seize the crown of Spain and place it on the head of his brother Joseph, led to the celebrated war of independence, in which the patriotic spirit manifested by the Spanish people contrasts strongly with the pusillanimity both of Charles IV. and his son Ferdinand VII. Promptly by the valor of British troops, and the unrivalled talents of the Duke of Wellington, the French were not only expelled, but saw the war boldly and successfully carried within their own territories. Ferdinand, who had been treacherously kidnapped by Bonaparte, regained his liberty, and returned to Spain amid the acclamations of his people, but his misfortune had not taught him wisdom, and he was soon seen ungraciously persecuting those to whom he was mainly indebted for his throne. Repeated insurrections and civil wars have since ensued, and Spain has been stripped of the whole of her possessions on the continent of America. Ferdinand, however, was obliged to renounce his title of absolute for that of a constitutional monarch and his daughter Isabella II., now (1867) reigns under a constitution which fairly administered, gives the subject all the essentials of freedom.

SPALATRO, or **SPALATZ** (Latin, *Spalathra*, Slavonic, *Spalac*), a seaport in Austria, Dalmatia, imp. circle, beautifully situated on a bay of the Adriatic formed by the islands which here line the coast, about 100 m. S.E. Zara 1st. (Pavlov town) 42° 30' 24" N., lon. 16° 26' 45" E. [a] It consists of the town proper and four suburbs, and was once surrounded by walls, of which only portions now remain, in a very dilapidated state. It is not well built. The houses are generally small, and devoid of architectural beauty and the streets narrow, winding, dirty, and badly paved with small, flat stones. The building most deserving of notice is the vast palace, built by the Emperor Maximilian, during his residence here after he had subdued the empire, and still in very tolerable preservation. It is merely in the form of a square, with a quadrangular tower at each angle. The S. side, which faces the harbour is 595 ft., including its two terminating towers; and the E. and W. sides are each 705 ft., the whole space thus inclosed being rather more than 6 a. It was interrupted nearly centrally by two streets at right angles, and had its main entrance on the N. by the Porta Aurea, or Golden Gate, which is still nearly perfect. The interior of the palace con-

SPALATRO.—From Cassa, Voy. Palatin de Vienne et Palatin.

gymnasium normal and other schools. The manufactures consist chiefly of tallow and wax candles, rosoglio, and brandy. The harbour is both commodious and secure. A large trade is carried on, particularly with Turkey, chiefly in wool and salt provisions, oil, wax, silk and woollen stuffs, and leather. Spalatro is the seat of an archbishop and the seat of a court of first resort, and several important public offices. It was long in the possession of the Venetians, was taken by the French during the wars subsequent to the revolution, and passed to Austria by act of the Congress of Vienna. P. 10,500.

SPALDING, a market tn. and par. England, co. Lincoln. The town is situated in a marshy or sunny district, 1 bank of the Welland, 34 m. S.E.E. Lincoln, has an old and spacious church, with a fine tower and spire several places of worship for Dissenters, a free grammar-school, of which the learned Dr. Bentley was for a time head-master a blue-coat school, and a set of almshouses; a theatre, jail, and spacious market-place, in the centre of which is the townhall. The river has been made navigable to the town for vessels of from 50 to 70 tons burden. A considerable trade is carried on with London, Hull, Lynn, and other places. A large business is done in wool, corn, coal, and timber. Pop. 7627. Area of par., 12,070 ac. Pop. 8899.

SPALDWICK par. Eng. Huntingdon; 1690 a. P. 464. **SPALMADORE** ISLANDS, a group of islands, Australia. They form the island of Sale and the largest of Anne Minor, lat. 38° 32' N. lon. 36° 12' E. The largest is about 5 m. long and 3 m. broad the others are mere rocks.

SPALT, a walled in Bavaria, circle Middle Franconia, 7 bank Regat 20 m. S.E. Anspach with three churches, a mill and a trade in hops. Pop. 1765.

SPANBY, par. Eng. Lincoln, 1019 a. Pop. 74.

SPANDAU, a tn. Prussia, prov. Brandenburg; gov. and 12 m. N. Potsdam, at the confluence of the Spree and Havel. It is a place of considerable strength, being surrounded by walls, and defended by four forts, one by a citadel, which is situated on an island of the Havel. It contains four churches and an old castle, fitted up as a penitentiary, and capable of receiving 500 prisoners; and has manufactures of woollen and linen cloth, leather, and earthenware, breweries and distilleries, building-yards, some shipping, and general trade. Spandau was long the residence of the electors of Brandenburg. P. 9497.

SPANGENBERG, a tn. Hesse Cassel, Niederhessen, 15 m. S.E.E. Cassel. It is walled, and has a castle and a state-prison, manufactures of linen, and four-mills. P. 3849.

SPANISH, a river, British America; flows W S.W. along the N. base of La Cumbre Mountains, and falls into Lake Huron, nearly opposite the central part of the Great Manitowish.

SPANISH-TOWNE, or **SAVADO-DE-VA**, the capital of Isl. Jamaica, about 10 m. N.W. Kingston. It is the seat of government and contains the governor's residence, the public offices, the superior law-courts and many institutions. It is ill built and unhealthy and although the capital of the island, it is every other respect inferior to Kingston. Pop. 5000.

SPANNBERG or **SPANNBERG** a market in Lower Austria on the Ralsbach, 8 m. from Gamsdorf with a church which once belonged to the Teutonic knights. Pop. 1140.

SPANPOLE, a vil. Hungary. See **SPANKO**.

SPARANIBI, a vil. Naples, prov. Lavoro, E. Gaeta with three churches. Pop. 1560.

SPARHAM, par. Eng. Norfolk, 1770 ac. Pop. 378.

SPARKFORD, par. Eng. Somerset 860 ac. Pop. 280.

SPARONE, a vil. and com. Italy Piedmont, div. Turin, prov. and 18 m. W S.W. Ivrea with a church. Pop. 2478.

SPARSBOIT, two par. Eng. > Berks, 6340 ac. Pop. 308 > 2. See **MURTA**.

SPARTA, a vil. Murcia.

SPARTEL (Cape), the N.W. extremity of Africa, nearly opposite Ghinlar and a little W. Ceuta, lat. 35° 47' N. lon. 0° 43' W. It rises to the height of 1045 ft. above sea-level, the summit composed of large blocks of sandstone, from this height it slopes gradually to the water.

SPARTIVENTO > 1, (anc. *Heraclea Promontoria*), A cape to the S. extremity of Italy, prov. Calabria Ultra 1; lat. 37° 56' N.; lon. 16° 4' E. lon. It forms the termination of a continuation of the peninsula > 2, The S. point of Isl. Sardinia. lat. 37° 52' 30" N.; lon. 9° 52' 30" E.

SPASEK, three places, Russia. > 1. A. to. gov. and 110 m. N.N.E. Tambov, on the Studinka, with two wooden churches, and near it extensive iron-works, and manufactures of ironware. Pop. (1851) 8980 > 2, A. to. gov. and 30 m. E.S.E. Riazan, 1 bank Oka, with two churches, and a trade in corn and salt. Many of the inhabitants are bargemen on the Oka. Pop. (1840), 2645 > 3. A. to. gov. and 52 m. S. Kasan on the Bezzina, near its confluence with the Volga. P. (1851), 9132.

SPATZA, or **SPASZA** a market in Hungary co. Friesburg, 4 m. from Friesburg. It has a handsome church, and a trade in cattle. Pop. 1089.

SPAXTON, par. Eng. Somerset 3287 ac. Pop. 1080.

SPECHIA-DE-PARTI sat. Naples, prov. Otranto, E.S.E. Gallipoli with two convents, an hospital, and almshouse. Pop. 1500.

SPEPN a vil. and par. England co. Berks, on the Kennet, and the Kennet and Avon canal, 1 m. W. Newbury with a parish and a district church and an old castle. Open was the Spens of the Romans, and traces of their fortifications are still visible. What is called the second battle of Newbury was fought here in 1844. Area of par. 3780 ac. P. 3296.

SPEICHER, a vil. and par. Switzerland, cant. and 6 m. N.E. Appenzell at the foot of the Tugitnegg. It has a great number of well built houses and contains a handsome octagonal church, an orphan hospital, and poorhouse. Pop. 2500.

SPEICHER, a vil. Rhems Prussia, gov. Treves, near Bittburg; with a church, and manufactures of tobacco-pipes and pottery. Pop. 1678.

SPEIGTSTOWN a. n. W. coast, Isl. Barbados. It is a place of considerable importance, and is defended by three forts. Pop. about 5000.

SPELDHURST par. Eng. Kent; 8447 ac. Pop. 2839.

SPELLA (anc. *Hyphalae*) a. n. Italy delag. and 18 m. R.E. Perugia. It has a very steep street, and contains a number of Roman antiquities among others the tomb of the poet Propertius. Pop. 3000.

SPELSBURY, par. Eng. Oxford, 2800 ac. Pop. 578.

SPENCER GULF, S. Australia entrance between Cape Spencer and Cape Catastrophe, where it is 55 m. in width, running inland 300 m., where it terminates in a narrow point. It is supposed to be the Gulf of St. Vincent by York Peninsula. The entrance is in lat. 35° S.

SPENGE, a vil. Rhems Prussia, gov. Minden, circle and near Harford; with a church. Pop. 1860.

SPENNTHORNE, par. Eng. York (N. Riding), 4890 ac. Pop. 726.

SPERLONGA, a. n. Naples, prov. Lavoro, S. m. W.N. W. Gaeta, near the sea, with four churches. Pop. 1230.

SPEWALL, par. Eng. Warwick; 1090 ac. Pop. 106.

SPESSHARDT Brannau, or *Stemmar-Wald*, a mountain-range, Germany, which commences in the N.W. of Bavaria, r. bank Main opposite Mittelsberg, where the Odenswald is conceived to terminate, and stretches N.E. till it becomes linked with the W. extremity of the Rhenishgebirge. Its S. portion lies nearly due N. and S. its N. portion between E.W. and N.E. The former is the loftier and in the vicinity of Roßbrunnau and Alzenbach attains in each of the three summits of Roßbrunnau, Gelsenberg and Hockenhöhe, the height of about 2000 ft. Its prevailing rocks are granite, gneiss, and mica-schist, the last occupying a large portion of its sides. Limestone and sandstone occur in occasional spots. The Spesshardt contains several valleys remarkable for their narrowness and depth. It is well wooded, and furnishes considerable quantities of fine oak-timber. Salt is worked to a considerable extent at Orb. The drainage belongs wholly to the Main.

SPEZCHLEIT par. Eng. Worcester 779 ac. P. 166.

SPEZTUBURY par. Eng. Dorset; 2146 ac. Pop. 660.

SPEWALL, par. Eng. Suffolk; 1494 ac. Pop. 126.

SPEY, a river Scotland issues from a lake of some magnitude in Inverness-shire, between Loch Laggan and Loch Loech, flows N.E. through the beautiful valley of Strathpey, forming in the lower part of its course, part of the boundary between coo. Elgin and Banff and falls into the Moray Firth a little below Garmouth after a course of about 95 m. Its current at first is somewhat sluggish, but afterwards becomes so rapid, as to interfere with its navigation. It is chiefly used for floating down timber and is noted for its salmon fisheries. It receives numerous small streams, but its only important tributaries are the Deinken on the right, and the Avon on the left.

SPLYER, a. n. Bavaria. See **SPERNA**.

SPEYMOUTH, par. Scot. Elgin 7 m. by 2 m. P. 1898.

SPEZIA a seaport in Italy Piedmont, div. and 60 m. E.S.E. Genoa, on an alluvial flat, at the N.W. extremity of the gulf of same name, which here forms an admirable harbour. It is walled, has six gates and is defended by a castle. It is well and regularly built, and has a large and handsome square, several churches, an elegant town-hall, superior school, a Capuchin convent, beautifully situated on a rock which projects into the sea, extensive barracks, and an hospital. Pop. 9798.

SPEZZANO, two places, Naples > 1, (*Albanus*, or *Spesumello*), A. n. prov. Calabria-Citra, 10 m. S.S.E. Castro-villari with three churches. Pop. 1600 > 2, (*Grande*) A. n. prov. Calabria-Citra, E.N.E. Cosenza with three churches and a convent. The most of the inhabitants are of Albanian origin. Pop. 1640.

SPEZZIA (anc. *Typerace*) an isl. Grecian Archipelago, at E. entrance of the Gulf of Napoli, about 5 m. S.W. of the coast of Argolis, greatest length N.W. to S.S.E., 4 m.; greatest breadth, about 3 m. Though very rocky it has many patches of soil, which are carefully cultivated. It produces a few herds of goats. The chief town, bearing the same name, stands on the E. shore, and has a very respectable appearance. The harbour is good and the greater part of the inhabitants are employed in commercial pursuits. Pop. (alt.) about 6000, (in) 8000.

SPHAGNA (anc. *Sphactario*) an isl. Greece, W. coast, Morea, stretching for above 5 m. N. to S., in a long and narrow belt across the entrance of the Bay of Navarino. The sea has broken it up and divided it into three or four smaller islands. Sphagia is famous for the defeat of the Spartans in a naval battle by the Athenians. It is also the scene of Lord Byron's Corsair, and has long been a noted resort of pirates. It is included in the Ionian Islands under the protectorate of Great Britain.

SPIANALE a vil. and par. Tuscany, comp. Florence, 4 m. from Monte Carlo with a church. Pop. 1465.

SPICE ISLANDS. See **MONROVIA**.

SPIERDE, an isl. Norway, in the Skager-Rack, at the entrance of the Bay of Christiania, belonging to the group of the Hvalrode sat. lat. 59° 10' N.; lon. 10° 55' E.

SPIREZ a vil. and par. Switzerland, cant. and 24 m. S.E. Bern, near E.W. shore, Lake Thun; with a handsome church and the ruins of an old castle. Pop. 1819.

SPIGNO > 1, A. n. Naples, prov. Lavoro N.E. Gaeta; with manufactures of earthenware and paper. Pop. 1840.

2, 4 in Piedmont, div and 28 m. S.E.W. Alexandria, near the Bornia with a court of justice, and a handsome church and school. Pop. 3667.

SPIKE ISLAND, a small isl. Ireland, co. Cork, in the middle of Cork harbor on which are extensive artillery barracks, a large and handsome military hospital, and bomb-proof forts to defend the entrance of the harbor.

SPIKERÖG an isl. in the N. Sea, belonging to Hano-ver, and forming one of the group of low sandy islands which line the N. coast of that kingdom and the duchy of Olden-burg, between the mouths of the Weser and the Ems. P. 180.

SPILMBERGO a m. kingd. of Italy gov. Varese, prov. Fraili, 15 m. W. Udine. It has a bank, a garrison, with several provincial courts, two churches, a chapel, an old castle, manufactures of silk, and numerous mills. Pop. 2500.

SPILSBY a market town and par. Eng-land, co. and 51 m. E. Lincoln with an Estab-lished church, Independent and Methodist chapels, a courthouse, and house of correction a free grammar and two national schools. Acres of par. 2840. Pop. 1401.

SPIRAZZOLO a m. Naples, prov. and 48 m. W.S.W. Bari, near the source of the Lucco. It has two churches, two convents, an hospital and almshouse. Pop. 4600.

SPINETO, a m. Naples, prov. Salerno with two churches, eight chapels, and an hos-pital. Pop. 2250.

SPINGES, a vil. Tyrol circle Pusterthal about 12 m. from Brizeu. It is a struggling place with a church. Near it the French troops were defeated, in 1797, by the Tyrolese peasants.

SPINOSA, a m. Naples, prov. Benevento, N.E. Lago Maggiore, near bank Agri with a church and four chapels. Near it is a magnificent Roman bridge. Pop. 2680.

SPIRANO a vil. and com. Italy Lombardy gov. Milan, prov. and 9 m. E. Bergamo. It was in the middle ages de-fended by a strong castle, which makes a considerable figure in history and of which fences, drawbridges, towers, and other parts still remain, contains a church, and has a blast furnace, a saw and several silk mills. Pop. 1768.

SPIRE, or **STRASBURG** a river Rhinish Bavaria, formed by several torrents which descend from the E. slope of the Vosges, and after a course of about 40 m. joins the Rhine. It is much used for floating.

SPIRE (German, *Speyer*, Latin, *Augusta Noronensis*, or *Novemagus*), a m. Bavaria, in the Palatinate, at the confluence of the Spire with the Rhine, 10 m. S.E.W. Mannheim. It is surrounded by walls, with five gates, which have a very extensive circuit, but enclose a large quantity of ground either open or occupied with gardens, once covered with buildings. In early times Spire was a fortified outpost of the Romans, intended to guard against the attacks of the Alemanni.

In more modern times, especially under and after Charlemagne, it was long the residence of the emperors of Germany and the seat of the German diet and enjoying the privileges of a free city of the empire, with a monopoly of the carrying trade on the Rhine, rose to great importance, acquired great wealth and possessed a population of at least 27,000.

The imperial chamber *Reichs-Kammergericht*, the supreme appeal court of Germany, had its seat here for 500 years. The prosperity of Spire began to decline in the 17th century by a change in the channels of trade and other causes; but the great blow, from which it never has recovered, was inflicted by Louis XIV.

who, having made himself master of it in 1689 issued a tyrannical edict, ordering the inhabitants, under pain of death to emigrate within six days. Immediately after the town was committed to the flames and continued burning for three days. The more solid buildings were thrown down by gunpowder.

For many years after Spire was a mere heap of rubbish. It came into the possession of Bavaria in 1816, and much has since been done for its improvement, by the repair of old and the erection of new buildings, but as yet it does not possess many objects of much interest. The principal edifice is the cathedral, which happily retained the strongest means to blow it up, and remained unharmed. It is in the Romanesque style,

and is perhaps the most stupendous structure in that style now existing. It was founded in 1023 on the site of a Roman temple of Vaneus, and is flanked by two tall pointed towers.

The interior, by its vast dimensions, strikes the beholder with a kind of awe, but is chaotic and severe in its architecture, and devoid of ornament. It, however, contains several remarkable monuments, and the ashes of no fewer than eight German emperors. It is now (1854) in course of being re-stored, and numerous paintings have already been executed on the walls of the interior. Spire contains 14 other R. Catholic and two Protestant churches, a Dominican monas-

tery an ecclesiastical seminary, lyceum, gymnasium, Latin agricultural, and industrial schools. It is the seat of a bishop the seat of several public courts and offices possesses a botanical garden, a hall of antiquities, and several hospitals, and has manufactures of wax-candles and tobacco some ship-ment and general trade, and several important corn and cattle markets. Of the numerous fairs held at Spire, the most memorable is that of 1592, when the Reformers gave in the famous protest which originally conferred upon them the name of Protestants. Pop. 8340.

SPITAL, a m. Austria, Carinthia, 23 m. N.W. Villach with a church and castle and an extensive manufacture of peas, which have a large sale in Italy. Pop. 1700.

SPITALFIELD, a par. England co. Middlesex, bor. Tower Hamlets, forming one of the E. suburbs of London, and situated on the line of the Eastern Counties railway. It early became celebrated for its silk manufactures, which were established by French refugees after the revocation of the edict of Nantes, and is still chiefly occupied by silk-weavers. Pop. 37,848.

SPITHEAD, a well known and excellent roadstead formed by the channel between the Isle of Wight and Portsmouth. The depth of water at low tide is from 10 to 16 fathoms.

SPITAL, par. Wales, Pembrokeshire, 2674 m. Pop. 620.

SPITTLE, or **SPITTAL**, a vil. England on Northampton-land, at the mouth of the Tweed, 1 m. S.E. Berwick. It is much frequented for bathing-quarries; and has a Presbyterian chapel, and several houses for curing leprosy. There is an extensive colliery in the vicinity. Pop. 1746.

SPITZ, a market m. Lower Austria, bank Danube, W.S.W. Krems with a castle, church and hospital; several vinegar-factories, saw and other mills and a trade in vinegar, wine, and wood. It is a steamboat station. Pop. 1951.

SPITZBERGEN, a group of islands, Arctic Ocean between lat. 76° 20' and 80° 40' N.; lon. 3° and 22° E. nearly equidistant from the North Cape and the E. coast of Greenland. It consists of three large and a vast number of small islands, containing altogether an area roughly estimated at 22,000 sq. m. The large islands are Svalbard, Jan Mayen, West-land, and South-land or New-Friesland, the two last taking their name from their position in regard to the first, from which the one is separated on the N.E. by Wager's Strait, and the other on the S.E. by Water-Tyrone's Strait. Next

THE CATHEDRAL OF SPIRE.—From Allgemeine Monatshefte zu Pictorial.

in close to the large islands is that of Charlo, opposite to the W coast of Spitzbergen. Very little is known of their interior, but the coasts have been repeatedly explored, and present numerous glaciers and mountain-chains breasting with granite peaks, many of which exceed 4000 ft. in height. Between the mountains and the shore a narrow belt of low land often intervenes, but frequently the cliffs reach down to the coast, and form precipitous cliffs, which seem to overhang the ocean. The climate is intensely cold. Even during the three warmest months the mean temperature on the W coast is only 34.50 and vegetation is confined to a few plants of rapid growth, which do not run above three or four inches, and for the most part spring, flower, and seed in a month or six weeks, producing nothing on which human beings could manage to subsist. During winter which sets in at the end of September, the sun remains for four months below the horizon, but at so short a distance from it that in every 34 hours the darkness is relieved for about six hours by a faint twilight. A similar effect is produced by the unusual brightness of the moon and stars, and still more by the remarkable brilliancy of the aurora borealis. The larger forms of animal life are foxes, bears, and reindeer, in pursuit of which, as well as the mooses and seals abounding along the coasts, the islands are frequently visited by the Norwegians and Russians. Sea-birds are so numerous that they literally hide the rocks and darken the sea. The minerals are known to include beautiful marble and good coal. The group appears to have been first discovered (1658) by Willoughby, the celebrated English navigator. They were again discovered, in 1596, by the Dutch navigator Barents in endeavouring to effect a N.E. passage to India. They have since been repeatedly visited, both by whalers and discovery ships. One of the most remarkable incidents in the history of Spitzbergen is the residence of four Russian sailors upon it for six successive years without injury to their health.

SPITZWORTH, par Eng. Norfolk, 1884 ac. Pop. 41.
SPLÜGEN, a pass in the Helvetic Alps, leading from the Swiss can Grisons into Lombardy. The road, on which great engineering skill has been displayed, is a most important thoroughfare, but is liable to be occasionally interrupted by avalanches. Its highest point is 5814 ft. above the sea-level.
SPOEFTWORTH, a vil. and par England, co. York (W. Riding), 3 m. W. N. W. Wetherby. It is well built, and has a large and elegant church, a Wesleyan chapel, several schools and the remains of an ancient castle, once the seat of the Percy family. Area of par. 19,956 ac. Pop. 8599.

SPOLETO a deleg. Italy Umbria, bounded N. by deleg. Perugia and Camerino. E. delegs. Anagni and Naples. S. deleg. Rieti and W. deleg. Viterbo. length, N.E. to S.W. 60 m., breadth, 38 m. area about 354 sq. m. Its E. side is occupied by the chain of the Central Apennines, where the culminating point of the district occurs in Mount Velino, 8123 ft. Ramifications of this chain traverse the deleg. and make the surface generally mountainous. It belongs generally to the group of the Tyrrhenian Sea, but a small part, situated on the E. slope of the Apennines, sends its waters to the Adriatic. The most fertile valley is that of the Spoleto, which yields considerable crops of maize, wheat, beans, and pease and produces wine, olives, melons, almonds, and chestnuts. Here too there is abundance of fine timber. The more mountainous districts are pastures, and rear numbers of cattle. In some quarters the rearing both of silk-worms and bees form important branches of industry. A great deal of silk is spun, and excellent cheese made, but manufactures, properly so called, can scarcely be said to exist. Pop. (1845), 131,453.

SPOVETO (anc. Spoletum), a to Italy Umbria, cap. above deleg., on the side of a steep hill. L. bank Tusciano, 61 m. N.N.E. Roma. It is commanded by a strong castle, seated on a height, which is separated from that on which the town stands by a deep gorge, and approached by a bridge of extraordinary height, along which an aqueduct has been built. The houses are in general indifferently built, and the streets are narrow and uneven. The principal edifice was the cathedral, in a commanding situation, with a facade formed by five Gothic arches, supported by Grecian columns, the Gothic churches of St. Domingo and San Giovanni the collegiate church of San Pietro outside the town, with a profusely sculptured front, and the circular already mentioned,

originally built by Theodorico, king of the Goths, repaired by Naras, the successor of Belisarius, subsequently rebuilt, and now chiefly used as a prison. The only manufactures, and that not of much importance, is hats. Pop. 6115.

SPOULTON, a tn. Naples, prov. Abruzzo-Ulter. I., E. Civile-di-Pescina. It is composed of three villages; and contains a church and a convent. Pop. 3124.

SPOUDON a vil. and par England, co. and 33 m. E. Derby on an acclivity, and well built. It has a church a Wesleyan and a Primitive Methodist chapel, three national schools, and two or three friendly and benevolent societies. Stocking-making is carried on to some extent. Area of par., 4800 ac. Pop. 3052.

SPOUNTIN, a vil and com. Belgium, prov. and 12 m. S.S.E. Namur, on the Boos. It has an ancient Gothic church, a four-mill, and a trade in agricultural produce. Pop. 595.

SPORADIS, the name given to a number of islands in the Grecian Archipelago out of which the Greeks have formed the two divisions of the W and the N Sporades. (See GREECE.) The name of E. Sporades is given to a Turkish group in which the chief islands are Samos, Nicara, Patmos, Lero, and Calamò.

SPOURLE-WITH-FALSBURY par Eng. Norfolk, 8817 ac. Pop. 847.

SPOUT par Scot. Haddington, 10 m. by 5 m. P. 595.
SPOUTLAND a township, England, co. Lancashire, near Rochdale, of which part of it may be considered a parish. It has a church, Wesleyan, Unitarian and other Dissenting chapels, an endowed school; manufactures of cotton goods, and extensive quarries of slate, pavement, and other stone. Pop. 23,476.

SPOTOFARNO a vil and com. Italy Piedmont, div. Genova, 3 m. N. Aoh. 1 bank Poes, where it falls into the Gulf of Genoa. It has a church, a Capuchin convent, a school, hospital and charitable endowment. Pop. 1373.

SPOULVING a vil. Holland, prov. N. Brabant, 11 m. W. S. W. Harenbosch, plentifully adorned with trees; and having a church and school; inhabitants chiefly engaged in stone-mak- ing. Pop. 1623.

SPRATION a vil and par England, co. and 6 m. N. N. W. Northampton. It has an ancient church, with a beautiful porch and highly-ornamented spire, Independent and Baptist chapels, an infant and two other schools, and a chalybeate-spring, once in high repute for the cure of scrofulous affections. Area of par., 2810 ac. Pop. 951.

SRELL, a river Germany, rises in the E. of Saxony, circle Bamberg N. side Reichenbach, near New Salza. It flows very circuitously N. N. W. passing the town of Lobau, enters the Prussian prov. Brandenburg, passes the towns of Spremberg, Cottbus, Lübben where two branches, by which it had previously formed an island, called the Spree-Wald, again unite. Beyond Lübben it describes a semicircle which terminates in the Lake of Belmeling, then proceeds N. past Beeskow and Miltrow, where a canal connects it with the Oder, and W. N. W. past Furstenau and Kopsch, traverses Berlin, and a little below Charlottenburg, joins 1 bank Havel at Spandau, after a course of nearly 200 m. It has no alluvium of any consequence.

SREMBERG a tn. Prussia, prov. Brandenburg, gov. and 55 m. S. Frankfurt, on an island of the Spree. It has a court of law a castle, church, courthouses, and manufactures woolen and linen cloth and hats. Tobacco is largely grown in the vicinity. Pop. 4673.

SREMBERG (Oder, Niesitz, and New) a vil. Saxony, circle Bamberg near Stolpen with a castle, manufactures of linen, silk-works, bleach-works, breweries, and several saw and flour mills. Pop. 1489.

SRENDLINGEN two vils. Nassau-Darmstadt—1, A. vil. Rheinhessen circle Bingen with a justice of peace court and a church. Pop. 3021.—2, A. vil. Starkenburg, circle Offenbach, with a church. Pop. 1695.

SREYTON, par Eng. Devon 3806 ac. Pop. 384.

SREYDLINGTON par Eng. Lincoln 3120 ac. P. 318.

SREYDMONT, a vil. and com. Belgium, prov. and 9 m. S. S. E. Liège, 7 bank Amblève, with breweries and several mills, and is an smelting-works, blast-furnaces and several quarries of fine building-stone. Pop. 2774.

SRENGE, a tn. Hanover princip. Calenberg, near the source of the Aller. It has a trade in iron and wood. P. 1936.

SPRINGFIELD, a vil. and par. England, co. Essex pleasantly situated on a commanding height on the Chelmsford and Maldon Navigation, 1 m. N.E. Chelmsford. It has an ancient parish church, with an embattled tower; a district church, and a Wesleyan chapel. It is said that Goldsmith here composed his *Deserted Village*. Area of par., 2675 ac. Pop. 2623.

SPRINGFIELD, several places U. States.—1, A city, Massachusetts, beautifully situated among rich alluvial meadows, 1 hour Connecticut, here navigable and crossed by a bridge, and on the Western railway, about 20 m. N. Hartford, and nearly equidistant from Boston and Albany. It consists chiefly of a spacious street, called Main Street, which stretches nearly 3 m. parallel to the river though at some distance from it, and contains many elegant buildings. This street is intersected at right angles by several minor streets, and has also behind it, where the ground rises so as to command a view of the valley several ranges of handsome residences.

Among the public edifices are about seven churches, of which the First Congregational is conspicuous for its fine situation in the centre of the town. A courthouse and jail, three academies, several splendid hotels, and the U. States armoury or arsenal, finely situated on a height about $\frac{1}{2}$ m. E. of Main Street, and consisting of an imposing pile of brick-buildings arranged round a square. Here from 150,000 to 200,000 stand of arms are stored and from 12,000 to 15,000 are usually manufactured. The mills, foundries, and workshops connected with the armoury are the most important industrial establishments of the town, but the extensive water-power furnished by Mill river which here joins the Connecticut, is also employed for various other purposes as iron-works, machine-shops, paper, cotton, and other mills. In the vicinity of the railway-station is a large manufacturing of cars and other requisites of railways. Pop. (1850) 11,765.—2 The cap. of Illinois, on the edge of a large and beautiful prairie on the Illinois and on the railway to Naples, about 100 m. N. by E. St. Louis. It was laid out on a regular plan, with a central square and wide streets, crossing at right angles, but did not make decided progress till 1840, when, owing chiefly to its position near the centre of the state, it supplanted Vandalia as the capital. Its public edifices include six churches, several of them handsome structures, a state-house, well situated in the centre of the square, three academies and a beautiful courthouse, state-bank, jail, market-house, &c. Among the manufacturing establishments are four carding-machines and a foundry the trade also is extensive. Pop. 4658.—3, A city, Ohio, on the E. fork of Mud river, and at the junction of several important lines of railway, 48 m. W. by E. Columbus. It has seven churches, the Westernburg college and theological seminary, a handsome courthouse and other public buildings, numerous mills and manufacturing establishments. Pop. 5106.

SPRINGTHORPE, par. Eng. Lincoln 1073 ac. P. 300
SPROUTLEY, par. Eng. York (E. Riding) 1280 ac. Pop. 463

SPRÖCKHOVEL (Nixdorf) a vil. Rhenish Prussia, gov. Arnsberg near Hagen with a church. Pop. 1904.

SPROGGE, a small isl. Denmark, in the Great Belt, about 7 m. E.N.E. Nyborg, in Fuenen. It has a lighthouse on a hill 64 ft. high; lat. 55° 20' N. lon. 10° 57' E. (L.), and telegraph in correspondence with that of Korsø, near Nyborg. There is only one dwelling-house upon it. It lies in the line of the subat. winter-passes through the Great Belt.

SPROUTBOUGH a vil and par. England, York (W. Riding), 2 m. W. Doncaster with an ancient church and near is a modern stone-bridge of seven arches, across an arm of the Don. Area of par., 3365 ac. Pop. 528.

SPROUTTAU a m. Prussia, prov. Silesia, gov. and 37 m. N.W. Legnica, r. bank Bober and l. bank Sproutau, which here joins it. It is walled, has three gates, two suburbs, a court of law, an assizes public offices, a Protestant and two R. Catholic churches; in hospitals, manufactures of woollen and linen cloth, glass-works, and several mills. Pop. 4196.

SPROUTHTON, par. Eng. Suffolk 2325 ac. P. 555.
SPROUTTON, par. Scot. Roxburgh 4 m. sq. P. 1424.

SPROUTSTON, par. Eng. Norfolk 2576 ac. P. 1806
SPROUTTON, par. Eng. Leicester 2660 ac. P. 426.

SPUI (Har), a stream, Holland, prov. S. Holland. It is a branch of the Old-Meuse, separates islands Bollenland and Voorn, and falls into the Haringvliet.

SPURN HEAD, a promontory, England, forming the most E. extremity of the coast of Yorkshire. It is a long narrow headland resembling a stable, with its convexity outwards, towards the German Ocean, and its concavity inwards, towards the Humber. It consists of a long shingly and sandy beach, on which the sea is constantly making inroads, and fleets are understood that the waves may ultimately cut it across, convert it into an island, and, rushing without obstacle into the Humber, cause great devastation. Two lighthouses have been erected upon it; lat. 55° 34' 43" N.; lon. 0° 17' 13" E. (L.).

SPY, a vil. and com. Belgium, prov. and about 7 m. N.W. Namur. Coal and limestone are worked in the neighbourhood and there are two breweries, a flour and an oil mill. The trade is in wool and butter. Pop. 2377.

SPYRIZ, par. Scot. Elgin 8 sq. m. Pop. 1844.

SQUAM, a lake, U. States New Hampshire, 36 m. N. Concord, 5 m. long, by 6 m. broad with numerous islands, and well-stocked with fish.

SQUILLAGE [san. Scylaceum] a m. Naples, prov. Calabria-Ultra II., 10 m. S.S.W. Catanzaro, in an unhealthy situation, about 5 m. from the gulf of the same. It contains a handsome cathedral, three other churches, and a seminary, and has manufactures of earthen vases, which are much admired. Near it are salines of iron and plumbago. Pop. 8000.

SQUINZANO, a m. Naples, prov. Otranto, 7 m. N.W. Lecce with a church five chapels, and a convent. Cotton is cultivated in the vicinity. Pop. 2730.

SRAYANA BELGITA, a wall built by H. Hindostan, Mysore dominions, 33 m. N.W. by W. Seringapatam, lat. 13° 51' N., lon. 76° 42' E. celebrated as being the principal seat of the Jain worship. There is here a colossal statue, 78 ft. high, of Gomata-Baya, set out of the solid rock.

SREBERNIK, or Sagerhausen.—1 A m. European Turkey prov. Rumia, 30 m. N.W. Ezerik. Pop. 1600.—2 A vil 25 m. E. Ezerik. There are silver-mines in the vicinity of both.

ST. AAT, or STROMA a market in Bohemia, circons 12 m. S.W. Pilsen, on the Balbassa, with a church, school, and two hospitals; a townhouse and barracks a best-wool sugar factory and three mills. Pop. 1092.

STAATSBOYGDEN a vil and par. Norway, prov. and 15 m. W.N.W. Trondhjem, N. side of the Trondhjem-fjord. Pop. 3200.

STABANNAN, par. Ire. Louth; 4377 ac. Pop. 1981
STABIO, or STABIO (san. Stabiana) a vil and par. Switzerland, can. Ticino, about 10 m. S.E.E. Lugano. Near it is a sulphurous spring. Pop. 1651.

STABROECK, a vil and com. Belgium prov. and 8 m. N. by W. Antwerp, with a brewery, tannery, flour and barley mills, a considerable trade in wool, butter, honey, wax, and grain. Pop. 2222.

STABROEK city British Guiana. See GROSSCROWNS.

STACHELBERG, a mountain, Alps can. Glarus at the foot of which there is a much-frequented bathing-establishment. The situation is very beautiful, and the waters, of a sulphurous alkaline nature, are in high repute.

STACKALLAN par. Ire. Meath; 2351 ac. Pop. 648.

STACKPOLE-ELDON, par. Wales, Pembrokeshire, 2845 ac. Pop. 321.

STADUMNY par. Ire. Kildare; 869 ac. Pop. 184.

STADUMNY or HARKENVELDY a m. Holland, prov. S. Holland, lat. Overflakken, 12 m. S.E.E. Breda, on the Haringvliet; with a church, a school, a harbour, and a little trade. Pop. 568.

STADE, a m. Hanover, cap. landroost, on the Schwanne, here crossed by a bridge, about 4 m. above its confluence with the Elbe, 21 m. W. Hamburg. It is a place of some strength, being surrounded by walls with four gates, and otherwise fortified. It is divided into four quarters, contains three churches, a gymnasium, a normal primary, and a house of correction, and has some shipping and general trade. P. 1814.

—THE LANDROOST area, 169 grs. ac. m. bordering on the Hamburg territory the Elbe, gov. Lüneburg, the Aller and Weser, and the N. Sea, is monotonously flat, and lies so low as to require the aid of strong embankments to protect it from the tides. Much of it is so marshy as to be unfit for arable culture, but much of it is a rich alluvium, on which heavy crops are raised. Its inhabitants are almost all Protestants. Pop. 263,916.

STADHAMPTON a vil. and par. England, co. Oxford, 5 m. N. Remington; the birthplace of John Owen, the celebrated Nonconformist divine, and vice-chancellor of the university of Oxford during the commonwealth. Area of par., 639 ac. Pop. 401.

STADT ILK, a to Germany. See ILK.

STADT-SCIZA, a to. Saxo-Wimar, 15 m N N Wimar; with a castle, salt-springs, and two mills. Pop. 1389.

STADTAMHOF [Latin *Riparia*] a to. Rararia, Upper Palatinate, r bank Danube, which here receives the Regen, forms an island, and is crossed by a bridge communicating with Barchon, of which Stadtamhof may be considered a suburb. It has a church on Augustine monastery, two hospitals; numerous breweries, two mills and some shipping trade. Pop. 2039.

STADTHAGEN a to. Germany, principality Lippe-Schaumburg, 9 m. N E. Bielefeld. It is walled; has three gates, two churches, one of which contains the tombs of the princes of Schaumburg, a Latin school, and a mineral-spring. Coal is worked in the vicinity. Pop. 1918.

STADTL, or **MAURKRON**, a vil. Bohemia, circle Rakonitz, 12 m from Beraun. It has a church, a school, tile-works, and a mill. P. 968.

STADTLOHN, or **STADT LOKA**, a to. Rhineland Prussia, gov. and 80 m. W Münster, with a church, manufactures of linen, earthenware and tobacco-pipes, numerous bleachfields, and an extensive trade in linen and cattle. P. 2270.

STADTOLDENDORF a to. Brunswick, on a hill, S. E. Brunswick. It is walled; has three gates, a church, and manufactures of linen. Pop. 5149.

STADTTEINACH a to. Bavaria, Upper Franconia, on the Steinach, 13 m N Bamberg, with a church, a chapel, porches, and the ruins of an old strong castle, blast-furnace, and other iron-works, and several mills. Near it are quarries of marble and serpentine with polishing and cutting machines. Pop. 1300.

STADEN, a vil. and com. Belgium, prov. W. Flanders, 18 m. S. E. W. Brugge, with manufactures of linen, a tobacco-factory, a rope-work, and several breweries, tanneries, and corn-mills. Pop. 4693.

STAEFA a vil. and par. Switzerland, on 18 m S. E. Zurich, N shore of Lake Zurich; with a church, and manufactures of silk and cotton. Pop. (agronautical), 8508.

STAFFA a small but celebrated isl. Scotland, co. Argyll, one of the Inner Hebrides, 6 m to 8 m. W Mull lat 56° 29' N lon. 6° 21' W. It is of an irregular oval shape, about 1½ m. in circumference, presenting an uneven table-

land, the arches and floorings of the caves, strongly resemble architectural designs, and have been described by terms taken from the works of art. The coast is indented with numerous romantic caverns, of which the most remarkable is Fingal's

ENTRANCE TO FINGAL'S CAVE, STAFFA.

Cave the opening into which is a magnificent archway, 66 ft. high at mean tide, supporting a massive entablature of 30 ft. additional and receding for 337 ft. inwards, the entire front, as well as the great cavernous sides being composed of countless complicated ranges of gigantic columns, beautifully jointed, and of most symmetrical though somewhat varied forms. A deeply channelled fissure, parallel to the sides, extends along the whole length of the ceiling, which is ornamented by pendant clusters of columns, whitened with calcareous stalagmites. As the sea is so entirely able from this cave, it forms its constant flooring, along which in calm weather a boat may be pushed. The water at the entrance is 18 ft. deep at the inner extremity about 9 ft. The average diameter of the basaltic columns throughout the island is about 2 ft., but they often extend to 8 ft. and even 4 ft. Their general forms are pentagonal and hexagonal, but the number of sides is sometimes increased to seven and nine, and they are rarely found rhomboidal or triangular. In position they are sometimes erect, sometimes oblique, and not infrequently horizontal, while they are often curved, and variously jointed and complicated. There are several other caves along the coast of the island of which the most noteworthy is called Clam-shell Cave, from the peculiar curve in which the basaltic columns recline, giving it somewhat the appearance of a petten-shell. It is 80 ft. in height, 16 ft. to 18 ft. broad and 130 ft. long; its lateral dimensions gradually contracting as it recedes from the opening.

STAFFELSTEIN, a to. Bavaria, Upper Franconia, on the Lauter 12 m. N Bamberg. It has a church, three chapels, and an hospital, manufactures of woollen cloth, and several mills. Pop. 1181.

STAFFORD, a co. England, bounded N by Cheshire, N E and E. Derbyshire S E Warwickshire, S. Worcestershire, and W Shropshire, greatest length, N to S, 65 m. central breadth, 35 m., area, 780,890 acres, or 1220 sq. m. The surface in the N consists chiefly of wild moorlands rising in several parts more than 1000 ft. above sea-level, and formed of several long ridges, which terminate what has been called the Pennine chain of England, and are separated from each other by deep valleys sloping more or less gradually towards the Trent. The midland S parts of the county are much less elevated, and generally of a much more pleasing description, consisting for the most part of level lands, diversified by gentle undulations, though occasionally rising into loftier heights, as in Tenter's Hill, one of whose peaks exceeds 900 ft. By far the finest part of the county is the valley of the Trent, which traverses it N W to S E, and both by its main stream and its nume-

THE CLAM-SHELL CAVE AND ISLAND OF BOUACHALL, STAFFA

land resting on cliffs of variable height. Greatest elevation, 144 ft. It is composed of a fundamental ledge of rocks of conglomerated trap or tuff, to which succeeds a grayish-black, hard, and compact columnar basalt, which is covered by a mass of shapeless basalt of the same description, with small columns interspersed through it. The whole facade of the

rons tributaries, has been made available for a chain of canals, which give the county the benefit of direct water-communication with the Mersey, Humber, Severn, and Thames. The geological formation most largely developed is the new red sandstone, which occupies the whole of the central part of the county, but in the N and S gives place to two valuable coal-fields—the one in the N called the Pottery coal-field, from the number of potteries which have been established upon it, and the other in the S, usually known as the Dudley coal-field, and celebrated alike for the extraordinary thickness of one of its seams, the excellence of the coal for iron-making, and the number and richness of its iron-ores. From beneath the N coal-field the coarse sandstone, called millstone-grit, crops out and covers a considerable district of the S coal-field, particularly in the neighbourhood of Dudley crags on mountain-limestone. The climate is characterized by great coldness and humidity making the harvest both late and precarious. About three-fourths of the whole surface is arable but much of the soil is of a cold, clayey nature, fit only for moorland uses which, according to a very tedious system of agriculture, are often sown three years in succession, the land being then, while full of weeds, laid down to grass. In other parts a much better system is pursued and proper rotations are observed. This is particularly the case in the S where the best land occurs, and fertile loams, of a gravelly sandy or calcareous nature, admit the adoption of the Norfolk husbandry. Along the banks of the streams are many rich meadows, natural or artificial, but neither grazing nor the dairy forms a very important branch of rural economy. The manufactures, chiefly of china and earthenware in the N and of iron in the S, are so important as to form among the greatest seats of their respective branches in the kingdom. The former occupying the extensive and populous district of the Pottery, owes much of its prosperity to the enterprise and ingenuity of the late Josiah Wedgwood, the latter includes the iron manufacture, in all its branches, from the mining and smelting of the ore to its conversion into malleable iron and steel, and then into various kinds of ironmongery. In carrying on this important trade, Staffordshire has the benefit not only of the chain of canals already mentioned, but of a large railway development, the London and Northern crossing it in a N N W direction from Dalton, and sending one the Shrewsbury and Birmingham, the Trent Valley and other branches, which connect it with the N Staffordshire and Midland lines. The principal towns are Stafford (the capital), Lichfield, Walsall, Wolverhampton, Dudley, Tamworth, Burton upon Trent, Uttoxeter, Chesley, Hanley, Burslem, and Newcastle-under-Lyme. The political division of the county is into 4 and 5 S. Staffordshire, each of which sends two members to the House of Commons. Pop. 608,716.

STAFFORD a wmo and pari bur and market tn. cap. above so, pleasantly situated 1. bank S.W. near the junction of the North-Western railway with the Trent Valley branch 123 m. N.W. London. It was surrounded by walls which existed till the late civil war when they were completely demolished by the parliamentarians, is entered from the London road by a handsome bridge, and is in general well built, consisting of two principal and several minor streets, well paved, lighted with gas, and lined with brick-houses, covered with elms. The supply of water is abundant. The environs are pleasant, and studded with handsome mansions and villas. The principal buildings and objects of interest are three Elizabethan churches, two of them parochial and one of them a large and the old cemetery streets, recently repaired, with an octagonal tower several richly-decorated windows, and many ancient and modern monuments, Presbyterian, Quaker, Independent, Old and New Connexion Methodist, Baptist, and E. Catholic chapels, a well-endowed free grammar, and British, national, and ragged schools, a mechanics' institute the castle, situated about 1½ m. S.W. of the town, and recently rebuilt on its ancient site a handsome modern county-hall a county jail and house of correction, an infirmary, lunatic asylum, and theatre. The principal manufactures are leather for which there are several large tanneries, and boots and shoes made to some extent, both for the London market and for exportation. The breweries, like many others in the county are famous for their ale. Races are held in October, on Marston Common. The borough is governed by six

aldermen and 16 councillors; and has sent two members to Parliament since the time of Edward I. Pop. 11,839

STAFFORD, a tn., U. States, Connecticut, 25 m. N.E. Hartford, at the junction of the Farmington and Willimantic rivers, and on the New London, Willimantic, and Palmer railways. It has a large square in its centre, and contains several churches; has manufactures of cotton and woollen goods, machinery, carpenter tools, and other cutlery, leather, and pewee. The hog-scurf, abundantly obtained in the neighbourhood, supplies several furnaces; and the chalybeate-springs, considered among the most efficacious in the U. States, attract many invalids and other visitors. Pop. of township, 3941

STAFFORDSTOWN, par. Incl. Month, 617 ac. P 61 STAGLIENO a vil. and com. Italy Piedmont, dt. and about 2 m. S. Genoa, r. bank Bioglio with two churches and a handsome palace. Pop. 1984.

STAGNO-GRANDE, or STON, a tn. Dalmatia, Croatia and 25 m. N.W. Ragusa, on the peninsula of Saboncello. It was formerly surrounded by strong fortifications, but is now only defended by a castle in good condition. It has a court of justice, and several public offices, a church, a sailing-shed, and an excellent harbour at which a considerable trade is carried on. Near it are extensive salt-works. Pop. 5490.

STAGNONE, a group of islets in the Mediterranean W coast Sicily, from which they are separated by a narrow channel, 19 m. S.S.W. Trapani. The principal are Burono, Favilla, and Cardina. The last, which is the largest, is about 2 m. long, by rather less than 1 m. broad, and both it and Favilla are each defended by a tower.

STAGNOLD par. Eng. Bedford 3386 ac. Pop. 727

Pop. 516.

STALLUPÖHÖNEN a tn. Prussia, prov. E. Prussia, gov. and 16 m. E.N.E. Graudenz, with a court of law a church, manufactures of linen, and several mills. Pop. 8078.

STALYBRIDGE, a market in England, co. Lancaster

and Chester, 7 m. E. Manchester, on gentle declivities on both

banks of the Tams with three principal streets, one of which the oldest, is very irregular, the other two straight and well kept. Houses mostly built of brick, and two stories in height, well supplied with water, and is lighted with gas. There are three churches and nine chapels, the latter belonging to Wesleyans, Primitive, Baptist, R. Catholic, &c. None of the buildings are deserving of particular notice; the oldest and most remarkable is the chapel of ease, an octagonal structure, built upon a rock rising perpendicular from the Tams. The only other public building is the market-house, erected 1881, at a cost of 25000. All the different religious denominations have Sunday-schools in connection with them, besides which, there are 18 day-schools, a British and several dame schools, a mechanics institute, with library and reading-room; and some sick and burial societies. Spinning cotton yarns and weaving calicoes are the principal manufactures carried on here. There are 19 of these establishments giving employment to 9500 hands. Some of them are very extensive, employing from 1000 to 1400 persons each. There are also two calico print-works, six iron-forges and machine and millwright shops. Stanleybridge is particularly well supplied with millinery commodities. The Manchester Road, and Lincolnshire, and the Lancashire and Yorkshire, have each a branch to the town, while the Manchester and Leeds division of the London and North-Western passes through it. Pop. (census of 1851) 30 780 but including that portion of the town which is in the parish of Dukinfield, 25 000 to 26,000.

STAMBOUL, cap. Turkey. See CONSTANTINOPLE.

STAMBRIDGE, two pars. Eng. Essex 1—1, 1664, 1670 ac. Pop. 892—2, 1842; 600 ac. Pop. 158.

STAMBRIDGE, East Angles, a vil and com. Hants, prov. Hants, 11 m. N.W. Mums with manufactures of woollen stuffs and tobacco two breweries, several large stone-quarries, and four limekilns. Pop. 2063.

STAMFORD, a market to. and par. bar. England, co. and 39 m. S. Lincoln, pleasantly situated on a slope above the Welland, here crossed by an ancient and a handsome new bridge, and on a branch of the Great Northern railway. It is an ancient and irregularly built, consisting of substantial houses of freestone, roofed with slate is well paved, well lighted and supplied with railway communication. The Manchester Road, five parish churches, one of them All Saints, an ancient and handsome structure, with a lofty embattled tower and octagonal crocketed spire another, St. Mary's, also ancient, with fine specimens of early English architecture and a third St. John's, with a fine wooden roof and screen; Independent, Wesleyan, and Reformed Methodist, and R. Catholic chapel, well endowed grammar and blue-coat, and various other schools, a large town-hall and house of correction, a theatre, general and other hospitals, a literary and scientific institute, with a museum, public library, and numerous charities. There are no manufactures of any consequence, but a large maling business is carried on the two weekly markets, particularly one for corn are very important, and numerous cattle-fairs partly for fat stock, are well attended. Besides the railway, which gives communication with all the great lines of the kingdom, the Welland affords a good outlet, being navigable for boats and barges. The bar sends two members to Parliament. Pop. 18,680.

STAMFORD—1 A vil and township, Canada West co. Welland, about 8 m. N.W. of the Falls of Niagara, with Episcopal, Presbyterian, and Wesleyan Methodist churches. Hops are successfully cultivated in the vicinity. Pop. (1862) 3115.—2, A vil and township, U. States, Connecticut, near the mouth of the Mill, on the New York and New Haven railway 36 m. E. by N. New York. It has several churches, a wire-factory, lumber-yard, foundries, and mills, a harbour admitting vessels drawing 3½ ft. water, and an active trade. Pop. 5004.

STAMFORD-BARON ST. MARTIN, par. Eng. Northampton 2170 ac. Pop. 1778.

STAMFORDHAM, a vil and par. England, co. Northampton—13 m. N.W. Newcastle upon Tyne, ancient church in the early English style, a Presbyterian and a Wesleyan chapel, and two schools. Area of par., 18,066 ac. Pop. 1731.

STAMMERIM, a vil. Württemberg circle Schwabmünd, on the Nagold, with a church and a mill. Pop. 1156.

STAMPALIA, or STAMPALLA [anc. *Aspelpolis*] an isl. Grecian Archipelago, in the S. Cyclades, nearly equidistant from Rhodus and Rhodes; lat. 36° 50' N.; lon. 26° 50' E.; greatest length N.E. to S.W. 15 m.; mean breadth, 3 m. It is very irregular in shape, indented into bays, several of which form good harbours and surrounded by a great number of rocky islets. The surface is mountainous, but the soil is generally fertile. One of the greatest drawbacks on the island is the want of good water. There are several villages, of which those of St. Andrew and Livorno, both with good ports, are the largest. Many of the inhabitants live by fishing.

STAMPEN Spruce, or STUPAVA a market to Hungary, co. and 10 m. N.W. Pressburg with a castle, surrounded with towers and surrounded by gardens, a church and synagogue, a copper and iron mill and both marble and slate quarries. Fine crystals are found and polished here, chiefly by Jews. Pop. 3874.

STAMIANE or STIVALL, a group of islets in the Ionian Sea, nearly equidistant from the W. coast of the Morea and the E. extremity of Zante lat. 37° 15' N.; lon. 21° E. The largest are the Harpy and the Convent, the latter so called for containing a Greek monastery. The chief products are olives and other fruits. The group is included among the Ionian Islands.

STANHOE par. Eng. Norfolk 1469 ac. Pop. 517.

STANHOPE a to. and par. England, co. Durham, on the Wear, near the terminus of the Pontop and South Shields railway 6 m. W. Wolsingham. It has a parish church, on a height above the town with a massive tower, probably used on early times as a fastness. A chapel of ease, and various Dissenting chapels, extensive limekilns, valuable lead-mines, and a little coal. Bishop Butler was rector of Stanhope, which is one of the most valuable livings of the church of England, and is said to have here composed his celebrated *Analogy of Religion*. Area of par., 54,870 ac. Pop. 8882.

STANION, par. Eng. Northampton 1860 ac. Pop. 565.

STANISLAUS—1 A river L. States, California, formed by three forks from the Sierra Nevada, flows W. and falls into the San Joaquin at the town of Stanislaus. It has numerous affluents.—2 A vil or h. back above Stanislaus, 13 m. E. by E. Stockton, an important station for the transportation of passengers and merchandise destined for the mines of Stanislaus, Tuolumne, &c.

STANISLAU, a to. Austria, Galicia, between two arms of the Ruzhica, which unite at a short distance below

71 m. S.E. E. Lough. It has a civil and criminal court, a R. Catholic, Anglican, and several Greek churches, a synagogue, gymnasium, and head school for the girls; and has an important general trade. Pop. 9200

STANLEY, a vil and ecclesiastical dist. England, co. York (W. Riding) par and about 8 m. N.E. Wakefield, of which it may be considered as the N. suburb. The village stands on the W. bank of the Calder, among scattered hamlets and agreeable villas. The church is a handsome structure in the Decorated style, with two towers; and ample means of conveyance are afforded by the Aire and Calder canal, which here crosses the river by a magnificent aqueduct. The pauper female system of the W. Riding, with accommodation for 500 paupers, is in the district. Pop. 7227

STANLEY, a manufacturing vil. Scotland, co. and about 8 m. N. Perth, a bank Tyn. newly built, inhabitants chiefly employed in the extensive cotton-works adjoining

STANLEY (Kiln) a vil. and par England, co. Gloucester on the Severn and Thames canal, and near the Gloucester and Bristol railway 5 m. W. by S. Stroud. It has an ancient and handsome church, a Baptist chapel, two national schools, extensive mills for the manufacture of woollen cloth, and an annual fair. Area of par., 1679 ac. Pop. 3095

STANLEY FORTLASS par Eng Gloucester 960 ac. Pop. 95

STANLEY (PORT) *SEE* FAIRLEIGH BEARDS.

STANLEY (PORT OR) a tn and port of entry Canada West at the mouth of Kettle Creek, N. shore, Lake Erie, co. Elgin 110 m from Hamilton. It possesses one of the best harbours on Lake Erie, and is the port through which an extensive and fertile district receives its principal supplies of foreign, and exports its surplus of domestic produce. The Bank of Montreal has an agency here and there are two Protestant churches, and three schools. Pop. about 1000

STANLEY-SPR-LEWARD a vil and par formerly a market tn. England, co. Gloucester near the Stroud Navigation and the Gloucester and Bristol railway about 4 m. W. S.W. Stroud. It has an interesting ancient church, in the form of a cross, with a low tower rising from its centre. The remains of a Benedictine priory and manufacture of woollen cloth. Area of par., 1070 ac. Pop. 861

STANMER par Eng Sussex 1346 ac. Pop. 120

STANMORE (GRAY and LITTLE) two nearly contiguous vils. and par. England, co. Middlesex about 10 m. N. W. London. In Great Stanmore there are, besides the parish church an Independent chapel, and a house built on the site of a school, in which the celebrated classical scholar Dr Parr was at one time teacher. At a short distance from Little Stanmore there is a splendid church, with paintings by Laguerre, built by the Duke of Chandos whose splendid mansion of Canons was within the parish. In this mansion Handel resided as chapel-master and is said to have composed his Esther for the consecration of Stanmore church. Area of Great Stanmore, 1441 ac. Pop. 1190. Area of Little Stanmore, 1552 ac. Pop. 811

STANNERN or **STONAMOU**, a market tn. Austria, Moravia, circle and 9 m. S. Igla, at the N. extremity of a small lake. It contains a parish church and is remarkable for the mother-domes which fall near it in 1807. Pop. 1040

STANNINGFIELD, par Eng Suffolc 1455 ac. Pop. 930

STANNINGLEY a hamlet, England, co. York (W. Riding) 5 m. W. by N. Leeds, with a handsome modern church, in the Norman style, manufacture of woollen and worsted goods, iron-works, and stone-quarries.

STANWINGTON, a vil. and par England, co. Northumberland, 5 m. S. by E. Morpeth with a church which possesses some fine specimens of stained glass, a Wesleyan chapel, an endowed school, seams of coal and freestone-quarries. Area of par., 10,093 ac. Pop. 1000

STANVOY, or **JANVOY**, a mountain-chain in N.E. of Asia, which branches off from the ranges in the N. of Mongolia, proceeds first N.E. then N. by the boundary between Siberia and Manchuria, then N.N.E. almost skirting the Sea of Okhotsk, and is continued, though with gradually diminishing height and partial interruption, to the shores of Behring's Strait. The whole length of the chain has been estimated at not less than 3000 m. The most important branches are the range which is particularly developed near the shores of Lake Baikal and then proceeds N. between the lakes of the

Tanai and Lena; another which detaches itself much further N., and stretches between the basins of the Lena and Indigirka; and a third, but still more remarkable range, which proceeds S. through the centre of the peninsula of Kamtschatka, and may be considered as forming one of the links of a vast chain of volcanoes. The chain however, taken as a whole, is more remarkable for its length than for its height. Below the parallel of 60° the summits are covered with snow only during part of the year, and up to the parallel of 55° are generally clothed with dense forests. Between 55° and 68° trees begin to become rare, and are seldom met with except in very sheltered forms in higher latitudes. The Stanvoy give rise to a great number of important streams. Of these three of great magnitude descend from the S. and N. side of the chain, except the Amoor and the Anadir the N. and W. side furnish either the sources or the principal feeders of the Yenisei, Lena, Indigirka, and Kolyma. The whole chain appears to be rich in metallic deposits, including gold, copper, and iron, &c. The most valuable yet found is in the district of Nerchinsk, forming the E. part of the Russian gov. of Irkutsk, where, in addition to large quantities of gold, many precious gems also are obtained

STATEN ISLAND—1 An isl.,
 U States, New York, separated from
 Long Island by the narrows which
 form the entrance to New York har-
 bour and from New Jersey by Staten Island Sound, about
 1/2 m. broad. It is 14 m. long, and 4 m. to 8 m. broad;
 contains numerous villages, and many elegant country-seats,
 and has constant communication with New York by steam
 ferry-boats. At its N.E. point is the quarantine station for
 the port of New York. The fisheries on its coast are pro-
 ductive.—2 An isl. S. America, off S.E. coast of Terra-
 del-Puogo extended 23 m. N.E. to W. S.W. between
 Cape St. John and Cape St. Bartholomew, and separated
 from the mainland by the Strait of La Malre lat. (E. point)
 54° 42' 45" S. lon. 65° 45' 30" W (n.) Its surface is ex-
 tremely mountainous and rugged, some of the summits rising
 to the height of 3000 ft., and usually retaining a covering of
 snow. It is densely covered with evergreen hemlock, and other
 shrubs and plants, the vegetation of which is greatly promoted
 by the humidity of the climate. Few days pass without rain
 and the low ground is in many places so swampy and boggy
 as to form a perfect quagmire. The temperature, though
 nearly low varies little throughout the year and thunder and
 lightning are scarcely known. It contains several good har-
 bours, the best of which, Port Cook is on its E. coast.—3 Isl.

STAVFOL, a seaport in Holland, prov Friesland
 29 m. S.W. Leeuwarden, at the entrance of the Emden Ems,
 formerly fortified. It is bounded N and E by two little
 streams and has a neat townhouse, two churches and a Latin
 and other schools. Stavem is the oldest and was once the
 most important town in Friesland, a pre-eminence due to the
 energy of its inhabitants in prosecuting maritime trade, and
 especially to the boldness with which they showed the other
 western nations the practicability of entering the Baltic by
 way of the Sound, and the privileges the thus obtained and
 to her position at the entrance to the Zelder-Zee, across which
 as late as a b. 1230 a boat might be pulled to Eshkummen. It
 was also one of the oldest Hanse towns. The sea breaking a
 deep passage into the Zelder-Zee, and thus rendering her
 position less advantageous—the silt-up of her harbour, and the
 disasters of inundation—repeated fires, one of which de-
 stroyed 389, and another 500 houses—and ravages by war
 and by pirates, have reduced her to her present insignificant
 state. Pop. 563.

STAYFOL, two places, Russia.—1 A tn. cap. gov.
 Caucasus, 410 m. E. by N Stavropol, l. bank Akshai,
 an affluent of the Kuban, in a fertile district. It consists of wide
 and well-formed streets; contains three churches, and has
 manufactures of soap and leather and a considerable trade.

STETTIN several places Württemberg—1 (see *Heusatz*) A vil circle. Nodder, 3 m. E. Stuttgart, with a church, a castle, and a trade in wine and fruit. Pop. 1955.—2 (see *Heusatz*) A vil circle. Nodder, 3 m. E. Stuttgart, with a church, a castle, and a trade in wine and fruit. Pop. 1955.—3 (see *Heusatz*) A vil circle. Nodder, 3 m. E. Stuttgart, with a church, a castle, and a trade in wine and fruit. Pop. 1955.

STETTEN (see *KITZEN MARK*) a market tn. Baden. Lake circle, about 6 m. N. W. Sigmaringen, with a church. Pop. 1017

STETTIN, a g. Prussia, prov. Pomerania, bounded, E. by the Baltic, E. by Königsberg, S. by Frankfurt and Potsdam, and W. by Brandenburg and grand duchy of Mecklenburg area, 2813 geo. sq. The surface consists almost through out of a low flat, broken occasionally by hills of gentle elevation, and protected on the N. from the encroachment of the sea by a range of sand hills or dunes. More than one-third of the

whole is arable land of tolerable fertility, about one-fifth is in wood, and nearly another fifth in heath and heathy pasture. One remarkable feature of the government is the number and magnitude of its lakes, consisting chiefly of a series of expansions of the Oder as it approaches its termination in the Baltic. That river traverses the government in a N. N. E. direction, and either directly or by its tributaries and the expansions or *hofs* already referred to, receives the greater part of the drainage. In the N. E. a number of small streams send their waters directly to the sea. The principal crops are rye, barley, oats, pulse, and buckwheat. The average return does not exceed one in four. Flax and tobacco are extensively hemp and hops only occasionally grown. The produce of fruit is considerable; and the forests furnish ample supplies of wood both for timber and fuel, though for fuel more dependance is placed on the innumerable fields of peat spread over the government. Domestic animals are numerous and the rearing of horses, cattle, sheep, goats, swine, and poultry particularly great, forms an important occupation. Fish abound both on the coast and in the rivers and lakes. The only mineral of any importance is iron which supplies a few blast-furnaces. The principal manufactures are woollen and linen goods, hosiery hats, leather boots and shoes. Ship-building, also, is carried on to some extent. For administrative purposes the government is divided into 12 districts, of which that of Randow is containing the town of Stettin, may be considered the capital. The inhabitants are almost all Protestants. Pop. (1849), 582,197

Vol. II

STETTIN (Latin, *Stettin*) a tn. and port, Prussia, cap. prov. Pomerania, and gov. Stettin, on the Baltic and Stettin railway and 1 bank. Oder have crossed by two wooden bridges, containing the town with its large suburb Lastadie, 78 m. S. E. Berlin. It is a place of great strength, being both surrounded by walls and defended by a citadel and several forts and outworks. It is entered by five gates, and possesses five large squares, the principal one adorned with a marble bust of Frederick II. and a great number of well built and well-

paved streets. It is the see of a Protestant bishop, and the seat of a superior provincial court and a number of important public offices, and contains a royal castle, in which the old dukes of Pomerania resided, with a chapel, in which their remains are deposited. Five Protestant churches, a E. Catholic chapel a townhouse of the 18th century a gymnasium with a library, observatory and museum attached, a courthouse, arsenal theatre, normal industrial burglin, navigation and other schools a workhouse, orphan asylum several hospitals, and other benevolent endowments. The manufactures consist of woollen, linen, and cotton tissues, serge, ribbons hats, corsetry, and common leather. There are also a great many, bet of famous breweries, sugar-refineries, vinegar-works, and building-yards, in which a great number of vessels are built. The shipping and trade are of very great importance, Stettin ranking, in this respect, as the first port of Prussia. The following table exhibits the arrivals and departures of vessels (exclusive of steamers), with their tonnage, at Swinemünde the port of Stettin in the years 1845-50, 52-53 and 1855—

| Years | ARRIVED | | DEPARTED | |
|-------|---------|---------|----------|---------|
| | Vessels | Tons | Vessels | Tons |
| 1845 | 1190 | 160,095 | 1090 | 160,337 |
| 1850 | 1281 | 254,467 | 1608 | 279,556 |
| 1852 | 1682 | 280,72 | 1645 | 286,580 |
| 1853 | 2027 | 361,616 | 2018 | 367,272 |
| 1855 | 2670 | 561,253 | 2634 | 550,174 |

The value of the imports in 1849, was £1,657,984 of the exports £291,478, in 1864, £3,398,810, and £1,957,408 respectively. The principal articles of import were iron and copper dye-woods, harrings, salt coal train and other oils, sugar cane and other colonial produce. The principal exports were grain, wood, staves, zinc and brass. Catherine the Great and Maria Fedorowna, wife of the Emperor Paul were born here. Stettin is a place of great antiquity. It originally belonged to the Slavic a heathen tribe. In 1121 Boleslas, Duke of Poland gained possession and introduced Christianity. The peace of Westphalia gave it to the Swedes. From then it passed to the Prussians with whom though not without some interruptions, it has since remained. In 1171 it was besieged by the Danes, in 1677 by the Elector of Brandenburg. In 1713, by the Russians and from 1808 to 1813 it was occupied by the French. Pop. (1816) 25,081 (1849) 47,302 (1865) 70,759.

STETTIN a lagoon France. See Havre.

STETTIN (Nev.) a co. in Prussia, prov. Pomerania, gov. and 39 m. S.E. Köslin, circ. circle, between lakes Stettin and Vilm. It has a court of law and several public offices, a church, castle, gymnasium, hospital, and poorhouse. Manufactures of woollen and linen cloth, serge, hats and leather; a trade in cloth, meat, and cattle and a distillery. Pop. 4164. **ST. LOUISVILLE** a m. U. States, Ohio, 31 m. W. by S. Pittsburg, on the Ohio river, here about $\frac{1}{2}$ m. wide, in an elevated plain with county buildings, 12 churches, an academy, five wool and two cotton factories, a paper-mill, two glass-works, several machine-shops and foundries and large manufactures of copperware. It has an extensive trade and in the vicinity are inexhaustible supplies of coal. P. (1850), 6139. **STUBOWITZ** (Gauze and Klam) two nearly contiguous vils, Austria, Moravia, circle Briun, near Zagreb, with a church. Pop. 1552.

STEVENAGE, a m. and par. England, co. and 13 m. N.W. Hertford. It has a church, finely situated on a height. Wesleyan and Independent chapels, a grammar and a national school, manufactures of straw-plait, and a trade in slaughtered cattle, chiefly for the London market. Area of par., 4434 ac. Pop. 2118.

STEVENSTON a market tn. and par. Scotland, Ayrshire, dist. Cunningham, 32 m. S.W. Glasgow. It is well built, well supplied with houses, a church, school, and a library above the town. Free and U. Presbyterian churches, a public library, a parochial and other schools. Many of the inhabitants are handloom weavers, and others are employed in the collieries and stone-quarries of the vicinity. The sawing of shivered timber employs a considerable number of females. Pop. in 2005. Area of par., 5 m. by 5 m. Pop. 8811.

STEVENTON a vil and par. England co. Berks, on the Berks and Wilts canal, and the Great Western railway which has here a station, 5 m. S.W. Abingdon with a church, a Baptist chapel, an endowed school and an ancient cross. Area of par., 2389 ac. Pop. 978.

STEVENTON, par. Eng. Hants 2100 ac. Pop. 187. **STEVENTON**, or **STEVENTON**, par. Eng. Bedford; 1960 ac. Pop. 668.

STE WART, island See New Zealand.

STEWARTON a bor. and par. Scotland, Ayrshire, dist. Cunningham. It bank Annotch, here crossed by a good stone-bridge, and on the Scottish South-Western railway, 10 m. S.W. Glasgow.

It consists of a main street nearly 1 m. long, and several minor streets, lighted with gas, and of houses mostly well-built, and many of them with gardens attached; and has a handsome parish, handsome Free, U. Presbyterian, and Independent churches, a parochial and other schools, a public library, townhouse, and jail. The chief manufactures are Highland bonnets and carpets, both made to some extent. Hosiery, ordinary and damask, cottons and silk goods, and steel clock-work, and there are also several mills for spinning and carding wool, hack and the works. Pop. in, 8164. Area of par. 10 m. by 4 m. Pop. 4573.

STEWKEY par. Eng. Bucks, 4880 ac. Pop. 1482.

STEWTON, par. Eng. Lincoln; 674 ac. Pop. 79.

STYRIA, a river, Austria, rises on the N. frontier of Styria, in a mountainous district of Upper Austria. It flows very accurately N.W.E., and at the town of same name, joins 1 bank Enns, after a course of about 45 m. Great quantities of timber are floated down its stream.

STYER a m. Upper Austria, at the confluence of the Steyer with the Enns, 18 m. S.E. Linz. It consists of the town proper, which stands between the two rivers, surrounded by craggy walls flanked with towers; and of two suburbs, with each of which it is connected by a bridge. Many of the houses are handsomely built in the Italian style; and of the three squares, the principal one is both large and elegant and adorned with fountains. The principal edifices are the town church, built after the model of St. Stephen's, Vienna, the church and monastery of the Dominicans, the latter now converted into a factory of Manchester goods; the old and new townhouses, with a collection of antiquities and other curiosities; the old castle, seated on a rocky height behind the town, the old Jesuit college, barracks, theatre and three hospitals. The principal manufactures are military, and various articles of steel and hardware, Styria being the Austrian Sheffield. The only other manufactures of any note are calicoes, needlework, hosiery, and wax. As capital of the circle of Traun, Styria is the seat of several provincial courts and offices. Pop. (1846), 10,198.

STYERMARK, prov. Austria. See Styria.

STYENING a market tn. and par. England, co. Sussex, at the foot of a lofty height above the Adur, here crossed by a bridge. It has a Congregational Methodist chapel, a free grammar and a national school, a mechanics institute, manufactures of parchment, two breweries, and corn-mills. Till disfranchised, Styening returned two members to Parliament. Area of par. 8883 ac. Pop. 1464.

STEYNTON, par. Wales, Pembrokeshire 7275 ac. P. 8616. **STEZZANO** (anc. Statutum) a vil. and com. Italy, Lombardy, 3 m. S. Bergamo with a handsome church, adorned with some good paintings. Pop. 2065.

STIA (Latin, Stagnæ) a vil. and com. Tuscaney comp. Ancona, at the confluence of the Stagno with the Arno, which is here crossed by a bridge, 25 m. S.E. Florence. It contains an ancient church and the remains of an old castle and has manufactures of woollen cloth and hats, and a trade in corn, chestnuts, and wine. Pop. 3824.

STIBBARD par. Eng. Norfolk, 1468 ac. Pop. 388. **STIBBINGTON** par. Eng. Huntingdon 1530 ac. P. 790. **STIBNICZ** (Gauze) a vil. Bohemia, circle and about 16 m. from Koneggrät, on the Edochnitz with a church and iron-works. Pop. 1245.

STICKFORD, par. Eng. Lincoln; 670 ac. Pop. 427.

STICKILLIN par. Ire. Louth, 1862 ac. Pop. 375.

STICKNEY par. Eng. Lincoln 4270 ac. Pop. 917.

STIECHOWITZ, a market tn. Bohemia, circle Beraun, 1 bank Moldau, 16 m. S. Prague at the confluence of the hot-springs with extensive powder-mills.

STIEGE a vil. Brunswick, dist. Blankenburg, on the Havel about 2 m. N. Haselbünde with a church, breweries, and a trade in wood and charcoal. Pop. 1265.

STIENS a vil. Holland, prov. Friesland 5 m. N. Leeuwarden with a church, two schools, and a poorhouse. Pop. (agricultural) 1617.

STIEPANOW, a market tn. Bohemia, circle Karczin, S.E. Prague with an old church, school, and townhouse, and a saw and several other mills. Pop. 1318.

STIERNE-OSNAGE, a group of small isles Norway in the Balke-fjord, lat. and N. Stavanger in lat. 59° 10' N., lon. 5° 30' E.

STIFFKEY, par. Eng. Norfolk 3912 ac. Pop. 520.

STIFFORD, par. Eng. Essex, 1603 ac. Pop. 814.

STIGLIANO a m. Naples, prov. Basilicata, 39 m. S.W. Matera, with a church, two chapels, and two convents, and a considerable trade in wine, oil, and cattle. Pop. 4300.

STIKADA a vil. Austria, Croatia, about 85 m. from Goph. It is inhabited chiefly by frontier soldiers. There is a silver-mine in the vicinity. Pop. 1065.

STILLINGFLEET, par. Eng. York (N. Riding); 6023 ac. Pop. 1034.

STILLINGTON, par. Eng. York (N. Riding), 2018 ac. Pop. 788.

STILLORGAN, par. Ire. Dublin, 690 ac. Pop. 1658.

STILLWATER 1-1, a vil. in township, U. States, New York, on the Hudson canal, and near 1 bank Hudson 33 m. N. Albany. It has good water-power and several manufactures; and to the N. of it are Bensus Heights, the some of the actions which led, in 1777 to the surrender of

the British under General Burgoyne. Pop. 2986.—2 A vii, cap. Washington county, territory of Minnesota, U. S. side, Lake St. Croix, 81 m. N. N. St. Paul. It contains Presbyterian, Baptist, and Episcopal churches, the territorial penitentiary, two mills; and a population of about 800, chiefly employed in the lumber trade.

STILO (anc. *Conchinnus*) a tn Naples, prov. Calabria-Ultra I. 30 m. N.E. Gerace. It has two churches, and near it are the principal farm, lead, and copper mines of Calabria. It was almost destroyed by the Saracens, and had again become prosperous, when the great earthquake of 1783 suddenly made it almost a heap of ruins. Pop. 1800.

STILTON, a vil and par. England, co. and 13 m. N. W. Huntingdon, on the Ramet Burn Street with a parish church, a Wesleyan chapel, and a considerable trade in the famous cheese which bears its name, but is made 30 m. off, in Leicestershire. Area of par. 1630 ac. Pop. 801.

STINSFORD par. Eng. Dorset, 1929 ac. Pop. 873.

STIRCHLEY, par. Eng. Salop, 835 ac. Pop. 802.

STIRLING, or *Strathgordon*, a co. Scotland, bounded N. chiefly by the Forth, which separates it from the greater part of Perth and on which of Clackmannanshire. It lies between the Forth, from which it is separated chiefly by the Airthrey, S. Dumbartonshire and Lanarkshire, and W. Loch Lomond, greatest length, E. to W., 35 m., central breadth, N. to S., about 17 m., area, 499 sq. m. or 212,960 ac. It is of very irregular shape, and has also a greatly diversified surface, rising in the N. W. on the shores of Loch Lomond into the lofty Ben Lomond, and traversed towards its centre by the Gargunnoch, Fintry and Campsie hills, while it slopes down towards the banks of the Forth, and spread out into two of the largest and richest alluvial plains in the kingdom, known by the name of the carres of Stirling and Falkirk. The principal rivers are the Forth with its tributaries Carron and Avon, and the Kelvin a tributary of the Clyde. The lakes in addition to Loch Lomond, which it shares with Dumbartonshire are numerous, but for the most part insignificant. In the mountainous district of the W., the prevailing rocks are mica and chlorite slates, often fit for roofing but not very extensively quarried, owing to the difficulty of land-carriage. In the district E. and S. of the slates, the old red sandstone becomes the prevailing formation, extending E. along the banks of the Forth nearly to the town of Stirling, and S. to the range of the Campsie Fells. That range consists almost entirely of porphyry and trap, but on some of its S. slopes, and still more in the carres E. of it, the carboniferous formation becomes largely developed, and several valuable coal-fields are extensively worked both for domestic use the supply of iron works, of which those of Carron are most important, and for exportation, chiefly by the shipping port of Grangemouth. The more elevated and rugged parts of the country are necessarily devoted to pasture, and, where not too lofty or sterile, in general well wooded; the valleys and undulating slopes, and more especially the alluvial plains are fertile, the last, more especially, in the highest degree, and are under a system of agriculture as improved as any of which Scotland can boast. These plains also are admirably adapted for the growth of fruit-trees, and almost every farm has an orchard which often adds no inconsiderable value to the value of its produce. The chief branches of industry are mining, the smelting, casting, and working of iron and the manufacture of woollens and leather. The means of communication are, except in the mountainous districts, very ample, both by land and water, the former by the Edinburgh and Glasgow the Scottish Central, and the Glasgow and Edinburgh railways, and the latter by the Forth and its tributary Carron, and by the Forth and Clyde canal. The most important towns are Stirling (the capital), Falkirk, and Grangemouth. Pop. 86,237.

STIRLING, a royal, mun. and par. bor. and river-port, Scotland, esp. above co., beautifully situated on a commanding height overlooking the windings of the Forth, where it first ceases to be navigable, and is crossed by a bridge and a handsome modern bridge, and on the Scottish Central and the Glasgow and Edinburgh railways, 81 m. W. N. W. Edinburgh. It consists of an ancient portion, which is very irregularly laid out, and formed of steep winding streets, climbing the height towards the castle; and of a modern portion, situated on lower ground to the N.E., and composed for the most part of handsome modern houses. Among the public build-

ings, many of which derive much interest from their antiquity and the historical associations connected with them, the first place is due to the castle which, with the rock on which it stands, forms a conspicuous object, not only to the country immediately around, but to several adjoining, and even to some distant counties. It crowns a rocky eminence, which rises 230 ft. above the plain and terminates precipitously on the N. W. side of the town. It is of such ancient date that its earliest fortifications are attributed to the Roman general Agricola, and its importance as a military station is proved by the Roman road which passes immediately beneath it. As early as the 10th century, it began to hold a prominent place in Scottish history, and few important events took place while Scotland formed a separate kingdom, in which it did not share. Almost every apartment in it has some tale of thrilling interest or horror. The principal buildings, as they now stand are the governor's house, formerly the royal palace, to a chamber of which, still known as the Douglas-room, an earl of that name was mortally stabbed by James II, and in another apartment of which the same James as well as James V. were born the parliament house, once a noble fabric, and still of imposing exterior, though completely despoiled within by having been converted into wine-rooms and other accommodations, the chapel-royal, partly occupied for religious service and partly as an armory, and another place begun by James V. but finished by his unhappy daughter Mary and more remarkable for the grotesqueness than for the regularity of its architecture. The buildings and other objects within the town, particularly deserving of notice, are the old church, a large and handsome structure with a massive and lofty tower, originally the church of a Franciscan convent, but now entirely defaced as to its external appearance by a partition dividing it into two parish churches, the New North, also a parish church, a Baptist, Independent, Reformed Presbyterian Episcopalian B. Catholic two Free, and two U. Presbyterian churches, a high school of some celebrity, and various other schools, an ancient townhouse with a spire, a curious old residence of the earls of Mar, called Mar's Work, an Athenaeum for which a handsome building has been erected, an extensive agricultural museum formed by the enterprise of a private gentleman, commodious markets, a very extensive new bath, and several hospitals. The principal manufactures are woollens, consisting chiefly of tartan, tartan shawls, and carpets, leather ropes, carriages, soap, and candles. The weekly market is well supplied with corn and provisions, and there are numerous inns, chiefly for horses and cattle. The trade, carried on at a good quay with not much depth of water is considerable, and the salmon-fishings of the Forth have long formed an important source of revenue. Stirling was first incorporated as a royal burgh by Alexander I., and now under the Reform Act, unites with Dumbarton, Culross, Inverkeithing and South Queensferry in sending a member to Parliament. Pop. 12,837.

STIRLING a maritime co. W. Australia, 50 m. long by 40 m. broad. It is hilly heavily timbered, and swamps are numerous. The coast is much indented with bays and inlets.

STITFED par. Eng. Essex, 2967 ac. Pop. 688.

STITCHELL and Huxey, par. Scot. Roxburgh, 6 m. by 4 m. Pop. 892.

STITCHMAN S. (St.), par. Eng. Cornwall 4291 ac. P. 2380.

STIVICK, tn. and township, Hungary. See LUTZKY.

STIVITNA, or *Stivits*, a vil Austria Moravia, 60 m. N. W. of Brno, with a church and a refinery of potash P. 1045.

STIVICHALL par. Eng. Warwick, 860 ac. Pop. 91.

STIXWOLD par. Eng. Lincoln, 2250 ac. Pop. 256.

STOBE, par. Scot. Peebles, 7 m. by 6 m. Pop. 478.

STOCK, two pars. Eng. — i Essex 1845 ac. i. op. 702.

2 (Glosters) Dorset 848 ac. Pop. 68.

STOCKACH, a tn. Baden Lake circle, on the Aare, 15 m. N. W. Constance. It is walled by two gates, a church, a normal school, and manufactures of woollens and linen cloth and hosiery. Pop. 1655.

STOCKBRIDGE, a bor., market tn., and par. England, co. Southampton, 1 bank Anton, about 9 m. N. W. Winchester. It has little or no trade, its prosperity chiefly depending on the traffic occasioned by its being a considerable thoroughfare. Area of par., 1115 ac. Pop. 1006.

STOCKBURY par. Eng. Kent, 2940 ac. Pop. 589.

STOCKEN or **Styckan**, a market in Bohemia, circle and 29 m. S.E. Cassau; with an old church, school, and coopers; manufactures of linen, and a distillery. P. 1868. **STOCKERAU** a tn. Lower Austria, on an arm of the Danube, at the confluence of the Gyller and Romying, 7 m. W. Korneuburg. It contains a number of handsome buildings, and on its loftiest site stands the parish church of St. Stephen, an elegant structure, with a lofty and richly-decorated tower. Other buildings of note are the castle of Freiseck, now the townhouse; the military commission-house, the high-school, poorhouse, Franciscan monastery hospital and infirmary. The manufactures consist of woollens and coarse cloths, leather, vinegar and refined sugar and there is a trade in corn. Pop. 8656.

STOCKERSTON per Eng Leicester; 973 ac 1 89.

STOCKHEIM, a vil and com. Belgium, prov. Limburg; 1. bank Meuse, 18 m. N.E. Hasselt. It has manufactures of wicker-work, two breweries, a distillery, a flour-mill and dye-works. The village was almost entirely destroyed by fire in 1899. Pop. 1185.

STOKHOD a river, Russia, rises in the W. of gov. Volhynia flows N. N.E. into gov. Minsk, and joins r. bank Pripiet, near the confines of gov. Udoinsk total course, 110 m.

STOCKHOLM [Latin *Holmia* Spanish *Estocolmo* Italian *Stoccolma*] a city of N. Europe, cap. of the Swedish monarchy, beautifully and picturesquely situated between

Lake Malar and the Baltic; lat. (observatory) 59° 20' 38" N. lon. 18° 5' 48" E. (p.); 880 m. N.E. Copenhagen, and 440 m. W. & W. St. Petersburg. It stands partly on the N. and E. sides of the strait, which communicates between the lake and the sea, and partly on several islands, which are connected with the mainland and with each other by a number of bridges. The finest of these bridges is the Nydron or New Bridge, which joins the largest of the islands, called the Stadon or City with the N. side of the strait. When approached from the Baltic, the appearance presented by the city is very grand and imposing, but a still better view is obtained from the Mosebacke, a rugged hill on the E. side of the mainland from a platform on the summit of which the eye takes in the whole city and its environs, and beholds a panorama which in many respects resembles that of Venice, but surpasses it in natural beauty. The whole site covers an area of nearly 5 sq. m., and has a circuit of about 9 m. Till lately Stockholm was unprovided with defenses of any kind but a strong citadel has recently been erected on the small island of Kastellholm, while the works of Wadholm have been so much strengthened as effectually to command the only channel by which a hostile approach by sea could be attempted. The principal part of Stockholm, or the city proper is situated on the three islands of Gustavsholm, Söderholm, and Riddarholm. It is the smallest and oldest part but at the same time the closest built and most densely-peopled. It commands

for the most part of narrow and crooked streets and lanes, though, from its antiquity, many of the most interesting objects which the town possesses are situated within it. Norradin on the W., separated from the city proper by the Norrstrom, and Söderholm on the E., separated from it by the

Söderstrom, though considered only as its suburbs, far surpasses it both in extent and regularity of structure. The houses in the city are generally of stone, but in the suburbs more frequently of brick, stuccoed over, and coloured white, yellow, or light blue.

The public buildings are numerous, but not very remarkable. By far the finest is the palace, which, situated on the highest part of Gustavsholm, is seen towering with its vast and massive walls above all the neighbouring houses. It was constructed by the oldest Temin, in 1591, on the site of a much older structure, which had recently been burnt down, and was completed on his designs by his son in 1753. It is built in the form of a quadrangle, with two wings, and incloses a large court. The basement story is of granite, the rest brick and stucco. The finest front is the S.E. which is adorned with six Corinthian pillars, the N.W. entrance rising from the quay at the foot of the new bridge, leads to a spacious platform. The whole structure is chaste, simple, massive, and finely proportioned. Besides the apartments of the royal family, and the chapel, it contains a royal library of 50,000 vols., and some rare and curious MSS. and a museum possessing many valuable northern, Tuscan and Egyptian antiquities. A cabinet of 50,000 coins and medals considered one of the finest collections of the kind in Europe, and a petreoglyphy with fine specimens of almost all the great masters

Seraphim infirmary occupying a handsome edifice, with lofty and spacious apartments, and 800 beds. Danvik's hospital, the burgher widow's hospital, and the garrison infirmary. The associations, literary societies, artistic, &c., are very numerous, and include, among others, the academy of sciences in which the celebrated chemist Berzelius long held a distinguished place, the Swedish academy, the academy of history and antiquities, the musical academy, and medical, agricultural and horticultural societies. Few cities can boast of finer promenades. Of these the most frequented are the Djurgården, or Deer-park, remarkable for its picturesque beauties, its magnificent trees and drives, the Ladugårds Gårde, or review ground, the Haga park, the beautiful cemetery adjoining and the park of Carlberg finely planted, and connected with the city by a long and beautiful avenue.

The manufactures consist chiefly of woollen, flax, cotton, and silk goods, porcelain and stoneware, glass, tallow, refined sugar, ironware, including large castings and machinery. The trade has the advantage of a harbour which, though somewhat difficult of access, from the length and intricacy of the channels which lead to it, is capacious, and has depth of water sufficient for the largest vessels at its quays. The principal exports are iron, copper, tar and timber, the imports, colonial produce, wine, fruit, &c. The inland trade is also of no inconsiderable extent.

Stockholm was founded about 1260 by Burger Jari. It was fortified at an early period, and stood several sieges. One of the most memorable of these was in 1501 when it was defended against the Swedes for the crown of Denmark by the Danish queen Christina. Another still more memorable was in 1520, when an equally haughty female Christina Gyllensterna, widow of Sten Sture, held it for the Swedes against the perfidious and sanguinary Christian II. The capitulation made was shamefully violated by the king who after pledging himself to respect the rights of the inhabitants was guilty of the most atrocious massacres. The indignation which was thus produced in all quarters of the country paved the way for the war of liberation which concluded by Gustavus

THE ROYAL PALACE, STOCKHOLM.

The churches are 70 in number including, in addition to those of the national establishment a French Reformed, a Dutch Reformed, an English, a Greek Russian and a R. Catholic. There is also a synagogue. Few of the churches possess much architectural merit. The oldest is St. Nicola, in which the sovereigns are crowned. It was founded in 1260 but has undergone so many changes that the original building has disappeared. It is surrounded by a lofty tower, and contains the tomb of King Magnus Bonck, and his queen Blanka. The Riddarsholm Kyrka, or church, was originally attached to a monastery and possesses considerable historical interest, both from the scenes which have taken place in it and from containing the ashes of a long line of Swedish monarchs. Its style was originally Gothic, but has been much defaced by modern alterations. Service is performed in this church only once a year. The church of Adolphus Frederick, in the Norrmalm, is built in the form of a cross and is rendered conspicuous by its elegant tower crowned by a copper dome. The only other public edifice deserving of notice are the Över-stiftsbibliotek (governor's house), a handsome structure, by Temin facing the quay on which a granite obelisk, in honour of Gustavus III. has been erected the Riddarhus, where the states and also the academy of sciences hold their meetings, and the shields of about 3000 Swedish nobles are hung up the exchange the mint, of little merit as a building but with a good collection of minerals the townhouse, a large pile, in which the principal courts of justice are accommodated the post-office, bank, merchant-house royal theatre, and opera-house, the arsenal, and barracks. Among the educational establishments are a medical college, with a general superintendence of all the medical establishments of the kingdom a technological institute, a navigation-school, and school of design. The principal benevolent institutions are a blind and deaf and dumb asylum, a lunatic asylum, the

Vasa, at length terminated gloriously by the expulsion of the Danes, and the establishment of Sweden as an independent kingdom. Pop. (1851) 98,070, (1865) 143,361.

STOCKLAND two pars. Eng.—1 Dorset 5849 ac. Pop. 1184.—2, (Strick) Somerset 1850 ac. Pop. 181.

STOCKLEIGH two pars. Eng. Devon—1 (Kingsf.), 1110 ac. Pop. 126.—2 (Camerog), 1939 ac. Pop. 231.

STOCKLINGH two pars. Eng. Somerset—1, (Mogden) 199 ac. Pop. 110.—2 (Otterog), 230 ac. Pop. 129.

STOCKORN a mountain, Switzerland, 1800 ft. and 18 m. S. Bern, W. of Lake Thun. It is composed of limestone, attains the height of nearly 7000 ft. and terminates in a remarkable conical peak commanding a most extensive view.

STOCKPORT a market in and par. and man. bur. England, Cheshire, 5 m. S.E. Manchester on the Mersey joined here by the Tame, and crossed by four bridges one of them a handsome modern structure of 11 arches and on the London and North-Western railway which here has two stations. It occupies an elevated uneven and rugged site, so that the houses rise in irregular tiers, giving it at all times a picturesque and at night, when its various factories are lighted up, a very striking appearance. The streets, though generally steep and narrow are well paved and lighted with gas. The supply of water is both ample and abundant and the market place, situated on a tolerably level summit, is spacious. Beside the town proper there are several extensive suburbs, as Heaton Norris (which see) Edgeley, Farnworth, &c. The principal buildings and establishments are the parish church of St. Mary, a handsome modern structure in the late English style, with an ancient chancel, a lofty pinnacled tower with a peal of eight bells, containing also some interesting monuments. St. Thomas church, an elegant building in the Grecian style, with a tower crowned by a cupola. St. Peter's of arch a neat brick building, with a square tower; Christ

church (Hoxton-Norvic), with a fine spire; St. Paul's Church, Portwood, a church in the Gothic style, recently erected, a new church, to be called St. Matthew's, is now (1854) in course of erection in Eghley; also various dissenting chapels, including four Independent, five Wesleyan Methodists; two each, New Connexion Methodists, Primitive Methodists, Baptist, & Catholic, Wesleyan Association, Unitarians, and New Jerusalem, one each and a Friends' meeting-house, the barracks, courthouses, and union house the grammar, British, national, and other schools, among which is the Stockport Sunday-school attended by upwards of 2800 children every Lord's day and occupying a large brick building of four stories, erected by subscription at an expense of above £10 000; attached to it are three district schools, with an average attendance of 1100 children, the mechanics institute, the infirmary occupying a handsome stone-building, whose site renders it one of the most conspicuous objects in passing through the town, the new cemetery, covering a large and well-laid out plot of ground, with a small but handsome chapel, and the railway-viaduct on the London and North-Western railway, a magnificent structure which spans a great portion of the town, including the river Mersey by 78 semicircular arches, 22 of which are of 63 ft. span, and the centre one 110 ft. above the bed of the river. The cotton manufacture is the staple of the town and, in addition to numerous large factories, employing upwards of 2800 horse-power between spinning and weaving there are several print, bleach and dye works. The weaving and throwing of silk, at one time the most important branch of industry here, has greatly declined, only a few hands being now employed in it, as well as in the manufacture of silk goods, thread, brushes, &c. Several hands are still employed in hating. There are also several engine and machine shops, iron and brass foundries, breweries, and brick-works. The weekly market, chiefly for cheese, vegetables, &c. is important and there are four annual fairs Stockport being centrally situated at the junction of several Roman roads is supposed to have been an important Roman station and to have had a fort on the summit of what is now called the Castle Yard from the castle which was subsequently erected upon it, but has altogether disappeared. During the last civil war Stockport was garrisoned by the parliamentarians, and became the scene of some severe struggles between them and the royalists. In virtue of privileges first conferred by the Reform Act, it is governed by a mayor 18 aldermen, and 42 councillors and sends two members to the House of Commons. Pop. (hor.) 58,835.

The FAIRIES of Stockport include the chaperons of Daley Stanley Dukinfield, Hyde, Marple, Netherbury, Homily or Chadwick and the townships of Bramhall, Brindley, Brington, Etchells or Stockport-Etchells, Offerton, Torkington, and Werneth. Area, 21,575 ac. Pop. 91,423. (Local Correspondent, *Raghu's History of County Palatine of Chester*, 1850.)

STOCKSTADT, a vil. Bavaria, Lower Franconia, near 1 bank Meiss, here crossed by a bridge with a church. P 1394.

STOCKTON, five par. Eng.—1 Norfolk 1061 ac. Pop. 149—2 Warwick, 1800 ac. Pop. 451—3, Wilt 2000 ac. Pop. 800—4, Worcester 635 ac. Pop. 131—5, (see *see River*) York 2135 ac. Pop. 475.

STOCKTON, a in New S. Wales, co. Gloucester, on the shores of Port Hunter, opposite Newcastle.

STOCKTON, a co. U. States, California, on the Stockton slough or canal, which contains the back waters formed by the junction of the San Joaquin with the Sacramento, 59 m. from Valjejo. It occupies a peninsula between the three branches into which the slough divides and, as a town, ranks next to San Francisco and Sacramento. It owes its prosperity to its central position in the valleys of the Sacramento and San Joaquin making it the depot for the supply of all the S. States to its harbour, which is accessible at all seasons by vessels drawing 9 ft. Steamers ply regularly to it. It was settled in 1848. Pop. (1853), 4000.

STOCKTON upon Tress, a considerable market town, municipal bor., and par. Eng., in the co. of Durham, on a height above 1 bank Toss, which is navigable 8 m. above the town, and falls into the German Ocean 13 m. below, and at the junction of the Stockton and Darlington, Stockton, Hartlepool and Clarence, and the Leeds Northern railways. It is entered from the S. by a handsome bridge across the

river; is well built, chiefly of brick, and laid out with considerable regularity, consisting of a spacious main street, nearly 1 m. long from S. to N., and several other streets parallel or at right angles to it and has a handsome Gothic church with an elegant spire, a chapel of ease with a tower 80 ft. high, Wesleyan and Primitive Methodist, Scotch Presbyterian, Independent, Quaker Baptist, R. Catholic, and Unitarian chapels, national, British, infant, industrial, and other schools, a quadrangular townhall with a clock-tower and spire, a mechanics institute, custom house, assembly-rooms, dispensary, some almshouses, and a handsome Doric stone-column, 83 ft. high, in the centre of the market-place. The manufactures are chiefly linen and sailcloth and there are also building-yards, ropewalks, iron and brass foundries, breweries, oars and other mills. The harbour has been improved, so as to admit vessels of 800 tons, and having been made a landing-place for certain goods, has become the centre of a considerable trade, both coastwise, chiefly with London, Hull, Leth &c., and foreign with the Baltic, Holland, Hamburg and the British colonies. The principal foreign exports are lead and coal, and the imports, timber for ship-building and ordinary purposes tallow &c. In 1851, the tonnage belonging to the port was 27 730 tons; the vessels entered were 1011 (52,656 tons) and cleared 8486 (568,534 tons). Pop. bor. 10,172. Area of par., 6180 ac. Pop. 43,569.

STONEHAVY N a seaport tn and bor of history, Scotland co. Kincardine, 15 m B by W Aberdeen about 1 m from the railway thence to Dundee, lat 56 58 N lon 2 19 45 W (n.) at the head of a bay at the influx of the Carron, here crossed by a bridge. It is divided into the old town, on the r bank of the river, consisting chiefly of fine spacious but irregular streets, and the new town, on the l bank, containing several well formed streets diverging from a square in the centre, in which is the handsome market-house. The houses here are well-built, and have a handsome appearance.

Near it are two parish churches and there are also Free and U Presbyterian churches, an ancient Episcopal and a Methodist chapel a country courthouse and jail a literary and scientific institute, and a library. Weaving cotton and linen fabrics for Aberdeen houses is carried on, and there are a distillery and brewery and some mills for spinning cotton yarn.

The trade of the port consists principally in the importation of coal and iron, bone-ash, salt, slates and tiles, parsnips and groceries and in the exportation of grain, potatoes, whisky, cured fish timber, and live-stock. E. and S.E. winds cause a great swell in the harbour which is a natural basin, and dries at low-water so do also the rocks on which the pier is erected for a full cable length out beyond the pier. Two fixed lights are placed on the latter, 30 ft. above high-water. Pop. (1841) 3540

2399 ac. Pop. 814. 2, (Earl), 2520 ac. Pop. 860—

3 (Purvis) 1181 ac. Pop. 402.

STONEHINGTON a township bar and port of entry U. States, Connecticut, 55 m. E. New Haven with four churches, two academies, extensive manufactures of plaid and plain linens, and a considerable shipping-trade. Many vessels are engaged in the whale seal and cod fisheries. Pop. (1860) 6484.

STONTON W. VILLAGE, par. Eng. Leicester 1190 ac. Pop. 106.

STOODLEIGH or **STOODLEY**, par. Eng. Devon 4326 ac. Pop. 480.

STOOSZ, or **STOW,** a vii Hungary Hither Themas co. Zips, 24 m. S. E. Lendbach, with two churches, a high school, iron works, and some trade in wood. Pop. 1600.

STOPHAM par. Eng. Sussex 876 ac. Pop. 161.

STÖR, a river Denmark duchy Holstein. It rises near the centre of the duchy Sows S.W. past Litzhio, and joins r. bank Elbe, about 3 m. N. W. Glückstadt. At Litzhio it has a width of 300 yards, and a depth of from 8 ft. to 14 ft. Its mouth forms a winter-haven of the fourth class.

STOR-LAKA a lake, Sweden in Limes Lappmark, 127 m. N. W. Limes properly only an expansion of the Umeå river; greatest length 30 m. mean breadth less than 8 m.

STORMHURST, or **STORMHURST** a ta. Prussia, prov and 27 m. S. W. Posen, on a small lake with a Protestant and a R. Catholic church, a Franciscan convent, and manufactures of cotton goods. Pop. 1116.

STORHEDDINGE, a ta. Denmark, Seeland 26 m. S. Copenhagen, with an old church containing a number of well-preserved monastic galleries. The inhabitants live chiefly by agriculture. Pop. 1000.

STORKOW a ta. Prussia, prov Brandenburg gov. Potsdam, on the Dolgenase, 28 m. W. S. W. Frankfurt-on-the-Oder with a court of justice, a church, manufactures of wool, linen and cloth, a fishery and a trade in cattle. P. 1881.

STORM BAY, Van Diemen's Land, between Tassers Peninsula and Brunel Island, 10 m. to 15 m. in breadth. It is not very well sheltered but the holding-ground is excellent.

STONOWAY, a borough of barony, market tn, and seaport, Scotland, co. Ross, 2 co. Inver, lat. 58° 15' N. lon. 6° 22' W. It occupies a peninsula formed by two branches of the harbour and is generally well built. It has spacious and elegant assembly-rooms, with a handsome reading-room,

and a public library. The quay is well adapted for the loading and unloading of vessels. There is a neat custom-house, a rope-work, and several places for repairing vessels. The principal trade is in herrings and white-fish. Pop. 3291.

STORO [see *Storö*], a market ta. Tyrol, circle Trient, on the Chisene, about 8 m. from Clesino, with a parish church. Pop. 1075.

STORÅKOPPARBERG lina, Sweden. *See* FALUN.

STORRINGTON, a vii and par. England, co. Sussex, about 8 m. N. E. Arundel with a parish church partly ancient and partly modern, a charitable endowment, and a corn-market every fortnight. Area of par. 8264 ac. Pop. 1038.

STORÖEN two lakes, Sweden. The first, in the E. of lina and 9 m. W. S. W. Gefle, is about 15 m. long, by about 4 m. broad, receives several small streams, and discharges itself into the Baltic near Gefle. The other, situated near the centre of lina (Storö), 900 ft. above sea-level, is very irregular in shape, covers a large extent of surface, and contains several islands. The town of Östersund is situated on its E. shore. It receives the waters of several lakes and streams, and discharges itself by the Ragunda, an affluent of the Indals-Elf.

STORTFORD (Barnor's) a market tn and par. England *See* Barnor's-STORTFORD.

STOTFOLD par. Eng. Bedford 2928 ac. Pop. 1895.

STOTTERITZ, a ta. Saxony, circle and 9 m. S. E. Leipzig, with a poorhouse, manufactures of muslin-linen, and a trade in tobacco, which is grown in the vicinity. Pop. 2605.

STOTTERHEIM a vii Saxo-Wernau, bell. Gross-Radefeldt, on the Stolberg, with a church, a saline-spring, and an alabaster-quarry. Pop. 1064.

STOTTESDEN, par. Eng. Salop and Hereford, 11 443 ac. Pop. 1545.

STOUTINGTON par. Eng. Sussex, 5422 ac. 1 pop. 644.

STOUTON par. Eng. Worcester 1263 ac. Pop. 877.

STOUR four rivers England—1 Rising near Haverhill where the three on Cambridge, Bedford, and Essex meet, flows circuitously E. S. E. forming the boundary of two last counties and falls into the sea at Haverhill by a broad estuary belonging partly to it and partly to the Orwell.

2, Formed by two small streams which rise in the chalk-hills of Kent flows N. N. E. past Canterbury, where it becomes navigable, and in the lower part of its course divides into two branches, the one of which joins the estuary of the Thames at Recliver while the other and far larger branch falls into Pagwell Bay, thus forming the side of Thanet north length, about 40 m.—3 Rises in a hilly district in the N. of Dorsetshire flows S. E. past Sturminster-Norton Blandford, and Wimborne-Minster, enters Hampshire and a little below, joins r. bank Avon, at Chichester, near its mouth in the English Channel, after a course of about 40 m. It begins to be navigable at Sturminster-Norton—4, Rises in co. Stafford flows S. past Stourbridge and Kidderminster, and at Stourport joins l. bank Severn.

STOURBRIDGE, a market tn. England co. and 18 m. N. Worcester on a gentle declivity. The streets are irregularly laid out but the general appearance of the town is agreeable. Besides the church, which is a neat brick edifice, there are several places of worship for Dissenters, and a R. Catholic chapel, a free grammar and a national school, a theatre, and an subscription-library containing several thousand volumes. Races are held in August. The manufactures of the town are various and extensive those of glass, iron, and fire-bricks are the principal. Stourbridge-fire-clay forms a considerable article of export, being much in demand for making glass-house pots, crucibles, and fire bricks. It is found near the town occupying an area of about 200 ac. the best lying at a depth of 150 ft. below the surface. Pop. 7847.

STOURMOUTH par. Eng. Kent, 878 ac. Pop. 374.

STOURPAIN par. Eng. Dorset 2955 ac. Pop. 631.

STOURPORT, a market tn. England, co. and 10 m. N. by W. Worcester, r. bank Stour, here crossed by a handsome bridge, at its confluence with the Severn. It has a church, and a Wesleyan chapel, a national and an infant school, a reading-room and some benevolent societies; a large tan-yard, carpet-manufacture, a wool spinning-mill, and an iron-foundry. Pop. 2936.

 STOW, a vil Italy gov and 16 m W S W Venice
 r bank Brenta. It contains a magnificent palace with fine
 gardens, the property of the Pisani family Pop. 1800

STRABANE a market in Ireland, co. Tyrone, r bank
 Moine, near its confluence with the Finn, 13 m S S W Londonderry.
 It consists of 10 principal and several smaller
 streets. The older parts of the town are ill suited for business;
 but in the more modern there are good streets and
 shops, and many of the houses are spacious and handsome.
 The town contains a church, a fine cruciform structure in the
 Girman style, two Presbyterian and two Methodist chapels,
 a fever-hospital, with dispensary attached. The principal
 trade is in grain and provisions. There is also a pretty extensive
 brewery. A canal, about 4 m long connects the
 town with the deeper parts of the Foyle. Pop. 4896.

 Puck, 63 m S W Prague, on the Wawra, here crossed by
 a bridge. It contains a new and the remains of an old castle,
 a church, and a townhouse and has manufactures of linen
 and woollen cloth, and particularly of hosiery, in which an
 extensive trade is carried on. Pop. 3900

STRALAU, an vil Prussia. See DARMSTADT

STRALAU, or STRALAU a vil Rhodan, Prussia gov
 and 27 m N W Dinslendorf, on an elevated plain between
 the River and the Meuse. It contains a R Catholic church
 and has manufactures of cotton goods, hosiery and hats; and
 dye-works. Pop. 1578

STRALSUND agov Prussia, prov Pomerania, bounded
 N W, N, and N E by the Baltic B, S and S W gov
 Steat and W grand duchy of Mecklenburg area, 1276
 ges. sq. mi. It consists partly of the group of islands of
 which Rügen is by far the largest, and partly of the main-
 land of Stralsund proper. The latter is almost throughout a
 flat not much elevated above the level of the sea with a coast
 much broken and indented. The rivers are few and small.
 The only ones deserving of notice are the Mecklenburg, forming
 part of the W boundary, and the Isena, with its tributary
 Triebel. The soil is often sandy but in general possesses
 considerable fertility and produces all kinds of grain.

Pastures are extensive, and particularly adapted for the
 rearing of sheep, of which large flocks are kept. The fishing
 on the coast is very productive. There are no minerals de-
 serving of notice. The principal manufactures are woollen
 and linen cloth, leather tobacco, chimney soap, and candles.
 Ship-building also is carried on to a considerable extent.
 The government is divided into four circles, Rügen, Franzburg
 (containing Stralsund the capital) Greifswalde, and Grimmen.
 All the inhabitants, with a very few exceptions are Protestants.
 Pop. (1849), 187,068

STRALSUND, a seaport in Prussia cap gov Pomer-
 ania, on the island which separates the island of Rügen from
 the mainland, and so completely surrounded by water as to be
 approached only by bridge, 130 m. N by W Berlin, lat.
 54° 18' N, lon 13° 5' 30" E. The houses have an old
 and interesting appearance and both streets and squares,
 though irregular and devoid of elegance are clean and well
 paved. The principal buildings are the Nicola church, a brick
 structure, begun in 1311, and surrounded by a lofty tower,
 four other churches the government-house the townhouse a
 turret edifice built in 1316 the gymnasium, with a library
 and cabinet of coins the mint several porcherons, workhouses,
 orphan hospital, and infirmary. The manufactures consist
 of woollen and linen cloth, sugar, syrup, starch, soap, candles,
 tobacco leather, mirrors, and playing-cards and there are nume-
 rous distilleries, oil-works and building-docks, in which a great
 number of vessels are fitted out. The port, though not large
 and somewhat unembellished by shallows, is good and carries
 on a considerable trade. In 1852, 369 vessels (contn 23,798)
 entered and 577 (contn 80,645) departed. Stralsund is the
 seat of a superior court of law, and of several public offices.
 It was founded in 1309 by Prince Jacobus I. of Rügen, and
 peopled with Swabians. It afterwards became a free imperial
 and Hanse town and rose to great commercial importance.
 It has repeatedly suffered severely from war. In 1678 Freder-
 ick William, the great Elector of Brandenburg took it after
 a bombardment, by which 1800 houses were destroyed. It
 never completely recovered from this blow Pop. (1816)
 15,600 (1849) 19,138

STRAMBERG a tn. Austria, Moravia, circle Prussia

19 m E Wasmuthen with a church and an old castle in
 ruins. Pop. 2507

STRAMBINO a tn. Italy, Piedmont, div Turin, prov
 and 5 m S Ivrea, near r bank Dora. It has a court of jus-
 tice, two churches a college or gymnasium, a confraternity
 four oratories, and an hospital Pop. 8907

STRANDMÜHLE, a vil Denmark Høland ball Copen-
 hagen, on the Mølleensee, with an extensive paper-mill, pro-
 ducing about 100 000 reams annually

STRANGFORD a small seaport in Ireland on Down,

124

near the head and on the W side of the channel which forms the entrance to Lough Strangford, 7 m. N. E. Downpatrick. It contains a chapel of ease, a small Wesleyan meeting-house, and a R. Catholic chapel. Pop. 630.

STRANGFORD (Lovers), an arm of the sea, Ireland, in the E. of Co. Down entered by a channel 6 m. long, and less than 1 m. wide. It then opens east into a large expanse, stretching N. W. for about 15 m., with a narrow breadth of 5 m. or 6 m. It contains a number of small islands. The rapidity of the tides, and some sunken rocks, make the entrance dangerous to those not well acquainted with it; but within there is ample depth, with good anchorage, and complete shelter.

STRANGVAER, a tn. Sweden. *See SVENSKA.*

STRANING two nearly contiguous vils Lower Austria, on the Marchfeld, about 6 m. from Moosau with a church, tile-works, and a trade in wine. Pop. 1440.

STRANORLAR, a market tn. and par. Ireland co. Donegal. The town, 23 m. S. W. Londonderry is regularly built and has a church, a R. Catholic chapel, two Presbyterian meeting-houses, and a union-workhouse but little trade. Pop. 512. Area of par., 15,500 ac. Pop. 5874.

STRANRAER, a royal par. and mun. bor. and seaport tn. Scotland co. Wigton, at the head of Loch Ryan, 20 m. W. Wigton lat. (church) 54° 54' 30" N. lon. 5° 2' W. (N.) It is in general very regular houses mostly plain, neat, and very substantial. It has a parish church a chapel two Free, and three U. Presbyterian churches, a Reformed Presbyterian an Old Light Baptist and a R. Catholic church, several schools, and a number of benevolent societies. Some leather is manufactured, but only to a small extent. Pop. 3677.

STRANTON a small seaport and par. England co. Durham on the Stockton and Hartlepool railway about 2 m. S. W. Hartlepool. It has a church with a tower, which serves for a landmark, a district church a Wesleyan chapel an endowed school, several iron-foundries, building yards, and a harbour and docks. Stranton has gained much in importance by the formation of Hartlepool harbour. Area of par. 9328 ac. Pop. 4769.

STRANY a vil. Austria. Monastery, circle and about 20 m. from Hradisch with a church and glass-works. Pop. 1812.

STRASBURG [French *Strasbourg* anc. *Argentoratum*], a tn. France, cap. dep. Bas-Rhin, on the Ill, about 1 m. from the Rhine 250 m. E. by S Paris, with which and with Basel it is connected by railway. It is of an irregular but some what triangular shape, having its greatest length W. to E. is surrounded by walls and bastions, defended on its E. side by a citadel constructed by Vauban, and otherwise so strongly fortified as to rank as a fortress of the first class. It is entered by seven gates, and is generally well built. The houses are rather lofty but the streets are spacious regular and clean and many of the public squares are large and handsome. Of these the most remarkable are the Place d'Armes and Place-de-la-Cathédrale. The Ill, which traverses the town, and is subdivided into a great number of minor branches, is crossed by numerous bridges, which are all of wood. The principal edifice is the cathedral, one of the noblest Gothic structures in Europe, and surmounted by a spire 466 ft. high, the loftiest in the world. The W. front has a triple portal richly decorated with sculptures, statues, and bas-reliefs, while above it is a circular window which is 46 ft. in diameter and rises to the height of 236 ft. The length of the nave is 357 ft., and height of the ceiling 79 ft. The other edifice deserving of notice are the Temple Neuf built in 1254, originally the church of the Dominicans, and adorned with a fine series of paintings, representing the Dance of Death the Palais-de-Roi a handsome building, close to the cathedral, and originally the bishop's palace, the church of St. Thomas now appropriated to a Protestant congregation, and containing a fine statue of Marshal Saxe the Jewish synagogue a handsome structure erected in 1694, the prefecture *palais-de-justice* mint, public library picture-gallery, theatre, and museum. The manufactures consist of woollen, linen, and cotton goods, needlework, jeweller metal buttons, clocks and watches, stained paper, playing-cards, porcelain-stoves, carriages, straw-hats, musical instruments, oil-carry, coffee, *petite-de-foire-gras* (green liver paté) oil, madder starch soap, potash, and chemical products. There are also extensive breweries, tanneries, sugar-refineries, dye-works, bleach fields, and cotton-mills.

The trade, greatly favoured by water and railway communication, is very important, and includes, in addition to the above articles of manufacture, wine, corn, tobacco, saffron, hemp, &c. Strasbourg is the see of a bishop and possesses courts of first resort and commerce, a chamber of commerce and exchange, a mint, a university academy, a college, a Protestant faculty of theology, a diocesan seminary, and secondary ecclesiastical school a school of artillery, faculties of law, medicine, science, and letters, and a society of agriculture, sciences, and art. It is supposed to have been founded by the Romans, who erected it as a barrier against the incursions of

STREET IN STRASBURG WITH TOWER OF CATHEDRAL.
From Le Meyer des Villes.

the Germans, who, however, ultimately made themselves masters of it, and retained possession till the reign of Clovis, who again drove them back beyond the Rhine. In the 6th century it changed its ancient name of *Argentoratum* for that of *Strasbourg* and in the beginning of the 10th century became subject to the emperor of Germany. It afterwards acquired great privileges, became a free town, and was governed as a republic. In 1681, by the treaty of the 10th century between Louis XIV. and the emperor, it became permanently united to France but though more than a century and a half has since elapsed, it still retains in its houses, and in the dress and language of its inhabitants the external aspect of a German town. Pop. (1852), 64,876.

STRASBURG, two places, Prussia.—1 A tn. prov. Brandenburg gov. Potsdam 86 m. W. Stettin. It is walled; has three gates, two churches, manufactures of woollen and linen cloth, bookery and leather and a wool-market. Pop. 4356.—2 (or *Bruckberg*), A tn. prov. E. Prussia gov. and 89 m. S. E. Marienwerder, on the Drewenz. It has a court of law and several public offices, two churches, two monasteries, and two hospitals manufactures of woollen cloth and leather a brewery distillery and some general trade. Pop. 3690.

STRASCHITZ (NEX)—a tn. Bohemia, circle Rakonitz, in a plain 21 m. W. N. W. Prague; with a church, a chapel and a castle. Pop. 1793.

STRASS, a market tn. Lower Austria, at the S. foot of the Marchfeld, with vinegar works tile-works, a stone-quarry, and a trade in wine. Pop. 1162.

STRASBERG, a vil. Hohenzollern-Sigmaringen, cap. bail. with a church a small castle, and an oil, a gypsum, and other mills. Pop. 977.

STRATFIELD, a market tn. Bohemia. *See PLATE.*
STRATFIELD two par. Eng. Hants.—1 (*Mortmain*), 6400 ac. Pop. 1846.—2 (*Thrupp*), 908 ac. Pop. 246.

STRATFIELD SAYE, or **STRATHFIELD SAYE**, a par.

England, partly in Berks and partly in Southampton about 8 m. N. & E. Reading. It contains the splendid mansion of the Duke of Wellington, situated in a domain which was purchased for him by Government from Lord Havens, and is about 1½ m. long, by 1 broad. The Loddon winds through the park, dividing it into two unequal parts, and the parish church is situated at its S.W. corner. Area, 8593 ac. P. 864.

STRATFORD, five par. Eng.—1, (St. Andrew) Rutfolk, 798 ac. Pop. 300.—2, (St. Andrew, or 700) Wilts 1173 ac. Pop. 165.—3, (under the Castle) Wilts, 1483 ac. Pop. 339.—4, (St. Mary), Suffolk 1461 ac. Pop. 878.—5, (Old), Warwick, 8860 ac. Pop. 6456.

STRATFORD, several places England, particularly—1, (upon Avon) A market tn. co. and 8 m. S.W. Warwick, beautifully situated on a height sloping gently to the Avon which is here crossed by two bridges, one of them an ancient and handsome stone structure of 14 pointed arches. It consists of an old and a new town the former composed for the most part of indifferent houses, but distinguished by the possession of the one in which Shakespeare is said to have been born and the latter composed generally of spacious and well-furnished streets, though from the improvements which have been made, the distinction between the town is not easily observed, and many substantial and commodious houses are found in both. The principal buildings and objects deserving of notice are an ancient, large, and handsome parish church in the form of a cross with a square embattled tower terminating in a lofty

SHAKESPEARE'S TOWER, STRATFORD-UPON-AVON
Drawn and Engraved by J. L. Williams.

octagonal spire, and a marble slab near the entrance to the altar under which the ashes of Shakespeare repose two chapels of ease, one of them a handsome structure with a tower and a beautiful and richly sculptured porch. Wesleyan and Primitive Methodist, Independent, Baptist, and R. Catholic chapels, a free grammar national, and other schools, a plain and substantial townhall, of the Tuscan order, resting on pilasters, an infirmary a theatre a Shakespearean and a public library. The inhabitants are chiefly engaged in agriculture, and there is an important weekly corn-market, and five large cattle fairs. Pop. 3873.—2, (Stump) A market tn., co. and 7 m. N.E. Buckingham, on the Ouse, here crossed by a bridge. It has a parish church with a tower, Wesleyan Baptist, and Independent chapels, a national school several charitable endowments, and manufactures of lace. Pop. 1767.—3, (Fenny) A market tn. and par., co. and 18 m. E. Buckingham, in a marshy district on the Grand Junction canal and near the

London and Birmingham railway, with a chapel of ease and Baptist and Wesleyan chapels. Area of par., 1880 ac. Pop. 540.—4, (Langthorne), a vil., co. Essex, par. West Ham, on the Eastern Counties railway, which has here a station, and on the Lea, which is navigable and crossed by a bridge over meeting with the village of Bow, 4 m. E.N.E. London. It has a modern church, Independent, Wesleyan, and R. Catholic chapels some remains of a celebrated Claresian abbey chemical works a porter brewery and extensive establishments for the printing and dyeing of calico and silk.

STRATFORD a vil. and township U. States, Connecticut, 14 m. S.W. New Haven, at the mouth of the Housatonic, on Long Island Sound, and on the New York and New Haven railway. It has an Episcopal and four other churches an academy and a considerable inland and coasting trade. P. 2040.

STRATFORD a tn. in Canada West, cap. co. Perth, pleasantly situated on the Avon, a tributary of the Thames, about 85 m. W.S.W. Toronto. It is in general poorly built, but has Episcopal, church of Scotland Free Congregational, Wesleyan Methodist, and R. Catholic churches several schools two large breweries, a distillery a brewery two tanneries a falling saw, and two flour mills. U. pop. about 900.

STRATFORD LE BOW a vil. and par. Eng. See Bow. STRATFORD-UPON-AVON a market tn. Ireland, co. Wicklow, 2½ m. N.N.E. Ballynagles, houses of stone and clustered generally in a detached condition. It has a church, a R. Catholic chapel, and two schools. Pop. 231.

STRATH par. Scot. Inverness 19 m. by 6 m. P. 2343. STRATHAVEN a market tn. and bar. barony Scot. land co. Lanark, 14 m. S.E. Glasgow on the Fife Union which divides it into two nearly equal parts. In the older quarters of the town, the streets are narrow and irregular and the houses mean but in the more modern parts, the former are wide and regular and the latter neat and commodious. The chief employment is weaving, brewing is also carried on, and an extensive trade in cheese and cattle. P. 2712.

STRATHBLAINE, par. Scot. Stirling 6 m. by 4 m. with village 10 m. N. by W. Glasgow. Pop. 1010.

STRATHDOV, par. Scot. Aberdeen, 40 m. by 8 m. Pop. 1531.

STRATHMIGLO an ancient bor. of barony and par. Scotland on Fife. The town, pleasantly situated 1 bank Miglo, 10 m. W. by S. Cupar has a townhouse a parish, a Free a Reformed and a U. Presbyterian church, and several schools. The inhabitants are mostly employed in linen-weaving comprising diaper, damask, towels, checks, table-cloth, &c. Pop. 2609.

STRATT, a vil. Turkey in Europe, 22 m. S.W. Lannoe lat. 39° 30' N., lon. 20° E. about 6 m. long by 3½ m. broad, with a village of its own name at the W. coast.

STRATONCEA in Asia Turkey See Koni Hunan. STRATTON, a market tn. and par. England co. Cornwall in a flat district near the Huelo canal 17 m. N.W. Lannoe. It consists of several indifferently paved streets, and has a parish church in the later English style a Wesleyan chapel and the ruins of an old castle. At the commencement of the civil war the parliamentarians were here signally defeated by the royalists. Area of par. 1887 ac. P. 1696.

STRATTON, mme. par. Eng.—1 Dorset 1683 ac. Pop. 894.—2 Gloucester 1520 ac. Pop. 622.—3 (Audley) Oxford, 2810 ac. Pop. 305.—4, (East) Hants 2190 ac. Pop. 397.—5 (on the Fens) Somerset 1148 ac. STRATUM a vil. Holland, prov. N. Brabant, close by Eindhoven from which it is separated by the Demmel with a church, and at no great distance, a castle. Pop. 1315.

STRAUBENZHILL a vil. and par. Switzerland, on St. Gall near the Sitter over which there is an ingeniously constructed bridge. It has a parish church and chapel and a paper-mill. Pop. 1769.

STRAUBING a tn. Lower Bavaria, on a height above the Danube, which here forms an island, and is crossed by a bridge, 23 m. S.E. Ratisbon. It is walled, has four gates a magnificent and commodious court, and several public offices, a royal castle 12 churches, a townhouse, gymnasium, normal and Latin schools, a Carmelite monastery, orphan asylum and four hospitals and has powder salt, and corn

unimportant, a great number of breweries, a considerable trade, and several mills. Pop. 6825.

STRAUSSBERG, a *tu. Prussia*, prov. Brandenburg, gov. Potsdam, on the Strasse, 32 m. N.W. Frankfurt. It is walled; has three gates, a church, school, a house of invalids, posthouse, and house of refuge for vagrant children; manufactures of woollen and cotton goods, a brewery, distillery several mills, and a trade in horses and cattle. P. 3903.

STRAUSFURT, a *tu. Prussia*, prov. Saxony, gov. N. Erfurt, on the Unstrut, with a church and an orphan asylum. Pop. 1664.

STRAZMITZ, or **STRAZMITZ**, a *tu. Austria*, Moravia, circle and 16 m. S.W. Hradisch, on a height above 1 bank March, here crossed by a chain-bridge. It contains a castle, two churches, a Pietist cloister and gymnasium; and has some trade in salt and tobacco. Pop. 4100.

STRBA, *Cassovia*, or *Carnia*, a *tu. Hungary* on Lipan, about 8 m. from Vihodina with charcoal works, several mills, and some trade. Pop. 1623.

STRICKLAND BAY, *Australia*, having at its entrance Cape Banner on the S.E. side and Point Brown on the N.W. It penetrates the land with a sweeping curve, about 12 m. in breadth. It is cut by the 134th meridian. Pop. 9023.

STREATHAM, par. *Long Saxony* 5465 ac. P. 9023.

STREATHLEY, two par. *England*—1 Bedford 2287 ac. Pop. 385—2 Berks 1800 ac. Pop. 681.

STREE, a *vil. and com. Belgium* prov. Hainaut on the Moselle, 19 m. S.E. Mons with manufactures of linen and yarn, a brewery, and a trade in agricultural produce. P. 1132.

STREFKALIK, a *vil. Holland* prov. S. Holland 16 m. N.W. Gorinchem, on the Lek; inhabitants engaged in cattle-rearing, dairy farming and hemp-growing. Pop. 1337.

STREK, two par. *Eng.*—1, Somerset, 2513 ac. Pop. 1647—2, Sussex 1270 ac. Pop. 170.

STRELET, par. *Irel.* Longford and W. Westmeath, 16,332 ac. Pop. 2758.

STREETHILL, par. *Eng.* Essex 806 ac. Pop. 40.

STREETSVILLE, a *vil. Canada* West. co. York township and 23 m. from Toronto, on the Credit, with Episcopal Free church, and Methodist churches, a townhall several schools, manufactures of woollen cloth and iron, and several saw and flour mills. Pop. 1200.

STRIHLA, a *tu. Saxony*, circle and 37 m. E. Leipzig, r. bank Elbe, with a church, a castle, and manufactures of chemical products, a ferry, some shipping trade, and a trade in cattle. Pop. 2109.

STRILEN, a *tu. Prussia* prov. Silesia, gov. and 23 m. S. Breslau, 1 bank Odra. It is walled, has three gates a court of law and several public offices, a R. Catholic and three Protestant churches, two chapels, a courthouse and hospital, manufactures of woollen and linen cloth, ribbons, leather and tobacco, the works, woollen and other mills. Pop. 4650.

STRILITZ, several places, Prussia, particularly—1, (Gross, or Wsch-Strilitz) a *tu. prov. Silesia*, gov. and 18 m. S.E. Oppeln, with a court of justice and several public offices, a Protestant and two R. Catholic churches, a courthouse and hospital, a brewery, distillery, tile-works, and a trade in cattle. Pop. 2369.—The circle, area, 264 sq. m. is flat and sandy 1 op. 44,840—3, (Klein), a *vil.* prov. Silesia, gov. and 18 m. S.W. Oppeln, with a R. Catholic church, and a trade in cattle. Pop. 1072—3, (for Stralitz), a *vil.* prov. Silesia, gov. Breslau, circle Namslau, with a R. Catholic church and two mills. Pop. 1076.

STRILITZ, two *tu.* Mecklenburg. See **ATZWEITZ**, **NEU-STRILITZ**.

STRIELITZ, a *vil. Scotland*, co. Perth, 2 m. S.W. Cupar Angus. It was founded in 1763 on the foundation of the German war by the residence of discharged soldiers; and consists of a spacious street 90 ft. wide, and lined with neat houses each having a garden and about 3 ac. of ground attached. Its name was given in honour of Queen Charlotte, consort of George III.

STRILLEY, par. *Eng.* Nottingham 1050 ac. P. 279.

STRICKNAN, a *tu. Sweden*, Illa Bygging, S. side, Lake Major 43 m. N. Nykilung. It is the see of a bishop, and has a cathedral, a large and handsome structure, founded by an Englishman at the end of the 16th century; and an old gymnasium with a library a cabinet of minerals, and some interesting portraits. Near it are two mineral springs, and

the spring of St. Zehel, which is R. Catholic stamp was noted for its medicinal waters. Pop. 1060.

STREINICE, or **TANICE**, a *vil. Bohemia*, circle Chrudim, about 9 m. from Leitomischl, with a church, a school, and a mill. Pop. 1046.

STRENSALL, par. *Eng.* York (N. Riding) 2313 ac. Pop. 484.

STRENSHAM, par. *Eng.* Worcester; 1800 ac. P. 339.

STREPT, a *vil. and com. Belgium*, prov. Hainaut, on the Sambre, 9 m. E. Mons. It has a malt and a flour mill, a distillery, limekilns, and limestone-quarries. Pop. 1296.

STRETFORD, par. *Eng.* Cheshire, 434 ac. P. 43.

STRETTAN, par. *Eng.* Cambridge 6940 ac. P. 1697.

STRETTO, a *vil. Austria*, Dalmatia, circle Zara, about 88 m. from Sebenico, on an island of the same name, with a church and a custom-house. Pop. 1327.

STRETTON, seven par. *Eng.*—1, Rutland 1934 ac. Pop. 241—2, (Bakersville) Warwick 790 ac. Pop. 62—3, (upon-Dunsmore), Warwick, 8110 ac. Pop. 1078—4, (on-the-Field), Derby; 1008 ac. STRETTON CUMMINS, a market town and par. *England*, co. Salop, 18 m. S. by W. Shrewsbury, with very fine market-hall, a pretty extensive manufactory of flannel, but little trade. Area of par., 10,716 ac. Pop. 1676.

STRETTI, a *vil. and com. Italy* Piedmont, div. Alesandria, prov. and about 2 m. N.W. Acqui. It has several churches and two arcades. Pop. 1745.

STRIANO, a *tu. Naples*, prov. Salerno S.E. Nola, on a height, with a church and a chapel. Pop. 1800.

STRICHEN, par. *Scot.* Aberdeen; 7 m. by 3 m. P. 2283.

STRICKATHORP, par. *Scot.* Forfar; 5440 ac. P. 503.

STRICKTAN, a *vil. in Prussia*, prov. Silesia, gov. and 27 m. W.S.W. Breslau, on a stream of same name. It has a court of law and several public offices, a Protestant and four R. Catholic churches, a courthouse, posthouse, and hospital, manufactures of woollen and linen cloth, stoneware, leather, and refined wax, and several mills. In 1745 the Austrians and Saxons were defeated here by Frederick the Great. P. 3207.

STRILINA, a river, Russia, gov. Volodga, runs in circle Nikolai, flows N., and after a course of nearly 60 m., joins r. bank Sushona. Vast numbers of birch and birch bark are collected on its banks, and sent down in boats to Tung-Yalka, to be employed in the navigation of the N. Dvina.

STRIGNO, a *vil. Austria*, Tyrol, circle Trent, on the Brenta, 6 m. from Borneo. It has a castle and a demary church. Coal is worked in the vicinity 1 op. 1800.

STRILJEN, a *vil. Holland* prov. S. Holland 8 m. S. Dordrecht; with a church and school, a village-house, and a prison. Pop. (agricultural) 3515.

STRILEK, a market *tu. Austria*, Moravia, circle and 13 m. N.W. Hradisch, with two castles, one of them modern and the other in ruins, a church and a chapel. Pop. 1067.

STRINGTON, par. *Eng.* Somerset; 1139 ac. P. 159.

STRITTON, par. *Eng.* Northampton; 889 ac. P. 68.

STRIBEN, a *tu. Prussia* Saxony, gov. Minden, circle L. Hildesheim, with a church. Pop. 1344.

STROKES TOWN, a market *tu. Ireland*, co. Roscommon 12 m. W. by N. Longford. It has a handsome church and a R. Catholic chapel, a courthouse and bridewell, three schools, and a limited trade in corn. Pop. 1358.

STROMA, or **STROMAY**, a small *tu. Iceland*, one of the numerous group which studs the Sound of Harnar. It is about 1 m. long, of very irregular shape, and not inhabited.

STROMBOLI (see **STROMBOLI**), the most N. of the Lipari Isles, 10 m. off N. coast Sicily; about 9 m. in circuit. It consists entirely of a single volcanic mountain, which has its summiting point and crater on the N.W. side, 2500 ft. above sea-level, and from the top of which smoke and flames are continually ascending, and sending rays of light over such an immense space, that it has received the name of the Lighthouse of the Mediterranean. It often makes loud explosions and sends forth stones and ash, but no proper eruption has taken place for nearly 3000 years. A few inhabitants consequently venture to live upon it, and receive some compensation for the fertility of the soil, from which they had in the ancient fertility of the soil, from which an exquisite wine is produced. The other products are sulphur and pumice-stone.

STROMNESS, a seaport in, burgh of barony and par Scotland, co Orkney, isl. Mainland or Pomona. The town, situated at the head of a beautiful bay, lat. 58° 57' 45" N lon. 8° 17' 30" W (n.), consists chiefly of one narrow and irregular street, extending along the harbour for about 2 m. The houses, many of which have their gables to the street, are for the most part substantially built of stone. There are three churches—an Episcopal, a U. Presbyterian, and a Free church; numerous schools, a public library and a museum, but no manufactures, excepting a small rope-work. There is a patent slip, and ship-building yard. The harbour to which the town owes its existence, is one of the most commodious in the N. of Scotland, and forms a safe retreat to all sorts of vessels. It is about 1 m. long, and somewhat less than 1/2 m. broad. Pop. of burgh, 2035, (par.), 2770

STROMÖE, the chief of the Faröe Islands lat. 62° N lon. 7° W. It lies nearly in the centre of the group, length, about 27 m.; breadth, 7 m. area, 104 sq. m. It is extremely rugged and mountainous, its whole coast bristling with abrupt precipices, which make it difficult for a vessel to effect a landing. The mountains, which rise towards the interior, terminate in lofty peaks, and consist generally of greenstone and dolomites. The highest peak is Skjallingfjeld, 2430 ft. The soil is in general very shallow, there is no wood, and barley is the only grain which comes to maturity. Both turnips and potatoes thrive well. Fishing, wool-spinning, and the pursuit of wild fowl for their eggs or young are almost the only employments. Among the minerals some traces of coal are found, and splendid crystals and scudites are of frequent occurrence. Stromöe is divided into two parishes and on its E. coast stands Thorshavn the capital and chief port of the whole Faröe group. Pop. 2000

STROMSTAD a seaport in Sweden, lln and 92 m. N N W Göteborg, on a tongue of land which projects into a deep bay of the Skager-Rack. A small stream divides the town into two parts, and forms a tolerable harbour. Many visitation roads here in summer for bathing. Pop. 1502

STRONA, a vil and com. Italy, Piedmont, div Turin prov and 6 m. E Biella with a church. Pop. 1300

STRONGOLI, a tn Naples, prov Calabria-Ultra II, 13 m. N N W Catanzaro, on a steep rock about 3 m. from the Ionian Sea. It is the site of a bishop, and contains a cathedral, four convents a seminary, an hospital, and two almshouses. It is supposed to occupy the site of the ancient Petilia. P. 2000

STRONA, or STROGAT, one of the most E Orkney Islands, lat. (S. E. point) 58° 4' 54" N lon 2° 52' W (n.), about 7 m. long and 5 1/2 m. broad. Its coasts are marked with deep indentations, and numerous headlands and promontories. The surface is of moderate elevation, with exception of a central ridge. Oats, here, potatoes, pease, and turnips are grown. The white fish, lobster and herring fishery are prosecuted here with some vigour. Pop. 1176

STROOD, a vil and par England, co Kent, on the Medway here crossed by a bridge, nearly opposite to Rochester and at the terminus of the Gravesend and Rochester railway. It consists chiefly of one street in the line of road from Rochester to London, is poorly built, though considerable improvements have recently been made and has a modern parish church, an Independent chapel, two endowed schools, and the remains of a building which belonged to the Templars. The inhabitants are chiefly employed in the fisheries in the Medway. Area of par 1632 ac. Pop. 3087—Immediately N E. of Strood, and properly forming along with it one of the suburbs of Rochester, is FARNBOROUGH, consisting of a village and landward parish. The church occupies a commanding height, overlooking the Medway, and there is also a Wesleyan chapel. Upon a castle, erected by Queen Elizabeth to defend the passage of the Medway, and consisting of an oblong central building with a tower at each end, is the parish. Area of par, 8765 ac. Pop. 2308.

STROPPIANA, a tn Italy, Piedmont, div and 18 m. S S W Novara with a court of justice, a church a com. mental school, and a charitable endowment. Pop. 2311

STROPPA, a vil and com. Italy, Piedmont, div and 21 m. W N W Corti, with an ancient church. Pop. 1597

STROUD, or BROMWATZKA, a market tn and par, for England, co. and 5 m. E. by E Gloucester, in a beautiful district, on a stream of warm waters, near its confluence with the Froze, and on the Great Western railway. Under a

recent improvement act, the town, formerly indifferently built, has assumed a much better appearance. Several streets have been widened, many handsome houses erected, and both lighting by gas, good pavement, and an abundant supply of excellent water have been introduced. Among the public buildings and objects of interest, are a parochial and a district church, the former a large edifice, with a tower terminating in a lofty conical spire. Baptist, Independent, Wesleyan, and Primitive Methodist chapels, national, British, Indian, and other schools, a dispensary, and an hospital. Strood has long been the centre of the woollen manufactures of Gloucestershire, and has numerous factories employed in them, both within the town and in its vicinity, more especially along the banks of the Stroud, the water of which is said to be admirably adapted for dyeing scarlet. All the surrounding valleys exhibit ranges of houses or villages occupied by persons in the woollen manufactures. In carrying on this important branch of industry, great facilities are afforded both by the railway and the Thames and Severn canal, which passes on the S. The weekly market is well attended, and there are two annual fairs, chiefly for cattle. The par. bor of Strood embraces an extensive manufacturing district, and sends two members to Parliament. Pop. of par, 8793, of bor, 96,555

STROXTON par Eng Lincoln 970 ac. Pop. 112

STUDLEY, a vil. and par. England, co. Warwick, on the Afton, 4 m. N by W Alcester. It has an ancient church, with a beautiful Norman arch; a Wesleyan chapel, an endowed school; and extensive manufactures of needles and fish-hooks. Area of par. 4503 ac. Pop. 3193.

STUHLWESENBERG a to Hungary cap. co. of its name, 1 bank Ganges, near the W border, occupies extensive masses of forest, 38 m. S.W. Buda. It is a place of considerable extent, but is badly situated in the immediate neighbourhood of unhealthy swamps; has irregular and ill-paved streets, and though an ancient place, which makes some figure in the early history of Hungary, possesses few objects of interest. The buildings most deserving of notice are the cathedral, which is handsome and richly decorated, the county-buildings, the episcopal palace, several churches, a gymnasium and normal school. The manufactures consist chiefly of woollen and linen cloth, and there is a considerable trade in fruit and wine. Pop. 23,600.—The country area, 1807 sq. m. is much broken in the N by lofty hills, but has occasionally tracts of level and even marshy land, among others the extensive morass of Barret. The most important river is the Danube, which forms the E boundary. The soil is fertile, and raises in abundance all kinds of corn, particularly wheat, of excellent quality much good wine, fruit, maize, and tobacco. The pastures also are rich and rear great numbers of fat cattle, sheep and horses. In the N the forests are oak, beech, yield excellent timber and abound with game. The chief minerals are marble and good building-stone. This county is divided into the three districts of Barmeth, Lankar and Birk. Pop. 187 078.

STULM atn Prussia, prov. E. Prussia, gov. and 11 m. N.N.E. Marienwerder surrounded by two lakes. It has a court of law and several public offices, two churches a synagogue, an old castle and a trade in cattle. Pop. 1219.

STUTTGART, a to. Germany, cap. of the kingdom of Wurtemberg, 97 to S.E. Frankfurt-on-the-Main, beautifully situated in the small valley of the Neckar, and so closely surrounded by vineyard-slopes, as to suffer occasionally from a want of free circulation of the air. Notwithstanding the rest-

deness of the court, it has very little of the appearance of a capital. The houses are generally plain, and almost ruinous, and the whole place has been not inaccurately described 'as a large village with a fine street and a palace.' It consists of three parts, an lower, an upper, and an outer town, and is entered by eight gates. The objects most deserving of notice are the new palace, begun in 1765, but not completed till 1804, a large three-story edifice, consisting of a body and two wings, of an exterior by no means prepossessing, but internally richly decorated and gorgeously furnished; the old palace, resembling a feudal fortress, and now occupied by official personages connected with the court or government; hard by it is a monument to Schiller with a statue in iron modelled by Thorwaldsen; the Stufkirche, an ancient Gothic structure, with a good organ and some interesting monuments, the Hospitalkirche, also Gothic, of an ungainly exterior, compensated somewhat by internal decorations, and the possession of a fine statue of our Saviour, by Dürer; St. Leonard's, and four other churches, most of them modern, and of little architectural merit, the library of 200 000 vols, including it is said, the largest collection of Bibles in the world; the theatre, a modern showy edifice; the Ständehaus, where the states hold their sittings; the townhouse, a building of the 15th century the new register-office, the new barracks,

THE MARKET-PLACE, STUTTGART.—From Leipzig, according von Dittmar.

the officers pavilion, an old building, now occupied by the polytechnic school and the Marshall or studious, containing about 200 horses, many of them Arabian, and the finest in Germany. The principal educational establishments are the gymnasium, the polytechnic school, the school of art, the veterinary school, and various other schools. The benevolent endowments include various hospitals, asylums, almshouses, and other charities. Among industrial branches an important place is due to the book trade, connected with which are paper-mills, type-foundries, printing-presses, and lithographic establishments. The other leading manufactures are linen, silk, woollen, and cotton goods, gloves, leather, metal, and tin wares, jewellery, and various articles in gold and silver castings, mauling bells, surgical, mathematical scientific, and musical instruments; gold embroidery vinegar, and beer, for which there are numerous breweries. In the immediate vicinity are alleys, parks, and gardens, affording ample means of recreation and at a short distance are various places of holiday resort, including Rothenstein, the beautiful summer-residence of the king, Cannstadt, celebrated for its mineral springs, the Moenchsbach, the saltworks, &c. Stuttgart is of ancient date and owes its name to a castle which dated before 1080. In 1119 it obtained corporate rights from Rudolf Margrave of Baden, and in 1220 because the residence of the counts of Wurtemberg. It was much extended and improved about 1440, and has since, with only a short interval, been the capital. Pop. 80,000; (1861) 95,103.

STUTTON, par. Eng. Suffolk. 2785 ac. Pop. 455.

STUTZAITZA, or Carakova, a to. Turkey in Europe, Macedonia, 40 m. S.W. Ghebeli, at the confluence of the

Brandau and Eggerden. It has several Greek churches, a mosque, public baths, a mint for coining copper, and other manufactures of the same metal. Pop. about 4000.

STYR, a river, which issues from a lake near Olenko, in Austrian Galicia, flows very circuitously N. E. into the Russian gov. Volynia, traverses that gov. enters gov. Minsk, whence it proceeds into the marshes of Pnuk, and joins r. bank Pripiet, after a course of about 200 m.

STYRIA (German, *Steiermark*, French, *Styrie*, Dutch *Stiermark*, Italian *Stiria*), a duchy, Austria, bounded N. by the archduchy of Austria, E. Hungary, S. E. Croatia, S. W. Dalmia, and W. Dalmia and Salzburg; greatest length, N. to S. 124 m., greatest breadth, E. to W. 112 m., area, 5689 geo. sq. m. It belongs decidedly to the class of alpine lands, being traversed by three distinct mountain-chains, branching partly from the Noris and partly from the Carinthian Alps, and attaining in their culminating points of the Grimming on the N. W., and the Eisenhut on the S. W. frontiers, the respective heights of 7400 ft. and 7646 ft. The summits of these mountains are granite, which, on the highest summits, takes complete possession of the surface, but on the higher slopes and secondary summits is extensively overlain by beds of limestone, remarkable alike for the richness of its mineral treasure, particularly iron, and the number and dimensions of the caverns which occur in it. Between the mountain-ranges are numerous valleys of greater or less extent, but the only part of the surface which flattens down, so as to have somewhat the appearance of a plain is in the S. E. where the Mur and the Drave are gradually approaching each other preparatory to their final junction in Hungary. The whole of Styria belongs to the basin of the Danube, which drains it by means of four rivers, each of which is fed within it by a number of minor streams. These rivers are the Enns in the N. the Mur, which has by far the longest course within the duchy, traversing it centrally first in an E. and then in a S. direction, the Drave, which traverses the S. in an E. direction, and the Save, which nowhere belongs wholly to Styria, but only forms part of the boundary between it and Dalmia. Besides these rivers and their affluents, there are a great number of lakes unconnected among the mountains, not individually of such a magnitude as to deserve a separate notice, but generally rich in natural beauty. Not much of the surface of Styria can be regarded as absolutely sterile. The loftiest summits are generally clothed with wood, some of them, with exception of a few in the N. W., on the borders of Austria, where glaciers appear having a perpetual covering of ice or snow. Still the extent of arable land is necessarily very limited, and though the soil in the lower grounds is generally fertile the corn raised in ordinary years barely meets the consumption. In many districts the vine thrives well, and though much of the wine made is only of secondary quality some of it, as the Lattenberg, Rudskersberg, Sautschich, &c. has acquired a high name. All the ordinary kinds of fruit abound, and as auxiliary crops hemp, flax, and the poppy are extensively cultivated. The breeds of domestic animals are generally of an inferior description, and the management of stock is very imperfectly understood. The great sources of wealth in the country are the forests and minerals. The former cover nearly a half of the whole surface and not only furnish immense quantities of the finest timber, in the hewing and forwarding of which to the ports of export, great numbers of the inhabitants are constantly employed, but contain inexhaustible supplies of fuel for smelting-furnaces. The minerals include gold silver lead, copper cobalt, and zinc in limited quantities, and iron of the finest quality, and in the greatest abundance. The other minerals of value are sulphur alum, and rock-salt. The raw materials thus obtained have led to the establishment of numerous manufactures, among which that of articles in iron has long taken the lead. The weavers, too, and other cutting-instruments of Styria, are famous over Europe. Styria is divided into five circles (Kreise) — Griska (the capital), Marburg, Cilli, Brisk, and Judenburg — 1 pop. (1849), 1,006,971.

STIAKIN a resort to Nubia, on the Red Sea; lat. 17° 17' N., lon. 27° 20' E. (n.) with anchorage for large vessels. It lies on a small island of its own name, and is built of madrepore. It has some trade in ostrich-feathers, gold, ivory, salt, and millet; and is a station for pilgrims on their way to Mecca.

SUAPURE, or **SVATURO**, a river, Venezuela, rises in the Sierra Parima, near lat. 8° S., flows N. W., and joins r. bank Orinoco, after a course of about 100 m.

SUATA, or **SUAPA**, a tn. New Granada, prov. Socorro, about 80 m. S. S. W. Pamplona, on a height above r. bank Galloana, or Sagumbaco. It consists of about 1000 houses.

SUBBIANO, a vil. and com. Tuscany, l. bank Arno, 84 m. E. R.E. Florence, with a church a school, and a trade in wine and claustrato. Pop. 3070.

SUBLEATO, or **SVATKO**, a hill-fort, N. Hindostan, 4205 ft. above sea-level on an affluents of the Sutlej, 160 m. N. Delhi, the head-quarters of a British battalion.

SUBIACO (anc. *Sublaqueum*), a tn. Papal States, 24 m. E. Rome, on a height near r. bank Tevere, and more remarkable for the beauty of the scenery around it than for any object of interest within its walls. Its streets are dark and narrow and its houses, though interesting from their antiquity, leave a dull gloomy look. Crowning the hill on which the town stands is a fine old castle which was for ages the summer-residence of the popes, immediately below the town the river is broken by some fine falls, while the valley is clothed with magnificent forests. The whole landscape is so beautiful that to painters of all countries it has long been a favourite resort. The principal building within the town is a very handsome church, and about 1 m. from it, on a hill above the river, may still be traced the remains of Nero's villa, near which is the celebrated monastery of Santa Scolastica, an edifice of great interest and architectural merit, but most deserving of notice as the first place in Italy in which a printing-press was established. Pop. 5896.

SUBLATER, par. East Cork, 749 sq. l. pop. 146.

SUBLNREKKA a river, Hindostan, rises in prov. Bahar, flows circuitously S. E. and falls into the Bay of Bengal, after a course of about 250 m., below Jellaoore.

SUBZAWI R., a decayed, and now considerable tn. of W. Afghanistan, 70 m. S. Herat lat. 32° 20' N. lon. 65° 10' E. in a fertile plain. It is protected by a mud fort about 250 yards square.

SUBZOW a tn. Russia, gov. and 70 m. W. S. W. Tver, cap. dist., with some general trade. l. pop. (1849) 2463.

SUBZULKOTE a tn. Hindostan, princ. Bahawalpur, 60 m. N. E. Rore, lat. 28° 13' N. lon. 69° 42' E. It is surrounded by a mud wall 30 ft. in height and has a pretty good bazaar but little trade except in grain. l. pop. 2000.

SUCCADANA, or **SOEKADANA** a small native state, xl. Borneo, S. W. coast, on the Carimata passage, and including the islands of Carimata, Lajik, and Soerotes, &c., about 80 m. S. W. from the coast. It is very fertile and yields also a considerable quantity of diamonds and of sulphur. — The *CAVITAT* also named *Sucadana*, lat. 1° 16' S., lon. 110° 18' (e) lies on a large bay at the mouth of the river of its name which is navigable for canoes several days journey inland. It is the residence of the sultan and of a Dutch envoy and has a good haven. The Javanese and Malays carry on an active trade in opium, diamonds, gold, tin, pepper, camphor, bennam dragon's-blood, and rattan. It was at one time the most famous town in Borneo, but has never recovered its destruction by the Dutch in 1768.

SUCHONA, a river, Russia, issues from Iako Kabinok in S. W. of gov. Volodga, flows E. N. E. past Tzema, and at Tzema-Volks after a course of nearly 500 m., unites with the Jug in forming the N. Dvina. It is navigable almost throughout, and of great commercial importance, giving in connection with the Dvina a continuous communication from Volodga to Archangel. Its principal affluents are the Volodga, Tolochma, Usting, and Verkhnia-Brya.

SUCHTELN, a tn. Rhensh Prussia, gov. and 19 m. W. N. W. Düsseldorf l. bank Niers with two churches, and manufactures of woollen linen, cotton, velvet, and silk goods a cotton-mill, tanneries, and dye-works. l. pop. 1700.

SUCKLEY, par. Eng. Worcester. 5184 ac. Pop. 1168.

SUCURU, a river, Brazil, rises in the Serra-de-Iguassu prov. Mato-Grosso, flows first S., then S. E., and joins r. bank Parana 8 m. below the junction of the Tieté.

SUCZAWA, or **SVUCZAWA**, an affluent of the Sereth it rises in the N. E. slopes of the Carpathians, Austria, prov. Bukovina, flows E. N. E. then S. E., forms part of the boundary between Galicia and Moldavia, and joins r. bank Sereth, after a course of about 100 m.

SUCUAWA, a tn. Galien, circle Bichowina, on a river of same name, near the frontiers of Malakia, 30 m. S.E. K. Casnewitz. It is walled, and irregularly built; and has a R. Catholic and several Greek churches, a synagogue, and a high school. The principal manufacture is morocco and cordovan leather, and there is a considerable transit trade carried on between Transylvania and Malakia. Pop. 4812.

SUDA, or SWZ, a river, Bama, rises in S. of gov. Oloren, enters gov. Negerand, and flowing S.W., joins r. bank Nkama, 2 m. below Tcherewepeta; total course, 140 m.

SUDBOURGH, par. Eng. Northampton 1781 ac. Pop. 867.

SUDBOURNE, par. Eng. Suffolk, 5439 ac. Pop. 691.

SUDBURY, par. Eng. Lincoln, 1000 ac. Pop. 90.

SUDBURY, a market tn. and man. for England, co. Suffolk, 17 m. W. Ipswich, 1 bank Skour. It is neat, clean, and tolerably well built, and has three churches, all spacious and handsome structures, of considerable antiquity, two places of worship for Independents, one for Baptists, and one for Friends; a free grammar-school and several charities, a townhall and a neat theatre, manufactures of silk, craye, and hunting for ships, flags, and a considerable trade in coal and agricultural produce by the Stour. Pop. 5043.

SUDBURY, par. Eng. Derby 2603 ac. Pop. 570.

SUDBY, par. Eng. Gloucester 2623 ac. P. 77.

SUDETEN (German *Sudeten*) a mountain-chain, Europe, which, taken in its most general sense, includes all the mountain-ranges which extend along the S. frontiers of Prussia and thence from the source of the Oder to that of the Elster, but is more correctly confined to the chain which stretches E. to W. between Prussian Sillesia and Moravia, and terminates at the source of the Neisse. Its culminating point is the Spangierzer Schneeberg height, 4913 ft. The mountains are chiefly composed of granite, which covers a large extent of surface, but often lies concealed under gneiss and primitive schists. The principal streams which rise in it are the Neisse on the N., and the March or Morava on the S. It contains mines of copper, lead, and iron, and coal is found on some of the N. slopes.

SUDUST a river, Bama, rises in W. of gov. Orol, enters gov. Carraigow, flows S. past Pogor and after a course of about 100 m., joins r. bank Dema.

SUDSHA, a tn. Bama. See *SUDSHA*.

SUDUK a small river Belochistan rises in lat. 26° N. lon. 65° 12' E. and after a S. course of about 80 m. falls into the sea in lat. 26° 36' N. lon. 65° 29' E. Traders ascend 10 m., or 12 m. in boats to cut wood.

SUE, an isl. Torres Strait, one of the Sisters, N. N. E. Cape York, lat. 10° 18' S. lon. 143° 52' E. about a third of a mile long, of coral-reef formation, low and thickly wooded. At the W. end of the island is a native village.

SUECA, a tn. Spain, prov. and 23 m. S. Valencia, 1 bank Júcar about 4 m. from the Mediterranean. The houses are well constructed, streets broad some of them paved, and there are five squares, which serve as market-places. Besides the courthouse the town has a prison, an hospital, two public schools for each sex, besides several private educational establishments and a parish church, also brick and tile kilns, four flour and five rice mills, all in a thriving condition. After the subjugation of the Muzulmans, this town fell to the Moors. Subsequently its population was greatly reduced by the expulsion of the Moors, and it suffered much in the wars of succession; but in later times it has been very prosperous. Pop. 6871.

SUEDIAN a port, Asiatic Turkey, path Aleppo, 18 m. S.W. Antakia, on the site of the ancient Seleucia. It is a remarkably healthy place, and appears to present considerable advantages for the formation of harbours &c. for the accommodation of shipping. It is well sheltered, there are no sandbanks, and the anchorage is safe.

SUEBOS, a vil. Spain, prov. Leon, dist. Astorga, on a height, with a church, a primary school, and some trade in corn and cattle. Pop. 1064.

SUEZ, a tn. and seaport, Egypt, near the N. extremity of the gulf of its own name, an arm of the Red Sea, 77 m. E. Cairo lat. 29° 56' 50" N. lon. 32° 54' 15" E. (n.) It is a wretched ill built town, situated in a desert. The houses are of sun-dried brick, and the streets unpaved. It contains a bazaar in which are some tolerably well-filled shops, a vast

bar of mosques, a Greek church, several khans, and a customs house. In the roadstead there is good anchorage for vessels of from 800 tons to 1000 tons, but the port will not receive boats of more than 60 tons. Being on the highroad between Egypt and the East, from has always enjoyed an extensive transit trade, and since the establishment of the overland route to India, it has become the residence of many merchants and agents.—The *canal* is about 200 m. long S. E. to N. W., by 30 m. to 40 m. broad. The spot where the Isthmus is supposed to have crossed the Red Sea on the Exodus from Egypt, is about 2 m. from the head of the gulf.

SUEZ (Isthmus cr.), a tract of low-lying land between the Red Sea and the Mediterranean, connecting Africa with Asia. Its extent, N. to S., is about 74 m. It is composed of shell-limestone rocks, mixed with strata of siliceous limestone, and partly covered with sand or salt-marsh. The surface is not entirely level, but is interrupted by some depressions, in which these salt-marshes or swamps occur, and generally has an inclination towards the Mediterranean. Drinkable water occurs in one or two places only. Traces of the canal by which Necho and Ptolemy Philadelphus united the E. branch of the Nile and the Red Sea are still visible.

SUEID Kox [White Mountain] a lofty range of mountains, bounding the valley of the Kabool river on the S., as the Hindoo-Koosh does on the N. It extends nearly E. and W. along the parallel of lat. 33° 50' N., commencing E. near Batak. lon. 73° 10' E., and terminating W. in lon. 65° 36' E. It is generally of primary formation, consisting of granite, quartz, gneiss, mica-schists, and primary limestone. The highest part, which is between the meridians of 65° 40' and 70° 30' E., attains an elevation of 14,100 ft. above sea-level, and is covered with perpetual snow.

SUFFIELD, par. Eng. Norfolk, 1468 ac. Pop. 237.

SUFFOLK a maritime co. England, bounded, N. by co. Norfolk E. the North Sea, S. co. Essex, W. Cambridge, area, 907,980 ac., of which 820,000 ac. are supposed to be arable meadow, and pasture. The surface is generally flat, there being no eminences throughout the whole county worthy of notice. The cliffs at some points on that part of the coast, composed of alternations of clay, sand, and gravel, are variously undulated by the sea. At other points the reverse of this has taken place, accessions of land having been formed by marine deposits. The general outline of the coast, which is about 50 m. long is pretty regular. The bays are shallow and the headlands have little prominence. The prevailing soils are strong clayey loams, with a substratum of clay marl and sandy loam and sand, the latter occupying the E. coast. The soil in the S.W. parts is poor but generally the county is equal in fertility to any in England. Ify far the greater part of Suffolk is under tillage, which is carefully and skilfully conducted. The crops are principally wheat, barley oats, beans, peas, buckwheat, turnips, cabbages, carrots, potatoes, &c. The pastures are remarkable for their richness; but much of it has been ploughed up and the number and extent of dairy farms consequently reduced, although large quantities of butter are still made. The breeds of horses, cattle and hogs, are celebrated. Manufactures inconsiderable the principal are the combing and spinning of wool, and the manufacture of mixed silk and worsted stuffs. Suffolk is traversed by the Eastern Counties railway, and has two county towns Ipswich and Bury-St. Edmunds, and the boroughs of Sudbury and Eye. It returns nine members to Parliament, four of which are for the county. Pop. 837,215.

SUGATAGIHI AKWA a vil. Hungary Thither Thales, co. Marmara, about 12 m. from Saigha with two churches, salt-works, and a trade in corn. Pop. 1187.

SUGHEUD, or SUGHUT, a tn. Asiatic Turkey, Anatolia, 1 bank Sakaria, 72 m. E. by S. Bursa. It consists for the most part of houses of wood and clay; but has a considerable trade in raw silk which have long been celebrated.

SUGHERA, a small seaport, S. coast. Arabia, 60 m. N. E. Aden, lat. 18° 21' 30" N. lon. 46° 46' E. There is here a castle built of stone, in which the sultan resides for several months of the year. Much millet is cultivated in the vicinity. Good water, bullocks, sheep, poultry, onions, and pumpkins may be easily procured.

SUELI, a tn. Prussia, prov. Saxony gov. and 63 m. W. R.W. Erfurt, on the Leister, with two churches, a burgherschool orphan hospital, poorhouse, workhouse, and several

to S.E.W. and about 19 m. in extent; of moderate height, and has, on the whole, a very barren appearance, though some green spots are seen. In the S. it terminates in a high hill almost isolated from the rest of the island. The soil on its surface has a strong smell of sulphur. On the middle of the island, from which dangerous breakers stretch about 2 m. E. and W., the sea breaks with great violence. S. An Isl. Japan is Van Dusen Strait, off the coast of Kinsai. Its 80° 42' N. lat. 130° 17' E. It has a volcano upon it—S. An Isl. N. Pacific, between the Japan and the Loo-Choo Isles; lat. 37° 50' N.; lon. 126° 20' E. (J.)

SULSIQUE, a vil. and com. Belgium, prov. E. Flanders, 18 m. S.E.W. Ghent with manufactures of linen, an oil and five flour mills. Pop. 1250.

SULTANIA or **SULTANIAN**, a tn. Parma, prov. Irak Ajemi, 160 m. W.N.W. Tabriz, on the Zangana, which here traverses the wide plain of Sultania. Extensive vines here cover a space of several square miles. The most important are those of an imposing species of great splendour.

SULTANPOOR, or **KELU**, a tn. Punjab, cap. princip. Kulu, on S. slope of the Himalaya, near the confluence of the Ravi and Sutlej. 104 m. E.S.E. Lahore, lat. 33° 7' N.; lon. 77° 5' E. It consists of an upper and lower town, the latter, which is next the river, containing the residence of the rajah, and the former consisting of the houses of traders, shopkeepers and artificers. The principal imports are chinaware, coarse cottons, and woollens and the returns are made in opium and musk, the traffic being conducted by wandering manducats, of whom great numbers arrive here on their route to various places of pilgrimage in the mountains.

SULZ, a tn. Württemberg, circle Schwarzwald, in a deep and narrow valley r. bank Neckar 88 m. S.W. Stuttgart with a Latin school, manufactures of woollen and linen cloth, a brewery, worsted and other mills, and important brassworks from which much salt is made. Pop. 2349.

SULZ, a market in Lower Austria, about 8 m. from Waidersdorf with a church. Pop. 1207.

SULZBACH, numerous small places, Bavaria, particularly—1. A tn. Upper Palatinate, in a small stream of same name at its confluence with the Taal, here crossed by a bridge. It is walled except by four gates and has a castle, six churches, a chapel, synagogue, and Latin school, a Hebrew printing-press, and a trade in hops. Near it are iron mines. Pop. 2312.—2. A vil. Lower Franconia, dist. Oberhausen with a church, and several mills. Pop. 1120.

SULZBACH, several small places Württemberg:—1. (near Merz), A vil. circle Neckar in a wild and romantic valley with a church. Near it is the castle of Lauterbach. Pop. 1475.—2. A vil. circle Jaxt, dist. Gaildorf on the Kocher with a church. Pop. 1249.

SULZBUHNS—1. A tn. Baden, circle Upper Rhine, 12 m. S.W. Freiburg with a church, and a bathing establishment near salt wells, and manufactures of beet-root sugar. Pop. 1144.—2. A market in Bavaria, Upper Palatinate, on a hill above the Sala, an affluent of the Altmühl, 25 m. S.E. Nürnberg with two churches, a castle, and a bathing establishment. Pop. 1112.

SULZL, a tn. Mecklenburg-Schwern circle Wiedrich 1 bank Becknitz, 21 m. E. Rostock. It is walled has two gates, a church, and a bathing establishment, with fine walks and salt-works. Pop. 3550.

SULZELD, a tn. Bavaria, Lower Franconia, dist. Kitzingen, r. bank Main, 10 m. E.S.E. Würzburg, with a church. Pop. 1028.

SUMALANG or **KORUMADANG**, a large vil. N. Java, prov. Preanger 87 m. S.E. Batavia, beautifully situated, and exceedingly neat.

SUMANAP or **SORMANAP**, the most E. division of Isl. Madura, resigned over by its own sultan, but subject to the Dutch. Being deficient in water and not very fertile, the chief means of subsistence is the fisheries. Still agriculture and also trade, is more actively prosecuted than in the other portions of the island, as a consequence of which, the public prosperity is greater. Pop. 122,792.—**SUMARAT**, the capital town on the S.E. coast, at the mouth of the Marangin, in a large bay in which is good anchorage for large vessels. It is a thriving place with several good stone-houses, a governor's house, a sultan's palace, a church, and a school. Chinese, Javanese, and Arab suburbs and near it a Dutch fort, built in 1758.

SUMARETN, or **ROSEKREUT**, a market tn. Lower Austria, 19 m. from Fischau. It consists for the most part of thatched houses but has a considerable trade in corn, fruit, and wine. Pop. 1400.

SUMATRA, a great island in the Indian Sea, immediately under the equator and the first (from the W.) of that chain of islands which, extending with a S. curve from the Malayan peninsula to Papea and the Philippines, lies in a close towards the N. the region known as the Indian Archipelago. Its extreme limits are lat. 5° 45' N. and 5° 55' S.; lon. 90° 40' E., and 106° 5' E. But as the island extends in its greatest dimensions nearly S.E. and N.W., its extreme points, though differing only 10° 40' in latitude, are separated by a distance equal to nearly 15, or about 1000 m. The greatest breadth of the island is in its middle, nearly opposite to Singapore, and measures about 240 m. The average width may be taken at 140 m. so that the area of the island will be in round numbers, 140,000 sq. m. It ranks, therefore, in magnitude as the second of the Asiatic islands, Borneo being the first. The N. portion of Sumatra is separated from the Malayan peninsula on the E. by the Strait of Malacca, and its E. extremity is separated from Java by the Strait of Sunda.

Aspect and Mountains—Sumatra appears to one who sails along its W. coast to be an elevated ridge, the mountains rising abruptly at a distance of 2 m. from the shore, and in many places overhanging the waves with steep cliffs. These mountains nearly all reach and disappear in the clouds at a height of about 3000 ft. In some places they reappear above the clouds and a few elevated conical peaks rise to a second stratum of fleecy clouds, in which they terminate. This mountain barrier exhibits little variety of form, and the dense forest that clothes it increases its uniformity. The E. side of the island has a totally different character and spreads out into interminable plains, nearly as level as the sea. The mountains, viewed from the W. sea-shore, appear at first view to form a continuous ridge; but dense mists resting in the valleys indicate at times the breaks in the chain, and enable the eye to distinguish also three or four separate ridges all parallel to the coast. The chief of these is named Bukit Barisan. On the S.W. side of the island the mountains rise abruptly from the shore, and for 300 m. or 400 m. the average width of the plains between the mountain-forests and the sea does not exceed 2 m. On the N. half of the W. coast, the level maritime tract has a breadth of 6 m. or 8 m. In a few places, chiefly at the opening of transverse valleys, the mountains retire so as to allow a greater extension of the alluvial plain, which in a few places has a width of 12 m. to 20 m. The mountains extend for hundreds of miles as uniform ridges, at first (beginning from the S.) 2000 ft. or 3000 ft. in height, then from 3° S. to the equator, attaining a general height of 5000 ft. Further N. they retire from the shore, and sink apparently into mere hills. Some elevated and conspicuous peaks indeed rise at wide intervals above the monotonous ridges, yet in the whole length of 1000 m. there are hardly 20 summits exceeding 8000 ft. The chief of these are as follows:—

| Tempo... | Lat. | Feet. |
|-----------------------|---------|--------|
| Indrapura... | 2 58 S. | 10,450 |
| Talang... | 1 54 S. | 10,350 |
| Murap... | 0 54 S. | 9,700 |
| Rengas... | 0 35 S. | 10,150 |
| Belit (Gasing-Pemban) | 0 11 N. | 9,450 |
| Loom... | 2 48 N. | 11,150 |
| Along-Along... | 4 17 N. | 10,850 |

The first four of these are volcanoes, the others being in all, except Talang, at some distance below the summit. The other known volcanoes in the island have generally an elevation of 6000 ft. or 7000 ft., and do not exceed 15 in number. Sumatra is therefore, in respect to subterranean fires, far more quiescent than Java, which though much smaller, has above 50 active volcanoes. The same may be said of the island, rising abruptly at no great distances from the shore, are grand and conspicuous objects at sea, and hence the estimates hereof made of their height have been greatly exaggerated. The predominant rock is trachyte. With this are found granite, slates, porphyry, red sandstone and limestone, in many varieties. Basalt occurs along the coast, and at some points colossal basaltic columns form convenient land marks. Gold is collected in all the streams that wash the granitic hills,

chiefly at the sources of the rivers Jambu and Indragiri. The amount of gold annually exported has been estimated at 80,000 lb. The steel of Meeanagaba is deemed excellent. Copper and tin are exported to China chiefly. To these valuable minerals may be added petroleum, sulphur and nappal, a steatitic rock resembling soap, and used as a material for carvings.

Valleys.—The mountains of Sumatra extending S E to N W in several parallel ridges, necessarily involve longitudinal valleys extending in the same direction. The lateral valleys, descending to the coast on the W, are so short and steep that they hold out no temptation to the native husband man. The longitudinal valleys, on the other hand, often 10 m. wide, and in one instance at least 100 m. long have a moderate fall, allowing irrigation and the cultivation of rice and consequently they are the chief seats of the local population, and of the characteristic civilization of the island. The valley alluded to extends from the cone of Merapi, lat. $0^{\circ} 34'$ N. to that of Indera Raja, lat. $1^{\circ} 25'$ N., and is by some regarded as the cradle of the Malayan race. But these valleys of the interior remain as yet but imperfectly known to Europeans.

Lakes and Rivers.—The rivers on the W coast of Sumatra are very numerous, but are, with few exceptions, little more than mountain torrents. On the E side are several large rivers, winding slightly through level plains, and forming extensive deltas at the mouth. But in the upper part of their course they are unknown to Europeans. The chief of these rivers are the Kawas, or river of I. Sumbang, which falls into the Strait of Banca, and is navigable for a distance of 800 m., the Jambu, the sources of which are near Talang and Indrapura and the Indragiri, which springs from the feet of Merapi and Singalang. Of the lakes included in the high land valleys, the best known are the lakes Singkarn and Dano (the latter name signifies lake) the former lying S E the latter N W of Merapi and Singalang. Singkarn about 12 m. long and 4 m. wide, lies at an absolute elevation of 1035 ft. Dano, at a height of 1500 ft. is much smaller. Lake Ek Dano, at the source of the river Singkil (lat. $2^{\circ} 30'$ N.) is said to have an elevation of 4000 ft.

Climate.—Lying directly under the equator, Sumatra enjoys great equability of temperature, but as it stretches across the direction of the monsoons, its mountain-ranges arrest all the vapours, and consequently rain falls almost in common, at least in the S. half of the island. The N. half owing perhaps to the vicinity of the Malayan peninsula is less characterized by humidity. The Battaks and tribes farther S. sow fresh land with rice at all seasons of the year, but for previously cultivated grounds there is in every district a sowing season, adapted to the local climate, and chosen so that the ripening of the rice may take place in the driest months of the year. It is said that the thermometer rarely rises above 93° , and it seldom falls below 78° . Among the Battaks and on the highlands of Padang and Palembang the longevity of the natives seems to attest the salubrity of the climate; but in the settlements on the coast, surrounded by marshes, alluvial flats, and mangrove-thickets, the Dutch find the climate deadly.

Plants.—The swampy deposit on the coasts is covered by mangrove (*Rhizophora*), the roots of which give countenance to the growing sea-marsh, and promote its transition to the state of dry land. In places exposed to the waves, the casuarina precedes the mangrove. Above, and protected by these plants of gloomy aspect, flourish carnivals, crotonas, calophyllum, lubious, and many other species, the superb flowers of which form a rich garden close to the sea-side. A little farther in we come to the plains, here the traveller is shocked by the creeping species, rotting pleocorms, &c. which entwining their branches along the ground, and often armed with thorns, form impenetrable thickets. The caraya, araca, and nibon palms, the latter with sharp spikes, grow erect. On the steeper shores, the myrtle (here a large tree) and the fig in several varieties, spread in families the rotang and gommil-palm flourishing beneath the shade of the larger trees. Above the figs and myrtles, or from 500 ft. to 6000 ft., oaks of several species form the greater part of the forest. But though a great tree, and valuable for its timber, the oak is here decidedly inferior to the *Acrypholus*, which produces the precious camphor. This tree prevails N. of Aytahang,

$0^{\circ} 20'$ N. of the equator. S. of that point its place is taken by the gum-yielding *Apocynaceae*, which is truly the pride of the Indian forests, attaining in height and circumference an incredible magnitude. The bare enumeration of only the more remarkable species in these forests would exceed our limits; but we cannot help observing that the colossal trees of hundreds of forms, are themselves covered by creeping plants still more luxuriant and vivacious, and that the largest flower known, the *Battifera*, which measures a yard in diameter, and has a calyx capable of holding six quarts, is a parasitic fructification of trees of rough bark in these forests. When Sumatra was first visited by Europeans, pepper was its only cultivated produce. This culture was afterwards superseded by that of cotton. But at the present day the tree-cotton exported is of little value and pepper is again the chief production. Besides this, Sumatra exports camphor, which differs from the Japanese; balsam, castor or common oleum rotang (ratana) ebony, teak, sandal wood, and aloes. To these articles of export may be added gambier, edible birds nests, wax, rice and ivory. The Battaks, and other indigenous tribes of the highlands, cultivate for their own consumption besides rice, maize (which is enormously productive), batatas and talas (*Colocasia esculenta*), another edible tuber. *Capsicum* ginger, betel, tobacco, and indigo are reared in their gardens. Their fruit-trees are relatively few particularly on the S.W. side of the island, yet they have the banana, papaw mango durian and a citron of agreeable flavour.

Animals.—It might be naturally supposed from the proximity of Sumatra to the Malayan peninsula and to Java, that it would have a fauna in common with those countries. But experience refutes this expectation, and shows that Sumatra in regard to its zoology resembles Borneo more closely than the countries with which it is almost in contact. The elephant and the tapir, frequent in Sumatra, are unknown in Java. The former island has the two-horned the latter a single-horned rhinoceros. In the forests of Sumatra are two species of deer (*Cervus* rusa and *C. hypoleucos*), larger than the European red-deer and the latter of which is peculiar to the island. The orang-outang (*Symia alkyon*) inhabits in Sumatra, as in Borneo, the low alluvial tracts and thickly-wooded deltas, and is wanting in Java, where alluvial plains have little extension. Of the genera *Hylodactylus* and *Somaphyscus*, Sumatra has several species peculiar to itself. The *Cynopus* *Baffles*, a singular insectivorous animal resembling the didelphid of America, is met with only in Borneo and Sumatra. Besides the royal tiger, the natives describe a large carnivorous animal inhabiting the wild forests and which is said to have a mane; they also speak of a wild dog of great size, of a deep red color and with a tufted tail. The only antelope known in the Indian Archipelago is the bawing-stag, or wild buck of Sumatra. In this island the domesticated zebu or humped cow, retains its original characteristics in the greatest purity and the breeds of kine are collectively smaller than in Java. The two neighbouring islands differ much even in their birds and when they have a species in common, the Sumatran individuals are almost always distinguishable by the superior brilliancy of their plumage. In the classes of reptiles, fishes and even of insects, many species are found in Sumatra which are unknown in Java. On the other hand, one species of crocodile (*C. bitorquatus*), is common to these islands while the great rivers of Borneo nourish several distinct species. Of the domesticated animals in Sumatra, the most important by far are the pigs by the number of these, is generally estimated the wealth of each community. Next to these, hank cows and horses which are, however very few in relation to the extent of the island. The buffalo is more frequent in the low country but is only valued as food, and never yoked for labour as in Java. The horse of the highlands (chiefly Tobak in the Dutch country), is small but vigorous, and capable of enduring much fatigue, it resembles closely the horse of Borneo. The goat is not very common the sheep and ass are unknown. The dog, though a great favourite with the Battaks and other hill-tribes is often killed for food. The common fowl is as plentiful here as in the rest of the Indian Archipelago, and cock-fighting is the darling amusement of the people.

Diablos.—The political divisions of the island are but imperfectly known. The sultanate named on the coast here often holds power. The confederations of villages, which are characteristic of the interior form in general very much

trouble state, and there is reason to suspect that the Dutch established on, and affecting the sovereignty of the island, purposely overlook and connive as much as possible to obviate every claim to independence. The authority of the Dutch now extends nominally at least, over the greater part of the island. Their territory is divided, for purposes of administration, as follows:—

Dutch Possessions.—1 The government of the W coast, the head of which, with the title of civil and military governor of Sumatra resides at Padang lat. 0° 56' S. This government includes the following four provinces, namely:—

a. The country of the Battaks or Batakhs, which extends on the W coast from Tapanuli to Singkil lat. 1° 30' to 2° 30' N., and spreading out into a broad table-land in the interior, reaches the eastern coast at Biala. The islands Nias, Poutyan, Monakari, the Beta group, and some others, are annexed to this division the immediate control of which is left to a commissioner, residing in Tapanuli.

b. Ayerbangis extends along the W coast, from the Bay of Tapanuli S. to the river Maung and embraces the populous districts round Ophir with those of Pasaman Angkots, &c. It is under the care of a resident, stationed in Ayerbangis.

c. The hill-districts, Agam, Alibon, Fruman, the Kotas &c. in the interior of Padang are administered by a resident, stationed in the fort of Van-der-Capellen.

d. Bangkhatu (Bemeculen) S. of the preceding embraces the districts of Lidempora, Moco-Moco, Solmas, &c. The resident occupies Fort Marlborough close to Bemeculen.

2 The country of the Lampung comprising the S districts of the island on the Strait of Sunda and extending N to the Strait of Benke, is under the supervision of a resident, civil and military whose usual seat is Tarabang. This wild country of marsh and forest is thinly peopled, and to a great extent unsuitable.

3 Palembang with a resident in the town of that name, includes the ancient kingdom of Palembang, together with that of Jambi adjoining the former on the N., and the chiefs of which submitted to the Dutch in 1833. This province, or residence, as the Dutch call it, owes its importance to the great navigable rivers it winds through it, and terminates at Cape Tondak Labe, lat. 0° 55' S. which is consequently the N limit of the continuous dominion of the Dutch on the E coast. But they claim also some portions of the coast about 550 m. farther S W., in the Batak country in all these possessions they have the active administration to the native chiefs, in conformity with ancient customs, but exercise a controlling influence in council. The territorial revenues are unequal to the expenses.

Naboo State.—Of the independent states of Sumatra, the most important, perhaps, is Achene the capital of which, of the same name, is situated at the N W angle of the island. The kingdom of Siak on the E coast, lat. 1° N in the vicinity of Singapore, still retains its independence. In the interior of the island at the F foot of the mountains, and between the provinces of Padang and Palembang, are several small states, not yet reached by the pretensions of the Dutch. A portion of the Batak country Korracl and Luman, the Bajan, Pasaman, and Kulu tribes all maintain their independence.

N of the Battaks there is little known of the interior.

Indolents.—Sumatra is possessed, at the present day, by a very mixed population. Even those tribes of the central highlands, who are frequently pointed out as types of a pure race, exhibit such diversity of physical character as can be explained only by supposing some mixture of breeds at a remote period. The Malays round the coast are not all of the indigenous stock, but are collected from every quarter of the archipelago. Hindians appear to have settled at an early age on the N coast of the island, and hence the people of Achene are taller and more vigorous than Malays in general, though they retain the fierce looks and repulsive features of this race. The Arabs in the island, though few in number have always formed an important class. Chinese are numerous, particularly on the E coast. In Palembang, the sultans, desiring the establishment of colonies, would not allow them to live on shore. They built their houses, therefore, on rafts, moored in the river, close to the banks, and these floating houses were found to have so many advantages, that the Chinese now prefer them, though at liberty to live on land. N W of Palembang, the Orang-Kabu (Kabu people) live in a savage state,

and show any intercourse with the Malayan tribes around them. They are taller and stronger than the other native tribes, go nearly naked, and have no weapons but the spear. The Orang-Kabu must not be confounded with the people of Menangkabou, a kingdom which formerly flourished on the highlands of Padang, and which some are disposed to consider as the source and nursery of the Malayan race. It certainly is remarkable that, while everywhere else in the Indian Archipelago the Malays occupy the coasts, the aboriginal inhabitants being driven into the interior, a nation of apparently pure Malays should be here found cultivating the hills, unacquainted with the sea, and with institutions bearing marks of great antiquity. It appears also that on the adjacent mainland the Malays in general are called Menangkabou, whereas the name Malayu, meaning wanderers, evidently dates from an emigration and not from the origin of the nation.

The Battaks.—N of the ancient Menangkabou, where the highland attains its greatest breadth and greatest elevation, are the Battaks or Batakhs, a very peculiar and interesting race, whose origin however and relation to their Malayan neighbours, are, in the absence of history and tradition wholly inexplicable. The Battaks, like the Malays, fall short of the European stature rarely exceeding 5 ft. in height, but they differ from the Malays in every handsome proportion except muscular limbs. The disagreeable features of the Malay are always modified often nearly effaced in the Batak. He has an ampler forehead, better formed eyes, finer lips, his cheek bones are less prominent, and his face more oval. Altogether he differs from the Malay by approaching decidedly what is called the Caucasian type. His complexion is sometimes fair and his hair brown or Auburn. Yet there is much diversity as to physical exterior among the Battaks, who seem to hold an intermediate position, not fixed precisely between the Caucasian and Mongolian types. It is said, however, that the former of these decidedly predominates in the female half of the nation, the women having almost always oval faces and regular features.

Manners.—The Battaks may be considered as fairly representing in most respects the indigenous population of the island. Their ordinary dress is simple, and consists merely of a banyan or head-cloth, worn as a turban, and a serow or loose trousers, reaching down to the knee. The upper part of the body the neck, and arms, are usually uncovered in both sexes but in cold weather or for ornament, they wear a jacket or coat about two yards long, over the shoulders. A handsome *jilbab* with a fringe of beads is the distinction of a rajah. Their cloth is home-made cotton very coarse but strong and good-looking dyed blue or red with indigo or the *Morinda citrifolia*. None but the poorest mountaineers clothe themselves with the bark of trees. Young girls wear rings of wire round the neck, wrist, and ankles. The rajahs alone wear armlets of ivory or of a large shell (*Tridacna gigas*). They never tattoo themselves, nor do they like the Malays, stain their teeth black. The lower part of the Batak's house conforms to the prevalent architectural system of the Indian Archipelago. The edifice is raised on four posts or pillars from 4 ft. to 6 ft. above the ground. The dwellings of the poorer class are made wholly of bamboo, they are large bachelors, in short, thatched with the broad-leaved grass called *alang* but the better kind of houses are framed of good timber, and over the wattled sides are laid plates of bark 10 ft. long and 3 ft. wide, peeled from large trees, and then pressed flat with heavy weights as they dry. The structure thus framed is a quadrangle, about 12 ft. wide and 34 ft. long. The *fashion of the roof* now placed upon it is peculiar to the Battaks. The frames which are joined to form it resemble a life-buoy in outline, curving upwards at the extremities, so that the roof formed as it hollow in the middle, while its extremities, pointing up, project considerably beyond the house. Where the wall of the house is 6 ft. high, the peak of the roof is often 12 ft. higher. In good houses a partial ceiling forms a second story, which is used as a store-room, and under the projecting peak of the roof, the gables being both open, is a balcony, sufficiently elevated, yet commanding a view of the village, and reserved by Batak hospitality for the use of casual visitors and strangers. The house is entered by a ladder, through a door little more than 8 ft. high, in the narrow end, and has no windows. The houses of rajahs are often 40 ft. long, and wall put together, with frames of strong

timber, and floors and sides of smooth planking. They are raised 10 ft. or 15 ft. above the ground, so that cows and horses may be stabled underneath and are entered, not at the end, but through a trap-door in the floor. In every village there is a well built house raised on six elaborately carved posts, and which seems to serve at once as a temple and a townhall. In the forest-districts it is not unusual to see houses built in the trees sometimes several in one grove tree; the main stem of the tree being cut away and the horizontal arms remaining.

Industry.—The poor Malays of Palembang build excellent and very beautiful boats; the Battaks construct very solid houses for their chiefs. The agriculture of these people is very slowly nature has been bountiful to them, and they require but little. A rude spade and hoe are their only implements. Yet on the highlands of the Battaks are to be seen canals of irrigation, 10 ft. wide, and 4 m. or 6 m. long, carried along embankments, and surpassing in design and execution anything of the same kind existing in Java. The labours of the field fall chiefly on the women, and in Toba, indeed it is customary for the women to stay at home nursing the children, while the women toil in the rice-fields. Unmarried girls, however are exempt from field-work, except at the time of the rice-harvest, when none are spared, young or old who are capable of assisting. In this oppressing the weaker sex with an undue share of labour, the Battak men are guided solely by the wisdom of their ancestors or, as it may be called, perhaps with equal justice, traditional barbarity. When their feelings are appealed to their treatment of their partners is always generous and kindly. Polygamy is not forbidden by any law, and yet it is unusual, as a price of, or perhaps we might say, the settlement on a wife being so high that few can afford to have more than one. The rajahs alone have sometimes six or eight wives.

Government.—Among the Battaks, and indeed all the indigenous tribes of Sumatra, the characteristic political tendency is one that could have originated only in the recesses of the mountains, every village affects independence. But to obviate the incessant petty wars to which this state of things might be expected to give rise, the villages often confederate, the local chiefs, or *rajas*, as a council for the regulation of affairs. Thus at Padang we hear of the sixteen *kotaks* (villages), the ten *kotaks*, &c. But confederation never changes the temper of the people, and the Sumatran is always refractory against any authority save that of his village chief.

Religion.—There is no trace of any system of religious opinions among the native tribes of Sumatra. They have no temples, no priests, and perhaps no idea of Divine beneficence. Their Begg seems to be an evil spirit, and demons are supposed to haunt the high mountains. On the coast, Buddhism appears to have been introduced at an early age, but it has been since completely superseded by Mahometanism which among the Malays, however is everywhere of a very relaxed character. The Arabian doctrine of Islam, though seductive and ordinarily successful among half civilised men, found, in the terror of this island an insurmountable obstacle to the popular economy for the Sumatran prides himself on his droves of swine. His pig wallow beneath his house, the open bamboo floor of which allows him to enjoy in some degree the pleasure of their company. He sometimes shares with them his hut, always their dirty habits. He feeds on them his ancestors always did so. How therefore could he desert his pig, to follow a porcupine-like prophet?

Law and Learning.—The Battaks have had the art of writing from a date beyond the reach of their traditions. Their characters are peculiar and also their mode of writing, for they begin at the bottom of the page, at the left-hand side, and place letter above letter in a vertical column till they reach the top, when they return to the bottom, at the right, to begin a second line. Their ancient books are written in a brilliant ink, on paper made of the bark of trees. At the present day, ink has fallen into disuse or been forgotten, and modern Battak writing is enriched with an iron style, on slips of flattened bamboo. Their books, of which in truth there is little known, are said to have no value. Their laws or *Hadat* are not written, but are essentially oral records of custom, and to write them would tend to subvert a custom essentially connected with them, namely that of wrangling about their meaning. The *Hadat*, however, form an ample

and equitable code, and altogether the Battaks manifest, in nobility of mind, generosity of disposition, steadfastness, and love of truth, a great superiority over the Malayan nations who surround them, and with all their rudeness, they are patterns of incorrupt probity in comparison with the Javanese, the most civilized of those nations.

Cannibalism.—The same ill-informed traveller who has depicted in these bright colours the character of the Battaks, also confirms the rumour often doubted, that they are cannibals and according to his statements, their cannibalism is perpetuated under circumstances particularly shocking. The laws of the Battaks allow the penalty of death to be commuted in most cases for pecuniary fines. But there are exceptions: thus, in case of adultery, if the injured party be a rajah or chief and the offender a common man, the latter must be eaten. Sometimes also, taken with arms in their hands, outside of a village, become the food of the villagers. If an enemy be taken within the village, his life depends on the generosity of the captor. When a man is to be eaten, the whole population of or connected with the village assemble to take part in the feast of justice. The wretch is tied to a stake, and numerous fires are kindled around the village chief then stepping forward recites the case and makes a speech—for the Battaks make speeches on all occasions—and that done, he stabs the man when the bystanders immediately rush forward the complaisant or injured party being allowed precedences, cut their victim in pieces, throw the flesh into the fire for a few minutes and then devour it. But frequently the sufferer is not previously despatched but the prosecutor rushing at him cuts off his cheek, or the flesh from the inner part of the arm. The rest follow his example with alacrity while the miserable victim lives long enough to see half the flesh stripped from his body and devoured before his eyes. This atrocity is rendered still more dreadful by the fact, that the Battaks, who are not aware of the disgust with which Europeans regard such proceedings, ingeniously conceive their killing for human flesh. It appears that their criminal laws are constantly strained for the sake of making sacrifices, that cannibalism claims no great antiquity among them but was first introduced in the 17th century that some thoughtful eyes have proposed the abolition of the custom but their wisdom and moral feeling have not as yet been able to prevail against brute appetite, and in 1840 two St. Catholic missionaries were killed and eaten by the Battaks. Backed by the authority of the Dutch, the chiefs will probably soon achieve this important reform.

Population.—The population of Sumatra has been often estimated at 7,000,000, but it is not likely that it exceeds 4,600,000 thus distributed—

| | |
|--------------------------------|-----------|
| Acheen down to Nak. | 800,000 |
| Battaks | 1,00,000 |
| Malays of Padang and Palembang | 2,00,000 |
| Bajangs and Patahans | 250,000 |
| Langpangs | 160,000 |
| | 4,100,000 |

History.—Sumatra was first visited by the Portuguese in 1506, but it was not till 1600 when the Dutch established a factory at Pulo-Chingko, on the W. coast, that Europeans obtained a firm footing on the island. In 1666 the Dutch Company took possession of Padang, and soon after enlarged its territories, by treaty with the Sultan of Acheen. Since that time they have gone on continually consolidating and increasing their dominion much more by negotiation and the management of parties than by force of arms. In 1824 Ben coolen was ceded to Holland by Great Britain, in exchange for Malacca. In 1835, however the Dutch found it necessary to make a vigorous armed effort to support their native allies, the Battaks in particular from the Padris, a fanatical horde who threatened to overrun the island. The originators of this religious war were Malay Hajis, who had probably imbibed during their pilgrimages to Mecca the extreme doctrines of the Wahabites, and returned to their own country filled with schemes of conversion and conquest. But these pious fire-brands shared the usual fate of impostors; their preaching was out of place and season, their doctrines struck at the vital of society. They condemned opium, forbade the chewing of areca, they burnt the idolatrous and venerated books of the Battaks and worse than all, in a most relentless manner they killed their pigs. Both Malays and Battaks resisted

them monsters to the utmost. The Dutch, therefore, easily carried the scale, and the Padris, though fierce and resolute, were at length completely routed and dispersed. The country of the Battins, previously closed against strangers, was, after this victory, opened to the Dutch.

Along the shores of Sumatra are numerous islands, or groups of islands, generally represented as connected with the main land, so much connection exists between the great and the adjacent small islands, which are naturally and historically quite distinct. These islands are, along the W coast (at a general distance of 70 m.) the groups of Nias, Bata, Nihoro, Pura, and Pugeh. On the E., in the Strait of Malacca, are Padang, Pajura, and other islands opposite the mouths of the rivers Siat and Kampar. Farther S. is the group of Rhaw or Lapias, near Singapore, and after these Banks and Billiton.—(Marsden, *Hist. of Sumatra*, *Batavia, Memoirs of S. Miller, Rijksgeset tot de kennis van Sumatra*, Leyden 1846. Fr. Jansz, *De Battakische eilanden van Sumatra*, Berlin, 1847. *Verhandlung von de Naturgeschichte geschiedenis*, Dr., Leyden, 1839-49; *Tydschrift voor Nederlandsche Indische, Crawford's Indian Archipelago*.)

SUMBAWA, or **SUMATRA** an Indian Archipelago, bounded N by the Java Sea S. the Indian Ocean W the Strait of Allans, separating it from the island of Lombok and E. the Strait of Sappi separating it from the islands of Comodo and Flores lat. (S.W. point) 9° 2' S lon. 118° 42' E. (E. l.) is about 160 m. long E. to W. by 81 m. extremely breadth and of irregular form, being deeply indented by arms of the sea along the coasts are a number of small islands. It is divided into six native states ruled over by rajahs, Tomboro and Sumbawa on the N coast, whose inhabitants are the bravest in the island Bima on the E. where the Dutch have a resident Lompo, Sengar and Pape hat all of them acknowledge subjection to the Dutch. The soil is exceedingly volcanic in some places fertile, and watered by several rivers. Pepper-wood and rice are the chief products beyond the usual tropical fruits. These and swine are plentiful but cattle, goats, and fowls are not abundant. There are two breeds of horses that of Tomboro and that of Bima the latter, the finest in the Indian Archipelago, is exported here bred and exported. Fish are plentiful and edible birds nests are procured on the coasts. Gold is obtained in Sumbawa and Lompo sulphur and saltpetre in Bima and pearls on the coast of Papak. Sumbawa is mountainous, and its heights have such a remarkable appearance, that once seen they are never forgotten, a fact which renders them an excellent landmark for ships passing to and from China. Near the W coast is the noted volcano of Tomboro or Tomboro, 8940 ft. high, of which a dreadful eruption took place in April 1815, the noise of which was heard in Celebes the Moluccas, and Sumatra or over an area with a radius of above 840 m. from the volcano so close at hand did the explosion appear to be in Java, that many thought there was an eruption of one of the largest volcanoes in that island. The ashes thrown up darkened the air, and on the neighbouring island of Lombok many people were buried under them and many died from the famine caused by the destruction of the vegetation they fell on the E. end of Java, about 340 m. off, to a depth of several inches and they reached over to Sumatra, 840 m. off. In the island of Sumbawa itself the devastation was fearful in the district of Tomboro alone 12,000 people were destroyed; the sea also rose and swept away men and houses, and fifteen years afterwards the vegetation had not recovered from the effects of this dire disaster. Another eruption occurred in November and December 1836, but much less destructive in its effects.

SUMBELPOOR, a m. and fort, Hindoostan cap dist. of same name, 1 bank Mahanuddy 167 m. W N W Cuttack lat 21° 8' N lon. 85° 57' E. The town extends N and S. about 3 m., and contains numerous temples. Pop. 20,000. The fort stretches about 1/2 m. along the banks of the river but is incapable of making any protracted defence against artillery.

SUMBUL, Sumbul, or **SUMSULUR**, a vil. Cashmere, 1 bank Jialum here crossed by a large bridge lat. 34° 11' N lon. 74° 30' E. It is surrounded by a lofty grove of trees, by which it becomes distinguishable at a great distance.

SUMYGH, **SUMYUGH** or **SUMYOT**, a co. Hungary, bounded N by the Balaton or Plattensee and E. by Vamper, E. Tolna and Iszara, S. Schwanau, and W. Croats and au.

Shled. Area, 1838 sq. ac. m. It is traversed by a low chain of hills, which gives rise to several small streams, either flowing N.E. towards the Balaton or S. to the Drava, which bounds the county on the S. and S.W. Along the lake, about one-half of which belongs to the county the surface is low, and everywhere covered with marshes. In other directions it is generally fertile, and in addition to good crops of corn, produces excellent wine, and fruitful pastures, on which numerous herds of fine cattle are reared. Tobacco and fruit also are extensively raised and there are several extensive forests, abounding in game, and containing excellent timber. Manufactures have made little progress. A majority of the inhabitants are Magyars. Kaposvar is the capital. Pop. 320,400.

SUMEGH **SINCE**, or **SACUNCO** a m. Hungary co. Szekes, on a height, 10 m. N W Tapocsa with a abbey, Franciscan monastery a castle, and trades in wine, wood, and wax. T. 1822 **SUMENE** [anc. *Sotusene*] a m. France dep. Gard, 6 m. E. Vigan with manufactures of cotton locality, and cotton-mills. Pop. 1877.

SUMIDOURU [Ahyas], a river Brazil rises near Diamantino, prov. Mato-Grosso flows N., and joins bank Arno, about 110 m. below the confluence of the Preto. It plunges at its source into a deep pool, purifies its course under ground, and afterwards reappears.

SUMJAKKEZ a vil. Hungary Hither Thesus co. and 25 m. N W Gomiz was a church, and an excellent spring, an iron-mine, and a trade in deer. Pop. 1945.

SUMMER ISLES, a group of islands located off W coast of an isolated part of co. Cromarty at the N W entrance of Loch Broom. They are well situated for fishing-stations, but are remarkably bleak and barren. The largest of them, called Tanars-More, is about 2 m. broad, 1 m. long and 400 ft. high. It has a small pier.

SUMISWALD a vil. and par. Switzerland (an) and 15 m. E N E. Bern with a handsome church, an old castle now converted into a porcelain and manufactures of ironware, lace, earthenware, and wind-mills. Pop. 5497 **SUMNE** a m. Russia. See *Sutun*.

SUNA a vil. and com. Italy Piedmont dir. Novara prov. and about 1 m. N W Pallanza, E. shore, Lake Maggiore with an ancient church and a dilapidated castle. Pop. 1213

SUNBURY, par. Eng. Middlesex. 2400 m. E. Pop. 2078

SUNDA ISLANDS, a group of islands Indian Archipelago composed of the Great Sunda Islands, namely Sumatra, Borneo, Celebes, Java, Banka and Billiton and of the Lesser Sunda Islands namely Bali, Lombok, Sumbawa, Flores, Timor, or Sumba, Sabra, Solor, Lomblen, Ombai, and the Timor group.

SUNDA STRAIT the channel which separates Sumatra from Java. It is about 100 m. long by 12 m. broad at its narrowest part, and interrupted with several islands. It leads from the Indian to the Pacific Ocean, and is much frequented by ships to and from China, Manila, and Batavia.

SUNDAL, a river Norway bail Sunddal, issues from a lake at the foot of Sneekheim flows E. then N then W, and falls into the Tyngvold fjord, total course, about 70 m.

SUNDAY or **RACON**, an isl., S. France lat. (N W point) 22° 12' S lon. 138° 18' W (E. l.) It is of a triangular form, and not more than 12 m. in circuit, high, rugged, very steep, and covered with wood, and without anchorage. It is said to be inhabited by a few white men.

SUNDEEP an isl. Hindoostan Bay of Bengal, at the mouth of the Megna E. of (Chittagong) length, about 16 m. average breadth, 6 m. entirely of alluvial formation. About the beginning of the 17th century it was taken possession of by Portuguese adventurers, who had been expelled from Aracan and who made it a famous nest of pirates. Selecho Sebastian Gonsalves as their chief, they converted it into an independent principality and are said to have had a force of 1000 Portuguese, and 3000 native infantry, 300 cavalry and 80 armed vessels of different sizes. The tyranny of Sebastian having disgusted his own countrymen and led to the desertion of the greater part of the natives, Sundeeep fell into the hands of the Mughals, who erected stockaded fortifications upon it, and long infested the lower districts of Bengal, carrying off in its inhabitants into slavery. They were finally subdued in 1686, by Shante-Khan, the Mogul governor of Bengal.

SUNDESBUNDS, a dreary woody region, Hindoostan, forming the delta of the Ganges (old) and

SUNDERLAND, a market tn. seaport, town and port England, co. and 12 m. N. E. Durham at the mouth of the Wear, here crossed by an iron bridge with a single arch 236 ft wide and nearly 100 ft above low-water and on a branch of the York, Newcastle, and Berwick railway. Bishop Wearmouth, immediately adjoining Sunderland, and Monk Wearmouth, on the opposite or S. bank, are considered as one town with it, forming part of its parliamentary borough. Sunderland proper consists of a spacious and well-paved main street, lined with generally handsome houses, and a number of minor streets of more indifferent appearance, being for the most part narrow crooked lanes. Bishop Wearmouth which has rapidly increased within recent years consists chiefly of substantial modern houses, occupied by the wealthier classes. Monk Wearmouth consists of an upper and a lower town: the former chiefly a long and spacious street with several recently formed streets crossing it at right angles, and connecting it with the lower town, which extends along the shore, and till lately when some streets of handsome houses were built, had an appearance by no means prepossessing. The principal buildings and other objects of interest are the parish churches of Sunderland, Bishop Wearmouth, and Monk Wearmouth, the first, a brick edifice with a square tower; the second, a handsome freestone structure, with an embattled tower and the last, originally attached to a monastery, and surrounded by a Norman tower, rising on four massive circular arches several district churches, and Episcopal, Presbyterian Independent, Quaker Primitive and Wesleyan Methodist, Unitarian, and R. Catholic chapels a handsome exchange, a lyceum hall an Athenaeum with museum and library national, British and other schools, a custom-house, an excise-office, a theatre, assembly-rooms, public baths, a general and an eye infirmary dispensary and various almshouses and charitable institutions. The principal manufactures are glass in all its various forms, chain-cables and ironwork, blocks, cordage, sailcloth, rope and brass castings, earthenware bricks and tiles, hats, leather, chemical products, &c. There are also various paper, saw, and flour mills, breweries and about 30 building yards, some of which are very extensive. In 1850 the number of vessels built at Sunderland was 108 (51,374 tons) and in 1853, 163 (68,738 tons). The harbour formed at its entrance by two admirably-constructed piers admits vessels drawing from 16 ft to 20 ft in very spacious, and is provided with four dry and four floating docks. The trade, which is very extensive, consists chiefly of exports of coal, lime, granulations obtained from quarries in the vicinity glass and various other articles of manufacture and of imports of timber, iron flax tallow from the Baltic, butter, cheese, and flax from Holland, and wine spirits, sugar grain and various other articles, from different quarters. In 1851 the number of vessels belonging to the port was 1025 (115,885 tons) the number of vessels entered was 2747 (1,206,804 tons), and cleared, 12,594 (1,259,083 tons). The fishery of Sunderland is important. The borough is governed by a mayor, 12 aldermen and 42 councillors and sends two members to Parliament. P. 67,394. Area of pier 178 sq Pop. 19,058

SUNDERLAND (Norman) a small seaport and township England co. Northumberland, on the German Ocean 8 m E. by S. Bedford with a parish church, a Presbyterian chapel luncheon and a haven, from which corn, fish, and lime are exported. Pop. 1808.

SUNDRIDGE, a vil and par England, co. Kent, on the Darent, 4 m. W. by N. Berenotons with a church and many features of paper. Sundridge gives the title of Baron to the Duke of Argyll. Area of par, 4041 ac. Pop. 1642

SUNDEVÄLL, a seaport in Sweden 14 m and 27 m S W Helsingborg, on the Gulf of Bothnia. It contains a handsome church with a tower, and has a mineral-spring a building yard, some shipbuilding, a fishery, and a considerable trade in timber, tar pitch, &c. Both the Ingals-Elf and Ljunga fall into the bay here, and form good havens. Pop. about 2000

SUNG-LOO, or *Sung-lo-shan* a mountain, China, prov. Chensi; lat 29° 56' N. and 118° 16' E. It rises about 8000 ft above the plains, and though very barren, is famous as the spot where the green-tea shrub was first discovered, and grew tea first manufactured. The rocks in this district are composed of slate similar to that of the Silurian formation in England, and are overlaid by a red calcareous sandstone.

SUNGADEEP, an isl. Indian Ocean. See *ASUTOLA*

SUNGLE-DOON a state, Malay Peninsula, lat. 8° to 8° 30' N. and lon. 102° to 108° E. towards the source of the right bank of the Sings, and celebrated for its tin-mines. Tin is the chief article of export and is lowered for iron, opium, salt, tobacco cloths, oil and shells for making lime.

SUNGNAM, a town W Tibet, dist. Kuen-sar, on the Buzkalan, a tributary of the Sutlej 9000 ft above sea-level, 90 m N. E. Simla. It occupies a slope at the extremity of a beautiful valley is one of the principal seats of the Buddhist religion in the Sutlej valley and has numerous temples and monasteries, and a large population, engaged in agriculture, manufactures, and trade.

SUNK ISLAND an isl. E. coast, England, co. York, near the mouth of the Humber, from which river it has been gradually reeverted. It was originally 2 m from the shore, but the channel is now so narrow as to be crossed by a bridge. Area, 6000 ac. of which 4000 are arable and 2000 meadow and pasture all in a high state of cultivation.

SUN^N, a town of about 100 houses, r. bank Indus; lat. 26° N. lon. 68° 16' E. Near it is a vast fortress, built by the ancestors of Secnde, but now unoccupied.

SUNNINGHILL, a vil and par England, co. Berks, 8 m W. by N. Chertsey with a church a Wesleyan chapel and a national school. Area of par 3178 ac. 1 cp. 1850

SUPERIOR (LAKES) the most extensive exposure of fresh water in the world and the most westerly and most elevated of the N. American chain of lakes lat. 41° 20' to 49° N. lon. 83° to 93° W. It washes the shores of the state of Minnesota on the W. those of Wisconsin and the N. peninsula of Michigan on the E. and those of British America in all other directions. greatest length measured on a curve through its centre from E. to W. 420 m. greatest breadth 160 m. circuit, about 1750 m. estimated area, 82,000 sq m. height above sea-level 596 ft. depth, varying from 80 to 290 fathoms. It is of very irregular shape, widening out towards its centre, and gradually narrowing, partly towards its E. but much more towards its W. extremity so as to form an irregular crescent, with its convexity on the N. and its concavity on the S. The N. shore is generally bold and elevated, presenting almost continuous ranges of cliffs, which vary in height from 800 ft to 1,500 ft. the S. shore is low and nearly straight except where interrupted by limestone-ridges, the most remarkable of which, situated toward the E. extremity present a perpendicular wall 800 ft. high, broken by numerous caverns and projections and forming, under the name of the *Loudest Rocky*, one of the greatest natural curiosities of the U. States. The central portion of the lake is clear of islands, but there are numerous towards both the S. and the N. sides. In the former direction they are small and being insufficient to give shelter behind them, only increase the difficulties of the navigation, without contributing to form a single good harbour in the latter direction, several of them more especially the *Ile Royal*, are of considerable dimensions, and along with the indentations of the coast, afford good shelter for vessels. The water of the lake is remarkable for its transparency, and derives its supplies from a basin which is estimated at 100,000 sq m. and is drained by more than 200 streams. About 90 of these are of considerable size, but they are almost all impetuous torrents, interrupted by rocks and rapids. The outlet at the S. E., by the St. Mary, the falls of which, descending 224 ft. over a series of rapids about 2 m long completely interrupt the navigation and render a portage necessary. This serious inconvenience is (1854) in course of removal, by the construction of a navigable canal. Within the lake itself the only obstruction to its navigation are the violent gales to which it is subject. It is well supplied with fish, principally trout, white-fish, and sturgeon. The two former are of excellent quality, and have led to the establishment of a great number of fishing-stations. The other principal exports by the lake is copper, of which valuable veins have been discovered, both on its shores and its islands, and yielded in 1851 about 2500 tons of copper. The boundary line between British America and the U. States in passing through Lakes Superior, proceeds from the outlet nearly through its centre, till it approaches *Ile Royal*, when it bends N. so as to give that island entirely to the U. States, and is then carried S. W. to its termination at the mouth of the Pigeon, in lat. 46° N.

SUPHORA, a tn. Bohemia. See GRISSENBERG
SUPINO, a tn. Naples. See SARNO
SUPOI, a river, Russia, rises in S.W. of gov. Omskgor
 enters Volga, and flowing almost due S., joins 1 bank
 Delinger; total course 110 m.

SUR, a seaport, Arabia. See OMAN

SURA, a navigable river Russia, rises in S.W. of gov.
 Simbirsk flows W., forming part of the boundary between
 govs. Saratov and Penza, then generally N.E., traversing
 gov. Simbirsk and part of Kama, and in gov. Rybinsk Novgorod
 joins r. bank Volga after a course of above 400 m. Its prin-
 cipal affluents are the Bureish, Usser, Alatsy, and Piana. It
 abounds with fish, particularly sturgeons, which are considered
 superior to those of the Volga.

SURABAYA, Java. See BOERHARA

SURANY NAGI, a market tn. Hungary, co. and 16 m.
 S.E. E. Nitra, with a church, a synagogue the remains of an
 old castle, and several mills. Pop. 1890

SURAT, a large and populous tn. Hindoostan, prodd and
 160 m. N Bombay cap. of prov. Gujarat, 1 bank Taptak,
 30 m. above its junction with the sea, in the Gulf of Cambay,
 lat. 21. 11 N. lon. 72° 7' E. It has narrow and winding
 streets, is about 6 m. in circumference, and is surrounded by
 a wall in good repair with semicircular bastions. There is
 here an extraordinary institution called the Banayan hospital
 for sick or maimed animals of all kinds. Outside the walls
 are some European houses of good size. There is also a fort,
 occupied by Europeans and European artillery an English
 church and school numerous Hindoo schools, and a cemetery
 its trade has much declined in later times, and at present con-
 sists almost wholly of cotton wool, which is exported in large
 bales to Bombay. Pop. 1890, 100,000

SURE or SARRA, a river formed in the grand duchy of
 Luxembourg flows S.E.E. forming the boundary between
 Luxembourg and Rhénane Prussia, and joins 1 bank Moselle,
 about 4 m. above Treves total course, 50 m. Its upper part
 is used for floating and the lower is navigable for about 40 m.

SURENDAL, a vil. and par. Norway prov. and 60 m.
 S.W. Tromsøen, r. bank Sura, a little above its mouth in
 the deep inland Surendal fiord. Pop. 3700

SURENÈS [anc. Sursum], a tn. France, dep. Seine,
 7 m. S. St. Denis, 1 bank Seine, here crossed by a suspension
 bridge, and on a railway from Paris to Versailles. It has
 manufactures of heavy bricks and tiles, a printfield, and
 dye-works. Pop. 2070

SURGÈRES [Lacu, Surgères], a tn. France, dep. Char-
 ente-Inférieure, near the source of the Gère 20 m. S.E. La
 Rochelle, with an old castle a parish church, and a trade in
 wine, brandy and cattle. Pop. 1861

SURGUT, a tn. Asiatic Russia, gov. and 269 m. N.E.
 Tobolsk, r. bank Obi. It is surrounded by palisades has two
 stone churches, and some trade, particularly in furs and fish
 Pop. 1860

SURIGAO, a seaport in Philippine, N. extremity of
 Mindanao separated from the island of Zamboanga by the Surigao
 Passage, and at the mouth of a river of same name. It has a
 harbor, which is very difficult of entrance and has building-
 yards, at which large and good vessels are constructed and
 a considerable trade, chiefly in gold-dust, wax, coco, rice, and
 a little pepper and wood. Pop. 7096

SURINAM See GUYANA (DUTCH)

SURINAM, a river Dutch Guiana, rises in a mountain-
 range on the S. frontiers, flows N. past Paramaribo, and about
 16 m. below falls into the Atlantic by a broad estuary after
 a course of above 500 m. Its chief affluents are the Comen-
 taryna, Koroany, Tapanary, and Para.

SURREY, a co. England, bounded, N. by the Thames,
 separating it from Middlesex, E. Kent, S. Sussex, W. Hamp-
 shire and N.W. Berkshire, and a small corner of Bucking-
 hamshire. Its E. and W. sides nearly form straight lines,
 at right angles to each other; the other sides are much more
 irregular greatest length E. to W., 37 m. greatest breadth,
 24 m. area, 756 sq. m. or 485,120 ac. The surface is in
 general not elevated but undulating and diversified, present-
 ing much pleasing scenery. Near the centre a range of hills
 stretches completely across the county. This range, called
 the North Downs, slopes down gently on its N., but is rugged,
 precipitous, and often of romantic appearance on its S. side.
 The highest point in the direct line of the range is Botley

Hill, above Tinsay, 880 ft.; but the highest point in the
 county, and indeed in this part of England, occurs about 2 m.
 S. of Basing, in Leith Hill which is 908 ft. Along the
 S. border a tract called the Weald of Surrey unites with the
 Wealds of Kent and Sussex, in forming a flat and very ex-
 tensive plain, occasionally broken by low hills. The N.W.
 is the least inviting part of the county, consisting for the
 most part of heath and moorland waste. This portion of the
 county belongs entirely to the geological formation known by
 the name of the London clay immediately S. and E. of it, a tract
 of nearly equal extent is occupied by the plastic clay which
 is succeeded on the E. by the chalk-formation, of which the
 Downs above described are composed. The S. part of the
 county belongs to the walden formation. The whole of the
 drainage is received by the Thames, except a small portion
 in the S.W. conveyed to the English Channel by the Arun,
 and another small portion in the S.E. received by the Med-
 way. After the Thames, the only streams of importance are
 its tributaries, the Mole—which, entering Surrey on the S.E.,
 winds through a beautiful valley for about 43 m. in a N.W.
 direction, but is nowhere navigable—and the Wey, which
 flows from N.W. to N.E. and not only becomes navigable at
 Godalming, but forms the principal feeder of the Great Ouse,
 in the Grand Surrey and Wessex canals. The only other canal
 is the Surrey Canal, cut from the Thames at Esher-
 lough to Duford and thence to Camberwell, is very short,
 but of considerable importance, containing in particular an
 extensive beam, in connection with the navigation of the
 Thames. The other principal means of communication are
 the South-Eastern, the Brighton and South Coast, and the
 London and South-Western railways, with various connecting
 branches. The soils include all the principal varieties of
 plastic and alluvial clays, rich vegetable loam, calcareous
 earth, and almost barren heath. On the first of these, the
 principal crops are wheat and beans. Much of the alluvium,
 particularly in the vicinity of the metropolis, is occupied by
 orchards and kitchen-gardens, and whole farms are devoted to
 the same locality to the raising of medicinal and aromatic plants,
 as chamomile, wormwood, anise-seed, peppermint, and lavender.
 The loamy soils grow excellent barley, oats, and pulse,
 there, too, root-crops, more especially carrots and parsnips,
 are extensively grown. The calcareous soils are chiefly re-
 markable for their excellent hops, among which those of Farn-
 ham deserve special notice and for their valuable crops of
 clover. The husbandry, though relieved from much of the
 antiquated routine which was permitted too long to maintain
 its ground, is said to be still susceptible of great improvement.
 The quantity of grass-land is not extensive, the domestic
 animals are usually of the ordinary improved breeds. The
 manufactures are not of much importance, consisting chiefly
 of woollen goods and hosiery at Godalming gunpowder at
 Malden delft and stone ware at Mortlake calicoes with large
 bleaching and printing works, in the parishes of Molesey and
 Croydon, oil paper stuff, sheet iron &c., for which there
 are numerous mills, partly on the Mole and partly on the
 Wandle and numerous articles made in Southwark pri-
 marily in connection with the trade of the port of London. Of
 this trade the part of the county immediately bordering the
 Thames has a considerable share. The vicinity of the metro-
 polis, and the many beautiful sites which it affords, have caused
 many parts of Surrey to be studded over with mansions and
 villas. After Southwark, and the other S. suburbs of Lon-
 don, the most important towns are Croydon, Guildford, King-
 ston, Epsom, Bagshot, Farnham, and Godalming. It returns
 two members for the E., and two for the W. division to Par-
 liament. Pop. 683,082

SURSEK, a tn. Switzerland, etc. and 13 m. N.W. La-
 vern, on N. side, Lake of Geneva, and traversed by the Furca.
 It is inclosed by old walls with turreted gates and has a
 handsome church, and the townhouse, though much dilap-
 dated, affords a good specimen of the German Burgundian
 style. Pop. 1646

SURUBI, a vil. and par. Brazil, prov. Rio-de-Janeiro
 about 8 m. W. Mago with a large parish church and a
 chapel, a harbour in the river of same name, 2 m. from the
 Bay of Rio-de-Janeiro, at which there is a considerable ex-
 port of tobacco, rice, sugar, and wood

SURY LE COMTAL, a tn. France, dep. Loire 30 m. S.E.
 Menthon. It is an ancient place; with a castle, still in good

preservation and long the residence of the counts of Forés; and a trade in Hues and grains. Pop. 1894.

SUSA — [*Latin Susa*]. A m. Italy, Piedmont, div. and 87 m. W Turin with which it is connected by a railway, opened May 28, 1864 esp. prov. of same name, in a valley r. bank Dora-Balpuara. It consists of an old and a new town both irregularly built, though the latter has one large and handsome street, and some well-planted squares, in the site of a bishop, and the seat of a court of justice, and several public offices and has an ancient cathedral with some good sculptures and paintings, a townhouse, two handsome modern hospitals, and a Capuchin convent, a diocesan seminary, and a college, and other schools. Pop. 1870 — The *municiplum*, area, 539 sq. m., borders W on France, and on all sides, except the E, it is inclosed by branches of the Cottian Alps, which here present among other lofty summits, Monte Genovra in the S.W., and Monte Cenis and Rochemelon in the N, and is traversed in all directions by alpine valleys, of which the largest are those of Oulx and Susa. The chief river is the Dora-Balpuara. Large numbers of cattle are reared, and considerable attention is paid to the dairy. Some wine, fruit, and silk are produced and the minerals include iron and marble. The manufactures consist chiefly of coarse linen and hempen cloth, and leather. Pop. (1862), 62,078.—2. A seaport Africa. See *Sousa*.

SUSE, or *Susa*, a prov. in S.W. of Morocco. It is mountainous, being intersected by the Atlas range but has fertile valleys, yielding rice, dates, olives, figs, and citrons and in which camels, horses, asses, mules, goats, sheep, and cattle are reared.

SUSQUEHANNA a river, U States, formed by two branches, an E. and a W. which unite at Northumberland, in Pennsylvania. The E. branch, which is considered the main stream, issues from Lake Osego, in New York, and flows very circuitously S.W. to the N. frontiers of Pennsylvania where after receiving the Tioga on the right, it makes two long stretches the one S.E. and the other S.W. Its whole course is about 260 m. The W. branch rises in the W. slope of the Alleghenies, and flows very circuitously S.E. for about 300 m. The united stream flows nearly due S. to the junction of its most important tributary, the Juniata, which joins it on the right, then S.E. passing Harrisburg and Columbia, enters Maryland and after a course of about 150 m. falls into the N. extremity of Chesapeake Bay, at Havre-de-Grace. Though the whole length of the Susquehanna, including that of its larger branch, is 400 m. it is so frequently interrupted by rapids, as to afford much onerous navigation in its natural channel, but the obstructions have been greatly overcome by cutting canals.

SUSSEX a S. maritime co. England, bounded N. by Surrey N.E. Kent, S.E. and S. the English Channel, and W. and N.W. Hants greatest length S to W, 78 m. average breadth, about 25 m. area, 1469 sq. m., or 938,240 ac. The coast-line is not much broken and is generally flat with the exception of some moderate cliffs at Solsey Hill in the S.W. and Hastings in the S.E., and a range of lofty cliffs, which, commencing near Brighton, are continued E. to Beachy Head, whose bold promontory, composed of chalky pebbles, rises to the height of 664 ft. This promontory terminates in the range of hills called the South Downs, which extending W. in an irregular line as far as Woburn, form the most remarkable natural feature in the county and though on an average not more than 500 ft. in height, attain in their culminating point, Ditchelling Beacon, 828 ft. On the N. side the Downs are precipitous, but on the S. and W. slope down to gentle undulations to the lowland on the coast. They are for the most part covered with short close turf, admirably adapted for sheep-pasture. Immediately E. of the crataean formation of the Downs is a belt composed chiefly of chalk, marl, sand, sandstone and sandy limestone, succeeded by another belt of rather large boulders, composed principally of flinty-sand, blue marl, and chalky limestone. All the rest of the county belongs to the Weald originally so called because covered with one dense forest, and still possessing so much of its original character as to be one of the best-wooded districts in England. In the E. Romney Marsh principally in Kent, is continued into Sussex, and forms a low flat, stretching along by Faversham to the vicinity of Beachy Head. Proceeding from the E., the principal streams,

which have all their mouths in the English Channel are the Rother, forming part of the boundary between Sussex and Kent, the Ouse, which forms the boundary of Wiltshire, the Adur which forms that of Shropshire, and the Arun, which, besides uniting with the sea so as to give a navigable communication with the Thames, communicates by the Arundel and Portsmouth canal with Chichester harbour. In the N.E. a small part of the drainage is collected by the Medway, which rises within the county but shortly after quits it. The principal means of communication in addition to those already mentioned, are the London Brighton, and South-Coast railway. The lowland along the coast is remarkable for its fertility, yielding heavy crops of grain and still more valuable crops of hay particularly on the marsh lands, which, after being cut, are pastured and feed off large numbers of heavy cattle. The Downs are chiefly pastoral, and where arable, consist of a thin stony soil, on which barley is the most profitable crop. The Weald, forming the larger part of the whole surface consists generally of sandy or tenebrous clay of a very indifferent description. The E. part of the county borders on the hop districts of Kent, and successfully pursues the same mode of cultivation. Among the mineral products may be mentioned marble which is worked to some extent in the neighbourhood of Petworth and admits of being cut and polished. Ironstone also is abundant, and in early times when wood only was used for smelting, furnished one of the principal sources of the British iron manufacture, though it is now abandoned. The manufactures are insignificant, consisting chiefly of a few woollens at Chichester, bricks and tiles made in various districts both for home consumption and export, chiefly to the West Indies and paper, for which there are mills at Lyding and several other places. (The towns of principal note are Lewes, Chichester, Hastings, Rye, Newhaven, New Shoreham and Brighton. It returns two members for the E. and two for the W. district to Parliament. Pop. 358,544.

SUSTER a, in Holland, prov. Friesland, 18 m. N.F. Maestricht with a townhall a large elegant church, a school and four flour-mills. Pop. (agriculture) 1100.

SUSUI one of the smaller and most E. of the Poysee Islands off S.E. end of Yau-ye-Yau; about 17 m. N. of S. ton 178 68' W. On the N.W. side there is a beautiful bay, secure from all winds, where a valley runs back, thickly covered with bananas coconuts and sugar-cane the last growing in great perfection.

SUTHERLAND a N. B. prov. and 21 m. W.N.W. Calcutta, with little trade, and so seldom visited as to be very imperfectly known. Pop. 4000.

SUTHERLAND a maritime co. in the N. of Scotland, bounded N. by the Pentland Firth W. the Irish S. S. Ross, E. the German Ocean, and N.E. to Caithness. It is in the shape of an irregular square, about 60 m. each way E. to W. and N. to S. and along with the greater part of Ross and the whole of Caithness, forms an extensive peninsula, the isthmus of which may be conceived as stretching across the island between the heads of the Beaulieu Firth and Loch Carron area, 1764 sq. m., or 1,122,860 ac. In addition to the mainland, it includes a number of small adjacent islands on its N. and W. sides. On these sides the coast is remarkable for the loftiness and boldness of its precipices, and its deep indentations by numerous lochs or arms of the sea; in these respects the E. coast presents a striking contrast, being generally flat and continuous, with sandy shores, except in the N.E. where the headland of Ord common to this county and Caithness, juts out majestically into the German Ocean. The interior consists of a succession of lofty and rugged mountains, rising in Ben More Assynt to 2330 ft. and separated from each other sometimes by moorland plateaus, and sometimes by wild romantic valleys, either embosomed extensive lakes, or traversed by mountain-streams. The watershed of the county is formed by a range stretching almost centrally across it from E. to W. and then N. to S. at no great distance from the W. coast. This watershed sends the drainage in three directions, N., W. and E. but the streams, though valuable for their salmon-fishings, are not otherwise deserving of notice. The lakes, which sometimes stretch in chains, are both large and numerous. Among others are Loch Shin in the S., stretching S.E. to N.W. for about 18 m., Loch Nevis near the centre of the county, Loch Epe in the N., and Loch Assynt at a short distance from the W. coast. All

these lakes form long and comparatively narrow expanses, which, when their extremities are not seen, give them the appearance of majestic rivers. The rock most largely developed in the country is granite, which occupies at least three-fifths of the whole surface. Other rocks, which occur chiefly in patches, are granite, mica-slate, and old red sandstone. The last occurs both in the N W towards Cape Wrath, and in the S.E., along the Dornoch Firth. In the last portion it is succeeded by one of the most remarkable geological formations of Scotland, the Brecon coal-field; unfortunately however more interesting to the geologist than valuable for the fuel which it yields. In connection with this coal-field are strata of lime and coals, found in no other part of Scotland except a small patch to the W. of the town of Campbellton, in Kilsyre and in a few patches of the Western Isles. The greater part of the country is fitted only for grazing, but even on the stock farms large quantities of excellent turnips are grown, and eaten by sheep, and in some of the lower valleys, and more especially on the E. coast, not only oats and barley are successfully cultivated, but wheat has been raised of such quality as to command the best price in the London market. Potatoes succeed well on the sterile land of most districts, and form the principal food of the inhabitants. Natural woods of birch, alder and even oak are not uncommon and large plantations of fir, larch and other trees have recently been formed. Growth of all kinds, including deer, is abundant, and on some estates forms an important item in the rental. It sends a member to Parliament. P. 25 793

SUTLEJ *SUTLEJ* or *SUTLEJ* [anc. *Hinduk*] one of the five rivers of the Punjab, of which it forms the E. boundary. It has its sources in Tibet, between the N.E. slopes of the Himalayas and the Kailas Mountains; about lat. 31° 5' N., lon. 81° 6' E. a little to the E. of Lake Rawan-Khud, which it enters, and from the N.W. extremity of which it subsequently issues at an elevation of 19 000 ft. to 20 000 ft. above sea-level. On leaving the lake it flows N.W. to Nako, about 150 m., where it suddenly turns S.W., passes through the Himalaya range, and continuing in S.W. direction, flows along the E. limit of the Punjab to Mithankota, lat. 29° N., lon. 70° 20' E., where it falls into the Indus. Its entire length is about 900 m. At Hurekote, lat. 31° 10' N. lon. 75° E., it is joined by the Beas, and near Choh, lat. 29° 20' N. lon. 71° 15' E., by the Cheshal, the united streams, as already mentioned joining the Indus at Mithankota. The scenery along the upper course of the Sutlej is often at once fearful and sublime. The river itself is there a raging torrent, falling in several places 100 ft. or 150 ft. per mile.

SUTLEJ [anc. *Sutras*] a tn. in Punjab State, Belg. and 14 m. S.S.E. Viterbo, on a long isolated rock of tuff, and surrounded with ravines. It is the see of a bishop, and contains a cathedral and several other churches and convents. An ancient amphitheatre excavated in the tuff and almost in perfect preservation, 250 ft. long and 370 ft. broad. Pontius Pilate is said to have been born here. Pop. 2000

SUTTON, a vil and township England co. York (W. Riding) 5 m. W. N. W. Kettleby, well built of stone, with a Baptist chapel and a large woollen factory. Pop. 1292

SUTTON or *Horn*, a vil and par. England co. Kent, on the Darent, 3 m. S.S.E. Dartford. It has an ancient church, Baptist and Wesleyan chapels, an almshouse, and manufacture of paper. Pop. 1290

SUTTON-COLMFIELD, a market tn. and par. England co. and 26 m. N.W. Warwick on an acclivity; with tolerably straight and well-kept streets an ancient church, a R. Catholic chapel five public schools, one of which is a grammar-school several churches, a book-shop, and permanent library. There are no manufactures in the town, but in the parish there is a celebrated manufactory of muslin-veils, a mill for boring gun-barrels and grinding bayonets, also several manufactures of spades and edge-tools. Area of par. 18,000 ac. 1 op. 4874

SUTTON-IN-ASHFELD a vil. and par. England, co. Nottingham, on a height, 3 m. W. S.W. Mansfield, with a parish church, Baptist, Independent Primitive and Wesleyan Methodist chapels, a national school, manufacture of cotton hosiery, lace and earthenware, and a mineral spring, said to be efficacious in rheumatic affections. Area of par. 6040 ac. P. 7692

SUTTON (LONS) a tn and par. England, co. Lincoln. The town, 4½ m. E. by E. Hailbeach, near l. bank Nene, over

which is a new iron horizontal bridge, is rapidly becoming a very considerable place. It is generally well built; has a church, and places of worship for Independents, Wesleyans, Baptists, and Primitive Methodists, and numerous schools, both public and private. Area of par., 56,145 ac. Pop. 6691

SUTTON or *Valence*, or *Town-Borough*, a vil. and par. England, co. Kent, commanding a fine view of the sea, 6 m. S.S.E. Maidstone. It has a plain substantial parish church with a square tower an Independent chapel, a free grammar-school, several almshouses, and the picturesque ruins of an old castle, overgrown with ivy. Area of par., 2182 ac. Pop. 1090

SUUR, a vil Hungary Thirzer Duna, co. Vaspasser, about 12 m. from Palota with a Protestant and a R. Catholic church two mills, and a trade in cattle and timber. P. 1684

SUWALKI a tn. in Russian Poland, cap. woiw. Angustow, 169 m. N.E. Warsaw. It is well built; has a large market-place, two churches, and handsome buildings in which the courts and public offices are held. Suwalki has made rapid progress since it became the capital of the woiw. Pop. (1843) 7821

SUWANEE, a river U. States, formed by the union of several streams in Georgia; flows S.S.E. into Florida turns almost due E., and falls into a bay of the Gulf of Mexico opposite to several islands, after a course of about 160 m. Over the bar at its mouth the water is only 5 ft., but within, and for 25 m. above, it is 15 ft.

SUWABOW group of four uninhabited isls. S. Pacific, between the Navigator and Society Islands, extending from lat. 16° 6' to 18° 15' S. lon. 168° 28' to 169° 31' W., discovered by a Russian ship of the same name, 27th September 1814.

SUWAT a territory on the N.E. frontier of Afghanistan, extending from the upper part of the Indus, W. to the Lendys or Panjkora. It is watered by a river of same name, which rises in the Hindoo Koosh, and joins the Lendys. Lying secluded, it has been little explored, but though occupying an elevated slope of the Hindoo Koosh it is understood to have a good climate and a fertile soil. The inhabitants are a semi-civilized race, and, though imperfectly acquainted with the sciences, are fanatical defenders of Mahometanism.

SUZDAL, a tn. Russia, co. Suzdal.

SUZE (La) a tn. France, dep. Sarthe, 11 m. S.W. Le Mans, l. bank Sarthe, here crossed by a handsome bridge. It has the ruins of an ancient castle, manufacture of bone-horn, wax candles, and earthenware, and tanneries and tleworks. Pop. 1465

SUZFARA a tn. and com. Italy prov. and 12 m. S. by W. Mantua, cap. dist. of same name near the Eara, an arm of the Po. It contains a parish church, and as the seat of provincial courts and offices. P. (com.), 6864 (dist.) 9884

SVANIKE, a small seaport to Denmark, E. coast, l. Bornholm. It is surrounded by shoals, and has a winter-haven of the fifth class, admitting vessels drawing 7½ ft. but rather insecure. Many of the well known Bornholm clocks are made here. Pop. 900

SVAFÄ, a river, Russia, rises on the S. frontiers of gov. Orel, enters gov. Kozluk flows S.S.W. and joins l. bank Sena, total course, 80 m.

SVARTSÖJÖLAND, the largest of the islands of Lake Mälär in Sweden, about 10 m. W. Stockholm. It contains a royal summer-residence in a very dilapidated state.

SVENDBORG a seaport, Russia. See SWENSBORG

SVENDBORG, a tn. and seaport, Denmark, l. Elben, cap. bail., on a strait, 25 m. S.S.E. Odensee. It has two churches, excellent building-yards, and a good winter-haven of the third class, admitting vessels drawing 14 ft. The chief employments are tanning and ship-building. Pop. 8900

SVILJISK, a tn. Russia, gov. and 21 m. W. S.W. Ekaterin., cap. struk., on a lofty height above the Svila, near its confluence with the Volga. It is an old place; has two stone and five other churches, a monastery, and a nursery, manufactures of potash, several tanneries and a trade in corn and flour. In the vicinity there is a small lake, strongly impregnated with sulphur. Pop. (1843), 1510.

SVISLOTCH a tn. Russia, gov. and 47 m. S. Grodno, on river of same name, the inhabitants mostly Jews. Pop. 1900.—The river rises in the gov., a little N.W. the town of Minsk, flows S.E. and after a course of about 100 m., joins r. bank Neris, at the town of Svislotch.

SWABIA (German *Schwaben*), an ancient German duchy which, after bearing the name of *Alamania*, from its original inhabitants the *Alamanni*, changed it to *Swabia* or *Schwabenland*, in consequence of the invasion of the Suevi. On the division of the kingdom of the Franks in 843, Swabia, along with Bavaria, became as it were the nucleus of Germany and its rulers continued for many centuries to hold a prominent place in its history. In 1876 was formed, chiefly by the union of its towns, the celebrated *Swabian League*. In 1519 when the Emperor Maximilian I. divided Germany into 10 circles, one of them was called the circle of Swabia. It formed the S.W., and perhaps the fairest and most fertile portion of Germany and was bounded N. by the circle of Franconia and the Rhine, E. that of Bavaria, and S. and W. by the Rhine, which separated it in the former direction from Switzerland, and in the latter from France. Its area was 10,980 sq. m. and its pop. about 2,300,000. By the Ulm constitution of 1668 which was maintained with a few changes till the dissolution of the German Empire its sovereignty was shared by the Duke of Württemberg, the Bishop of Augsburg, the Margrave of Baden, and the Bishop of Constance, with a supremacy in Austria. It is now divided between Württemberg, Baden, Bavaria, Hohenzollern and Liechtenstein. Since 1887 the former Bavarian circle of Oberdonau or Upper Danube, has borne the name of Swabia-with-Neuburg (*Schwaben-mit-Neuburg*). It consists of the principality of Neuburg, parts of Upper Bavaria (*Oberbayern*) and the former Swabian episcopal and imperial cities and has an area of 3858 sq. m., and pop. 561,164. Augsburg is its capital.

SWABIAN ALPS, mountains, Württemberg. *See* ALP. **SWAFFHAM**, an anc. market tn. and par. England, co. Norfolk, on the summit of an eminence, about 27 m. W. by N. Norwich. It is well built, has a spacious market-place, lined with good shops and in its centre an elegant market-cross erected by the Earl of Oxford, in 1788. A handsome church, places of worship for Baptists, Wesleyan and Primitive Methodists, a national and free school, and ball and assembly rooms. *Pop.* 1650 in 1861.

SWALE—1. A river England formed by the junction of two streams which descend from the mountains on the E. frontiers of Westmoreland, flows E. to Richmond then S.E., and near Boroughbridge unites with the Yore or Ure, in forming the Yorkshire Ouse; total course 70 m.—2. The name given to the two branches into which the Medway divides, about 10 m. below Rochester. The one, called the E. Swale, separates the Isle of Sheppey from the mainland on the W. and S., the other forming a broad estuary on the N.W. side of the island, joins the estuary of the Thames at Ebberham.

SWALWELL, a vill. and township, England co. Durham, on the Derwent, here crossed by a handsome bridge, near its junction with the Tyne. It has Presbyterian, Primitive and Wesleyan Methodist chapels, and very extensive iron works, at which large anchors, chain-cables, steam-engine cylinders, cranes, &c., are made. *Pop.* 1429.

SWAN, a river, Punjab, which rises in a range of the Himalayas; lat. 86° 55' N., lon. 73° 15' E. flows S.W., and after a course of about 180 m. joins I. bank Indus, about 10 m. below Mukand.

SWAN RIVER, a river, W. Australia co. Perth. It falls into a large bay called Melville Water, about lat. 32° S. total course, above 180 m. It is subject to sudden and tremendous floods, which inundate the corn land in its vicinity, and sweep away all opposing obstacles. The first settlement in W. Australia was founded here, in August, 1829, under the auspices of the colonial office. The towns of Freemantle, Perth, and Guildford, are built on its banks. It was discovered in 1696, by Vlaming.

SWANSIA (Welsh, *Swansea*), a port town and seaport in Wales, co. Glamorgan, I. bank Tawe, at its mouth to the Bay of Swansea, and on the South Wales railway 60 m. W. by N. Bristol. It occupies an acclivity, formed by an angular piece of ground between two lofty hills; and consists chiefly of a main street, stretching N. to S. for nearly 1 m. parallel to the river, and of a number of minor streets, partly diverging from it, and partly proceeding W. and S.W. nearly in the line of the bay. The houses, for the most part modern, are commodious and well built, and the outskirts of the town are studded with villas and other lodging-houses for the accom-

modation of numerous visitors attracted by the beauties of the site, and its advantages for sea-bathing. One of the most important modern improvements is a spacious market-place, erected at a cost of about 250,000. The architectural edifices include three churches, and various Dissenting chapels, of which two are Wesleyan Methodist, one of them considered the finest belonging to that body in Wales, a R. Catholic, a Unitarian, Calvinistic Methodist, Welsh Baptist, Independent, and Friends. The Jews also have a synagogue. The principal educational and literary establishments are a normal college supported by voluntary subscription, a free grammar and British national, and infant schools, a royal philosophical institution, a Cambrian society for the cultivation of geology, mineralogy, and natural history; a Welsh literary society, a society for the acquisition of useful knowledge, a horticultural society, and a mechanics institute. Other buildings and objects deserving of notice are the townhall, a coast and substantial edifice, with a Doric portico; a spacious and handsome guildhall and courthouse, a custom-house, a leucostyleum for cornices Glamorgan, Carmarthen, Cardigan, and Pembrokeshire; an infirmary and dispensary, a theatre, assembly-rooms, hot and cold baths, a house of correction, a town prison and work house on the site of part of the ancient castle, and a massive square tower now the only existing remnant of the castle itself.

The vicinity of extensive masses of coal of a quality peculiarly adapted for smelting purposes, and the easy access to the town both by sea and inland navigation, have made it the principal seat of the copper trade almost all the copper-ore obtained in Great Britain and Ireland, and more recently in Australia, besides considerable quantities from Cuba and other foreign mines, being melted at the furnaces, of which there are here 17 within the district, and eight close to the town. These, while they have mainly contributed to the prosperity and rapid increase of the population, are not without their disadvantages, destroying vegetation within the range of their arsenious and other deleterious vapours, and undoubtedly exerting an unfavorable influence on the general salubrity of the place, though, so far as has been ascertained by statistical data, the injury is less than might be supposed. Next to copper-smelting-furnaces, the most important industrial establishments are iron-works, including foundries, also-works, tinplate-works, breweries, roperies, two extensive potteries, and yards for the building and repairing of ships. Owing to the height to which the tide rises in the Bristol Channel, vessels of large burden easily get close to the town, but at ebb the harbour is left almost dry. In 1865 the vessels registered at the port were 165 carrying 25,369 tons; the vessels entered and exited at 4515 (322,740 tons) and cleared 6580 (476,083 tons). A very large proportion both of the vessels and tonnage is employed in the coasting trade. The chief imports are copper-ore, grain, and provisions from Ireland, timber from America and the Baltic, hemp, tallow and flour the chief exports copper, iron, coal, lime, and earthenware. The borough, called into existence by the Reform and Municipal acts is governed by a mayor, five other aldermen, and 18 councillors, and unites with Neath, Llanelli, and Abercrombie, in sending a member to Parliament. *Pop.* 31,461.

SWANWICK—1. (or *Swanage*) A maritime and market tn. and par. England, co. Dorset, on a bay of the same name, N.E. St. Albans Head, 22½ m. E.N.E. Dorchester, with a large church a library and manufactures of straw plait and shirt-buttons. Freestone, called Purbeck stone, is obtained in the vicinity and large quantities are exported annually. This bay is very beautiful, and is sufficiently deep to admit vessels of 800 tons. The place is much resorted to for sea-bathing. The climate is mild and salubrious. Area of par. 5168 ac. *Pop.* 5139.—2. A hamlet England co. Derby near Alfreton, with Baptist and Wesleyan chapels, and an endowed school. Inhabitants chiefly employed in the collieries of the vicinity. *Pop.* 1819.

SWATEKA or **SWATKA** a market tn. in Bohemia, strale and 80 m. from Chrudim, on the Schwarnava, near the frontiers of Moravia. It has an ancient parish church. *P.* 1088.

SWEABORG or **SVENSBORG**, a fortress, Russia, Finland, 3 m. S.E. Helsinki, 185 m. W. by S. of the town of Åbo. It occupies seven little islands in the Gulf of Finland. All of them are strongly fortified, and communicate with each other by bridges of boats, namely, Vänge and

Gustafsvard to the S.; West-Warste and Langern to the N.W.; Låven and the Small Oster-Svarste to the N. and last, the Great Oster-Svarste to the N.E. The lake of Vargoe contains the principal fort, consisting of a strong castle, and of extensive magazines and barracks set out of the rock, and bomb-proof; some points have three tiers of guns. The total number of cannon is 8000, requiring 8000 men to work them. The summits are capable of accommodating 12,000 men. The harbor of Sweborg has accommodation for 70 sail of the line. The island of Great Oster-Svarste is provided with docks capable of holding 12 sail of the line, and with great magazines. Sweborg has some trade, though the whole importance of the place is of a military nature. It was originally built by the Swedes to guard their frontiers against the Russians. In 1865 it was successfully bombarded by the British and French fleets.

SWEDEN (*Sweden*, *Sverige*, or *Svea-ryke*, Danish *Sveerg*, German, *Schweden*, Dutch, *Sveerik*, Latin, *Suecia*, French, *Suède*, Italian *Svezia*, or *Svezia*), a kingdom in the N. of Europe, and forming with Norway with which it is now united under one monarchy the whole of the peninsula known in ancient times by the name of Scandinavia, situated between lat. 55° 30' and 69° N., and lon. 11° 40' and 24° E. and bounded, N and W by Norway; S.W. the Skagerrack, Kattegat, and Sound S. the Baltic E. the Baltic and the Gulf of Bothnia and E. the Tornik and its affluent Meana, separating it from Finland, greatest length, N. to S. 85 W. about 875 m. greatest breadth about 250 m. area, 198,076 sq. m. In addition to the mainland it has a great number of islands the most of them of very small dimensions, and lying close to the coast. The largest and also the most distant is Gotland, in the Baltic. For administrative purposes it is divided into län or counties, the statistics of which are given in the following table—

| Län or County. | Area, sq. m. | Population, 1864. | Chief Towns. | Pop. 1864. |
|-----------------------|---------------|-------------------|--------------|------------|
| Central Sweden | | | | |
| Ångermanland | 3,121 1/2 | 59,719 | Luleå | 6,556 |
| Jämtland | 2,231 1/2 | 131,638 | Jönköping | 8,372 |
| Örebro | 2,174 1/2 | 140,683 | Örebro | 3,874 |
| Östergötland | 2,905 1/2 | 287,273 | Örebro | 9,118 |
| Skåne | 9,129 1/2 | 367,000 | Malmö | 6,180 |
| Småland | 2,442 1/2 | 122,143 | Västerås | 13,877 |
| Varmland | 1,707 1/2 | 92,143 | Örebro | 6,584 |
| Westmanland | 1,804 1/2 | 101,200 | Malmö | 21,390 |
| Halland | 1,425 1/2 | 124,417 | Halmstad | 4,486 |
| North Sweden | | | | |
| Östergötland | 1,437 1/2 | 226,358 | Örebro | 43,346 |
| Skåne | 3,706 1/2 | 377,000 | Westerås | 4,418 |
| Skåne | 2,442 1/2 | 226,000 | Westerås | 2,893 |
| South Sweden | | | | |
| Lake Water | 353 1/2 | | | |
| Stockholm | 1,114 1/2 | 255,595 | Stockholm | 125,676 |
| Upsala | 1,189 1/2 | 96,001 | Upsala | 9,513 |
| Skåne | 1,638 1/2 | 152,614 | Westerås | 4,881 |
| Varmland | 4,610 1/2 | 87,460 | Carlsberg | 5,019 |
| Örebro | 1,273 1/2 | 106,493 | Örebro | 6,725 |
| Westmanland | 1,804 1/2 | 106,779 | Västerås | 6,616 |
| Östergötland | 1,437 1/2 | 216,071 | Falun | 6,461 |
| North Sweden | | | | |
| Östergötland | 5,706 1/2 | 142,802 | Göta | 19,130 |
| Westerås | 4,625 1/2 | 121,605 | Westerås | 8,812 |
| Varmland | 1,707 1/2 | 92,143 | Örebro | 1,745 |
| Westmanland | 1,804 1/2 | 6,820 | Örebro | 2,130 |
| Östergötland | 1,437 1/2 | 1,765 | Falun | 1,437 |
| Total | 3,284,418 1/2 | 4,400,000 | | |

Coasts.—The coast-line, above 1400 m. in length, is very irregular but is more correctly described as serrated, than as deeply indented. Its bays and creeks, though very numerous, having neither the width nor tortuous lengths by which the bays of Norway are characterized. The W. coast is very rocky, particularly along the line of Gottaberg, but seldom rises so high as 50 ft. Its numerous creeks and the less of its islands furnish a number of good roads. The S. coast runs from Cape Falskär E., and then N. to Solvik, where it is low and sandy, and partly encumbered with corals. At Solvik a range of precipitous cliffs begins to appear, and though partly interrupted by low benches, presents a number of projecting masses, rising steeply to the height of 50 ft. In this strait is the bay and harbour of Carlsberg, flanked by the islands which form its mouth. The shore, separated from the island of Öland by Kalmar Sound, is generally low and in its S. part presents almost a

continuous line, neither broken by indentations nor lined by islands but towards its N. entrance the configuration changes, and rocky cliffs and islands are seen along the whole coast as far N. as the mouth of the Dal, a little S. of the town of Gädd. The cliffs, however, continue to be of moderate elevation, and nowhere exceed 100 ft. The most remarkable features in this part of the coast are the long and narrow bay of Bränsen, and the vast number of islands and islets, some forming the archipelago of Stockholm, and stretching along the coast N. to entrance of the Gulf of Bothnia beyond the Åland group, which belongs (1854) to Russia. The S. part of the Gulf of Bothnia presents a succession of moderately elevated shores alternately rocky and alluvial, or sandy, the whole of its upper part, from the Strait of Quarn N. W. to Tornik, is of the latter description, consisting of sandy alluvial deposits, which are brought down by the rivers in such quantities that they seem destined at no distant period to convert a large portion of the gulf into dry land. It would appear, however, that alluvium is not the only agent employed in carrying on this process of shallowing. It has been proved beyond a doubt that the relative positions of sea and land have long been undergoing a gradual change by the elevation of the latter. This elevation is not confined to the Swedish shores along the Gulf of Bothnia or the Baltic generally, but is equally apparent on the W. coast which lies open to the German Ocean, though the whole amount of elevation appears to be greater in the N. than towards the S.

Mountains and Plains.—The interior of Sweden is by no means generally mountainous, and its surface has far less of a highland than of a lowland character. The most elevated portion of it commences in the W. near the parallel of 63° and is continued N. along the frontiers of Norway, not so much as a continuous chain, as in isolated mountain masses rising from an elevated table-land, which, where loftiest, is at least 4000 ft., and forms the base of several summits which rise more than 8000 ft. above sea-level and owing to their high latitude, are covered with perpetual snow. The two loftiest mountains both of them partly within the Swedish frontier are Sulitelma, in lat. 67° 55' 48" N., and Styfjället, lat. 65° 65' 50" N. These mountains and their table-land slope E. towards the Gulf of Bothnia, sending down numerous torrents which in their course often expand and form chains of lakes and dreary swamps. The same slope is continued E. of 63° N. but besides it there is a S. slope which attains its lowest level near lat. 59° N. on the shores of the magnificent lakes which there stretch almost continuously across the country E. to W. To the S. of 59° N. the country is generally flat, though in many parts finely diversified. Its loftiest height, Mount Tjörneberg to the S. of Lake Wetter is about 1193 ft., and a considerable part of what is called the table-land of inland is 800 ft. above sea-level, but the far larger portion is under 800 ft. Both its level and latitude point it out as a region which should naturally be well adapted for agriculture, and it has several fertile and well-cultivated tracts but the soil, generally consisting of disintegrated primitive rocks, in which max is a principal ingredient, is by no means productive. A good deal of it is covered by barren sand or stunted heath, though interspersed with forests, green meadows, and cornfields. The finest tracts are the space enclosed between Lake Vättern and the Bay of Bränsen on the S. and Lake Hälsjön and Mälaren on the N., the plain of Linköping, the line of Carlsberg, and generally what is called the Plain of Svanen occupying the whole of the S. peninsula between the Sound on the W. and the Baltic on the E.

Rivers and Lakes.—These are very numerous, and the latter in particular are on a gigantic scale, giving to the scenery of the country several of its grandest features. They all belong to the lakes of the Baltic Sea and the German Ocean. The former receives the far larger share. To it belongs the Tornik, which rising in the Norwegian mountains, pursues its course S.E. for nearly 300 m., augmented by numerous large offshoots and falls into the N. entrance of the Gulf of Bothnia; the Luleå, Piteå, Skellefteå, and Umeå, which flow respectively S.E. into the same gulf; the Ängström, which flows 290 m. and in the lower part of its course becomes so wide and deep that vessels of 600 tons can ascend nearly 70 m. from the sea; and the E. and W. Dal, which uniting their streams, receive the discharge of numerous lakes, and pursue a more circuitous course than usual in

Swedish rivers. The principal rivers belonging to the basin of the German Ocean are the Klar and the Göta, the former of which issuing from Lake Vänern on the edge of the Dovrefield Mountains, furnishes Lake Vener with its chief supply of water, while the latter which may be considered only as its continuation, discharges it into the ocean. The lakes are so numerous and so large that their united area has been estimated at nearly 22,000 sq. m. or about one-eighth of the whole area of the country. They not only add to the beauty of the scenery, but yield large supplies of fish, and both by their natural depth, and the canals which have been cut to connect them, are of vast navigable importance, and furnish a long line of internal communication. In this way a direct channel has been opened from Göteborg on the W to Söderköping on the E coast, and communicating with the important towns of Wenersborg, Carlstad, Mariestad, Jönköping, and Linköping. In the same manner the capital has been enabled to extend its communications with the interior. In general, however, the rugged nature of the country has made navigation difficult. Most of the rivers have rocky beds and dangerous shallows, and in many places a complete barrier is formed over which a whole river is precipitated in cascade. The most remarkable of these is Trölsheia, immediately below the outlet of Lake Vener. This lake, which, after that of Ladoga, is the largest in Europe, is 55 m. long, by 30 m. broad, and covers an expanse of 3000 sq. m. Lake Wetter, the next in size, is about 30 m. long, by 10 m. broad, and has an area of about 100 sq. m. It is more alpine in its features than any of the other lakes, and in one place has a depth of 420 ft. Lake Mälaren, better known than the other large lakes, from having the capital on its shores, is also remarkable for the number of islands, which so crowd its surface, that though it has a length of 60 m. and a breadth of 45 m. it is scarcely possible to find a single square mile of open water. Other lakes whose magnitude enables them to notice are the Hjälmaren, which has both a natural and an artificial communication with Lake Mälaren by the Sjöla, formed by an expansion of the E. end, the Stensjön, out of which the Luleä river, the Horn-Äran, which discharges itself into the Skelleftef, and the Stora-Luleä-Watten which originates the Luleä.

Geology and Minerals.—The geology of Sweden though interesting from the character of its rocks, and the mineral treasures which not a few of them contain, does not present much variety in its formations. Almost the whole of the country throughout its length and breadth is composed of gneiss, partially penetrated by granite. Patches of porphyry and greenstone, of Silurian rocks of dolomite, and of cretaceous rocks, appear in various localities. The minerals include gold which was once worked on the table-land of Småland, till it ceased to pay the expenses, silver, found in limited quantities in several places, particularly Sala in the Westmarna, and the vicinity of Falun; copper found chiefly in the Falun, and smelted to a considerable extent at Stora-Kopparsberg; rich mines of cobalt, particularly in the Örebro, a little lead, and inexhaustible supplies of iron. The last, indeed, not only occurs in beds of immense thickness, enclosed in strata of gneiss, but forms the principal mass of whole mountains. In Swedish Lapland these seams are from 3 to 4 fathoms others from 14 to 15 fathoms in thickness, while others attain the immense thickness of 84 and 88 fathoms. These Lapland ores, however have proved of little economical value. The want of fuel rendered the smelting of them very expensive, and what is worse, the iron obtained is generally of a brittle and inferior quality. Mount Torshög on the S. of Lake Vättern on the table-land of Småland, forms another of the enormous mountain-masses of iron, but the ore, though otherwise of good quality, contains only 25 per cent. of metal and cannot be smelted to advantage with an admixture of other ores. The most celebrated seams are those of Dannemora in the Upsala, where the iron worked is perhaps the best in the world, and being admirably adapted for steel, is in great demand for that purpose in England, where it commands a very high price. The quantity produced, however, is only about 2000 tons annually. Much larger quantities, also of excellent quality, are produced in the Falun, Gäddö, Westmarna, Carlstad, and Örebro. The most valuable garnets are those of porphyry, which takes on a fine polish, and is made into a great number of articles of a very ornamental description.

Climate.—The N. part of Sweden being also the most ele-

rated, has naturally a rigorous climate, though several causes concur to modify and mitigate its rigour. At Ronneby, lat. 58° 20' at the height of 1440 ft above sea-level, the thermometer in January averages 0° 12 or nearly 32° below the freezing-point but in the hottest month, July, averages 58° 10'; and on the whole year 27° 04, or about 5° below freezing. This annual mean, though low is far above that of places on the same latitude, situated much farther N., as in Siberia. In lower latitudes, the advantages are still more favourable to Sweden, particularly in winter. Thus at Stockholm, the mean temperature of the six winter-months is 29° 4; whereas in St. Petersburg it is only 21° 0. Compared with places farther W. Sweden loses its advantage. Thus at Wexlä lat. 56° 55', the mean annual temperature is 44° 56 and at Edinburgh, in lat. 55° 58', is 46° 07 in other words, Edinburgh, though not 1 lower is nearly 2½ warmer. In summer the advantage is remarkably in favour of Sweden, the thermometer in July averaging 58° 46 whereas in Edinburgh it averages only 56°, and even at London not more than 57° 07. The result of these observations is, that the climate of Sweden, though modified by the proximity of the sea, so as to be milder in all respects than the interior of the N. parts of the Russian and Asiatic continents, is much more extreme than that of our own island, and experiences greater degrees both of cold and heat. Hence at Stockholm, the thermometer, which never reaches zero at Edinburgh has been known to descend 28° below it in January and to rise in July to the almost tropical heat of 59° 8. The climate, however, is eminently favourable to health and no country furnishes more numerous instances of longevity.

Vegetation, Agriculture, &c.—In the very N. extremity of Sweden, at least in those parts where the surface is not very elevated fine trees of pine, fir, and birch are found. These, however, occupy only occasional patches, and the true forest land must be considered as having its limit near 64. Below this lat. and chiefly in the central and S. parts of the kingdom, the forests occupy at least one-fourth of the whole surface, and sometimes stretch continuously for 30 m. in length by 30 m. in breadth. Many of these, however, consist of trees of stunted growth, available chiefly for domestic fuel or the supply of the smelting-furnaces, and seldom of much use as timber. Forests in which oak and beech are the prevailing trees, occur only in the S. The far greater part of the available surface not covered with forests, remains either in natural pasture, which which it is only scantily clothed or has been converted into artificial meadows, from which good crops of hay are obtained. The quantity of arable land is very limited, and does not in all exceed 4000 sq. m. Much even of this is of indifferent quality, and till recently was so poorly farmed, that Sweden was annually obliged to import a considerable part of its whole consumption of grain. But in consequence of the great improvements which have taken place, and the removal of anomalies in the modes of tenure, which left large tracts uncultivated, though not unfitted for the plough either by climate or configuration the deficiency has been supplied, and in ordinary years importation can be dispensed with. The prevailing cereals are rye, barley, and oats. The first is nearly a half more in quantity than the other two, which are nearly equal the quantity of wheat is nearly ten times less than that of rye. Another crop which is scarcely less important than those of grain is potatoes. It is grown in almost all parts of the country, and forms one of the main articles of food among the lower classes. The most important auxiliary crops are hemp and flax, particularly the latter which is of excellent quality; on a few favoured spots tobacco, hops, and madder are grown. Cherries, apples, and pears are tolerably abundant in the S. districts. The principal domestic animals are cattle, sheep, and reindeer. The last, necessarily confined to the N. are kept in large herds by the Laplanders, and supply them at once with food and clothing. The cattle are generally of a small breed, without horns, and are not possessed of valuable properties either for the butcher or the dairy. The sheep are also inferior and yield only coarse wool, though some attempts have been made in the S. to cross with the merino. Among the larger wild animals the wolf and bear abound in the forests, and often commit great ravages. The elk and deer are also found, but in rare limited numbers. Of smaller animals the most destructive is the lemming, which at intervals of years descends

In jammer numbers into the low country, and by it waste. Among birds the most remarkable are eagles, capercaillies, and woodcocks. The rivers and lakes are well stocked with salmon and trout, but the fisheries on the sea-coast have long ceased to be productive. Herring, which used to rank the coast of the Baltic in large schools, have almost entirely disappeared though large numbers of a fish resembling herring, and called *silwings*, are taken along the E. coast.

Manufactures and Trade.—Manufactures have not made great progress. The more important articles are woollen cloths, and other woollen stuffs, which are made in large factories, chiefly at Norrköping and Stockholm and employ a great number of domestic looms in different quarters; cotton, linen, and silk goods, worsted and cotton twist, tobacco, manna fested in many places, and on a large scale at Norrköping; refined sugar, more especially at Göteborg; paper chiefly in Åm Christnäs and Fålen, carried on to a large extent in all the more important towns, but more especially at Stockholm, glass, made on an extensive scale in Åm Mariestad and Malmö; earthenware, cordage, and various articles in iron. There are also extensive dye-works, soap and oil works, potter-brewhouses, distilleries, and building-yards, in almost all the parts of the Baltic. The trade is chiefly in articles of raw produce, among which the most important are iron and timber. Next to these are tar, copper, ash, alum, hemp, oil, bark, tobacco and snuff, paper &c. The chief imports are colonial produce, salt, wines, silk, wool, cotton stuffs and cotton twist, hemp, hides, skins, butter, bacon, oil, linseed-oil, dyes, &c. The trade is carried on chiefly with the U. States, which take large quantities of iron. Great Britain which takes both iron and timber. Denmark, Hamburg and Lübeck, Brazil, Russia, Prussia, France, and Portugal. The following table presents a summary of the maritime commerce from 1843-51 and in 1852—

Comparative view of the TONNAGE of the VESSELS that ARRIVED in and DEPARTED from SWEDEN, in the YEARS 1843 to 1851 and in 1852, and of the VALUE of the EXPORTS and IMPORTS in the same years.

| Years | Arrived | Cleared | Exports | Imports |
|-------|---------|-----------|-----------|-----------|
| Tons. | Tons. | Tons. | £ | £ |
| 1843 | 55,320 | 370,739 | 1,600,502 | 1,433,159 |
| 1844 | 492,094 | 418,774 | 1,590,767 | 1,540,030 |
| 1845 | 550,248 | 427,114 | 1,091,823 | 1,770,081 |
| 1846 | 575,274 | 546,538 | 2,074,234 | 1,716,867 |
| 1847 | 640,902 | 582,394 | 2,708,007 | 2,326,657 |
| 1848 | 435,485 | 448,925 | 2,260,080 | 1,940,538 |
| 1849 | 430,518 | 504,584 | 2,195,520 | 2,150,750 |
| 1850 | 654,087 | 64,228 | 2,042,868 | 1,868,917 |
| 1851 | 636,474 | 601,574 | 2,346,608 | 2,387,738 |
| 1852 | 679,568 | 1,220,994 | 2,140,728 | 2,565,146 |

For carrying on this foreign trade there are many facilities afforded by a great number of good harbours, but the means of internal communication are deficient, though, from the comparative narrowness of the country the distance from the sea is not very great. The canals connecting the different central lakes, and giving a continuous communication from the Kattegat to the Baltic, are the most important works that have yet been constructed for improving and extending the internal communications, and much might yet be done by deepening and removing obstructions from the beds of rivers. In winter when in most other countries the difficulties of travelling are greatly increased, the Swedes enjoy unusual facilities from the coating of snow which covers the ground, and furnishes an easy means of transport by sledges.

Weights and Measures.—Accounts are kept in *riksdaler*, *skilling* = 12 *skilling*, or *ore*. The greater part of the currency, however is in paper, which is circulating in sums varying from 8 skillings to 500 *riksdaler*. The standard of weight is the *mark* or commercial lb. of which 100 lb. = 58-76 *mark*, or 58-76 *mark* = 100 *mark*, and 100 *mark* = 1 *mark*, of which 10 *mark* = 1 *mark*, and 10 *mark* = 1 *mark*. The principal unit of dry measure is the *tonne* or *barrel* = 4-157 *mark*. Imp. For larger measures the *coopers* or *hogshead* = 62-23 *mark*, gal., is used; 2 *coopers* make 1 *pipe*, and 2 *pipes* 1 *feeder*. The Swedish foot is = 11-664 in. imp. The Swedish *are* = 1 *sq. ft.* 35 p. The mile = 6-64, and the *sq. m.* = 44 *sq. m.* imp.

Government, &c.—Sweden and Norway are now united under one sovereign, but each has its own constitution. That of Sweden has at its head an hereditary constitutional sovereign,

who possesses the sole executive but shares the legislative power with a diet or parliament composed of hereditary nobility, clergy, burghers, and peasants or landholders not noble. These four orders form four chambers, which meet and vote separately. First of the nobility consists of the head of every noble family in the kingdom, and as these amount to about 2800 the number of members might be nearly the same, though the attendance seldom exceeds 500, and often not 400. The clerical chamber consists of the Archbishop of Upsala, who always presides, 12 bishops, and about 80 deputies from the various dioceses. The burghers are represented by 87 deputies, of whom Stockholm returns 10 and the peasants by 144 deputies, sent from the different rural districts. To effect constitutional changes the whole four orders must consent; but in ordinary questions the assent of three is sufficient. The king has in all cases an absolute veto, and in the exercise of it or any of his other powers, is responsible only through his ministers. The diet is assembled every fifth year, and sits for three or four months, though occasionally much longer. The government is conducted by a council of state, composed of the two ministers of justice and foreign affairs, and eight councillors, of whom five are the heads of different departments, and three only deliberative. Each line is presided over by a governor, who has under him *borgers* or deputies over several *lands* or districts, and *borgers*, one over each *land*. Justice is administered by three supreme courts, which sit respectively at Stockholm, Jönköping, and Christnäs. To each of these courts a number of secondary tribunals are subordinate, and beneath them again are *land-courts*, or courts of primary resort, to the number of about 764. The Lutheran religion is professed by the great body of the people, and is the only religion acknowledged by the state and though a general toleration is professed dissenters from the state creed are banished the country. The sovereign and all the chief functionaries were by Lutherans. The number of clergy is about 8000. The higher orders are nominated directly by the king, but all ordinary and parochial clergy are elected by the people. The annual revenue is about 3,990,000 of which about two-fifths arise from land-tax and other permanent sources, and three-fifths are raised annually by votes of the diet, and consist chiefly of customs and excise. The army consists of about 48,000 troops and militia, raised by enlistment, and 90,000 reserve, raised by conscription. They are well disciplined, and under arms present a remarkably fine appearance. The navy consists of 10 ships of the line, 8 frigates, 8 brigs, 12 steamers and about 250 smaller craft. The naval force is large compared with the population, and is well manned by about 8000 men.

People.—Almost all the inhabitants of Sweden, with the exception of the Laplanders and Finns, found only in the N., are of Teutonic origin, and preserve the original features of the race in great purity, particularly in the central and S. provinces, where they are characterized by a tall, robust stature, light hair, blue eyes, and light complexion. They are active and enterprising, and manifest a marked predilection for scientific pursuits. In point of intelligence and education, they are scarcely surpassed by any country in Europe. Thus in purity owing to the enlightened spirit of the government, in endeavoring to provide schools in every important locality; but derives great additional aid from the parents, who, in many parts of the country where regular schools, owing to the scantiness of the population, cannot be maintained, are careful to give a substantial education to their children at their own firesides. Hence it is affirmed on good authority, that out of every 1000 Swedes it would be difficult to find one who cannot read. The state of morality, however, is not such as might have been anticipated under such circumstances, and the number of persons tried and condemned for offences is unusually great. Heretics are few, but a great number of minor delinquencies figure in the calendars, and are evidently accounted for by the far too prevalent use of ardent spirits. Owing, probably, to the same cause, domestic virtue, particularly among the unmarried, is not held in high esteem, and the number of illegitimate births at Stockholm is only less than that of Paris.

History.—The earliest traditions of Sweden, like those of most other countries, present only a confused mass of fables. Christianity appears to have been first introduced about the

beginning of the 9th century, under a king known by the name of Hori II; but the great mass of the people continued attached to Paganism, and in a popular revolt, in the beginning of the 11th century, put Erik, one of their sovereigns, to death for demolishing their temples. This, however, was only an inspiring effort for Erik's son, Olaf, succeeded in giving a formal establishment to Christianity. The Swedes and Goths were long ruled by separate sovereigns, but in 1050, they became united under Simkili. Simkili had four successors of his line, all distinguished by pious virtues and Christian zeal. Inge II, the last of them, having left no issue, a competition for the crown took place, and a civil war ensued, the Goths favouring one party and the Swedes another. At last a very extraordinary compromise was made, by declaring that in future the sovereigns should be appointed alternately from the two competing families. This arrangement, entered into about 1150, was persevered in till 1350 when the direct line of both families had become extinct. For a long time after the kingdom was torn by internal dissensions, till Margaret, Queen of Denmark and Norway, who has been called the Semiramis of the North, interfered, and having defeated Albert, King of Sweden, and made him prisoner formed the famous union of Kalmar in 1397 and united the three crowns in her own person. She died in 1418, and was succeeded by her grand nephew Erik of Pomerania, whose tyranny irritated the Swedes, already tired of the Danish yoke. They accordingly attempted to throw it off, and were at first successful, but though Denmark retained the nominal supremacy the government was virtually lodged in a Swedish Riksdag or assembly of administrators, whose office became hereditary in the family of Sten Sture in 1471. Turbulent times still continued the Swedes endeavouring to rid themselves of the yoke, and the Danes to retake it more firmly. At last, in 1520 fortune seemed to declare in favour of the latter when Christian II of Denmark overthrew and slew Sten Sture II, and put to death at Stockholm by a wholesale massacre, 94 prelates, senators, and nobles, who were disposed to dispute his authority. This atrocity worked its own punishment. The Swedes, headed by Gustavus Eriksson Vasa, son of one of the victims, flew to arms, and the Danes, after a strong but ineffectual resistance, were finally expelled. With the new dynasty which thus commenced with unanimous consent in the person of Gustavus Vasa, the proper independence of Sweden may be said to have commenced, and its history becomes much more interesting. In 1522, the Reformation was introduced by Olaus Petri, a disciple of Luther, and advanced with such rapidity that in 1523, at the diet of Westerås, the king and people solemnly vowed adherence to the Confession of Augsburg as their standard of faith. The reign of Gustavus was long and prosperous and Sweden, enjoying the double blessings of a better government, and a purer religion, made most progress in civilization then for centuries before. At his death, in 1560 this prosperity was suddenly interrupted by the succession of his son Erik XIV, who involved his country in rash and unsuccessful wars with Russia, Poland and Denmark and committed so many atrocities, that remorse at last stung him to madness. The states formally deposed him, and gave the crown to his brother John III in 1569. John reigned prosperously till he provoked the hostility of his subjects, by attempting to introduce a modified form of Popery. The attempt signally failed, and Lutheranism regained its ascendancy, without punishing matters so far as to deprive John of his throne. His son Sigismund, who succeeded him in 1592 had, five years before, been elected King of Poland, and thus united the two crowns. He might have reigned peacefully but taught by the lesson which his father had received, he renewed the attempt in favour of Popery, and failed still more signally. After provoking a religious war and calling in the Poles to crush the liberties of the Swedes, he was finally deposed by the diet of Riksdag, and his uncle the Duke of Södermanland, who had long stood at the head of the Protestant interest, was called to the throne in 1604, under the name of Charles IX. A war of succession between the Swedes and Poles now commenced and was carried on with great fierceness and varied success for many years. Charles was, however, so far successful, that on his death, in 1611 his son Gustavus Adolphus took peaceable possession of the throne. The reign of this most distinguished sovereign, and his heroic achievements in Germany

in defence of Protestantism, when threatened with destruction by the tyranny and bigotry of the house of Austria, belong more to European than to Swedish history. The first years of his reign were devoted to internal improvements, and the consolidation of the valuable conquests which had been made on the continent. By the treaty of Stolbovo, in 1617, he obtained from Russia a cession of all her possessions on the Baltic, and by that of Altmark, in 1629 Livonia and Polish Prussia became Swedish provinces. In 1630 he was appointed captain-general of the Protestant league, and commanded the series of brilliant victories, which at once saved Protestantism and gave a death blow to the ambitious aims of Rome. His victory at Lützen, in 1632 cost him his life, and he was succeeded by his daughter Christina, when only six years of age. The evils usually attendant on a minority were avoided by the ability with which the celebrated Chancellor Oxenstierna administered the government and new laurels were reaped by the Swedish armies under the leadership of captains whom the great Gustavus had trained. At the peace of Westphalia, in 1648, Sweden was formally confirmed in her continental possessions, which gave her a voice in the Germanic diet, and raised her to the rank of a first-rate European power. Christina assumed the reins of government, but soon avowed that she had neither inclination nor the kind of ability requisite to manage them properly, and finally completed her series of eccentricities by abdicating the throne, retiring to Rome and dying a Roman Catholic. Her abdication was made in 1654, in favour of her cousin, Count Palatine of Deux Ponts, who assumed the throne under the name of Charles Gustavus. He displayed great military talents, and made important conquests in his dominions. He was succeeded in 1660, by a son in minority, under the title of Charles XI, who reigned with distinguished ability for the long period of 37 years. During this reign a struggle commenced between the crown and the aristocracy. The burghers and peasants took part with the former, and at last, in 1697, the diet formally surrendered its powers, and declared the king absolute. He was wise and pious enough not to abuse the powers thus extravagantly conferred, and at his death, in 1697, left the kingdom in very flourishing condition to his son Charles XII. This celebrated prince, then a mere youth, found himself suddenly assailed by an ungenerous coalition on the part of Poland, Denmark, and Russia; but he soon rid himself of his opponents by signally defeating each of them in succession. It had been well for himself and his country could he have rested satisfied with the honour of dictating an advantageous peace, but unparalled success, working on a mind in which ambition and the love of glory were ruling passions, ruined all. He lost his conquests as rapidly as he had gained them; and at his death, in 1718, left his kingdom greatly curtailed in its dimensions, and exhausted by ruinous wars. Internal dissensions were now added to foreign disasters and two violent factions, known by the name of the Hats and Caps—the former favouring a French, and the latter a Russian alliance—kept the nation in a state of ferment for more than half a century. Charles XII had been succeeded by his sister Ulrika-Eleonora who shortly after abdicated in favour of her husband Frederick of Hesse-Cassel, during whose reign Sweden was obliged to submit to two most disadvantageous treaties with Russia—that of Nydard, in 1721 and that of Åbo, in 1743, the effect of which was to degrade her from the commanding position she had previously occupied, and sink her again to the rank of a second-rate power. In 1761, Adolphus Frederick of Holstein-Gottorp succeeded, and was followed, in 1771, by his son Gustavus III who by the support of the army and body of the people, succeeded in re-establishing the government nearly as it existed in 1690 and in getting down the faction of the Hats and Caps the use of which party-names was extensively prohibited. The chief events in the reign of Gustavus III are the adhesion of the armed neutrality of the Northern Powers against Great Britain, an alliance with the Porte, which led to a war with Russia and Denmark, and, on the outbreak of the French revolution, an alliance with Austria and Russia, with a view to a combined invasion of France. Gustavus III was to have headed the invasion in person, but perished by the hand of an assassin in 1792. The reign of his son and successor Gustavus IV, was a continued series of disasters, every change of policy only leading to some new

ions of territory, all Sweden was stripped of her continental possessions, of the Åland Isles, and the remainder of Finland. These losses were partly attributed to the king's incapacity, and he was not only deposed, but his son, who should have been Gustavus V., was set aside, and his uncle, the Duke of Sudermania, ascended the throne under the title of Charles XIII. As he was old, and without issue, the Prince of Holstein-Augustenburg had been declared his successor, but the sudden death of that prince in 1810, rendered a new election necessary and Bernadotte, one of Napoleon's marshals who had risen from the ranks, was chosen crown-prince by the states. On his arrival he assumed the reins of government. It was thought by many that he would prove a mere tool in the hands of Bonaparte, but he soon gave proofs of independence, and of a determination to pursue the true interests of his adopted country, regardless of all other considerations. On the reverses of Bonaparte during his Russian expedition, he entered into alliance with Russia and Great Britain, and during the war of liberation in 1813 not only led the Swedish troops in person, but is said to have contributed greatly by his counsels to the success of the campaign. At the peace, Sweden received compensation for her losses, and services, by the cession of Norway.

Charles XIII died in 1818, and Bernadotte assumed the title of Charles XIV. He showed himself throughout an able, enlightened, and patriotic prince, and at his death, in 1844, left the kingdom, in a far more prosperous state than he found it, to his son who reigned under the title of Oscar I and died in 1869. The united kingdoms enjoying the blessings of peace and good government, continue to make rapid advances in prosperity.

SWENIGOROD a m. Russia, gov and 30 m. W Moscow, on the Moskwa, with a Kremlin or fortress, in a very dissected state, three churches, a church school, manufactures of silk, and some trade. Pop. (1850) 1360.

SWETOGHIM a vil and com. Belgium, prov W Flanders, 27 m. S. by E. Brugue with a church several schools, breweries, distilleries, dyeing and bleaching works and manufactures of linens, hats, ropes, candles, starch, tobacco, and oil. Pop. 5242.

SWETHELLE a vil and com. Belgium, prov W Flanders, 10 m. S. Bruges. Most of the inhabitants are Roman-catholics. There are also Jews and Catholics. P. 4824.

SWIAGA a town, river to S.W. of gov. Simbrik flows N.W. E. entering the W. side of the town of that name. Sw. V. into gov. Kazan, and joins the V. Olga, near Swiejsk, total course, about 200 m.

SWIENTA-BIERKA a tn Prussia. See HELLENBERG. **SWIETLA OBER-DER-SARAWA**, a tn. Bohemia, circle and 17 m. S. Olomouc, on the Sava, here crossed by a long wooden bridge. It has a castle, church, townhouse, hospital, and school, and manufactures of glass, paper and pencils. Glasses are found and polished here. Pop. 1472.

SWILLY (Lough), an arm of the Atlantic, which formed by Dundee Head on the E. and Point Point on the W. in the N. of Ireland, co. Down, penetrates that county in a S. but somewhat circuitous direction for about 25 m. It is a fine expanse, of great depth, and on its E. shore, opposite to the town of Buncrana, has a roadstead where the largest men-of-war might anchor in safety. It is not much frequented.

SWIMBRIDGE, a vil. and par. England, co. Devon, 4 m. E.E.E. Barnstaple, in a hollow surrounded by verdant hills, with a handsome church, and several quarries of limestone and building-stone. Area of par. 7280 ac. Pop. 1788.

SWINON, a market tn. and par. England, co. Wilt. The town, 41 m. S. Salisbury, a station on the Great Western railway has five parallel streets, generally of good width, regular and well kept; a beautiful Gothic parish church, with a beautiful tower and spire. Independent, two Wesleyan, Primitive Methodist and Baptist chapels a handsome townhall and market-house, national, infant, and British schools a library and literary institution, with a reading-room.—The Great Western railway workshops are here, and when in full operation employ 1500 hands. In connection with them a new town called New Swindon, has recently sprung up. It has been formed into a separate ecclesiastical district, and has a handsome church, schools, &c. A new building, to furnish market-stalls, and accommodate the mechanics institute, library, theatre, &c. is (1864) in course of erection. The

weekly corn market of Swindon is important. Area, 8196 ac. Pop. 4876.

SWINEFLEET a vil. and chapelry, England, co. York (W. Riding), on the Ouse, 8 m. E.E. G. G. G. It consists of a long range of well-built houses, stretching along the banks of the river. Besides the chapel, there are places of worship for the Primitive and Wesleyan Methodists. Pop. 1159.

SWINEFORD a small market tn. Ireland, co. Mayo 28 m. S.W. by S. Ballina with an Episcopalian church, a R. Catholic chapel, workhouse, court-house, and national school. Pop. 391.

SWINEMUNDE, a seaport in Prussia, prov Pomerania, gov and 80 m. N.N.W. Stettin, of which it is the port, on an island on the shores of the Baltic, separated from the mainland by the Kettiner-Haff, the Swine and other channels, by which the Oder discharges itself into the sea. It has spacious well-built streets, a court of law, and several public offices a harbour, in which vessels drawing 18 ft. or 19 ft. can unload at the quay, and good building-docks. In 1852 there entered the port 1864 vessels. It is much frequented for sea bathing and has a bath-house and assembly room about 1 m. from the town. Pop. 4035.

SWINESHAD a market tn. and par. England co. Lincoln 7 m. S.W. Boston. It was formerly washed by the sea, and had a harbour which has been silted up. It has a handsome church with a lofty spire, a free school, and the remains of a Danish encampment. Area of par. 6100 ac. P. 3044.

SWINFORD Remus, or KNOB-SWINFORD a par. England co. Stafford on the Dudley and Stourbridge, and the Staffordshire and Worcestershire canals, in a district abounding with iron and coal, 8 m. W.S.W. Dudley. It has a handsome modern church an ancient church now converted into a chapel of ease, four other churches, Baptist, Independent, and Primitive and Wesleyan Methodist chapels; extensive manufactures of iron, iron and steel goods, tin and glass ware brick and tile works, potteries for stone and earthen ware, and numerous collieries. Area, 7315 ac. Pop. 27,301.

SWINNERTON a vil and par. England co. Stafford on the Sow in a finely diversified district, through which both the Trent and Mersey canal and the Liverpool and Birmingham railway pass, 8 m. W.N.W. Stone. It has an ancient parish church with a vestry which as a parochial school, and containing a colossal figure of our Saviour, which was dug up in the vicinity and is supposed to have been there secured at the Reformation. Area of par. 5523 ac. P. 946.

SWINTON a vil. and chapelry, England, co. York (W. Riding) on the Don and the Midland railway 6 m. N.N.E. Rotherham. It has a handsome chapel, Wesleyan and Independent chapels a national school, iron works, and manufactures of cloths and earthen ware. Pop. 1817.

SWINTON and BIRKBECK par. Scot. Berwick 4 m. by 3 m. Pop. 994.

SWIL, a river Russia, issues from the S.W. extremity of Lake Onega, gov. Olonetz, flows W.S.W. and falls into the S.E. side of Lake Ladoga. It is 140 m. long, and has the two largest Russian lakes, and has its importance very much increased by means of a canal, which avoids the difficult navigation of the latter lake, and proceeds along its S. shore to St. Petersburg. The whole course of the Swil is about 140 m.

SWITZERLAND (German, *Schweiz*; Italian, *Svizzera*; French, *Suisse*; Latin, *Helvetia*), a federal republic of Central Europe, situated between lat. 45° 50' and 47° 50' N. and lon. 6° and 10° 20' E. and bounded, N. by Baden, from which it is separated for the most part by the Rhine, N.E. by Wurtemberg and Bavaria, from which it is separated by the Lake of Constance; E. by the principality of Liechtenstein and the Tyrol, from the former of which it is separated by the Rhine, and from the latter partly by the Rhine, but chiefly by ranges of the Graubünden Alps; E. by Austria, Italy, Piedmont, and Savoy, from the two first of which it is separated also by the Alps, and from the latter partly by the Alps and the Lake of Geneva; W. by France, from which it is separated in part by the Jura mountains and the river Doubs. It thus appears that mountainous and rivers inclose the country on almost every side, and define its boundaries by grand natural features. The chief localities where these features are wanting are on the N., where the greater part of cant. Schaffhausen lying N. of the Rhine is contiguous to Baden, in the S., where the S. part of cant. Ticino

developed. Granular limestone is widely diffused throughout the Alps, and is more particularly abundant on the Great and Little St. Bernard, and the S. side of St. Gothard. Its usual veins are micaceous, and often alternates with clay-slate and primitive gneiss. Mountain limestone composes the great masses of the Dent du Midi, the Diablerets, the Waterboeren, Doldi &c. It is also seen in large masses on the E. shore of the Lake of Geneva, on the Molesmen, Stockhorn, Pilat, and Saentis. The proper carboniferous rocks are very sparingly developed, but regular coal-bearing strata are found in the St. Gallen, the Rorschach, and on the S. shore of Lake Thun. In the Jura limestone equivalent to the oolite, often resting on marls, is so largely developed, that the name of Jura limestone is now often applied to the whole oolite formation. Above the Jura limestone is the molasse, a soft green sandstone, belonging to the lower series of the tertiary formation, and covering an extensive area in the lower parts of Switzerland. None of the rocks are rich in minerals. As in almost all mountainous countries, particles of gold are found in the sands of many of the rivers, and more especially in those of the Rhine, in the Rhodan, in the Rhone, the Emme, and the Letten, but in none of them in such quantities as to repay the search. Lead and copper, both argentiferous, are found in the oolite. Gypsum, and white marl, though they occur in abundance. Iron is more widely diffused, and is worked to advantage in several quarters, particularly among the strata connected with the Jura limestone. Rock-salt is worked to some extent in the Val de Saline and some springs occur in many places but have not been turned to much account. The only other minerals deserving of notice are alabaster and marble, widely diffused sulphur near Lake Thun, gypsum, particularly in the Fribourg, and asphaltum, in the Val-de-Travers in the Valais. Mineral springs occur in many quarters, the most celebrated, we may mention those of Leuk in the Valais, Fluden and Schuttschwil in Aargau, Pfäfers in St. Gall, and St. Moritz in the Grisons.

Climate.—The great diversities here observed, are evidently caused not by differences of latitude, but of elevation. Hence while winter is reigning in all its rigour on the lofty summits or slopes of the mountains, it is only necessary to descend into the lower valleys to find that spring is far advanced. In making this descent we may direct our course not only E., where in the lower valleys of the canton of Tessin a truly Italian climate is enjoyed, but even N. and in the plains of Basel that winter has long departed, though it still lingers among the heights of St. Gothard. According to observations which have long been made with great care at the hospice of St. Gothard, Berne, Zürich, and Geneva, the respective mean temperatures are, in winter 37° 39' 37' 30"-84, 38°-85 and in summer 46° 71' 58°-78, 54° 15, and 66°-10. For the purpose of comparison, we may mention that the winter-temperature of London, is 38°-22° and the summer-temperature, 51° 74° and that the mean annual temperature of the hospice of St. Gothard, is nearly two degrees lower than that of the N. Cape. The same causes which thus diversify the climate, tend to make the temperature variable even in the same localities, and hence days of almost insupportable heat, are not infrequently preceded by cold mornings, and succeeded by equally cold evenings. These sudden changes are very trying to weak constitutions, and sometimes make epidemic diseases generally prevalent, but, with the exception of a few swampy spots from which deleterious miasma is diffused the air is clear and bracing, and eminently favourable to health.

Vegetation.—Agriculture, &c.—Few countries in Europe, even of larger extent, can boast of a more varied vegetation than Switzerland. It has been divided into seven regions. The characteristic product of the first is the vine, which grows up to 1700 ft. and in some districts of Zürich, and the Lake of Thun, to 1800 ft. above the sea-level. The next in ascent is the hilly, or lower mountain-region. It rises to the height of 2600 ft., and is characterized by the luxuriance of its vegetation. Though not well adapted for wheat, it yields good crops of rye, and has excellent meadows, from which two cuttings of hay are annually obtained. The third, or upper mountain-region, has its base at 4100 ft. Its principal product is forest-wood, consisting of all varieties of hard-wood but more especially beech. The highest growth is fir, though not vigorously, up to 5500 ft., and good crops are obtained of barley and oats. The pastures too are excellent. Above

this, and up to the height of 5500 ft., is occupied by the fourth or subalpine region, distinguished by its pine-forest. Here winter lasts from eight to nine months; no regular crops are grown, but some kinds of kitchen-vegetables are raised and a few potatoes, generally of small size. Many of the heights are covered with a rich grassy sward. The next two regions are sometimes included under the common name of alpine, though it evidently admits of two distinct divisions; the one, lower alpine, terminating at 6500 ft., and the other, upper alpine, ascending to the limit of perpetual snow. The former is the proper region of alpine pastures the latter as it ascends becomes more and more stunted in its vegetation, and the vegetation of the summer is lost, spring and autumn being altogether excluded, and a winter of rigorous severity following close upon a short summer of only five or six weeks. In the lower parts of these regions some trees are occasionally seen but many of the valleys are filled with enormous glaciers, and in many spots and ravines which the sun cannot reach, the snow never entirely melts. The seventh and last region is that of perpetual snow. Even here vegetation is not utterly extinct, and several varieties of lichens are found clinging to the rocks. Many parts, even of the lower regions of Switzerland are of a very sterile nature, but on every aspect the effect of pasturing industry is seen, and no spot that can be traced to good account is left unoccupied. Still so unfavourable is the soil and climate that on dividing the whole area of the country into three parts, it will be found that only one of these raises grain sufficient for its own consumption, the second raises not more than eight and the third barely six months supply. The deficiency is supplemented partly by importation and partly by the general cultivation of potatoes in the more mountainous districts dairy produce forms the chief article of subsistence. The best cultivated countries are Basel, Aargau, Thurgau, Valais, and Geneva. The principal grain-crops are, in the latter districts, wheat, rye, summer and winter barley and flint corn; in the higher districts summer-barley and oats. Hemp and flax are extensively grown on all lands suitable for them, and nearly supply the whole of the home consumption, oil and poppy seed are also generally cultivated, and in some of the higher districts sawney forms a favourite crop. Tobacco is chiefly confined to the flatter parts of Fribourg, Tessin, and Vaud. In the same districts occasional patches of cotton are sown. Fruit is produced in abundance in all the N. cantons, where apples, pear, and cherry trees are seen in almost every quarter, growing either singly or in orchards they are met with less frequently in the S. and W. and become somewhat rare in the S. In many of the warmer spots with a S. exposure and N. shelter apricots, peaches, almonds, and figs thrive well in the open air. More delicate fruits, as oranges, citrons, lemons, and pomegranates, are almost confined to the S. side of the Alps, as can be seen. There too the olive thrives, and a good deal of silk is obtained by the cultivation of the mulberry. With the exception of Uri and Glarus, there is not a season in which the vine is not grown to a greater or less extent. Many of the cantons thus raise more wine than they require, but the quality, in general, is inferior, and fails to create a foreign demand. Timber of all kinds is abundant in most of the cantons, but great waste has been committed, and several of the most accessible forests have been so much thinned, that the prospect of an ultimate scarcity in several quarters has begun to excite serious apprehension. Among domestic animals the first place belongs to the horned cattle, which are both remarkable for their numbers and the superiority of their breeds. Swiss cows can scarcely be surpassed, either in beauty or in the amount of their dairy produce, and the demand for them in other countries has given rise to a very lucrative branch of trade. The summer-stock is estimated at 900,000, and the winter-stock at 600,000 head. Horses attract less attention, and are generally of rather diminutive size, though strong and hardy. Where used merely as pack-animals to transport burdens across the mountains, they are generally well adapted for the purpose. The mules used in the same way are only tolerable; the ass, also occasionally used is very inferior. Sheep are very much confined to the lower districts, and have not yet attracted much attention, except in some Valais and Geneva, where the western regularly imported from Spain, is both kept pure, chiefly for the purpose of supplying a foreign demand, and has been extensively em-

played in improving the native breeds; on the higher grounds, where sheep cannot well be reared, and chiefly among the poorer classes, unable to procure a more valuable stock of horned cattle, goats are very numerous, and menacade to pick up their subsistence where no other domestic animal could live, contribute greatly to the comfort if not to the wealth of their possessors. Among wild animals are bears and wolves, found both in the Alps and Jura, chamois, found chiefly among the loftiest mountains of the Alps; wild boars, not uncommon in some Bern, Vaud, and Aargau, stags, in some Jura, and occasionally in the Grisons; badgers, foxes, hares, otters, birds of prey of large dimensions, and many varieties of winged game. The lakes and rivers are well supplied with fish, among which are several varieties of salmon found chiefly in the Rhine and the waters connected with it, salmon-trout of large size, chiefly in the lakes of Constantine and Geneva and common trout in almost all the rivers and lakes. The only insects deserving of notice are bees, the rearing of which forms an important occupation in several cantons, and silk worms, almost confined to cant. Tessin. In the last canton, too, are found vipers, the only venomous reptiles of the alpine land known in Switzerland, and some scorpions.

Manufactures and Trade.—Through the geographical position and the configuration of the surface place Switzerland under considerable disadvantages, manufacture of various kinds were established in it at a very early period and have extended rapidly in recent times, in face of the formidable competition to which they are subjected. The factory system, however, is little known and the far greater part of the tissues are produced by domestic looms not kept in regular operation throughout the year, but chiefly during the winter and in the evenings when the ordinary labours of the field have ceased. The quantities of goods thus made are great, but the difficulty of ascertaining the exact amount is much increased. Among the staple articles of Swiss manufacture are silk goods, chiefly in Zürich and Basel, cotton goods also chiefly in Zürich, and to a considerable extent likewise in St. Gall and Appenzell, linen and hempen cloth in Aargau, Thurgau and St. Gall, jewellery and watches in Geneva, Vaud, Neuchâtel, and Bern, cutlery and various articles of hardware in Schaffhausen, writing and stained paper at Basel, leather and skins chiefly in Bern, Vaud, Zürich, Geneva, Basel and Aargau, as at Lausanne, Yverdon, Motiers, and various other places, straw hats, and various articles in straw, in Aargau and Lucerne, musical instruments at Glarus, and mathematical instruments at Bern. These articles furnish of themselves the materials of a considerable export trade, and to these must be added cattle, cows, butter, cheese, cherry brandy, timber, charcoal, medicinal plants, &c. the more important imports are corn, rice, salt, salt-fish, wine, colonial produce, fine woollens and various articles in iron and copper. In addition to this ordinary trade, Switzerland shares in the very important transit which is carried on between France, Germany, and Italy. The nature of the country throws very extraordinary difficulties in the way of this traffic, but the means which have been employed to lessen or remove them are almost as extraordinary as the difficulties, and the great roads which now lead across some of the loftiest passes of the Alps will long be pointed to as among the most remarkable of engineering achievements. Nor have the ordinary communications of the interior been neglected. In almost every canton as far as the nature of the surface will admit, the roads are both well made and carefully kept, and though the impossibility of the rivers greatly limits their navigable importance, and leaves little scope for the construction of extensive canals, many hydraulic works have been executed on a scale of no mean extent, considering the limited resources of the country and the obstacles to be overcome. Among others may be mentioned the two canals of the Rhône one connecting it with the Lake of Wallenstadt, and the other connecting it through that lake with the Lake of Zürich. One of the great facilities for trade which Switzerland still wants, and by a little mutual concession might easily obtain, is a uniform system of weights and measures. At present every canton is at liberty to establish its own, and the consequence is that proper standards nowhere exist, and commercial transactions often cannot be completed without perplexing calculations both as to the amount and the price of articles proposed for sale. The difficulty is somewhat relieved by the general use of French

and German units, and it may be observed, as a general rule, that the Swiss is nearly one-half more than the French franc, or about 1s. 6d. sterling.

Government and People.—The cantons of Switzerland, 29 in number are united together as a federal republic for mutual defence, but retain their individual independence in regard to all matters of internal administration. By the constitution adopted by the federal diet, September 12, 1848, the federal assembly is composed of two divisions—the national council, and the council of the states or the senate. The national council is named by the cantons—one member to each 20,000 but when a surplus of above 10,000 exists, an additional member is elected. The members are chosen for three years. Each canton, and when divided each half canton, is entitled to send one member at least. The senate consists of forty-four members—two for each canton, the half cantons sending one each. The federal council, composed of seven members, elected for three years, is chosen by the national council from among the Swiss citizens eligible for the national council. Only the Confederation, represented by the two councils, has the right to declare war, make peace, and to conclude treaties and alliances. The Confederation alone is charged with the official relations between the cantons and with foreign governments. The federal tribunal, of 11 members and 11 substitutes, is named by the federal assembly for three years. This tribunal judges in civil cases between the cantons, or between them and the Confederation, also between the Confederation or cantons on the one part, and individuals on the other. For cases of discipline it divides into two sections, to constitute the chamber of censure, the jury, and the court of execution. On November 28, 1848, Bern was chosen to be the federal city. The different languages spoken in Switzerland evidently show that the people have not a common origin, but belong to different races. In the W., where French is spoken they are supposed to be descendants of the ancient Burgundians, whose territories included both sides of the Jura, in the S. where German is spoken, a common origin is indicated with the Germans of Saxony and the Tyrol, and in the E., both the language and physical features are Italian, though those on the S. of the Alps indicate the more strongly than the inhabitants of the Grisons, who exhibit several peculiarities, and form a kind of corrupt Latin called Romansch. But apart from the difficulties of origin and language, the Swiss have lived so long in a state of confederation that they have acquired a decided national character and may now be viewed as forming a single people. Thus viewed, they are hardy, active, industrious, temperate, brave, patriotic, well educated, moral and religious, and in all these respects will not lose by a comparison with any people in the world. They are not, however, without their faults. One of the most prominent of these is their excessive love of money. This makes them selfish and mercenary, and monopolizes as in the mode of life which they pursue, provided money can be made by it. Hence, notwithstanding their remarkable love of freedom they are anxious to have themselves out in menial capacities which are usually supposed to be least compatible with the enjoyment of it, and are ready to enlist in the service of any stronger power with perfect indifference as to the justice or injustice of the cause in which they may be required to spend their blood. While thus engaged, the only virtues on which they prize themselves is fidelity to their pay-master. The only forms of religion generally professed are the Protestant Free-church, as modelled by Calvin and Zuinglius, and the R. Catholic. The former counts above three-fifths and the latter embraces about two-fifths of the whole population.

History.—The Swiss first become known to us as c. 105, when part of them, under the name of Ligurini, in alliance with the Cimbric defeated a Roman army, and slew the consul, L. Cassius, who headed it. About 60 years after we find them, under the name of Helvetii, attempting to migrate to a holy land, but driven back after a signal defeat by Julius Cæsar. This proved the commencement of their subjection to the Roman yoke, and after vainly struggling for independence the whole country appears to have become resigned to its fate about A.D. 70. Near the beginning of the 6th century the northern hordes burst in and formed permanent settlements, the Alemanni making themselves masters of the N. and the Burgundians of the S.W. districts, while at a later period the

Gothic gained possession of the R.R. All these nations were ultimately subdued by the Franks, whose empire, about the middle of the 6th century, extended over many countries, and included, among others, the whole of Helvetia. On the disruption of the Frankish Empire, shortly after the death of Charlemagne, Helvetia was divided into five portions, an E. or German, which, falling to the share of Louis of Bavaria, was incorporated with the duchy of Swabia, and a W. or Burgundian, allotted to Lothar, who held the title of Emperor and King of Italy. This latter portion was afterwards incorporated with the kingdom of Upper Burgundy, which was formed by Rudolf in 898, and lasted till 1016, when it came into the possession of Henry II., Emperor of Germany. He having been previously in possession of the E. part, or Southern Helvetia, was now master of the whole country. As the German emperors could not govern it in person, they appointed liege lords or vassals, whose office appears to have become hereditary. One of the most conspicuous of these, Berthold of Zähringen, appointed in 1077, became the founder of a kind of dependent dynasty which ultimately extended over the greater part of Helvetia, and continued in his family till 1218, when the house of Zähringen became extinct. The country, still subject to the German emperors, appears now to have become subdivided into a number of lordships, free cantons, and imperial towns, all invested with peculiar rights and privileges. Among the lordships, that of Habsburg, by a series of fortunate events, gradually attained such a pre-eminence, that in 1273, Rudolf, one of its members, was elected Emperor of Germany and became founder of the house of Austria. Rudolf availed himself of his new powers to extend the influence of his house, and endeavoured to bring all Helvetia under his personal sway but was strenuously resisted by many quarters, and more especially by the free cantons of Schwyz, Uri, and Unterwalden. The designs of Rudolf, though sufficiently apparent, had been prevented with some degree of wisdom and moderation, but on his death in 1291 his son and successor Albert threw off all disguise, and by his violence and tyranny soon brought matters to a crisis. The cantons holding their franchises under the empire, had been governed by imperial liege lords, but Albert endeavoured to change the nature of the franchises, by substituting for imperial feudal liege lords, so as to make it appear that the country instead of being a fief of the empire, formed part of the patrimony of his house. The vigilance and firmness of the cantons obliged him to appoint imperial liege lords as before, but he endeavoured to take his revenge by selecting men not only devoted entirely to his own interest, but bent on committing all kinds of extortion and oppression. Resistance was resolved upon, and in 1307 a few peasants met secretly on the Rütli, and boldly bound themselves by oath to achieve the independence of their country, or perish in the attempt. The struggle which ensued forms the brightest page in Swiss history. The great victory of Morgarten in 1315, led to the establishment of a federal pact between the three cantons, and formed the nucleus of the existing Confederation. Other cantons gave in their adhesion, and the number already amounted to eight, when a second great victory at Sempach, 1386, humbled Austria, that the shortly after concluded 30 years truce. Clementines continued to favour the confederates, and the limits of their territories extended rapidly on every side. A quarrel with Ulrich at one time threatened disastrous consequences but was happily terminated in 1446 and a new war in which Austria rashly engaged only enabled the Swiss to wrest from her the greater part of her remaining possessions in Switzerland. In 1476 a formidable enemy appeared in the person of Charles the Rash, Duke of Burgundy, who entered Switzerland at the head of a powerful army. He was not more successful than Austria, and the victory of Murten, in 1476, showed manifestly his forces. In 1661 dissensions which had arisen among the cantons, and even threatened the existence of the Confederation, were terminated by the moderate and patriotic counsels of Nicholas von Fries, and many years of peace and prosperity enabled the Swiss to prepare for meeting the last great effort which was made against their independence from the side of Germany. This was in 1499 when Maximilian the emperor, as the legal heir of the Swiss, called upon them to furnish a contingent of troops, and as their refusal, declared war against them. A succession of defeats left him no inclination to con-

tinue it, and a year had scarcely elapsed before peace was concluded. Shortly after the Swiss commenced the very questionable practice, from which they have not entirely desisted, of taking themselves out as mercenaries, to fight the battles of foreign powers, mostly in return for the pay or plunder which they secure from them. But we have now arrived at the commencement of the 16th century, when Switzerland had an opportunity of engaging in a most honourable warfare. In 1516, the preaching of indignities provoked opposition, as in Germany, and Zwingli appeared as the pioneer of a series of distinguished reformers, who ultimately succeeded in gaining over a majority of the cantons to their principles. Since then, Switzerland has long distinguished herself by the asylum afforded to refugees from other countries, when driven from their homes by the tyranny or bigotry of their rulers. Subsequent to the struggles connected with the Reformation, no events of much interest occurred till 1798, when the French revolutionaries commenced their aggressions by seizing the territory of the Bishop of Basel. Their designs, at first thinly disguised, were more and more openly manifested; and at last Switzerland, though not without several noble struggles to maintain her independence, was, in 1803, degraded by what is called the Act of Mediation into a kind of French protectorate, 19 cantons retaining a nominal independence, while three, Geneva, Neuchâtel, and the Valais, were formally extinguished by being incorporated with France. The overthrow of Napoleon made Switzerland again free, and a Confederation, composed of 26 independent cantons, was re-established and formally recognized and guaranteed by the congress of Vienna in 1815. At this period the constitutions of the different cantons presented numerous varieties but the general tendency since has been to give a complete ascendancy to the democratic principle, and introduce universal suffrage.

SWORDE, a market to. and par Ireland, co. and 8 m. N. by E. Dublin & bank river Sworde houses irregularly built, most of them wood-built. It has a Protestant church and a R. Catholic chapel a small neat workhouse, several schools, including a borough school, in which lectures on chemistry &c., are occasionally given but neither manufactures nor trade. There is here one of the round-towers of Ireland, 90 ft. high. Area of par 9675 ac. Pop. 1965
SWRATAUCH, or **SWRATAUCH** a vil. Bohemia, circle and 21 m. S. S. E. Chlumitz, with a Protestant church a school and manufactures of linen and earthenware. Pop. 1834.

SWATKA a market in Bohemia, circle and 8 m. from Chlumitz, with a church. Pop. 1069.

SWYNAERDE, a vil and comm. Belgium prov E. Flanders, on the Scheldt, 8 m. S. Ghent with manufactures of linen bric-works, an oil and a flour mill. Pop. 1905.

SYANG a small Indian Archipelago, Gilolo Passage lat. 0° 20' N., lon. 159° 54' E.; low and flat.

SYDENHAM a chapelry England, co. Kent par Lewisham, in a beautiful and suburban district situated with handsome seats and villas, on the London and Croydon railway, 6 m. S. S. E. London. It possesses an elegant district church, and Wesleyan and Independent chapels, and has become an object of national notice, rather of European renown from having been selected as the site of a new Crystal Palace opened by her Majesty Queen Victoria, on June 10 1854, and formed chiefly out of the materials of that which stood in Hyde Park in 1851 but superior to it, both in its structure and in the completeness of its arrangements as a permanent depository of science and art. Though not so long as its predecessor it greatly exceeds it in its general dimensions, by the increased height of each part the introduction of two additional transepts, the larger size of the central transept, and an under story, rendered necessary on the garden side by the slope of the ground. Some of the chief details of the former building have also been removed, by the arched roofs given to the centre divisions, and the projection internally of pairs of columns for the support of the main arched ribs. The entire length is 1806 ft. the length of centre transept, 406 ft. length of end transepts, 512 ft.; the width of nave is 78 ft., the width of centre transept, 120 ft.; and the width of end transepts, 75 ft. The height from the floor to the centre of the roof of the nave, and of end transepts, is 106 ft.; and the height from the floor to the centre of the roof of the centre transept, 170 ft. In addition to all that was done in Hyde

Park for the illustration of modern art and manufactures. Sydenham Palace contains an extensive museum of antiquities, including part of the Assyrian collection, and of specimens in botany, zoology and mineralogy, together with casts of the more extraordinary antiquities, and figures illustrative of ethnology, by exhibiting individuals of the various races habited and placed as they lived. The gardens, which are of great extent, and provided with fountains and water-works on a larger scale than those of Versailles, are carefully laid out so as to combine instruction with recreation.

SYDENHAM or **OWEN'S SOUND**, a tn. Canada West on Owen's Sound, a port of the great Georgian Bay of Lake Huron, 110 m. N. W. Toronto. It was laid out in 1846, and is rising rapidly. It has four Protestant churches, and several good schools. manufactures of cloth, iron, and leather and numerous flour and saw mills. Pop. about 1200.

SYDENHAM ISLAND Pacific Ocean. See **NANOUTI**.
SYDENSTONE, par Eng. Norfolk 2530 ac. Pop. 557.
SYDLING (St. Nicholas) par Eng. Dorset 5028 ac. Pop. 675.

SYDNEY a tn. British America, cap. of Cape Breton, on a narrow tongue of land at the head of a fine bay, which forms a spacious and secure harbour. lat. 45° 19' N. lon. 60° 31' W. It consists of about 80 houses is well situated as regards the salubrity, and has near it rich coal-mines.

SYDNEY a seaport tn. Australia, cap. New South Wales, beautifully and advantageously situated on Sydney Cove, on the E. side of Port Jackson 7 m. from the heads lat. (Fort Macquarie) 33° 51' 42" S.; lon. 151° 14' E (n). It stands partly on a small freestone promontory, having Darling harbour on the W. and partly in a narrow valley, and viewed either from the sea or adjoining heights on the main

much taste in their external appearance, but are substantially built of brick or stone, many of them with small but neatly laid-out gardens; and several of the streets, among which George Street and Pitt Street deserve special notice, present ranges of handsome edifices and elegant shops, which may vie with those in some of the great capitals of Europe. It has extensive and increasing suburbs—W. Pyrmont and Balmain, across Darling harbour, E. Woolloomooloo, or Harbottle Town; S.E. Paddington and Surrey Hills S. Zetland and Chippendale; and S.W. Carpendarum Newton, and the Glebe. The most important public buildings are the churches, which include five Protestant Episcopalian three Presbyterian, two R. Catholic, six Methodist, one Baptist, and one Quaker. The other buildings and institutions most deserving of notice are the government-house, a very handsome structure of white freestone, in the Elizabethan style, and finely situated among well-wooded grounds on a height overlooking Sydney Cove. Sydney university occupying a commodious building and furnishing a good education in classics, mathematics, and natural philosophy; a R. Catholic college, a normal, and several other superior schools; the new court-house, and adjoining it the new jail built on an extensive scale, with a fine regard to the classification of prisoners; theatre, a museum, the legislative and executive council chambers consisting of a handsome range of stone-buildings, with a noble colonnade, forming a verandah and balcony, the new barracks, a large but plain series of buildings, the custom-house, public library public markets, the benevolent asylum and two hospitals. society for the promotion of the fine arts and floral and horticultural societies.

Sydney has not yet reached the period when any great number of its inhabitants must look to manufactures as a

land, presents a very pleasing and even imposing appearance. During the first years of its existence, it consisted of a number of paltry huts, huddled together or scattered irregularly without any preconceived arrangement, and that part of the town, notwithstanding numerous alterations and improvements, is still its least inviting quarter; but elsewhere the streets intersect each other at right angles, and are so spacious that not fewer than 36 of them have carriage-ways of not less than 55 ft., and foot-ways of not less than 13 ft. wide. All these streets are well paved or macadamized, remarkably well kept, and lighted with gas. The houses seldom exhibit

the want of employment, but the trade is very extensive and enjoys facilities of which few other ports can boast. Its haven about 15 m. long, and in some parts 3 m. broad is completely landlocked and indented by numerous creeks, with depth of water sufficient to allow the largest vessels to enter, and lie close to the warehouses which line the shores. To make the accommodation more complete, a circular quay has been erected at an expense of more than £27,000. Nor have the means of defence been altogether overlooked. On the highest ground within the N. portion of the town, an admirable site for a citadel has been selected, and partly constructed. Several other forts occupy commanding positions within the cove, and were the defenses made complete, by the erection of batteries on the two lofty headlands which, about 1½ m. apart, form the entrance of Port Jackson and George's Head, which immediately fronts it, a hostile approach by sea might justly be regarded as all but impossible. The principal exports of Sydney are wool, tallow, and hides, and the produce of the southern whale-fishery, particularly whale-oil and whale-bone, the principal imports are grain and provisions, including tea, coffee, sugar, &c. wine and spirits, soap and candles, wearing apparel, furniture, carriages, and various articles of ordinary manufacture, so tissues, hardware, agricultural implements, &c. In 1860 the value of the imports amounted to £7,800,000 and of the exports to £5,900,000. The great

stage of wool was exported in 1861-4 to the following extent—

| Export of Wool from SYRACUSE | | |
|------------------------------|------------|-------------|
| Year | Wool, lbs | Value |
| 1861 | 18,926,343 | \$1,795,225 |
| 1862 | 17,267,382 | 1,643,622 |
| 1863 | 21,254,587 | 1,824,000 |
| 1864 | 24,229,000 | — |

The discovery of gold in the colony (see *NEW SOUTH WALES*) has given an immense impetus to the trade of Syracuse, and added another most important article of export.

Gold brought to SYRACUSE from the interior.

| Year | Ounces | Value |
|------|---------|------------|
| 1861 | 161,894 | 1826 |
| 1862 | 180,500 | 2007 |
| 1863 | 175,000 | 2001 |
| 1864 | 168,000 | 1862 |
| 1865 | 167,250 | 1862 |
| 1866 | 156,000 | 1864 |
| 1867 | 148,126 | 1865 |
| 1868 | 165,250 | — |
| | Total | \$ 500,820 |

In regard to the means of transport within the town itself and in its environs, Syracuse is by no means deficient. Omnibuses, hackney cabs, and carriages are numerous in its streets as in those of the larger cities of the United Kingdom. Stagecoaches run regularly to all the most important towns and steamers ply daily between Syracuse and Parramatta, and at longer intervals to Melbourne, Adelaide, Launceston &c. For ordinary recreation a large area, about 2 m. in extent, and called Hyde Park, has been judiciously reserved and already forms one of the chief attractions of the place. One side of it is appropriated as a botanical garden the other extending along the shore, and raised a few feet above the rippling waves, is laid out in winding walks and terraces, arbours, shrubberies, and verdant slopes. The management of the city is vested in a corporation which has the power of meeting its expenditure by levying a police-rate. Though the population is of a very heterogeneous description, the good order of the community is seldom disturbed. Syracuse was founded in 1788, and named in honour of Viscount Sydney the colonial secretary of state. It made comparatively little progress till the time of Governor Macquarie, who caused a survey to be made of the whole locality marked out a regular plan for future buildings, and made many other important improvements. It received its charter of incorporation in 1842. In 1846 28,856 (1861), about 100,000.

SYHOON, or **SINHOUS** (anc. *Sarus*), a river Asiatic Turkey rises among the mountains of Taurus, N F Boetian, flows first N W past Adana, and 35 m below falls into the Mediterranean. Total course, about 180 m.

SYLT, an isl Denmark. See *Selt*.

SYLVIA, a river, Russia, rises in lat. 57° 30' N in a branch of the Ural Mountains, gov. Perm, flows easterly to N W, joining the in of Kamgort and after a course of nearly 300 m. joins L. bank Tschud river, 24 m. N E Perm.

SYMI, an isl. Asiatic Turkey S W coast Anatolia, 18 m. N W Rhodes, at the mouth of the gulf of the same name (anc. *Samos Dorada*), lat. 36° 30' 45' N lon. 27° 54' 15' E. (a). It is 6 m long, and 4 m broad high, rocky, and barren, rising to about 1000 ft. above sea-level, composed of gray limestone. Outline irregular, rocks bold and steep. Deep indentations mark both its N and S extremities. The soil is extremely unproductive. Commerce and enterprises have rendered this sterile spot a thriving mart. It is a depot for sponges and wool. The former article is found in the rough bearing sea, and employs the male population during the summer to procure it.—**SYME**, the cap. and only town on the island, is a thriving place, at the head of a bay on the N E angle of the island. The harbour is long and narrow with deep water and vessels lie close in. Pop. about 1000.

SYMINGTON, two pars. Scotland.—1. Ayr 4 m. by 13 m. Pop. 902.—2. Lanark; 8 m. by 13 m. Pop. 536. **SYMIOHROPOLIS** a town Russia. See *Symionovskoye*. **SYMIOHROPOLIS** (anc. *Symion*), a v. and com. Belgium, gov. Hainaut, 5 m. E. Maastricht with a brewery, a distillery, flour-mill, and lands in agricultural produce. Pop. 1157.

SYKORIN, a v. and com. Belgium, gov. E. Flanders, 10 m. S. S. W. Ghent; with a church, town-hall, hospital, orphan asylum, and two communal schools; some weaving, butterery, and corn and oil mills. Pop. 2767.
